NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(1) Organization and Basis of Presentation

NATCO Group Inc. is one of the leading providers of wellhead process equipment, systems and services used in the production of oil and gas. The Company's production equipment is used onshore and offshore in most major oil and gas producing regions of the world.

The accompanying consolidated interim financial statements and related disclosures are unaudited and prepared by NATCO Group Inc. pursuant to accounting principles generally accepted in the United States of America (US GAAP) and the rules and regulations of the United States Securities and Exchange Commission (SEC). As permitted by these regulations, certain information and footnote disclosures that would typically be required in financial statements prepared in accordance with US GAAP have been condensed or omitted. However, the Company's management believes that these statements reflect all the normal recurring and non-recurring adjustments necessary for a fair presentation, in all material respects, of the results of operations for the periods presented. These consolidated financial statements should be read in conjunction with the consolidated financial statements and related notes included in the Company's Annual Report on Form 10-K filing for the year ended December 31, 2006.

The preparation of financial statements requires the Company's management to make estimates and assumptions that affect the amounts reported in the unaudited consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

Certain prior period amounts have been reclassified to conform to the current period presentation. These reclassifications had no effect on previously reported interim statements of operations except as discussed in Note 3, Change in Accounting Principle.

References to NATCO and the Company are used throughout this document and relate collectively to NATCO Group Inc. and its consolidated subsidiaries.

(2) Summary of Significant Accounting Policies

Our significant accounting policies are described in Note 2 to our Annual Report on Form 10-K for the year ended December 31, 2006. The following changes were made to our significant accounting policies during the six months ended June 30, 2007:

We adopted accounting policies related to uncertain tax position according to Financial Accounting Standards Board (FASB) Interpretation (FIN) No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109. See Note 9, Income Taxes.

We adopted accounting policies related to the planned major maintenance activities according to FASB Staff Position (FSP) No. AUG AIR-1, Accounting for Planned Major Maintenance Activities. See Note 3, Change in Accounting Principle.

(3) Change in Accounting Principle

As of January 1, 2007, the Company changed its method of accounting for planned major maintenance activities from the accrue-in-advance method to the permitted direct expense method, as required by FSP No. AUG AIR-1. Previously, the Company accrued for the cost of upcoming periodic replacements or maintenance of membranes used in gas processing facilities owned by us in advance of performing the related replacements or maintenance, based on historical membrane replacements and/or maintenance. Costs expected to be paid in the future were classified as a current liability. Under the direct expense method, costs actually incurred are expensed in the same period they are incurred.

Table of Contents**NATCO GROUP INC. AND SUBSIDIARIES****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Company recorded this change in accounting principle in accordance with FSP No. AUG AIR-1, which requires retrospective application of the new accounting principle to all practicable prior accounting periods as if the principle had always been used. The accounting principle was retrospectively applied to the period of January 1, 2002 and to each period thereafter. Effective January 1, 2007, the Company began recording the actual cost related to the replacements and/or maintenance of membranes as incurred. The cumulative effect of the retrospective application of this accounting principle as of January 1, 2006 was a \$464,000 decrease in total liabilities and a \$296,000 increase in retained earnings, net of the \$168,000 related tax expense.

The following tables present the effect of the retrospective application of this change in accounting principle on the Company's consolidated financial statements for the periods presented:

(6) Goodwill and Intangible Assets

In accordance with Statements of Financial Accounting Standards (SFAS) No. 142, Goodwill and Other Intangible Assets, the Company evaluates intangible assets with indefinite lives, including goodwill, on an impairment basis, while intangible assets with a defined term, such as patents, are amortized over the useful life of the asset. The Company tests each business segment for impairment of goodwill annually at year end, or more frequently if there are indications of goodwill impairment. Goodwill was not impaired as of December 31, 2006. During the six months ended June 30, 2007, no additional testing was performed as management noted no indications of goodwill impairment.

Net goodwill of \$80.9 million at December 31, 2006, was comprised of \$47.4 million, \$29.1 million and \$4.4 million for the Oil & Water Technologies, Gas Technologies and Automation & Controls reporting units, respectively. Net goodwill of \$81.5 million at June 30, 2007, was comprised of \$47.8 million, \$29.3 million and \$4.4 million for the Oil & Water Technologies, Gas Technologies and Automation & Controls reporting units, respectively. The increase in net goodwill of \$653,000 was due to the changes in foreign currency.

Intangible and amortizable assets subject to amortization as of June 30, 2007 and December 31, 2006 were:

As of June 30, 2007		As of December 31, 2006

Amortization and interest expense related to deferred financing fees, patents and other were \$83,000 and \$161,000 for the three and six months ended June 30, 2007 compared to \$132,000 and \$151,000 for the three and six months ended June 30, 2006. For segment reporting purposes, these intangible assets and the related accumulated amortization expense were allocated to each segment.

(7) Warranty Costs

Estimated future warranty obligations related to products are charged to cost of goods sold in the period in which the related revenue is recognized. A reconciliation of the changes in the Company's aggregate product warranty liability included in the consolidated balance sheet liability account Accrued expenses for the six months ended June 30, 2007, is set forth below (unaudited, in thousands).

Foreign currency translation	60
Payments/charges	(1,048)
Net accruals	1,679
 Balance at June 30, 2007	 \$ 4,557

(8) Closure, Severance and Other

On December 15, 2005, the Board of Directors approved the final phase of restructuring the Company's UK operations by consolidating two offices in England into one location. During the quarter ended June 30, 2007, the Company settled the office lease obligation related to the closed office and reversed to income the remaining provision of \$247,000. As of June 30, 2007, the Company had no further obligation with respect to this restructuring.

Pursuant to an amendment to his then effective employment agreement with the Company, entered into in September 2005, Mr. Patrick M. McCarthy agreed to continue as President of the Company in exchange for certain benefits and payments which included, among other things, payment of certain severance benefits, a guaranteed bonus for 2005, acceleration of vesting of certain options, lapse in restrictions on a portion of his restricted stock awards and continuation of certain health benefits following termination. The Company recorded a charge of \$1.2 million in the third quarter of 2005 related to this amendment, in addition to the previously accrued expense of \$155,000 related to his 2005 bonus. On June 26, 2006, the Company and Mr. McCarthy entered into an amended and restated Employment Agreement (the Employment Agreement), which became effective July 1, 2006. Under the terms of the Employment Agreement, which was reviewed and approved by the Company's Board of Directors, Mr. McCarthy was named as the Company's President and Chief Operating Officer to serve for an initial term to July 1, 2008. While the Company did not incur additional charges with respect to effectiveness of the Employment Agreement, it remains liable for the severance obligation under the former arrangement, to be paid upon Mr. McCarthy's termination. As of June 30, 2007, the Company had a remaining aggregate liability of approximately \$938,000 related to this matter.

