Notes to Condensed Consolidated Financial Statements

1. Summary of Business and Significant Accounting Policies

Description of Business

Salesforce.com, inc. (the Company) is the leading provider, based on market share, of application services that allow organizations to easily share customer information on demand, according to a December 2006 report by International Data Corporation. It provides a comprehensive customer relationship management (CRM) service to businesses of all sizes and industries worldwide. The Company began to offer its on-demand application service on a subscription basis in February 2000. The Company conducts its business worldwide.

Fiscal Year

The Company's fiscal year ends on January 31. References to fiscal 2008, for example, refer to the fiscal year ending January 31, 2008.

Basis of Presentation

The accompanying condensed consolidated balance sheet as of July 31, 2007 and the condensed consolidated statements of operations and the condensed consolidated statements of cash flows for the three and six months ended July 31, 2007 and 2006, respectively, are unaudited. The condensed consolidated balance sheet data as of January 31, 2007 was derived from the audited consolidated financial statements which are included in the Company's Form 10-K for the fiscal year ended January 31, 2007, which was filed with the Securities and Exchange Commission (the SEC) on March 9, 2007. The accompanying statements should be read in conjunction with the audited consolidated financial statements and related notes contained in the Company's fiscal 2007 Form 10-K.

The accompanying condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles, or GAAP, for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the financial information and footnotes required by GAAP for complete financial statements. In the opinion of the Company's management, the unaudited condensed consolidated financial statements have been prepared on the same basis as the audited consolidated financial statements in the Form 10-K, and include all adjustments necessary for the fair presentation of the Company's statement of financial position as of July 31, 2007, and its results of operations and its cash flows for the three and six months ended July 31, 2007 and 2006. All adjustments are of a normal recurring nature. The results for the three and six months ended July 31, 2007 are not necessarily indicative of the results to be expected for any subsequent quarter or for the fiscal year ending January 31, 2008.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions in the Company's consolidated financial statements and notes thereto.

Significant estimates and assumptions made by management include the determination of the provision for income taxes and the fair value of stock awards issued. Actual results could differ from those estimates.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

Table of Contents

salesforce.com, inc.

Notes to Condensed Consolidated Financial Statements (Continued)

Additionally, the Company holds a majority interest in Kabushiki Kaisha salesforce.com (Salesforce Japan), a Japanese joint venture. As of July 31, 2007, the Company owned a 65 percent interest in the joint venture. Given the Company's majority ownership interest in the joint venture, the accounts of the joint venture have been consolidated with the accounts of the Company, and a minority interest has been recorded for the minority investors' interests in the net assets and operations of the joint venture to the extent of the minority investors' individual investments. Additionally, the Company records gains and losses resulting from the change of interest in Salesforce Japan directly to stockholders' equity as additional paid-in capital.

Segments

The Company operates in one segment.

Foreign Currency Translation

The functional currency of the Company's major foreign subsidiaries is generally the local currency. Adjustments resulting from translating foreign functional currency financial statements into U.S. dollars are recorded as part of a separate component of stockholders' equity. Foreign currency transaction gains and losses are included in net income for the period. All assets and liabilities denominated in a foreign currency are translated into U.S. dollars at the exchange rate on the balance sheet date as quoted on the Federal Reserve Bank of New York. Revenues and expenses are translated at the average exchange rate during the period. Equity transactions are translated using historical exchange rates.

Concentrations of Credit Risk and Significant Customers and Suppliers

The Company's financial instruments that are exposed to concentrations of credit risk consist primarily of cash and cash equivalents, marketable securities and trade accounts receivable. Although the Company deposits its cash with multiple financial institutions, its deposits, at times, may exceed federally insured limits. Collateral is not required for accounts receivable. The Company maintains an allowance for doubtful accounts receivable balances. The allowance is based upon historical loss patterns, the number of days that billings are past due and an evaluation of the potential risk of loss associated with delinquent accounts.

The Company's accounts receivable and net revenues are derived from a large number of direct customers. No customer accounted for more than 5 percent of accounts receivable at July 31, 2007 and January 31, 2007. No single customer accounted for 5 percent or more of total revenue during the three and six month periods ended July 31, 2007 and 2006.

As of July 31, 2007 and January 31, 2007, assets located outside the Americas were 13 percent and 12 percent of total assets, respectively. Revenues by geographical region are as follows (in thousands):

	Three months ended		Six months ended	
	July 31,		July 31,	
	2007	2006	2007	2006
Revenues by geography:				
Americas	\$ 133,343	\$ 92,553	\$ 257,795	\$ 175,578
Europe	29,160	17,624	54,734	32,574
Asia Pacific	14,076	7,960	26,462	14,671
	\$ 176,579	\$ 118,137	\$ 338,991	\$ 222,823

Table of Contents

salesforce.com, inc.

Notes to Condensed Consolidated Financial Statements (Continued)***Cash and Cash Equivalents***

The Company considers all highly liquid investments purchased with an original maturity of three months or less to be cash equivalents. Cash and cash equivalents, which primarily consist of cash on deposit with banks and money market funds, are stated at cost, which approximates fair value.

Marketable Securities

Management determines the appropriate classification of investments in marketable securities at the time of purchase in accordance with Statement of Financial Accounting Standards No. 115, *Accounting for Certain Investments in Debt and Equity Securities* and reevaluates such determination at each balance sheet date. Securities, which are classified as available for sale as of July 31, 2007 and January 31, 2007, are carried at fair value, with the unrealized gains and losses, net of tax, reported as a separate component of stockholders' equity. Fair value is determined based on quoted market rates. Realized gains and losses and declines in value judged to be other-than-temporary on securities available for sale are included as a component of interest income. The cost of securities sold is based on the specific-identification method. Interest on securities classified as available for sale is also included as a component of interest income.

Comprehensive Income (Loss)

Comprehensive income (loss) consists of net income and other comprehensive income (loss), which includes certain changes in equity that is excluded from net income. Specifically, cumulative foreign currency translation and unrealized gains and losses on marketable securities adjustments, net of tax, are included in accumulated other comprehensive loss. Comprehensive income (loss) has been reflected in stockholders' equity.

Comprehensive income (loss) consisted of the following (in thousands):

	Three months ended July 31,		Six months ended July 31,	
	2007	2006	2007	2006
Net income (loss)	\$ 3,735	\$ (145)	\$ 4,465	\$ (374)
Translation adjustment	65	(326)	(298)	(477)
Unrealized gain (loss) on marketable securities	(72)	224	391	222
Total comprehensive income (loss)	\$ 3,728	\$ (247)	\$ 4,558	\$ (629)

The components of accumulated other comprehensive loss were as follows (in thousands):

	July 31,	January 31,
	2007 (unaudited)	2007
Foreign currency translation adjustments	\$ (1,677)	\$ (1,379)
Net unrealized losses on marketable securities	(417)	(808)
	\$ (2,094)	\$ (2,187)

Net Income (Loss) Per Share

Basic net income (loss) per share is computed by dividing net income (loss) by the weighted-average number of common shares outstanding for the fiscal period. Diluted net income (loss) per share is computed giving effect to all potential dilutive common stock, including options and restricted stock units. The dilutive effect of outstanding awards is reflected in diluted earnings per share by application of the treasury stock method.

Table of Contents

salesforce.com, inc.

Notes to Condensed Consolidated Financial Statements (Continued)

A reconciliation of the denominator used in the calculation of basic and diluted net income (loss) per share is as follows (in thousands):

	Three months ended July 31,		Six months ended July 31,	
	2007	2006	2007	2006
Numerator:				
Net income (loss)	\$ 3,735	\$ (145)	\$ 4,465	\$ (374)
Denominator:				
Weighted-average shares outstanding for basic earnings (loss) per share, net of weighted-average shares of common stock subject to repurchase	116,294	111,838	115,637	111,397
Effect of dilutive securities:				
Employee stock awards and warrants	5,039		5,356	
Adjusted weighted-average shares outstanding and assumed conversions for diluted earnings (loss) per share	121,333	111,838	120,993	111,397

Outstanding unvested common stock purchased by employees is subject to repurchase by the Company and therefore is not included in the calculation of the weighted-average shares outstanding for basic earnings (loss) per share.

The following were excluded from the computation of diluted shares outstanding as they would have had an anti-dilutive impact. In periods where the Company has a net loss, all dilutive securities are excluded. In periods where the Company has net income, the dilutive securities are excluded when, for example, their exercise prices are greater than the average fair values of the Company's common stock as follows (in thousands):

	Three months ended July 31,		Six months ended July 31,	
	2007	2006	2007	2006
Stock awards	3,541		3,557	

Income Taxes

The Company uses the liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are determined based on temporary differences between the financial statement and tax basis of assets and liabilities and net operating loss and credit carryforwards using enacted tax rates in effect for the year in which the differences are expected to reverse. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Valuation allowances are established when necessary to reduce deferred tax assets to the amounts more likely than not expected to be realized.

The total income tax benefit recognized in the accompanying consolidated statements of operations related to SFAS 123R was \$8.5 million and \$5.5 million during the six months ended July 31, 2007 and 2006, respectively.

Table of Contents

salesforce.com, inc.

Notes to Condensed Consolidated Financial Statements (Continued)

A reconciliation of income taxes at the statutory federal income tax rate to the provision for income taxes included in the accompanying condensed consolidated statements of operations is as follows (in thousands):

	Six months ended July 31,	
	2007	2006
U.S. federal taxes at statutory rate	\$ 5,086	\$ 1,501
State, net of the federal benefit	946	393
Foreign losses providing no benefit	1,563	1,293
Foreign taxes in excess of the U.S. statutory rate	880	648
Tax credits	(1,378)	(978)
Other	1,398	861
	\$ 8,495	\$ 3,718

The Company adopted the provisions of Financial Accounting Standards Board Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*, or Interpretation 48, on February 1, 2007. As a result of the implementation of Interpretation 48, the Company recorded a cumulative effect adjustment of \$0.3 million as an increase in the liability for unrecognized tax benefits, with a corresponding increase to the accumulated deficit balance. If recognized, \$5.7 million of the unrecognized tax benefits would reduce the Company's income tax expense and effective tax rate. Management does not believe that it is reasonably possible that the estimates of unrecognized tax benefits will change significantly in the next 12 months. Upon adoption of Interpretation 48, the Company also reclassified \$4.1 million of current income taxes payable to noncurrent income taxes payable since the Company cannot reasonably estimate the period of cash settlement, if any, with various taxing authorities.

The Company recognizes interest accrued related to unrecognized tax benefits in interest expense and penalties in tax provision. The Company has an insignificant amount of interest accrued as of July 31, 2007.

Tax positions for the Company and its subsidiaries are subject to income tax audits by many tax jurisdictions throughout the world. Tax returns for all tax years since February 1999, which was the inception of the Company, remain open to examination in all major jurisdictions where the Company operates, including the U.S., Europe and Asia Pacific.

Revenue Recognition

The Company derives its revenues from two sources: (1) subscription revenues, which are comprised of subscription fees from customers accessing its on-demand application service, and from customers purchasing additional support beyond the standard support that is included in the basic subscription fee; and (2) related professional services and other revenue. Other revenues consist primarily of training fees. Because the Company provides its application as a service, the Company follows the provisions of SEC Staff Accounting Bulletin No. 104, *Revenue Recognition* and Emerging Issues Task Force Issue No. 00-21, *Revenue Arrangements with Multiple Deliverables*. The Company recognizes revenue when all of the following conditions are met:

There is persuasive evidence of an arrangement;

The service has been provided to the customer;

Edgar Filing: SALESFORCE COM INC - Form 10-Q

The collection of the fees is reasonably assured; and

The amount of fees to be paid by the customer is fixed or determinable.

Table of Contents

salesforce.com, inc.

Notes to Condensed Consolidated Financial Statements (Continued)

The Company's arrangements do not contain general rights of return.

Subscription and support revenues are recognized ratably over the contract terms beginning on the commencement date of each contract. Amounts that have been invoiced are recorded in accounts receivable and in deferred revenue or revenue, depending on whether the revenue recognition criteria have been met.

Professional services and other revenues, when sold with subscription and support offerings, are accounted for separately when these services have value to the customer on a standalone basis and there is objective and reliable evidence of fair value of each deliverable. When accounted for separately, revenues are recognized as the services are rendered for time and material contracts, and when the milestones are achieved and accepted by the customer for fixed price contracts. The majority of the Company's consulting contracts are on a time and material basis. Training revenues are recognized after the services are performed. For revenue arrangements with multiple deliverables, such as an arrangement that includes subscription, premium support, consulting or training services, the Company allocates the total amount the customer will pay to the separate units of accounting based on their relative fair values, as determined by the price of the undelivered items when sold separately.

In determining whether the consulting services can be accounted for separately from subscription and support revenues, the Company considers the following factors for each consulting agreement: availability of the consulting services from other vendors, whether objective and reliable evidence for fair value exists for the undelivered elements, the nature of the consulting services, the timing of when the consulting contract was signed in comparison to the subscription service start date, and the contractual dependence of the subscription service on the customer's satisfaction with the consulting work. If a consulting arrangement does not qualify for separate accounting, the Company recognizes the consulting revenue ratably over the remaining term of the subscription contract. Additionally, in these situations, the Company defers only the direct costs of the consulting arrangement and amortizes those costs over the same time period as the consulting revenue is recognized. As of July 31, 2007 and January 31, 2007, the deferred cost on the accompanying condensed consolidated balance sheet totaled \$10,470,000 and \$5,232,000, respectively. These deferred costs are included in prepaid and other current assets and other assets.

Deferred Revenue

Deferred revenue primarily consists of billings or payments received in advance of revenue recognition from the Company's subscription service described above and is recognized as the revenue recognition criteria are met. The Company generally invoices its customers in annual or quarterly installments. Accordingly, the deferred revenue balance does not represent the total contract value of annual or multi-year, noncancelable subscription agreements.

