SAFE HARBOR STATEMENT

This Quarterly Report on Form 10-Q, including the Management's Discussion and Analysis of Financial Condition and Results of Operations, contains statements which constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including statements relating to trends in operations and financial results and the business and the products of the Registrant and its subsidiaries, which include words such as "anticipate", "believe", "plan", "estimate", "expect", "intend", and other similar expressions. Forward-looking statements are made based upon management's current expectations and beliefs concerning future developments and their potential effects on the Company. Such forward-looking statements are not guarantees of future performance. Factors that may cause our actual results to differ materially from those contemplated by these forward-looking statements include, among others, the following possibilities: (a) general economic conditions and other factors, including prevailing interest rate levels and stock and bond market performance, which may affect our ability to sell our products, the market value of our investments and the lapse rate and profitability of policies; (b) our ability to achieve anticipated levels of operational efficiencies and cost-saving initiatives and to meet cash requirements based upon projected liquidity sources; (c) customer response to new products, distribution channels and marketing initiatives; (d) mortality, morbidity, and other factors which may affect the profitability of our insurance products; (e) our ability to develop and maintain effective risk management policies and procedures and to maintain adequate reserves for future policy benefits and claims; (f) changes in the federal income tax and other federal laws, regulations, and interpretations, including federal regulatory measures that may significantly affect the insurance business including limitations on antitrust immunity, minimum solvency requirements, and changes to the tax advantages offered by life insurance and annuity products or programs with which they are used; (g) increasing competition in the sale of insurance and annuities and the recruitment of sales representatives; (h) regulatory changes, interpretations, initiatives or pronouncements, including those relating to the regulation of insurance companies and the regulation and sale of their products and the programs in which they are used; (i) our ratings and those of our subsidiaries by independent rating organizations which we believe are particularly important to the sale of our products; (j) the performance of our investment portfolios; (k) the impact of changes in standards of accounting; (l) our ability to integrate the business and operations of acquired entities; (m) expected protection products and accumulation products margins; (n) the impact of anticipated investment transactions; and (o) litigation or regulatory investigations or examinations.

There can be no assurance that other factors not currently anticipated by us will not materially and adversely affect our results of operations. You are cautioned not to place undue reliance on any forward-looking statements made by us or on our behalf. Forward-looking statements speak only as of the date the statement was made. We undertake no obligation to update or revise any forward-looking statement.

AMERUS GROUP CO.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)**

(1) CONSOLIDATION AND BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for annual financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. All adjustments were of a normal recurring nature, unless otherwise noted in the Notes to Consolidated Financial Statements. Operating results for the three months ended March 31, 2005 are not necessarily indicative of the results that may be expected for the year ending December 31, 2005. The consolidated balance sheet at December 31, 2004 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by GAAP for complete financial statements. For further information and for capitalized terms not defined in this Form 10-Q, refer to the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2004.

The accompanying consolidated financial statements include the accounts and operations of the Company and its wholly-owned subsidiaries, principally AmerUs Life Insurance Company (ALIC), AmerUs Annuity Group Co. and its subsidiaries (collectively, AAG), AmerUs Capital Management Group, Inc. (ACM), and ILICO Holdings, Inc., the holding company of Indianapolis Life Insurance Company (ILIC) and its subsidiaries (collectively, ILICO). All significant intercompany transactions and balances have been eliminated in consolidation.

The Company has certain stock-based employee compensation plans which are accounted for under the recognition and measurement principles of APB Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations. The plans are stock option plans for which no stock-based employee compensation cost is reflected in net income, as all options granted under those plans had an exercise price equal to the market value of the underlying common stock on the date of grant. The following table illustrates the effect on net income and earnings per share if the Company had applied the fair value recognition provisions of Statement of Financial Accounting Standards (SFAS) 123, Accounting for Stock-Based Compensation, to stock-based employee compensation:

Table of Contents

	For The Three Months Ended March 31,	
	2005	2004
	(\$ in thousands, except share data)	
Net income, as reported	\$ 61,488	\$ 33,129
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects	(659)	(1,162)
Pro forma net income	\$ 60,829	\$ 31,967
Earnings per share:		
Basic as reported	\$ 1.55	\$ 0.84
Basic pro forma	\$ 1.54	\$ 0.81
Diluted as reported	\$ 1.43	\$ 0.82
Diluted pro forma	\$ 1.42	\$ 0.79

Certain amounts in the 2004 financial statements have been reclassified to conform to the 2005 financial statement presentation.

(2) EARNINGS PER SHARE

Basic earnings per share of common stock are computed by dividing net income by the weighted-average number of common shares outstanding during the period. Diluted earnings per share assumes the issuance of common shares applicable to stock options, PRIDESSM and the Company's Optionally Convertible Equity-Linked Accreting Notes (OCEANSSM) and is calculated using the treasury stock method.

Diluted earnings per share applicable to the Company's PRIDESSM securities are determined using the treasury stock method as it is currently anticipated that holders of the PRIDES are more likely to tender cash in the future for the securities' forward contract. The PRIDES added 1,502,762 and 523,539 shares to the diluted earnings per share calculation for the three months ended March 31, 2005 and 2004, respectively.

Diluted earnings per share applicable to the Company's OCEANSSM are determined using the guidance of the Financial Accounting Standards Board's Emerging Issues Task Force Issue 04-8 (EITF 04-8), 'The Effect of Contingently Convertible Debt on Diluted Earnings per Share,' which was effective for periods ending after December 15, 2004. EITF 04-8 requires diluted earnings per share to be computed following the guidance of EITF 90-19, 'Convertible Bonds with Issuer Option to Settle for Cash upon Conversion,' for securities such as the OCEANs which are considered to be Instrument C securities. The conversion spread portion of an Instrument C security should be included in diluted earnings per share based on the number of shares that would be required to be delivered if the instrument had been converted at the end of the period. The OCEANs added 990,066 shares for the diluted earnings per share calculation for the three months ended March 31, 2005 and no shares for the three months ended March 31, 2004.

Table of Contents

	For The Three Months Ended March 31,					
	Net Income	2005 Number of Shares	Per Share Amount	Net Income	2004 Number of Shares	Per Share Amount

Diluted EPS	\$ 61,488	42,931	\$ 1.43	\$ 29,740	40,435	\$ 0.74

(3) CLOSED BLOCK

The Company has established two closed blocks, which we refer to collectively as the Closed Block. The first was established on June 30, 1996 in connection with the reorganization of ALIC from a mutual company to a stock company. The second was established as of March 31, 2000 in connection with the reorganization of ILIC from a mutual company to a stock company. Insurance policies which had a dividend scale in effect as of each Closed Block establishment date were included in the Closed Block. The Closed Block was designed to provide reasonable assurance to owners of insurance policies included therein that, after the reorganization of ALIC and ILIC, assets would be available to maintain the dividend scales and interest credits in effect prior to the reorganization if the experience underlying such scales and credits continues.

