ITEM 7. Other Events

Severe weather conditions in Seattle and Portland, including snow and freezing rain, have resulted in approximately 600 Alaska and 1,050 Horizon flight cancellations through the first eight days of 2004. This number of departure cancellations due to weather is significantly higher than what we have previously experienced. During the month of January, Alaska typically cancels approximately 100-125 flights and Horizon typically cancels approximately 100 flights, on average, due to weather.

The passenger load factor (the percentage of available seats occupied by fare paying passengers) for December 2003 was 72.9%, compared to 73.3% in December 2002. The airline carried 1,317,000 passengers compared to 1,256,500 in December 2002.

For November 2003, RASM increased by 7.8% as compared to November 2002. For October 2003, RASM increased by 8.1% as compared to October 2002.

Horizon Air		
Capacity (ASMs in millions)	619	(2.1%)

Capacity was down for the month of December because some of Horizon's aircraft were being prepared for entry into service flying under contract for Frontier Airlines.

The passenger load factor for December 2003 was 68.9%, compared to 67.2% last December. The airline carried 430,900 passengers compared to 441,100 in December 2002.

Table of Contents**Capacity and Traffic for 2003**

Provided below are capacity (ASMs in millions) and traffic (RPMs in millions) for the full year of 2003 and year-over-year changes:

Other Financial Information*Cash and Short-Term Investments*

Cash and short-term investments amounted to approximately \$810 million at December 31, 2003 compared to \$816 million at November 30, 2003. The decrease of \$6 million is principally due to cash used in operations. We expect our cash balance in January 2004 to decrease due principally to semi-annual aircraft lease and debt payments made for Horizon Aircraft.