Deferred Commissions

Deferred commissions are the incremental costs that are directly associated with noncancelable subscription contracts with customers and consist of sales commissions paid to the Company's direct sales force. The commissions are deferred and amortized over the noncancelable terms of the related customer contracts, which are typically 12 to 24 months. The commission payments are paid in full the month after the customer's service commences. The deferred commission amounts are recoverable through the future revenue streams under the noncancelable customer contracts. The Company believes this is the preferable method of accounting as the commission charges are so closely related to the revenue from the noncancelable customer contracts that they should be recorded as an asset and charged to expense over the same period that the subscription revenue is recognized. Amortization of deferred commissions is included in marketing and sales expense in the accompanying condensed consolidated statements of operations.

Notes to Condensed Consolidated Financial Statements (Continued)**Accounting for Stock-Based Compensation**

The Company accounts for stock-based expenses pursuant to the provisions of Statement of Financial Accounting Standards No. 123 (revised 2004), *Share-Based Payment*, or SFAS 123R, which requires that all share-based payments, including grants of employee stock options, be recognized as an expense in the statement of operations based on their fair values and vesting periods, which is 4 years.

The fair value of each option grant was estimated on the date of grant using the Black-Scholes option pricing model with the following assumptions and fair value per share:

	Three months ended July 31,		Six months ended July 31,	
	2007	2006	2007	2006
Volatility	46%	48%	46%	48-50%
Weighted-average estimated life	4 years	4 years	4 years	4 years
Weighted-average risk-free interest rate	4.46-4.55%	4.84-5.03%	4.41-4.55%	4.63-5.03%
Dividend yield				
Weighted-average fair value per share of grants	\$18.24	\$12.48	\$18.05	\$13.64

The expected life of options granted is based on the simplified calculation of expected life, described in SEC Staff Accounting Bulletin 107. Accordingly, the weighted-average estimated life assumption of 4 years is based on the average of the vesting term and the 5 year contractual lives of all options awarded after February 1, 2006. The weighted-average risk free interest rate is based on the rate for a 4 year U.S. government security at the time of the option grant.

The Company estimated its future stock price volatility considering both observed option-implied volatilities and historical volatility calculations for both the Company and a group of peer comparable companies. Management believes this is the best estimate of the expected volatility over the 4 year weighted-average expected life of its option grants.

During the three months ended July 31, 2007 and 2006, the Company capitalized \$606,000 and \$88,000, respectively, of stock-based expenses related to internal-use software development and deferred professional services costs, and \$1,172,000 and \$155,000 for the six months ended July 31, 2007 and 2006, respectively.

During the six months ended July 31, 2007, the Company recognized stock-based expense of \$25.4 million. As of July 31, 2007, the aggregate stock compensation remaining to be amortized to costs and expenses was \$160.6 million. The Company expects this stock compensation balance to be amortized as follows: \$31.5 million during the remaining six months of fiscal 2008; \$56.8 million during fiscal 2009; \$46.0 million during fiscal 2010; \$24.4 million during fiscal 2011; and \$1.9 million during fiscal 2012. The expected amortization reflects only outstanding stock awards as of July 31, 2007 and assumes no forfeiture activity. We expect to continue to issue share-based awards to our employees in future periods.

The Company grants stock options and restricted stock units to employees throughout the world. In certain foreign jurisdictions, the Company incurs a payroll or social tax cost when its employees exercise their vested awards. Pursuant to SFAS 123R, the payroll and social tax costs are recognized as an operating expense at the time of the exercise. As of July 31, 2007, the Company would incur as an operating expense in excess of \$4.5 million for these taxes if all vested awards held by employees in these foreign jurisdictions were exercised. This amount is based on the number of vested awards held and the market price of the Company's common stock. The timing of when employees in these foreign jurisdictions exercise their vested awards could materially affect the Company's future results of operations in a particular period.

Table of Contents

salesforce.com, inc.

Notes to Condensed Consolidated Financial Statements (Continued)***Warranties and Indemnification***

The Company's on-demand application service is typically warranted to perform in a manner consistent with general industry standards that are reasonably applicable and materially in accordance with the Company's online help documentation under normal use and circumstances.

The Company's arrangements generally include certain provisions for indemnifying customers against liabilities if its products or services infringe a third-party's intellectual property rights. To date, the Company has not incurred any material costs as a result of such indemnifications and has not accrued any liabilities related to such obligations in the accompanying consolidated financial statements.

The Company has entered into service level agreements with a small number of its customers warranting certain levels of uptime reliability and performance and permitting those customers to receive credits or terminate their agreements in the event that the Company fails to meet those levels. As of July 31, 2007 and January 31, 2007, the reserve balance for these credits was approximately \$0.2 million and \$0.4 million, respectively.

The Company has also agreed to indemnify its directors and executive officers for costs associated with any fees, expenses, judgments, fines and settlement amounts incurred by any of these persons in any action or proceeding to which any of those persons is, or is threatened to be, made a party by reason of the person's service as a director or officer, including any action by the Company, arising out of that person's services as the Company's director or officer or that person's services provided to any other company or enterprise at the Company's request. The Company maintains director and officer insurance coverage that would generally enable the Company to recover a portion of any future amounts paid.

Recent Accounting Pronouncement

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS No. 157). The purpose of SFAS No. 157 is to define fair value, establish a framework for measuring fair value and enhance disclosures about fair value measurements. The measurement and disclosure requirements are effective beginning in the first quarter of fiscal 2009. The Company is currently assessing whether adoption of SFAS No. 157 will have an impact on its financial statements.

Reclassifications

Certain reclassifications to the January 31, 2007 assets and liabilities balances were made to conform to the current period presentation.

2. Balance Sheet Accounts***Marketable Securities***

At July 31, 2007, marketable securities consisted of the following (in thousands):

	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
Corporate notes and obligations	\$ 225,622	\$ 156	\$ (435)	\$ 225,343
U.S. treasury securities	16,739		(48)	16,691
U.S. agency obligations	132,298	7	(97)	132,208
	\$ 374,659	\$ 163	\$ (580)	\$ 374,242

Table of Contents

salesforce.com, inc.

Notes to Condensed Consolidated Financial Statements (Continued)

At January 31, 2007, marketable securities consisted of the following (in thousands):

	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
Corporate notes and obligations	\$ 156,826	\$ 9	\$ (402)	\$ 156,433
Municipal bonds	1,974		(17)	1,957
U.S. treasury securities	30,805		(215)	30,590
U.S. agency obligations	137,107	5	(188)	136,924
	\$ 326,712	\$ 14	\$ (822)	\$ 325,904

	July 31, 2007 (unaudited)	January 31, 2007
Recorded as follows (in thousands):		
Short-term (due in one year or less)	\$ 184,881	\$ 165,816
Long-term (due between one and 3 years)	189,361	160,088
	\$ 374,242	\$ 325,904

The unrealized losses are attributable to changes in interest rates. As of July 31, 2007, the following investments were in an unrealized loss position (in thousands):

	Less than 12 Months		12 Months or Greater		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Corporate notes and obligations	\$ 129,349	\$ (303)	\$ 21,436	\$ (132)	\$ 150,785	\$ (435)
U.S. treasury securities			16,691	(48)	16,691	(48)
U.S. agency obligations	109,683	(73)	8,300	(24)	117,983	(97)
	\$ 239,032	\$ (376)	\$ 46,427	\$ (204)	\$ 285,459	\$ (580)

The unrealized loss for each of these fixed rate investments ranged from less than \$1,000 to \$38,000. Of the \$46.4 million in investments that were in an unrealized loss position 12 months or greater, \$39.1 million will reach maturity within the next 12 months. The Company has the ability and intent to hold these investments to maturity and does not believe any of the unrealized losses represent an other-than-temporary impairment based on its evaluation of available evidence as of July 31, 2007. The Company expects to receive the full principal and interest on all of these investment securities.

Prepaid Expenses and Other Current Assets

Prepaid expenses and other current assets consisted of the following (in thousands):

Edgar Filing: SALESFORCE COM INC - Form 10-Q

	July 31, 2007 (unaudited)	January 31, 2007
Deferred professional services costs	\$ 6,431	\$ 3,898
Prepaid expenses and other current assets	21,608	11,781
	\$ 28,039	\$ 15,679

Table of Contents

salesforce.com, inc.

Notes to Condensed Consolidated Financial Statements (Continued)**Fixed Assets**

Fixed assets consisted of the following (in thousands):

	July 31, 2007 (unaudited)	January 31, 2007
Computers, equipment and software	\$ 31,342	\$ 29,440
Furniture and fixtures	6,860	3,866
Leasehold improvements	28,971	20,757
	67,173	54,063
Less accumulated depreciation and amortization	(30,483)	(23,908)
	\$ 36,690	\$ 30,155

Depreciation and amortization expense totaled \$4,300,000 and \$2,390,000 for the three months ended July 31, 2007 and 2006, respectively, and \$7,884,000 and \$4,460,000 for the six months ended July 31, 2007 and 2006, respectively.

Fixed assets at July 31, 2007 and January 31, 2007 included a total of \$3,616,000 acquired under capital lease agreements. Accumulated amortization relating to equipment and software under capital leases totaled \$3,593,000 and \$3,364,000, respectively, at July 31, 2007 and January 31, 2007. Amortization of assets under capital leases is included in depreciation and amortization expense.

Capitalized Software

Capitalized software consisted of the following (in thousands):

	July 31, 2007 (unaudited)	January 31, 2007
Capitalized internal-use software development costs, net of accumulated amortization of \$3,098 and \$2,150, respectively	\$ 12,201	\$ 5,626
Acquired developed technology, net of accumulated amortization of \$3,917 and \$1,653, respectively	11,755	5,357
	\$ 23,956	\$ 10,983

In March 2007, the Company acquired 100 percent of the outstanding stock of a corporation, whose principal asset was developed technology, for \$5.3 million in cash. The Company accounted for this acquisition as a capital expenditure as the acquired entity did not meet the accounting definition of a business. As part of the acquisition accounting, the Company recorded a \$3.4 million deferred income tax liability to reflect the tax effect of the difference between the \$5.3 million in cash paid and the tax basis of the technology acquired. Correspondingly, the Company increased the cost of the acquired technology by the amount of the deferred income tax liability. The total acquisition cost of \$8.7 million is being amortized on a straight-line basis to cost of revenues over 3 years.

Current portion of capital lease obligations	19	176
	\$ 81,358	\$ 77,327

3. Stockholders' Equity**Stock Options Issued to Employees**

The 1999 Stock Option Plan (the "1999 Plan") provides for the issuance of incentive and nonstatutory options to employees and nonemployees of the Company. The 1999 Plan provides for grants of immediately exercisable options; however, the Company has the right to repurchase any unvested common stock upon the termination of employment at the original exercise price.

Edgar Filing: SALESFORCE COM INC - Form 10-Q

In addition to the 1999 Plan, the Company maintains the 2004 Equity Incentive Plan, 2004 Employee Stock Purchase Plan and the 2004 Outside Directors Stock Plan. These plans, other than the 2004 Outside Directors Plan, provide for annual automatic increases on February 1 to the shares reserved for issuance based on the lesser of (i) a specific percentage of the total number of shares outstanding at year end; (ii) a fixed number of shares; or (iii) a lesser number of shares set by the Company's Board of Directors, all as specified in the respective plans.

Table of Contents

salesforce.com, inc.

Notes to Condensed Consolidated Financial Statements (Continued)

On February 1, 2007, 4.0 million additional shares were reserved under the 2004 Equity Incentive Plan pursuant to the automatic increase. The 2004 Employee Stock Purchase Plan will not be implemented unless and until the Company's Board of Directors authorizes the commencement of one or more offerings under the plan. No offering periods have been authorized to date.

In April 2006, the Company's Board of Directors approved the 2006 Inducement Equity Incentive Plan (the Inducement Plan) that allows for stock option and other equity incentive grants to employees in connection with merger or acquisition activity. The total number of shares reserved for issuance under the Inducement Plan is 400,000 shares. As of July 31, 2007, there were 214,372 shares of common stock available for grant under the Inducement Plan.

Prior to February 1, 2006, options issued under the Company's stock option plans were generally for periods not to exceed 10 years and were issued at fair value of the shares of common stock on the date of grant as determined by the trading price of such stock on the New York Stock Exchange. After February 1, 2006, options issued to employees are for periods not to exceed 5 years. Grants made pursuant to the 2004 Equity Incentive Plan and the Inducement Plan do not provide for the immediate exercise of options.

Stock option activity for the six months ended July 31, 2007 is as follows:

	Shares Available for Grant	Outstanding Stock Options	Options Outstanding Weighted-Average Exercise Price	Aggregate Intrinsic Value
Balance as of January 31, 2007	5,001,926	15,955,334	\$ 19.67	
Increase in options authorized:				
2004 Equity Incentive Plan	4,000,000			
Options granted under all plans	(781,294)	781,294	43.81	
Restricted stock unit activity	(423,259)			
Stock grants to board members for board services and advisory board members	(19,000)			
Exercised		(2,011,130)	11.71	
Cancelled	706,933	(706,933)	30.50	
Balance as of July 31, 2007	8,485,306	14,018,565	\$ 21.61	\$ 246,676,000
Vested or expected to vest		12,812,734	\$ 20.83	\$ 235,118,000
Exercisable at July 31, 2007		6,243,043	\$ 11.52	\$ 170,831,000

The total intrinsic value of the options exercised during the six months ended July 31, 2007 and 2006 were \$68.5 million and \$45.4 million, respectively.

The weighted-average remaining contractual life of vested and expected to vest options is approximately 6 years.

As of July 31, 2007, options to purchase 6,243,043 shares were vested at a weighted average exercise price of \$11.52 per share and a remaining weighted-average remaining contractual life of approximately 6 years. The total intrinsic value of these vested options as of July 31, 2007 was \$170.8 million.

