ii

ITEM 1. DESCRIPTION OF PROPOSED TRANSACTION.

1.1. Introduction.

Edgar Filing: AMEREN CORP - Form U-1

Ameren Corporation ("Ameren"), whose principal business address is at 1901 Chouteau Avenue, St. Louis, Missouri 63103, is a registered holding company under the Public Utility Holding Company Act of 1935, as amended (the "Act"). (1) Ameren directly owns all of the issued and outstanding common stock of Union Electric Company (d/b/a "AmerenUE") and Central Illinois Public Service Company (d/b/a "AmerenCIPS"), and indirectly through CILCORP, Inc. ("CILCORP"), an exempt holding company, all of the issued and outstanding common stock of Central Illinois Light Company (d/b/a "AmerenCILCO"), each of which is an electric and gas utility company (AmerenUE, AmerenCIPS and AmerenCILCO are collectively identified as the "Utility Subsidiaries"). (2) Together, the Utility Subsidiaries provide retail and wholesale electric service to approximately 1.7 million customers and retail natural gas service to approximately 500,000 customers in portions of Missouri and Illinois.

AmerenUE and AmerenCIPS provide open access transmission service over their combined transmission facilities pursuant to a single Open Access Transmission Tariff ("OATT") on file at the Federal Energy Regulatory Commission ("FERC"). Ameren is a member of the Mid-America Interconnected Network ("MAIN"), which is one of the ten regional electric reliability councils organized for coordinating the planning and operation of the nation's bulk power supply. AmerenUE and AmerenCIPS have received conditional authorization from the FERC to join the Midwest Independent Transmission System Operator, Inc. (the "Midwest ISO") through GridAmerica LLC, a new independent transmission company.

AmerenCILCO is also authorized to participate in the Midwest ISO as a transmission owner. Through its participation in the Midwest ISO, AmerenCILCO provides open access transmission services over its transmission facilities pursuant to the Midwest ISO OATT which is on file at the FERC.

In May 2000, AmerenCIPS transferred all of its electric generation facilities to Ameren Energy Generating Company ("Ameren GenCo"), an affiliated generation-only company. Ameren GenCo, which has been certified by the FERC pursuant to Section 32 as an "exempt wholesale generator" ("EWG"), (3) has continued to acquire additional generation capacity since that time. Power generated by Ameren GenCo is sold to wholesale purchasers under both cost-based

-
- (1) See Ameren Corporation, et al., Holding Co. Act Release No. 26809 (Dec. 30, 1997) (the "Merger Order").
 - (2) The Commission authorized the formation of Ameren and its acquisition of AmerenUE and AmerenCIPS in the Merger Order. Ameren was authorized to acquire AmerenCILCO in Ameren Corporation, et al., Holding Company Act Release No. 27645 (Jan. 29, 2003).
 - (3) AmerenGenCo. filed an application for EWG status in FERC Docket No. EG00-117-000 on March 23, 2000, as amended on May 18, 2000. The EWG status of Ameren GenCo was affirmed by the FERC in Ameren Energy Generating Company, 92 FERC P. 62,023 (July 14, 2000); Ameren Energy Generating Company, 93 FERC P. 62,210 (December 18, 2000).

and market-based rates which are subject to the jurisdiction of the FERC. As of December 31, 2002, Ameren GenCo had approximately 4,675 MW of total installed generating capacity. The generation facilities of AmerenUE and those of Ameren GenCo, are dispatched in a coordinated manner in accordance with the terms of a

Edgar Filing: AMEREN CORP - Form U-1

Joint Dispatch Agreement on file at the FERC. The Joint Dispatch Agreement requires each company to serve its load requirements from its own least-cost generation first, but then allows the other company to have access to any available excess generating capacity at cost.

Power generated from AmerenCILCO's generating units is not subject to the Joint Dispatch Agreement, but instead is dispatched separately from AmerenCILCO's control area, which is separate from, and adjacent to, the Ameren control area.

In addition to AmerenUE, AmerenCIPS and CILCORP, Ameren owns directly all of the issued and outstanding common stock of, inter alia, Ameren Energy Resources Company ("AERC"), which is an intermediate non-utility holding company. AERC directly and indirectly holds the securities of other exempt and authorized non-utility companies, including, insofar as relevant to this Application/Declaration, Ameren GenCo, Ameren Energy Marketing Company ("AEM"), and Ameren Energy Fuels and Services Company ("AFS"), the last two of which are "energy-related" companies under Rule 58.

1.2 Summary of Requested Approvals.

Authorization is sought herein for certain transactions (the "Illinois Asset Transfer") that will result in the acquisition by AmerenCIPS of AmerenUE's electric transmission and distribution assets in Illinois other than those associated with AmerenUE's Venice, Illinois generating plant, its Keokuk, Iowa generating plant, and also minor amounts of property in Illinois to be retained by AmerenUE to ensure the smooth operation of its electric utility system in Missouri (the "Retained Assets"). The Illinois Asset Transfer will also result in the acquisition by AmerenCIPS of AmerenUE's retail gas distribution facilities in Illinois (the assets to be acquired by AmerenCIPS are identified collectively herein as the "Acquired Assets"). (4) The Acquired Assets will be transferred to AmerenCIPS at their net book value. Approximately one-half of the Acquired Assets (designated as "Transferred Assets") will be transferred by AmerenUE directly to AmerenCIPS in consideration for AmerenCIPS' promissory note, the form of which is filed herewith as Exhibit B-3, and approximately one-half of the Acquired Assets (designated as "Dividend Assets") will be transferred to AmerenCIPS by means of a dividend in kind from AmerenUE to Ameren followed by a contribution of the Dividend Assets by Ameren to AmerenCIPS. (5) In connection with the Illinois Asset Transfer, AmerenCIPS will assume certain

-
- (4) An application to implement the Illinois Asset Transfer was previously filed with the Commission in December 2000 in Ameren Corporation, et al., File No. 70-9805. However, that application was subsequently withdrawn by letter dated August 20, 2001 before the application was acted upon by the Commission.
- (5) The Asset Transfer Agreement provides for AmerenUE to prepare a schedule to be delivered at the time of closing which specifically enumerates the assets, properties and rights to be acquired by AmerenCIPS. The schedule will further designate whether such specific assets are to be conveyed as Dividend Assets or Transferred Assets. The percentages of Acquired Assets that are to be conveyed as Transferred Assets and as Dividend Assets, respectively, will be determined by Ameren immediately prior to the closing.

