Risk Factors

Please see the Preliminary Offering Documents for a description of certain risks related to this investment, including, but not limited to, the following:

- If your notes are not called prior to maturity, your investment may result in a loss; there is no guaranteed return of principal.
  - Payments on the notes are subject to the credit risk of BNS, and actual or perceived changes in the creditworthiness of BNS are expected to affect the value of the notes. If BNS becomes insolvent or is unable to pay its obligations, you may lose your entire investment.
  - Changes in the level of one Basket Component may be offset by changes in the level of the other Basket Component.
  - The initial estimated value of the notes on the pricing date will be less than their public offering price.
  - If you attempt to sell the notes prior to maturity, their market value may be lower than both the public offering price and the initial estimated value of the notes on the pricing date.
  - If called, your return on the notes is limited to the applicable Call Premium.
  - You will have no rights of a holder of the securities included in the Basket Components, and you will not be entitled to receive securities or dividends or other distributions by the issuers of those securities.
  - Your return on the notes and the value of the notes may be affected by relevant exchange rate movements and factors affecting the international securities markets, specifically changes in the countries represented by the Basket Components.
  - The notes are subject to risks associated with small-size capitalization companies.
- Final terms will be set on the pricing date within the given range for the specified Market-Linked Investment. Please see the Preliminary Offering Documents for complete product disclosure, including related risks and tax disclosure.