As of July 31, 2007, 25,240 shares issued pursuant to exercises of options issued under the 1999 Plan remained subject to repurchase.

Table of Contents

Notes to Condensed Consolidated Financial Statements (Continued)

The following table summarizes information about stock options outstanding as of July 31, 2007:

Range of Exercise Prices	Number Outstanding	Options Outstanding		Options Vested	
		Weighted-Average Remaining Contractual Life (Years)	Weighted-Average Exercise Price	Number of Shares	Weighted-Average Exercise Price
\$0.06 to \$2.50	2,386,101	5.50	\$ 2.01	2,350,016	\$ 2.01
\$4.00 to \$13.73	2,599,363	6.78	9.02	1,741,239	8.15
\$13.89 to \$22.64	2,212,843	7.56	17.25	994,264	16.79
\$23.05 to \$29.35	2,085,239	5.30	27.50	558,346	27.15
\$30.40 to \$36.90	2,118,972	5.28	34.44	444,016	33.77
\$38.39 to \$41.28	2,076,207	5.11	39.53	155,162	39.97
\$42.79 to \$47.13	539,840	4.69	44.71		
	14,018,565		\$ 21.61	6,243,043	\$ 11.52

Restricted stock unit activity for the six months ended July 31, 2007 is as follows:

	Restricted Stock Units Outstanding		
	Outstanding	Weighted-Average Exercise Price	Aggregate Intrinsic Value
Balance as of January 31, 2007	841,678	\$ 0.001	
Granted	522,616	0.001	
Exercised	(77,462)	0.001	
Cancelled	(99,357)	0.001	
Balance as of July 31, 2007	1,187,475	\$ 0.001	\$ 46,144,000
Expected to vest	1,007,767		\$ 39,161,000

The restricted stock units, which upon vesting entitles the holder to one share of common stock for each restricted stock unit, have an exercise price of \$0.001 per share, which is equal to the par value of the Company's common stock, and vest over 4 years. The Company first awarded restricted stock units in May 2006.

Common Stock

The following shares of common stock are available for future issuance at July 31, 2007:

Options outstanding	14,018,565
Restricted stock units outstanding	1,187,475

Edgar Filing: SALESFORCE COM INC - Form 10-Q

Stock available for future grant:	
1999 Stock Option Plan	893,809
2004 Equity Incentive Plan	6,592,125
2006 Inducement Equity Incentive Plan	214,372
2004 Employee Stock Purchase Plan	1,000,000
2004 Outside Directors Stock Plan	785,000
	24,691,346

salesforce.com, inc.

Notes to Condensed Consolidated Financial Statements (Continued)**4. Commitments and Contingencies***Letters of Credit*

As of July 31, 2007, the Company had a total of \$6.3 million in letters of credit outstanding substantially in favor of its landlords for office space in San Francisco and San Mateo, California, New York, Singapore and Australia. These letters of credit renew annually and mature at various dates through December 2015.

Leases

The Company leases office space and equipment under noncancelable operating and capital leases with various expiration dates.

As of July 31, 2007, the future minimum lease payments under noncancelable operating and capital leases are as follows (in thousands):

	Capital Leases	Operating Leases
Fiscal Period:		
Remaining six months in fiscal 2008	\$ 14	\$ 35,014
Fiscal 2009	6	59,049
Fiscal 2010		29,381
Fiscal 2011		20,809
Fiscal 2012		15,273
Thereafter		50,729
 Total minimum lease payments	 20	 \$ 210,255
 Less: amount representing interest	 (1)	
 Present value of capital lease obligations	 \$ 19	

Our agreements for the facilities and certain services provide us with the option to renew. Our future contractual obligations would change if we exercised these options.

In August 2007, we entered into an operating lease for additional office space in San Francisco, California. The future minimum lease payments under this lease are as follows: \$0.2 million for the remaining six months in fiscal 2008, \$1.5 million in fiscal 2009, \$2.9 million in fiscal 2010, \$3.4 million in fiscal 2011, \$3.4 million in fiscal 2012, and \$21.2 million thereafter.

In December 2001, the Company abandoned certain office space in San Francisco. The following table sets forth the lease abandonment activity since January 31, 2007 (in thousands):

Liability balance at January 31, 2007	\$ 762
Charges utilized	(93)
 Liability balance at July 31, 2007	 \$ 669

5. Legal Proceedings

On August 6, 2004, a shareholder derivative action was filed in the Superior Court of the State of California, San Francisco County, entitled Borrelli v. Benioff, et al., against the Company's Chief Executive Officer, its

Table of Contents

salesforce.com, inc.

Notes to Condensed Consolidated Financial Statements (Continued)

Chief Financial Officer and members of its Board of Directors alleging breach of fiduciary duty, abuse of control, gross mismanagement, waste of corporate assets and unjust enrichment under state common law. Subsequently, a substantially similar complaint was filed in the same court based on the same facts and allegations, entitled Johnson v. Benioff, et al. The two actions were consolidated under the caption Borrelli v. Benioff, Case No. CGC-04-433615 (Cal. Super. Ct., S.F. Cty.). On October 5, 2004, plaintiffs filed a consolidated complaint, and assert that the defendants breached their fiduciary duties by making, or failing to prevent salesforce.com, inc. and its management from making, statements or omissions that potentially subject the Company to liability and injury to its reputation. The action seeks damages on behalf of salesforce.com in an unspecified amount, among other forms of legal and equitable relief. Salesforce.com is named solely as a nominal defendant against which no recovery is sought. On December 22, 2006, the trial Court ordered that the lawsuit be bifurcated into two phases. The first phase was a bench trial to decide the legal issues of (a) whether a duty to disclose internal forecasts in an IPO registration statement exists in law, (b) if so, under what circumstances this duty exists, and (c) which party bears the burden of proof with respect to the foregoing two issues. The second phase was to address any remaining issues. On March 27, 2007, the Court ruled in favor of defendants and found that there is no duty to disclose internal forecasts in an IPO registration statement. The Court found the remaining two issues inapplicable to its analysis. On May 8, 2007, plaintiffs filed a Request for Dismissal asking the Court to dismiss the case with prejudice in its entirety. On May 18, 2007, plaintiffs filed a Notice of Entry of Dismissal. The case has now been dismissed with prejudice.

On May 31, 2007, a complaint against the Company was filed in the United States District Court for the Eastern District of Texas entitled Triton IP, LLC v. salesforce.com, inc., alleging infringement of a patent held by Triton IP, LLP. The Company has filed its answer to the complaint. To date, no discovery has occurred in this case. Management does not believe that the lawsuit has any merit and intends to defend the action vigorously.

Additionally, the Company is involved in various legal proceedings arising from the normal course of business activities. In management's opinion, resolution of these matters is not expected to have a material adverse impact on the Company's consolidated results of operations, cash flows or its financial position. However, depending on the nature and timing of any such dispute, an unfavorable resolution of a matter could materially affect the Company's future results of operations, cash flows or financial position in a particular period.

6. Related-Party Transactions

In January 1999, the salesforce.com/foundation, commonly referred to as the Foundation, a non-profit public charity, was chartered to build philanthropic programs that are particularly focused on youth and technology. The Company's chairman is the chairman of the Foundation. He, one of the Company's officers and one of the Company's board members hold three of the Foundation's eight board seats. The Company is not the primary beneficiary of the Foundation's activities, and accordingly, the Company does not consolidate the Foundation's statement of activities with its financial results.

Since the Foundation's inception, the Company has provided at no charge certain resources to Foundation employees such as office space. The value of these items totals approximately \$35,000 per quarter.

In addition to the resource sharing with the Foundation, the Company issued the Foundation warrants in August 2002 to purchase 500,000 shares of common stock. Through July 31, 2007, the Foundation exercised all of these warrants. As of July 31, 2007, the Foundation held 280,500 shares of salesforce.com common stock. Additionally, the Company has donated subscriptions to the Company's service to other qualified non-profit organizations. The fair value of these donated subscriptions is in excess of \$2.0 million per month. The Company plans to continue providing free subscriptions to qualified non-profit organizations.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion in Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements consist of, among other things, trend analyses, statements regarding future events, future financial performance, our business strategy and our plan to build our business, the expenses associated with our data center capacity, our anticipated growth, trends in our business, new application service features, our strategy of acquiring or making investments in complementary companies, services and technologies, the effect of foreign currency exchange rate and interest rate fluctuations on our financial results, the potential impact of current or any future litigation, the potential availability of additional tax assets in the future and related matters, the impact of expensing stock options, the sufficiency of our capital resources, and our strategy to become a platform player for on-demand applications, all of which are based on current expectations, estimates, and forecasts, and the beliefs and assumptions of our management. Words such as expects, anticipates, projects, intends, plans, believes, estimates, variations of such words, and similar expressions are also intended to identify such forward-looking statements. These forward-looking statements are subject to risks, uncertainties and assumptions that are difficult to predict. Therefore, actual results may differ materially and adversely from those expressed in any forward-looking statements. Readers are directed to risks and uncertainties identified below, under Risk Factors and elsewhere in this report, for factors that may cause actual results to be different than those expressed in these forward-looking statements. Except as required by law, we undertake no obligation to revise or update publicly any forward-looking statements for any reason.

Overview

We are the leading provider, based on market share, of application services that allow organizations to easily share customer information on demand, according to a December 2006 report by IDC. We provide a comprehensive CRM service to businesses of all sizes and industries worldwide.

We were founded in February 1999 and began offering our on-demand CRM application service in February 2000.

In order to increase our revenues and take advantage of our market opportunity, we will need to, among other things, continue to add substantial numbers of paying subscriptions and upgrade our customers to more fully featured versions such as our Unlimited Edition. We plan to re-invest our revenues for the foreseeable future by expanding our data center capacity; hiring additional personnel, particularly in customer-related areas; expanding our domestic and international selling and marketing activities; increasing our research and development activities to upgrade and extend our service offerings and to develop new services and technologies; expanding the number of locations around the world where we conduct business; adding to our infrastructure to support our growth; and expanding our operational systems to manage a growing business. Additionally, in our effort to further strengthen and extend our service offering, we may in the future acquire or make investments in complementary companies, services and technologies.

We expect marketing and sales costs, which were 51 percent of our total revenues for the six months ended July 31, 2007 and 50 percent of our total revenues for the same period a year ago, to continue to represent a substantial portion of total revenues in the future as we seek to add and manage more paying subscribers, build brand awareness and increase the number of marketing events that we sponsor.

Fiscal Year

Our fiscal year ends on January 31. References to fiscal 2008, for example, refer to the fiscal year ended January 31, 2008.

Table of Contents

Sources of Revenues

We derive our revenues from two sources: (1) subscription revenues, which are comprised of subscription fees from customers accessing our on-demand application service, and from customers purchasing additional support beyond the standard support that is included in the basic subscription fee; and (2) related professional services and other revenues. Other revenues consist primarily of training fees. Subscription and support revenues accounted for approximately 90 percent of our total revenues. Subscription revenues are driven primarily by the number of paying subscribers of our service and the subscription price of our service. None of our customers accounted for more than 5 percent of our revenues during the six months ended July 31, 2007 and 2006.

Subscription and support revenues are recognized ratably over the contract terms beginning on the commencement dates of each contract. The typical subscription and support term is 12 to 24 months, although terms range from one to 60 months. Our subscription and support contracts are noncancelable, though customers typically have the right to terminate their contracts for cause if we materially fail to perform. We generally invoice our customers in advance, in annual or quarterly installments, and typical payment terms provide that our customers pay us within 30 days of invoice. Amounts that have been invoiced are recorded in accounts receivable and in deferred revenue, or in revenue depending on whether the revenue recognition criteria have been met. In general, we collect our billings in advance of the subscription service period.

Professional services and other revenues consist of fees associated with consulting and implementation services and training. Our consulting and implementation engagements are typically billed on a time and materials basis. We also offer a number of classes on implementing, using and administering our service that are billed on a per person, per class basis. Our typical payment terms provide that our customers pay us within 30 days of invoice.

Cost of Revenues and Operating Expenses

Cost of Revenues. Cost of subscription and support revenues primarily consists of expenses related to hosting our service and providing support, the costs of additional data center capacity, depreciation or operating lease expense associated with computer equipment, costs associated with website development activities, allocated overhead and amortization expense associated with capitalized software. We allocate overhead such as rent and occupancy charges based on headcount. Employee benefit costs and taxes are allocated based upon a percentage of total compensation expense. As such, general overhead expenses are reflected in each cost of revenue and operating expense category. Cost of professional services and other revenues consists primarily of employee-related costs associated with these services, including stock-based expenses, the cost of subcontractors and allocated overhead. The cost associated with providing professional services is significantly higher as a percentage of revenue than for our on-demand subscription service due to the labor costs associated with providing professional services.

We intend to continue to invest additional resources in our on-demand application service and in our consulting services. The timing of these additional expenses will affect our cost of revenues, both in terms of absolute dollars and as a percentage of revenues, in a particular quarterly period. For example, we plan to increase the number of employees who are fully dedicated to consulting services. We have also obtained additional data center capacity on the west and east coasts of the United States. We expect the annual cost of these resources to be significant.

Research and Development. Research and development expenses consist primarily of salaries and related expenses, including stock-based expenses, the costs of our development and test data center and allocated overhead. We have historically focused our research and development efforts on increasing the functionality and enhancing the ease of use of our on-demand application service. Our proprietary, scalable and secure multi-tenant architecture enables us to provide all of our customers with a service based on a single version of our application. As a result, we do not have to maintain multiple versions, which enables us to have relatively low research and development expenses as compared to traditional enterprise software companies. We expect that in

Table of Contents

the future, research and development expenses will increase in absolute dollars as we upgrade and extend our service offerings and develop new technologies.

Marketing and Sales. Marketing and sales expenses are our largest cost and consist primarily of salaries and related expenses, including stock-based expenses, for our sales and marketing staff, including commissions, payments to partners, marketing programs and allocated overhead. Marketing programs consist of advertising, events, corporate communications and brand building and product marketing activities.