Summarized financial information of the Closed Block as of March 31, 2005 and December 31, 2004 and for the three months ended March 31, 2005 and 2004 are as follows:

Table of Contents

Realized gains on investments	130	830
Policyowner benefits	(50,121)	(55,170)
Underwriting, acquisition and other expenses	(557)	(1,089)
Dividends to policyowners	(18,168)	(23,399)
Contribution from the Closed Block before income taxes	\$ 9,291	\$ 9,592

(4) DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company accounts for derivatives, including certain derivative instruments embedded in other contracts, at fair value. Accounting for gains and losses resulting from changes in the values of derivatives is dependent upon the use of the derivative and its qualification for special hedge accounting. In addition, we also have trading securities that back our total return strategy traditional annuity products. During the first three months of 2005 and 2004, realized/unrealized gains (losses) on investments included an unrealized loss of \$27.6 million and an unrealized gain of \$6.2 million, respectively, from the change in fair value on call options used as a natural hedge of embedded options within indexed products. Additionally, an unrealized loss has been recognized amounting to \$21.7 million and an unrealized gain of \$17.7 million for the first three months of 2005 and 2004, respectively, from the change in fair value on the trading securities backing the total return strategy products. Policyowner benefits included an offsetting adjustment to contract liabilities for fair value changes in options embedded within the indexed products and fair value changes on total return strategy annuity contracts. The total adjustment to policyowner benefits amounted to a decrease in expense of \$44.3 million and an additional expense of \$23.7 million the first three months of 2005 and 2004, respectively.

The following table summarizes the income (loss) impact of the market value adjustments on trading securities, derivatives and the cash flow hedge amortization for the three months ended March 31, 2005 and 2004:

Table of Contents

Three Months Ended March 31, 2005				
	Total Return Products	Indexed Products	Other	Total
		(\$ in thousands)		
Fixed maturity securities held for trading	\$ (18,374)	\$	\$ (3,294)	\$ (21,668)
Options		(26,895)	(688)	(27,583)
Market value adjustment to liabilities	9,392	32,478	2,464	44,334

After-tax total	\$ 1,643	\$ (249)	\$ 88	\$ 1,482

(5) FEDERAL INCOME TAXES

The effective income tax rate for the three months ended March 31, 2005 and 2004 varied from the prevailing corporate rate primarily as a result of tax exempt interest and dividends received deduction. The effective tax rate was also reduced by a reduction in the income tax accrual. The accrual reduction, amounting to \$19.9 million and \$5.2 million, for the three months ended March 31, 2005 and 2004, respectively, was for the release of provisions originally established for potential tax adjustments which have been settled or eliminated. The effective income tax rate excluding the accrual reductions was 34.23% and 31.54% for the three months ended March 31, 2005 and 2004, respectively.

(6) COMMITMENTS AND CONTINGENCIES

In recent years, the life insurance industry, including the Company and its subsidiaries, has been subject to an increase in litigation pursued on behalf of purported classes of insurance purchasers, questioning the conduct of insurers in the marketing of their products. The Company is routinely involved in litigation and other proceedings, including class actions, reinsurance claims and regulatory proceedings arising in the ordinary course of its business. Some of these claims and legal actions are in jurisdictions where juries are given substantial latitude in assessing damages, including punitive and exemplary damages. In addition, regulatory bodies, such as state insurance departments and attorneys

Table of Contents

general, periodically make inquiries and conduct examinations concerning the Company's compliance with insurance and other laws. The Company responds to such inquiries and cooperates with regulatory examinations in the ordinary course of business.

On April 7, 2005, a national class action complaint was filed in the U.S. District Court for the Central District of California against the Company and certain of its subsidiaries alleging conduct and causes of action, and seeking relief, similar to that alleged in class action lawsuits in California state courts described in the Company's 2004 Annual Report on Form 10-K. On April 25, 2005 a similar national class action complaint was filed in the U.S. District Court for the District of Kansas against a subsidiary of the Company. These class actions were brought on behalf of purchasers of annuity products claiming that the products and manner in which they were sold were inappropriate for the senior citizen market. The Company continues to believe it has appropriate defenses against these lawsuits and intends to vigorously defend its position.

The Company's pending litigation (including without limitation the proceedings described in the immediately preceding paragraph) is subject to many uncertainties, and given its complexity and scope, the outcomes cannot be predicted. Given these uncertainties, the Company is unable to estimate the possible loss or range of loss that may result from the Company's pending litigation. It is possible that the Company's results of operations or cash flow in a particular quarterly or annual period could be materially affected by an ultimate unfavorable resolution of pending litigation and regulatory matters depending, in part, upon the results of operations or cash flow for such period. Although no assurances can be given and no determinations can be made at this time, the Company believes that the ultimate liability, if any, with respect to the Company's pending claims and legal actions, would have no material effect on its operations and financial position.

(7) EMPLOYEE BENEFIT PLANS

The Company has a frozen defined benefit pension plan and also has defined benefit plans which provide supplemental retirement benefits to certain agents and executives. In addition to pension benefits, the Company also provides certain health care and life insurance benefits for retired employees. The following is a summary of net periodic benefit cost for these plans for the three months ended March 31, 2005 and 2004:

	Three Months Ended March 31,	
	2005	2004
	(\$ in thousands)	
Components of net periodic benefit cost:		
Service cost	\$ 79	\$ 82
Interest cost	1,472	1,550
Expected return on plan assets	(1,216)	(1,214)
Amortization of prior service cost	22	22
Amortization of actuarial loss	178	62
Net periodic benefit cost	535	502
Curtailment		(951)
Total expense	\$ 535	\$ (449)

Table of Contents

(8) ACCOUNTING DEVELOPMENTS

In December 2004, the FASB issued a revision to SFAS 123, Share-Based Payment, (SFAS 123R) which is a revision of SFAS 123, Accounting for Stock-Based Compensation, (SFAS 123). SFAS 123R requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on fair values. Pro forma disclosure of fair value information is no longer an alternative. The implementation date of the statement has been delayed to be effective for the fiscal year beginning after June 15, 2005. Adoption is to be made using either the modified prospective method or the modified retrospective method. The modified prospective method recognizes cost based on the requirements for all share-based payments granted after the effective date and for awards granted prior to the effective date that remain unvested prior to the effective date. The modified retrospective method includes the requirements of the modified prospective method but also permits restatement of financial statements based on pro forma amounts previously recognized under SFAS 123. Restatement can either be for all prior periods presented or prior interim periods of the year of adoption. Early adoption is permitted. The Company continues to evaluate the impacts of SFAS 123R which the Company will adopt January 1, 2006. The Company currently discloses the pro forma impacts of recognizing fair value as permitted by SFAS 123 in note 1 to the consolidated financial statements.

(9) OPERATING SEGMENTS

The Company has two operating segments: Protection Products and Accumulation Products. Products generally distinguish a segment. A brief description of each segment follows:

Protection Products. The primary product offerings consist of interest-sensitive whole life, term life, universal life and indexed life insurance policies. Indexed life is a type of universal life or interest-sensitive whole life product. These products are marketed on a national basis primarily through a Career Marketing Organization (CMOs) system, a Personal Producing General Agent (PPGA) system, Independent Marketing Organizations (IMOs) and a New York distribution system.

Accumulation Products. The primary product offerings consist of individual fixed annuities (comprised of traditional fixed annuities and indexed annuities), marketed on a national basis primarily through IMOs and independent brokers, and insurance contracts issued through funding agreements.