Edgar Filing: AMEREN CORP - Form U-1

obligations of AmerenUE that are associated with the Acquired Assets. These transactions will be consummated in accordance with the Asset Transfer Agreement, the form of which is filed herewith as Exhibit B-1.

In addition to the foregoing, AmerenUE is requesting authorization herein to acquire from Ameren GenCo four 44 MW combustion turbine generator ("CTG") units and four 35 MW CTG units located at Ameren GenCo's Pinckneyville, Illinois facility (the "Pinckneyville Plant") and two 116 MW CTG units located at Ameren GenCo's Kinmundy, Illinois generation facility (the "Kinmundy Plant") and, in conjunction therewith, to assume certain liabilities and obligations of Ameren GenCo related to such units (the "Generation Transfer"). These assets will also be transferred at their net book value. The terms of these transactions are set forth in the form of Asset Transfer Agreement-Pinckneyville Generation Station between Ameren GenCo and AmerenUE (Exhibit B-5) and the form of Asset Transfer Agreement-Kinmundy Generation Station between Ameren GenCo and AmerenUE (Exhibit B-6).

1.3 Reasons for Proposed Transactions.

AmerenUE provides electric service to about 1.2 million retail and wholesale customers in Missouri and in parts of Illinois, and provides natural gas service to approximately 130,000 customers in those states. AmerenUE also provides wholesale full requirements service to certain municipal electric utilities in Missouri. AmerenUE's peak load in 2002 was 8,643 MW. AmerenUE currently owns approximately 8,000 MW of generation capacity. Power from these generation resources, as supplemented by power purchased by AmerenUE from others, is used to supply the demands of its electric service customers. AmerenUE is subject to regulation with respect to retail sales of natural gas and electricity in Missouri by the Missouri Public Service Commission ("MoPSC") and with respect to retail sales of natural gas and electricity in Illinois by the Illinois Commerce Commission ("ICC").

As a regulated electric utility in Missouri, it is incumbent upon AmerenUE to have or to acquire sufficient generating capacity with which to serve the forecasted demands of its electric service customers and to maintain an adequate reserve margin. Standards established by MAIN require AmerenUE to meet certain minimum short-term and long-term planning reserve requirements, which currently are 15% for 2003 and 17% for 2006.

In July 2002, AmerenUE entered into a Stipulation and Agreement in order to resolve certain retail rate issues in Missouri. The Stipulation and Agreement (Exhibit B-4 hereto) fixes retail electric service rates for AmerenUE in Missouri that, except under certain specified conditions, will remain in place without modification through June 30, 2006. AmerenUE also agreed to undertake commercially reasonable efforts to make energy infrastructure investments totaling \$2.25 billion to \$2.75 billion from January 1, 2002 through June 30, 2006. This includes the obligation to acquire 700 MW of new generating capacity, which may be satisfied by the purchase of generation facilities from an affiliate "at net book value." The Stipulation and Agreement also requires AmerenUE to make enhancements to its transmission infrastructure.

The Generation Transfer is intended as an efficient means of enabling AmerenUE to meet its generation capacity obligations under the Stipulation and Agreement and under the MAIN standards. AmerenUE needs 543 MW of additional

generation capacity in 2003 and 991 MW of additional generation resources by

Edgar Filing: AMEREN CORP - Form U-1

2006 in order to meet the applicable MAIN generation capacity requirements. The Generation Transfer will provide AmerenUE with a total of 548 MW of additional generating capacity, which will be acquired at the net book value of the Pinckneyville and Kinmundy Plants. Because both the Pinckneyville Plant and the Kinmundy Plant are connected directly to the Ameren transmission system with no operating guide restrictions, concerns over the availability of transmission capacity to allow delivery of power from those units reliably to AmerenUE are obviated. Additionally, the Pinckneyville Plant has black start capability and can be ramped up quickly to provide service, which will allow AmerenUE to respond quickly to system emergencies.

The regulatory regime under which AmerenUE operates in Illinois is very different from that which exists in Missouri. Although Missouri law does not authorize competition in retail electric service markets, the Illinois Electric Service Customer Choice and Rate Relief Law (the "Customer Choice Law"), which was enacted in 1997, permits retail electric service customers in Illinois to purchase power from alternative power suppliers. Nevertheless, AmerenUE continues to be regulated as an electric public utility in Illinois. Therefore, as long as AmerenUE continues to provide retail electric utility service in Illinois, it will need approval of the ICC to consummate the Generation Transfer.

The ICC Staff has expressed concerns about the terms of the Generation Transfer and has recommended that the ICC deny approval of the Generation Transfer as proposed. For that reason, AmerenUE has advised the ICC that it intends to limit its public utility operations to Missouri and to discontinue operating as a public utility subject to ICC regulation. In so doing, AmerenUE explained that the concerns expressed by the ICC Staff regarding the means by which AmerenUE proposes to satisfy its generating capacity needs, juxtaposed with the MoPSC views of this matter, has demonstrated the difficulty for a single company to operate as an electric utility in both a regulated generation jurisdiction such as Missouri and an unregulated generation jurisdiction such as Illinois.

The effect of the proposed Illinois Asset Transfer is to transfer to and consolidate within AmerenCIPS responsibility for serving electric and gas utility customers in Illinois that are currently served by AmerenUE. Upon the transfer of AmerenUE's retail electric and gas assets in Illinois, AmerenCIPS will succeed to AmerenUE's retail utility operations in Illinois and will provide the retail electric and gas services currently provided by AmerenUE pursuant to the ICC-approved tariffs currently in effect for AmerenUE.

The Illinois Asset Transfer will realign the retail electric and gas utility operations of Ameren so that AmerenUE will be regulated as a public utility only in Missouri. Because AmerenUE will not be a regulated utility in Illinois, it will not be required to make regulatory filings in Illinois after the Illinois Asset Transfer. (6) Most significantly, after the Illinois Asset

- (6) AmerenUE will continue to own and operate generation facilities that are located in Illinois, together with minor amounts of other facilities to ensure the smooth operation of its electric system. However, because it will no longer have a public service obligation to provide retail electric or natural gas service in Illinois, AmerenUE will not be subject to regulatory requirements established by the ICC.

