Common Stock, par value \$.0001 per share	New York Stock Exchange LLC
Securities registered or to be registered pursuant to	None

Section 12(g) of the Act.

Securities for which there is a reporting obligation pursuant to

Section 15(d) of the Act.

None

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report: 13,280,927 Shares of Common Stock

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or (15)(d) of the Securities Exchange Act of 1934. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter periods that the registrant was required to file such reports), and (2) has been subject to such reporting requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or emerging growth company. See the definition of large accelerated filer, accelerated filer, and emerging growth company in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer	Accelerated Filer	Non-Accelerated Filer	Emerging Growth Company
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

If an emerging growth company that prepares its financial statements in accordance with U.S. GAAP, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP	International Financial Reporting Standards as issued by the International Accounting Standards Board	Other
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

FORWARD-LOOKING STATEMENTS

This Annual Report should be read in conjunction with the financial statements and accompanying notes included herein.

Statements included in this Annual Report on Form 20-F (this Annual Report) which are not historical facts (including our statements concerning plans and objectives of management for future operations or economic performance, or assumptions related thereto) are forward-looking statements. In addition, we and our representatives may from time to time make other oral or written statements which are also forward-looking statements. Such statements include, in particular, statements about our plans, strategies, business prospects, changes and trends in our business, and the markets in which we operate as described in this Annual Report. In some cases, you can identify the forward-looking statements by the use of words such as may, could, should, would, expect, plan, anticipate, intend, for estimate, predict, propose, potential, continue or the negative of these terms or other comparable terminology.

Forward-looking statements appear in a number of places and include statements with respect to, among other things:

our ability to maintain or develop new and existing customer relationships with major refined product importers and exporters, major crude oil companies and major commodity traders, including our ability to enter into long-term charters for our vessels;

our ability to successfully grow our business, our ability to identify and consummate desirable acquisitions, joint ventures or strategic alliances, business strategy, areas of possible expansion and our capacity to manage our expanding business;

future levels of cash flow and levels of dividends, as well as our future cash dividend policy;

our future opening and financial results, including the amount of filed hire and profit share that we may receive;

tanker industry trends, including charter rates and vessel values and factors affecting vessel supply and demand;

our ability to take delivery of, integrate into our fleet, and employ any newbuildings we may order in the future and the ability of shipyards to deliver vessels on a timely basis;

the aging of our vessels and resultant increases in operation and drydocking costs;

the ability of our vessels to pass classification inspection and vetting inspections by oil majors;

significant changes in vessel performance, including increased vessel breakdowns;

the creditworthiness of our charterers and the ability of our contract counterparties to fulfill their obligations to us;

our ability to repay outstanding indebtedness, to fulfill other financial obligations, to obtain additional financing and to obtain replacement charters for our vessels, in each case, at commercially acceptable rates or at all;

potential liability from litigation and our vessel operations, including discharge of pollutants;

our track record, and past and future performance, in safety, environmental and regulatory matters;

changes in the availability and costs of funding due to conditions in the bank market, capital markets and other factors;

global economic outlook and growth and changes in general economic and business conditions;

general domestic and international political conditions, including wars, acts of piracy and terrorism;

changes in production of or demand for oil and petroleum products, either globally or in particular regions;

changes in the standard of service or the ability of our technical manager to be approved as required;

increases or decreases in domestic or worldwide oil consumption;

increases in costs and expenses, including but not limited to: crew wages, insurance, provisions, port expenses, lube oil, bunkers, repairs, maintenance and general and administrative expenses;

the adequacy of our insurance arrangements and our ability to obtain insurance and required certifications;

the expected cost of, and our ability to comply with, governmental regulations and maritime self-regulatory organization standards, as well as standard regulations imposed by our charterers applicable to our business;

the changes to the regulatory requirements applicable to the shipping and oil transportation industry, including, without limitation, stricter requirements adopted by international organizations, such as the International Maritime Organization and the European Union, or by individual countries or charterers and

actions taken by regulatory authorities and governing such areas as safety and environmental compliance;

potential liability and costs due to environmental, safety and other incidents involving our vessels;

Table of Contents

the effects of increasing emphasis on environmental and safety concerns by customers, governments and others, as well as changes in maritime regulations and standards;

our ability to retain key executive officers; and

our ability to leverage to our advantage, Navios Maritime Holdings Inc. (Navios Holdings) relationships and reputation in the shipping industry.

These and other forward-looking statements are made based upon management's current plans, expectations, estimates, assumptions and beliefs concerning future events impacting us and therefore involve a number of risks and uncertainties, including those risks discussed in Item 3. Key Information .

The forward-looking statements, contained in this Annual Report, are based on our current expectations and beliefs concerning future developments and their potential effects on us. There can be no assurance that future developments affecting us will be those that we have anticipated.

The forward-looking statements are inherently subject to significant uncertainties and contingencies, many of which are beyond our control. We caution that forward-looking statements are not guarantees and that actual results could differ materially from those expressed or implied in the forward-looking statements.

We undertake no obligation to update any forward-looking statement or statements to reflect events or circumstances after the date on which such statement is made or to reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for us to predict all of these factors. Further, we cannot assess the impact of each such factor on our business or the extent to which any factor, or combination of factors, may cause actual results to be materially different from those contained in any forward-looking statement.

