FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2018

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from to

Commission File No. 1-2189

ABBOTT LABORATORIES

An Illinois Corporation

I.R.S. Employer Identification No.
36-0698440

100 Abbott Park Road

Abbott Park, Illinois 60064-6400

Telephone: (224) 667-6100

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 229.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of large accelerated filer, accelerated filer, smaller reporting company, and emerging growth company in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer

Accelerated Filer

Non-Accelerated Filer

Smaller reporting company

(Do not check if a smaller reporting company)

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of June 30, 2018, Abbott Laboratories had 1,754,319,284 common shares without par value outstanding.

Abbott Laboratories and Subsidiaries

Notes to the Condensed Consolidated Financial Statements

June 30, 2018

(Unaudited)

Note 1 Basis of Presentation

The accompanying unaudited, condensed consolidated financial statements have been prepared pursuant to rules and regulations of the Securities and Exchange Commission and, therefore, do not include all information and footnote disclosures normally included in audited financial statements. However, in the opinion of management, all adjustments (which include only normal adjustments) necessary to present fairly the results of operations, financial position and cash flows have been made. It is suggested that these statements be read in conjunction with the financial statements included in Abbott's Annual Report on Form 10-K for the year ended December 31, 2017. The condensed consolidated financial statements include the accounts of the parent company and subsidiaries, after elimination of intercompany transactions.

Note 2 New Accounting Standards

Recently Adopted Accounting Standards

In March 2017, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2017-07, *Compensation Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost* which changes the financial statement presentation requirements for pension and other postretirement benefit expense. While service cost continues to be reported in the same financial statement line items as other current employee compensation costs, the ASU requires all other components of pension and other postretirement benefit expense to be presented separately from service cost, and outside any subtotal of income from operations. Abbott adopted the standard in the first quarter of 2018 and the Condensed Consolidated Statement of Earnings was retrospectively adjusted, resulting in the reclassification of approximately \$80 million of income from Operating earnings to Other (income) expense, net in the first six months of 2017.

In November 2016, the FASB issued ASU 2016-18, *Statement of Cash Flows: Restricted Cash*, which requires that restricted cash be included with cash and cash equivalents when reconciling the beginning and end-of-period total amounts shown on the statement of cash flows. Abbott adopted this standard beginning in the first quarter of 2018, and applied the guidance retrospectively to all periods presented. Abbott did not have any restricted cash balances in the periods presented except for \$75 million of restricted cash acquired as part of the Alere Inc. acquisition in October 2017. The restrictions on this cash were eliminated prior to the end of 2017.

In October 2016, the FASB issued ASU 2016-16, *Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory*, which requires the recognition of the income tax effects of intercompany sales and transfers of assets, other than inventory, in the period in which the transfer occurs. Abbott adopted the standard on January 1, 2018, using a modified retrospective approach and recorded a cumulative catch-up

Edgar Filing: ABBOTT LABORATORIES - Form 10-Q

adjustment to Earnings employed in the business in the Condensed Consolidated Balance Sheet that was not significant.

In August 2016, the FASB issued ASU 2016-15, *Statement of Cash Flows: Classification of Certain Cash Receipts and Cash Payments*, which clarifies how companies should present and classify certain cash receipts and cash payments in the statement of cash flows. The ASU became effective for Abbott in the first quarter of 2018 and did not have a material impact to the Company's Condensed Consolidated Statement of Cash Flows.

In January 2016, the FASB issued ASU 2016-01, *Financial Instruments - Recognition and Measurement of Financial Assets and Financial Liabilities*, which provides new guidance for the recognition, measurement, presentation, and disclosure of financial assets and liabilities. Abbott adopted the standard on January 1, 2018. Under the new standard, changes in the fair value of equity investments with readily determinable fair values are recorded in Other (income) expense, net within the Consolidated Statement of Earnings. Previously, such fair value changes were recorded in other comprehensive income. Abbott has elected the measurement alternative allowed by ASU 2016-01 for its equity investments without readily determinable fair values. These investments are measured at cost, less any impairment, plus or minus any changes resulting from observable price changes in orderly transactions for an identical or similar investment of the same issuer. Changes in the measurement of these investments are being recorded in Other (income) expense, net within the Statement of Earnings. As part of the adoption, the cumulative-effect adjustment to Earnings employed in the business in the Condensed Consolidated Balance Sheet for net unrealized losses on equity investments that were recorded in Accumulated other comprehensive income (loss) as of December 31, 2017 was not significant.

Table of Contents

Abbott Laboratories and Subsidiaries

Notes to the Condensed Consolidated Financial Statements

June 30, 2018

(Unaudited)

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers*, which provides a single comprehensive model for accounting for revenue from contracts with customers and supersedes nearly all previously existing revenue recognition guidance. The core principle of the ASU is that an entity should recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Abbott adopted the new standard as of January 1, 2018, using the modified retrospective approach method. Under this method, entities recognize the cumulative effect of applying the new standard at the date of initial application with no restatement of comparative periods presented. The cumulative effect of applying the new standard resulted in an increase to Earnings employed in the business in the Condensed Consolidated Balance Sheet of \$23 million which was recorded on January 1, 2018. The new standard has been applied only to those contracts that were not completed as of January 1, 2018. The impact of adopting ASU 2014-09 was not significant to individual financial statement line items in the Condensed Consolidated Balance Sheet and Condensed Consolidated Statement of Earnings.

Recent Accounting Standards Not Yet Adopted

In February 2018, the FASB issued ASU 2018-02, *Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income*, which allows companies to reclassify stranded tax effects resulting from the 2017 Tax Cuts and Jobs Act, from accumulated other comprehensive income to retained earnings. The standard becomes effective for Abbott beginning in the first quarter of 2019 and early adoption is permitted. Abbott is currently evaluating the impact the new guidance will have on its consolidated financial statements.

In August 2017, the FASB issued ASU 2017-12, *Targeted Improvements to Accounting for Hedging Activities*, which makes changes to the designation and measurement guidance for qualifying hedging relationships and the presentation of hedge results. The standard becomes effective for Abbott beginning in the first quarter of 2019 and early adoption is permitted. Abbott is currently evaluating the effect that the new guidance will have on its consolidated financial statements.

In February 2016, the FASB issued ASU 2016-02, *Leases*, which requires lessees to recognize assets and liabilities for most leases on the balance sheet. The standard becomes effective for Abbott beginning in the first quarter of 2019 and early adoption is permitted. Adoption requires application of the new guidance for all periods presented. Abbott is currently evaluating the impact the new guidance will have on its consolidated financial statements.

Note 3 Revenue

Edgar Filing: ABBOTT LABORATORIES - Form 10-Q

Abbott's revenues are derived primarily from the sale of a broad line of health care products under short-term receivable arrangements. Patent protection and licenses, technological and performance features, and inclusion of Abbott's products under a contract most impact which products are sold; price controls, competition and rebates most impact the net selling prices of products; and foreign currency translation impacts the measurement of net sales and costs. Abbott's products are generally sold directly to retailers, wholesalers, distributors, hospitals, health care facilities, laboratories, physicians' offices and government agencies throughout the world. Abbott has four reportable segments: Established Pharmaceutical Products, Diagnostic Products, Nutritional Products, and Cardiovascular and Neuromodulation Products. Diabetes Care is a non-reportable segment and is included in Other in the following table.

Table of Contents

Abbott Laboratories and Subsidiaries

Notes to the Condensed Consolidated Financial Statements

June 30, 2018

(Unaudited)

Abbott recognizes revenue from product sales upon the transfer of control, which is generally upon shipment or delivery, depending on the delivery terms set forth in the customer contract. For maintenance agreements that provide service beyond Abbott's standard warranty and other service agreements, revenue is recognized ratably over the contract term. A time-based measure of progress appropriately reflects the transfer of services to the customer. Payment terms between Abbott and its customers vary by the type of customer, country of sale, and the products or services offered. The term between invoicing and the payment due date is not significant.

Management exercises judgment in estimating variable consideration. Provisions for discounts, rebates and sales incentives to customers, and returns and other adjustments are provided for in the period the related sales are recorded. Sales incentives to customers are not material. Historical data is readily available and reliable, and is used for estimating the amount of the reduction in gross sales. Abbott provides rebates to government agencies, wholesalers, group purchasing organizations and other private entities.

Rebate amounts are usually based upon the volume of purchases using contractual or statutory prices for a product. Factors used in the rebate calculations include the identification of which products have been sold subject to a rebate, which customer or government agency price terms apply, and the estimated lag time between sale and payment of a rebate. Using historical trends, adjusted for current changes, Abbott estimates the amount of the rebate that will be paid, and records the liability as a reduction of gross sales when Abbott records its sale of the product. Settlement of the rebate generally occurs from one to six months after sale. Abbott regularly analyzes the historical rebate trends and makes adjustments to reserves for changes in trends and terms of rebate programs. Historically, adjustments to prior years' rebate accruals have not been material to net income.

