NOTES TO PORTFOLIO HOLDINGS (UNAUDITED)

A. VALUATION AND INVESTMENT PRACTICES:

SECURITY VALUATION: Securities listed on a stock exchange for which market quotations are readily available are valued at the closing prices on the date of valuation, or if no such closing prices are available, at the last bid price quoted on such day. If there are no such quotations available for the date of valuation, the last available closing price will be used. The value of securities and other assets for which no market quotations are readily available, or whose values have been materially affected by events occurring before the Fund's pricing time but after the close of the securities' primary markets, are valued by methods deemed by the Board of Directors to represent fair value. Short-term securities that mature in 60 days or less are valued at amortized cost.

FAIR VALUE MEASUREMENTS: The inputs and valuations techniques used to measure fair value of the Funds' net assets are summarized into three levels as described in the hierarchy below:

Level 1 - unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access.

Edgar Filing: NEW IRELAND FUND INC - Form N-Q

Level 2 - observable inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly or indirectly. These inputs may include quoted prices for the identical instrument on an inactive market, prices for similar instruments, interest rates, prepayment speeds, credit risk, yield curves, default rates and similar data.

Level 3 - unobservable inputs for the asset or liability, to the extent relevant observable inputs are not available, representing the Company's own assumptions about the assumptions a market participant would use in valuing the asset or liability, and would be based on the best information available.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. A summary of the levels of the Fund's investments as of January 31, 2010 is included with the Fund's Portfolio of Investments.

CURRENCY TRANSLATION: The books and records of the Fund are maintained in U.S. dollars. Foreign currency amounts are translated into U.S. dollars at the spot rate of such currencies against U.S. dollars by obtaining from FT-Interactive Data Corp. ("FT-IDC") each day the current 4:00pm London time spot rate and future rate (the future rates are quoted in 30-day increments) on foreign currency contracts. Net realized foreign currency gains and losses resulting from changes in exchange rates include foreign currency gains and losses between trade date and settlement date on investment securities transactions, foreign currency transactions and the difference between the amounts of interest and dividends recorded on the books of the Fund and the amount actually received. The portion of foreign currency gains and losses related to fluctuation in exchange rates between the initial purchase trade date and subsequent sale trade date is included in realized gains and losses on security transactions.

FORWARD FOREIGN CURRENCY CONTRACTS: The Fund may enter into forward foreign currency contracts for non-trading purposes in order to protect investment securities and related receivables and payables against future changes in foreign

currency exchange rates. Fluctuations in the value of such contracts are recorded as unrealized gains or losses; realized gains or losses include net gains or losses on contracts which have been terminated by settlements or by entering into offsetting commitments. Risks associated with such contracts include movement in the value of the foreign currency relative to the U.S. dollar and the ability of the counterparty to perform. There were no such contracts open in the Fund as of January 31, 2010.

SECURITIES TRANSACTIONS: Securities transactions are recorded as of the trade date. Realized gains and losses from securities sold are recorded on the identified cost basis.

B. UNREALIZED APPRECIATION/(DEPRECIATION):

The aggregate cost of investments and the composition of unrealized

appreciation and depreciation on investments and depreciation on assets and liabilities in foreign currencies on a tax basis as of January 31, 2010 were as follows:

TOTAL COST OF INVESTMENTS	GROSS UNREALIZED APPRECIATION ON INVESTMENTS	GROSS UNREALIZED DEPRECIATION ON INVESTMENTS	NET UNREALIZED DEPRECIATION ON INVESTMENTS	GROSS UNREALIZED DEPRECIATION ON FOREIGN CURRENCY	NET UNREALIZED DEPRECIATION
\$63,648,780	\$13,151,447	\$(22,085,739)	\$(8,934,292)	\$(5,291)	\$(8,939,583)

C. RISK FACTORS:

Investing in the fund may involve certain risks including, but not limited to, those described below.

The prices of securities held by the fund may decline in response to certain events, including those directly involving the companies whose securities are owned by the fund; conditions affecting the general economy; overall market changes; local, regional or global political, social or economic instability; and currency, interest rate and commodity price fluctuations. The growth-oriented, equity-type securities generally purchased by the fund may involve large price swings and potential for loss.

Investments in securities issued by entities based outside the United States may also be affected by currency controls; different accounting, auditing, financial reporting, and legal standards and practices in some countries; expropriation; changes in tax policy; greater market volatility; differing securities market structures; higher transaction costs; and various administrative difficulties, such as delays in clearing and settling portfolio transactions or in receiving payment of dividends. These risks may be heightened in connection with investments in developing countries.