PART I

Item 1. Identity of Directors, Senior Management and Advisers

Not Applicable.

Item 2. Offer Statistics and Expected Timetable

Not Applicable.

Item 3. Key Information

A. Selected Financial Data

Navios Maritime Acquisition Corporation (sometimes referred to herein as Navios Acquisition, the Company, we or us) was incorporated in the Republic of Marshall Islands on March 14, 2008 (refer to Item 4. Information on the Company).

Navios Acquisition's selected historical financial information and operating results for the years ended December 31, 2018, 2017, 2016, 2015 and 2014 is derived from the audited consolidated financial statements of Navios Acquisition.

The selected consolidated statements of operations for the years ended December 31, 2018, 2017 and 2016 and the consolidated balance sheet data as of December 31, 2018 and 2017 have been derived from our audited consolidated financial statements included elsewhere in this

Annual Report. The consolidated statements of operations data for the years ended December 31, 2015 and December 31, 2014, and the consolidated balance sheet data as of December 31, 2016, 2015 and 2014, have been derived from our audited consolidated financial statements which are not included in this document and are available at www.sec.gov. The selected consolidated financial data should be read in conjunction with Item 5. Operating and Financial Review and Prospects, and other financial information included elsewhere in this Annual Report. The selected consolidated financial data is a summary of, is derived from, and is qualified by reference to, our audited consolidated financial statements and notes thereto, which have been prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP). The historical data included below and elsewhere in this Annual Report is not necessarily indicative of our future performance.

All issued and outstanding shares of common stock, conversion terms of preferred stock, options to purchase common stock and per share amounts contained in the financial statements, in accordance with Staff Accounting Bulletin Topic 4C, have been retroactively adjusted to reflect the reverse split for all periods presented.

B. Capitalization and indebtedness

Not applicable.

C. Reasons for the offer and use of proceeds

Not applicable.

D. Risk factors

RISK FACTORS

The following factors should be considered carefully in evaluating whether to purchase our securities. These factors should be considered in conjunction with any other information included or incorporated by reference herein, including in conjunction with forward-looking statements made herein.

Risks Relating to the Shipping Industry and the Operation of our Vessels

The cyclical nature of the tanker industry may lead to volatility in charter rates and vessel values, which could adversely affect our future earnings.

Oil has been one of the world's primary energy sources for a number of decades. The global economic growth of previous years had a significant impact on the demand for oil and subsequently on the oil trade and the demand for shipping oil and oil products. However, the past several years were marked by a major economic slowdown, the rise and continued expansion of shale oil production in the U.S. and extreme volatility that has had, and continues to have, a significant impact on world trade, including the oil trade. Global economic conditions, while somewhat more stable than in the immediate aftermath of the financial crisis, remain uncertain with respect to long-term economic growth. In particular, the uncertainty surrounding the future of the Eurozone, the economic prospects of the United States, the future economic growth of China, Brazil, Russia, India and other emerging markets and changing oil production and consumption patterns due to efficiencies, new technologies and government policy changes are all expected to affect demand for product and crude tankers going-forward. Demand for oil and refined petroleum products about equals current supply as a result of the steady global economic environment and a general global trend towards energy efficient technologies, which in combination with the limited availability of trade credit and an increasing supply of vessels, led to decreased demand for tanker vessels, creating downward pressure on charter rates. Energy prices sharply declined from mid-2014 to mid-February 2016 primarily due to increased oil production worldwide. As a result, demand for tankers to move oil and refined petroleum products increased significantly and average spot and period charter rates for product and crude tankers rose to above historically average rates. Oil prices bottomed as inventories reached high levels in the beginning of 2016 causing a general decline in charter rates for crude and product rates. Charter rates for both crude and product tankers rose at the end of 2018, due to the global economic expansion, declines in inventories of crude and products and high scrapping, particularly VLCCs. If oil demand grows in the future, it is expected to come primarily from emerging markets which have been historically volatile, such as China and India, and a slowdown in these countries' economies may severely affect global oil demand growth, and may result in protracted, reduced consumption of oil products and a decreased demand for our vessels and lower charter rates, which could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to make cash distributions. Should the Organization of the Petroleum Exporting Countries (OPEC) significantly reduce oil production or should there be significant declines in non-OPEC oil production, that may result in a protracted period of reduced oil shipments and a decreased demand for our vessels and lower charter

rates, which could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to make cash distributions.

Historically, the crude oil markets have been volatile as a result of the many conditions and events that can affect the price, demand, production and transport of oil, including competition from alternative energy sources. Decreased demand for oil transportation may have a material adverse effect on our revenues, cash flows and profitability. The factors affecting the supply and demand for tankers are outside of our control, and the nature, timing and degree of changes in industry conditions are unpredictable. The past global financial crisis and the continuing U.S. shale production expansion has intensified this unpredictability.