Other allowances charged against gross sales include cash discounts and returns, which are not significant. Cash discounts are known within 15 to 30 days of sale, and therefore can be reliably estimated. Returns can be reliably estimated because Abbott's historical returns are low, and because sales return terms and other sales terms have remained relatively unchanged for several periods. Product warranties are also not significant.

Abbott also applies judgment in determining the timing of revenue recognition related to contracts that include multiple performance obligations. The total transaction price of the contract is allocated to each performance obligation in an amount based on the estimated relative standalone selling prices of the promised goods or services underlying each performance obligation. For goods or services for which observable standalone selling prices are not available, Abbott uses an expected cost plus a margin approach to estimate the standalone selling price of each performance obligation.

Remaining Performance Obligations

As of June 30, 2018, the estimated revenue expected to be recognized in the future related to performance obligations that are unsatisfied (or partially unsatisfied) was approximately \$2.8 billion in the Diagnostics segment and approximately \$340 million in the Cardiovascular and Neuromodulation segment. Abbott expects to recognize revenue on approximately 60% of these remaining performance obligations over the next 24 months, approximately 15% over the subsequent 12 months and the remainder thereafter.

These performance obligations primarily reflect the future sale of reagents/consumables in contracts with minimum purchase obligations, extended warranty or service obligations related to previously sold equipment, and remote monitoring services related to previously implanted devices. Abbott has applied the practical expedient described in Accounting Standards Codification (ASC) 606-10-50-14 and has not included remaining performance obligations related to contracts with original expected durations of one year or less in the amounts above.

Assets Recognized for Costs to Obtain a Contract with a Customer

Abbott has applied the practical expedient in ASC 340-40-25-4 and records as an expense the incremental costs of obtaining contracts with customers in the period of occurrence when the amortization period of the asset that Abbott otherwise would have recognized is one year or less. Upfront commission fees paid to sales personnel as a result of obtaining or renewing contracts with customers are incremental to obtaining the contract. Abbott capitalizes these amounts as contract costs. Capitalized commission fees are amortized based on the contract duration to which the assets relate which ranges from two to ten years. The amounts as of June 30, 2018, were not significant.

Additionally, the cost of transmitters provided to customers that use Abbott's remote monitoring service with respect to certain medical devices are capitalized as contract costs. Capitalized transmitter costs are amortized based on the timing of the transfer of services to which the assets relate, which typically ranges from eight to ten years. The amounts as of June 30, 2018, were not significant.

(Unaudited)

Other Contract Assets and Liabilities

Abbott discloses Trade receivables separately in the Condensed Consolidated Balance Sheet at their net realizable value. Contract assets primarily relate to Abbott's conditional right to consideration for work completed but not billed at the reporting date. Contract assets at the beginning and end of the period, as well as the changes in the balance, were not significant.

Contract liabilities primarily relate to payments received from customers in advance of performance under the contract. Abbott's contract liabilities arise primarily in the cardiovascular and neuromodulation reportable segment when payment is received upfront for various multi-period extended service arrangements. Changes in the contract liabilities during the period are as follows:

(in millions)

Contract Liabilities		
Balance at January 1, 2018	\$	198
Unearned revenue from cash received during the period		162
Revenue recognized that was included in contract liability balance at beginning of period		(103)
Balance at June 30, 2018	\$	257

Note 4 Discontinued Operations

On January 1, 2013, Abbott completed the separation of AbbVie Inc. (AbbVie), which was formed to hold Abbott's research-based proprietary pharmaceuticals business. Abbott has retained all liabilities for all U.S. federal and foreign income taxes on income prior to the separation, as well as certain non-income related taxes attributable to AbbVie's business prior to the separation. AbbVie generally will be liable for all other taxes attributable to its business. Earnings from discontinued operations, net of tax of \$24 million and \$46 million in the first six months of 2018 and 2017, respectively, were driven primarily by the recognition of net tax benefits as a result of the resolution of various tax positions related to AbbVie's operations for years prior to the separation.

Note 5 Assets Held for Disposition

Edgar Filing: ABBOTT LABORATORIES - Form 10-Q

As discussed in Note 8 - Business Acquisitions, in conjunction with the acquisition of Alere Inc. (Alere), Abbott sold the Triage® MeterPro cardiovascular and toxicology business and the assets and liabilities related to its B-type Natriuretic Peptide assay business run on Beckman Coulter analyzers to Quidel Corporation (Quidel). The legal transfer of certain assets and liabilities related to these businesses did not occur at the close of the sale to Quidel due to, among other factors, the time required to transfer marketing authorizations and other regulatory requirements in various countries. Under the terms of the sale agreement with Abbott, Quidel is subject to the risks and entitled to the benefits generated by these operations and assets. The assets presented as held for disposition in the Condensed Consolidated Balance Sheet as of June 30, 2018 and December 31, 2017, primarily relate to the businesses sold to Quidel.

(in millions)	June 30, 2018	December 31, 2017

Note 6 Supplemental Financial Information

Shares of unvested restricted stock that contain non-forfeitable rights to dividends are treated as participating securities and are included in the computation of earnings per share under the two-class method. Under the two-class method, net earnings are allocated between common shares and participating securities. Earnings from Continuing Operations allocated to common shares for the three months ended June 30, 2018 and 2017 were \$714 million and \$269 million, respectively and for the six months ended June 30, 2018 and 2017 were \$1.121 billion and \$653 million, respectively. Net earnings allocated to common shares for the three months ended June 30, 2018 and 2017 were \$730 million and \$281 million, respectively, and for the six months ended June 30, 2018 and 2017 were \$1.144 billion and \$698 million, respectively.

Other, net in Net cash from operating activities in the Condensed Consolidated Statement of Cash Flows for the first six months of 2018 includes the payment of cash taxes of approximately \$425 million. The first six months of 2017 includes the effects of contributions to defined benefit plans of \$321 million. The first six months of 2017 also includes the impact of approximately \$430 million of tax expense related to business dispositions.

In February 2017, Abbott completed the sale of Abbott Medical Optics (AMO) to Johnson & Johnson and recognized a pre-tax gain of \$1.151 billion, which is reported in Other (income) expense, net within the Condensed Consolidated Statement of Earnings in the first six months of 2017. Abbott recorded an after-tax gain of \$721 million in the first six months of 2017 related to the sale of AMO. The operating results of AMO up through the date of sale continued to be included in Earnings from Continuing Operations as they did not qualify for reporting as discontinued operations. For the three months ended June 30, 2017, the AMO earnings before taxes included in Abbott's consolidated earnings were nil. For the first six months ended June 30, 2017, the AMO losses before taxes included in Abbott's consolidated earnings were \$18 million.

In March 2017, Abbott sold 44 million ordinary shares of Mylan N.V. received upon the sale of its developed markets branded generics pharmaceuticals business to Mylan Inc. Abbott received \$1.685 billion in proceeds from the sale of these shares. In June 2017, Abbott sold an additional 6 million ordinary shares of Mylan N.V. and received \$239 million in proceeds. Abbott recorded an immaterial pre-tax gain in the first six months of 2017, which was recognized in the Other (income) expense, net line of the Condensed Consolidated Statement of Earnings.

The components of long-term investments as of June 30, 2018 and December 31, 2017 are as follows:

Long-term Investments (in millions)	June 30, 2018	December 31, 2017
Equity securities	\$ 856	\$ 797

Edgar Filing: ABBOTT LABORATORIES - Form 10-Q

Other		84		86
Total	\$	940	\$	883

Abbott's equity securities as of June 30, 2018, include approximately \$340 million of investments in mutual funds that are held in a rabbi trust and were acquired as part of the St. Jude Medical, Inc. (St. Jude Medical) business acquisition. These investments, which are specifically designated as available for the purpose of paying benefits under a deferred compensation plan, are not available for general corporate purposes and are subject to creditor claims in the event of insolvency.

Abbott also holds certain investments as of June 30, 2018 with a carrying value of approximately \$260 million that are accounted for under the equity method of accounting and other equity investments with a carrying value of approximately \$245 million that do not have a readily determinable fair value. The \$245 million carrying value includes an unrealized gain of approximately \$50 million on an investment. The gain was recorded in the second quarter of 2018 and relates to an observable price change for a similar investment of the same issuer.

