2 ANNUAL REPORT OCTOBER 31, 2011

Dear Shareholder

One year ago, the global economy appeared to solidly be in recovery mode and investors were optimistic as the US Federal Reserve launched its second round of quantitative easing. Stock markets rallied despite ongoing sovereign debt problems in Europe and inflationary pressures looming over emerging markets. Fixed income markets, however, saw yields move sharply upward (pushing prices down), especially on the long end of the historically steep yield curve. While high yield bonds benefited from the risk rally, most fixed income sectors declined in the fourth quarter of 2010. The tax-exempt municipal market faced additional headwinds as it became evident that the Build America Bond program would not be extended and municipal finance troubles burgeoned.

Early 2011 saw spikes of volatility as political turmoil swept across the Middle East/North Africa region and prices of oil and other commodities soared. Natural disasters in Japan disrupted industrial supply chains and concerns mounted regarding US debt and deficit issues. Nevertheless, equities generally performed well early in the year as investors chose to focus on the continuing stream of strong corporate earnings and positive economic data. Credit markets were surprisingly resilient in this environment and yields regained relative stability in 2011. The tax-exempt market saw relief from its headwinds and steadily recovered from its fourth-quarter lows. Equities, commodities and high yield bonds outpaced higher-quality assets as investors increased their risk tolerance.

However, the environment changed dramatically in the middle of the second quarter. Markets dropped sharply in May when fears mounted over the possibility of Greece defaulting on its debt, rekindling fears about the broader sovereign debt crisis. Concurrently, economic data signaled that the recovery had slowed in the United States and other developed nations. Confidence was further shaken by the prolonged debt ceiling debate in Washington, DC. On August 5th, Standard & Poor's downgraded the US government's credit rating and turmoil erupted in financial markets around the world. Extraordinary levels of volatility persisted in the months that followed as Greece teetered on the brink of default. Financial problems intensified in Italy and Spain and both countries faced credit rating downgrades. Debt worries spread to the core European nations of France and Germany, and the entire euro-zone banking system came under intense pressure. Late in the summer, economic data out of the United States and Europe grew increasingly bleak while China and other emerging economies began to show signs of slowing growth. By the end of the third quarter, equity markets had fallen nearly 20% from their April peak while safe-haven assets such as US Treasuries, gold and the Swiss franc skyrocketed.

October brought enough positive economic data to assuage fears of a double-dip recession in the United States and corporate earnings continued to be strong. Additionally, European policymakers demonstrated an increased willingness to unite in their struggle to resolve the region's debt and banking crisis. These encouraging developments brought many investors back from the sidelines and risk assets rallied through the month, albeit with large daily swings as investor reactions to news from Europe vacillated between faith and skepticism.

Overall, lower-risk investments including US Treasuries, municipal securities and investment grade credits posted gains for the 6- and 12-month periods ended October 31, 2011. Risk assets, including equities and high yield debt, broadly declined over the six months; however, US stocks and high yield bonds remained in positive territory on a 12-month basis. Continued low short-term interest rates kept yields on money market securities near their all-time lows. While markets remain volatile and uncertainties abound, BlackRock remains dedicated to finding opportunities and managing risk in this environment.

Sincerely,

Rob Kapito
President, BlackRock Advisors, LLC

While markets remain volatile and uncertainties abound, BlackRock remains dedicated to finding opportunities and managing risk in this environment.

Fund Summary as of October 31, 2011

BlackRock Credit Allocation Income Trust I, Inc.

Fund Overview

BlackRock Credit Allocation Income Trust I, Inc. s (PSW) (the **Fund**) primary investment objective is to provide holders of common shares (**Common Shareholders**) with high current income. The secondary investment objective of the Fund is to provide Common Shareholders with capital appreciation. The Fund seeks to achieve its investment objectives by investing, under normal market conditions, at least 80% of its assets in credit-related securities, including, but not limited to, investment grade corporate bonds, high yield bonds (commonly referred to as junk bonds), bank loans, preferred securities or convertible bonds or derivatives with economic characteristics similar to these credit-related securities. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objective will be achieved.

Portfolio Management Commentary

How did the Fund perform?

For the 12 months ended October 31, 2011, the Fund returned 2.20% based on market price and 4.55% based on net asset value (**NAV**). For the same period, the closed-end Lipper Corporate Debt Funds (BBB-Rated) category posted an average return of 2.90% based on market price and 4.65% based on NAV. All returns reflect reinvestment of dividends. The Fund's discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

The primary driver of the Fund s positive performance was its duration positioning (management of interest rate sensitivity) as interest rates generally moved lower during the period. However, duration in the Fund was partially hedged using interest rate derivative instruments such as futures contracts, options and swaps. These hedges were put in place to limit expected volatility in interest rates and had a net negative contribution to performance.