Transfer has been consummated, it will not be necessary for AmerenUE to obtain

Edgar Filing: AMEREN CORP - Form U-1

ICC authorization in order to acquire the Pinckneyville Plant and the Kinmundy Plant from Ameren GenCo. The transfer to AmerenCIPS of retail electric service loads in Illinois that are currently served by AmerenUE will also help to reduce the amount of generation capacity that AmerenUE needs to maintain in order to comply with MAIN generation capacity standards.

1.4 Illinois Asset Transfer-Overview

Pursuant to the Asset Transfer Agreement, AmerenUE will transfer its electric transmission and distribution and gas distribution assets and associated general plant assets and related liabilities in Illinois to AmerenCIPS. As referenced above, AmerenUE would retain generating facilities and also minor amounts of other facilities in Illinois. AmerenUE will also assign all related obligations to AmerenCIPS, including without limitation, the certificates of public convenience and necessity granted by the ICC authorizing AmerenUE to provide electric utility service and gas utility service in Illinois, environmental permits and obligations, all municipal and county franchises, labor agreements (as applicable), and any other relevant agreements that exist as of the transfer date. After the Illinois Asset Transfer, the Acquired Assets will be utilized by AmerenCIPS in its electric and natural gas utility business in Illinois.

At the present time, AmerenUE personnel operate and maintain the Acquired Assets in conjunction with their other responsibilities. It is expected that after the Illinois Asset Transfer has been consummated, certain AmerenUE employees responsible for operation and maintenance of these facilities may be transferred to AmerenCIPS. Other employees of AmerenUE, who are responsible for substation and transmission maintenance and for protective relay installation, testing and maintenance, may also spend a portion of their time operating and maintaining the Acquired Assets for AmerenCIPS for the life of those facilities.(7) The continued use of AmerenUE personnel will enable AmerenCIPS to avoid the inconvenience and additional costs associated with hiring and training additional personnel for this purpose.

The Illinois Asset Transfer is planned to be accomplished in the following manner:

1. AmerenUE will transfer approximately 50% of the Acquired Assets to AmerenCIPS in exchange for AmerenCIPS' subordinated promissory note in a principal amount equal to approximately 50% of the total net book value of such Acquired Assets net of liabilities, which is estimated to be approximately \$69 million.(8)

(7) The Commission recognized in the Merger Order that AmerenUE may provide services to AmerenCIPS, including services of linemen and gas trouble crews, that are incidental to its utility business. These services will be provided at cost in accordance with the standards of the Act and the Commission's rules and regulations under the Act.

(8) Proposed listings of the assets to be transferred to AmerenCIPS and the associated liabilities to be assumed by AmerenCIPS and the related journal accounting entries are contained in Exhibit B-2 hereto.

2. AmerenUE will hold the note and receive payments including interest from AmerenCIPS.

Edgar Filing: AMEREN CORP - Form U-1

3. AmerenUE will declare an "in kind" dividend to Ameren equal to the remaining balance (approximately 50%) of the net book value of the Acquired Assets net of liabilities, estimated to be approximately \$69 million.
4. Ameren will then contribute the Dividend Assets and associated liabilities to AmerenCIPS.

The Commission determined in the Merger Order that the existing electric transmission and distribution facilities of AmerenCIPS and AmerenUE are physically interconnected and operated as a single integrated electric utility system. Likewise, the Commission held in the Merger Order that the combined gas utility properties of AmerenUE and AmerenCIPS constitute an integrated gas utility system. The Illinois Asset Transfer will not affect the coordinated operation of any electric transmission or distribution plant, which will continue to be operated in the same manner, by the same personnel, and with the same degree of safety and reliability, as they are today. Similarly, the transfer of the gas distribution assets of AmerenUE will not affect the coordinated operation of the existing gas utility properties of AmerenUE and AmerenCIPS.

1.5 Generation Transfer-Overview

The Pinckneyville Plant and the Kinmundy Plant, which were installed by Ameren GenCo in 2001, are integrated into the Ameren system. The Pinckneyville Plant consists of four simple cycle combustion turbines rated at approximately 44 MW each at summer peak conditions, and four combustion turbines rated at approximately 35 MW each at summer peak conditions. The Kinmundy Plant consists of two combustion turbines with dual fuel capability which are rated at approximately 116 MW each under summer peak conditions. Since their acquisition by Ameren GenCo, these generating units have proven themselves to be superior performing generating assets that have served the Ameren system reliably.

Under the terms of the Transfer Agreements, AmerenUE will purchase the Pinckneyville Plant and the Kinmundy Plant for cash and will acquire associated assets and obligations from Ameren GenCo based on the net book value of the assets and obligations being transferred as of the closing date. The net depreciated book value of generation facilities at the Pinckneyville Plant as of April 30, 2003 was approximately \$158.7 million (\$502/kW). The net depreciated book value of generation facilities at the Kinmundy Plant as of April 30, 2003 was approximately \$95.4 million (\$411/kW). AmerenUE will also acquire certain assets (fuel stock, materials and supplies and prepaid insurance) and assume certain obligations of Ameren GenCo (primarily property tax accruals) that are associated with the generating units being transferred. The detailed accounting treatment of the Generation Transfer is set forth in Exhibit FS-10.

6

ITEM 2. FEES, COMMISSIONS AND EXPENSES.

A statement of the fees, commissions and expenses incurred or to be incurred in connection with the transactions proposed herein will be supplied by amendment.

ITEM 3. APPLICABLE STATUTORY PROVISIONS.