The product offerings within each segment are of a very similar nature. Insurance premiums of the protection products segment primarily include term life products. Product charges of the protection products segment include interest-sensitive whole life, universal life and indexed life insurance products. Product charges of the accumulation products segment include traditional fixed and indexed annuities. Due to the similarity of products within each segment, premiums and product charges are shown by segment and not by specific product type.

The Company uses the same accounting policies and procedures to measure operating segment income and assets as it uses to measure its consolidated income from operations and assets with the exception of the elimination of certain items which management believes are not necessarily indicative of overall operating trends. These items are shown between segment pre-tax operating income and net income on the following operating segment tables and are as follows:

- 1) Realized/unrealized gains and losses on open block assets.
- 2) Market value changes and amortization of assets and liabilities associated with the accounting for derivatives, such as:

Unrealized gains and losses on open block options and securities held for trading.

Change in option value of indexed products and market value adjustments on total return strategy annuities.

Cash flow hedge amortization.

18

Table of Contents

- 3) Amortization of deferred policy acquisition costs (DAC) and value of business acquired (VOBA) related to the unrealized and realized gains and losses on the open block investments and the derivative adjustments.
- 4) Other income from non-insurance operations.
- 5) Interest expense.
- 6) Income tax expense.
- 7) Income from discontinued operations.
- 8) Cumulative effect of changes in accounting.

These items will fluctuate from period to period depending on the prevailing interest rate and economic environment or are not part of the core insurance operations. As a result, management believes they do not reflect the ongoing earnings capacity of the Company's operating segments.

Premiums; product charges; policyowner benefits; insurance expenses; amortization of DAC, deferred sales inducements and VOBA; and dividends to policyowners are attributed directly to each operating segment. Net investment income and closed block realized capital gains and losses are allocated based on directly-related assets required for transacting the business of that segment. Other revenues and benefits and expenses which are deemed not to be associated with any specific segment are grouped together in the All Other category. These items primarily consist of holding company revenues and expenses, operations of the Company's real estate management subsidiary, and accident and health insurance.

Assets are segmented based on policy liabilities directly attributable to each segment. There are no significant intersegment transactions. Depreciation and amortization, excluding amortization of DAC, deferred sales inducements, and VOBA as previously discussed, are not significant. There have been no material changes in segment assets since December 31, 2004.

Table of ContentsOperating Segment Income
(\$ in thousands)

Table of Contents**Item 2. Management's Discussion And Analysis Of Financial Condition And Results Of Operations**

Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) addresses the consolidated financial condition of AmerUs Group Co. as of March 31, 2005, compared with December 31, 2004, and our consolidated results of operations for the three months ended March 31, 2005 and 2004. You should read the following analysis of our consolidated financial condition and results of operations in conjunction with our MD&A and audited consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2004, and Unaudited Consolidated Financial Statements included elsewhere in this Quarterly Report on Form 10-Q.

NATURE OF OPERATIONS

We are a holding company whose subsidiaries are primarily engaged in the business of marketing, underwriting and distributing a broad range of individual life, annuity and insurance deposit products to individuals and businesses in 50 states, the District of Columbia and the U.S. Virgin Islands. We have two reportable operating segments: protection products and accumulation products. The primary offerings of the protection products segment are interest-sensitive whole life, term life, universal life and indexed life insurance policies. Indexed life is a type of universal life or interest-sensitive whole life product. The primary offerings of the accumulation products segment are individual fixed annuities (comprised of traditional fixed annuities and indexed annuities) and funding agreements.

FINANCIAL HIGHLIGHTS

- (A) Non-segment expense, net consists primarily of open block realized/unrealized gains and losses, derivative related market value adjustments, non-insurance operations, interest expense, income taxes, discontinued operations and cumulative effect of change in accounting.

Table of Contents

Operating segment income in the first quarter of 2005 increased for both the protection products and accumulation products segments as compared to the same periods in 2004. Protection products earnings were primarily impacted by increased open block product margins. Our accumulation products pre-tax operating segment income increased primarily due to growth in assets and increased product spread. The increases in protection products and accumulation products segment income were partially offset by higher operating losses of the other segment in the first quarter of 2005 compared to 2004. The 2004 other segment results were favorably impacted by gains from an equipment transaction and an employee postretirement benefit plan curtailment.

Net income increased in the first quarter of 2005 compared to the first quarter of 2004 primarily as a result of higher operating segment income and income tax accrual reductions.

Total assets increased \$299 million during the first quarter of 2005 primarily as a result of net cash received from collected premiums and deposits, positive cash flows from operating activities and the utilization of securities lending arrangements. Total investments grew \$269 million which was more than offset by declines in unrealized investment gains of \$303 million. Liabilities increased primarily due to policy reserves and policyowner funds which increased due to the higher volume of insurance in force and additional securities lending arrangements. Stockholders' equity decreased \$32 million in the first quarter of 2005 primarily as a result of reduced unrealized gains on available-for-sale investments of \$80 million and treasury stock purchases of \$20 million. The decrease was partially offset by additions to equity for year-to-date net income of \$61 million and stock issued under various incentive plans of \$6 million. The unrealized gains included in accumulated other comprehensive income are presented after related adjustments to DAC, VOBA, capitalized deferred sales inducements, closed block policyowner dividend obligation, unearned revenue reserves and deferred income taxes.

PROTECTION PRODUCTS

Our protection products segment primarily consists of interest-sensitive whole life, term life, universal life and indexed life insurance policies. These products are marketed on a national basis primarily through CMOs, a PPGA distribution system, IMOs and a New York distribution system. Included in protection products is the closed block of ALIC and the closed block of ILIC, established when the companies reorganized from mutual companies to stock companies. When protection products are sold, we invest the premiums we receive in our investment portfolio and establish a liability representing our commitment to the policyowner. We manage investment spread by seeking to maximize the return on these invested assets, consistent with our asset/liability and credit quality policies. We enter into reinsurance arrangements in order to reduce the effects of mortality risk and the statutory capital strain from writing new business. All income statement line items are presented net of reinsurance amounts. Protection products in force totaled \$98.9 billion at March 31, 2005 and \$97.5 billion at December 31, 2004. Protection products in force is a performance measure utilized by investors, analysts and the Company to assess the Company's position in the industry. A summary of our protection products segment operations follows:

Table of Contents

	For The Three Months Ended March 31,	
	2005	2004
	(\$ in thousands)	
Revenues:		
Insurance premiums	\$ 61,483	\$ 69,716
Product charges	47,077	35,459
Net investment income	86,886	81,258
Realized gains on closed block investments	130	830
Other income	861	906
Total revenues	196,437	188,169
Benefits and expenses:		
Policyowner benefits	89,201	93,395
Underwriting, acquisition and other expenses	18,393	16,958
Amortization of DAC and VOBA, net of open block gain/loss adjustment	24,871	19,241
Dividends to policyowners	20,002	25,484
Total benefits and expenses	152,467	155,078
Pre-tax operating income - Protection Products segment	\$ 43,970	\$ 33,091

Pre-tax operating income from our protection products increased 33% in the first quarter of 2005 compared to the first quarter of 2004. The increase was primarily due to higher open block product margins, in particular increased product charges and net investment income. The increase was partially reduced by higher expenses and DAC and VOBA amortization. The key drivers of our protection products business include sales, persistency, net investment income, mortality and expenses.