The Fund s allocation to high yield corporate credit benefited performance despite recent weakness in the sector, as higher carry yields (income generation) and improving fundamentals helped to offset price declines. Within investment grade corporate credit, security selection was focused on increasing the overall quality and liquidity of the Fund s holdings, which contributed positively to returns.

Conversely, sector allocation within investment grade corporate credit had a negative impact on performance. The Fund held capital securities in the financials sector, which mostly underperformed other credit sectors as investors feared the sovereign debt crisis in Europe would ultimately have a negative impact on US-based financial companies. Capital securities were particularly hurt as they are lower in the capital structure and therefore tend to exhibit higher volatility during periods of risk aversion.

Describe recent portfolio activity.

During the 12-month period, the Fund increased its leveraged exposure to corporate credit in order to position itself to benefit from improving corporate fundamentals in an accommodative monetary policy environment. In the latter half of the period, the Fund reduced exposure to riskier credits as these names typically require significant economic growth to realize a boost in valuations. From an industry perspective, the Fund increased exposure to independent

energy names. Within the wireless telecommunications services sector, the Fund increased its credit quality profile by selling names in high yield to purchase investment grade credits with better predictability of earnings.

Describe portfolio positioning at period end.

The Fund maintained diversified exposure across investment grade and high yield corporate credits. Portfolio holdings at period end reflected a bias toward higher-quality issues and a preference for more stable industries and companies that offer good cash flows, earnings and revenue visibility and attractive downside protection. The Fund's corporate credit holdings reflect a bias toward industrials over financials and utilities. Within industrials, the Fund favored media cable and media non-cable names.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

BlackRock Floating Rate Income Trust

Fund Overview

BlackRock Floating Rate Income Trust s (BGT) (the Fund) primary investment objective is to provide a high level of current income. The Fund s secondary investment objective is to seek the preservation of capital. The Fund seeks to achieve its investment objectives by investing primarily, under normal conditions, at least 80% of its assets in floating and variable rate instruments of US and non-US issuers, including a substantial portion of its assets in global floating and variable rate securities including senior secured floating rate loans made to corporate and other business entities. Under normal market conditions, the Fund expects that the average effective duration of its portfolio will be no more than 1.5 years. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objectives will be achieved.

Portfolio Management Commentary

How did the Fund perform?

For the 12 months ended October 31, 2011, the Fund returned (3.46)% based on market price and 4.03% based on NAV. For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of 0.51% based on market price and 4.01% based on NAV. All returns reflect reinvestment of dividends. The Fund moved from a premium to NAV to a discount by period end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

Floating rate loan interests (bank loans) performed well over the 12-month period. Although it lagged a number of its fixed income peers, the asset class benefited from a favorable technical backdrop, solid corporate fundamentals and record low default rates. More recently, however, macroeconomic concerns have weighed on the sector, triggering sharp bouts of volatility, some modest spread widening and significant price depreciation from the near-par levels seen in the first quarter of 2011.

The Fund s positive performance was driven primarily by security selection within the higher-quality tiers of the bank loan market. By and large, positive selection reflected the Fund s higher-quality bias and focus on more recession-resistant sectors that are not heavily reliant on a strong consumer, such as chemicals and non-captive diversified industrials.

While the Fund invests primarily in bank loans, it also maintains an allocation to emerging market and high yield bonds (approximately 25% of the leveraged portfolio). During the reporting period, the Fund pursued a bias towards high yield corporate bonds at the expense of its emerging market exposure. This positioning benefited performance for the year as high yield has outperformed not only emerging market debt, but bank loans as well.

As the fund is mandated to hold a certain percentage of its assets in non-US instruments, our exposure to non-US-dollar denominated loans, particularly those issued in Europe, detracted from performance given a much lower level of liquidity and market transparency. This mainly impaired the portfolio when the global sell-off commenced in August.

Describe recent portfolio activity.

During the 12-month period, the Fund maintained its higher-quality bias in terms of loan structure, overall credit quality and liquidity. Prior to the market correction in August, management reduced exposure to some of the Fund s lower-quality holdings and increased its level of cash as market conditions appeared to be weakening and our outlook grew increasingly uncertain. While transitioning the overall portfolio to a more conservative stance, management

continued to seek investment opportunities in the market, albeit cautiously, targeting companies with superior credit fundamentals (i.e., stable income streams, earnings visibility, and attractive downside protection).