The following sections of the Act and the Commission's rules thereunder are

Edgar Filing: AMEREN CORP - Form U-1

or may be applicable to the transactions proposed herein:

Sections of the Act -----	Transactions to which section or rule may be applicable
6(a), 7, 9(a), 10 and 12	Issuance of a promissory note by AmerenCIPS in connection with the acquisition of the Transferred Assets and acquisition thereof by AmerenUE
9(a) (1), 10	Acquisition of Acquired Assets by AmerenCIPS; acquisition of Pinckneyville and Kinmundy Plant assets by AmerenUE
12(b)	Assumption of obligations of AmerenUE by AmerenCIPS in connection with Illinois Asset Transfer and assumption of obligations of AmerenGenCo by AmerenUE
12(c)	In-kind distribution of Dividend Assets by AmerenUE to Ameren
12(b)	Contribution of Dividend Assets by Ameren to AmerenCIPS
9(b) (1), 12(d), 12(f)	Sale of Transferred Assets by AmerenUE to AmerenCIPS and acquisition thereof by AmerenCIPS
Rules -----	
43, 44	Sale of Transferred Assets by AmerenUE to AmerenCIPS
45	Contribution of Dividend Assets by Ameren to AmerenCIPS and assumption by AmerenCIPS of liabilities of AmerenUE
46	In-kind distribution of Dividend Assets by AmerenUE to Ameren

Section 32 of the Act and Rule 54 thereunder are also generally applicable to the transactions described above. To the extent that other sections of the Act or the Commission's rules thereunder are deemed to be applicable to the Illinois Asset Transfer, such sections and rules should be considered to be set forth in this Item 3.

A. Illinois Asset Transfer -----

Section 6(a) of the Act provides that it is unlawful for any registered holding company or subsidiary thereof "to issue or sell any security of such company" except in accordance with an order of the Commission issued pursuant to

Edgar Filing: AMEREN CORP - Form U-1

Section 7 of the Act. Correspondingly, Section 12(b) of the Act requires Commission authorization for a registered public utility holding company or subsidiary thereof "to lend or in any manner extend its credit to or indemnify any company in the same holding-company system." As a result, the issuance of a promissory note by AmerenCIPS to AmerenUE and the assumption by AmerenCIPS of certain obligations of AmerenUE relating to the Acquired Assets require prior Commission approval under Sections 6, 7, and 12(b) of the Act.

Section 9(a)(1) of the Act declares that it shall be unlawful for any registered holding company or subsidiary thereof to acquire any utility assets or any securities unless the acquisition of such assets or securities has been approved by the Commission pursuant to Section 10 of the Act. However, Section 9(b)(1) of the Act exempts from the requirements of Section 9(a) any "acquisition by a public-utility company of utility assets the acquisition of which has been expressly authorized by a State commission."

Section 12(c) of the Act declares that it shall be unlawful for any registered holding company or subsidiary thereof to declare or pay any dividend on any security except in accordance with such rules and regulations or orders as the Commission may adopt with respect to issuance of dividends. The applicable standards for declaration and payment of dividends are set forth in Rule 46.

Section 12(d) of the Act states that it is unlawful for a registered holding company to sell any utility assets in contravention of rules and regulations or orders as the Commission shall adopt. Section 12(f) of the Act requires Commission approval for a subsidiary of a registered holding company to sell utility assets to any affiliate or associate company.

As set forth below, the Illinois Asset Transfer complies with all of the applicable provisions of the Act and should be approved by the Commission.

8

1. Sections 6(a) and 12(b)

As indicated, the promissory note to be issued by AmerenCIPS will be in an amount equal to approximately 50% of the net book value of the Transferred Assets, which is estimated to be approximately \$69 million. The promissory note will have a fixed rate of interest based on interest rates charged for generally-comparable unsecured five-year notes issued by companies whose credit quality and bond ratings are comparable to those of AmerenCIPS. The yield of 5-year U.S. Treasury Notes and of U.S. Treasury Notes and Bonds having 5 years remaining until maturity may be used as a benchmark to establish the interest rate for the promissory note. Based on the current yield of the 5-year U.S. Treasury Notes plus a credit spread between yields of U.S. Treasury Notes and yields on generally-comparable unsecured corporate notes derived from a variety of external sources, current interest rate levels for the promissory note would be approximately 4.0%.

Although the initial term of the promissory note will be five years, payments of amounts due under the promissory note will be based on a ten-year amortization schedule. Accordingly, a balloon payment will become due at the end of the fifth year unless the note's term is extended for an additional five years by agreement of the parties. The promissory note will be unsecured and will be subordinate to all other debt of AmerenCIPS, whether incurred currently or in the future, except indebtedness which, by its terms, provides that such indebtedness is not superior in right of payment of principal of or interest on

Edgar Filing: AMEREN CORP - Form U-1

the promissory note or that such indebtedness is subordinated to all other indebtedness of AmerenCIPS.

In addition, AmerenCIPS will assume all obligations of AmerenUE relating to its utility business of transmitting and distributing electricity and natural gas in Illinois. As shown in Exhibit B-2 hereto, these obligations include trade payables relating to such businesses, accounts payable, accrued payroll, accrued vacation liabilities, customer liabilities, environmental liabilities and taxes. AmerenCIPS will also assume all maintenance and labor agreements (as applicable) and any similar agreements relating to the Acquired Assets as those agreements exist on the transfer date.

Section 6(a) requires the issuance of an order of the Commission pursuant to Section 7 of the Act before a registered holding company or subsidiary thereof may issue any security. Section 7(c)(2)(B) of the Act provides that the Commission shall not permit a declaration regarding the issue or sale of any security to become effective unless it finds, inter alia, that "such security is to be issued or sold solely...for the purpose of financing the business of the declarant as a public utility company." Section 7(d) further provides that if the requirements of Section 7(c) and Section 7(g) of the Act are satisfied:

The Commission shall permit a declaration regarding the issue or sale of a security to become effective unless the Commission finds that--

(1) the security is not reasonably adapted to the security structure of the declarant and other companies in the same holding company system;

9

(2) the security is not reasonably adapted to the earning power of the declarant.

(3) financing by the issue and sale of the particular security is not necessary or appropriate to the economical and efficient operation of a business in which the applicant lawfully is engaged or has an interest;

(4) the fees, commissions, or other remuneration, to whomsoever paid, directly or indirectly, in connection with the issue, sale or distribution of the security are not reasonable.

(5) in the case of a security that is a guaranty of, or assumption of liability on, a security of another company, the circumstances are such as to constitute the making of such guaranty or the assumption of such liability an improper risk for the declarant.

(6) the terms and conditions of the issue or sale of the security are detrimental to the public interest or the interest of investors or consumers.