Sales. Sales are a key driver of our business as they are a leading indicator of future revenue trends to emerge in segment operating income. Sales are presented as annualized premium which is in accordance with industry practice, and represent the amount of new business sold during the period. Sales are a performance metric which we use to measure the productivity of our distribution network and for compensation of sales and marketing employees and agents. The following table summarizes annualized premium by life insurance product:

	Sales Activity by Product For The Three Months Ended March 31,	
	2005	2004
	(\$ in thousands)	
Traditional life insurance:		
Interest-sensitive whole life	\$ 106	\$ 3,418
Term and other life	3,057	3,575
Universal life	4,871	7,534

Indexed life	18,026	17,303
Total	\$ 26,060	\$ 31,830

Direct first year annualized premiums decreased 18% in the first quarter of 2005 compared to the first quarter of 2004. We continue to focus our marketing efforts on indexed life products. In the first three months of 2005, sales of

Table of Contents

indexed life products were \$18.0 million as compared to \$17.3 million for 2004 and comprised 69% of total direct sales in the first quarter of 2005 compared to 54% in the first quarter of 2004. We are a leading writer of indexed life products in the United States. Interest-sensitive whole life insurance sales decreased in the first quarter of 2005 compared to 2004 due to our sales focus on indexed products and our withdrawal from certain tax-advantaged markets. Universal life insurance sales decreased between periods as a result of pricing changes associated with products launched in January 2005. Pricing for the new universal life products reflect higher reinsurance costs and increased mortality expectations in the senior age markets. We also continue to de-emphasize our term insurance products.

Premiums and Product Charges. We recognize premiums on traditional life insurance policies as revenues when the premiums are due. Amounts received as payments for universal life and indexed life insurance policies are not recorded as premium revenue, but are instead recorded as a policyowner liability. Revenues from the universal life and indexed life policies consist of charges for the cost of insurance, policy administration and policy surrender and are shown as product charges. All revenue is reported net of reinsurance ceded.

Insurance premium revenue was lower in the first quarter of 2005 as compared to the first quarter of 2004 primarily due to a decline in closed block in force business and our shift in product mix from traditional to indexed life products. Product charge revenue was higher in 2005 as compared to 2004 due to growth in the indexed life block of business.

Persistency. Persistency, which we measure in terms of a lapse rate, is a key driver of our business because it refers to the policies which remain in our block of business. A low lapse rate means higher persistency indicating more business is remaining in force to generate future revenues. Annualized lapse rates, based on a rolling four quarter period, were 6.5% as of March 31, 2005 compared to 6.3% as of March 31, 2004. This slight increase in our lapses primarily resulted from the dividend reductions we made on our policies. Our persistency experience remained within our pricing assumptions.

Net Investment Income. Net investment income is a key driver of our business as it reflects earnings on our invested assets. Net investment income increased for the first quarter of 2005 as compared to the same period a year ago primarily as a result of the growth in protection products assets which were approximately \$452 million higher in the first quarter of 2005 compared to the first quarter of 2004. The year-to-date earned rate of the investment portfolio was 6.35% compared to 6.48% a year ago.

Mortality and Benefit Expense. Mortality is a key driver of our business as it impacts the amount of our benefit expense. We utilize reinsurance to reduce the effects of mortality risk. We experienced unfavorable mortality in the first quarter 2005 as compared to the same period a year ago, primarily in the closed block. However, a significant amount of the increased mortality in this period was offset by reserves released on these elevated claims. Our open block mortality experience continues to be in line with our pricing assumptions.

Interest benefit expense increased in the first quarter of 2005 as compared to the same period in 2004 due to the growth in our in force block of indexed life, universal life and interest-sensitive whole life business. The increased mortality and interest benefit expense in the first quarter of 2005 was offset by reserves released on the excess mortality and by reduced surrender benefit activity, resulting in a decrease in policyowner benefits of \$4.2 million.

Underwriting, Acquisition and Other Expenses. Underwriting, acquisition and other expenses are a key driver of our business as they are costs of our operations. Expenses increased for the first quarter of 2005 compared to the same period of 2004 primarily due to higher employee benefit costs and additional expenses of integrating ILIC in force policy services and data center activities from the Woodbury, New York site to Des Moines.

Table of Contents

Amortization of DAC and VOBA. The amortization of DAC and VOBA are expense items which increased for the first quarter 2005 as compared to the respective period in 2004. DAC and VOBA are generally amortized in proportion to policy gross margins which increased in 2005, resulting in higher amortization expense.

Dividends to Policyowners. In addition to basic policyowner dividends, dividend expense includes increases or decreases to the closed block policyowner dividend obligation liability carried on the consolidated balance sheet. The actual results of the closed block are adjusted to equal the expected earnings based on the actuarial calculation at the time of formation of the closed block (which we refer to as the closed block glide path). The adjustment to have the closed block operating results equal the closed block glide path is made to dividend expense. If the actual results for the period exceed the closed block glide path, increased dividend expense is recorded as a policyowner dividend obligation to reduce the actual closed block results. For actual results less than the closed block glide path, dividend expense is reduced to increase the actual closed block results. As a result of this accounting treatment, operating earnings from the closed block only include the predetermined closed block glide path.

Dividend expense decreased for the first quarter of 2005 compared to the first quarter of 2004. This reduction was primarily due to closed block dividend reductions.

Outlook. We will continue to focus our sales on indexed life products which we expect will favorably impact our product margins. We also expect to incur additional expenses in 2005 to further integrate administrative functions to enhance operating efficiencies in future periods.

ACCUMULATION PRODUCTS

Our accumulation products segment primary offerings consist of individual fixed annuities and funding agreements. The fixed annuities are marketed on a national basis primarily through IMOs and independent brokers. Similar to our protection products segment, we invest the premiums we receive from accumulation product deposits in our investment portfolio and establish a liability representing our commitment to the policyowner. We manage product spread by seeking to maximize the return on our invested assets consistent with our asset/liability management and credit quality policies. When appropriate, we periodically reset the interest rates credited to our policyowner liability. Accumulation products reserves totaled \$12.6 billion at March 31, 2005 and \$12.3 billion at December 31, 2004. A summary of our accumulation products segment operations follows:

Table of Contents

	For The Three Months Ended March 31,	
	2005	2004
	(\$ in thousands)	
Revenues:		
Immediate annuity and supplementary contract premiums	\$ 480	\$ 723
Product charges	11,956	14,103
Net investment income	181,646	174,263
Other income	2,541	2,751
Total revenues	196,623	191,840
Benefits and expenses:		
Policyowner benefits	124,728	120,818
Underwriting, acquisition and other expenses	7,260	6,332
Amortization of DAC and VOBA	25,047	29,930
Dividends to policyowners	1	
Total benefits and expenses	157,036	157,080
IMO Operations:		
Other income	9,011	6,736
Other expenses	7,931	4,496
Net IMO operating income	1,080	2,240
Pre-tax operating income Accumulation Products segment	\$ 40,667	\$ 37,000

Pre-tax operating income from our accumulation products operations increased 10% in the first quarter of 2005 compared to 2004 primarily due to higher assets and increased product spread. The drivers of profitability in our accumulation products business include deposits, persistency, product spread, expenses and IMO operations.

