Mr. Lau, chairman and chief executive officer, commented, "Despite continued pricing pressure in the market, we continue to enhance the quality of our products, improve customer service and increase the overall efficiency of our plants in order to gain market share. For example, we recently invested in

state-of-the-art mold-making software, which we believe provides us a distinct competitive advantage. As a result of these and similar initiatives, we expect a 20% to 25% increase in our mold manufacturing business this year. Moreover, our metallic products business performed well and we anticipate a 15% to 20% increase in sales from this division this year."

"We are excited as we move forward with plans for our new plastics manufacturing facility in Dongguan, which we believe will help further reduce payroll and other operating costs. Although inclement weather conditions have slowed the pace of construction, Phase I construction is expected to commence operations in March 2003, while Phase II construction could begin operations in June. Our balance sheet remains strong and we are extremely optimistic about the future growth opportunities for our business."

The basic net income per share and diluted net income per share are computed in accordance with the Statement of Financial Accounting Standards No.128 "Earnings Per Share."

The basic net income per share is computed by dividing income available to common holders by the weighted average number of common shares outstanding during the period. Diluted net income per share gives effect to all dilutive potential common shares outstanding during the period. The weighted average number of common shares outstanding is adjusted to include the number of additional common shares that would have been outstanding if the dilutive potential common shares had been issued. In computing the dilutive effect of potential common shares, the average stock price for the period is used in determining the number of treasury shares assumed to be purchased with the proceeds from exercise of options.