In this case, the promissory note to be issued by AmerenCIPS is to be used for the purpose of financing expansion of its business as a public utility company in Illinois by acquiring the electric utility and gas utility operations of AmerenUE in Illinois. Pursuant to the Asset Transfer Agreement, AmerenCIPS will acquire not only certain transmission and distribution assets, but also AmerenUE's retail electric business in Illinois, including the certificates of public convenience and necessity granted by the ICC authorizing AmerenUE to provide retail electric service in Illinois, environmental permits, all municipal and county franchises, and any other relevant agreements. Additionally, AmerenCIPS will acquire both AmerenUE's gas assets in Illinois and

Edgar Filing: AMEREN CORP - Form U-1

all related obligations, including the certificates of public convenience and necessity granted by the ICC authorizing AmerenUE to provide gas utility service in Illinois, environmental permits, all municipal and county franchises, and any other relevant agreements. As noted above, the Illinois Asset Transfer is being financed in part by the issuance of the promissory note by AmerenCIPS. It is therefore evident that issuance of the promissory note by AmerenCIPS is consistent with Section 7(c)(2)(B) of the Act.

The issuance of the promissory note is also consistent with the criteria established in Section 7(d) of the Act. As of June 30, 2003, the total capitalization of AmerenCIPS was \$1,040 million, of which 47% is long-term debt (including current maturities of long-term debt), 7% is preferred stock, and 46% is common equity capital. The acquisition of assets by AmerenCIPS from AmerenUE is being financed in approximately equal parts by the promissory note to be issued by AmerenCIPS and by a capital contribution by Ameren. Because debt and equity of AmerenCIPS will increase in the same amount, the capital structure of AmerenCIPS after the Illinois Asset Transfer will be substantially the same as its present capital structure. Thus, pro forma financial statements reflecting the Illinois Asset Transfer show that after the Illinois Asset Transfer, the capitalization of AmerenCIPS will be approximately 47% debt, 7% preferred stock, and 46% common equity.

The 50% note and 50% dividend structure of the transaction will also maintain a capital structure at AmerenUE that is substantially similar after the Illinois Asset Transfer as compared to the present capital structure. The

10

capital structure of AmerenUE as of June 30, 2003 and the pro forma capital structure of AmerenUE after the Illinois Asset Transfer are as follows:

Security	Ratio as of June 30, 2003	Ratio After Transfer
Long-Term Debt (inc. current maturities)	41%	42%
Preferred Stock	2%	2%
Common Equity	57%	56%
Total	100%	100%

Moreover, the combination of the utility assets of AmerenUE in Illinois with the utility assets of AmerenCIPS will result in efficiencies and economies through elimination of duplicative regulatory burdens, and will thereby produce savings for the benefit of the public and consumers and investors of AmerenCIPS.

A statement of the fees, commissions and expenses associated with the Illinois Asset Transfer will be provided by amendment to this Application or Declaration (see, Item 2 - Fees, Commissions and Expenses). It is believed that the estimated fees and expenses in this matter will bear a fair relation to the book value of the assets being transferred and the benefits to be achieved by AmerenUE and AmerenCIPS as a result of the Illinois Asset Transfer.

To the extent that AmerenCIPS is assuming liabilities of AmerenUE that are associated with the Acquired Assets, the assumption of such liabilities is not an improper risk for AmerenCIPS. The Acquired Assets represent a part of a going

Edgar Filing: AMEREN CORP - Form U-1

concern and are capable of generating revenues sufficient to meet the obligations being assumed by AmerenCIPS. It is therefore reasonable for AmerenCIPS to assume the risks associated with the Acquired Assets.

Finally, the terms and conditions of the promissory note as described above are not detrimental to the public interest or the interest of investors or consumers. The promissory note will carry a market rate of interest, will have a relatively short term, and will be subordinated to other debt of AmerenCIPS.

2. Sections 12(d) and 12(f) -----

Sections 12(d) and 12(f) of the Act contemplate that where a transaction involves sale of utility assets by one utility in a holding company system to an associate company, the Commission may evaluate the fairness of the consideration to be paid and received for such sale by both the buyer and seller. In *Entergy Corporation, et al., Holding Co.* Act Release No. 25136, 46 SEC Docket 1560 at 1571 (1990), the Commission ruled that "as noted above in the discussion of section 10(b)(2), the Commission believes that section 12(d) is satisfied by the

11

intrasystem sales of assets at depreciated book value on an after tax basis." The terms of the Illinois Asset Transfer are consistent with this policy.

The transfer of the Acquired Assets from AmerenUE to AmerenCIPS on the basis of their net book value as recorded on the books and records of AmerenUE is reasonable for several reasons. The Acquired Assets are primarily electric and natural gas facilities for which there is a limited market. After the Illinois Asset Transfer has occurred, those assets will continue to be used by AmerenCIPS to provide electric and natural gas service at regulated rates that are subject to regulation by the ICC. Electric service customers being transferred from AmerenUE to AmerenCIPS will continue to pay the rates they are currently charged under AmerenUE's tariff at least until December 31, 2006. It is expected that any cost-of-service study performed thereafter in order to evaluate the reasonableness of rates being charged for service to those customers would impute a value to the Acquired Assets based on their book cost depreciated.

3. Sections 9(a)(1) and 10 -----

Section (9)(a)(1) of the Act requires the approval of the Commission pursuant to Section 10 of the Act before a registered holding company or subsidiary thereof may acquire utility assets or any securities. Section 10(b) provides that, if the requirements of Section 10(f) are satisfied, the Commission shall approve an acquisition under Section 9(a) unless the Commission finds that:

- (1) such acquisition will tend towards interlocking relations or the concentration of control of public-utility companies, of a kind or to an extent detrimental to the public interest or the interests of investors or consumers;
- (2) in case of the acquisition of securities or utility assets, the consideration, including all fees, commissions, and other remuneration, to whomsoever paid, to be given, directly or indirectly, in connection with such acquisition is not reasonable or does not bear a fair relation to the sums invested in or the earning capacity of the

Edgar Filing: AMEREN CORP - Form U-1

utility assets to be acquired or the utility assets underlying the securities to be acquired; or

- (3) such acquisition will unduly complicate the capital structure of the holding-company system of the applicant or will be detrimental to the public interest or the interests of investors or consumers or the proper functioning of such holding-company system.