We plan to continue to invest heavily in marketing and sales by increasing the number of direct sales personnel in order to add new customers and increase penetration within our existing customer base, expanding our domestic and international selling and marketing activities, building brand awareness and sponsoring additional marketing events. We expect that in the future, marketing and sales expenses will increase in absolute dollars and continue to be our largest cost.

General and Administrative. General and administrative expenses consist of salaries and related expenses, including stock-based expenses, for finance and accounting, human resources and management information systems personnel, legal costs, professional fees, other corporate expenses and allocated overhead. We expect that in the future, general and administrative expenses will increase in absolute dollars as we add personnel and incur additional professional fees and insurance costs related to the growth of our business, international expansion and operations as a public company.

Stock-Based Expenses. Our cost of revenues and operating expenses include stock-based expenses related to option and stock awards to employees and non-employee directors. We account for stock-based expenses pursuant to the provisions of Statement of Financial Accounting Standards No. 123 (revised 2004), *Share-Based Payment*, or SFAS 123R, which requires that share-based payments, including grants of employee stock options, be recognized as an expense in the statement of operations based on their fair values and vesting periods. These charges are significant.

Joint Venture

In December 2000, we established a Japanese joint venture, Kabushiki Kaisha salesforce.com, with SunBridge, Inc., a Japanese corporation, to assist us with our sales efforts in Japan. As of July 31, 2007, we owned a 65 percent interest in the joint venture. Because of this majority interest, we consolidate the venture's financial results, which are reflected in each revenue, cost of revenues and expense category in our consolidated statement of operations. We then record minority interest, which reflects the minority investors' interest in the venture's results, exclusive of intercompany charges. Through July 31, 2007, the operating performance and liquidity requirements of the Japanese joint venture had not been significant. While we plan to expand our selling and marketing activities in Japan in order to add new customers, we believe the future operating performance and liquidity requirements of the Japanese joint venture will not be significant.

Critical Accounting Policies and Estimates

Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States. The preparation of these consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, costs and expenses, and related disclosures. On an ongoing basis, we evaluate our estimates and assumptions. Our actual results may differ from these estimates under different assumptions or conditions.

We believe that of our significant accounting policies, which are described in note 1 to our condensed consolidated financial statements, the following accounting policies involve a greater degree of judgment and complexity. Accordingly, these are the policies we believe are the most critical to aid in fully understanding and evaluating our consolidated financial condition and results of operations.

Table of Contents

Revenue Recognition. We recognize revenue in accordance with SEC Staff Accounting Bulletin No. 104, Revenue Recognition and Emerging Issues Task Force, or EITF, Issue No. 00-21, Revenue Arrangements with Multiple Deliverables.

We recognize revenue when all of the following conditions are satisfied: (1) there is persuasive evidence of an arrangement; (2) the service has been provided to the customer; (3) the collection of our fees is reasonably assured; and (4) the amount of fees to be paid by the customer is fixed or determinable. Our arrangements do not contain general rights of return.

We recognize subscription revenues ratably over the contract terms beginning on the commencement dates of each contract. Support revenues from customers who purchase our premium support offerings are recognized similarly over the term of the support contract. As part of their subscription agreements, customers generally benefit from new features and functionality with each release at no additional cost. In situations where we have contractually committed to an individual customer specific technology, we defer all of the revenue for that customer until the technology is delivered and accepted. Once delivery occurs, we then recognize the revenue over the remaining contract term.

Consulting services and training revenues are accounted for separately from subscription and support revenues when these services have value to the customer on a standalone basis and there is objective and reliable evidence of fair value of each deliverable. When accounted for separately, revenues are recognized as the services are rendered for time and material contracts, and when the milestones are achieved and accepted by the customer for fixed price contracts. The majority of our consulting service contracts are on a time and material basis. Training revenues are recognized after the services are performed. For revenue arrangements with multiple deliverables, such as an arrangement that includes subscription, premium support, consulting or training services, we allocate the total amount the customer will pay to the separate units of accounting based on their relative fair values, as determined by the price of the undelivered items when sold separately.

In determining whether the consulting services can be accounted for separately from subscription and support revenues, we consider the following factors for each consulting agreement: availability of the consulting services from other vendors, whether objective and reliable evidence for fair value exists for the undelivered elements, the nature of the consulting services, the timing of when the consulting contract was signed in comparison to the subscription service start date, and the contractual dependence of the subscription service on the customer's satisfaction with the consulting work. If a consulting arrangement does not qualify for separate accounting, we recognize the consulting revenue ratably over the remaining term of the subscription contract. Additionally, in these situations we defer the direct costs of the consulting arrangement and amortize those costs over the same time period as the consulting revenue is recognized. The deferred cost on our consolidated balance sheet totaled \$10,470,000 at July 31, 2007 and \$5,232,000 at January 31, 2007. Such amounts are included in prepaid expenses and other current assets and other assets.

Accounting for Deferred Commissions. We defer commission payments to our direct sales force. The commissions are deferred and amortized to sales expense over the noncancelable terms of the related subscription contracts with our customers, which are typically 12 to 24 months. The commission payments, which are paid in full the month after the customer's service commences, are a direct and incremental cost of the revenue arrangements. The deferred commission amounts are recoverable through the future revenue streams under the noncancelable customer contracts. We believe this is the preferable method of accounting as the commission charges are so closely related to the revenue from the noncancelable customer contracts that they should be recorded as an asset and charged to expense over the same period that the subscription revenue is recognized.

During the six months ended July 31, 2007, we deferred \$20.9 million of commission expenditures and we amortized \$18.7 million to sales expense. During the same period a year ago, we deferred \$12.2 million of commission expenditures and we amortized \$10.8 million to sales expense. Deferred commissions on our consolidated balance sheet totaled \$33.8 million at July 31, 2007 and \$31.6 million at January 31, 2007.

Table of Contents

Accounting for Stock-Based Awards. We account for share-based compensation under SFAS 123R. We recognize the fair value of our stock awards on a straight-line basis over the requisite service period of the award, which is the vesting term of four years.

We recognized stock-based expense of \$25.4 million, or 8 percent of revenue, during the six months ended July 31, 2007. The requirement to expense stock-based awards will continue to materially reduce our reported results of operations. As of July 31, 2007, we had an aggregate of \$160.6 million of stock compensation remaining to be amortized to expense over the remaining requisite service period of the underlying awards. We currently expect this stock compensation balance to be amortized as follows: \$31.5 million during the remaining six months of fiscal 2008; \$56.8 million during fiscal 2009; \$46.0 million during fiscal 2010; \$24.4 million during fiscal 2011; and \$1.9 million during fiscal 2012. The expected amortization reflects only outstanding stock awards as of July 31, 2007 and assumes no forfeiture activity. We expect to continue to issue share-based awards to our employees in future periods.

We grant stock options and restricted stock units to employees throughout the world. In certain foreign jurisdictions, we are obligated for the payroll or social tax costs when employees exercise their vested awards. Pursuant to SFAS 123R, we recognize as an operating expense the payroll and social tax costs at the time of the exercise. As of July 31, 2007, we would incur as an operating expense in excess of \$4.5 million for these taxes if all vested awards held by employees in these foreign jurisdictions were exercised. This amount is based on the number of vested awards held and the market price of our common stock. The timing of when employees in these foreign jurisdictions exercise their vested awards could materially affect our future results of operations in a particular period.

The impact of SFAS 123R in the future is dependent upon, among other things, the timing of when we hire additional employees, the effect of long-term incentive strategies involving stock awards in order to continue to attract and retain employees, the total number of stock awards granted, the fair value of the stock awards at the time of grant, changes in estimated forfeiture assumption rates and the tax benefit that we may or may not receive from stock-based expenses. Additionally, the application of SFAS 123R requires the use of an option-pricing model to determine the fair value of stock option awards. This determination of fair value is affected by our stock price as well as assumptions regarding a number of highly complex and subjective variables. These variables include, but are not limited to, our expected stock price volatility over the term of the awards.

As of July 31, 2007, there were 1,187,475 restricted stock units outstanding. We plan to continue awarding restricted stock units to our employees in the future. The restricted stock units, which upon vesting entitles the holder to one share of common stock for each restricted stock unit, have an exercise price of \$0.001 per share, which is equal to the par value of our common stock, and vest over 4 years. The fair value of the restricted units is based on our closing stock price on the date of grant, and compensation expense, net of estimated forfeitures, is recognized on a straight-line basis over the vesting period.

Accounting for Income Taxes. We account for income taxes using the liability method, which requires the recognition of deferred tax assets or liabilities for the tax-effected temporary differences between the financial reporting and tax bases of our assets and liabilities and for net operating loss and tax credit carryforwards. The tax expense or benefit for unusual items or certain adjustments to the valuation allowance are treated as discrete items in the interim period in which the events occur.

Our effective tax rate could be adversely affected by changes in the mix of earnings and losses in countries with differing statutory tax rates, certain non-deductible expenses arising from SFAS 123R and the valuation of deferred tax assets and liabilities.

Table of Contents**Results of Operations**

Overview of the Three Months Ended July 31, 2007

During the three months ended July 31, 2007, the net income was \$3.7 million, or 3 cents per diluted share. Included in net income was \$13.4 million of stock-based expenses, or 8 percent of total revenue. The net loss of \$145,000 during the same period a year ago included \$10.2 million of stock-based expenses, or 9 percent of total revenue.

Net income for the three months ended July 31, 2007 benefited from a lower effective tax rate of 50 percent as compared to 84 percent during the same period a year ago. The lower effective tax rate was primarily due to a reduced proportion of foreign losses for which no tax benefit can be realized and a higher amount of favorable tax adjustments as a result of tax benefits generated by stock option exercises in the current quarter than the same period a year ago.

Revenues during the three months ended July 31, 2007 were \$176.6 million, an increase of 49 percent over the same period a year ago.

Our gross profit during the three months ended July 31, 2007 was \$135.2 million, or 77 percent of revenues, and included stock-based expenses of \$2.0 million. Our operating income was \$3.3 million and included stock-based expenses of \$13.4 million. During the same period a year ago, we generated a gross profit of \$89.0 million, or 75 percent of revenues, and had an operating loss of \$1.3 million. The operating loss during the three months ended July 31, 2006 also included \$10.2 million of stock-based expense.

Additionally, during the three months ended July 31, 2007, we incurred substantial costs and operating expenses related to the expansion of our business. We incurred costs related to increasing our data center capacity. Additionally, we hired sales personnel to focus on adding new customers and increasing the penetration within our existing customer base, developers to broaden and enhance our on-demand service and administrative staff to support our infrastructure.

During the three months ended July 31, 2007, we generated \$34.7 million of cash from operating activities, as compared to \$30.0 million during the same period a year ago. At July 31, 2007, we had cash, cash equivalents and marketable securities of \$497.2 million, as compared to \$334.1 million at July 31, 2006, accounts receivable

Table of Contents

of \$114.0 million at July 31, 2007, as compared to \$75.7 million at July 31, 2006, and deferred revenue of \$321.9 million at July 31, 2007, as compared to \$202.8 million at July 31, 2006.

Three Months Ended July 31, 2007 and 2006

Revenues. Total revenues were \$176.6 million for the three months ended July 31, 2007, compared to \$118.1 million during the same period a year ago, an increase of \$58.5 million, or 49 percent. Subscription and support revenues were \$160.0 million, or 91 percent of total revenues, for the three months ended July 31, 2007, compared to \$106.7 million, or 90 percent of total revenues, during the same period a year ago. Professional services and other revenues were \$16.6 million, or 9 percent of total revenues, for the three months ended July 31, 2007, compared to \$11.4 million, or 10 percent of total revenues, for the same period a year ago. The increase in professional services and other revenues was due primarily to the higher demand for services from an increased number of paying subscriptions and customers.

Revenues in Europe and Asia Pacific accounted for \$43.2 million, or 24 percent of total revenues, during the three months ended July 31, 2007, compared to \$25.6 million, or 22 percent of total revenues, during the same period a year ago, an increase of \$17.6 million, or 69 percent. The increase in revenues outside of the Americas was the result of our efforts to expand the number of locations around the world where we conduct business and our international selling and marketing activities.

Cost of Revenues. Cost of revenues was \$41.4 million, or 23 percent of total revenues, during the three months ended July 31, 2007, compared to \$29.1 million, or 25 percent of total revenues, during the same period a year ago, an increase of \$12.3 million. The increase in absolute dollars was primarily due to an increase of \$5.8 million in employee-related costs, primarily all of which was due to the 41 percent increase in the headcount of our professional services organization since July 31, 2006, an increase of \$0.5 million in stock-based expenses, an increase of \$3.1 million in service delivery costs, primarily due to our efforts in increasing data center capacity, and an increase of \$2.5 million in outside subcontractor and other service costs. The cost of the additional professional services headcount resulted in the cost of professional services and other revenues to be in excess of the related revenue during the three months ended July 31, 2007 by \$2.5 million. We increased the professional services headcount in order to meet the current and anticipated demand for our consulting and training services as our customer base has expanded and includes more large businesses and as we have expanded internationally.

As described above, we intend to continue to invest additional resources in our on-demand application service and in our capacity to deliver professional services. The timing of these additional expenses, together with the requirement to expense stock options, will affect our cost of revenues, both in terms of absolute dollars and as a percentage of revenues. We expect the cost of professional services and other revenue to continue to be in excess of the related revenue during fiscal 2008. We plan to make this investment since our professional services are designed to facilitate the adoption of our on-demand application service.

Research and Development. Research and development expenses were \$15.1 million, or 9 percent of total revenues, during the three months ended July 31, 2007, compared to \$11.0 million, or 9 percent of total revenues, during the same period a year ago, an increase of \$4.1 million. The increase in absolute dollars was primarily due to an increase of \$3.9 million in employee-related costs and \$0.2 million in stock-based expenses. We increased our research and development headcount by 38 percent since July 31, 2006 in order to upgrade and extend our service offerings and develop new technologies.