Deposits. Deposits are a key driver of our business as this is a measure which represents collected premiums to be deposited to policyowner accounts for which we will earn a future product spread. Deposits are presented as collected premiums, which are measured in accordance with industry practice, and represent the amount of new business sold during the period. Deposits are a performance metric which we use to measure the productivity of our distribution network and for compensation of sales and marketing employees and agents. The following table summarizes our accumulation products segment deposits:

Table of Contents

	Deposits by Product For The Three Months Ended March 31,	
	2005	2004
	(\$ in thousands)	
Annuities Deferred fixed annuities:		
Traditional fixed annuities	\$ 68,882	\$ 82,170
Indexed annuities	503,070	296,875
Variable annuities	545	852
Total annuities	572,497	379,897
Reinsurance ceded	(1,970)	(3,196)
Total deposits, net of reinsurance	\$ 570,527	\$ 376,701

Direct annuity deposits increased 51% in the first quarter of 2005 compared to the first quarter 2004. Deposits increased in 2005 as compared to 2004 primarily due to our indexed annuities. Indexed annuities comprised 88% of total direct annuity deposits in the first quarter of 2005 compared to 78% in the first quarter of 2004. Our wholly-owned and proprietary organizations accounted for approximately 84% of our annuity deposits in the first quarter of 2005 compared to 75% in the first quarter of 2004.

Product Charges. The deposits we receive on accumulation products are not recorded as revenue but instead as a policyowner liability. Surrender charges collected on accumulation products are recorded as revenue and shown as a product charge. Product charges decreased in the first quarter of 2005 as compared to the first quarter of 2004 due to fewer policy withdrawals within the surrender charge period.

Persistency. Persistency, which we measure in terms of a withdrawal rate, is a key driver of our business as it refers to the policies which remain in our block of business. A low withdrawal rate reflects higher persistency indicating more business is remaining in force to generate future revenues. Withdrawals represent funds taken out of accumulation products by policyowners not including those due to the death of policyowners. Annuity withdrawal rates without internal replacements, based on a rolling four quarter period, continued to improve in 2005 and amounted to 8.0% and 9.0% as of March 31, 2005 and 2004, respectively. Annuity withdrawals without internal replacements totaled \$243.2 million and \$295.8 million for the first three months of 2005 and 2004, respectively. Our withdrawal experience remained within our pricing assumptions.

Product Spread. Product spread is a key driver of our business as it measures the difference between the income earned on our invested assets and the rate which we credit to policyowners, with the difference reflected as segment operating income. Asset earned rates and liability crediting rates, based on a rolling four quarter period, were as follows for our annuity products:

	For The Twelve Months Ended March 31,	
	2005	2004
Asset earned rate	5.74%	5.82%
Liability credited rate	3.53%	3.81%

Product spread	2.21%	2.01%
----------------	-------	-------

Table of Contents

The product spread increased 20 basis points to 221 basis points for the first quarter of 2005 compared to the first quarter of 2004. Liability crediting rates were lowered throughout 2004 to correspond with the decline in investment yields caused by the overall combined lower rates for new and reinvested funds.

At March 31, 2005, the account value of traditional annuities totaled \$6.4 billion of which approximately 94% have minimum guarantee rates ranging from 3% to 4%. For traditional annuities with an account value of \$4.7 billion, the credited rate was equal to the minimum guarantee rate, and as a result, the credited rate cannot be lowered. Traditional annuities with an account value of \$1.1 billion had a multi-year guarantee for which the credited rate cannot be decreased until the end of the multi-year period. At the end of the multi-year period, we will have the ability to lower the crediting rate to the minimum guaranteed rate by an average of approximately 275 basis points. The remaining multi-year period is generally either one or two years. Due to these limitations on the ability to lower interest crediting rates and the potential for additional credit defaults and lower reinvestment rates on investments, we could experience spread compression in future periods.

Underwriting, Acquisition and Other Expenses. Underwriting, acquisition and other expenses are a key driver of our business as they are costs of our operations. Expenses increased for the first quarter of 2005 compared to the same period of 2004 primarily due to non-deferrable agent commissions associated with a new policy persistency program started in 2004.

Amortization of DAC and VOBA. The amortization of DAC and VOBA decreased for the first quarter of 2005 compared to the first quarter of 2004. During the third quarter of 2004, projected future margin items for DAC and VOBA amortization were updated with current estimates. These updated projected margins continued to be appropriate for first quarter of 2005 amortization and, as a result, DAC and VOBA amortization in the first quarter of 2005 is lower than for the same period in 2004.

IMO Operations. IMO Operations are a key driver of our business as the earnings from the IMOs are a component of the accumulation products segment operating income. IMOs have contractual arrangements to promote our insurance products in their networks of agents and brokers. Additionally, they also contract with third party insurance companies. We own four such IMOs. The income from IMO operations primarily represents annuity commissions received by our IMOs from those third party insurance companies. Net IMO operating income decreased in the first quarter of 2005 compared to the first quarter of 2004 primarily due to changes in distribution strategies and higher operating expenses, including litigation costs.

Outlook. We anticipate increased product sales from our owned and proprietary distribution organizations but decreased product sales from other distribution channels as we manage our sales in this current low interest rate environment. We also expect to continue our sales focus on the indexed annuity products and to actively manage surrenders. We will continue to manage our spreads as we strive for our desired profitability in this economic environment.

OTHER

The other operations consist of our non-core lines of business outside of protection and accumulation products. These lines of business include holding company revenues and expenses, operations of our real estate management subsidiary, and accident and health insurance. The pre-tax operating loss of our other operations in the first quarter of 2005 increased as compared to the first quarter of 2004 primarily as a result of gains on an equipment transaction and an employee postretirement benefit plan curtailment which occurred in the first quarter of 2004.

Table of Contents**INCOME STATEMENT RECONCILIATION**

A reconciliation of our segment pre-tax operating income to net income as shown in our consolidated statements of income follows:

	For The Three Months Ended March 31,	
	2005	2004
	(\$ in thousands)	
Segment pre-tax operating income:		
Protection Products	\$ 43,970	\$ 33,091
Accumulation Products	40,667	37,000
Other operations	(5,769)	(1,775)
Total segment pre-tax operating income	78,868	68,316
Non-segment items increases (decreases) to income:		
Realized and unrealized gains (losses) on assets and liabilities:		
Realized/unrealized gains (losses) on open block assets	177	(24,730)
Unrealized gains (losses) on open block options and trading investments	(49,251)	23,815
Change in option value of indexed products and market value adjustments on total return strategy annuities	44,334	(23,733)
Cash flow hedge amortization	39	(462)
Amortization of DAC and VOBA due to open block realized/unrealized gains and losses	(2,825)	1,260
Other loss from non-insurance operations	(377)	(199)
Income from continuing operations	70,965	44,267
Interest expense	(7,780)	(8,398)
Income tax expense	(1,697)	(6,129)
Net income from continuing operations	61,488	29,740
Income from discontinued operations, net of tax		3,899
Cumulative effect of change in accounting, net of tax		(510)
Net income	\$ 61,488	\$ 33,129

Realized and Unrealized Gains (Losses) on Assets and Liabilities. Realized gains (losses) on open block assets will fluctuate from period to period depending on the prevailing interest rate, the economic environment and the timing of investment sales and credit events. As part of managing our invested assets, we routinely sell securities and realize gains and losses. In addition, in the first quarter of 2004, we recognized a pre-tax impairment loss of \$12.2 million on our Indianapolis, Indiana office building. The building, which was listed for sale in 2003, was sold in the third quarter of 2004.