Clearly, in this case, the acquisition of the Acquired Assets by AmerenCIPS will not contribute to an undue concentration of control of public utility assets. Both AmerenCIPS and AmerenUE are subsidiaries of Ameren, which, as their

12

corporate parent, has ultimate control over both subsidiaries and their public utility assets. Ameren's control over these assets will not be affected by the proposed Illinois Asset Transfer.

The amounts to be paid by AmerenCIPS bear a fair relation to the sums invested in and the earning capacity of the Acquired Assets. The Acquired Assets are being transferred at their book value net of liabilities. It is estimated that as of December 31, 2003, the net book value of the transmission and distribution assets to be acquired by AmerenCIPS net of liabilities is \$126.2 million, and the net book value of the gas assets to be acquired by AmerenCIPS net of liabilities is \$11.7 million. The rates for electric and natural gas service provided by AmerenUE in Illinois are cost-based rates that are predicated in part on the book value of these assets. It is thus evident that the amount to be paid by AmerenCIPS is consistent with Section 10(b)(2) of the Act.

As noted above, the acquisition of the Acquired Assets by AmerenCIPS will not unduly complicate its capital structure. Approximately one-half of the Acquired Assets will be transferred to AmerenCIPS through distribution by AmerenUE to Ameren followed by contribution of such assets to AmerenCIPS, and the remainder will be transferred to AmerenCIPS in return for a promissory note. As a result, the transaction will not have a significant effect on the capital structure of AmerenCIPS.

The acquisition of the Acquired Assets by AmerenCIPS will not have an adverse effect on the interests of consumers of either AmerenUE or AmerenCIPS. Existing and new retail electric service customers of AmerenCIPS will continue to be served in accordance with tariffs that have previously been approved by the ICC. Rates of captive retail electric service customers currently served by AmerenCIPS are not subject to change prior to January 1, 2007, when the transition to full retail customer choice in Illinois will be completed.

AmerenCIPS has an electricity supply agreement with AEM pursuant to which it purchases its full requirements for electricity at demand and energy charges that are fixed and not subject to modification prior to December 31, 2004. Pursuant to an order of the ICC in Docket No. 02-0428, AmerenCIPS will seek to extend this agreement to December 31, 2006 under the same terms and conditions. AEM has sufficient generation capacity available to be able to accommodate the additional load being transferred to AmerenCIPS. The stability provided by this contract will insulate retail electric service customers in Illinois that transfer from AmerenUE to AmerenCIPS from any meaningful risk of a rate increase during the term of that electricity supply agreement. Thereafter, AmerenCIPS will purchase electricity needed to serve all of its customers under competitive market conditions.

Edgar Filing: AMEREN CORP - Form U-1

Finally, AmerenCIPS and AmerenUE have integrated their gas utility operations and rely extensively on support services provided by Ameren Services Company and AFS. Moreover, AmerenCIPS will adopt the service classifications and rates in AmerenUE's retail tariffs for natural gas service in Illinois and will assume the obligations of AmerenUE under certificates of public convenience and necessity granted by the ICC and all municipal and county franchises authorizing AmerenUE to provide gas utility service in Illinois. Therefore, insofar as the natural gas service customers of AmerenUE in Illinois are concerned, the

13

Illinois Asset Transfer will simply result in a change in name of their service provider without having any impact on the quality or cost of service provided.

Section 10(c) of the Act provides that, notwithstanding the provisions of Section 10(b), the Commission shall not approve:

- (1) an acquisition of securities or utility assets, or of any other interest, which is unlawful under the provisions of section 8 or is detrimental to the carrying out of the provisions under section 11; or
- (2) the acquisition of securities or utility assets of a public utility or public utility holding company unless the Commission finds that such acquisition will serve the public interest by tending towards the economical and the efficient development of an integrated public utility system.

The Commission approved the formation of Ameren and its acquisition of AmerenUE and AmerenCIPS in 1997. The Commission concluded at that time that the combined electric properties of AmerenUE and AmerenCIPS would be an integrated electric system and that "the proposed acquisition by Ameren of this electric integrated system will `ten[d] towards the economical and efficient development of an integrated public-utility system,' and so satisfy the requirements of section 10(c)(2) of the Act." (9) The Commission further concluded that the gas properties of AmerenUE and AmerenCIPS "constitute a gas integrated system within the meaning of section 2(a)(29)(B) of the Act." (10) The transfer of the Acquired Assets from AmerenUE to AmerenCIPS will not affect the integrated operation of these facilities. It is thus evident that Section 10(c) of the Act does not preclude issuance of a Commission order authorizing acquisition of the Acquired Assets by AmerenCIPS.

4. Section 12(c)

The Dividend Assets are to be transferred through distribution of an in-kind dividend by AmerenUE to Ameren, and a capital contribution by Ameren to AmerenCIPS. Section 12(c) of the Act precludes the declaration or payment of a dividend by a registered holding company or subsidiary thereof:

...in contravention of such rules and regulations or orders as the Commission deems necessary or appropriate to protect the financial integrity of companies in holding-company systems, to safeguard the working capital of public-utility companies, to prevent the payment of dividends out of capital or unearned surplus, or to prevent the circumvention of the provisions of this title or the rules, regulations, or orders thereunder.

(9) See Merger Order, 66 SEC Docket at 490, fn. 17.

(10) Id. at 491.

14

The only relevant rule adopted by the Commission relating to declaration or payment of dividends by a subsidiary company of a registered public utility holding company is Rule 46(a), which precludes payment of a dividend "out of capital or unearned surplus, except pursuant to a declaration notifying the Commission of the proposed transaction, which has become effective in accordance with the procedure specified in ss.250.23." As of June 30, 2003, AmerenUE had retained earnings in excess of \$1.4 billion. The distribution of the Dividend Assets will result in a charge against retained earnings of AmerenUE of approximately \$69 million. It is therefore evident that AmerenUE has sufficient retained earnings in which to make an in-kind dividend to Ameren for the purpose of implementing the Illinois Asset Transfer.

B. Generation Transfer

As noted above, Ameren GenCo is an EWG. Section 32(e) of the Act provides in pertinent part that an EWG "shall be exempt from all provisions of this Act." Therefore, the participation of Ameren GenCo in the Generation Transfer does not require Commission authorization. However, the acquisition of the Pinckneyville Plant and the Kinmundy Plant by AmerenUE is subject to the requirements of Sections 9(a)(1) and 10 of the Act, and the assumption by AmerenUE of certain obligations of Ameren GenCo is subject to Rule 45.

