Management's Discussion of Fund Performance

### Economic and Market Conditions

Early in the fiscal year, in the December 2010 through March 2011 timeframe, economic indicators seemed to show that a modest recovery was under way. But in the second quarter of 2011, Europe's sovereign debt problems began to intensify, and investors worried about the potential impact on the U.S. economy and U.S. banks.

Meanwhile, unemployment remained stubbornly high, the housing market was not recovering, and Congressional wrangling over the debt ceiling led Standard & Poor's to downgrade U.S. Treasuries. The potential for a double-dip recession began to look real. Reacting to this turmoil, the S&P 500 Index<sup>2</sup> fell more than 15% in just over two weeks during late July and early August and spent the rest of the period trying to claw its way back.

Against this backdrop, Treasury and municipal interest rates began to rise in the first part of the fiscal year, as people believed an economic recovery was well underway. When economic indicators began to suggest that the U.S. economy was not as strong as first perceived and European sovereign debt problems intensified, we saw a flight to safety beginning in the second quarter. Treasury prices rose and yields fell significantly as equity markets declined. Municipal bonds rallied as well, but not to the same degree, because investors were still concerned about the perceived ability of state and local governments to address historically large fiscal deficits and balance their budgets. As the period wore on, however, several factors caused performance of municipals to improve. The massive municipal defaults predicted by high-profile market analysts did not materialize, while the budget situation for many issuers began to recover. In addition, the supply-demand equation for municipal bonds improved as the number of new issues declined dramatically from that of 2010.

With extremely low Treasury yields driven by problems in Europe and the Fed's Operation Twist (central bank's swapping its short-term holdings for longer-term Treasury bonds), municipals during the period offered significantly higher taxable-equivalent yields than Treasuries. The ratio of AAA<sup>6</sup> municipal yields to Treasury yields—which historically has averaged less than 100% because municipal yields are federally tax-exempt—rose from 103.9% at the start of the period to 125.9% at period-end. The result was a pickup in municipal sales and prices as investors moved to lock in attractive municipal yields. For the one-year period as a whole, the Barclays Capital Municipal Bond Index a broad measure of U.S. municipal bond performance rose 6.53%.

### Fund Performance

For the fiscal year ending November 30, 2011, the Massachusetts, Michigan, New York, and Ohio Trusts' shares at net asset value (NAV) outperformed the 8.32% return of the Barclays Capital Long (22+) Municipal Bond Index (the Index), the Funds' benchmark, while the California, New Jersey, and Pennsylvania Trusts' shares underperformed the Index at NAV.

The Funds were hedged during the period to help mitigate the potential interest-rate risk associated with the Funds' overall investment strategy. Generally speaking, the Funds' overall strategy is to invest primarily in bonds at the longer end of the maturity spectrum in order to capture their typically higher yields and greater income payments. The Funds tend to hedge to various degrees against the greater potential risk of volatility at the long end of the curve by using Treasury futures and interest-rate swaps to provide downside protection. For the 12-month period ending November 30, 2011, this hedging strategy was a drag on performance, as the ratio of municipal yields to U.S. Treasury yields of similar maturities remained relatively high and actually increased during the period. Thus, the more a Fund was hedged, the more that hedging detracted from the Fund's performance. Hedging was a detractor from performance of all Funds except the Michigan Trust, where the negative effect of hedging was less.

In contrast, leverage<sup>5</sup> aided performance. The use of leverage has the effect of providing additional exposure to the municipal market. Leverage magnifies a Fund's exposure to its underlying investments in both up and down markets. During this period of strong performance by municipal bonds, leverage was a key positive contributor to all of the Funds' relative performance versus the benchmark.

An overweighting in long-maturity bonds (20 years or more), which outperformed short- and medium-maturity issues during the period, also helped performance of all Funds except the Michigan Trust.

See *Endnotes and Additional Disclosures* in this report.

*Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) or market price (as applicable) with all distributions reinvested. Fund performance at market price will differ from its results at NAV due to factors such as changing perceptions about the Fund, market conditions, fluctuations in supply and demand for Fund shares, or changes in Fund distributions.*

*Investment return and principal value will fluctuate so that shares, when sold, may be worth more or less than their original cost. Performance less than one year is cumulative. Performance is for the stated time period only; due to market volatility, current Fund performance may be lower or higher than the quoted return. For performance as of the most recent month end, please refer to [www.eatonvance.com](http://www.eatonvance.com).*

Municipal Income Trusts

November 30, 2011

Management's Discussion of Fund Performance *continued*

Eaton Vance California Municipal Income Trust's shares at NAV had a total return of 7.99%, underperforming the 8.32% return of the Index. A key detractor was security selection in hospital bonds. Performance was helped, however, by security selection in the transportation sector and an overweighting in zero-coupon bonds.

Eaton Vance Massachusetts Municipal Income Trust's shares at NAV had a total return of 8.49%, outperforming the 8.32% return of the Index. Security selection in generally high quality general obligation bonds was positive for performance, while underweighting transportation as well as water & sewer, two sectors that did well over the period, hurt results.

Eaton Vance Michigan Municipal Income Trust's shares at NAV had a total return of 11.66%, outpacing the 8.32% return of the Index. Key drivers of performance included overweights in generally high quality local general obligation bonds, hospital bonds, and zero-coupon bonds, all of which did well during the period. Security selection in hospitals helped as well. But overweighting bonds with 10-20 year maturities, which performed well but not as strongly as longer-maturity issues, detracted from performance.

Eaton Vance New Jersey Municipal Income Trust's shares at NAV returned 5.64%, trailing the 8.32% return of the Index. An underweighting in general obligation bonds, which outpaced the overall market, held back results.

Contributors included an overweighting in zero-coupon bonds and security selection in industrial development bonds.

Eaton Vance New York Municipal Income Trust's shares at NAV returned 9.06%, outperforming the 8.32% return of the Index. An overweighting in zero-coupon bonds and in 5.50% and 5.75% coupon bonds, which performed well during the period, aided performance. Security selection in the industrial development and transportation sectors, however, detracted from results.

Eaton Vance Ohio Municipal Income Trust's shares at NAV returned 9.21%, outperforming the 8.32% return of the Index. An overweighting in generally high quality local government general obligation bonds contributed to results, while exposure to lower-quality industrial development revenue bonds and an underweighting in the strong-performing transportation sector detracted.

Eaton Vance Pennsylvania Municipal Income Trust's shares at NAV had a total return of 6.53%, underperforming the 8.32% return of the Index. Key detractors included security selection in the water & sewer and the industrial development sectors. In contrast, security selection and an overweighting in education bonds, as well as an overweighting in zero-coupon bonds, aided results.

See *Endnotes and Additional Disclosures* in this report.

*Past performance is no guarantee of future results. Returns are historical and are calculated by determining the percentage change in net asset value (NAV) or market price (as applicable) with all distributions reinvested. Fund performance at market price will differ from its results at NAV due to factors such as changing perceptions about the Fund, market conditions, fluctuations in supply and demand for Fund shares, or changes in Fund distributions.*

*Investment return and principal value will fluctuate so that shares, when sold, may be worth more or less than their original cost. Performance less than one year is cumulative. Performance is for the stated time period only; due to market volatility, current Fund performance may be lower or higher than the quoted return. Endnotes and Additional Disclosures