The factors that influence demand for tanker capacity include:

demand for and supply of liquid cargoes, including petroleum and petroleum products and any differences in supply and demand between regions;

developments in international trade;

waiting days in ports;

Table of Contents

changes in oil production and refining capacity and regional availability of petroleum refining capacity;

environmental and other legal and regulatory developments, including the adoption of any limits on the consumption of carbon-based fuels due to climate change agreements or protocols;

global and regional economic conditions;

the distance chemicals, petroleum and petroleum products are to be moved by sea;

changes in seaborne and other transportation patterns, including changes in distances over which cargo is transported due to geographic changes in where oil is produced, refined and used;

competition from alternative sources of energy;

armed conflicts and terrorist activities;

natural or man-made disasters that affect the ability of our vessels to use certain waterways;

political developments, including changes to trade policies;

embargoes and strikes; and

domestic and foreign tax policies.

The factors that influence the supply of tanker capacity include:

the number of newbuilding deliveries;

the scrapping rate of older vessels;

port or canal congestion;

the number of vessels that are used for storage or as floating storage offloading service vessels;

the conversion of tankers to other uses, including conversion of vessels from transporting oil and oil products to carrying drybulk cargo and the reverse conversion;

availability of financing for new tankers;

the phasing out of single-hull tankers due to legislation and environmental concerns;

the price of steel;

the number of vessels that are out of service;

national or international regulations that may effectively cause reductions in the carrying capacity of vessels or early obsolescence of tonnage; and

environmental concerns and regulations, including ballast water management and low sulphur fuel consumption regulations.

Furthermore, the extension of refinery capacity in China, India and particularly the Middle East through 2019 is expected to exceed the immediate consumption in these areas, and an increase in exports of refined oil products is expected as a result. Changes in product trading patterns due to the implementation of the IMO 2020 sulphur reduction rules should increase trade in refined oil products.

Historically, the tanker markets have been volatile as a result of the many conditions and factors that can affect the price, supply and demand for tanker capacity. The recent global economic crisis may further reduce demand for transportation of oil over long distances and supply of tankers that carry oil, which may materially affect our future revenues, profitability and cash flows.

Table of Contents

We believe that the current order book for tanker vessels represents a significant percentage of the existing fleet; however the percentage of the total tanker fleet on order as a percent of the total fleet declined from 18% at the end of 2011 to 12% at the beginning of January 2019. An over-supply of tanker capacity may result in a reduction of charter hire rates. If a reduction in charter rates occurs, we may only be able to charter our vessels at unprofitable rates or we may not be able to charter these vessels at all, which could lead to a material adverse effect on our results of operations.

Spot market rates for tanker vessels are highly volatile and may decrease in the future, which may materially adversely affect our earnings in the event that our vessels are chartered in the spot market.

We may deploy at least some of our product tankers, chemical tankers and VLCCs in the spot market directly or in pools. Although spot chartering is common in the product, chemical, tanker and VLCC sectors, product tankers, chemical tanker and VLCC charter hire rates are highly volatile and may fluctuate significantly based upon demand for seaborne transportation of crude oil and oil products and chemicals, as well as tanker supply. World oil demand is influenced by many factors, including international economic activity; geographic changes in oil production, processing, and consumption; oil price levels; inventory policies of the major oil and oil trading companies; and strategic inventory policies of countries such as the United States and China. The successful operation of our vessels in the spot charter market depends upon, among other things, obtaining profitable spot charters and minimizing, to the extent possible, time spent waiting for charters and time spent traveling unladen to pick up cargo. Furthermore, as charter rates for spot charters are fixed for a single voyage that may last up to several weeks, during periods in which spot charter rates are rising, we will generally experience delays in realizing the benefits from such increases. The spot market is highly volatile, and, in the past, there have been periods when spot rates have declined below the operating cost of vessels. Currently, spot charter hire rates are at or above operating costs for most vessel sizes but there is no assurance that the crude oil, product and chemical tanker charter market will rise over the next several months or will not decline further. A decrease in spot rates may decrease the revenues and cash flow we derive from vessels employed in pools or on index linked charters. Such volatility in pool or index linked charters may be mitigated by any minimum rate due to us that we negotiate with our charterers.

Additionally, if the spot market rates or short-term time charter rates become significantly lower than the time charter equivalent rates that some of our charterers are obligated to pay us under our existing charters, the charterers may have incentive to default under that charter or attempt to renegotiate the charter. If our charterers fail to pay their obligations, we would have to attempt to re-charter our vessels at lower charter rates, which would affect our ability to comply with our loan covenants and operate our vessels profitably. If we are not able to comply with our loan covenants and our lenders choose to accelerate our indebtedness and foreclose their liens, we could be required to sell vessels in our fleet and our ability to continue to conduct our business would be impaired.

Certain of our VLCC vessels are contractually committed to time charters. We are not permitted to unilaterally terminate the charter agreements of the VLCC vessels due to upswings in the tanker industry cycle, when spot market voyages might be more profitable. We may also decide to sell a vessel in the future. In such a case, should we sell a vessel that is committed to a long-term charter, we may not be able to realize the full charter free fair market value of the vessel during a period when spot market charters are more profitable than the charter agreement under which the vessel operates. We may re-charter the VLCC vessels on long-term charters or charter them in the spot market or place them in pools upon expiration or termination of the vessels' current charters.

An oversupply of tanker vessel capacity may lead to reductions in charter hire rates, vessel values and profitability.