Marketing and Sales. Marketing and sales expenses were \$90.2 million, or 51 percent of total revenues, during the three months ended July 31, 2007, compared to \$59.8 million, or 51 percent of total revenues, during the same period a year ago, an increase of \$30.4 million. The increase in absolute dollars was primarily due to an increase of \$23.4 million in employee-related costs, \$1.5 million in stock-based expenses, \$2.0 million in marketing, advertising and event costs and a \$3.2 million increase in allocated overhead. Our marketing and sales

Table of Contents

headcount increased by 42 percent since July 31, 2006 as we hired additional sales personnel to focus on adding new customers and increasing penetration within our existing customer base.

General and Administrative. General and administrative expenses were \$26.5 million, or 15 percent of total revenues, during the three months ended July 31, 2007, compared to \$19.5 million, or 16 percent of total revenues, during the same period a year ago, an increase of \$7.0 million. The increase was primarily due to an increase of \$6.1 million in employee-related costs, \$1.0 million in stock-based expenses, \$1.9 million in professional services and \$3.1 million in infrastructure related costs, which were primarily offset by \$4.9 million in increased allocated charges to non-general and administrative departments. Our general and administrative headcount increased by 44 percent since July 31, 2006 as we added personnel to support our growth.

Operating Income (Loss). Operating income during the three months ended July 31, 2007 was \$3.3 million and included \$13.4 million of stock-based expenses related to SFAS 123R. During the same period a year ago, the operating loss was \$1.3 million. The increase in our revenues were primarily re-invested in an effort to expand our business.

Interest Income. Interest income consists of investment income on cash and marketable securities balances. Interest income was \$5.6 million during the three months ended July 31, 2007 and was \$3.3 million during the same period a year ago. The increase was primarily due to increased marketable securities balances resulting from the cash generated by operating activities and increased market interest rates.

Provision for Income Taxes. We recorded a provision for income taxes of \$4.7 million during the three months ended July 31, 2007, compared to \$1.7 million during the same period a year ago.

Our effective tax rate decreased to 50 percent for the current quarter compared to 84 percent for the same period a year ago primarily due to a reduced proportion of foreign losses for which no tax benefit can be realized and a higher amount of favorable tax adjustments generated by stock option exercises.

Six Months Ended July 31, 2007 and 2006

Revenues. Total revenues were \$339.0 million for the six months ended July 31, 2007, compared to \$222.8 million during the same period a year ago, an increase of \$116.2 million, or 52 percent. Subscription and support revenues were \$307.7 million, or 91 percent of total revenues, for the six months ended July 31, 2007, compared to \$201.2 million, or 90 percent of total revenues, during the same period a year ago. Professional services and other revenues were \$31.3 million, or 9 percent of total revenues, for the six months ended July 31, 2007, compared to \$21.6 million, or 10 percent of total revenues, for the same period a year ago. The increase in professional services and other revenues was due primarily to the higher demand for services from an increased number of paying subscriptions and customers.

Revenues in Europe and Asia Pacific accounted for \$81.2 million, or 24 percent of total revenues, during the six months ended July 31, 2007, compared to \$47.2 million, or 21 percent of total revenues, during the same period a year ago, an increase of \$34.0 million, or 72 percent. The increase in revenues outside of the Americas was the result of our efforts to expand the number of locations around the world where we conduct business and our international selling and marketing activities.

Cost of Revenues. Cost of revenues was \$80.6 million, or 24 percent of total revenues, during the six months ended July 31, 2007, compared to \$53.7 million, or 24 percent of total revenues, during the same period a year ago, an increase of \$26.9 million. The increase in absolute dollars was primarily due to an increase of \$12.6 million in employee-related costs, primarily all of which was related to our professional services organization, an increase of \$1.1 million in stock-based expenses, an increase of \$7.2 million in service delivery costs, primarily due to our efforts in increasing data center capacity, and an increase of \$5.2 million in outside subcontractor and other service costs. The cost of the additional professional services headcount resulted in the cost of professional

Table of Contents

services and other revenues to be in excess of the related revenue during the six months ended July 31, 2007 by \$6.7 million. We increased the professional services headcount in order to meet the current and anticipated demand for our consulting and training services as our customer base has expanded and includes more large businesses and as we have expanded internationally.

Research and Development. Research and development expenses were \$29.2 million, or 9 percent of total revenues, during the six months ended July 31, 2007, compared to \$19.8 million, or 9 percent of total revenues, during the same period a year ago, an increase of \$9.4 million. The increase in absolute dollars was primarily due to an increase of \$8.4 million in employee-related costs and \$0.8 million in stock-based expenses. We increased our research and development headcount by 17 percent since January 31, 2007 in order to upgrade and extend our service offerings and develop new technologies.

Marketing and Sales. Marketing and sales expenses were \$174.1 million, or 51 percent of total revenues, during the six months ended July 31, 2007, compared to \$111.8 million, or 50 percent of total revenues, during the same period a year ago, an increase of \$62.3 million. The increase in absolute dollars was primarily due to an increase of \$46.3 million in employee-related costs, \$3.7 million in stock-based expenses, \$5.1 million in marketing, advertising and event costs and a \$6.6 million increase in allocated overhead. Our marketing and sales headcount increased by 11 percent since January 31, 2007 as we hired additional sales personnel to focus on adding new customers and increasing penetration within our existing customer base.

General and Administrative. General and administrative expenses were \$51.6 million, or 15 percent of total revenues, during the six months ended July 31, 2007, compared to \$38.9 million, or 18 percent of total revenues, during the same period a year ago, an increase of \$12.7 million. The increase was primarily due to an increase of \$12.6 million in employee-related costs, \$5.6 million in infrastructure related costs and \$4.5 million in professional and outside service costs, which were primarily offset by \$10.1 million in increased allocated charges to non-general and administrative departments. Our general and administrative headcount increased by 11 percent since January 31, 2007 as we added personnel to support our growth.

Operating Income (Loss). Operating income during the six months ended July 31, 2007 was \$3.5 million and included \$25.4 million of stock-based expenses related to SFAS 123R. During the same period a year ago, the operating loss was \$1.4 million. The increase in our revenues were re-invested in an effort to expand our business.

Interest Income. Interest income consists of investment income on cash and marketable securities balances. Interest income was \$10.7 million during the six months ended July 31, 2007 and was \$6.3 million during the same period a year ago. The increase was primarily due to increased marketable securities balances resulting from the cash generated by operating activities and increased market interest rates.

Provision for Income Taxes. We recorded a provision for income taxes of \$8.5 million during the six months ended July 31, 2007, compared to \$3.7 million during the same period a year ago.

Our effective tax rate decreased to 58 percent for the six months ended July 31, 2007 compared to 87 percent for the same period a year ago primarily due to a reduced proportion of foreign losses for which no tax benefit can be realized, and a higher amount of favorable tax adjustments generated by stock option exercises. See Note 1 Summary of Business and Significant Accounting Policies Income Taxes to the Notes to the Condensed Consolidated Financial Statements for our reconciliation of income taxes at the statutory federal rate to the provision for income taxes.

Table of Contents

Recent Accounting Pronouncement

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS No. 157). The purpose of SFAS No. 157 is to define fair value, establish a framework for measuring fair value and enhance disclosures about fair value measurements. The measurement and disclosure requirements are effective beginning in the first quarter of fiscal 2009. We are currently assessing whether adoption of SFAS No. 157 will have an impact on our financial statements.

Liquidity and Capital Resources

As of July 31, 2007, our principal sources of liquidity were cash, cash equivalents and marketable securities totaling \$497.2 million and accounts receivable of \$114.0 million.

Net cash provided by operating activities was \$71.5 million during the six months ended July 31, 2007 and \$42.4 million during the same period a year ago. The improvement in cash flow was due primarily to the increased number of customers to our service. Cash provided by operating activities has historically been affected by sales of subscriptions and support and professional services, changes in working capital accounts, particularly increases in accounts receivable and deferred revenue and the timing of commission and bonus payments, and add-backs of non-cash expense items such as depreciation and amortization and the expense associated with stock-based awards.

Net cash used in investing activities was \$74.0 million during the six months ended July 31, 2007 and \$7.9 million during the same period a year ago. The net cash used in investing activities during the six months ended July 31, 2007 primarily related to the investment of operating cash balances and capital expenditures associated with leasehold improvements, development of internal use software and the purchase of software licenses, computer equipment and furniture and fixtures as we have expanded our infrastructure, number of offices around the world and work force. Additionally, in March 2007, we acquired additional developed technology for \$5.3 million in cash.

Net cash provided by financing activities was \$38.7 million during the six months ended July 31, 2007 and \$16.5 million during the same period a year ago. During the six months ended July 31, 2007, the \$23.7 million of proceeds from the exercise of employee stock options and warrants and \$15.2 million of excess tax benefits from employee stock plans were offset by principal payments on capital lease obligations.

As of July 31, 2007, we have a total of \$6.3 million in letters of credit outstanding in favor of our landlords for office space in San Francisco and San Mateo, California, New York, Singapore and Australia. To date, no amounts have been drawn against the letters of credit, which renew annually and mature at various dates through December 2015.

We do not have any special purpose entities, and other than operating leases for office space and computer equipment, we do not engage in off-balance sheet financing arrangements. Additionally, we currently do not have a bank line of credit. Our principal commitments consist of obligations under leases for office space and co-location facilities for additional data center capacity and the development and test data center, and computer equipment and furniture and fixtures.

Table of Contents

As of July 31, 2007, our future minimum lease payments under noncancelable operating and capital leases are as follows (in thousands):

	Capital Leases	Operating Leases
Fiscal Period:		
Remaining six months in fiscal 2008	\$ 14	\$ 35,014
Fiscal 2009	6	59,049
Fiscal 2010		29,381
Fiscal 2011		20,809
Fiscal 2012		15,273
Thereafter		50,729
 Total minimum lease payments	 20	 \$ 210,255
 Less: amount representing interest	 (1)	
 Present value of capital lease obligations	 \$ 19	

Our lease agreements provide us with the option to renew. Our future operating lease obligations would change if we exercised these options and if we entered into additional operating lease agreements as we expand our operations.

In August 2007, we entered into an operating lease for additional office space in San Francisco. The future minimum lease payments under this lease are as follows: \$0.2 million for the remaining six months in fiscal 2008, \$1.5 million in fiscal 2009, \$2.9 million in fiscal 2010, \$3.4 million in fiscal 2011, \$3.4 million in fiscal 2012, and \$21.2 million thereafter.

We believe our existing cash, cash equivalents and short-term marketable securities and cash provided by operating activities will be sufficient to meet our working capital and capital expenditure needs over the next 12 months. Our future capital requirements will depend on many factors, including our rate of revenue growth, the expansion of our marketing and sales activities, the timing and extent of spending to support product development efforts and expansion into new territories, the timing of introductions of new services and enhancements to existing services, the timing of capital expenditures and expenses associated with Web hosting and the continuing market acceptance of our services. To the extent that available funds are insufficient to fund our future activities, we may need to raise additional funds through public or private equity or debt financing.

During fiscal 2008, we may enter into arrangements to acquire or invest in other businesses, services or technologies. While we believe we have sufficient financial resources to take these actions, we may be required to seek additional equity or debt financing. Additional funds may not be available on terms favorable to us or at all.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK*Foreign currency exchange risk*

Our results of operations and cash flows are subject to fluctuations due to changes in foreign currency exchange rates, particularly changes in the Euro, British Pound Sterling, Canadian dollar, Japanese Yen and Australian dollar. We seek to minimize the impact of certain foreign currency fluctuations by hedging certain balance sheet exposures with foreign currency forward and option contracts. Any gain or loss from settling these contracts is offset by the loss or gain derived from the underlying balance sheet exposures. The hedging contracts by policy have maturities of less than three months and settle before the end of each quarterly period. Additionally, by policy, we do not enter into any hedging contracts for trading or speculative purposes.

Table of Contents

Interest rate sensitivity

We had cash, cash equivalents and marketable securities totaling \$497.2 million at July 31, 2007. These amounts were invested primarily in money market funds and instruments, corporate notes and bonds, government securities and other debt securities with strong credit ratings. The cash, cash equivalents and short-term marketable securities are held for working capital purposes. We do not enter into investments for trading or speculative purposes.

Our fixed-income portfolio is subject to interest rate risk. An immediate increase or decrease in interest rates of 100-basis points could result in a \$2.9 million market value reduction or increase of the same amount. This estimate is based on a sensitivity model that measures market value changes when changes in interest rates occur. Fluctuations in the value of our investment securities caused by a change in interest rates (gains or losses on the carrying value) are recorded in other comprehensive income, and are realized only if we sell the underlying securities.

At January 31, 2007, we had cash, cash equivalents and marketable securities totaling \$412.5 million. The fixed-income portfolio was also subject to interest rate risk. Changes in interest rates of 100-basis points would have resulted in market value changes of \$2.8 million.

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of disclosure controls and procedures

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act), as of the end of the period covered by this report (the Evaluation Date).

In designing and evaluating our disclosure controls and procedures, management recognizes that any disclosure controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs.