Unrealized gains (losses) on open block options and trading investments also will fluctuate from period to period depending on the prevailing interest rate, the economic environment and credit events. We use options to hedge our indexed products. In accounting for derivatives, we adjusted our options to market value, which, due to the

Table of Contents

economic environment and stock market conditions, resulted in an unrealized loss of \$27.6 million and an unrealized gain of \$6.2 million in the first quarter of 2005 and 2004, respectively. In addition, we also have trading securities that back our total return strategy traditional annuity products. The market value adjustment on the trading securities resulted in an unrealized loss of \$21.7 million and an unrealized gain of \$17.7 million in the first quarter of 2005 and 2004, respectively. Most of the unrealized gains and losses on the options and trading securities are offset by similar adjustments to the option portion of the indexed product reserves and to the total return strategy annuity reserves. The reserve adjustments are reflected in policyowner benefits expense in the consolidated statements of income and are included in the fair value change as decreased expense of \$44.3 million and additional expense of \$23.7 million in the first quarter of 2005 and 2004, respectively.

The fair value change in options embedded within our indexed products and the fair value changes on our total return strategy fixed annuity contracts are being recorded at fair value. As previously discussed, these fair value changes are offset by similar adjustments to unrealized gains (losses) on investments related to the fair value changes on the options that hedge the indexed products and on the trading securities that back the total return strategy products.

Income Tax Expense. The effective income tax rate for the first quarter of 2005 and 2004 varied from the prevailing corporate rate primarily as a result of tax exempt interest, dividends received deduction and a reduction in the income tax accrual. The accrual reduction amounting to \$19.9 million and \$5.2 million in the first quarter of 2005 and 2004, respectively, was for the release of provisions originally established for potential tax adjustments which have been settled or eliminated.

Discontinued Operations. In November 2003, we entered into an agreement to sell our residential financing operations. The results of the residential financing operations have been classified as discontinued operations. The sale was completed in January 2004, resulting in an after-tax gain of \$3.9 million.

Change in Accounting. Effective January 1, 2004, the Company adopted SOP 03-1 resulting in the establishment of additional policy reserve liabilities for fees charged for insurance benefit features which are assessed in a manner that is expected to result in profits in earlier years and losses in subsequent years. The total effect of adopting SOP 03-1 (including reinsurance recoverables) as of January 1, 2004, amounted to a decrease of \$0.8 million (\$0.5 million after-tax) in net income which has been reflected as a cumulative effect of a change in accounting.

ACCOUNTING DEVELOPMENTS

In December 2004, the FASB issued a revision to SFAS 123, Share-Based Payment, (SFAS 123R) which is a revision of SFAS 123, Accounting for Stock-Based Compensation, (SFAS 123). SFAS 123R requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on fair values. Pro forma disclosure of fair value information is no longer an alternative. The implementation date of the statement has been delayed to be effective for the fiscal year beginning after June 15, 2005. Adoption is to be made using either the modified prospective method or the modified retrospective method. The modified prospective method recognizes cost based on the requirements for all share-based payments granted after the effective date and for awards granted prior to the effective date that remain unvested prior to the effective date. The modified retrospective method includes the requirements of the modified prospective method but also permits restatement of financial statements based on pro forma amounts previously recognized under SFAS 123. Restatement can either be for all prior periods presented or prior interim periods of the year of adoption. Early adoption is permitted. We continue to evaluate the impacts of SFAS 123R which we will adopt January 1, 2006. We currently disclose the pro forma impacts of recognizing fair value as permitted by SFAS 123 in note 1 to the consolidated financial statements.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

AmerUs Group Co.

As a holding company, AmerUs Group Co.'s cash flows from operations consist of dividends from subsidiaries, if declared and paid, interest from income on loans and advances to subsidiaries (including a surplus note issued to us by ALIC), investment income on our assets and fees which we charge our subsidiaries, offset by the expenses incurred for debt service, salaries and other expenses.

The payment of dividends by our insurance subsidiaries is regulated under various state laws. Generally, under the various state statutes, our insurance subsidiaries' dividends may be paid only from the earned surplus arising from their respective businesses and must receive the prior approval of the respective state regulator to pay any dividend that would exceed certain statutory limitations. The current statutes generally limit any dividend, together with dividends paid out within the preceding 12 months, to the greater of (i) 10% of the respective company's policyowners' statutory surplus as of the preceding year end or (ii) the statutory net gain from operations for the previous calendar year. Generally, the various state laws give the state regulators discretion to approve or disapprove requests for dividends in excess of these limits. We also consider risk-based capital levels, capital and liquidity operating needs, and other factors prior to paying dividends from the insurance subsidiaries. Based on the state law limitations and 2004 results, our life insurance subsidiaries could pay us an estimated \$186 million in dividends in 2005 without obtaining regulatory approval. Our subsidiaries paid no dividends in the first three months of 2005.

We have a \$200 million revolving credit facility, which we refer to as the Revolving Credit Agreement, with a syndicate of lenders. As of March 31, 2005, there was no outstanding loan balance under the facility. The Revolving Credit Agreement provides for typical events of default and covenants with respect to the conduct of business and requires the maintenance of various financial levels and ratios. Among other covenants, we (a) cannot have a leverage ratio greater than 0.35:1.0, (b) cannot have an interest coverage ratio less than 2.50:1.0, (c) are prohibited from paying cash dividends on common stock in excess of an amount equal to 3% of consolidated net worth as of the last day of the preceding fiscal year, (d) must cause our insurance subsidiaries to maintain certain levels of risk-based capital, and (e) are prohibited from incurring additional indebtedness for borrowed money in excess of certain limits typical for such lines of credit. We closely monitor all of these covenants to ensure continued compliance. We also have \$125 million senior notes payable which will mature and become payable in June 2005. We may utilize our Revolving Credit Agreement to retire these senior notes.

The Company has several options for deploying excess capital, including supporting higher sales growth, reducing debt levels, pursuing acquisitions and buying back common stock. Our Board of Directors approved a stock purchase program effective August 9, 2002, under which we may purchase up to three million shares of our common stock at such times and under such conditions, as we deem advisable. The purchases may be made in the open market or by such other means as we determine to be appropriate, including privately negotiated purchases. The purchase program supercedes all prior purchase programs. We plan to fund the purchase program from a combination of our internal sources and dividends from insurance subsidiaries. On March 31, 2005, we purchased 414,000 shares of our common stock pursuant to an accelerated share repurchase program. The program allowed the Company to purchase the shares immediately, with a third party purchasing the shares in the open market over the next few months. The initial purchase price was \$47.25 per share, plus commission, subject to a market price adjustment feature based on the actual cost of the shares purchased. Approximately 1.6 million shares remain available for repurchase under the purchase program.

We manage liquidity on a continuing basis. One way is to minimize our need for capital. We accomplish this by attempting to use our capital as efficiently as possible and by developing capital-efficient products in our insurance subsidiaries. We also manage our mix of sales by focusing on the more capital-efficient products. In addition, we use

reinsurance agreements, where cost-effective, to reduce capital strain in the insurance subsidiaries. We also focus on optimizing the consolidated capital structure to properly balance the levels and sources of borrowing and the issuance of equity securities.