Note 8 Business Acquisitions

On January 4, 2017, Abbott completed the acquisition of St. Jude Medical, a global medical device manufacturer, for approximately \$23.6 billion, including approximately \$13.6 billion in cash and approximately \$10 billion in Abbott common shares, which represented approximately 254 million shares of Abbott common stock, based on Abbott's closing stock price on the acquisition date. As part of the acquisition, approximately \$5.9 billion of St. Jude Medical's debt was assumed, repaid or refinanced by Abbott. The acquisition provides expanded opportunities for future growth and is an important part of the company's ongoing effort to develop a strong, diverse portfolio of devices, diagnostics, nutritionals and branded generic pharmaceuticals. The combined business competes in nearly every area of the cardiovascular device market, as well as in the neuromodulation market.

Under the terms of the agreement, for each St. Jude Medical common share, St. Jude Medical shareholders received \$46.75 in cash and 0.8708 of an Abbott common share. At an Abbott stock price of \$39.36, which reflects the closing price on January 4, 2017, this represented a value of approximately \$81 per St. Jude Medical common share and total purchase consideration of \$23.6 billion. The cash portion of the acquisition was funded through a combination of medium and long-term debt issued in November 2016 and a \$2.0 billion 120-day senior unsecured bridge term loan facility which was subsequently repaid.

In 2016, Abbott and St. Jude Medical agreed to sell certain businesses to Terumo Corporation (Terumo) for approximately \$1.12 billion. The sale included the St. Jude Medical Angio-Seal and Femoseal vascular closure and Abbott's Vado® Steerable Sheath businesses. The sale closed on January 20, 2017 and no gain or loss was recorded in the Condensed Consolidated Statement of Earnings.

On October 3, 2017, Abbott acquired Alere, a diagnostic device and service provider, for \$51.00 per common share in cash, which equated to a purchase price of approximately \$4.5 billion. As part of the acquisition, Abbott tendered for Alere's preferred shares for a total value of approximately \$0.7 billion. In addition, approximately \$3.0 billion of Alere's debt was assumed and subsequently repaid. The acquisition establishes Abbott as a leader in point of care testing, expands Abbott's global diagnostics presence and provides access to new products, channels and geographies. Abbott utilized a combination of cash on hand and debt to fund the acquisition.

The preliminary allocation of the fair value of the Alere acquisition is shown in the table below. The allocation of the fair value of the acquisition will be finalized when the valuation is completed and differences between the preliminary and final allocation could be material.

(in billions)

Acquired intangible assets, non-deductible	\$	3.4
--	----	-----

Edgar Filing: ABBOTT LABORATORIES - Form 10-Q

Goodwill, non-deductible	4.2
Acquired net tangible assets	0.9
Deferred income taxes recorded at acquisition	(0.7)
Net debt	(2.6)
Preferred stock	(0.7)
Total preliminary allocation of fair value	\$ 4.5

The goodwill is primarily attributable to expected synergies from combining operations, as well as intangible assets that do not qualify for separate recognition. The goodwill is identifiable to the Diagnostic Products reportable segment. The acquired tangible assets consist primarily of trade accounts receivable of approximately \$430 million, inventory of approximately \$425 million, other current assets of \$215 million, property and equipment of approximately \$540 million, and other long-term assets of \$112 million. The acquired tangible liabilities consist of trade accounts payable and other current liabilities of approximately \$625 million and other non-current liabilities of approximately \$160 million.

In the third quarter of 2017, Alere entered into agreements to sell its Triage MeterPro cardiovascular and toxicology business and the assets and liabilities related to its B-type Natriuretic Peptide assay business run on Beckman Coulter analyzers to Quidel. The transactions with Quidel reflect a total purchase price of \$400 million payable at the close of the transaction, \$240 million payable in six annual installments beginning approximately six months after the close of the transaction, and contingent consideration with a maximum value of \$40 million. In the third quarter of 2017, Alere entered into an agreement with Siemens Diagnostics Holding II B.V. (Siemens) to sell its subsidiary, Epocal Inc., for approximately \$200 million payable at the close of the transaction. Alere agreed to divest these businesses in connection with the review by the Federal Trade Commission and the European Commission of Abbott's agreement to acquire Alere. The sale to Quidel closed on October 6, 2017, and the sale to Siemens closed on October 31, 2017. No gain or loss on these sales was recorded in the Consolidated Statement of Earnings.

Abbott Laboratories and Subsidiaries

Notes to the Condensed Consolidated Financial Statements

June 30, 2018

(Unaudited)

On July 17, 2017, Abbott commenced a tender offer to purchase for cash the 1.77 million outstanding shares of Alere's Series B Convertible Perpetual Preferred Stock at a price of \$402 per share, plus accrued but unpaid dividends to, but not including, the settlement date of the tender offer. This tender offer was subject to the satisfaction of certain conditions, including Abbott's acquisition of Alere and upon there being validly tendered (and not properly withdrawn) at the expiration date of the tender offer that number of shares of Preferred Stock that equaled at least a majority of the Preferred Stock issued and outstanding at the expiration of the tender offer. The tender offer expired on October 3, 2017. All conditions to the offer were satisfied and Abbott accepted for payment the 1.748 million shares of Preferred Stock that were validly tendered (and not properly withdrawn). The remaining shares were cashed out for an amount equal to the \$400.00 per share liquidation preference of such shares, plus accrued but unpaid dividends, without interest. Payment for all of the shares of Preferred Stock was made in the fourth quarter of 2017.

Note 9 Goodwill and Intangible Assets

The total amount of goodwill reported was \$23.8 billion at June 30, 2018 and \$24.0 billion at December 31, 2017. The amounts reported at June 30, 2018 and December 31, 2017 exclude goodwill reported in non-current assets held for disposition. Foreign currency translation adjustments decreased goodwill by approximately \$288 million in the first six months of 2018. Purchase price accounting adjustments associated with the Alere acquisition increased goodwill by \$113 million. The amount of goodwill related to reportable segments at June 30, 2018 was \$3.1 billion for the Established Pharmaceutical Products segment, \$286 million for the Nutritional Products segment, \$4.2 billion for the Diagnostic Products segment, and \$15.3 billion for the Cardiovascular and Neuromodulation Products segment. There was no reduction of goodwill relating to impairments in the first six months of 2018.

The gross amount of amortizable intangible assets, primarily product rights and technology was \$25.6 billion as of June 30, 2018 and December 31, 2017, and accumulated amortization was \$9.3 billion as of June 30, 2018 and \$8.1 billion as of December 31, 2017. Purchase price allocation adjustments increased intangible assets by \$120 million and foreign currency translation adjustments decreased intangible assets by \$180 million during the first six months of 2018. The June 30, 2018 and December 31, 2017 amounts exclude net intangible assets reported in non-current assets held for disposition. Abbott's estimated annual amortization expense for intangible assets is approximately \$2.4 billion in 2018, \$2.3 billion in 2019, \$2.1 billion in 2020, \$2.0 billion in 2021 and \$2.0 billion in 2022. Amortizable intangible assets are amortized over 2 to 20 years (weighted average 14 years).

Indefinite-lived intangible assets, which relate to in-process research and development acquired in a business combination, were approximately \$3.6 billion and \$3.9 billion as of June 30, 2018 and December 31, 2017, respectively. The decrease in indefinite-lived intangible assets during the first six months of 2018 relates to purchase price allocation adjustments associated with the Alere acquisition.

Note 10 Restructuring Plans

In 2017 and 2018, Abbott management approved restructuring plans as part of the integration of the acquisition of St. Jude Medical into the cardiovascular and neuromodulation segment and Alere into the diagnostics segment, in order to leverage economies of scale and reduce costs. In the first six months of 2018, charges of approximately \$33 million, including one-time employee termination benefits were recognized, of which approximately \$4 million is recorded in Cost of products sold, approximately \$10 million is recorded in Research and development and approximately \$19 million as Selling, general and administrative expense. The following summarizes the activity for the first six months of 2018 related to these actions and the status of the related accrual as of June 30, 2018:

(in millions)

Accrued balance at December 31, 2017	\$	68
Restructuring charges recorded in 2018		33
Payments and other adjustments		(43)
Accrued balance at June 30, 2018	\$	58

From 2014 to 2018, Abbott management approved plans to streamline operations in order to reduce costs and improve efficiencies in various Abbott businesses including the nutritional, established pharmaceuticals and vascular businesses. In the first six months of 2018, charges of approximately \$12 million were recognized, of which approximately \$7 million is recorded in Cost of products sold and approximately \$5 million as Selling, general and administrative expense. The following summarizes the activity for the first six months of 2018 related to these restructuring actions and the status of the related accrual as of June 30, 2018:

(in millions)

Accrued balance at December 31, 2017	\$	141
Restructuring charges recorded in 2018		12
Payments and other adjustments		(49)
Accrued balance at June 30, 2018	\$	104

Note 11 Incentive Stock Programs

In the first six months of 2018, Abbott granted 5,715,959 stock options, 864,846 restricted stock awards and 7,845,773 restricted stock units under its incentive stock programs. At June 30, 2018, approximately 143 million shares were reserved for future grants. Information regarding the number of options outstanding and exercisable at June 30, 2018 is as follows:

Edgar Filing: ABBOTT LABORATORIES - Form 10-Q

	Outstanding	Exercisable
Number of shares	35,715,493	22,611,954
Weighted average remaining life (<i>years</i>)	6.6	5.6
Weighted average exercise price	\$ 41.53	\$ 37.59
Aggregate intrinsic value (<i>in millions</i>)	\$ 695	\$ 529

The total unrecognized share-based compensation cost at June 30, 2018 amounted to approximately \$512 million which is expected to be recognized over the next three years.