Based on our evaluation, our principal executive officer and principal financial officer concluded as of the Evaluation Date that our disclosure controls and procedures were effective to provide reasonable assurance that the information required to be disclosed in our Securities and Exchange Commission (SEC) reports (i) is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and (ii) is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

(b) Changes in internal control over financial reporting

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of any changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during our most recently completed fiscal quarter. Based on that evaluation, our principal executive officer and principal financial officer concluded that there has not been any material change in our internal control over financial reporting during that quarter that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

On August 6, 2004, a shareholder derivative action was filed in the Superior Court of the State of California, San Francisco County, entitled *Borrelli v. Benioff, et al.*, against the Company's Chief Executive Officer, its Chief Financial Officer and members of its Board of Directors alleging breach of fiduciary duty, abuse of control, gross mismanagement, waste of corporate assets and unjust enrichment under state common law. Subsequently, a substantially similar complaint was filed in the same court based on the same facts and allegations, entitled *Johnson v. Benioff, et al.* The two actions were consolidated under the caption *Borrelli v. Benioff*, Case No. CGC-04-433615 (Cal. Super. Ct., S.F. Cty.). On October 5, 2004, plaintiffs filed a consolidated complaint, and assert that the defendants breached their fiduciary duties by making, or failing to prevent salesforce.com, inc. and its management from making, statements or omissions that potentially subject the Company to liability and injury to its reputation. The action seeks damages on behalf of salesforce.com in an unspecified amount, among other forms of legal and equitable relief. Salesforce.com is named solely as a nominal defendant against which no recovery is sought. On December 22, 2006, the trial Court ordered that the lawsuit be bifurcated into two phases. The first phase was a bench trial to decide the legal issues of (a) whether a duty to disclose internal forecasts in an IPO registration statement exists in law, (b) if so, under what circumstances this duty exists, and (c) which party bears the burden of proof with respect to the foregoing two issues. The second phase was to address any remaining issues. On March 27, 2007, the Court ruled in favor of defendants and found that there is no duty to disclose internal forecasts in an IPO registration statement. The Court found the remaining two issues inapplicable to its analysis. On May 8, 2007, plaintiffs filed a Request for Dismissal asking the Court to dismiss the case with prejudice in its entirety. On May 18, 2007, plaintiffs filed a Notice of Entry of Dismissal. The case has now been dismissed with prejudice.

On May 31, 2007, a complaint was filed in the United States District Court for the Eastern District of Texas entitled *Triton IP, LLC v. salesforce.com, inc.*, alleging infringement of a patent held by Triton IP, LLP. We have filed an answer to the complaint. To date, no discovery has occurred in this case. We do not believe that the lawsuit has any merit and intend to defend the action vigorously.

Additionally, we are involved in various legal proceedings arising from the normal course of business activities. In our opinion, resolution of these matters is not expected to have a material adverse impact on our consolidated results of operations, cash flows or its financial position. However, depending on the nature and timing of any such dispute, an unfavorable resolution of a matter could materially affect our future results of operations, cash flows or financial position in a particular period.

ITEM 1A. RISK FACTORS

A restated description of the risk factors associated with our business is set forth below. This description includes any material changes to and supersedes the description of the risk factors included in our Annual Report on Form 10-K for the fiscal year ended January 31, 2007. The risks and uncertainties described below are not the only ones facing us. Other events that we do not currently anticipate or that we currently deem immaterial also may affect our results of operations and financial condition.

Risks Related to Our Business and Industry

Defects or disruptions in our service could diminish demand for our service and subject us to substantial liability.

Because our service is complex and we have incorporated a variety of new computer hardware and software, both developed in-house and acquired from third party vendors, our service may have errors or defects that users identify after they begin using it that could result in unanticipated downtime for our subscribers and harm our reputation and our business. Internet-based services frequently contain undetected errors when first introduced or when new versions or enhancements are released. We have from time to time found defects in our service and

Table of Contents

new errors in our existing service may be detected in the future. In addition, our customers may use our service in unanticipated ways that may cause a disruption in service for other customers attempting to access their data. Since our customers use our service for important aspects of their business, any errors, defects, disruptions in service or other performance problems with our service could hurt our reputation and may damage our customers' businesses. If that occurs, customers could elect not to renew, or delay or withhold payment to us, we could lose future sales or customers may make warranty claims against us, which could result in an increase in our provision for doubtful accounts, an increase in collection cycles for accounts receivable or the expense and risk of litigation.

Interruptions or delays in service from our third-party Web hosting facilities could impair the delivery of our service and harm our business.

We currently serve our customers from a third-party Web hosting facility located on the west coast of the United States. As part of our current disaster recovery arrangements, our production environment and all of our customers' data is currently replicated in near real-time in a separate standby facility located on the east coast. Features added through acquisition are temporarily served through alternate facilities. We do not control the operation of any of these facilities, and they are vulnerable to damage or interruption from earthquakes, floods, fires, power loss, telecommunications failures and similar events. They are also subject to break-ins, sabotage, intentional acts of vandalism and similar misconduct. Despite precautions taken at these facilities, the occurrence of a natural disaster or an act of terrorism, a decision to close the facilities without adequate notice or other unanticipated problems at these facilities could result in lengthy interruptions in our service. Even with the disaster recovery arrangements, our service could be interrupted.

As we continue to add data center capacity, we may move or transfer data. Despite precautions taken during this process, any unsuccessful data transfers may impair the delivery of our service. Further, any damage to, or failure of, our systems generally could result in interruptions in our service. Interruptions in our service may reduce our revenue, cause us to issue credits or pay penalties, cause customers to terminate their subscriptions and adversely affect our renewal rates and our ability to attract new customers. Our business will also be harmed if our customers and potential customers believe our service is unreliable.

We rely on third-party computer hardware and software that may be difficult to replace or which could cause errors or failures of our service.

We rely on computer hardware purchased or leased and software licensed from third parties in order to offer our service, including database software from Oracle Corporation. This hardware and software may not continue to be available on commercially reasonable terms, or at all. Any loss of the right to use any of this hardware or software could result in delays in the provisioning of our service until equivalent technology is either developed by us, or, if available, is identified, obtained and integrated, which could harm our business. Any errors or defects in third-party hardware or software could result in errors or a failure of our service which could harm our business.

If our security measures are breached and unauthorized access is obtained to a customer's data or our data, our service may be perceived as not being secure, customers may curtail or stop using our service and we may incur significant liabilities.

Our service involves the storage and transmission of customers' proprietary information, and security breaches could expose us to a risk of loss of this information, litigation and possible liability. If our security measures are breached as a result of third-party action, employee error, malfeasance or otherwise, during transfer of data to additional data centers or at any time, and, as a result, someone obtains unauthorized access to our data or our customers' data, our reputation will be damaged, our business may suffer and we could incur significant liability. Additionally, third parties may attempt to fraudulently induce employees or customers into disclosing sensitive information such as user names, passwords or other information in order to gain access to our data or

Table of Contents

our customers' data, which could result in significant legal and financial exposure and a loss of confidence in the security of our service that would harm our future business prospects. Because the techniques used to obtain unauthorized access, or to sabotage systems, change frequently and generally are not recognized until launched against a target, we may be unable to anticipate these techniques or to implement adequate preventative measures. If an actual or perceived breach of our security occurs, the market perception of the effectiveness of our security measures could be harmed and we could lose sales and customers. In addition, our customers may authorize third party technology providers, whose applications are available through our AppExchange directory, to access their customer data. Because we do not control the transmissions between our customers and third-party AppExchange technology providers, or the processing of such data by third-party AppExchange technology providers, we cannot ensure the complete integrity or security of such transmissions or processing.

If our on-demand application service is not widely accepted, our operating results will be harmed.

We derive substantially all of our revenue from subscriptions to our on-demand application service, and we expect this will continue for the foreseeable future. As a result, widespread acceptance of our service is critical to our future growth and success. Factors that may affect market acceptance of our service include:

reluctance by enterprises to migrate to an on-demand application service;

a limited number of service offerings and risks associated with developing new service offerings;

the price and performance of our service;

the level of customization we can offer;

the availability, performance and price of competing products and services;

reluctance by enterprises to trust third parties to store and manage their internal data; and

adverse publicity about us, our service or the viability, reliability or security of on-demand application services generally from third party reviews, industry analyst reports and adverse statements made by competitors.

Many of these factors are beyond our control. The inability of our on-demand application service to achieve widespread market acceptance would harm our business.

The market in which we participate is intensely competitive, and if we do not compete effectively, our operating results could be harmed.

The market for CRM applications is intensely competitive and rapidly changing, barriers to entry are relatively low, several of our competitors are larger and have more resources than we do, and with the introduction of new technologies and market entrants, we expect competition to intensify in the future. If we fail to compete effectively, our operating results will be harmed. Some of our principal competitors offer their products at a lower price, which has resulted in pricing pressures. If we are unable to maintain our current pricing, our operating results could be negatively impacted. In addition, pricing pressures and increased competition generally could result in reduced sales, reduced margins or the failure of our service to achieve or maintain more widespread market acceptance, any of which could harm our business.

Our current principal competitors include:

Edgar Filing: SALESFORCE COM INC - Form 10-Q

enterprise software application vendors including Amdocs Limited, Infor Global Solutions, Epicor, IBM Corporation, Microsoft Corporation, SAP AG, and Oracle Corporation;

packaged CRM software vendors, some of whom offer hosted services, such as FrontRange Solutions, Inc., Made2Manage Systems Inc., Pivotal Corporation, which is owned by CDC Software Corporation, a subsidiary of chinadotcom corporation, Sage Group plc, and SugarCRM;

Table of Contents

on-demand CRM application service providers such as Oracle, SAP, NetSuite, Inc., RightNow Technologies, Inc.; and

enterprise application service providers including British Telecom and IBM.

In addition, we face competition from businesses that develop their own CRM applications internally, as well as from enterprise software vendors and online service providers who may develop and/or bundle CRM products with their products in the future. For small business customers, we also face competition from companies whose offering is based on Microsoft Outlook and Excel for limited contact management functionality.

We also face competition from some of our larger and more established competitors who historically have been packaged CRM software vendors, but who also have directly competitive on-demand CRM application services offerings. Our professional services organization competes with a broad range of large systems integrators, including Accenture Ltd., BearingPoint, Inc. and IBM, as well as smaller independent consulting firms specializing in CRM implementations. We have relationships with many of these consulting companies and frequently work cooperatively on projects with them, even as we compete for business in other customer engagements.

Many of our potential competitors enjoy substantial competitive advantages, such as greater name recognition, longer operating histories and larger marketing budgets, as well as substantially greater financial, technical and other resources. In addition, many of our potential competitors have established marketing relationships and access to larger customer bases, and have major distribution agreements with consultants, system integrators and resellers.

As a result, our competitors may be able to respond more quickly and effectively than we can to new or changing opportunities, technologies, standards or customer requirements. Furthermore, because of these advantages, even if our service is more effective than the products that our competitors offer, potential customers might accept competitive products and services in lieu of purchasing our service. For all of these reasons, we may not be able to compete successfully against our current and future competitors.

If we experience significant fluctuations in our operating results and rate of growth and fail to balance our expenses with our revenue and earnings expectations, our results would be harmed and our stock price may fall rapidly and without advance notice.

Due to our limited operating history, our evolving business model and the unpredictability of our emerging industry, we may not be able to accurately forecast our rate of growth. We base our current and future expense levels and our investment plans on estimates of future revenue and future rate of growth. We may not be able to adjust our spending quickly enough if our revenue falls short of our expectations.

As a result, we expect that our operating results may fluctuate significantly on a quarterly basis. Revenue growth may not be sustainable and may decrease in the future. We believe that period-to-period comparisons of our operating results may not be meaningful, and you should not rely upon them as an indication of future performance.

Our quarterly results can fluctuate and if we fail to meet the expectations of analysts or investors, our stock price and the value of your investment could decline substantially.

Our quarterly operating results are likely to fluctuate, and if we fail to meet or exceed the expectations of securities analysts or investors, the trading price of our common stock could decline. Moreover, our stock price may be based on expectations of our future performance that may be unrealistic or that may not be met. Some of the important factors that could cause our revenues and operating results to fluctuate from quarter to quarter include:

our ability to retain and increase sales to existing customers, attract new customers and satisfy our customers' requirements;

Table of Contents

the renewal rates for our service;

changes in our pricing policies;

the introduction of new features to our service;

the rate of expansion and effectiveness of our sales force;

the length of the sales cycle for our service;

new product and service introductions by our competitors;

our success in selling our service to large enterprises;

variations in the revenue mix of editions of our service;

technical difficulties or interruptions in our service;

expenses related to increasing our data center capacity;

changes in foreign currency exchange rates;

changes in the effective tax rates and adjustments to the valuation allowance for our deferred tax assets;

general economic conditions in our geographic markets;

the timing of additional investments in our on-demand application service and in our consulting service;

regulatory compliance costs;

the timing of customer payments and payment defaults by customers;

costs associated with acquisitions of companies and technologies;

extraordinary expenses such as litigation or other dispute-related settlement payments;

the adverse financial statement impact of having to expense stock options; and

the timing of payroll and social tax expense which is triggered when employees in foreign jurisdictions exercise their vested stock options.

Some of these factors are not within our control, and the occurrence of one or more of them might cause our operating results to vary widely. As such, we believe that quarter-to-quarter comparisons of our revenues and operating results may not be meaningful and should not be relied upon as an indication of future performance.

We have incurred significant operating losses in the past and may incur significant operating losses in the future.

We have incurred significant quarterly operating losses in the past. As we are a relatively young company in an emerging market and with the requirement to expense stock options, we may incur significant operating losses in the future. In addition, we expect our costs and operating expenses to increase in the future as we expand our operations. If our revenue does not grow to offset these expected increased costs and operating expenses, we will not continue to be profitable. You should not consider recent quarterly revenue growth as indicative of our future performance. In fact, in future quarters we may not have any revenue growth and our revenue could decline. Furthermore, if our costs and operating expenses exceed our expectations, our financial performance will be adversely affected.

Because we recognize revenue from subscriptions for our service over the term of the subscription, downturns or upturns in sales may not be immediately reflected in our operating results.