Table of Contents

Insurance Subsidiaries

The sources of cash of our insurance subsidiaries consist primarily of premium receipts; deposits to policyowner account balances; and income from investments, sales, maturities and calls of investments and repayments of investment principal. The uses of cash are primarily related to withdrawals of policyowner account balances, investment purchases, payment of policy acquisition costs, payment of policyowner benefits, repayment of debt, income taxes and current operating expenses. Insurance companies generally produce a positive cash flow from operations, as measured by the amount by which cash flows are adequate to meet benefit obligations to policyowners and normal operating expenses as they are incurred. The remaining cash flow is generally used to increase the asset base to provide funds to meet the need for future policy benefit payments and for writing new business.

Management believes that the current level of cash and available -for-sale, held-for-trading and short-term securities, combined with expected net cash inflows from operations, maturities of fixed maturity investments, principal payments on mortgage-backed securities and sales of its insurance products, will be adequate to meet the anticipated short-term cash obligations of the life insurance subsidiaries.

Matching the investment portfolio maturities to the cash flow demands of the type of insurance being provided is an important consideration for each type of protection product and accumulation product. We continuously monitor benefits and surrenders to provide projections of future cash requirements. As part of this monitoring process, we perform cash flow testing of assets and liabilities under various scenarios to evaluate the adequacy of reserves. In developing our investment strategy, we establish a level of cash and securities which, combined with expected net cash inflows from operations and maturities and principal payments on fixed maturity investment securities, are believed adequate to meet anticipated short-term and long-term benefit and expense payment obligations. There can be no assurance that future experience regarding benefits and surrenders will be similar to historic experience since withdrawal and surrender levels are influenced by such factors as the interest rate environment and general economic conditions and the claims-paying and financial strength ratings of the insurance subsidiaries.

We take into account asset/liability management considerations in the product development and design process. Contract terms for the interest-sensitive products include surrender and withdrawal provisions which mitigate the risk of losses due to early withdrawals. These provisions generally do one or more of the following: limit the amount of penalty-free withdrawals, limit the circumstances under which withdrawals are permitted, or assess a surrender charge or market value adjustment relating to the underlying assets.

In addition to the interest-sensitive products, our insurance subsidiaries have issued funding agreements totaling \$960 million outstanding as of March 31, 2005, consisting primarily of six to ten year fixed rate insurance contracts. The assets backing the funding agreements are legally segregated and are not subject to claims that arise out of any other business of the insurance subsidiaries. The funding agreements are further backed by the general account assets of the insurance subsidiaries. The segregated assets and liabilities are included with general account assets in the financial statements. The funding agreements may not be cancelled by the holders unless there is a default under the agreements, but the insurance subsidiaries may terminate the agreements at any time.

We also have variable separate account assets and liabilities representing funds that are separately administered, principally for variable annuity contracts, and for which the contract holder bears the investment risk. Separate account assets and liabilities are reported at fair value and amounted to \$233.5 million as of March 31, 2005. Separate account contractholders generally have no claim against the assets of the general account, except with respect to certain insurance benefits. The operations of the separate accounts are not included in the accompanying consolidated financial statements.

Through their respective memberships in the Federal Home Loan Banks (FHLB) of Des Moines, Topeka and Indianapolis; ALIC, American and ILIC are eligible to borrow under variable -rate short term federal funds

Table of Contents

arrangements to provide additional liquidity. These borrowings are secured and interest is payable at the current rate at the time of each advance. There were no borrowings outstanding under these arrangements at March 31, 2005. In addition, ALIC has long-term fixed rate advances from the FHLB outstanding of \$12.4 million at March 31, 2005.

The insurance subsidiaries may also obtain liquidity through sales of investments. The investment portfolio as of March 31, 2005 had a carrying value of \$19.2 billion, including closed block investments.

The level of capital in the insurance companies is regulated by risk-based capital formulas and is monitored by rating agencies. On February 15, 2005, Moody's Investor Services changed the rating outlook for the Company and its insurance and other subsidiaries to negative from stable as a result of uncertainties in connection with a lawsuit filed by the California Attorney General. On February 17, 2005, Standard & Poor's announced that our current A+ rating and our stable outlook would be unaffected by this lawsuit. In order to maintain appropriate capital levels, it may be necessary from time to time for AmerUs Group Co. to provide additional capital to the insurance companies.

We participate in a securities lending program whereby certain fixed maturity securities from the investment portfolio are loaned to other institutions for a short period of time. We receive a fee in exchange for the loan of securities and require initial collateral equal to 102 percent, with an on-going level of 100 percent, of the market value of the loaned securities to be separately maintained. Securities with a market value of approximately \$436.0 million and \$342.6 million were on loan under the program and we were liable for cash collateral under our control of approximately \$446.3 million and \$351.7 million at March 31, 2005 and December 31, 2004, respectively. The collateral held under the securities lending program has been included in cash and cash equivalents in the consolidated balance sheet and the obligation to return the collateral upon the return of the loaned securities has been included in accrued expenses and other liabilities.

We may also enter into securities borrowing arrangements from time to time whereby we borrow securities from other institutions and pay a fee. Securities borrowed amounted to \$135.1 million and \$138.2 million at March 31, 2005, and December 31, 2004, respectively, and are also included in accrued expenses and other liabilities in the consolidated balance sheet.

At March 31, 2005, the statutory surplus of the insurance subsidiaries was approximately \$1.1 billion. Management believes that each life insurance company has statutory capital which provides adequate risk based capital that exceeds required levels.

In the future, in addition to cash flows from operations and borrowing capacity, the insurance subsidiaries may obtain their required capital from AmerUs Group Co.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The main objectives in managing our investment portfolios and our insurance subsidiaries are to maximize investment income and total investment returns while minimizing credit risks in order to provide maximum support to the insurance underwriting operations. Investment strategies are developed based on many factors including asset liability management, regulatory requirements, fluctuations in interest rates and consideration of other market risks. Investment decisions are centrally managed by investment professionals based on guidelines established by management and approved by the board of directors.

Market risk represents the potential for loss due to adverse changes in the fair value of financial instruments. The market risks related to our financial instruments primarily relate to the investment portfolio, which exposes us to risks related to interest rates, credit quality and prepayment variation. Analytical tools and monitoring systems are in place

to assess each of these elements of market risk.

Table of Contents

Interest rate risk is the price sensitivity of a fixed income security to changes in interest rates. Management views these potential changes in price within the overall context of asset and liability management. Actuarial professionals estimate the cash flow pattern of our liabilities to determine their duration. This is then compared to the characteristics of the assets that are currently backing the liabilities to arrive at an asset allocation strategy for future investments that management believes mitigates the overall effect of interest rates.