The market supply of tankers is affected by a number of factors, such as demand for energy resources and primarily oil and petroleum products, level of charter hire rates, asset and newbuilding prices, availability of financing as well as

overall economic growth in parts of the world economy, including Asia, and has been increasing as a result of the delivery of substantial newbuilding orders over the last few years. We believe that the current order book for tanker vessels represents a significant percentage of the existing fleet; however the percentage of the total tanker fleet on order as a percent of the total fleet declined from 18% at the end of 2011 to 12% as of the beginning of January 2019. If the capacity of new ships delivered exceeds the capacity of tankers being scrapped and lost, tanker capacity will increase. If the supply of tanker capacity increases and if the demand for tanker capacity does not increase correspondingly, charter rates and vessel values could materially decline. If such a reduction occurs, we may only be able to recharter our vessels at reduced or unprofitable rates as their current charters expire, or we may not be able to charter these vessels at all, which could lead to a material adverse effect on our results of operations.

Increasing energy self-sufficiency in the United States could lead to a decrease in imports of oil to that country, which to date has been one of the largest importers of oil worldwide.

The United States becomes a net exporter of petroleum on a volume basis after 2020, according to the 2019 Annual Energy Outlook published in January 2019 by the US Energy Information Agency. Similarly in the annual World Energy Outlook (November 2018), the International Energy Agency (IEA) sees two distinct phases in the outlook for oil production to 2040: To 2025 the United States provides around 75% of the global increase in production but that will plateau after that year. The United States produced a record 11.9 million barrels per day (MBPD) in November 2018 and will produce, according to the IEA, 18.5 MBPD in 2025 and 16.3 MBPD in 2040, making it the world's largest oil producer from now until 2040 ahead of both Saudi Arabia and Russia. In its 2016

Table of Contents

Medium Term Oil Market Report, the IEA said that the steep rise in shale oil and gas production is expected to push the country toward energy self-sufficiency. In recent years the share of total U.S. consumption met by total liquid fuel net imports, including both crude oil and products, has been decreasing since peaking at over 60% in 2005. The U.S. Energy Information Administration (EIA) statistics through November 2018, show that U.S. crude oil imports fell 1.6% to an average of 7.9 MBPD over the 8.0 MBPD in 2017, and the average imports are still below the 2005 peak of 10.1 MBPD. EIA statistics note that U.S. crude oil exports rose 72% to 1.9 MBPD through November 2018, which was a very significant increase over the most recent low of 9,100 barrels per day exported in 2002. A slowdown in oil imports to or exports from the United States, one of the most important oil trading nations worldwide, may result in decreased demand for our vessels and lower charter rates, which could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to make cash distributions.

A number of third party owners have ordered so-called modern vessels, which offer substantial bunker savings as compared to older vessels. Increased demand for and supply of modern vessels could reduce demand for certain of our existing older vessels and expose us to lower vessel utilization and/or decreased charter rates.

The product tanker newbuilding order book as of January 2019 is estimated at 228 vessels or 8% of the current product tanker fleet according to Clarksons Research Services Limited. The majority of these orders are based on vessel improvements such as improved propulsion system or other technical measures, which purport to offer material bunker savings compared to older vessels, which include certain of our vessels. Such savings could result in a substantial reduction of bunker cost for charterers compared to such vessels of ours. As the supply of such modern vessel increases and if charterers prefer such vessels over our vessels, this may reduce demand for our existing older vessels, impair our ability to recharter such vessels at competitive rates and have a material adverse effect on our cash flows and operations.

A number of third party owners have ordered exhaust gas scrubbers for their vessels to comply with the coming IMO 2020 requirements to reduce sulphur emissions from fuel burned at sea, which may offer substantial bunker savings as compared to vessels without. Increased demand for and supply of vessels fitted with scrubbers could reduce demand for certain of our existing vessels and expose us to lower vessel utilization and/or decreased charter rates.

As of January 14, 2019 there were about 5,024 tankers over 10,000 DWT, according to Clarksons Research services Limited. Owners have fitted or planned to fit scrubbers on 401 of these tankers or about 8% of the fleet. Fitting scrubbers will allow a ship to consume high sulphur fuel oil (HSFO) which is expected to be cheaper than the low sulphur fuel oil (LSFO) that ships without scrubbers must consume to comply with the IMO 2020 low sulphur emission requirements. Generally the economics favor installing scrubbers on larger ships due to the increased fuel consumption of those ships but also depend on the availability of HSFO and the cost differential between it and LSFO. As such VLCCs are expected to retrofit or install scrubbers on about 15% of the fleet as opposed to about 3% of the fleet of tankers that are between 10,000 and 55,000 DWT. Savings from operating scrubber fitted ships could result in a substantial reduction of bunker cost for charterers compared to vessels of our fleet which may not have scrubbers. If the supply of such scrubber fitted vessel increases and if the differential between the cost of HSFO and LSFO remains high and if charterers prefer such vessels over our vessels, this may reduce demand for our existing vessels, impair our ability to recharter such vessels at competitive rates and have a material adverse effect on our cash flows and operations.

Increased competition in technology and innovation could reduce our charter hire income and the value of our vessels.