The standards established by Sections 9(a) and 10 of the Act for acquisition of utility assets by a subsidiary of a registered public utility holding company are set forth above. The Generation Transfer is consistent with these standards.

The acquisition of the Pinckneyville Plant and the Kinmundy Plant by AmerenUE will not contribute to an undue concentration of control of public utility assets. AmerenUE and Ameren GenCo are affiliated entities within the Ameren corporate family, and their respective generation facilities are already being dispatched in accordance with the Joint Dispatch Agreement. Because the transaction will involve only the intra-corporate transfer of generation facilities, it will not affect concentration of control of generation assets. Although the Generation Transfer will increase the amount of generation capacity owned by AmerenUE, such capacity is needed by AmerenUE to meet its existing public service obligations in Missouri and maintain an adequate generation capacity reserve margin.

The amounts to be paid by AmerenUE bear a fair relation to the sums invested in and the earning capacity of the Pinckneyville Plant and the Kinmundy Plant. As noted above, these plants are to be acquired by AmerenUE at their net book value (i.e., original cost of construction less accumulated depreciation). Power from these units will be sold primarily to retail electric service customers in Missouri at cost-based rates which are subject to regulation by the MoPSC. The transaction will therefore be consistent with the standards for intra-corporate asset transfers cited above.

The price at which AmerenUE will acquire the Pinckneyville Plant and the Kinmundy Plant is also consistent with the price of capacity from alternative sources that were considered by AmerenUE. Prior to entering into this transaction, AmerenUE undertook an Asset Mix Optimization Analysis, which showed that the addition of a mix of simple cycle and combined cycle combustion

Edgar Filing: AMEREN CORP - Form U-1

turbines during its planning horizon would satisfy AmerenUE's needs on a

15

least-cost planning basis. AmerenUE then evaluated a number of options for obtaining the energy and capacity needed to meet its reliability and customer service obligations, including the purchase of power from other wholesale energy suppliers, the purchase of existing generation assets from non-affiliated generation owners, and the construction of new capacity, as well as the Generation Transfer. None of these alternatives were entirely satisfactory.

In the fall of 2001, AmerenUE issued a Request for Proposals for capacity and energy with the intent of purchasing up to 500 MW of capacity for the time period of 2002 through 2011. The Net Present Value of offers of power submitted in response to this RFP, coupled with the construction of simple cycle combustion turbine generators at the end of the 10-year contracting period (2002-2011), were comparable to the cost to AmerenUE of purchasing the Pinckneyville Plant and the Kinmundy Plant from Ameren GenCo. However, the MoPSC Staff expressed a preference for AmerenUE to own generation facilities rather than to purchase power at wholesale. The possibility of purchasing generation facilities from non-affiliated entities was unsuitable because of concerns over the availability of a reliable transmission path for delivery of power to AmerenUE customers, because of concerns about transmission constraints, and because of concerns about the credit worthiness of such non-affiliated entities. Finally, the cost of purchasing the Pinckneyville Plant and the Kinmundy Plant from Ameren GenCo at net book value was comparable to or less than the estimated cost of building new combustion turbine generating units that offer similar flexibility and operating characteristics.

The acquisition of the Pinckneyville Plant and the Kinmundy Plant and associated assets by AmerenUE will not unduly complicate AmerenUE's capital structure. AmerenUE expects to finance the acquisition of these assets with internally-generated cash or a combination of cash and debt such that AmerenUE's capital structure will remain balanced and consistent with its solid financial condition after giving effect to the acquisition of these assets and related financing.

The acquisition of the Pinckneyville Plant and the Kinmundy Plant by AmerenUE will not have an adverse effect on the interests of consumers of AmerenUE. As noted above, the Stipulation and Agreement protects existing retail customers of AmerenUE in Missouri from a change in rates for electric service, except in limited circumstances, prior to 2006. Because AmerenUE is transferring its current retail electric service obligations in Illinois to AmerenCIPS, it will no longer have retail customers in Illinois that might be affected by the Generation Transfer.

Finally, the acquisition of the Pinckneyville Plant and the Kinmundy Plant by AmerenUE will enhance the integration of those facilities with the existing AmerenUE generating units. As noted above, these units are connected directly to the Ameren transmission system. However, the Joint Dispatch Agreement requires AmerenUE and AmerenGenCo each to serve its load requirements from its own least-cost generation facilities first, before relying on excess generation that may be available from the other company. By acquiring these generating units, AmerenUE will be able to dispatch them in the optimal manner to serve the needs of its retail and wholesale electricity customers without consideration of the use of those units by Ameren GenCo.

16

Edgar Filing: AMEREN CORP - Form U-1

The transactions proposed herein are also subject to Section 12(b) of the Act and Rule 45 thereunder. Rule 45 permits a subsidiary of a registered holding company to make extensions of credit without interest in connection with service, construction or sales contracts (including sales of materials and supplies); provided that payment is made as soon as reasonably practicable.

In this case, the extensions of credit relate to the assumption by AmerenUE of certain obligations of Ameren GenCo that are associated with the Pinckneyville Plant and the Kinmundy Plant. These obligations include accrued property taxes, state and federal deferred tax liabilities, and a small account payable. Payment of these obligations will be made by AmerenUE in the ordinary course of business without interest.

C. Rule 54

The transactions proposed herein are also subject to Section 32(h)(4) of the Act and Rule 54 thereunder. Rule 54 provides that, in determining whether to approve any transaction that does not relate to an EWG or "foreign utility company" ("FUCO"), the Commission shall not consider the effect of the capitalization or earnings of any subsidiary which is an EWG or FUCO upon the registered holding company system if paragraphs (a), (b) and (c) are satisfied.

Ameren has complied or will comply with the record-keeping requirements of Rule 53(a)(2), the limitation under Rule 53(a)(3) on the use of the Ameren system's domestic public-utility company personnel to render services to EWGs and FUCOs, and the requirements of Rule 53(a)(4) concerning the submission of copies of certain filings under the Act to retail regulatory commissions. Further, none of the circumstances described in Rule 53(b) has occurred or is continuing. Rule 53(c) is inapplicable by its terms because the proposals contained herein do not involve the issue and sale of securities (including any guarantees) to finance an acquisition of an EWG or FUCO.