We generally recognize revenue from customers ratably over the terms of their subscription agreements, which are typically 12 to 24 months, although terms can range from one to 60 months. As a result, much of the

Table of Contents

revenue we report in each quarter is deferred revenue from subscription agreements entered into during previous quarters. Consequently, a decline in new or renewed subscriptions in any one quarter will not necessarily be fully reflected in the revenue in that quarter and will negatively affect our revenue in future quarters. In addition, we may be unable to adjust our cost structure to reflect these reduced revenues. Accordingly, the effect of significant downturns in sales and market acceptance of our service may not be fully reflected in our results of operations until future periods. Our subscription model also makes it difficult for us to rapidly increase our revenue through additional sales in any period, as revenue from new customers must be recognized over the applicable subscription term.

The market for our technology delivery model and on-demand application services is immature and volatile, and if it does not develop or develops more slowly than we expect, our business will be harmed.

The market for on-demand application services is relatively new and unproven, and it is uncertain whether these services will achieve and sustain high levels of demand and market acceptance. Our success will depend to a substantial extent on the willingness of enterprises, large and small, to increase their use of on-demand application services in general, and for CRM in particular. Many enterprises have invested substantial personnel and financial resources to integrate traditional enterprise software into their businesses, and therefore may be reluctant or unwilling to migrate to an on-demand application service. Furthermore, some enterprises may be reluctant or unwilling to use on-demand application services because they have concerns regarding the risks associated with security capabilities, among other things, of the technology delivery model associated with these services. If enterprises do not perceive the benefits of on-demand application services, then the market for these services may not develop at all, or it may develop more slowly than we expect, either of which would significantly adversely affect our operating results. In addition, as a new company in this unproven market, we have limited insight into trends that may develop and affect our business. We may make errors in predicting and reacting to relevant business trends, which could harm our business.

Our success also depends on the willingness of third-party developers to build applications that are complementary to our service. Without the development of these applications, both current and potential customers may not find our service sufficiently attractive. In fiscal 2006, we introduced the AppExchange directory, a central online marketplace for on-demand applications that we host for our customers, developers and partners to exchange custom on-demand applications that are built on, or can integrate with, our service. These custom applications, some of which are not CRM-related, include applications ranging from expense management to purchasing to recruiting. It is uncertain whether this service will be accepted and adopted by our customers, developers and partners or will increase the demand for subscriptions to our service.

We have limited history with our subscription model to accurately predict the rate of customer subscription renewals and the impact these renewal rates will have on our future revenue or operating results.

Our customers have no obligation to renew their subscriptions for our service after the expiration of their initial subscription period and in fact, some customers have elected not to do so. In addition, our customers may renew for a lower priced edition of our service or for fewer subscriptions. We have limited historical data with respect to rates of customer subscription renewals, particularly for our enterprise customers who purchase a large number of subscriptions under multi-year contracts, so we cannot accurately predict customer renewal rates. Our customers' renewal rates may decline or fluctuate as a result of a number of factors, including their dissatisfaction with our service and their ability to continue their operations and spending levels. If our customers do not renew their subscriptions for our service, our revenue will decline and our business will suffer.

Our future success also depends in part on our ability to sell additional features and services, more subscriptions or enhanced editions of our service to our current customers. This may require increasingly sophisticated and costly sales efforts that are targeted at senior management. If these efforts are not successful, our business may suffer.

Table of Contents

Our growth could strain our personnel resources and infrastructure, and if we are unable to implement appropriate controls and procedures to manage our growth, we may not be able to successfully implement our business plan.

We are currently experiencing a period of increasing headcount and rapid growth in our operations, which has placed, and will continue to place, to the extent that we are able to sustain such growth, a significant strain on our management, administrative, operational and financial infrastructure. We anticipate that further growth will be required to address increases in our customer base, as well as our expansion into new geographic areas.

Our success will depend in part upon the ability of our senior management to manage this growth effectively. To do so, we must continue to hire, train and manage new employees as needed. If our new hires perform poorly, or if we are unsuccessful in hiring, training, managing and integrating these new employees, or if we are not successful in retaining our existing employees, our business may be harmed. To manage the expected growth of our operations and personnel, we will need to continue to improve our operational, financial and management controls and our reporting systems and procedures. The additional headcount and capital investments we are adding will increase our cost base, which will make it more difficult for us to offset any future revenue shortfalls by offsetting expense reductions in the short term. If we fail to successfully manage our growth, we will be unable to execute our business plan.

We derive a significant portion of our revenue from small businesses, which have a greater rate of attrition and non-renewal than medium-sized and large enterprise customers.

Our small business customers, which we consider to be companies with fewer than 200 employees, typically have shorter initial subscription periods and, based on our limited experience to date, have had a higher rate of attrition and non-renewal as compared to our medium-sized and large enterprise customers. If we cannot replace our small business customers that do not renew their subscriptions for our service with new customers quickly enough, our revenue could decline.

Our limited operating history may impede acceptance of our service by medium-sized and large customers.

Our ability to increase revenue and maintain profitability depends, in large part, on widespread acceptance of our service by medium-sized and large businesses. Our efforts to sell to these customers may not continue to be successful. In particular, because we are a relatively new company with a limited operating history, these target customers may have concerns regarding our viability and may prefer to purchase critical CRM applications from one of our larger, more established competitors. Even if we are able to sell our service to these types of customers, they may insist on additional assurances from us that we will be able to provide adequate levels of service, which could harm our business.

As more of our sales efforts are targeted at larger enterprise customers, our sales cycle may become more time-consuming and expensive, we may encounter pricing pressure and implementation challenges, and we may have to delay revenue recognition on these customers, all of which could harm our business.

As we target more of our sales efforts at larger enterprise customers, we will face greater costs, longer sales cycles and less predictability in completing some of our sales. In this market segment, the customer's decision to use our service may be an enterprise-wide decision and, if so, these types of sales would require us to provide greater levels of education regarding the use and benefits of our service, as well as education regarding privacy and data protection laws and regulations to prospective customers with international operations. In addition, larger customers may demand more customization, integration services and features. As a result of these factors, these sales opportunities may require us to devote greater sales support and professional services resources to individual customers, driving up costs and time required to complete sales and diverting sales and professional services resources to a smaller number of larger transactions, while at the same time requiring us to delay revenue recognition on some of these transactions until the technical or implementation requirements have been

Table of Contents

met. In addition, larger enterprise customers may seek volume discounts and price concessions that could make these transactions less profitable.

Periodic restructurings of our sales organization can be disruptive and may negatively impact our revenues.

We periodically restructure or make other adjustments to our sales organization in response to market opportunities, competitive threats, management changes, product introductions or enhancements, sales performance, and other internal and external considerations. In the past, these restructurings have sometimes resulted in a temporary lack of focus and reduced productivity; these effects could recur in connection with any future sales restructurings we might undertake and our revenues could be negatively affected.

If we are not able to develop enhancements and new features to our existing service or acceptable new services that keep pace with technological developments, our business will be harmed.

If we are unable to develop enhancements to and new features for our existing service or acceptable new services that keep pace with rapid technological developments, our business will be harmed. The success of enhancements, new features and services depends on several factors, including the timely completion, introduction and market acceptance of the feature or edition. Failure in this regard may significantly impair our revenue growth. In addition, because our service is designed to operate on a variety of network hardware and software platforms using a standard browser, we will need to continuously modify and enhance our service to keep pace with changes in Internet-related hardware, software, communication, browser and database technologies. We may not be successful in either developing these modifications and enhancements or in timely bringing them to market. Furthermore, uncertainties about the timing and nature of new network platforms or technologies, or modifications to existing platforms or technologies, could increase our research and development expenses. Any failure of our service to operate effectively with future network platforms and technologies could reduce the demand for our service, result in customer dissatisfaction and harm our business.

Efforts we are making to expand our service beyond the CRM market may not succeed and may cause us to incur additional liabilities.

We introduced the AppExchange directory in fiscal 2006, an on-line marketplace for on-demand applications that run on our Apex on-demand application service platform. The market for third-party on-demand applications and our platform is new and unproven, and it is uncertain whether the initiative will ever result in significant revenue for us. Among other things, the success of Apex will depend to a substantial extent on the willingness of third-party technology providers to write on-demand applications that run on our platform and the willingness of enterprises, large and small, to purchase and deploy these applications. If third-party technology providers or enterprises do not perceive the benefits of our on-line application marketplace, then the market for this initiative may not develop at all, or it may develop more slowly than we expect, either of which would affect our ability to generate revenue. Given this new and unproven market, we have limited insight into trends that may develop and affect this initiative. In addition, our customers may authorize such third-party technology providers to access their customer data. Because we do not control the transmissions between our customers and third-party technology providers or the processing of such data by third-party technology providers, we cannot ensure the complete integrity or security of such transmissions or processing. Further, despite contract provisions designed to protect us, customers may look to us to support and warrant the third-party applications, which may expose us to potential claims, liabilities and obligations for applications we did not develop or sell. Moreover, the AppExchange directory, and other efforts to expand our service beyond the CRM market, may divert management resources from existing operations and require us to commit significant financial resources to an unproven business, which may harm our business.

Table of Contents

As we acquire companies or technologies in the future, they could prove difficult to integrate, disrupt our business, dilute stockholder value and adversely affect our operating results and the value of our common stock.

As part of our business strategy, we may acquire, enter into joint ventures with or make investments in complementary companies, services and technologies in the future. Acquisitions and investments involve numerous risks, including:

difficulties in integrating operations, technologies, services and personnel;

diversion of financial and managerial resources from existing operations;

risk of entering new markets in which we have little to no experience;

potential write-offs of acquired assets or investments;

potential loss of key employees;

inability to generate sufficient revenue to offset acquisition or investment costs;

negative impact to our results of operations because of the depreciation and amortization of amounts related to acquired intangible assets, fixed assets and deferred compensation, and the loss of acquired deferred revenue;

delays in customer purchases due to uncertainty and the inability to maintain relationships with customers of the acquired businesses; and

the need to implement controls, procedures and policies appropriate for a public company at companies that prior to the acquisition lacked such controls, procedures and policies.

In addition, if we finance acquisitions by issuing debt or equity securities, our existing stockholders may be diluted which could affect the market price of our stock. Further, if we fail to properly evaluate and execute acquisitions or investments, our business and prospects may be seriously harmed and the value of our common stock may decline.

If we fail to develop our brand cost-effectively, our business may suffer.

We believe that developing and maintaining awareness of the salesforce.com brand in a cost-effective manner is critical to achieving widespread acceptance of our existing and future services and is an important element in attracting new customers. Furthermore, we believe that the importance of brand recognition will increase as competition in our market develops. Successful promotion of our brand will depend largely on the effectiveness of our marketing efforts and on our ability to provide reliable and useful services at competitive prices. In the past, our efforts to build our brand have involved significant expense. Brand promotion activities may not yield increased revenue, and even if they do, any increased revenue may not offset the expenses we incurred in building our brand. If we fail to successfully promote and maintain our brand, or incur substantial expenses in an unsuccessful attempt to promote and maintain our brand, we may fail to attract enough new customers or retain our existing customers to the extent necessary to realize a sufficient return on our brand-building efforts, and our business could suffer.

Failure to adequately expand our direct sales force and develop and expand our indirect sales channel will impede our growth.

Edgar Filing: SALESFORCE COM INC - Form 10-Q

We continue to be substantially dependent on our direct sales force to obtain new customers, particularly large enterprise customers, and to manage our customer base. We believe that there is significant competition for direct sales personnel with the advanced sales skills and technical knowledge we need. Our ability to achieve significant growth in revenue in the future will depend, in large part, on our success in recruiting, training and retaining sufficient numbers of direct sales personnel. New hires require significant training and may, in some

Table of Contents

cases, take more than a year before they achieve full productivity. Our recent hires and planned hires may not become as productive as we would like, and we may be unable to hire sufficient numbers of qualified individuals in the future in the markets where we do business. If we are unable to hire and develop sufficient numbers of productive direct sales personnel, sales of our service will suffer and our growth will be impeded. In addition, we plan to develop and expand our indirect sales channel by engaging third-party resellers. Because of our on-demand service model, the structuring of such relationships is complex and requires the investment of significant business, financial and other resources. If we are unable to structure successful third-party channel relationships that enable us to enter markets we otherwise would have greater difficulty entering, our growth will be inhibited.

Sales to customers outside the United States expose us to risks inherent in international sales.

Because we sell our service throughout the world, we are subject to risks and challenges that we would otherwise not face if we conducted our business only in the United States. For example, sales in Europe and Asia Pacific together have historically represented approximately 20 percent of our total revenues, and we intend to continue to expand our international sales efforts. The risks and challenges associated with sales to customers outside the United States include:

localization of our service, including translation into foreign languages and associated expenses;

laws and business practices favoring local competitors;

compliance with multiple, conflicting and changing governmental laws and regulations, including employment, tax, privacy and data protection laws and regulations;

regional data privacy laws that apply to the transmission of our customers' data to the United States;

foreign currency fluctuations, whose effects we may not be able to mitigate through our hedging program;

different pricing environments;

difficulties in staffing and managing foreign operations;

different or lesser protection of our intellectual property;

longer accounts receivable payment cycles and other collection difficulties; and

regional economic and political conditions.

Any of these factors could negatively impact our business and results of operations.

Additionally, some of our international subscription fees are currently denominated in U.S. dollars and paid in local currency. As a result, fluctuations in the value of the U.S. dollar and foreign currencies may make the service more expensive for international customers, which could harm our business.

Any failure to protect our intellectual property rights could impair our ability to protect our proprietary technology and our brand.

Edgar Filing: SALESFORCE COM INC - Form 10-Q

If we fail to protect our intellectual property rights adequately, our competitors might gain access to our technology, and our business might be harmed. In addition, defending our intellectual property rights might entail significant expense. Any of our trademarks or other intellectual property rights may be challenged by others or invalidated through administrative process or litigation. While we have one U.S. patent and other U.S. and international patent applications pending, we may be unable to obtain patent protection for the technology covered in our patent applications. In addition, our existing patent and any patents issued in the future may not provide us with competitive advantages, or may be successfully challenged by third parties. Furthermore, legal standards relating to the validity, enforceability and scope of protection of intellectual property rights are

Table of Contents

uncertain. Effective patent, trademark, copyright and trade secret protection may not be available to us in every country in which our service is available. The laws of some foreign countries may not be as protective of intellectual property rights as those in the U.S., and mechanisms for enforcement of intellectual property rights may be inadequate. Accordingly, despite our efforts, we may be unable to prevent third parties from infringing upon or misappropriating our intellectual property.