The charter hire rates and the value and operational life of a vessel are determined by a number of factors including the vessel's efficiency, operational flexibility and physical life. Efficiency includes vessel speed, fuel economy, loading and discharging speed and personnel required to operate. The potential introduction of remote controlled or autonomous vessels, which would significantly reduce or eliminate the costs of crew and victuals, could put our vessels at an efficiency disadvantage. Flexibility includes the ability to enter harbors, utilize related docking facilities and pass through canals and straits. The length of a vessel's physical life is related to its original design and construction, its maintenance and the impact of the stress of operations. If new vessels are built that are more efficient or more flexible or have longer physical lives than our vessels, competition from these more technologically advanced vessels could adversely affect the amount of charter hire payments we receive for our vessels upon expiration of their current charters and the resale value of our vessels could significantly decrease. This could adversely affect our revenues and cash flows, and our ability to service our debt or make distributions to our unit holders and repurchases of common units. As a result, our results of operations and financial condition could be adversely affected.

Charter rates in the crude oil tankers sector in which we operate and in the product and chemical tanker sectors of the seaborne transportation industry have significantly declined from historically high levels in 2008 and may remain depressed or decline further in the future, which may adversely affect our earnings.

Charter rates in the crude oil, product and chemical tanker sectors have significantly declined from historically high levels in 2008 and may remain depressed or decline further. For example, the Baltic Dirty Tanker Index declined from a high of 2,347 in July 2008 to 453 in mid-April 2009, which represents a decline of approximately 81%. Since January 2017, it has traded between a low of

Table of Contents

610 and a high of 1,266; as of April 18, 2019, it stood at 653. The Baltic Clean Tanker Index fell from 1,509 in the early summer of 2008 to 345 in April 2009, or an approximate 77% decline. It has traded between a low of 476 and a high of 919 since January 2017 and stood at 576 as of April 18, 2019. Of note is that Chinese imports of crude oil have steadily increased from three million barrels per day in 2008 to a record 10.5 million barrels per day in November 2018 and stood at 10.2 million barrels per day in February 2019. Additionally, since the U.S. removed its ban at the end of 2015, U.S. crude oil exports increased by about 300% from 0.4 million barrels per day to about 2.6 million barrels per day at the end of January 2019. The U.S. has steadily increased its total petroleum product exports by about 435% to about 5.6 million barrels per day in January 2019 from one million barrels per day in January 2006 note that U.S. petroleum product exports hit an all-time record of 6.1 million barrels per day in November 2018. If the tanker sector of the seaborne transportation industry, which has been highly cyclical, is depressed in the future at a time when we may want to sell a vessel, our earnings and available cash flow may be adversely affected. We cannot assure you that we will be able to successfully charter our vessels in the future at rates sufficient to allow us to operate our business profitably or to meet our obligations, including payment of debt service to our lenders. Our ability to renew the charters on vessels that we may acquire in the future, the charter rates payable under any replacement charters and vessel values will depend upon, among other things, economic conditions in the sector in which our vessels operate at that time, changes in the supply and demand for vessel capacity and changes in the supply and demand for the seaborne transportation of energy resources and commodities.

Any decrease in shipments of crude oil from the Arabian Gulf or West Africa may adversely affect our financial performance.

The demand for VLCC oil tankers derives primarily from demand for Arabian Gulf and West African crude oil, which, in turn, primarily depends on the economies of the world's industrial countries and competition from alternative energy sources. A wide range of economic, social and other factors can significantly affect the strength of the world's industrial economies and their demand for Arabian Gulf and West African crude oil.

Among the factors that could lead to a decrease in demand for exported Arabian Gulf and West African crude oil are:

increased use of existing and future crude oil pipelines in the Arabian Gulf or West African regions;

increased demand for crude oil in the Arabian Gulf or West African regions;

a decision by OPEC or other petroleum exporters to increase their crude oil prices or to further decrease or limit their crude oil production;

any increase in refining of crude into petroleum products for domestic consumption or export;

armed conflict or acts of piracy in the Arabian Gulf or West Africa and political or other factors;

increased oil production in other regions, such as the United States, Russia and Latin America; and

the development and the relative costs of nuclear power, natural gas, coal and other alternative sources of energy.

Any significant decrease in shipments of crude oil from the Arabian Gulf or West Africa may materially adversely affect our financial performance.

Delays in deliveries of second-hand vessels, our decision to cancel an order for purchase of a vessel or our inability to otherwise complete the acquisitions of additional vessels for our fleet, could harm our business, financial condition and results of operations.

We expect to purchase second-hand vessels from time to time. The delivery of these vessels could be delayed, not completed or cancelled, which would delay or eliminate our expected receipt of revenues from the employment of these vessels. The seller could fail to deliver these vessels to us as agreed, or we could cancel a purchase contract because the seller has not met its obligations.

If the delivery of any vessel is materially delayed or cancelled, especially if we have committed the vessel to a charter for which we become responsible for substantial liquidated damages to the customer as a result of the delay or cancellation, our business, financial condition and results of operations could be adversely affected.

Delays in deliveries of any newbuilding vessels we may contract to acquire or order in the future, or our decision to cancel, or our inability to otherwise complete the acquisitions of any newbuildings, could harm our operating results and lead to the termination of any related charters.