In July and December 2004, the Company recorded severance expense of \$2.5 million and \$1.3 million, respectively, related to the termination of two executives and certain other administrative and operating personnel in the US, UK and Canada. The Company settled all remaining liabilities related to one of the executives and recorded a final valuation adjustment charge of \$20,000 in the quarter ended June 30, 2007. As of June 30, 2007, the Company had a remaining aggregate liability of approximately \$28,000 related to this matter.

Closure, severance and other expense (income) was (\$227,000) for each of the three and six months ended June 30, 2007 and \$193,000 and \$244,000 for the three and six months ended June 30, 2006, respectively.

A roll forward of the Company's accrued closure, severance and other expense (income) as of December 31, 2006 and June 30, 2007 follows (in thousands):

Balance at December 31, 2006	\$ 3,656
Payments	(2,491)
Closure, severance and other	(227)
Foreign exchange impact	28
Balance at June 30, 2007 (unaudited)	\$ 966

The estimated payment of this liability at June 30, 2007 is \$28,000 in 2007 and \$938,000 in 2008. There was approximately \$500,000 in the non-cash portion of these remaining liabilities.

(9) Income Taxes

NATCO's effective income tax rate for the three and six months ended June 30, 2007 were 35.2% and 35.8% respectively, which exceeded the amount that would have resulted from applying the U.S. federal statutory tax rate due to the impact of state income taxes, foreign income tax rate differentials and permanent differences.

In June 2006, the FASB issued FIN 48, Accounting for Uncertainty in Income Taxes. This interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, Accounting for Income Taxes. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return as well as provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. Effective January 1, 2007, the Company adopted the provisions of FIN 48. The Company determined there was no cumulative effect on our financial statements related to adopting FIN 48.

As of January 1, 2007, the Company provided for a liability of \$824,000 for unrecognized tax benefits related to various federal income tax matters. If recognized, the entire amount of the liability would affect the effective tax rate. The liability for unrecognized tax benefits increased \$52,000 to \$876,000 during the three and six-month periods ended June 30, 2007. Any interest and penalties that may be incurred as part of this liability would be recognized as a component of interest expense. The Company's US federal tax returns are currently open to audit under the statute of limitations by the Internal Revenue Service for the years ending December 31, 2003 through 2006.

(10) Debt

In July 2006, the Company terminated its 2004 term loan and revolving credit facilities and entered into a new 2006 revolving credit facilities agreement with a maturity of June 15, 2010 and a total borrowing capacity of \$85.0 million. The Company pays commitment fees on the undrawn portion of these facilities, depending upon the ratio of Funded Debt to EBITDA, which was calculated at 0.25% at June 30, 2007. Availability under our credit facilities is reduced by the amount of outstanding letters of credit and borrowings. There were no borrowings outstanding under these facilities as of December 31, 2006 or June 30, 2007.

The Company had letters of credit outstanding of \$16.9 million under the revolving credit facilities and a total available borrowing capacity of \$78.1 million at June 30, 2007. The letters of credit, which support contract performance and warranties, expire at various dates through December 8, 2011. Fees related to these letters of credit were approximately 1.0% of the outstanding balance at June 30, 2007. As of June 30, 2007, the Company had unsecured letters of credit and bonds totaling \$568,000.

Table of Contents**NATCO GROUP INC. AND SUBSIDIARIES****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In June 2007, the Company renewed its export sales credit facility with a total borrowing capacity of \$10.0 million. The facility, which will expire on June 15, 2010, is partially guaranteed by the US Export-Import Bank and is subject to certain borrowing base limitations. Interest on borrowings under the facility is either (1) Bank of America's prime rate less 0.50% or (2) the London Interbank Offered Rate plus 1.35%, at the company's election. The Company pays an annual fee of \$75,000. The facility is available for borrowing and letters of credit. As of June 30, 2007 there was no indebtedness or letters of credit outstanding under this facility.

(11) Postretirement Benefits*Health Care and Life Insurance Plans*

The Company adopted SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans* an amendment of FASB Statements No. 87, 88, 106, and 132(R), as of December 31, 2006. The amounts included in accumulated other comprehensive income (AOCI) to be recognized as components of net periodic cost on postretirement benefit liability over the six months ended June 30, 2007 and the year 2007 are \$317,000 and \$634,000, respectively.

The following table summarizes the components of net periodic cost on postretirement benefit liability under the Company's postretirement health care and life insurance benefit plans for the three and six months ended June 30, 2007 and 2006, respectively:

	For the Three Months Ended		For the Six Months Ended

During the three months and six months ended June 30, 2007, the Company made contributions aggregating \$831,000 and \$1.8 million, respectively, to the Company's defined contribution plans maintained in the US, Canada and the UK. This amount included certain additional discretionary matching contributions provided by the Company to eligible employees in the US and Canadian plans.

(12) Litigation

NATCO and its subsidiaries are defendants or otherwise involved in a number of legal proceedings in the ordinary course of their business. While we insure against the risk of these proceedings to the extent deemed prudent by our management, we can offer no assurance that the type or value of this insurance will meet the liabilities that may arise from any pending or future legal proceedings related to our business activities. While we cannot predict the outcome of any legal proceedings with certainty, in the opinion of management, our ultimate liability with respect to these pending lawsuits is not expected to have a material adverse effect on our consolidated financial position, results of operations or cash flows.

(13) Share-Based Compensation*Overview*

Effective January 1, 2006, the Company adopted SFAS No. 123R, Share-Based Payment.

As of June 30, 2007, the Company had 738,849 shares available for future awards under its long-term incentive compensation plans. The Company may elect to issue new shares or treasury shares, if any, under its long-term incentive compensation plans. Forfeitures were estimated at annual rates of 4.72% and 1.44% for stock options granted and restricted stock awarded, respectively, during both the three and six-month periods ended June 30, 2007 based on the Company's historical cancellation and forfeiture experience.

The components of total share-based compensation expense related to all of the Company's share-based options and awards recognized for the three and six months ended June 30, 2007 and 2006 were:

	For the Three Months Ended June 30,

Stock Options

The Company values share-based options by applying the Black-Scholes-Merton Single Option Reduced Term valuation method which requires management to make various subjective assumptions.

Table of Contents**NATCO GROUP INC. AND SUBSIDIARIES****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)***Changes in Assumptions*

In June 2007, the Company reviewed and evaluated the applicable assumptions used in the determination of fair value of our stock options. This resulted in changes to our assumptions which were applied to the Company's annual 2007 stock options granted. The revised assumptions will be prospectively applied to all future grants of stock options.

Expected Term. We previously used the simplified method of estimating the expected term, as permitted by the SEC until December 31, 2007, to arrive at an expected term of six years. This method was replaced in June 2007 by the method of estimate based on historical exercise behavior. We analyzed stock option exercise activities from January 1, 1995, which is the most practically feasible date regarding the records maintained in our system, to the valuation date. We calculated the expected term based on the total of options exercised, unvested options cancelled and options exercisable. The resulting expected term was determined to be four and a half years. The Company's management believes that this revised expected term better represents our stock options exercise behavior.

Volatility. Volatility was determined based on daily price observations over the expected term of four and a half years.