Describe portfolio positioning at period end.

At period end, the Fund held large exposures to the non-captive diversified industrials, chemicals and wireless sectors, while exposure to healthcare, media non-cable and technology was limited. The Fund held 78% of its total portfolio in bank loans, 18% in corporate bonds and the remainder invested in a mix of asset backed securities, foreign agency obligations and other interests. The Fund ended the period with leverage at 27% of its total managed assets.

12 ANNUAL REPORT OCTOBER 31, 2011

BlackRock Floating Rate Income Trust**Fund Information**

Symbol on NYSE	BGT
Initial Offering Date	August 30, 2004
Yield on Closing Market Price as of October 31, 2011 (\$13.00) ¹	7.15%
Current Monthly Distribution per Common Share ²	\$0.0775
Current Annualized Distribution per Common Share ²	\$0.9300
Leverage as of October 31, 2011 ³	27%

¹ Yield on closing market price is calculated by dividing the current annualized distribution per share by the closing market price. Past performance does not guarantee future results.

² The distribution rate is not constant and is subject to change.

³ Represents the loan outstanding as a percentage of total managed assets, which is the total assets of the Fund (including any assets attributable to any borrowings) minus the sum of liabilities (other than borrowings representing financial leverage). For a discussion of leveraging techniques utilized by the Fund, please see The Benefits and Risks of Leveraging on page 14.

The table below summarizes the changes in the Fund's market price and NAV per share:

	10/31/11	10/31/10	Change	High	Low
Market Price	\$13.00	\$14.52	(10.47)%	\$17.00	\$11.71
Net Asset Value	\$13.97	\$14.48	(3.52)%	\$14.83	\$13.25

The following charts show the portfolio composition of the Fund's long-term investments and credit quality allocations of the Fund's long-term investments excluding common stocks and floating rate loan interests:

⁵ The investment advisor has deemed certain of these securities to be of investment grade quality. As of October 31, 2010, the market value of these securities was \$606,918, representing 1% of the Fund's long-term investments.

ANNUAL REPORT OCTOBER 31, 2011 13

The Benefits and Risks of Leveraging

The Funds may utilize leverage to seek to enhance the yield and NAV of their common shares (Common Shares). However, these objectives cannot be achieved in all interest rate environments.

The Funds may utilize leverage by borrowing through a credit facility or through entering into reverse repurchase agreements. The Funds also had auction market preferred shares (Preferred Shares) issuances outstanding during the year ended October 31, 2011. In general, the concept of leveraging is based on the premise that the financing cost of assets to be obtained from leverage, which will be based on short-term interest rates, will normally be lower than the income earned by each Fund on its longer-term portfolio investments. To the extent that the total assets of each Fund (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Fund's shareholders will benefit from the incremental net income.

The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV. However, in order to benefit shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. If the yield curve becomes negatively sloped, meaning short-term interest rates exceed long-term interest rates, income to shareholders will be lower than if the Funds had not used leverage.

To illustrate these concepts, assume a Fund's capitalization is \$100 million and it borrows an additional \$30 million, creating a total value of \$130 million available for investment in long-term securities. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Fund pays borrowing costs and interest expense on the \$30 million of borrowings based on the lower short-term interest rates. At the same time, the securities purchased by the Fund with assets received from the borrowings earn income based on long-term interest rates. In this case, the borrowing costs and interest expense of the borrowings is significantly lower than the income earned on the Fund's long-term investments, and therefore the Fund's shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental net income pickup will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates, the yield curve has a negative slope. In this case, the Fund pays higher short-term interest rates whereas the Fund's total portfolio earns income based on lower long-term interest rates.

Furthermore, the value of the Funds' portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Funds' borrowings does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Funds' NAV positively or negatively in addition to the impact on Fund performance from borrowings discussed above.

The use of leverage may enhance opportunities for increased income to the Funds and Common Shareholders, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Funds' NAVs, market prices and dividend rates than comparable portfolios without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Funds' net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Fund's net income will be less than if leverage had not been used, and therefore the amount available for distribution to Shareholders will be reduced. Each Fund may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory

requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause a Fund to incur losses. The use of leverage may limit each Fund's ability to invest in certain types of securities or use certain types of hedging strategies. Each Fund will incur expenses in connection with the use of leverage, all of which are borne by Shareholders and may reduce income.