- <sup>1</sup> The views expressed in this report are those of the portfolio manager(s) and are current only through the date stated at the top of this page. These views are subject to change at any time based upon market or other conditions, and Eaton Vance and the Fund(s) disclaim any responsibility to update such views. These views may not be relied upon as investment advice and, because investment decisions are based on many factors, may not be relied upon as an indication of trading intent on behalf of any Eaton Vance fund. This commentary may contain statements that are not historical facts, referred to as forward looking statements. The Fund's actual future results may differ significantly from those stated in any forward looking statement, depending on factors such as changes in securities or financial markets or general economic conditions, the volume of sales and purchases of Fund shares, the continuation of investment advisory, administrative and service contracts, and other risks discussed from time to time in the Fund's filings with the Securities and Exchange Commission.
- <sup>2</sup> S&P 500 Index is an unmanaged index of large-cap stocks commonly used as a measure of U.S. stock market performance. Barclays Capital Municipal Bond Index is an unmanaged index of municipal bonds traded in the U.S. Barclays Capital Long (22+) Municipal Bond Index is an unmanaged index of municipal bonds traded in the U.S. with maturities of 22 years or more. Unless otherwise stated, index returns do not reflect the effect of any applicable sales charges, commissions, expenses, taxes or leverage, as applicable. It is not possible to invest directly in an index.
- <sup>3</sup> Performance results reflect the effects of leverage.
- <sup>4</sup> The Distribution Rate is based on the Fund's last regular distribution per share in the period (annualized) divided by the Fund's NAV or market price at the end of the period. The Fund's distributions may be composed of tax-exempt income, ordinary income, net realized capital gains and return of capital. Taxable-equivalent performance is based on the highest federal and state income tax rates, as applicable. Lower tax rates would result in lower tax-equivalent performance. Actual tax rate(s) will vary depending on your income, exemptions and deductions. Rates do not include local taxes. The distribution declared on December 30, 2011 reflects a reduction of the monthly distribution for Massachusetts Municipal Income Trust, Michigan Municipal Income Trust and New Jersey Municipal Income Trust.
- <sup>5</sup> Fund employs RIB financing and/or APS leverage. The leverage created by RIB investments and APS provides an opportunity for increased income but, at the same time, creates special risks (including the likelihood of greater price volatility). The cost of leverage rises and falls with changes in short-term interest rates. See Floating Rate Notes Issued in Conjunction with Securities Held in the notes to the financial statements for more information about RIB financing. RIB leverage represents the amount of Floating Rate Notes outstanding at period end as a percentage of Fund net assets applicable to common shares plus APS and Floating Rate Notes. APS leverage represents the liquidation value of the Fund's APS outstanding at period end as a percentage of Fund net assets applicable to common shares plus APS and Floating Rate Notes. The Fund is required to maintain prescribed asset coverage for its APS, which could be reduced if Fund asset values decline. Floating Rate Notes in both calculations reflect the effect of RIBs purchased in secondary market transactions, if applicable.
- <sup>6</sup> Ratings are based on Moody's, S&P or Fitch, as applicable. Credit ratings are based largely on the rating agency's investment analysis at the time of rating and the rating assigned to any particular security is not necessarily a reflection of the issuer's current financial condition. The rating assigned to a security by a rating agency does not necessarily reflect its assessment of the volatility of a security's market value or of the liquidity of an investment in

the security. If securities are rated differently by the rating agencies, the higher rating is applied.  
Fund profile subject to change due to active management.

AGC - Assured Guaranty Corp.  
AGM - Assured Guaranty Municipal Corp.

AMBAC	- AMBAC Financial Group, Inc.
AMT	- Interest earned from these securities may be considered a tax preference item for purposes of the Federal Alternative Minimum Tax.
BHAC	- Berkshire Hathaway Assurance Corp.
CIFG	- CIFG Assurance North America, Inc.
FGIC	- Financial Guaranty Insurance Company
NPFG	- National Public Finance Guaranty Corp.
RADIAN	- Radian Group, Inc.

The Trust invests primarily in debt securities issued by California municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at November 30, 2011, 37.1% of total investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 0.5% to 15.3% of total investments.

- (1) Amount is less than 0.05%
- (2) Security (or a portion thereof) has been pledged to cover margin requirements on open financial futures contracts.
- (3) Security (or a portion thereof) has been pledged as collateral for residual interest bond transactions. The aggregate value of such collateral is \$1,626,867.
- (4) Security represents the municipal bond held by a trust that issues residual interest bonds (see Note 1H).

AGC - Assured Guaranty Corp.

AMBAC	- AMBAC Financial Group, Inc.
AMT	- Interest earned from these securities may be considered a tax preference item for purposes of the Federal Alternative Minimum Tax.
FGIC	- Financial Guaranty Insurance Company
NPFG	- National Public Finance Guaranty Corp.
XLCA	- XL Capital Assurance, Inc.

The Trust invests primarily in debt securities issued by Massachusetts municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at November 30, 2011, 25.8% of total investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 1.3% to 14.8% of total investments.

- (1) Security represents the municipal bond held by a trust that issues residual interest bonds (see Note 1H).
- (2) Security (or a portion thereof) has been pledged to cover margin requirements on open financial futures contracts.
