I. Operating Results and Financial Conditions

2011 First Quarter in Review

Looking back at the global economy in the first quarter of 2011, economic conditions continued to improve modestly throughout the world. The United States continued to recover steadily thanks to solid growth in production and improved employment rates, while in Europe, although trends varied by country, the region overall continued to realize a modest recovery, driven mainly by exports. Emerging markets, such as China and India, continued to grow through stable domestic demand, and in Japan, while the economy has been recovering gradually, the earthquake and resulting tsunami that struck northeastern Japan on March 11, 2011 lead to a decrease in production activity and consumer spending.

As for the markets in which Canon operates amid these conditions, within the office equipment market, demand recovered for network digital multifunction devices (MFDs) and laser printers continuing the same trend as the previous year. As for the consumer products market, demand for compact digital cameras maintained healthy growth mainly in emerging markets, while sales of digital single-lens reflex (SLR) cameras continued to realize robust growth across global markets. Demand for inkjet printers also maintained solid growth. In the Industry and others market, although demand for semiconductor lithography equipment grew modestly, the market for liquid crystal display (LCD) lithography equipment was marked by a downturn owing to decreases in investment by LCD panel manufacturers following the large-scale outlays made in the previous year. In addition, production was partially affected due to a shortage of components caused by the earthquake and its aftermath.

The average value of the yen during the quarter was ¥82.28 against the U.S. dollar, a year-on-year appreciation of approximately ¥8, and ¥112.86 against the euro, a year-on-year appreciation of approximately ¥12.

Despite the impact of the sharp appreciation of the yen along with the earthquake that struck northeastern Japan, net sales for the quarter totaled ¥839.2 billion (U.S.\$10,111 million), an increase of 11.1% from the year-ago period, owing to such factors as increased sales of laser printers among office products, and the effects of consolidation arising from the acquisition of Océ N.V. in March 2010. Additional factors include the continued robust sales of digital SLR cameras and the significant turnaround achieved within the Industry and others segment. Despite the strong yen and such adverse affects attributable to the earthquake as losses from damaged inventory and decreased production turnover, the decline in the gross profit ratio was limited to 0.4 points from the year-ago period resulting in a ratio of 48.4% for the quarter, mainly reflecting the launch of new products and ongoing cost-cutting efforts. As a result, gross profit rose by 10.2% to ¥406.2 billion (U.S.\$4,894 million) for the period. Despite ongoing Group-wide efforts to thoroughly reduce spending, operating expenses increased by ¥42.0 billion (U.S.\$506 million) due to the impact of the acquisition of Océ N.V. Consequently, operating profit decreased by 5.0% to ¥82.5 billion (U.S.\$994 million) for the quarter. Income before income taxes for the period totaled ¥82.0 billion (U.S.\$988 million), a decrease of 7.7% year on year, while net income attributable to Canon Inc. decreased by 2.4% to ¥55.5 billion (U.S.\$669 million) for the period.

Basic net income attributable to Canon Inc. stockholders per share for the quarter was ¥45.15 (U.S.\$0.54), a decrease of ¥0.87 (U.S.\$0.01) compared with the previous year.

Results by Segment

Looking at Canon's quarterly performance by business sector, within the Office Business Unit, imageRUNNER ADVANCE-series products performed admirably, contributing to boosted sales volume of color network digital MFDs. Laser printers recorded an increase in sales volume, maintaining the momentum of the strong recovery realized in the previous year. Consequently, despite the effects of the strong appreciation of the yen and the impact of newly consolidated companies, first-quarter net sales for the segment totaled ¥480.9 billion (U.S.\$5,794 million), growing 17.5% year on year. Operating profit decreased by 12.5% to ¥63.1 billion (U.S.\$760 million) for the period, mainly due to the appreciation of the yen and the earthquake in northeastern Japan.

Within the Consumer Business Unit, sales volumes continued to increase significantly in Asia and other regions for such digital SLR cameras as the competitively priced EOS Digital Rebel T2i (EOS 550D), along with the EOS 5D Mark II, and EOS 60D advanced-amateur models. As for compact digital cameras, the Company launched ten new

ELPH (IXUS)-series and PowerShot-series models, contributing to a boost in sales volumes particularly in emerging markets.

With respect to inkjet printers, sales volume increased from the year-ago level fueled by the healthy sales of PIXMA-series models, particularly in emerging markets. Sales for the Consumer Business Unit overall, however, declined by 0.2% year on year to ¥289.6 billion (U.S.\$3,489 million) due to the adverse effects of the earthquake on sales and production as well as price competition and the impact of strong yen. Operating profit decreased by 15.7% to ¥39.9 billion (U.S.\$481 million) also reflecting the negative impact from the earthquake and the appreciation of the yen.