Note 12 Debt and Lines of Credit

On January 5, 2018, Abbott paid off its \$2.8 billion 5-year term loan and the remaining \$1.150 billion balance under its revolving credit agreement.

On February 16, 2018, the board of directors authorized the redemption of up to \$5 billion of currently outstanding long-term notes in addition to the \$3.95 billion repaid in January 2018.

On March 22, 2018, Abbott redeemed all of the \$947 million principal amount of its 5.125% Notes due 2019, as well as \$1.055 billion of the \$2.850 billion principal amount of its 2.35% Notes due 2019. Abbott incurred a net charge of \$14 million related to the early repayment of this debt.

On June 22, 2018, Abbott redeemed \$1.3 billion of the \$1.795 billion outstanding principal amount of its 2.35% Notes due 2019.

(Unaudited)

Note 13 Financial Instruments, Derivatives and Fair Value Measures

Certain Abbott foreign subsidiaries enter into foreign currency forward exchange contracts to manage exposures to changes in foreign exchange rates for anticipated intercompany purchases by those subsidiaries whose functional currencies are not the U.S. dollar. These contracts, with gross notional amounts totaling \$2.9 billion at June 30, 2018 and \$3.3 billion at December 31, 2017 are designated as cash flow hedges of the variability of the cash flows due to changes in foreign exchange rates and are recorded at fair value. Accumulated gains and losses as of June 30, 2018 will be included in Cost of products sold at the time the products are sold, generally through the next twelve to eighteen months. The amount of hedge ineffectiveness was not significant in 2018 and 2017.

Abbott enters into foreign currency forward exchange contracts to manage currency exposures for foreign currency denominated third-party trade payables and receivables, and for intercompany loans and trade accounts payable where the receivable or payable is denominated in a currency other than the functional currency of the entity. For intercompany loans, the contracts require Abbott to sell or buy foreign currencies, primarily European currencies including the British pound, in exchange for primarily U.S. dollars and other European currencies. For intercompany and trade payables and receivables, the currency exposures are primarily the U.S. dollar and European currencies. At June 30, 2018 and December 31, 2017, Abbott held the gross notional amount of \$18.5 billion and \$20.1 billion, respectively, of such foreign currency forward exchange contracts.

Abbott is a party to interest rate hedge contracts totaling approximately \$4.0 billion at June 30, 2018 and December 31, 2017 to manage its exposure to changes in the fair value of fixed-rate debt. These contracts are designated as fair value hedges of the variability of the fair value of fixed-rate debt due to changes in the long-term benchmark interest rates. The effect of the hedge is to change a fixed-rate interest obligation to a variable rate for that portion of the debt. Abbott records the contracts at fair value and adjusts the carrying amount of the fixed-rate debt by an offsetting amount. The amount of hedge ineffectiveness was not significant in 2018 and 2017.

The following table summarizes the amounts and location of certain derivative financial instruments as of June 30, 2018 and December 31, 2017:

(in millions)	Fair Value - Assets		Balance Sheet Caption	Fair Value - Liabilities		Balance Sheet Caption
	June 30, 2018	Dec. 31, 2017		June 30, 2018	Dec. 31, 2017

Others not designated as hedges	183	117	Prepaid expenses and other receivables	128	99	Other accrued liabilities
	\$ 238	\$ 138		\$ 391	\$ 298	

Edgar Filing: ABBOTT LABORATORIES - Form 10-Q

Table of Contents

Abbott Laboratories and Subsidiaries

Notes to the Condensed Consolidated Financial Statements

June 30, 2018

(Unaudited)

The following table summarizes the activity for foreign currency forward exchange contracts designated as cash flow hedges, debt designated as a hedge of net investment in a foreign subsidiary and certain other derivative financial instruments, as well as the amounts and location of income (expense) and gain (loss) reclassified into income for the three months and six months ended June 30, 2018 and 2017. The amount of hedge ineffectiveness was not significant in 2018 and 2017 for these hedges.

(in millions)	Gain (loss) Recognized in Other Comprehensive Income (loss)				Income (expense) and Gain (loss) Reclassified into Income				Income Statement Caption
	Three Months Ended June 30		Six Months Ended June 30		Three Months Ended June 30		Six Months Ended June 30		
	2018	2017	2018	2017	2018	2017	2018	2017	
Foreign currency forward exchange contracts designated as cash flow hedges	\$ 113	\$ (54)	\$ 27	\$ (145)	\$ (53)	\$ (2)	\$ (83)	\$ (7)	Cost of products sold
Debt designated as a hedge of net investment in a foreign subsidiary				(25)	n/a	n/a	n/a	n/a	n/a
Interest rate swaps designated as fair value hedges	n/a	n/a	n/a	n/a	(31)	40	(137)	14	Interest expense

Losses of \$2 million and losses of \$51 million were recognized in the three months ended June 30, 2018 and 2017, respectively, related to foreign currency forward exchange contracts not designated as a hedge. Losses of \$50 million and losses of \$42 million were recognized in the six months ended June 30, 2018 and 2017, respectively, related to foreign currency forward exchange contracts not designated as a hedge. These amounts are reported in the Condensed Consolidated Statement of Earnings on the Net foreign exchange (gain) loss line.

The interest rate swaps are designated as fair value hedges of the variability of the fair value of fixed-rate debt due to changes in the long-term benchmark interest rates. The hedged debt is marked to market, offsetting the effect of marking the interest rate swaps to market.

The carrying values and fair values of certain financial instruments as of June 30, 2018 and December 31, 2017 are shown in the following table. The carrying values of all other financial instruments approximate their estimated fair values. The counterparties to financial instruments consist of select major international financial institutions. Abbott does not expect any losses from nonperformance by these counterparties.

Edgar Filing: ABBOTT LABORATORIES - Form 10-Q

(in millions)	June 30, 2018		December 31, 2017	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Investment Securities:				
Equity securities	\$ 856	\$ 856	\$ 797	\$ 797
Other	84	84	86	86
Total Long-term Debt	(20,329)	(20,841)	(27,718)	(29,018)
Foreign Currency Forward Exchange Contracts:				
Receivable position	238	238	138	138
(Payable) position	(161)	(161)	(205)	(205)
Interest Rate Hedge Contracts:				
(Payable) position	(230)	(230)	(93)	(93)

The fair value of the debt was determined based on significant other observable inputs, including current interest rates.

Abbott Laboratories and Subsidiaries

Notes to the Condensed Consolidated Financial Statements

June 30, 2018

(Unaudited)

The following table summarizes the bases used to measure certain assets and liabilities at fair value on a recurring basis in the balance sheet:

(in millions)	Outstanding Balances	Basis of Fair Value Measurement		
		Quoted Prices in Active Markets	Significant Other Observable Inputs	Significant Unobservable Inputs
June 30, 2018:				
Equity securities	\$ 353	\$ 353	\$	\$
Foreign currency forward exchange contracts	238		238	
Total Assets	\$ 591	\$ 353	\$ 238	\$
Fair value of hedged long-term debt	\$ 3,763	\$	3,763	\$
Interest rate swap derivative financial instruments	230		230	
Foreign currency forward exchange contracts	161		161	
Contingent consideration related to business combinations	125			125
Total Liabilities	\$ 4,279	\$	4,154	\$ 125
December 31, 2017:				
Equity securities	\$ 374	\$ 374	\$	\$
Foreign currency forward exchange contracts	138		138	
Total Assets	\$ 512	\$ 374	\$ 138	\$
Fair value of hedged long-term debt	\$ 3,898	\$	3,898	\$
Interest rate swap derivative financial instruments	93		93	
Foreign currency forward exchange contracts	205		205	
Contingent consideration related to business combinations	120			120
Total Liabilities	\$ 4,316	\$	4,196	\$ 120

The fair value of debt was determined based on the face value of the debt adjusted for the fair value of the interest rate swaps, which is based on a discounted cash flow analysis. The fair value of foreign currency forward exchange contracts is determined using a market approach, which utilizes values for comparable derivative instruments. The fair value of the contingent consideration was determined based on an independent appraisal adjusted for the time value of money and other changes in fair value.

