Press Release

CVRD Protocols Debentures Register Request

Rio de Janeiro, June 28, 2002 - Companhia Vale do Rio Doce (CVRD) informs its shareholders, the investors community and, principally, the holders of the debentures, non-convertible into shares, issued by CVRD (Debentures) that, according to the Privatization Offering PND-A-01/97/CVRD, and considering the period of three months after the occurrence of the Secondary Public Shares Offer, the register of the Debentures was protocolled today together with Comissao de Valores Mobiliarios (Brazilian Securities Commission) (CVM). The 388,559,056 Debentures were issued and distributed by CVRD only to its shareholders, including the Brazilian Government, at the time of its privatization. The purpose was to guarantee to shareholders the rights to participate in the revenues of natural ores deposits of the Company and some of its affiliates, consisting in payments from the redemption of Preferred Class B shares, issued as a bonus to CVRD shareholders, through the capitalization of its revenues reserves.

The obtainment of the above mentioned register with CVM has the purpose to enable the Debentures trading in the secondary market together to SND - Sistema Nacional de Debentures (National Debentures System), under the management of ANDIMA - Associacao Nacional das Instituicoes do Mercado Aberto (National Association of Open Market Institutions) and operationally by CETIP - Central de Custodia e de Liquidacao Financeira de Titulos (Clearing House for the Custody and Financial Settlement of Securities).

## Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

This press release may contain statements that express management's expectations about future events or results rather than historical facts. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected in forward-looking statements, and CVRD cannot give assurance that such statements will prove correct. These risks and uncertainties include factors: relating to the Brazilian economy and securities markets, which exhibit volatility and can be adversely affected by developments in other countries; relating to the iron ore business and its dependence on the global steel industry, which is cyclical in nature; and relating to the highly competitive industries in which CVRD operates. For additional information on factors that could cause CVRD's actual results to differ from expectations reflected in forward-looking statements, please see CVRD's reports filed with the Brazilian Comissao de Valores Mobiliarios and the U.S. Securities and Exchange Commission.

Press Release

### ALUVALE Acquires ALUNORTE Shares

Rio de Janeiro, June 27, 2002 - Companhia Vale do Rio Doce (CVRD) announces that its affiliate, Vale do Rio Doce Aluminio S.A. - ALUVALE (Aluvale) has acquired, today, from its associated company, Mineracao Rio do Norte S.A. (MRN), for R\$ 118,876,674.99, 101,992,307 common shares and 21,992,308 preferred shares, representing 12.62% of the total capital of ALUNORTE - Alumina do Norte do Brasil S.A. (Alunorte), an alumina refinery located in the State of Para, Brazil. Up to now, Aluvale held 50.32% of Alunorte's common shares and 44.41% of Alunorte's total capital. From today on, Aluvale will hold 62.09% of common shares and 19.05% of preferred shares, representing 57.03% of Alunorte's total capital.

Besides the above mentioned price paid for the shares, Aluvale assumed an obligation to pay the amount of R\$ 5,701,075.01, representative of the last installment of the Alunorte total capital increase, which was originally MRN's responsibility, that will occur on July 1, 2002. This capital increase, which totals R\$ 233,280,000.00, and first tranche was paid in full on October 6, 2000, was proposed to finance part of the expansion of 825,000 tonnes in the annual production capacity of alumina. This project should be concluded on the last quarter 2002. The cost of the investment is one of the lowest in the world.

MRN, in which Aluvale retains a 40% interest in total capital, will continue to provide bauxite to Alunorte according to the present terms and conditions and it may use part of the funds generated by this transaction to finance the expansion of its production capacity, from 11 million to 16.3 million tonnes per year. Besides that, MRN could maintain the dividends distribution policy adopted in the last years. Today, MRN will be distributing dividends to its shareholders in the amount of R\$ 70 million and, during the third quarter 2002, will make an additional distribution, related to future income, in an amount equivalent to US\$ 30 million.

This transaction is part of the implementation of CVRD strategy for the aluminum businesses, which expansion will occur basically through the exploration of growth opportunities for the activities related to bauxite and alumina. It will give Aluvale increased flexibility for possible exchanges and/or sale of shares, which could generate a market for Alunorte's product, and secure a higher value in future brownfield expansions in the alumina refinery. Aluvale may incorporate to the acquired shares, or not, the take of alumina proportional to its participation in the Alunorte capital, which was

## Edgar Filing: VALLEY OF THE RIO DOCE CO - Form 6-K

previously transferred by MRN. Concurrently, MRN will be concentrating solely on the production of bauxite, which is its core business.