Risk Free Interest Rate. Risk Free Interest Rate was determined using the average of the published zero-coupon Treasury bond rates with remaining terms of four and five years.

Changes in the assumptions generally have the following effect on the fair value of stock options and the related share-based compensation expense:

<i>Assumptions</i>	<i>Change</i>	<i>Effect on Fair Value</i>
Expected Term (years)	Increase	Increase
Volatility	Increase	Increase
Risk Free Interest Rate	Increase	Increase
Dividend	Increase	Decrease

The assumptions used to determine the fair value of stock option awards granted during the three months ended June 30, 2007 and 2006 were:

As of June 30, 2007 there was \$5.6 million of total unrecognized compensation cost, including estimated forfeitures, related to unvested restricted stock. That cost is expected to be recognized over a weighted average period of 2.2 years.

(14) Earnings per Share

Per SFAS No. 128 Earnings per Share, the basic earnings per share is computed by dividing net income available to common stockholders by the weighted average number of shares outstanding for the period. The diluted earnings per common and potential common share is computed using net income available to common stockholders divided by the weighted average number of shares outstanding for the period, after applying the if-converted method to determine any incremental shares associated with convertible preferred stock. Net income available to common stockholders represents net income less convertible preferred stock dividends accrued.

The following tables present the computation of basic and diluted earnings per common and potential common share for the three and six months ended June 30, 2007 and 2006, respectively:

	For the Three Months Ended			For the Three Months Ended

The Company computes incremental shares according to SFAS No. 123R requirements. The assumed proceeds used in the Treasury Method include the windfall tax benefit related to unrecognized compensation expense. For the purpose of weighted average shares calculation, the performance condition of some restricted stock has been taken into consideration. If anti-dilutive common shares were included for the three and six months ended June 30, 2007 the impact would have been a reduction of approximately 97,000 shares and 136,000 shares, respectively and 72,000 shares and 90,000 shares, respectively for June 30, 2006. At June 30, 2007, the Company included 1.9 million shares issuable upon conversion of the Series B redeemable convertible preferred shares in the calculation of the diluted weighted average shares, as the inclusion of these shares was dilutive at the level of income in the three and six months ended June 30, 2007 and 2006.

(15) Industry Segments

NATCO's reporting segments are Oil & Water Technologies, Gas Technologies and Automation & Controls.

The Oil & Water Technologies segment includes both standard and traditional oil and gas separation and dehydration equipment sales and related services and built-to-order systems focused primarily on oil and water production and processing.

The Gas Technologies segment includes our CO₂ membrane business, the assets and operating relationship related to our gas processing facilities in West Texas and H₂S removal technologies including Shell Paques.

Edgar Filing: NATCO GROUP INC - Form 10-Q

The Automation & Controls segment focuses on the manufacture and sale of new control panels and systems which monitor and control oil and gas production, as well as field service activities including repair, maintenance, testing and inspection services for existing systems.

NATCO allocates corporate and other expenses to each of the operating segments based on headcount, total assets, revenues and bookings. Corporate assets are allocated to the segments based on the total assets of the

segment. The accounting policies of the segments are consistent with the policies used to prepare the Company's consolidated financial statements for the respective periods presented, as described in Note 2, Summary of Significant Accounting Policies to our Annual Report on Form 10-K for the year ended December 31, 2006 and Note 2 to the consolidated financial statements filed in our Quarterly Report on Form 10-Q for the quarter ended June 30, 2007. The Company evaluates the performance of its operating segments based on income before interest expense, interest income, depreciation and amortization expense, closure, severance and other, other, net and income tax provision.

(16) Recent Accounting Pronouncements

In June 2006, the FASB issued FIN 48, Accounting for Uncertainty in Income Taxes. This interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, Accounting for Income Taxes. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return as well as provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. Effective January 1, 2007, the Company adopted the provisions of FIN 48. The Company determined that there was no cumulative effect on our financial statements related to adopting FIN 48.

In September 2006, the FASB issued Staff Position (FSP) No. AUG AIR-1, Accounting for Planned Major Maintenance Activities, which prohibits the use of the accrue-in-advance method of accounting for planned major maintenance activities in annual and interim financial reporting periods. FSP No. AUG AIR-1 is effective for the fiscal year beginning after December 15, 2006. The Company adopted FSP No. AUG AIR-1 on January 1, 2007. The impact of the application of this FSP is discussed in Note 3, Change in Accounting Principle.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements, which will become effective as of January 1, 2008. SFAS No. 157 defines fair value, establishes a framework for measuring fair

value in generally accepted accounting principles and expands disclosures of fair value measurements. The Company is in the process of evaluating the impact, if any, of this standard on its consolidated results of operations, financial positions or cash flows and will adopt it on January 1, 2008.

In February 2007, the FASB issued FSP No. FAS 158-1, Conforming Amendments to the Illustrations in FASB Statements No. 87, No. 88 and No. 106 and to the Related Staff Implementation Guides. This FSP provides (1) updated illustrations contained in Appendix B of Statement 87, Appendix B of Statement 87 and Appendix C of Statement 106 which were amended by Statement 158 and (2) updated questions and answers in all previous FASB Special Reports related to Statement 87, 88 and 106. FSP No. FAS 158-1 became effective as of the effective date of Statement 158 of December 31, 2006. There was no impact on the Company's consolidated results of operations, financial position or cash flows resulting from the adoption of FSP No. FAS 158-1.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities, including an amendment to FASB Statement No. 115, which permits entities the option to measure eligible items at fair value at specified election dates. SFAS No. 159 is effective as of January 1, 2008 with early adoption permitted. Under the standard, a business entity shall report unrealized gains and losses on items for which the fair value has been elected in earnings at each subsequent reporting date. The Company is currently assessing the impact, if any, of the adoption of SFAS No. 159 on its consolidated financial position and results of operations.

(18) Subsequent Events

During July and August 2007, certain stockholders converted a total of 5,085 shares of the Company's Series B Redeemable Convertible Preferred Stock into a total of 651,502 shares of the Company's common stock, pursuant to a formula specified in the certificate of designations with respect to the preferred stock. The Company also paid a total of approximately \$42,000 for 1) accrued but unpaid dividends on the preferred shares converted and 2) cash in lieu of issuing fractional shares, also in accordance with the terms of the certificate of designations with respect to the preferred shares.