Note 14 Litigation and Environmental Matters

Abbott has been identified as a potentially responsible party for investigation and cleanup costs at a number of locations in the United States and Puerto Rico under federal and state remediation laws and is investigating potential contamination at a number of company-owned locations. Abbott has recorded an estimated cleanup cost for each site for which management believes Abbott has a probable loss exposure. No individual site cleanup exposure is expected to exceed \$4 million, and the aggregate cleanup exposure is not expected to exceed \$10 million.

Abbott is involved in various claims and legal proceedings, and Abbott estimates the range of possible loss for its legal proceedings and environmental exposures to be from approximately \$85 million to \$130 million. The recorded accrual balance at June 30, 2018 for these proceedings and exposures was approximately \$105 million. This accrual represents management's best estimate of probable loss, as defined by FASB ASC No. 450, Contingencies. Within the next year, legal proceedings may occur that may result in a change in the estimated loss accrued by Abbott. While it is not feasible to predict the outcome of all such proceedings and exposures with certainty, management believes that their ultimate disposition should not have a material adverse effect on Abbott's financial position, cash flows, or results of operations.

Note 15 Post-Employment Benefits

Retirement plans consist of defined benefit, defined contribution, and medical and dental plans. Net cost recognized in continuing operations for the three months and six months ended June 30 for Abbott's major defined benefit plans and post-employment medical and dental benefit plans is as follows:

(in millions)	Defined Benefit Plans				Medical and Dental Plans			
	Three Months Ended June 30		Six Months Ended June 30		Three Months Ended June 30		Six Months Ended June 30	
	2018	2017	2018	2017	2018	2017	2018	2017
Service cost - benefits earned during the period	\$ 67	\$ 70	\$ 145	\$ 142	\$ 6	\$ 6	\$ 13	\$ 13
Interest cost on projected benefit obligations	77	71	155	143	12	11	24	22
Expected return on plan assets	(171)	(153)	(342)	(305)	(8)	(8)	(16)	(16)
Net amortization of:								
Actuarial loss, net	49	40	103	82	9	6	17	12
Prior service cost (credit)	1		1		(12)	(12)	(23)	(23)
Net cost - continuing operations	\$ 23	\$ 28	\$ 62	\$ 62	\$ 7	\$ 3	\$ 15	\$ 8

Edgar Filing: ABBOTT LABORATORIES - Form 10-Q

In the first quarter of 2018, Abbott adopted ASU 2017-07 which requires all components of pension and other postretirement benefit expense except service cost to be presented outside any subtotal of income from operations. These amounts are now classified as non-operating (income) loss. Abbott's Condensed Consolidated Statement of Earnings was retrospectively adjusted, resulting in the reclassification of approximately \$40 million and \$80 million of income from the Operating earnings line to the Other (income) expense, net line in the second quarter and first six months of 2017, respectively.

In the first six months of 2017, Abbott recognized a \$10 million curtailment gain related to the disposition of AMO.

Abbott funds its domestic defined benefit plans according to IRS funding limitations. International pension plans are funded according to similar regulations. In the first six months of 2018 and 2017, \$58 million and \$321 million, respectively, were contributed to defined benefit plans and \$11 million was contributed to the post-employment medical and dental benefit plans in each year.

(Unaudited)

Note 16 Taxes on Earnings

Taxes on earnings from continuing operations reflect the estimated annual effective rates and include charges for interest and penalties. In the first six months of 2018, taxes on earnings from continuing operations include approximately \$71 million in excess tax benefits associated with share-based compensation. Earnings from discontinued operations, net of tax, in the first six months of 2018 reflect the recognition of \$24 million of net tax benefits primarily as a result of the resolution of various tax positions related to prior years which decreased the gross amount of unrecognized tax benefits by \$31 million. In the first six months of 2017, taxes on earnings from continuing operations include \$430 million of tax expense related to the gain on the sale of the AMO business, which is taxed at a discrete tax rate. Earnings from discontinued operations, net of tax, of \$46 million for the first six months of 2017 primarily reflects the recognition of net tax benefits as a result of the resolution of various tax positions related to prior years.

Tax authorities in various jurisdictions regularly review Abbott's income tax filings. Abbott believes that it is reasonably possible that the recorded amount of gross unrecognized tax benefits may decrease between \$500 million and \$700 million, including cash adjustments, within the next twelve months as a result of concluding various domestic and international tax matters. In the U.S., Abbott's federal income tax returns through 2013 are settled except for the federal income tax returns of the former Alere consolidated group which are settled through 2012.

The Tax Cuts and Jobs Act (TCJA) was enacted in the U.S. on December 22, 2017. The TCJA reduces the U.S. federal corporate tax rate from 35% to 21%, requires companies to pay a one-time transition tax on earnings of certain foreign subsidiaries that were previously tax deferred and creates new taxes on certain foreign sourced earnings.

In the fourth quarter of 2017, Abbott recorded an estimate of net tax expense of \$1.46 billion for the impact of the TCJA, which was included in Taxes on Earnings from Continuing Operations in the Consolidated Statement of Earnings. The estimate was provisional and included a charge of approximately \$2.89 billion for the transition tax, partially offset by a net benefit of approximately \$1.42 billion for the remeasurement of deferred tax assets and liabilities and a net benefit of approximately \$10 million related to certain other impacts of the TCJA.

In the first six months of 2018, Abbott recorded a \$16 million adjustment to the provisional transition tax liability for associated effects related to state tax. This adjustment increases the estimate of net tax expense for the impact of TCJA to \$1.476 billion.

Given the significant complexity of the TCJA, Abbott will continue to evaluate and analyze the impact of this legislation. The \$1.476 billion estimate is provisional and is based on Abbott's latest analysis of the TCJA and may be materially adjusted in future periods due to among other things, additional analysis performed by Abbott and additional guidance that may be issued by the U.S. Department of Treasury, the Securities

and Exchange Commission, or the Financial Accounting Standards Board.

Note 17 Segment Information

Abbott's principal business is the discovery, development, manufacture and sale of a broad line of health care products. Abbott's products are generally sold directly to retailers, wholesalers, hospitals, health care facilities, laboratories, physicians' offices and government agencies throughout the world.

Abbott's reportable segments are as follows:

Established Pharmaceutical Products International sales of a broad line of branded generic pharmaceutical products.

Nutritional Products Worldwide sales of a broad line of adult and pediatric nutritional products.

Diagnostic Products Worldwide sales of diagnostic systems and tests for blood banks, hospitals, commercial laboratories, physician offices and alternate-care testing sites. For segment reporting purposes, the Core Laboratories Diagnostics, Rapid Diagnostics, Molecular Diagnostics and Point of Care Diagnostics divisions are aggregated and reported as the Diagnostic Products segment.

Cardiovascular and Neuromodulation Products Worldwide sales of cardiac rhythm management, electrophysiology, heart failure, vascular, structural heart and neuromodulation products. For segment reporting purposes, the Cardiac Arrhythmias & Heart Failure, Vascular, Neuromodulation and Structural Heart divisions are aggregated and reported as the Cardiovascular and Neuromodulation segment.

Non-reportable segments include AMO through the date of sale and Diabetes Care.

Edgar Filing: ABBOTT LABORATORIES - Form 10-Q

Abbott's underlying accounting records are maintained on a legal entity basis for government and public reporting requirements. Segment disclosures are on a performance basis consistent with internal management reporting. Intersegment transfers of inventory are recorded at standard cost and are not a measure of segment operating earnings. The cost of some corporate functions and the cost of certain employee benefits are charged to segments at predetermined rates that approximate cost. Remaining costs, if any, are not allocated to segments. In addition, intangible asset amortization is not allocated to operating segments, and intangible assets and goodwill are not included in the measure of each segment's assets. The following segment information has been prepared in accordance with the internal accounting policies of Abbott, as described above, and is not presented in accordance with generally accepted accounting principles applied to the consolidated financial statements.

(in millions)	Net Sales to External Customers				Operating Earnings			
	Three Months		Six Months		Three Months		Six Months

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Financial Review - Results of Operations

Abbott's revenues are derived primarily from the sale of a broad line of health care products under short-term receivable arrangements. Patent protection and licenses, technological and performance features, and inclusion of Abbott's products under a contract most impact which products are sold; price controls, competition and rebates most impact the net selling prices of products; and foreign currency translation impacts the measurement of net sales and costs. Abbott's primary products are nutritional products, branded generic pharmaceuticals, diagnostic testing products and cardiovascular and neuromodulation products.

The following table details sales by reportable segment for the three months and six months ended June 30. Percent changes are versus the prior year and are based on unrounded numbers.

(in millions)	Net Sales to External Customers				
	Three Months Ended June 30, 2018	Three Months Ended June 30, 2017	Total Change	Impact of Foreign Exchange	Total Change Excl. Foreign Exchange

Note: In order to compute results excluding the impact of exchange rates, current year U.S. dollar sales are multiplied or divided, as appropriate, by the current year average foreign exchange rates and then those amounts are multiplied or divided, as appropriate, by the prior year average foreign exchange rates.

