ITEM 12. RESULTS OF OPERATIONS AND FINANCIAL CONDITION

Kestrel Energy, Inc., the Registrant, issued a press release on May 17, 2004, reporting operating results for the third fiscal quarter ended March 31, 2004. The text of that press release is as follows:

FOR IMMEDIATE RELEASE
MAY 17TH, 2004

NEWS
OTCBB-KEST

KESTREL ENERGY REPORTS CONTINUED INCREASE IN QUARTERLY REVENUES.

Kestrel Energy Inc. (OTCBB: KEST), an oil and gas exploration and production company today announced its financial results for the third quarter of fiscal year 2004.

The Company's oil and gas revenues for the three months ended March 31, 2004 were \$343,183 compared to \$326,821 during the same period of 2003, an increase of \$16,362 or 5%. The increase in revenues was primarily the result of slightly higher oil and gas prices received during the quarter. Oil and gas production levels were fairly consistent between the two periods.

The Company will report a net loss of \$23,569 for the three-month period ended March 31, 2004, as compared to a net loss of \$513,574 during the comparable period of 2003. The Company's results for the quarter and nine months ended March 31, 2004 improved \$490,005 and \$782,394, respectively, as compared to 2003, on the strength of slightly higher oil and gas prices, lower operating expenses and lower losses resulting from the sale of the Company's interests in Victoria Petroleum stock.

Edgar Filing: KESTREL ENERGY INC - Form 8-K

The Company's total expenses for the third quarter ended March 31, 2004 increased \$13,318, or 4%, to \$371,272 as compared to \$357,161 a year ago. The increase in overall expenses is primarily due to higher lease operating, exploration and abandoned property expenses, offset by lower general and administrative and lower interest expenses.

Exploration expenses for the quarter ended March 31, 2004 increased by \$14,625 to \$14,432 from a year ago. The increase in costs incurred for the quarter is a result of no exploration activity during the same period a year ago. For the nine months ended March 31, 2004, exploration expenses increased \$9,113, or 48%, to \$28,355 versus \$19,222 a year ago.

General and administrative costs for the three months ended March 31, 2004 decreased \$14,089, or 9%, to \$143,150 as compared to \$157,239 for the same period a year ago. These decreases were primarily attributable to a decrease in rent and office expenses.

Interest expense and loan fees for the three-month period ended March 31, 2004 increased \$2,220, or 16%, to \$16,331 from \$14,111 a year ago. The increase is attributable to slightly higher average borrowings outstanding during the period.

At March 31, 2004, the Company had a working capital deficit of \$133,641. This compares to the Company's working capital deficit of \$4,643 as of June 30, 2003. The increase in working capital deficit of \$129,000 was primarily the result of an increase in accounts payable-trade, lower cash on hand and lower accounts receivable.

Barry Lasker, Director said "Management has continued to focus on the bottom line by cutting costs and, where possible, maximizing our revenues. We have continued our aim of farming out our key projects and, at the same time, we have continued the development of our Hilight CBM Field in Campbell County, Wyoming. Furthermore, we are continuing with front-end work to drill the first test well on our 30,000 acre Rock Springs CBM play, in which Kestrel has a 20% back-in interest and we look forward to announcing the results when available."

Headquartered in Denver, Kestrel has producing properties in Wyoming, Oklahoma, New Mexico and Texas.

Statements made in this press release that are not historical facts may be forward looking statements. Actual results may differ materially from those projected in any forward-looking statement. There are a number of important factors that could cause actual results to differ materially from those anticipated or estimated by any forward looking information. In addition, while the Company's current plans are to drill a number of wells and develop the properties cited herein at the time and in the manner described, various factors, including but not limited to actual drilling results, equipment availability or breakage, limited financial resources, or other problems, could change those plans. A description of the risks and uncertainties which are generally attendant to Kestrel Energy and its industry and other factors which could affect the Company's financial results are included in the Company's report to the Securities and Exchange Commission on Form 10-KSB.