We might be required to spend significant resources to monitor and protect our intellectual property rights. We may initiate claims or litigation against third parties for infringement of our proprietary rights or to establish the validity of our proprietary rights. Any litigation, whether or not it is resolved in our favor, could result in significant expense to us and divert the efforts of our technical and management personnel.

We have been and may in the future be sued by third parties for alleged infringement of their proprietary rights.

The software and Internet industries are characterized by the existence of a large number of patents, trademarks and copyrights and by frequent litigation based on allegations of infringement or other violations of intellectual property rights. We have received in the past, and may receive in the future, communications from third parties claiming that we have infringed on the intellectual property rights of others. In addition, we have been, and may in the future be, sued by third parties for alleged infringement of their proprietary rights. Our technologies may not be able to withstand any third-party claims or rights against their use. Any intellectual property claims, with or without merit, could be time-consuming and expensive to resolve, could divert management attention from executing our business plan and could require us to pay monetary damages or enter into royalty or licensing agreements. In addition, many of our subscription agreements require us to indemnify our customers for third-party intellectual property infringement claims, which would increase the cost to us of an adverse ruling on such a claim. An adverse determination could also prevent us from offering our service to others.

Evolving regulation of the Internet may affect us adversely.

As Internet commerce continues to evolve, increasing regulation by federal, state or foreign agencies becomes more likely. For example, we believe increased regulation is likely in the area of data privacy, and laws and regulations applying to the solicitation, collection, processing or use of personal or consumer information could affect our customers' ability to use and share data, potentially reducing demand for CRM solutions and restricting our ability to store, process and share data with our customers. In addition, taxation of services provided over the Internet or other charges imposed by government agencies or by private organizations for accessing the Internet may also be imposed. Any regulation imposing greater fees for Internet use or restricting information exchange over the Internet could result in a decline in the use of the Internet and the viability of Internet-based services, which could harm our business.

Privacy concerns and laws or other domestic or foreign regulations may reduce the effectiveness of our solution and adversely affect our business.

Our customers can use our service to store contact and other personal or identifying information regarding their customers and contacts. Federal, state and foreign government bodies and agencies, however, have adopted or are considering adopting laws and regulations regarding the collection, use and disclosure of personal information obtained from consumers and individuals. The costs of compliance with, and other burdens imposed by, such laws and regulations that are applicable to the businesses of our customers may limit the use and adoption of our service and reduce overall demand for it. Furthermore, privacy concerns may cause our customers' customers to resist providing the personal data necessary to allow our customers to use our service effectively. Even the perception of privacy concerns, whether or not valid, may inhibit market adoption of our service in certain industries. For example, regulations such as the Gramm-Leach-Bliley Act, which protects and restricts the use of consumer credit and financial information, and the Health Insurance Portability and

Table of Contents

Accountability Act of 1996, which regulates the use and disclosure of personal health information, impose significant requirements and obligations on businesses that may affect the use and adoption of our service.

The European Union has also adopted a data privacy directive that requires member states to impose restrictions on the collection and use of personal data that, in some respects, are far more stringent, and impose more significant burdens on subject businesses, than current privacy standards in the United States. All of these domestic and international legislative and regulatory initiatives may adversely affect our customers ability to collect and/or use demographic and personal information from their customers, which could reduce demand for our service.

In addition to government activity, privacy advocacy groups and the technology and other industries are considering various new, additional or different self-regulatory standards that may place additional burdens on us. If the gathering of personal information were to be curtailed in this manner, CRM solutions would be less effective, which may reduce demand for our service and harm our business.

Our business is subject to changing regulations regarding corporate governance and public disclosure that have increased both our costs and the risk of noncompliance.

We are subject to rules and regulations by various governing bodies, including the Securities and Exchange Commission, New York Stock Exchange and Public Company Accounting Oversight Board, which are charged with the protection of investors and the oversight of companies whose securities are publicly traded. Our efforts to comply with these new regulations have resulted in, and are likely to continue to result in, increased general and administrative expenses and a diversion of management time and attention from revenue-generating activities to compliance activities.

We are required to comply on an on-going basis with the Sarbanes-Oxley Act, or SOX, requirements involving the assessment of our internal controls over financial reporting and our independent public accountants' audit of that assessment. Our efforts to comply with the SOX requirements have required, and will continue to require the commitment of significant financial and personnel resources.

Moreover, because these laws, regulations and standards are subject to varying interpretations, their application in practice may evolve over time as new guidance becomes available. This evolution may result in continuing uncertainty regarding compliance matters and additional costs necessitated by ongoing revisions to our disclosure and governance practices. If we fail to address and comply with these regulations and any subsequent changes, our business may be harmed.

We are dependent on our management team and development and operations personnel, and the loss of one or more key employees or groups could harm our business and prevent us from implementing our business plan in a timely manner.

Our success depends largely upon the continued services of our executive officers and other key members of management. From time to time, there may be changes in our executive management team resulting from the hiring or departure of executives. Such changes in our executive management team may be disruptive to our business.

We are also substantially dependent on the continued service of our existing development and operations personnel because of the complexity of our service and technologies.

We do not have employment agreements with any of our executive officers, key management, development or operations personnel and, therefore, they could terminate their employment with us at any time. We do not maintain key person life insurance policies on any of our employees. The loss of one or more of our key employees or groups could seriously harm our business.

Table of Contents

Because competition for our target employees is intense, we may not be able to attract and retain the highly skilled employees we need to support our planned growth.

To continue to execute on our growth plan, we must attract and retain highly qualified personnel. Competition for these personnel is intense, especially for engineers with high levels of experience in designing and developing software and Internet-related services and senior sales executives. We may not be successful in attracting and retaining qualified personnel. We have from time to time in the past experienced, and we expect to continue to experience in the future, difficulty in hiring and retaining highly skilled employees with appropriate qualifications. Many of the companies with which we compete for experienced personnel have greater resources than we have. In addition, in making employment decisions, particularly in the Internet and high-technology industries, job candidates often consider the value of the stock options they are to receive in connection with their employment. Volatility in the price of our stock may, therefore, adversely affect our ability to attract or retain key employees. Furthermore, the requirement to expense stock options may discourage us from granting the size or type of stock option awards that job candidates require to join our company. If we fail to attract new personnel or fail to retain and motivate our current personnel, our business and future growth prospects could be severely harmed.

We might require additional capital to support business growth, and this capital might not be available.

We intend to continue to make investments to support our business growth and may require additional funds to respond to business challenges or opportunities, including the need to develop new services or enhance our existing service, enhance our operating infrastructure or acquire complementary businesses and technologies. Accordingly, we may need to engage in equity or debt financings to secure additional funds. If we raise additional funds through further issuances of equity or convertible debt securities, our existing stockholders could suffer significant dilution, and any new equity securities we issue could have rights, preferences and privileges superior to those of holders of our common stock. Any debt financing secured by us in the future could involve restrictive covenants relating to our capital raising activities and other financial and operational matters, which may make it more difficult for us to obtain additional capital and to pursue business opportunities, including potential acquisitions. In addition, we may not be able to obtain additional financing on terms favorable to us, if at all. If we are unable to obtain adequate financing or financing on terms satisfactory to us, when we require it, our ability to continue to support our business growth and to respond to business challenges could be significantly limited.

We may be required to purchase the interest in our Japanese joint venture held by our joint venture partner, under certain circumstances, on terms that may not be favorable to us.

In some circumstances, we may be required to purchase the interest of our Japanese joint venture partner. If we default under the terms of our joint venture agreement with our joint venture partner, or if we and our partner disagree over a course of action proposed for the joint venture entity and the disagreement continues, then our partner may require that we purchase its interest in the joint venture. In the event we are required to purchase our partner's interest in the joint venture, we could be forced to make an unanticipated outlay of a significant amount of capital, which could harm our financial condition.

Expensing stock options will continue to adversely affect our reported results of operations.

We account for stock-based expenses pursuant to the provisions of Statement of Financial Accounting Standards No. 123 (revised 2004), *Share-Based Payment*, which requires that all share-based payments, including grants of employee stock options, be recognized as an expense in the statement of operations based on their fair values and vesting periods.

Our stock-based charges are significant, and represented 8 percent of total revenues during the three months ended July 31, 2007. We believe the requirement to expense stock options will continue to materially reduce our future reported results of operations.

Table of Contents

Unanticipated changes in our effective tax rate could adversely affect our future results.

We are subject to income taxes in the United States and various foreign jurisdictions, and our domestic and international tax liabilities are subject to the allocation of expenses in differing jurisdictions.

Our effective tax rate has experienced significant fluctuations over the past fiscal year in comparison to previous years. The tax rate is affected by changes in the mix of earnings and losses in countries with differing statutory tax rates, certain non-deductible expenses arising from the requirement to expense stock options and the valuation of deferred tax assets and liabilities. Increases in our effective tax rate could materially affect our net results.

Risks Related to Ownership of Our Common Stock

The trading price of our common stock is likely to be volatile and could subject us to litigation.

The trading prices of the securities of technology companies have been highly volatile. Accordingly, the trading price of our common stock has been and is likely to continue to be subject to wide fluctuations. For example, during the 12 months ended July 31, 2007, the trading price of our common stock has ranged from a closing price of \$24.66 to \$49.88 per share. Further, our common stock has a limited trading history. Factors affecting the trading price of our common stock include:

variations in our operating results and cash flows;

the historical quarterly net increases in the number of customers and paying subscriptions, either independently or as compared with publicly published expectations of industry, financial or other analysts that cover our company;

announcements of technological innovations, new services or service enhancements, strategic alliances or significant agreements by us or by our competitors;

customer cancellations or delays in customer purchases;

recruitment or departure of key personnel;

changes in the estimates of our operating results or changes in recommendations by securities analysts that elect to follow our common stock;

market conditions in our industry, the industries of our customers and the economy as a whole; and

disruptions in our service due to computer hardware, software or network problems or due to a natural disaster, act of terrorism or other catastrophic event.

In addition, if the market for technology stocks or the stock market in general experiences uneven investor confidence, the trading price of our common stock could decline for reasons unrelated to our business, operating results or financial condition. The trading price of our common stock might also decline in reaction to events that affect other companies within, or outside, our industry even if these events do not directly affect us. Any volatility in our stock price may result in litigation, which may harm our business and results of operations.

If securities analysts stop publishing research or reports about us or our business or if they downgrade our stock, the price of our stock could decline.

The trading market for our common stock relies in part on the research and reports that industry or financial analysts publish about us or our business. We do not control these analysts. If one or more of the analysts who do cover us downgrade our stock, our stock price would likely decline rapidly. Furthermore, if one or more of these analysts cease coverage of our company, we could lose visibility in the market, which in turn could cause our stock price to decline.

Table of Contents

The concentration of our capital stock ownership with insiders will likely limit your ability to influence corporate matters.

Our executive officers, directors, current 5 percent or greater stockholders and affiliated entities together beneficially own a majority of our outstanding common stock. As a result, these stockholders, acting together, will have control over most matters that require approval by our stockholders, including the election of directors and approval of significant corporate transactions, even if other stockholders oppose them. This concentration of ownership might also have the effect of delaying or preventing a change of control of our company that other stockholders may view as beneficial.

Provisions in our amended and restated certificate of incorporation and bylaws and Delaware law might discourage, delay or prevent a change of control of our company or changes in our management and, therefore, depress the trading price of our common stock.

Our amended and restated certificate of incorporation and bylaws contain provisions that could depress the trading price of our common stock by acting to discourage, delay or prevent a change in control of our company or changes in our management that the stockholders of our company may deem advantageous. These provisions among other things:

establish a classified board of directors so that not all members of our board are elected at one time;

permit the board of directors to establish the number of directors;

provide that directors may only be removed for cause and only with the approval of 75 percent of our stockholders;

require super-majority voting to amend some provisions in our amended and restated certificate of incorporation and bylaws;

authorize the issuance of blank check preferred stock that our board could issue to increase the number of outstanding shares and to discourage a takeover attempt;

eliminate the ability of our stockholders to call special meetings of stockholders;

prohibit stockholder action by written consent, which requires all stockholder actions to be taken at a meeting of our stockholders;

provide that the board of directors is expressly authorized to make, alter or repeal our bylaws; and

establish advance notice requirements for nominations for election to our board or for proposing matters that can be acted upon by stockholders at stockholder meetings.

In addition, Section 203 of the Delaware General Corporation Law may discourage, delay or prevent a change in control of our company. Section 203 imposes certain restrictions on merger, business combinations and other transactions between us and holders of 15 percent or more of our common stock.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Not applicable.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable.

Table of Contents**ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS**

Our 2007 Annual Meeting of Stockholders was held on July 12, 2007. The following proposals were adopted as follows:

- To elect three Class III directors, Stratton Sclavos, Lawrence Tomlinson and Shirley Young, to serve for a term of three years and until their successors are duly elected and qualified:

	For	Withheld
Stratton Sclavos	59,905,544	46,992,232
Lawrence Tomlinson	89,896,856	17,000,920
Shirley Young	87,407,525	19,490,251

- To ratify the appointment of Ernst & Young LLP as our independent registered public accounting firm for the fiscal year ending January 31, 2008:

	For	Against	Withheld
	104,051,590	2,835,726	10,460

Other directors whose term continued after the 2007 Annual Meeting of Stockholders include Marc Benioff, Craig Conway, Alan Hassenfeld, Craig Ramsey, Sanford R. Robertson and Maynard Webb. In addition, Sanford R. Robertson was appointed by the Board of Directors as its lead independent director on June 7, 2007.