The issuances of common stock on conversion of the preferred stock were exempt from registration under Section 3(a)(9) of the Securities Act of 1933, as amended. A total of 9,915 and 18,225,459 shares of Series B Redeemable Convertible Preferred Stock and Common Stock, respectively, were outstanding as of August 3, 2007.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

Management's Discussion and Analysis includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. The words believe, expect, plan, intend, designed to, estimate, project, will, could, may and similar expressions are intended to identify forward-looking statements. Forward-looking statements in this document include, but are not limited to, discussions of accounting policies and estimates, indicated trends in the level of oil and gas exploration and production and the effect of such conditions on the Company's results of operations (see Industry and Business Environment), growth plans for 2007 and beyond, future uses of and requirements for financial resources (see Liquidity and Capital Resources), impact of bookings on future revenues and anticipated backlog levels. Our expectations about our business outlook, customer spending, potential acquisitions, oil and gas prices and our business environment and that of the industry in general are only our expectations regarding these matters. Actual results may differ materially from those in the forward-looking statements contained in this report for reasons including, but not limited to: market factors such as pricing and demand for petroleum related products, the level of petroleum industry exploration and production expenditures, the effects of competition, the availability of a skilled labor force, world economic conditions, the level of drilling activity, the legislative environment in the United States and other countries, energy policies of OPEC, conflict involving the United States or in major petroleum producing or consuming regions, acts of war or terrorism, technological advances that could lower overall finding and development costs, weather patterns and the overall condition of capital markets for countries in which we operate.

Overview

Our organization has three operating segments: Oil & Water Technologies, Gas Technologies and Automation & Controls.

The Oil & Water Technologies segment includes both standard and traditional oil and gas separation and dehydration equipment sales and related services and built-to-order systems focused primarily on oil and water production and processing.

The Gas Technologies segment includes our CO₂ membrane business, the assets and operating relationship related to our gas processing facilities in West Texas and H₂S removal technologies including Shell Paques.

The Automation & Controls segment focuses on the manufacture and sale of new control panels and systems which monitor and control oil and gas production, as well as field service activities including repair, maintenance, testing and inspection services for existing systems.

Critical Accounting Policies

The preparation of our consolidated financial statements requires us to make certain estimates and assumptions that affect the results reported in our consolidated financial statements and the accompanying notes. These estimates and assumptions are based on historical experience and on our future expectations that we believe to be reasonable under the circumstances. Note 2 to the consolidated financial statements filed in our Annual Report on Form 10-K for the year ended December 31, 2006 and Note 2 to the consolidated financial statements filed in our Quarterly Report on Form 10-Q for the quarter ended June 30, 2007 contain a summary of our significant accounting policies. We believe the following accounting policies are the most critical in the preparation of our consolidated financial statements:

Revenue Recognition: Percentage of Completion Method. We recognize revenues and related costs when products are shipped or services are rendered for (1) time and materials and service contracts, (2) manufactured goods produced in standard manufacturing operations and sold in the ordinary course of business through regular marketing channels and (3) certain customized manufactured goods that are smaller jobs with less customization,

Table of Contents

making them similar to such standard manufactured goods (that is, contracts valued at \$250,000 or less having contract durations of four months or less). We recognize revenues using the percentage of completion method on contracts greater than \$250,000 and having contract durations in excess of four months that represent customized, engineered orders of our products and qualify for such treatment in accordance with the requirements of AICPA Statement of Position 81-1, Accounting for Performance of Certain Production-Type Contracts (SOP 81-1). In addition, we use the percentage of completion method on all Automation & Controls segment equipment fabrication and sales projects that qualify for such treatment in accordance with the requirements of SOP 81-1. The Automation & Controls segment sells customized products fabricated to order pursuant to a large number of smaller contracts with durations of two to three months, with occasional large systems projects of longer duration. The segment does not produce standard units or maintain an inventory of products for sale. Due to the nature of the segment's equipment fabrication and sales operations, and the potential for wide variations in our results of operations that could occur from applying the as shipped methodology to smaller contracts for these customized, fabricated goods, this segment recognizes revenues, regardless of contract value or duration, applying the percentage of completion method. For the six months ended June 30, 2007, approximately 55.5% of total Company revenues were recorded on an as shipped or as performed basis and approximately 44.5% were recorded using the percentage of completion method.

With respect to contract revenues recorded utilizing the percentage of completion method, earned revenue is based on the percentage that costs incurred to date relate to total estimated costs of the project, after giving effect to the most recent estimates of total cost. Total estimated contract cost is a critical accounting estimate because it can materially affect revenue and net income and it requires us to make judgments about matters that are uncertain. Total costs expected to be incurred, and therefore recognition of revenue, could be affected by various internal or external factors including, but not limited to: changes in project scope (change orders), changes in productivity, scheduling, the cost and availability of labor, the cost and availability of raw materials, the weather, client delays in providing approvals at benchmark stages of the project and the timing of deliveries from third-party providers of key components. The cumulative impact of revisions in total cost estimates during the progress of work is reflected in the period in which these changes become known. Earned revenue reflects the original contract price adjusted for agreed claims and change order revenues, if applicable. Losses expected to be incurred on the jobs in progress, after consideration of estimated probable minimum recoveries from claims and change orders, are charged to income as soon as such losses are known. Claims for additional contract revenue are recognized if it is probable the claim will result in additional revenue and the amount can be reliably estimated. We generally recognize revenue and earnings to which the percentage of completion method applies over a period of two to six quarters. In the event a project is terminated by our customer before completion, our customer is liable for costs incurred under the contract. We believe our operating results should be evaluated over a term of one to three years to evaluate our performance under long-term contracts, after all change orders, scope changes and cost recoveries have been negotiated and realized.

Estimates are subjective in nature and it is possible that we could have used different estimates of total contract costs in our calculation of revenue recognized using the percentage of completion method. For the six months ended June 30, 2007, the Company had \$104.7 million in revenue attributable to open percentage completion projects having an aggregate gross profit percentage of 24%. If we had used a different estimate of total contract costs for each contract in progress at June 30, 2007, a 1% increase or decrease in the estimated margin earned on each contract would have increased or decreased each of total revenue and pre-tax income for the six months ended June 30, 2007, by approximately \$1.4 million. At June 30, 2007, the Company had three open contracts in an aggregate loss position, with an estimated total loss of \$2.3 million, of which \$1.8 million was provided for in previous periods.

Goodwill evaluation. As required by SFAS No. 142, Goodwill and Other Intangible Assets, we evaluate goodwill annually for impairment by comparing the fair value of operating assets to the carrying value of those assets, including any related goodwill. As required by SFAS No. 142, we identified separate reporting units for purposes of this evaluation. We used our segments as the reporting units, and tested the segments as of December 31, 2006. In determining carrying value, we segregated assets and liabilities that, to the extent

Table of Contents

possible, are clearly identifiable by specific reporting unit. Certain corporate and other assets and liabilities, that are not clearly identifiable by specific reporting unit, are allocated as permitted by the standard. Fair value is determined by discounting projected future cash flows using our weighted average cost of capital, as calculated. In determining projected future cash flows for each segment, we make assumptions regarding the following key indicators: future market and sales growth rates (domestic and international), cost inflation, margin expectations, working capital, capital expenditure levels and tax levels. The fair value is then compared to the carrying value of the reporting unit to determine whether or not impairment has occurred at the reporting unit level. In the event an impairment is indicated, an additional test is performed whereby an implied fair value of goodwill is determined through an allocation of the fair value to the reporting unit's assets and liabilities, whether recognized or unrecognized, in a manner similar to a purchase price allocation, in accordance with SFAS No. 141, Business Combinations. Any residual fair value after this purchase price allocation would be assumed to relate to goodwill. If the carrying value of the goodwill exceeded the residual fair value, we would record an impairment charge for that amount.