Rule 53(a)(1) limits a registered holding company's financing of investments in EWGs if such holding company's "aggregate investment" in EWGs and FUCOs exceed 50% of its "consolidated retained earnings." Ameren's "aggregate investment" (as defined in Rule 53(a)(1)(i)) in all EWGs and FUCOs is approximately \$470,665,404, which is currently equal to 26.5% of Ameren's "consolidated retained earnings" (as defined in Rule 53(a)(1)(ii)) for the four quarters ended June 30, 2003 of \$1,773,093,901. The sale of the Pinckneyville Plant and the Kinmundy Plant by Ameren GenCo to AmerenUE and the associated transactions will have the effect of reducing Ameren's aggregate investment in EWGs.

ITEM 4. REGULATORY APPROVALS.

Applications with respect to transactions contemplated in the Illinois Asset Transfer Agreement have been or will be filed with the ICC, the MoPSC, and the FERC. A notice of transfer of certain licenses may also be filed with the Federal Communications Commission. No other state commission, and no other federal commission, other than the Commission, has jurisdiction over the proposed transactions associated with the Illinois Asset Transfer.

Edgar Filing: AMEREN CORP - Form U-1

An application with respect to transactions contemplated in the Generation Transfer has been filed with the FERC. Although MoPSC approval is not required for the Generation Transfer, the MoPSC has stated in filings with the FERC that this transaction is consistent with and supported by the Stipulation and Agreement, which was approved by the MoPSC in August 2002. Because the Generation Transfer will not occur until the Illinois Asset Transfer has been completed, approval of the ICC will not be required for the Generation Transfer. No other state commission, and no other federal commission, other than the Commission, has jurisdiction over the Generation Transfer.

ITEM 5. PROCEDURE. -----

The Commission is requested to publish a notice under Rule 23 with respect to the filing of this Application or Declaration as soon as practicable. It is respectfully requested that the Commission's Order be issued as soon as the rules allow, and that there should not be a 30-day waiting period between issuance of the Commission's order and the date on which the order is to become effective. AmerenUE and AmerenCIPS hereby waive a recommended decision by a hearing officer or any other responsible officer of the Commission and consent that the Division of Investment Management may assist in the preparation of the Commission's decision and/or order, unless the Division opposes the matters proposed herein.

ITEM 6. EXHIBITS AND FINANCIAL STATEMENTS. -----

A. Exhibits. -----

- A None.
- B-1 Form of Illinois Asset Transfer Agreement among Union Electric Company, Central Illinois Public Service Company, and Ameren Corporation.
- B-2 Proposed Listing of Electric Assets and Liabilities and Gas Assets and Liabilities Being Transferred from AmerenUE to AmerenCIPS (to be supplied by amendment).
- B-3 Form of Promissory Note to be issued to AmerenUE by AmerenCIPS.
- B-4 Stipulation and Agreement between the Staff of the MoPSC and AmerenUE dated July 15, 2002 (to be supplied by amendment)
- B-5 Form of Asset Transfer Agreement-Pinckneyville Generating Station. (to be supplied by amendment)
- B-6 Form of Asset Transfer Agreement-Kinmundy Generating Station (to be supplied by amendment).

18

C None.

B. Financial Statements.

-
- FS-1 Balance Sheet of Ameren and consolidated subsidiaries, as of June 30, 2003 (incorporated by reference to the Quarterly Report on Form 10-Q of Ameren for the quarter ended June 30, 2003) (File No. 001-14756).
- FS-2 Statement of Income of Ameren and consolidated subsidiaries for the three and six-month periods ended June 30, 2003 (incorporated by reference to the Quarterly Report on Form 10-Q of Ameren for the quarter ended June 30, 2003) (File No. 001-14756).
- FS-3 Balance Sheet of AmerenUE and consolidated subsidiaries as of June 30, 2003 (incorporated by reference to the Quarterly Report on Form 10-Q of AmerenUE for the quarter ended June 30, 2003) (File No. 001-02967).
- FS-4 Statement of Income of AmerenUE and consolidated subsidiaries for the three and six-month periods ended June 30, 2003 (incorporated by reference to the Quarterly Report on Form 10-Q of AmerenUE for the quarter ended June 30, 2003) (File No. 001-02967).
- FS-5 Balance Sheet of AmerenCIPS as of June 30, 2003 (incorporated by reference to the Quarterly Report on Form 10-Q of AmerenCIPS for the quarter ended June 30, 2003) (File No. 001-03672).
- FS-6 Statement of Income of AmerenCIPS for the three and six-month periods ended June 30, 2003 (incorporated by reference to the Quarterly Report on Form 10-Q of AmerenCIPS for the quarter ended June 30, 2003) (File No. 001-03672).
- FS-7 Pro Forma Balance Sheet of AmerenUE (to be filed by amendment).
- FS-8 Pro Forma Balance Sheet of AmerenCIPS (to be filed by amendment).
- FS-9 Preliminary Accounting Entries for Transfer of Electric Assets and Liabilities from AmerenUE to AmerenCIPS estimated at December 31, 2003 (see Exhibit B-2).

20

- FS-10 Preliminary Accounting Entries for Transfer of Pinckneyville Plant and Kinmundy Plant estimated at April 30, 2003 (to be filed by amendment)

ITEM 7. INFORMATION AS TO ENVIRONMENTAL EFFECTS.

None of the matters that are the subject of this Application or Declaration involve a "major federal action" nor do they "significantly affect the quality of the human environment" as those terms are used in section 102(2)(C) of the National Environmental Policy Act. The transactions that are the subject of this Application or Declaration will not result in changes in the operation of

Edgar Filing: AMEREN CORP - Form U-1

AmerenUE or AmerenCIPS that will have an impact on the environment. AmerenUE and AmerenCIPS are not aware of any federal agency that has prepared or is preparing an environmental impact statement with respect to the transactions that are the subject of this Application or Declaration.

SIGNATURES

Pursuant to the requirements of the Public Utility Holding Company Act of 1935, as amended, the undersigned companies have duly caused this Application or Declaration filed herein to be signed on their behalf by the undersigned thereunto duly authorized.