Table of Contents

Excluding the impact of foreign exchange, net sales growth in 2018 was driven by growth in all of Abbott's business segments and the acquisition of Alere Inc. (Alere) which closed in the fourth quarter of 2017. The increase in the Other category reflects growth in Abbott's Diabetes Care business, partially offset by the sale of the Abbott Medical Optics (AMO) business to Johnson & Johnson. The AMO business was included in Abbott's results as a non-reportable segment through February 27, 2017, the date of the divestiture. Double-digit growth in Diabetes Care was led by FreeStyle® Libre, Abbott's sensor-based continuous glucose monitoring (CGM) system, which removes the need for routine fingersticks for people with diabetes.

Excluding the impact of the Alere acquisition, the divestitures of AMO and the legacy St. Jude Medical vascular closure business, and the impact of foreign exchange, total net sales increased 8.0 percent in the second quarter of 2018 and 7.5 percent in the first six months of 2018, respectively. Sales related to these divestitures totaled \$187 million in the first six months of 2017. Abbott's net sales were also positively impacted by changes in foreign currency exchange rates during the period compared to 2017. The relatively weaker U.S. dollar increased total international sales by 2.6 percent and total sales by 1.7 percent in the second quarter of 2018. The relatively weaker U.S. dollar increased total international sales by 4.5 percent and total sales by 2.8 percent in the first six months of 2018.

The table below provides detail by sales category for the six months ended June 30. Percent changes are versus the prior year and are based on unrounded numbers.

(in millions)	June 30, 2018	June 30, 2017	Total Change	Impact of Foreign Exchange	Total Change Excl. Foreign Exchange
Established Pharmaceutical Products					
Key Emerging Markets	\$ 1,659	\$ 1,528	8.6%	(0.9)%	9.5%

Structural Heart	608	524	16.0	5.4	10.6
Neuromodulation	434	382	13.5	1.7	11.8

Key Emerging Markets for the Established Pharmaceutical Products business include India, Russia, Brazil and China, along with several other markets that represent the most attractive long-term growth opportunities for Abbott's branded generics product portfolio. Sales in the Key

Edgar Filing: ABBOTT LABORATORIES - Form 10-Q

Emerging Markets increased 9.5 percent compared to the first six months of 2017, excluding the unfavorable effect of foreign exchange, due to double-digit growth across several geographies including India and China.

The 7.2 percent increase in International Pediatric Nutritional sales, excluding the effect of foreign exchange, was primarily driven by strong growth across several countries in Asia, including Greater China. In the U.S., the 2.9 percent increase in Pediatric Nutritional sales reflects higher Pedialyte consumption and market share gains in the infant nutrition category. The 9.3 percent increase in International Adult Nutritional sales, excluding the effect of foreign exchange, reflects continued strong growth of the *Ensure*® and *Glucerna*® brands in Asia and Latin America. In the U.S., the 1.6 percent increase in Adult Nutritional sales was driven by the growth of *Ensure* products.

The 49.0 percent increase in Diagnostics sales, excluding the effect of foreign exchange, was primarily driven by Alere which was acquired in the fourth quarter of 2017. Excluding the impact of the acquisition, as well as the impact of foreign exchange, sales in Diagnostics increased 6.1 percent driven primarily by share gains in Core Laboratory in the U.S. and internationally.

Table of Contents

The 5.0 percent increase in Cardiovascular and Neuromodulation Products sales, excluding the effect of foreign exchange, was driven by double-digit growth in Electrophysiology, Neuromodulation and Structural Heart. The growth in Electrophysiology reflects strong performance in cardiac mapping and ablation as well as share gains from the recent U.S. launch of Abbott's Confirm Rx™ Insertable Cardiac Monitor (ICM), the world's first and only smartphone-compatible ICM designed to help physicians remotely identify cardiac arrhythmias. In May 2018, Abbott announced U.S. FDA clearance of the Advisor™ HD Grid Mapping Catheter, Sensor Enabled™, which creates detailed maps of the heart and expands Abbott's electrophysiology product portfolio. The growth in Neuromodulation reflects higher revenue for various products for the treatment of chronic pain and movement disorders. Growth in Structural Heart was driven by several product areas including the AMPLATZER™ PFO Occluder and MitraClip®, Abbott's market-leading device for the minimally-invasive treatment of mitral regurgitation. In July, Abbott announced U.S. FDA approval for a next-generation version of MitraClip.

In Heart Failure, sales growth was led by higher international sales. In Vascular, higher international drug eluting stent (DES) sales and growth in vessel closure and other revenues offset lower U.S. DES sales due to lower market share. During the second quarter, Abbott received approval from the U.S. FDA for XIENCE™ Sierra, the newest generation of its coronary stent system. During the second quarter, XIENCE Sierra also received national reimbursement in Japan to treat people with coronary artery disease. In Rhythm Management, market share gains in the new patient segment were offset by replacement cycle dynamics.

The gross profit margin percentage was 50.5 percent for the second quarter of 2018 compared to 46.0 percent for the second quarter of 2017. The gross profit margin percentage was 50.6 percent for the first six months of 2018 compared to 44.8 percent for the first six months of 2017. The increase primarily reflects the favorable comparison versus the prior year which included inventory step-up amortization related to the St. Jude Medical acquisition. The increase also reflects margin improvement in various businesses including Diabetes Care and Cardiovascular and Neuromodulation.

Research and development expenses increased by \$55 million, or 10.5 percent, in the second quarter of 2018, and increased by \$91 million, or 8.4 percent, in the first six months of 2018, due primarily to the addition of the acquired Alere business as well as higher spending in other areas including Cardiovascular and Neuromodulation. For the six months ended June 30, 2018, research and development expenditures totaled \$508 million for the Cardiovascular and Neuromodulation Products segment, \$293 million for the Diagnostic Products segment, \$98 million for the Nutritional Products segment and \$92 million for the Established Pharmaceutical Products segment.

Selling, general and administrative expenses for the second quarter and first six months of 2018 increased 14.7 percent and 9.1 percent, respectively, due primarily to the addition of the acquired Alere business as well as higher spending to drive continued growth and market expansion in various businesses, partially offset by lower acquisition-related expenses.

In the first quarter of 2018, Abbott retrospectively adopted Accounting Standards Update (ASU) 2017-07, *Compensation - Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost* which changes the financial statement presentation requirements for pension and other postretirement benefit expense. While service cost continues to be reported in the same financial statement line items as other current employee compensation costs, the ASU requires all other components of pension and other postretirement benefit cost to be presented separately from service cost, and outside any subtotal of income from operations. As a result of the new accounting standard, approximately \$80 million of pension and other post retirement related income is now being reported in Other (income) expense, net in the first six months of 2018 and 2017.

Business Acquisitions

On January 4, 2017, Abbott completed the acquisition of St. Jude Medical, a global medical device manufacturer, for approximately \$23.6 billion, including approximately \$13.6 billion in cash and approximately \$10 billion in Abbott common shares, which represented approximately 254 million shares of Abbott common stock, based on Abbott's closing stock price on the acquisition date. As part of the acquisition, approximately \$5.9 billion of St. Jude Medical's debt was assumed, repaid or refinanced by Abbott. The acquisition provides expanded opportunities for future growth and is an important part of the company's ongoing effort to develop a strong, diverse portfolio of devices, diagnostics, nutritionals and branded generic pharmaceuticals. The combined business competes in nearly every area of the cardiovascular device market, as well as in the neuromodulation market.

Under the terms of the agreement, for each St. Jude Medical common share, St. Jude Medical shareholders received \$46.75 in cash and 0.8708 of an Abbott common share. At an Abbott stock price of \$39.36, which reflects the closing price on January 4, 2017, this represented a value of approximately \$81 per St. Jude Medical common share and total purchase consideration of \$23.6 billion. The cash portion of the acquisition was funded through a combination of medium and long-term debt issued in November 2016 and a \$2.0 billion 120-day senior unsecured bridge term loan facility which was subsequently repaid.

Edgar Filing: ABBOTT LABORATORIES - Form 10-Q

Table of Contents

In 2016, Abbott and St. Jude Medical agreed to sell certain businesses to Terumo Corporation (Terumo) for approximately \$1.12 billion. The sale included the St. Jude Medical Angio-Seal and Femoseal vascular closure and Abbott's Vado Steerable Sheath businesses. The sale closed on January 20, 2017 and no gain or loss was recorded in the Condensed Consolidated Statement of Earnings.