In accordance with SFAS No. 142, the Company tested each business segment for impairment of goodwill at December 31, 2006, and, based upon the results of this testing, management determined that goodwill was not impaired. The Company will test each business segment for goodwill impairment annually, as required by the pronouncement, or more frequently if there are indications of goodwill impairment. No additional testing was performed during the six months ended June 30, 2007, as management noted no indications of goodwill impairment.

Net goodwill of \$80.9 million at December 31, 2006, was comprised of \$47.4 million, \$29.1 million and \$4.4 million for the Oil & Water Technologies, Gas Technologies and Automation & Controls reporting units, respectively. Net goodwill of \$81.5 million at June 30, 2007, was comprised of \$47.8 million, \$29.3 million and \$4.4 million for the Oil & Water Technologies, Gas Technologies and Automation & Controls reporting units, respectively. The increase in net goodwill of \$653,000 was due to the changes in foreign currency.

Deferred Income Tax Assets: Valuation Allowance. Based upon the level of historical taxable income and projected future taxable income over the periods to which our deferred tax assets are deductible in the applicable tax jurisdictions, we believe it is more likely than not we will realize the benefits of our deferred tax assets, net of the existing valuation allowance at June 30, 2007. However, the amount of the deferred tax asset is considered realizable, and thus the amount of these valuation allowances could change if future taxable income differs from our projections in the applicable tax jurisdictions. In certain foreign tax jurisdictions, we are not able to rely on projections of future taxable income to determine the realizability of our deductible differences and carryforwards. At June 30, 2007, a valuation allowance of \$113,000 had been recorded to offset deferred tax assets in these foreign jurisdictions.

Recent Accounting Pronouncements

In June 2006, the FASB issued FIN 48, Accounting for Uncertainty in Income Taxes. This interpretation clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, Accounting for Income Taxes. FIN 48 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return as well as provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. Effective January 1, 2007, the Company adopted the provisions of FIN 48. The Company determined that there was no cumulative effect on our financial statements related to adopting FIN 48.

In September 2006, the FASB issued Staff Position (FSP) No. AUG AIR-1, Accounting for Planned Major Maintenance Activities, which prohibits the use of the accrue-in-advance method of accounting for planned major maintenance activities in annual and interim financial reporting periods. FSP No. AUG AIR-1 is effective for the fiscal year beginning after December 15, 2006. The Company adopted FSP No. AUG AIR-1 on January 1, 2007. The impact of the application of this FSP is discussed in Note 3, Change in Accounting Principle.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements, which will become effective as of January 1, 2008. SFAS No. 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and expands disclosures of fair value measurements. The Company is in the process of evaluating the impact, if any, of this standard on its consolidated results of operations, financial positions or cash flows and will adopt it on January 1, 2008.

In February 2007, the FASB issued FSP No. FAS 158-1, Conforming Amendments to the Illustrations in FASB Statements No. 87, No. 88 and No. 106 and to the Related Staff Implementation Guides. This FSP provides (1) updated illustrations contained in Appendix B of Statement 87, Appendix B of Statement 87 and Appendix C of Statement 106 which were amended by Statement 158 and (2) updated questions and answers in all previous FASB Special Reports related to Statement 87, 88 and 106. FSP No. FAS 158-1 became effective as of the effective date of Statement 158 of December 31, 2006. There was no impact on the Company's consolidated results of operations, financial position or cash flows resulting from the adoption of FSP No. FAS 158-1.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities, including an amendment to FASB Statement No. 115, which permits entities the option to measure eligible items at fair value at specified election dates. SFAS No. 159 is effective as of January 1, 2008 with early adoption permitted. Under the standard, a business entity shall report unrealized gains and losses on items for which the fair value has been elected in earnings at each subsequent reporting date. The Company is currently assessing the impact, if any, of the adoption of SFAS No. 159 on its consolidated financial position and results of operations.

Industry and Business Environment

Our revenue and results of operations are closely tied to demand for oil and gas products and spending by oil and gas companies for exploration and development of oil and gas reserves. These companies generally invest more in exploration and development efforts during periods of favorable oil and gas commodity prices, and invest less during periods of unfavorable oil and gas prices. As supply and demand change, commodity prices fluctuate, producing cyclical trends in the industry. During periods of lower demand, revenue for service providers such as NATCO generally decline, as existing projects are completed, new projects are postponed and pricing decreases due to competitive pressures. During periods of recovery, revenue for process equipment providers can lag behind the industry due to the timing of new project awards.

Changes in commodity prices, rig count and wells completed impact our business. The following table summarizes the average price of domestic crude oil and Brent crude oil per barrel, the average wellhead price of natural gas per thousand cubic feet (Mcf), as published by the U.S. Department of Energy; the number of rotary drilling rigs in operation, as published by Baker Hughes Incorporated, for the six months ended June 30, 2007 and 2006 and for the years ended December 31, 2006 and 2005:

	Six Months Ended June 30,		Twelve Months Ended December 31,	
	2007	2006	2006	2005
Average price of crude oil per barrel in the U.S.	\$ 61.53	\$ 66.89	\$ 66.06	\$ 56.54
Average price of Brent crude oil per barrel	\$ 63.17	\$ 65.69	\$ 65.19	\$ 54.47
Average wellhead price of natural gas per Mcf in the U.S.	\$ 6.64	\$ 6.84	\$ 6.41	\$ 7.52
Average U.S. rig count	1,745	1,576	1,648	1,380
Average international rig count (excludes North America) ⁽¹⁾	992	904	925	850

⁽¹⁾ The Iran and Sudan rig counts were discontinued from the Baker Hughes publication beginning January 2006. For comparative purposes, the 2005 rig count numbers presented above exclude Iran and Sudan.

We view operating rig counts as a benchmark of spending in the US oil and gas industry for exploration and development efforts. Our standard and traditional equipment sales, parts and services business generally

Table of Contents

correlates to changes in rig activity and more specifically the number of wells completed. From a longer-term perspective, the US Department of Energy projects that worldwide petroleum and natural gas consumption is projected to increase at an average annual growth rate of 1.4% from 2003 through 2030, with higher consumption rates expected in the emerging economies, particularly in Asia (including China and India), where 43% of the total increase in world oil use is projected. As worldwide demand grows, producers in the oil and gas industry will increasingly rely on non-traditional sources of energy supply and expansion into new markets. As a result, additional and more complex equipment may be required from equipment and service suppliers to produce oil and gas from these fields, especially since many new oil and gas fields produce lower quality or contaminated hydrocarbon streams, requiring more complex production equipment. In general, these trends should increase the demand for our products and services.

Results of Operations

The following discussion of our historical results of operations and financial condition should be read in conjunction with our consolidated financial statements and related notes.