Any newbuildings we may contract to acquire or order in the future could be delayed, not completed or cancelled, which would delay or eliminate our expected receipt of revenues under any charters for such vessels. The shipbuilder or third party seller could fail to deliver the newbuilding vessel or any other vessels we acquire or order, or we could cancel a purchase or a newbuilding contract because the shipbuilder has not met its obligations, including its obligation to maintain agreed refund guarantees in place for our benefit. For prolonged delays, the customer may terminate the time charter.

Table of Contents

Our receipt of newbuildings could be delayed, canceled, or otherwise not completed because of:

quality or engineering problems or failure to deliver the vessel in accordance with the vessel specifications;

changes in governmental regulations or maritime self-regulatory organization standards;

work stoppages or other labor disturbances at the shipyard;

bankruptcy or other financial or liquidity problems of the shipbuilder;

a backlog of orders at the shipyard;

political or economic disturbances in the country or region where the vessel is being built;

weather interference or a catastrophic event, such as a major earthquake or fire;

the shipbuilder failing to deliver the vessel in accordance with our vessel specifications;

our requests for changes to the original vessel specifications;

shortages of or delays in the receipt of necessary construction materials, such as steel; or

our inability to finance the purchase of the vessel.

If delivery of any newbuild vessel acquired, or any vessel we contract to acquire in the future is materially delayed, it could materially adversely affect our results of operations and financial condition.

Certain vessels in our fleet are second-hand vessels, and we may acquire more second-hand vessels in the future. The acquisition and operation of such vessels may result in increased operating costs and vessel off-hire, which could materially adversely affect our earnings.

As of April 18, 2019, the vessels in our fleet had an average age of approximately 8.5 years and most tanker vessels have an expected life of approximately 25 years. Certain vessels in our fleet are second-hand vessels and we may acquire more second-hand vessels in the future. Our inspection of second-hand vessels prior to purchase does not provide us with the same knowledge about their condition and cost of any required or anticipated repairs that we would have had if these vessels had been built for and operated exclusively by us. Generally, we will not receive the benefit of warranties on second-hand vessels.

In general, the costs to maintain a vessel in good operating condition increase with the age of the vessel. Due to improvements in engine technology, older vessels are typically less fuel efficient and more costly to maintain than more recently constructed vessels. Cargo insurance rates increase with the age of a vessel, making older vessels less desirable to charterers.

Governmental regulations, safety or other equipment standards related to the age of vessels may require expenditures for alterations or the addition of new equipment to our vessels and may restrict the type of activities in which the vessels may engage or the geographic regions in which we may operate. We cannot predict what alterations or modifications our vessels may be required to undergo in the future. As our vessels age, market conditions may not justify those expenditures or enable us to operate our vessels profitably during the remainder of their useful lives.

Although we have considered the age and condition of the vessels in budgeting for operating, insurance and maintenance costs, we may encounter higher operating and maintenance costs due to the age and condition of these vessels, or any additional vessels we acquire in the future. The age of some of our VLCC vessels may result in higher operating costs and increased vessel off-hire periods relative to our competitors that operate newer fleets, which could have a material adverse effect on our results of operations.

Our growth depends on continued growth in demand for crude oil, refined petroleum products (clean and dirty) and bulk liquid chemicals and the continued demand for seaborne transportation of such cargoes.

Our growth strategy focuses on expansion in the crude oil, product and chemical tanker sectors. Accordingly, our growth depends on continued growth in world and regional demand for crude oil, refined petroleum (clean and dirty) products and bulk liquid chemicals and the transportation of such cargoes by sea, which could be negatively affected by a number of factors, including:

the economic and financial developments globally, including actual and projected global economic growth;

fluctuations in the actual or projected price of crude oil, refined petroleum products or bulk liquid chemicals;

refining capacity and its geographical location;

Table of Contents

increases in the production of oil in areas linked by pipelines to consuming areas, the extension of existing, or the development of new, pipeline systems in markets we may serve, or the conversion of existing non-oil pipelines to oil pipelines in those markets;

decreases in the consumption of oil due to increases in its price relative to other energy sources, other factors making consumption of oil less attractive or energy conservation measures or pollution reduction measures or those intended to reduce global warming;

availability of new, alternative energy sources; and

negative or deteriorating global or regional economic or political conditions (including changes to trade policies), particularly in oil-consuming regions, which could reduce energy consumption or its growth.

The refining and chemical industries may respond to any economic downturn and demand weakness by reducing operating rates, partially or completely closing refineries and by reducing or cancelling certain investment expansion plans, including plans for additional refining capacity, in the case of the refining industry. Continued reduced demand for refined petroleum products and bulk liquid chemicals and the shipping of such cargoes or the increased availability of pipelines used to transport refined petroleum products, and bulk liquid chemicals would have a material adverse effect on our future growth and could harm our business, results of operations and financial condition.

We may be unable to make or realize expected benefits from acquisitions, and implementing our growth strategy through acquisitions may harm our business, financial condition and operating results.