On October 3, 2017, Abbott acquired Alere, a diagnostic device and service provider, for \$51.00 per common share in cash, which equated to a purchase price of approximately \$4.5 billion. As part of the acquisition, Abbott tendered for Alere's preferred shares for a total value of approximately \$0.7 billion. In addition, approximately \$3.0 billion of Alere's debt was assumed and subsequently repaid. The acquisition establishes Abbott as a leader in point of care testing, expands Abbott's global diagnostics presence and provides access to new products, channels and geographies. Abbott utilized a combination of cash on hand and debt to fund the acquisition.

The preliminary allocation of the fair value of the Alere acquisition is shown in the table below. The allocation of the fair value of the acquisition will be finalized when the valuation is completed and differences between the preliminary and final allocation could be material.

(in billions)

Acquired intangible assets, non-deductible	\$	3.4
Goodwill, non-deductible		4.2
Acquired net tangible assets		0.9
Deferred income taxes recorded at acquisition		(0.7)
Net debt		(2.6)
Preferred stock		(0.7)
Total preliminary allocation of fair value	\$	4.5

The goodwill is primarily attributable to expected synergies from combining operations, as well as intangible assets that do not qualify for separate recognition. The goodwill is identifiable to the Diagnostic Products reportable segment. The acquired tangible assets consist primarily of trade accounts receivable of approximately \$430 million, inventory of approximately \$425 million, other current assets of \$215 million, property and equipment of approximately \$540 million, and other long-term assets of \$112 million. The acquired tangible liabilities consist of trade accounts payable and other current liabilities of approximately \$625 million and other non-current liabilities of approximately \$160 million.

In the third quarter of 2017, Alere entered into agreements to sell its Triage MeterPro cardiovascular and toxicology business and the assets and liabilities related to its B-type Natriuretic Peptide assay business run on Beckman Coulter analyzers to Quidel Corporation (Quidel). The transactions with Quidel reflect a total purchase price of \$400 million payable at the close of the transaction, \$240 million payable in six annual installments beginning approximately six months after the close of the transaction, and contingent consideration with a maximum value of \$40 million. In the third quarter of 2017, Alere entered into an agreement with Siemens Diagnostics Holding II B.V. (Siemens) to sell its subsidiary, Epocal Inc., for approximately \$200 million payable at the close of the transaction. Alere agreed to divest these businesses in connection with the review by the Federal Trade Commission and the European Commission of Abbott's agreement to acquire Alere. The sale to Quidel closed on October 6, 2017, and the sale to Siemens closed on October 31, 2017. No gain or loss on these sales was recorded in the Consolidated Statement of Earnings.

On July 17, 2017, Abbott commenced a tender offer to purchase for cash the 1.77 million outstanding shares of Alere's Series B Convertible Perpetual Preferred Stock at a price of \$402 per share, plus accrued but unpaid dividends to, but not including, the settlement date of the tender offer. This tender offer was subject to the satisfaction of certain conditions, including Abbott's acquisition of Alere and upon there being validly tendered (and not properly withdrawn) at the expiration date of the tender offer that number of shares of Preferred Stock that equaled at least a

Edgar Filing: ABBOTT LABORATORIES - Form 10-Q

majority of the Preferred Stock issued and outstanding at the expiration of the tender offer. The tender offer expired on October 3, 2017. All conditions to the offer were satisfied and Abbott accepted for payment the 1.748 million shares of Preferred Stock that were validly tendered (and not properly withdrawn). The remaining shares were cashed out for an amount equal to the \$400.00 per share liquidation preference of such shares, plus accrued but unpaid dividends, without interest. Payment for all of the shares of Preferred Stock was made in the fourth quarter of 2017.

Restructuring Plans

The results for the first six months of 2018 reflect charges under approved restructuring plans as part of the integration of the acquisition of St. Jude Medical and Alere, as well as costs related to other actions associated with the company's plans to streamline various operations. Abbott recorded employee related severance and other charges of approximately \$45 million in the first six months

Table of Contents

of 2018 related to these initiatives. Approximately \$11 million is recognized in Cost of products sold, \$10 million is recognized in Research and development and approximately \$24 million is recognized in Selling, general and administrative expense. See Note 10 to the financial statements, Restructuring Plans, for additional information regarding these charges.

Other (Income) Expense, net

Other (income) expense, net decreased by \$2 million in the second quarter of 2018 compared to 2017 and decreased by \$1.1 billion in the first six months of 2018 compared to 2017. The decrease in the first six months of 2018 compared to 2017 was due to a pre-tax gain of \$1.151 billion recorded in the first quarter of 2017 from Abbott's completion of the sale of AMO to Johnson & Johnson.

Interest Expense, net

Interest expense, net increased \$6 million in the second quarter of 2018 and \$1 million in the first six months of 2018 compared to 2017 as lower interest income due to lower cash balances more than offset lower interest expense due to the repayment of debt.

Taxes on Earnings from Continuing Operations

Taxes on earnings from continuing operations reflect the estimated annual effective rates and include charges for interest and penalties. In the first six months of 2018, taxes on earnings from continuing operations include approximately \$71 million in excess tax benefits associated with share-based compensation. Earnings from discontinued operations, net of tax, in the first six months of 2018 reflect the recognition of \$24 million of net tax benefits primarily as a result of the resolution of various tax positions related to prior years which decreased the gross amount of unrecognized tax benefits by \$31 million. In the first six months of 2017, taxes on earnings from continuing operations include \$430 million of tax expense related to the gain on the sale of the AMO business, which is taxed at a discrete tax rate. Earnings from discontinued operations, net of tax, of \$46 million for the first six months of 2017 primarily reflects the recognition of net tax benefits as a result of the resolution of various tax positions related to prior years.

Tax authorities in various jurisdictions regularly review Abbott's income tax filings. Abbott believes that it is reasonably possible that the recorded amount of gross unrecognized tax benefits may decrease between \$500 million and \$700 million, including cash adjustments, within the next twelve months as a result of concluding various domestic and international tax matters. In the U.S., Abbott's federal income tax returns through 2013 are settled except for the federal income tax returns of the former Alere consolidated group which are settled through 2012.

The Tax Cuts and Jobs Act (TCJA) was enacted in the U.S. on December 22, 2017. The TCJA reduces the U.S. federal corporate tax rate from 35% to 21%, requires companies to pay a one-time transition tax on earnings of certain foreign subsidiaries that were previously tax deferred and creates new taxes on certain foreign sourced earnings.

Edgar Filing: ABBOTT LABORATORIES - Form 10-Q

In the fourth quarter of 2017, Abbott recorded an estimate of net tax expense of \$1.46 billion for the impact of the TCJA, which was included in Taxes on Earnings from Continuing Operations in the Consolidated Statement of Earnings. The estimate was provisional and included a charge of approximately \$2.89 billion for the transition tax, partially offset by a net benefit of approximately \$1.42 billion for the remeasurement of deferred tax assets and liabilities and a net benefit of approximately \$10 million related to certain other impacts of the TCJA.

In the first six months of 2018, Abbott recorded a \$16 million adjustment to the provisional transition tax liability for associated effects related to state tax. This adjustment increases the estimate of net tax expense for the impact of TCJA to \$1.476 billion.

Given the significant complexity of the TCJA, Abbott will continue to evaluate and analyze the impact of this legislation. The \$1.476 billion estimate is provisional and is based on Abbott's latest analysis of the TCJA and may be materially adjusted in future periods due to among other things, additional analysis performed by Abbott and additional guidance that may be issued by the U.S. Department of Treasury, the Securities and Exchange Commission, or the Financial Accounting Standards Board.

Discontinued Operations

On January 1, 2013, Abbott completed the separation of AbbVie Inc. (AbbVie), which was formed to hold Abbott's research-based proprietary pharmaceuticals business. Abbott has retained all liabilities for all U.S. federal and foreign income taxes on income prior to the separation, as well as certain non-income related taxes attributable to AbbVie's business prior to the separation. AbbVie generally will be liable for all other taxes attributable to its business.

Table of Contents

Earnings from discontinued operations, net of tax of \$24 million and \$46 million in the first six months of 2018 and 2017, respectively, were driven primarily by the recognition of net tax benefits as a result of the resolution of various tax positions related to AbbVie's operations for years prior to the separation.

Assets Held for Disposition

As discussed in Note 8 - Business Acquisitions, in conjunction with the acquisition of Alere, Abbott sold the Triage MeterPro cardiovascular and toxicology business and the assets and liabilities related to its B-type Natriuretic Peptide assay business run on Beckman Coulter analyzers to Quidel. The legal transfer of certain assets and liabilities related to these businesses did not occur at the close of the sale to Quidel due to, among other factors, the time required to transfer marketing authorizations and other regulatory requirements in various countries. Under the terms of the sale agreement with Abbott, Quidel is subject to the risks and entitled to the benefits generated by these operations and assets. The assets presented as held for disposition in the Condensed Consolidated Balance Sheet as of June 30, 2018 and December 31, 2017, primarily relate to the businesses sold to Quidel.