Oil & Water Technologies Segment

	Three Months Ended			Percentage Change
	June 30,			
	2007	2006 (unaudited)	Change

Gross profit	\$ 25,102	\$ 21,159	\$ 3,943	19%
Gross profit percentage	26%	22%	4%	18%

Oil & Water Technologies segment revenue decreased slightly for the three months ended June 30, 2007 compared to the three months ended June 30, 2006. This was attributable to a decrease in built-to-order project business activity due to timing delays of project awards partially offset by the continued strength in sales of our standard and traditional equipment and services.

Edgar Filing: NATCO GROUP INC - Form 10-Q

Inter-segment revenue for this segment was \$349,000 for the three months ended June 30, 2007 compared to \$4.0 million for the three months ended June 30, 2006.

Table of Contents

Gross profit for the Oil & Water Technologies segment increased \$3.9 million, or 19%, for the three months ended June 30, 2007 compared to the three months ended June 30, 2006. Of this increase, \$2.9 million was attributable to higher sales activity and improved execution in our standard and traditional product line including favorable product mix of our higher margin export business. Additionally, there was a \$1.0 million loss provision recorded in the quarter ended June 30, 2006 related to projected cost overruns on one of our built-to-order projects. Gross profit percentage was 26% and 22% for the three month periods ended June 30, 2007 and 2006, respectively.

Gas Technologies Segment

	Three Months Ended June 30,			Percentage
	2007	2006 As Adjusted (Note 3)	Change	Change
	(unaudited)

Revenue	\$ 20,595	\$ 16,779	\$ 3,816	23%
Cost of goods sold and services	11,769	7,688	4,081	53%
Gross profit	\$ 8,826	\$ 9,091	\$ (265)	(3)%

Gross profit percentage 43% 54% (11)% (20)%
 Revenue of \$20.6 million for the three months ended June 30, 2007 for the Gas Technologies segment increased \$3.8 million, or 23%, compared to \$16.8 million for the three months ended June 30, 2006. This increase was due to higher built-to-order project activity of \$5.6 million and increased throughput from our gas processing facilities in West Texas of \$1.3 million, partially offset by \$3.0 million of membrane replacement sales in the prior year's quarter. There was no inter-segment revenue for this business segment for the three months ended June 30, 2007 and 2006.

Gross profit for the Gas Technologies segment for the three months ended June 30, 2007 decreased \$265,000, or 3%, compared to the three months ended June 30, 2006. This decrease was due to the revenue mix which had a higher concentration of lower margin built-to-order projects in the current period partially offset by higher throughput at the Company's COgas processing facilities in West Texas. Gross profit percentage for Gas Technologies was 43% and 54% for the three-month periods ended June 30, 2007 and 2006, respectively. The decrease in gross profit percentage was attributable to the revenue mix which had a higher concentration of lower margin built-to-order projects in the period, as compared to relative higher contribution membrane replacement sales included in the prior year period.

Automation & Controls Segment

	Three Months Ended June 30,			Percentage
	2007	2006	Change	Change
	(unaudited)

 Revenue for the Automation & Controls segment was \$26.4 million, an increase of \$4.6 million, or 21%, for the three months ended June 30, 2007, compared to \$21.8 million for the three months ended June 30, 2006. This increase was primarily due to increased international field service activity of \$8.4 million, partially offset by a

Table of Contents

reduction in field service activity in the Gulf of Mexico of approximately \$3.8 million. Inter-segment revenue for this segment was \$1.1 million for the three months ended June 30, 2007, compared to \$1.5 million for the three months ended June 30, 2006.

Gross profit for the Automation & Controls segment increased \$1.8 million for the three months ended June 30, 2007 compared to the three months ended June 30, 2006. Of this increase, approximately \$1.0 million was due to the increased revenue and \$844,000 was due to the higher margin international field service activity.

Other Items

Selling, General and Administrative Expense. Selling, general and administrative expense was \$20.5 million for the three months ended June 30, 2007, an increase of \$3.8 million, or 23%, compared to the three months ended June 30, 2006. This was primarily due to an increase of \$600,000 in selling and pre-order engineering services and \$1.0 million in higher support expenses resulting from increased business activity. Additionally there was approximately \$1.7 million mainly in higher compensation costs associated with increased headcount, employee retention programs and share-based incentive compensation, all of which resulted from the increased business activity.

Depreciation and Amortization Expense. Depreciation and amortization expense was \$1.5 million for the three months ended June 30, 2007, an increase of \$83,000, or 6%, compared to the three months ended June 30, 2006.

Interest Expense. Interest expense was \$37,000 and \$727,000 for the three months ended June 30, 2007 and 2006, respectively. This decrease of \$690,000 was due to having no outstanding borrowings related to debt in the 2007 period. The \$37,000 interest expense consisted of amortization of deferred financing fees and commitment fees paid for the unused portion of the Company's lines of credit.

Interest Income. Interest income of \$621,000 for the three months ended June 30, 2007, an increase of \$566,000 over the prior year period, resulted from the increase in cash as a result of higher earnings and cashflow.

Closure, severance and other. Closure, severance and other for the three months ended June 30, 2007 was income of \$227,000. This amount included a gain associated with the settlement of the UK office lease obligation of \$247,000 and a valuation adjustment charge of \$20,000. The closure, severance and other of \$193,000 for the three months ended June 30, 2006 represented the valuation charges related to severance expense associated with a former employee of a restructuring plan initiated in 2004.

Other, net. Other, net was a net expense of \$735,000 and \$628,000 for the three months ended June 30, 2007 and 2006, respectively. The increase of \$107,000 year over year was due to a decrease of \$38,000 in net realized and unrealized foreign exchange losses, offset by an increase of \$145,000 in net periodic cost on postretirement benefit liability due to a cumulative adjustment made in the three months ended June 30, 2007 to adjust the postretirement liability.

Income Tax Provision. Income tax expense for the three months ended June 30, 2007 was \$6.6 million compared to \$5.9 million for the three months ended June 30, 2006. The change in tax expense was primarily attributable to an increase in pre-tax income to \$18.7 million for the three months ended June 30, 2007 from pre-tax income of \$15.5 million for the three months ended June 30, 2006. The effective tax rate for the three months ended June 30, 2007 was 35.2% compared to 38.0% for the three months ended June 30, 2006. The effective tax rate was higher for the three months ended June 30, 2006 primarily as a result of our recording an increase in the valuation allowance related to deferred tax assets of our UK operations.

Preferred Stock Dividends. We recorded preferred stock dividends totaling \$375,000 for each of the three months ended June 30, 2007 and 2006 related to our Series B Redeemable Convertible Preferred Stock.

Gross profit	\$ 48,111	\$ 40,380	\$ 7,731	19%
Gross profit percentage	26%	22%	4%	18%

Oil & Water Technologies segment revenue increased \$3.8 million, or 2%, for the six months ended June 30, 2007, compared to the six months ended June 30, 2006. This increase was primarily attributable to the continued strength in domestic sales of our standard and traditional equipment and services along with higher export sales of new and used equipment.

