year. EBITDA for 2006 was \$90,075,000, compared to \$140,141,000 for the previous year. Voyage revenues for the year ended December 31, 2006, were \$310,043,000, compared to \$244,215,000 recorded in the previous year.

Evangelos J. Pistiolis, President and Chief Executive Officer of TOP Tankers Inc, commented, "This year was an especially challenging year for the Company. We completed a \$550 million sale & lease back project, which generated significant return of \$7.50 per share to our shareholders.

"We also sold 3,907,365 shares of common stock in 'at-the-market' offerings at an average net price of \$6.91 per share.

"During the year we drydocked a total of 9 vessels and performed extensive upgrading of our fleet. The cost of recent and future upgrades will be in excess of \$50 million and more than 60% of it has been completed as of year end. We have conducted extensive work on our tankers, closely supervised by our experienced technical team in order to upgrade the vessels to the highest possible standards. Once again, we would like to emphasize our commitment to provide the highest quality of service to our clients and to continue to operate and maintain our fleet with the utmost efficiency and professionalism.

"We believed that it was the right time to undertake such a large project, and expect that going forward this strategy will help to make 2007 a stronger year.

"In 2006, we also sold three Handymax tankers, one built in 1998 and two built in 1999. We believe that the aggregate sale price of \$128 million was one of the highest prices ever achieved for such vessels in the industry.

"In addition, we have entered into an agreement to acquire six newbuilding Handymax product tankers for a purchase price of \$285 million. Furthermore, we managed to arrange for the new vessels to be delivered in first and second quarters of 2009. We review this as a real achievement, since most shipyards were not offering tanker newbuilding deliveries prior to 2010 or 2011.

"We look forward to a very active year in 2007."

The following key indicators serve to highlight changes in the financial performance of the Company's fleet during the fourth quarters and years ended December 31, 2005 and 2006:

(2) Consistent with general practice in the tanker shipping industry, time charter equivalent, or TCE, is a measure of the average daily revenue performance of a vessel on a per voyage basis. Our method of calculating TCE is consistent with industry standards and is determined by dividing net voyage revenue by voyage days for the relevant time period. Net voyage revenues are voyage revenues minus voyage expenses. Voyage expenses primarily consist of port, canal and fuel costs that are unique to a particular voyage, which would otherwise be paid by the charterer under a time charter contract, as well as commissions.

(3) EBITDA represents earnings before interest and finance costs, net, taxes, depreciation and amortization. Interest and finance costs, net include gain or loss from termination of swaps and swap fair value changes. EBITDA is included in this release because we believe it provides investors with an understanding of operating performance over comparative periods. EBITDA should not be considered as a substitute for income from operations, net income or cash flows from operating activities (all as determined in accordance with generally accepted accounting principles) for the purpose of analyzing our operating performance, financial position and cash flows,

as EBITDA is not defined by generally accepted accounting principles. We presented EBITDA, however, because it is commonly used by certain investors and analysts to analyze and compare companies on the basis of operating performance and to determine a company's ability to service and/or incur debt.