For variable and indexed products, profitability on the portion of the policyowner's account balance invested in the fixed general account option, if any, is also affected by the spreads between interest yields on investments and rates credited to the policies. For the variable products, the policyowner assumes essentially all the investment earnings risk for the portion of the account balance invested in the separate accounts. For the indexed products, we primarily purchase call options that are designed to match the return owed to contract holders who elect to participate in one or more market indices. Profitability on the portion of the indexed products tied to market indices is significantly impacted by the spread on interest earned on investments and the sum of (1) the cost of underlying call options purchased to match the returns owed to contract holders and (2) the minimum interest guarantees owed to the contract holder, if any. Profitability on the indexed products is also impacted by changes in the fair value of the embedded option which provides the contract holder the right to participate in market index returns after the next anniversary date of the contract. This impacts profitability as we primarily purchase one-year call options to fund the returns owed to the contract holders at the inception of each contract year. This practice matches with the contract holders' rights to switch to different indices on each anniversary date. The value of the forward starting options embedded in the indexed products can fluctuate with changes in assumptions as to future volatility of the market indices, risk free interest rates, market returns and the lives of the contracts.

The following table provides information about our fixed maturity investments and mortgage loans for both our trading and other than trading portfolios at March 31, 2005. The table presents amortized cost and related weighted average interest rates by expected maturity dates. The amortized cost approximates the cash flows of principal amounts in each of the periods. The cash flows are based on the earlier of the call date or the maturity date or, for mortgage-backed securities, expected payment patterns. Actual cash flows could differ from the expected amounts.

	9 months							Expected Cash Flows	Fair Value
	2005	2006	2007	2008	2009	2010	Thereafter		
	(\$ in thousands)								
Fixed maturity securities									
available-for-sale	\$ 819	\$ 899	\$ 1,072	\$ 1,138	\$ 926	\$ 622	\$ 10,021	\$ 15,497	\$ 15,741
Average interest rate	6.4%	6.5%	6.2%	5.9%	6.0%	5.6%	5.8%		
Fixed maturity securities held for trading purposes	\$ 68	\$ 163	\$ 198	\$ 274	\$ 232	\$ 131	\$ 536	\$ 1,602	\$ 1,602
Average interest rate	3.8%	2.8%	3.4%	2.8%	2.5%	3.2%	4.1%		
Mortgage loans	\$ 41	\$ 59	\$ 56	\$ 69	\$ 65	\$ 70	\$ 515	\$ 875	\$ 897
Average interest rate	7.2%	7.3%	7.3%	7.2%	7.2%	7.2%	6.9%		
Total	\$ 928	\$ 1,121	\$ 1,326	\$ 1,481	\$ 1,223	\$ 823	\$ 11,072	\$ 17,974	\$ 18,240

In accordance with our strategy of minimizing credit quality risk, we consistently invest in high quality marketable securities. Fixed maturity securities are comprised of U.S. Treasury, government agency, mortgage-backed and corporate securities. Approximately 63% of our fixed maturity securities are issued by the U.S. Treasury or U.S. government agencies or are rated A or better by Moody's, Standard and Poor's, or the NAIC. Less than 7.7% of the bond portfolio is below investment grade. Fixed maturity securities have an average life of approximately 9.13 years.

Prepayment risk refers to the changes in prepayment patterns that can either shorten or lengthen the expected timing of the principal repayments and thus the average life and the effective yield of a security. Such risk exists

Table of Contents

primarily within the portfolio of mortgage-backed securities. Management monitors such risk regularly. We invest primarily in those classes of mortgage-backed securities that have average or lower prepayment risk.

Our use of derivatives is generally limited to hedging purposes and has principally consisted of using interest rate swaps, options and futures. These instruments, viewed separately, subject us to varying degrees of market and credit risk. However when used for hedging, the expectation is that these instruments would reduce overall market risk. Credit risk arises from the possibility that counterparties may fail to perform under the terms of the contracts.

Equity price risk is the potential loss arising from changes in the value of equity securities. In general, equities have more year-to-year price variability than intermediate term bonds. However, returns over longer time frames have been consistently higher.

All of the above risks are monitored on an ongoing basis. A combination of in-house systems and proprietary models and externally licensed software are used to analyze individual securities as well as each portfolio. These tools provide the portfolio managers with information to assist them in the evaluation of the market risks of the portfolio.

Item 4. Controls and Procedures

(a) Based upon their evaluation as of the end of the period covered by this Quarterly Report on Form 10-Q, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended, are effective for recording, processing, summarizing and reporting the information we are required to disclose in our reports filed under such act.

(b) There was no change in our internal control over financial reporting during our last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

In recent years, the life insurance industry, including the Company and its subsidiaries, has been subject to an increase in litigation pursued on behalf of purported classes of insurance purchasers, questioning the conduct of insurers in the marketing of their products. The Company is routinely involved in litigation and other proceedings, including class actions, reinsurance claims and regulatory proceedings arising in the ordinary course of its business. Some of these claims and legal actions are in jurisdictions where juries are given substantial latitude in assessing damages, including punitive and exemplary damages. In addition, regulatory bodies, such as state insurance departments and attorneys general, periodically make inquiries and conduct examinations concerning the Company's compliance with insurance and other laws. The Company responds to such inquiries and cooperates with regulatory examinations in the ordinary course of business.

On April 7, 2005, a national class action complaint was filed in the U.S. District Court for the Central District of California against the Company and certain of its subsidiaries alleging conduct and causes of action, and seeking relief, similar to that alleged in class action lawsuits in California state courts described in the Company's 2004 Annual Report on Form 10-K. On April 25, 2005 a similar national class action complaint was filed in the U.S. District Court for the District of Kansas against a subsidiary of the Company. These class actions were brought on behalf of purchasers of annuity products claiming that the products and manner in which they were sold were inappropriate for

the senior citizen market. The Company continues to believe it has appropriate defenses against these lawsuits and intends to vigorously defend its position.

Table of Contents

The Company's pending litigation (including without limitation the proceedings described in the immediately preceding paragraph) is subject to many uncertainties, and given its complexity and scope, the outcomes cannot be predicted. Given these uncertainties, the Company is unable to estimate the possible loss or range of loss that may result from the Company's pending litigation. It is possible that the Company's results of operations or cash flow in a particular quarterly or annual period could be materially affected by an ultimate unfavorable resolution of pending litigation and regulatory matters depending, in part, upon the results of operations or cash flow for such period. Although no assurances can be given and no determinations can be made at this time, the Company believes that the ultimate liability, if any, with respect to the Company's pending claims and legal actions, would have no material effect on its operations and financial position.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table sets forth information regarding purchases of equity securities for the three months ended March 31, 2005:

Period	(a) Total number of shares (or units) purchased (1)	(b) Average price paid per share (or units) \$	(c) Total number of shares (or units) purchased as part of publicly announced plans or programs	(d) Maximum number (or approximate dollar value) of shares (or units) that may yet be purchased under the plans or programs (3)
01/01/2005-01/31/2005				2,027,500
02/01/2005-02/28/2005				2,027,500
03/01/2005-03/31/2005	441,236(2)	47.36	441,236	1,613,500
Total	441,236	\$ 47.36	441,236	

-
- (1) Does not include shares withheld from employee stock awards to satisfy applicable tax withholding obligations.
- (2) The March 2005 shares purchased included 414,000 shares which were part of the repurchase program described in note 3 and 27,236 shares purchased by the Company's Employee Stock Ownership Plan.
- (3) In August 2002, our board of directors authorized a repurchase program of up to 3 million shares of our outstanding common stock. There is no expiration date for this program.

Item 6. Exhibits

A list of exhibits included as part of this report is set forth in the Exhibit Index which immediately precedes such exhibits and is hereby incorporated by reference herein.