In the Industry and Others Business Unit, while unit sales of LCD lithography equipment remained at the same level as the year-ago period, the MPAsp series, which supports sixth-generation substrates and above, recorded healthy sales growth. Semiconductor lithography equipment realized a boost in sales volume, resulting in an increase in sales for the segment of 11.7% to ¥91.9 billion (U.S.\$1,107 million) for the quarter. Operating profit realized a turnaround, totaling ¥6.6 billion (U.S.\$80 million) for the quarter, an increase of ¥9.6 billion (U.S.\$116 million) from the year-ago period.

Cash Flow

During the first quarter, cash flow from operating activities totaled ¥71.9 billion (U.S.\$867 million), a decrease of ¥89.7 billion (U.S.\$1,081 million) compared with the previous year as a result of such factors as increased tax payments and a decrease in accounts payable. Due to ongoing capital investment focused on higher priority items and the corporate acquisition activities from the year-ago period, cash flow from investing activities decreased ¥64.6 billion (U.S.\$778 million) year on year, totaling ¥46.5 billion (U.S.\$560 million). Accordingly, free cash flow totaled ¥25.4 billion (U.S.\$306 million), a decrease of ¥25.1 billion (U.S.\$303 million) from the previous year.

Cash flow from financing activities recorded an outlay of ¥73.9 billion (U.S.\$890 million), mainly arising from the dividend payout of ¥79.9 billion (U.S.\$962 million). Owing to these factors as well as the positive impact of ¥24.5 billion (U.S.\$295 million) by foreign currency translation adjustments, cash and cash equivalents decreased by ¥24.0 billion (U.S.\$289 million) year on year to ¥816.6 billion (U.S.\$9,839 million).

Outlook

As for the outlook in the second quarter onward, many uncertainties remain such as the negative impact of the earthquake in northeastern Japan, further appreciation of fuel prices and the financial crises in some European countries. On the other hand, Asia beginning with China and India, and other emerging markets are expected to continue to realize healthy growth; the United States is projected to maintain its upward momentum; and major European markets will continue to grow steadily. Taking into account these conditions, the world economy is likely to continue a self-sustained recovery. As for the Japanese economy, for the time being, it is expected to demonstrate continued weakness due to the earthquake in northeastern Japan. With the recovery in production activity, however, we expect the situation to improve.

In the businesses in which Canon is involved, within the office equipment market, demand for such products as network digital MFDs and laser printers is projected to grow steadily. With respect to the consumer products market, demand for digital SLR cameras is expected to display robust growth, while demand for compact digital cameras and inkjet printers will grow steadily. As a result of the earthquake in northeastern Japan, however, shortages in the supply capacity for certain products are expected to continue, for the time being. In the Industry and others market, while uncertainty remains for the future, demand for semiconductor lithography equipment will likely increase steadily, whereas demand for LCD lithography equipment is projected to decline from the year-ago period.

Canon has been directly affected by the earthquake including losses from damaged buildings and inventory, and has incurred such indirect effects as electricity restrictions, supply shortages of components and a decline in consumer spending in the Japanese market. These factors and others would negatively affect Canon's operating results and financial position. Canon seeks the restoration of production facilities and rebuilding of production systems.

With regard to currency exchange rates for the second quarter onward, on which Canon's performance outlook is based, despite the uncertainty over such factors as future interest rate policies for major countries and the speed and degree of the economic recovery, Canon anticipates exchange rates for the period of ¥85 to the U.S. dollar and

¥120 to the euro, representing appreciations of approximately ¥3 against the U.S. dollar, and depreciation of approximately ¥3 against the euro compared with the previous year. Upon taking into consideration these foreign exchange rate assumptions, current economic forecasts, the foreseeable impact of the earthquake in the short term and the recovery plan Canon sees as being achievable at this stage, Canon projects full-year consolidated net sales in 2011 of ¥3,730.0 billion (U.S.\$44,940 million), a year-on-year increase of 0.6%; operating profit of ¥335.0 billion (U.S.\$4,036 million), a year-on-year decrease of 13.6%; income before income taxes of ¥330.0 billion (U.S.\$3,976 million), a year-on-year decrease of 16.0%; and net income attributable to Canon Inc. of ¥220.0 billion (U.S.\$2,651 million), a year-on-year decrease of 10.8%.

Future prospects are quite uncertain, containing numerous variables, such as the supply of components and availability of electricity. As such, this outlook may drastically change depending on future circumstances.

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management's views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as anticipate, believe, estimate, expect, intend, may, or should and similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon's targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these and other risk factors is included in Canon's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.