Under the Investment Company Act of 1940, the Funds are permitted to borrow through their credit facility or by entering into reverse repurchase agreements up to 33¹/₃% of their total managed assets. As of October 31, 2011, the Funds had outstanding leverage from borrowings as a percentage of their total managed assets as follows:

	Percent of Leverage
PSW	33%
PSY	32%
BPP	29%
BTZ	32%
BGT	27%

14 ANNUAL REPORT OCTOBER 31, 2011

Derivative Financial Instruments

The Funds may invest in various derivative financial instruments, including financial futures contracts, foreign currency exchange contracts, options and swaps as specified in Note 2 of the Notes to Financial Statements, which may constitute forms of economic leverage. Such derivative financial instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market, equity, credit, interest rate, foreign currency exchange rate, and/or other risks. Derivative financial instruments involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative financial instrument. The Funds' ability to use a derivative financial instrument successfully depends on the investment advisor's ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative financial instruments may result in losses greater than if they had not been used, may require a Fund to sell or purchase portfolio investments at inopportune times or for distressed values, may limit the amount of appreciation a Fund can realize on an investment, may result in lower dividends paid to shareholders or may cause a Fund to hold an investment that it might otherwise sell. The Funds' investments in these instruments are discussed in detail in the Notes to Financial Statements.

Total					\$ (449,643)

(a) Fund pays a fixed interest rate and receives floating rate.

(b) Fund pays a floating interest rate and receives fixed rate.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other

than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund's own assumptions used in determining the fair value of investments and derivative financial instruments)

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and does not necessarily correspond to the Fund's perceived risk of investing in those securities. For information about the Fund's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

See Notes to Financial Statements.

22 ANNUAL REPORT OCTOBER 31, 2011

Schedule of Investments (concluded)

BlackRock Credit Allocation Income Trust I, Inc.
(PSW)

The following tables summarize the inputs used as of October 31, 2011 in determining the fair valuation of the Fund's investments and derivative financial instruments:

Valuation Inputs	Level 1	Level 2	Level 3	Total
Assets:				
Investments:				
Long-Term				
Investments:				
Asset-Backed				
Securities		\$493,571	\$503,750	\$997,321
Corporate				
Bonds		127,634,584	858,000	128,492,584
Preferred				
Securities	\$340,913	25,478,943		25,819,856
Taxable				
Municipal				
Bonds		903,248		903,248
US Government				
Sponsored				
Agency				
Securities		294,830		294,830
US Treasury				
Obligations		776,592		776,592
Short-Term				
Securities	1,362,932			1,362,932
Total	\$1,703,845	\$155,581,768	\$1,361,750	\$158,647,363

Valuation Inputs	Level 1	Level 2	Level 3	Total
Derivative Financial				
Instruments ¹				
Assets:				
Interest rate				
contracts	\$131,578	\$122,631		\$254,209
Credit				
contracts		17,427	\$1,175	18,602
Liabilities:				
Interest rate				
contracts	(8,995)	(774,754)		(783,749)
Foreign currency				
exchange				
contracts		(2,106)		(2,106)
Credit				
contracts		(122,614)		(122,614)
Total	\$122,583	\$(759,416)	\$1,175	\$(635,658)

Derivative financial instruments are swaps, financial futures contracts, foreign currency exchange contracts and options. Swaps, financial futures contracts and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument and options are shown at value.

The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

	Asset-Backed Corporate		
	Securities	Bonds	Total
Assets:			
Balance, as of October 31, 2010			
Accrued discounts/premiums			
Net realized gain (loss)			
Net change in unrealized appreciation/depreciation ²	\$ (52,364)	\$ 33,000	\$(19,364)
Purchases	556,114	825,000	1,381,114
Sales			
Transfers in ³			
Transfers out ³			
Balance, as of October 31, 2011	\$ 503,750	\$ 858,000	\$ 1,361,750

² Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The net change in unrealized appreciation/depreciation on investments still held at October 31, 2011 was \$(19,364).

³ The Fund's policy is to recognize transfers in and transfers out as of the beginning of the period of the event or the change in circumstances that caused the transfer.

The following is a reconciliation of Level 3 derivative financial instruments for which significant unobservable inputs were used to determine fair value:

	Credit
	Contracts
Assets:	
Balance, as of October 31, 2010	
Accrued discounts/premiums	\$ 1,984
Net realized gain (loss)	
Net change in unrealized appreciation/depreciation ⁴	1,175
Purchases	
Issuances ⁵	3,440
Sales	
Settlements ⁶	(5,424)
Transfers in ³	
Transfers out ³	
Balance, as of October 31, 2011	\$ 1,175

Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on derivative financial instruments still held at October 31, 2011 was \$1,175.