Any acquisition of a vessel may not be profitable to us at or after the time we acquire it and may not generate cash flow sufficient to justify our investment. In addition, our growth strategy exposes us to risks that may harm our business, financial condition and operating results, including risks that we may:

fail to realize anticipated benefits, such as new customer relationships, cost-savings or cash flow enhancements;

be unable to hire, train or retain qualified shore and seafaring personnel to manage and operate our growing business and fleet;

integrate any acquired vessels or businesses successfully with our existing operations;

decrease our liquidity by using a significant portion of our available cash or borrowing capacity to finance acquisitions;

significantly increase our interest expense or financial leverage if we incur additional debt to finance acquisitions; or

incur or assume unanticipated liabilities, losses or costs associated with the business or vessels acquired.

Increasing growth of electric vehicles and renewable fuels could lead to a decrease in trading and the movement of crude oil and petroleum products worldwide.

The IEA noted in its Global EV Outlook 2018 that total electric vehicles (EVs) registered worldwide grew from about 1.25 million in 2015 to more than 3 million in 2017. EV sales in 2017 were 1.1 million exceeding 1 million for the first time lead by China with 580,000 EVs sold in 2017 up 72% from 2016. IEA forecasts are for EVs to grow to between 125 and 220 million registered cars by 2030. According to Ward's there were about 1 billion cars registered in 2010 and there will be about 2 billion cars registered by 2035.

According to the EIA, U.S. biodiesel production increased rapidly from 32 thousand barrels per day in 2009 to 109 thousand barrels per day in 2018 (average through November), a growth of about 240%. During the same period diesel production from U.S. refineries grew from an average of 4.0 million barrels per day in 2009 to 5.4 million barrels per day in November 2018, a growth of about 30%. A growth in EVs or a slowdown in imports or exports of crude or petroleum products worldwide, may result in decreased demand for our vessels and lower charter rates, which could have a material adverse effect on our business, results of operations, cash flows, financial condition and ability to make cash distributions.

Our growth depends on our ability to obtain customers, for which we face substantial competition. In the highly competitive tanker industry, we may not be able to compete for charters with new entrants or established companies with greater resources, which may adversely affect our results of operations.

We employ our tanker vessels (or will employ in the case of any product, chemical, LNG or LPG tanker vessels that we may acquire) in the highly competitive crude oil, product, chemical, LNG and LPG tanker sectors of the shipping industry that is capital intensive and fragmented. Competition arises primarily from other vessel owners, including major oil companies and traders as well as independent tanker companies, some of whom have substantially greater resources and experience than us. Competition for the

Table of Contents

chartering of tankers can be intense and depends on price, location, size, age, condition, quality operations and safety, experience and technical capability of the crew and the acceptability of the vessel and its managers to the charterers. Such competition has been enhanced as a result of the downturn in the shipping industry, which has resulted in an excess supply of vessels and reduced charter rates.

Medium to long-term time charters and bareboat charters have the potential to provide income at pre-determined rates over more extended periods of time. However, the process for obtaining longer term time charters and bareboat charters is highly competitive and generally involves a lengthy, intensive and continuous screening and vetting process and the submission of competitive bids that often extends for several months. In addition to the quality, age and suitability of the vessel, longer term shipping contracts tend to be awarded based upon a variety of other factors relating to the vessel operator. Competition for the transportation of crude oil, refined petroleum products and bulk liquid chemicals can be intense and depends on price, location, size, age, condition and acceptability of the vessel and our managers to the charterers.

In addition to having to meet the stringent requirements set out by charterers, it is likely that we will also face substantial competition from a number of competitors who may have greater financial resources, stronger reputations or experience than we do when we try to re-charter our vessels. It is also likely that we will face increased numbers of competitors entering in the crude oil, product and chemical tanker sectors, including in the ice class sector. Increased competition may cause greater price competition, especially for medium- to long-term charters. Due in part to the highly fragmented markets, competitors with greater resources could operate larger fleets through consolidations or acquisitions that may be able to offer better prices and fleets than ours.

As a result of these factors, we may be unable to obtain customers for medium- to long-term time charters or bareboat charters on a profitable basis, if at all. Even if we are successful in employing our vessels under longer term time charters or bareboat charters, our vessels will not be available for trading in the spot market during an upturn in the crude oil, product and chemical tanker market cycles, when spot trading may be more profitable. If we cannot successfully employ our vessels in profitable time charters our results of operations and operating cash flow could be adversely affected.

If we fail to manage our planned growth properly, we may not be able to expand our fleet successfully, which may adversely affect our overall financial position.

While we have no specific plans, we do intend to continue to expand our fleet in the future. Our growth will depend on:

locating and acquiring suitable vessels;

identifying reputable shipyards with available capacity and contracting with them for the construction of new vessels;

integrating any acquired vessels successfully with our existing operations;

enhancing our customer base;

managing our expansion;

obtaining required financing, which could include debt, equity or combinations thereof; and

Improve operating and financial system and controls.