Inter-segment revenue for this business segment was \$542,000 for the six months ended June 30, 2007, compared to \$4.0 million for the six months ended June 30, 2006.

Gross profit for the Oil & Water Technologies segment increased \$7.7 million, or 19%, for the six months ended June 30, 2007, compared to the six months ended June 30, 2006. This increase is primarily attributed to the higher sales activity and improved execution in our standard and traditional product lines including favorable product mix of our higher margin export business. Additionally, there was a \$1.0 million loss provision recorded in the prior year's quarter ended June 30, 2006 related to projected cost overruns on one of our built-to-order projects. Gross profit percentage was 26% and 22% for the six month periods ended June 30, 2007 and 2006, respectively.

Gross profit	\$ 17,193	\$ 16,645	\$ 548	3%
Gross profit percentage	47%	56%	9%	16%

Revenue of \$36.7 million for the six months ended June 30, 2007 for the Gas Technologies segment increased \$7.3 million, or 25%, compared to \$29.5 million for the six months ended June 30, 2006. This increase was due to higher built-to-order project activity of \$8.4 million and \$1.9 million of increased throughput from our gas processing facilities in West Texas partially offset by a decrease of approximately \$3.0 million of membrane replacement sales in the prior year. There was no inter-segment revenue for this business segment for the six months ended June 30, 2007 and 2006.

Gross profit for the Gas Technologies segment for the six months ended June 30, 2007 increased \$548,000, or 3%, compared to the six months ended June 30, 2006. This increase was due to higher contribution from CO₂ membrane built-to-order projects and higher throughput at the Company's CO₂ gas processing facilities in West Texas. Gross profit percentage for Gas Technologies was 47% and 56% for the six-month periods ended June 30, 2007 and 2006, respectively. The decrease in gross profit percentage was attributable to the revenue mix which had a higher concentration of lower margin built-to-order projects in the period, as compared to relative higher contribution membrane replacement sales included in the prior year period.

Automation & Controls Segment

	Six Months Ended June 30,			Percentage
	2007	2006 (unaudited)	Change	Change

Gross profit	\$ 11,378	\$ 9,483	\$ 1,895	20%
Gross profit percentage	23%	22%	1%	5%

Revenue for the Automation & Controls segment was \$49.5 million, an increase of \$6.8 million, or 16%, for the six months ended June 30, 2007, compared to \$42.7 million for the six months ended June 30, 2006. This increase was primarily due to increased international field service activity of \$14.2 million, partially offset by a reduction in field service activity in the Gulf of Mexico of approximately \$7.4 million. Inter-segment revenue for this business segment was \$2.0 million for the six months ended June 30, 2007, compared to \$2.3 million for the six months ended June 30, 2006.

Gross profit for the Automation & Controls segment increased \$1.9 million for the six months ended June 30, 2007 compared to the six months ended June 31, 2006. Gross profit percentage was 23% and 22% for the six months ended June 30, 2007 and 2006, respectively. This increase was due primarily to the increased sales volume in our higher margin international field service activity.

Table of Contents**Other Items**

Selling, General and Administrative Expense. Selling, general and administrative expense was \$40.9 million for the six months ended June 30, 2007, an increase of \$7.2 million, or 21%, compared to the six months ended June 30, 2006. This increase was due to an increase of \$400,000 in selling and pre-order engineering services and \$2.2 million in higher support expenses related to increased business activity. Additionally there was approximately \$3.7 million mainly in higher compensation costs associated with increased headcount, employee retention programs and share-based incentive compensation, all of which resulted from the increased business activity.

Depreciation and Amortization Expense. Depreciation and amortization expense was \$2.9 million for the six months ended June 30, 2007, an increase of \$26,000, or 1%, compared to the six months ended June 30, 2006.

Interest Expense. Interest expense decreased from \$1.4 million to \$180,000 in the six months ended June 30, 2007 and 2006 as the Company paid down its debt throughout the last six months of 2006. The \$180,000 interest expense consisted of amortization of deferred financing fees and commitment fees paid for the unused portion of the Company's lines of credit.

Interest Income. Interest income of \$962,000 for the six months ended June 30, 2007, increased by \$843,000 year over year due to the increase in cash as a result of higher earnings and cashflow.

Closure, severance and other. Closure, severance and other was income of \$227,000 for the six months ended June 30, 2007 included a gain associated with the settlement of the UK office lease obligation of \$247,000 and a valuation adjustment charge of \$20,000. The closure, severance and other of \$244,000 for the six months ended June 30, 2006 represented the valuation charges related to severance expense associated with a former employee of a restructuring plan initiated in 2004.

Other, net. Other, net was a net expense of approximately \$1.3 million for the six months ended June 30, 2007, consisting of \$115,000 in net periodic cost of postretirement benefit liability and \$1.2 million related to net realized and unrealized foreign exchange transaction losses. Other, net was a net expense of \$229,000 for the six months ended June 30, 2006, consisting of net periodic cost on postretirement liability of \$100,000 and a net realized and unrealized foreign exchange transaction loss of \$129,000.

Income Tax Provision. Income tax expense for the six months ended June 30, 2007 was \$11.6 million compared to \$10.7 million for the six months ended June 30, 2006. The change in tax expense was primarily attributable to an increase in pre-tax income to \$32.6 million for the six months ended June 30, 2007 from pre-tax income of \$28.2 million for the six months ended June 30, 2006. The effective tax rate for the six months ended June 30, 2007 was 35.8% compared to 38.0% for the six months ended June 30, 2006. The effective tax rate was higher for the six months ended June 30, 2006 primarily as a result of our recording an increase in the valuation allowance related to deferred tax assets of our UK operations.

Preferred Stock Dividends. We recorded preferred stock dividends totaling \$750,000 for each of the six months ended June 30, 2007 and 2006 related to our Series B Redeemable Convertible Preferred Stock.

Our bookings were \$121.4 million and \$160.9 million for the three months ended June 30, 2007 and 2006, respectively and \$255.2 million compared to \$315.2 million for the six months ended June 30, 2007 and 2006, respectively. Bookings for the three and six months ended June 30, 2007 decreased \$389,000 and \$26.4 million, respectively, in the Oil & Water Technologies segment as a result of delays in standard and traditional and built-to-order project awards. In the Gas Technologies segment, the decrease of \$48.1 million and \$47.7 million in the three and six months ended June 30, 2007 and 2006, respectively, related essentially to the \$46.4 million Southeast Asian CO₂ membrane project awarded in the second quarter of 2006. Bookings increased by \$9.0 million and \$14.0 million in the Automation & Controls segment in the three and six months ended June 30, 2007, respectively, from the same periods in 2006 primarily due to an increase in international project awards in 2007.

The Company's backlog as of June 30, 2007 and 2006 was:

The Company's backlog, at any time, represents the accumulation of firm order bookings less revenue recognized.

Liquidity and Capital Resources*Cash and Cash Equivalents*

As of June 30, 2007 and December 31, 2006, we had cash and cash equivalents of \$52.6 million and \$35.2 million, respectively.