(in millions)	June 30, 2018	December 31, 2017
Trade receivables, net	\$ 13	\$ 12
Total inventories	4	8
Current assets held for disposition	17	20
Net property and equipment		56
Intangible assets, net of amortization	19	18
Goodwill	102	102
Non-current assets held for disposition	121	176
Total assets held for disposition	\$ 138	\$ 196

Liquidity and Capital Resources June 30, 2018 Compared with December 31, 2017

The reduction of cash and cash equivalents from \$9.4 billion at December 31, 2017 to \$3.1 billion at June 30, 2018 primarily reflects repayment of debt and the payment of dividends, partially offset by cash generated from operations in the first six months of 2018. Working capital was \$5.2 billion at June 30, 2018 and \$11.2 billion at December 31, 2017. The \$6.0 billion decrease in working capital in 2018 is primarily due to the reduction in Cash and cash equivalents as discussed above.

Net cash from operating activities for the first six months of 2018 totaled \$2.352 billion, an increase of \$427 million over the prior year due primarily to higher segment operating earnings, continued improvements in working capital management, timing of pension contributions and lower acquisition-related expenses. Other, net in Net cash from operating activities for the first six months of 2018 was a use of \$373 million and includes the impact of approximately \$425 million of cash taxes paid. The Other, net line in Net cash from operating activities for the first six months of 2017 of \$50 million includes the impact of approximately \$430 million of tax expense associated with the disposition of businesses. Other net, in the first six months of 2017 also includes contributions to defined benefit pension plans of \$321 million. Abbott expects to fund cash dividends, capital expenditures and its other investments in its businesses with cash flow from operating activities, cash on hand, short-term investments and borrowings.

Edgar Filing: ABBOTT LABORATORIES - Form 10-Q

In the first six months of 2017, Abbott sold 50 million of the Mylan N.V. ordinary shares received upon the sale of its developed markets branded generics pharmaceuticals business to Mylan Inc. The sale of these shares generated cash proceeds of approximately \$1.9 billion.

On January 5, 2018, Abbott paid off its \$2.8 billion 5-year term loan and the remaining \$1.150 billion balance under its revolving credit agreement. On February 16, 2018, the board of directors authorized the redemption of up to \$5 billion of currently outstanding long-term notes in addition to the \$3.95 billion repaid in January 2018. On March 22, 2018, Abbott redeemed all of the \$947 million principal amount of its 5.125% Notes due 2019, as well as \$1.055 billion of the \$2.850 billion principal amount of its 2.35% Notes due 2019. Abbott incurred a net charge of \$14 million related to the early repayment of this debt. On June 22, 2018, Abbott redeemed \$1.3 billion of the \$1.795 billion outstanding principal amount of its 2.35% Notes due 2019.

At June 30, 2018, Abbott's long-term debt rating was BBB by Standard & Poor's Corporation and Baa2 by Moody's Investors Service. Abbott expects to maintain an investment grade rating. Abbott has readily available financial resources, including lines of credit of \$5.0 billion which expire in 2019.

Table of Contents

In September 2014, the board of directors authorized the repurchase of up to \$3.0 billion of Abbott's common shares from time to time. The 2014 authorization was in addition to the \$512 million unused portion of a previous program announced in June 2013. In the first six months of 2016, Abbott repurchased 10.4 million shares at a cost of \$408 million under the program authorized in 2014. On April 27, 2016, the board of directors authorized the issuance and sale for general corporate purposes of up to 75 million common shares that would result in proceeds of up to \$3 billion. No shares have been issued under this authorization.

In each of the first two quarters of 2018, Abbott declared a quarterly dividend of \$0.28 per share on its common shares, which represents an increase of approximately 6% over the \$0.265 per share quarterly dividend declared in each of the first two quarters of 2017.

Recently Issued Accounting Standards Not Yet Adopted

In February 2018, the Financial Accounting Standards Board (FASB) issued ASU 2018-02, *Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income*, which allows companies to reclassify stranded tax effects resulting from the 2017 Tax Cuts and Jobs Act, from accumulated other comprehensive income to retained earnings. The standard becomes effective for Abbott beginning in the first quarter of 2019 and early adoption is permitted. Abbott is currently evaluating the impact the new guidance will have on its consolidated financial statements.

In August 2017, the FASB issued ASU 2017-12, *Targeted Improvements to Accounting for Hedging Activities*, which makes changes to the designation and measurement guidance for qualifying hedging relationships and the presentation of hedge results. The standard becomes effective for Abbott beginning in the first quarter of 2019 and early adoption is permitted. Abbott is currently evaluating the effect that the new guidance will have on its consolidated financial statements.

In February 2016, the FASB issued ASU 2016-02, *Leases*, which requires lessees to recognize assets and liabilities for most leases on the balance sheet. The standard becomes effective for Abbott beginning in the first quarter of 2019 and early adoption is permitted. Adoption requires application of the new guidance for all periods presented. Abbott is currently evaluating the impact the new guidance will have on its consolidated financial statements.

Revenue Recognition Standard

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers*, which provides a single comprehensive model for accounting for revenue from contracts with customers and supersedes nearly all previously existing revenue recognition guidance. The core principle of the ASU is that an entity should recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Abbott adopted the new standard as of January 1, 2018, using the modified retrospective approach method. Under this method, entities recognize the cumulative effect of applying the new standard at the date of initial application with no restatement of comparative periods presented. The cumulative effect of applying the new standard resulted in an increase to Earnings employed in the business in the Condensed Consolidated Balance Sheet of \$23 million which was recorded at January 1, 2018. The impact of adopting ASU 2014-09 was not significant to individual financial statement line items on the Condensed Consolidated Balance Sheet and Condensed Consolidated Statement

of Earnings.

See Note 2 to the financial statements, New Accounting Standards, for additional information regarding recently issued accounting standards.

Legislative Issues

Abbott's primary markets are highly competitive and subject to substantial government regulations throughout the world. Abbott expects debate to continue over the availability, method of delivery, and payment for health care products and services. It is not possible to predict the extent to which Abbott or the health care industry in general might be adversely affected by these factors in the future. A more complete discussion of these factors is contained in Item 1, Business, and Item 1A, Risk Factors, in the 2017 Annual Report on Form 10-K.

Private Securities Litigation Reform Act of 1995 - A Caution Concerning Forward-Looking Statements

Under the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, Abbott cautions investors that any forward-looking statements or projections made by Abbott, including those made in this document, are subject to risks and uncertainties that may cause actual results to differ materially from those projected. Economic, competitive, governmental, technological and other factors that may affect Abbott's operations are discussed in Item 1A, Risk Factors, in the 2017 Annual Report on Form 10-K.

PART I. FINANCIAL INFORMATION

Item 4. Controls and Procedures

(a) *Evaluation of disclosure controls and procedures.* The Chief Executive Officer, Miles D. White, and Chief Financial Officer, Brian B. Yoor, evaluated the effectiveness of Abbott Laboratories' disclosure controls and procedures as of the end of the period covered by this report, and concluded that Abbott Laboratories' disclosure controls and procedures were effective to ensure that information Abbott is required to disclose in the reports that it files or submits with the Securities and Exchange Commission (the Commission) under the Securities Exchange Act of 1934 (the Exchange Act) is recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms, and to ensure that information required to be disclosed by Abbott in the reports that it files or submits under the Exchange Act is accumulated and communicated to Abbott's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

(b) *Changes in internal control over financial reporting.* During the quarter ended June 30, 2018, there were no changes in Abbott's internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that have materially affected, or are reasonably likely to materially affect, Abbott's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Abbott is involved in various claims, legal proceedings and investigations, including (as of June 30, 2018, except where noted below) those described below. While it is not feasible to predict the outcome of such pending claims, proceedings and investigations with certainty, management is of the opinion that their ultimate resolution should not have a material adverse effect on Abbott's financial position, cash flows, or results of operations.

In its 2017 Annual Report on Form 10-K, Abbott reported that Alere Toxicology Services, Inc. had reached an agreement with the U.S. Environmental Protection Agency and agreed to pay a civil penalty of \$186,225 with respect to potential violations of the Resources Conservation and Recovery Act and associated regulations at its Austin, Texas facility. The civil penalty was paid in February 2018 and the matter was closed during the second quarter of 2018 in accordance with the agreement terms.

Table of ContentsItem 2. Unregistered Sales of Equity Securities and Use of Proceeds*(c) Issuer Purchases of Equity Securities*

Period	(a) Total Number of Shares (or Units) Purchased	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
April 1, 2018 – April 30, 2018	12,328(1)	\$ 58.084		\$ 925,131,209(2)