⁵ Issuances represent upfront cash received on certain derivative financial instruments.

⁶ Settlements represent periodic contractual cash flows and/or cash flows to terminate certain derivative financial instruments.

A reconciliation of Level 3 investments and derivative financial instruments is presented when the Fund had a significant amount of Level 3 investments and derivative financial instruments at the beginning and/or end of the year in relation to net assets.

See Notes to Financial Statements.

Total					\$ (1,944,069)

(a) Pays a fixed interest rate and receives floating rate.

(b) Pays a floating interest rate and receives fixed rate.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund's own assumptions used in determining the fair value of investments and derivative financial instruments)

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and does not necessarily correspond to the Fund's perceived risk of investing in those securities. For information about the Fund's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

See Notes to Financial Statements.

30 ANNUAL REPORT OCTOBER 31, 2011

Schedule of Investments (concluded)

BlackRock Credit Allocation Income Trust II, Inc.
(PSY)

The following tables summarize the inputs used as of October 31, 2011 in determining the fair valuation of the Fund's investments and derivative financial instruments:

Valuation Inputs	Level 1	Level 2	Level 3	Total
Assets:				
Investments:				
Long-Term				
Investments:				
Asset-Back				
Securities		\$2,077,112	\$2,053,750	\$4,130,862
Corporate				
Bonds		526,966,508	3,536,000	530,502,508
Preferred				
Securities	\$1,420,499	115,273,057		116,693,556
Taxable				
Municipal				
Bonds		3,895,257		3,895,257
US Government				
Sponsored				
Agency				
Securities		1,262,477		1,262,477
US Treasury				
Obligations		4,922,015		4,922,015
Short-Term				
Securities	405,708			405,708
Total	\$1,826,207	\$654,396,426	\$5,589,750	\$661,812,383

Valuation Inputs	Level 1	Level 2	Level 3	Total
Derivative Financial				
Instruments ¹				
Assets:				
Interest rate				
contracts	\$547,266	\$532,478		\$1,079,744
Credit				
contracts		71,568	\$5,018	76,586
Liabilities:				
Interest rate				
contracts	(37,257)	(3,360,516)		(3,397,773)
Foreign				
currency				
exchange				
contracts		(9,016)		(9,016)
Credit				
contracts		(522,219)		(522,219)
Total	\$510,009	\$(3,287,705)	\$5,018	\$(2,772,678)

Derivative financial instruments are swaps, financial futures contracts, foreign currency exchange contracts and options. Swaps, financial futures contracts and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument and options are shown at value.

The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

	Asset-Backed Corporate		
	Securities	Bonds	Total
Assets:			
Balance, as of October 31, 2010		\$ 103,025	\$ 103,025
Accrued discounts/premiums	\$ 20,514		20,514
Net realized gain (loss)		34	34
Net change in unrealized appreciation/depreciation ²	(233,998)	141,388	(92,610)
Purchases	2,267,234	3,400,000	5,667,234
Sales		(108,447)	(108,447)
Transfers in ³			
Transfers out ³			
Balance, as of October 31, 2011	\$ 2,053,750	\$ 3,536,000	\$ 5,589,750

² Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held at October 31, 2011 was \$(97,998).

³ The Fund's policy is to recognize transfers in and transfers out as of the beginning of the period of the event or the change in circumstances that caused the transfer.

The following is a reconciliation of Level 3 derivative financial instruments for which significant unobservable inputs were used to determine fair value:

	Credit
	Contracts
Assets:	
Balance, as of October 31, 2010	
Accrued discounts/premiums	\$ 8,471
Net realized gain (loss)	
Net change in unrealized appreciation/depreciation ⁴	5,018
Purchases	
Issuances ⁵	14,687
Sales	
Settlements ⁶	(23,158)
Transfers in ³	
Transfers out ³	
Balance, as of October 31, 2011	\$ 5,018

Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on derivative financial instruments still held at October 31, 2011 was \$5,018.

⁵ Issuances represent upfront cash received on certain derivative financial instruments.

⁶ Settlements represent periodic contractual cash flows and/or cash flows to terminate certain derivative financial instruments.

A reconciliation of Level 3 investments and derivative financial instruments is presented when the Fund had a significant amount of Level 3 investments and derivative financial instruments at the beginning and/or end of the year in relation to net assets.

See Notes to Financial Statements.