Working Capital

As of June 30, 2007, we had \$100.4 million working capital, compared to \$77.8 million at December 31, 2006, an increase of \$22.6 million, or 29%. This increase was due primarily to increases in cash and cash equivalents of \$17.4 million, trade accounts receivable of \$9.5 million, inventory of \$5.3 million and deferred income taxes and other of \$1.3 million, offset by a net increase in current liabilities of \$11.0 million. The increase in liabilities consisted primarily of increases in trade accounts payable, customer advanced billings and payments and income taxes payable.

Net cash provided by operating activities for the six months ended June 30, 2007 was \$20.2 million compared to \$9.3 million for the six months ended June 30, 2006, an increase of \$10.9 million. This increase was largely due to the \$9.0 million decrease in working capital, excluding cash, in the six months ended June 30, 2007 versus 2006, along with \$3.4 million increase in net income partially offset by a \$1.8 million decrease for non-cash items.

Net cash used in investing activities was \$5.7 million for the six months ended June 30, 2007 compared to \$2.9 million for the six months ended June 30, 2006. The primary use of funds for the six months ended June 30, 2007 was other long-term intangible assets of \$376,000 and capital expenditures of \$5.4 million. This amount consisted mainly of \$3.3 million for equipment maintenance and \$2.1 million to increase the productivity and expansion of our facilities. The primary use of funds for the six months ended June 30, 2006 was for capital expenditures of \$2.5 million and investment in other long-term intangible assets of \$412,000.

Net cash provided by financing activities for the six months ended June 30, 2007 was \$2.2 million compared to \$6.9 million used in financing activities for the six months ended June 30, 2006. Cash used in financing activities decreased significantly from the 2006 period following the payment of outstanding debt balances under our revolving credit facilities in the last six months of 2006. The primary source of cash for the six months ended June 30, 2007 was \$1.0 million of proceeds from stock issuances related to stock options and an associated excess tax benefit of share-based compensation of \$1.1 million. The primary use of cash for the six months ended June 30, 2006 was repayment of debt under revolving lines of credit and long-term debt totaling \$7.6 million, of which \$4.4 million represented prepayment of our 2004 term loan and revolving credit facilities, \$2.9 million related to bank overdrafts and \$750,000 related to dividends paid to our preferred stockholders. Sources of cash for the six months ended June 30, 2006 were \$2.1 million of proceeds from the exercise of stock options along with \$2.3 million attributable to excess tax benefit stock options exercised and restricted stock vested.

Debt Facilities

In July 2006, the Company terminated its 2004 term loan and revolving credit facilities and entered into a new 2006 revolving credit facilities agreement with a maturity of June 15, 2010 and a total borrowing capacity of \$85.0 million. The Company pays commitment fees on the undrawn portion of these facilities, depending upon the ratio of Funded Debt to EBITDA, which was calculated at 0.25% at June 30, 2007. Availability under our credit facilities is reduced by the amount of outstanding letters of credit and borrowings. There were no borrowings outstanding under these facilities as of December 31, 2006 or June 30, 2007.

In June 2007, the Company renewed its export sales credit facility with a total borrowing capacity of \$10.0 million. The facility, which will expire on June 15, 2010, is partially guaranteed by the US Export-Import Bank and is subject to certain borrowing base limitations. Interest on borrowings under the facility is either (1) Bank of America's prime rate less 0.50% or (2) the London Interbank Offered Rate plus 1.35%, at the company's election. The Company pays an annual fee of \$75,000. The facility is available for borrowing and letters of credit. As of June 30, 2007 there was no indebtedness or letters of credit outstanding under this facility.

The Company had letters of credit outstanding of \$16.9 million under the revolving credit facilities and a total available borrowing capacity of \$78.1 million at June 30, 2007. The letters of credit, which support contract performance and warranties, expire at various dates through December 8, 2011. Fees related to these letters of credit were approximately 1.0% of the outstanding balance at June 30, 2007. As of June 30, 2007, the Company had unsecured letters of credit and bonds totaling \$568,000.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our operations are conducted around the world in a number of different countries. Accordingly, our earnings and cash flow are exposed to changes in foreign currency exchange rates. The majority of our foreign currency transactions relate to operations in Canada, UK and Japan. In Canada, most contracts are denominated

Table of Contents

in Canadian dollars, and most of the costs incurred are in Canadian dollars, which mitigates risks associated with currency fluctuations. In the UK, many of our sales contracts and material purchases are denominated in a currency other than British pounds sterling, primarily US dollars and Euros, whereas our engineering and overhead costs are principally denominated in British pounds sterling. In Japan, most contracts are denominated in US dollars and most costs incurred are in Japanese Yen.

We attempt to minimize our exposure to foreign currency exchange rate risk by requiring settlement in our functional currencies, when possible. We do not currently enter into forward contracts or other currency-related derivative hedge arrangements.

Our financial instruments are subject to changes in interest rates, including our revolving credit facilities and our export sales credit facility. At June 30, 2007, we had no borrowings outstanding under our active credit facilities. Based on past market movements and possible near-term market movements, we do not believe that potential near-term losses in future earnings, fair values or cash flows from changes in interest rates are likely to be material.

Item 4. Controls and Procedures

We maintain controls and procedures designed to ensure that the information that we are required to disclose in the reports we file with or submit to the SEC under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

There was no change in our internal control over financial reporting that occurred during the period covered by this Quarterly Report on Form 10-Q that has materially affected, or is reasonably likely to materially affect our internal control over financial reporting. It should be noted that the design of any system of internal control is based, in part, upon assumptions about the likelihood of certain future events, and there can be no assurance that any design will be successful in achieving its stated objectives under all potential future conditions, regardless of how remote. In addition, an internal control system, no matter how well conceived and operated, can only provide reasonable, not absolute, assurance the objectives of the internal control system will be met. Therefore, we do not expect our disclosure controls to prevent all errors and fraud.

As of June 30, 2007, we carried out an evaluation, with the participation of our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of our disclosure controls and procedures, (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended). Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of June 30, 2007.

Table of Contents**PART II OTHER INFORMATION****Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

The following table summarizes the surrenders of the Company's equity securities during the three months ended June 30, 2007:

Period	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share ⁽²⁾	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet be Purchased Under the Plans or Programs
April 1 to 30, 2007				
May 1 to 31, 2007				
June 1 to 30, 2007	150	\$ 44.005		
Three months ended June 30, 2007	150	\$ 44.005		

⁽¹⁾ This acquisition of equity securities was the result of the surrender of restricted stock to pay required tax withholding on the lapse of restrictions on the restricted stock, pursuant to the terms of the Company's shareholder approved equity compensation plans and the terms of the equity grants pursuant to those plans.

⁽²⁾ The purchase price of a share of stock used for tax withholding is the amount of the stock on the date of lapse of the restrictions of the restricted stock, based on the average of the high and low reported sales prices of the Company's common stock on that date.