Additionally, the marine transportation and logistics industries are capital intensive, traditionally using substantial amounts of indebtedness to finance vessel acquisitions, capital expenditures and working capital needs. If we finance the purchase of our vessels through the issuance of debt securities, it could result in:

default and foreclosure on our assets if our operating cash flow after a business combination or asset acquisition were insufficient to pay our debt obligations;

acceleration of our obligations to repay the indebtedness even if we have made all principal and interest payments when due if the debt security contained covenants that required the maintenance of certain financial ratios or reserves and any such covenant were breached without a waiver or renegotiation of that covenant;

our immediate payment of all principal and accrued interest, if any, if the debt security was payable on demand; and

our inability to obtain additional financing, if necessary, if the debt security contained covenants restricting our ability to obtain additional financing while such security was outstanding.

In addition, our business plan and strategy is predicated on buying vessels in a market at what we believe is near the low, but recovering phase of the periodic cycle in what has typically been a cyclical industry. However, there is no assurance that charter rates and vessels asset values will not sink lower, or that there will be an upswing in shipping costs or vessel asset values in the near-term or at all, in which case our business plan and strategy may not succeed in the near-term or at all. Growing any business by acquisition presents numerous risks such as undisclosed liabilities and obligations, difficulty experienced in obtaining additional qualified personnel and managing relationships with customers and suppliers and integrating newly acquired operations into existing infrastructures. We may not be successful in growing and may incur significant expenses and losses.

Table of Contents

We may face unexpected maintenance costs, which could materially adversely affect our business, financial condition and results of operations.

If our vessels suffer damage or require upgrade work, they may need to be repaired at a drydocking facility. Our vessels may occasionally require upgrade work in order to maintain their classification society rating or as a result of changes in regulatory requirements. In addition, our vessels will be off-hire periodically for intermediate surveys and special surveys in connection with each vessel's certification by its classification society. The costs of drydock repairs are unpredictable and can be substantial and the loss of earnings while these vessels are being repaired and reconditioned, as well as the actual cost of these repairs, would decrease our earnings. Our insurance generally only covers a portion of drydocking expenses resulting from damage to a vessel and expenses related to maintenance of a vessel will not be reimbursed. In addition, space at drydocking facilities is sometimes limited and not all drydocking facilities are conveniently located. We may be unable to find space at a suitable drydocking facility on a timely basis or may be forced to move a damaged vessel to a drydocking facility that is not conveniently located to the vessel's position. The loss of earnings while any of our vessels are forced to wait for space or to relocate to drydocking facilities that are far away from the routes on which our vessels trade would further decrease our earnings.

We rely on our technical managers to provide essential services to our vessels and run the day-to-day operations of our vessels.

Pursuant to technical management agreements we are provided with services essential to the business of our vessels, including vessel maintenance, crewing, purchasing, shipyard supervision, insurance and assistance with vessel regulatory compliance, by our technical managers, including a subsidiary of Navios Holdings. Our operational success and ability to execute our strategy will depend significantly upon the satisfactory performance of the aforementioned services by the current technical manager. The failure of our technical managers to perform these services satisfactorily could have a material adverse effect on our business, financial condition and results of operations.

Our vessels may be subject to unbudgeted periods of off-hire, which could materially adversely affect our business, financial condition and results of operations.

Under the terms of the charter agreements under which our vessels operate, or are expected to operate in the case of the newbuildings, when a vessel is off-hire, or not available for service or otherwise deficient in its condition or performance, the charterer generally is not required to pay the hire rate, and we will be responsible for all costs (including the cost of bunker fuel) unless the charterer is responsible for the circumstances giving rise to the lack of availability. A vessel generally will be deemed to be off-hire if there is an occurrence preventing the full working of the vessel due to, among other things:

operational deficiencies;

the removal of a vessel from the water for repairs, maintenance or inspection, which is referred to as drydocking;

delays due to accidents or deviations from course;

occurrence of hostilities in the vessel's flag state or in the event of piracy;

crewing strikes, labor boycotts, certain vessel detentions or similar problems;

our failure to maintain the vessel in compliance with its specifications, contractual standards and applicable country of registry and international regulations or to provide the required crew; or

a natural or man-made event of force majeure.

The market values of tanker vessels have declined from historically high levels and may fluctuate significantly, which could cause us to breach covenants in our credit facilities, result in the foreclosure of certain of our vessels, limit the amount of funds that we can borrow and adversely affect our ability to purchase new vessels and our operating results. Depressed vessel values could also cause us to incur impairment charges.

Due to the slow growth in world trade, the increase in the tanker fleet and declining tanker charter rates, the market values of our vessels and any contracted newbuildings and of tankers generally, are currently significantly lower than they would have been prior to the downturn in the second half of 2008. Within the past year smaller product tanker yard resale prices have moderated although they are still lower than the average 2015 price, they have recently risen above the average price for 2018. Vessel values may remain at current low, or lower, levels for a prolonged period of time and can fluctuate substantially over time due to a number of different factors, including:

prevailing level of charter rates;

Table of Contents

general economic and market conditions affecting the shipping industry;

competition from other shipping companies;

types, sizes and age of vessels;

sophistication and condition of the vessels;

advances in efficiency, such as the introduction of autonomous vessels;

where the ship was built and as-built specifications;

lifetime maintenance record;

supply and demand for vessels;

other modes of transportation;

cost of newbuildings;

governmental or other regulations, including environmental regulations;

technological advances; and

ability of buyers to access financing and capital.

If the market value of our vessels decreases, we may breach some of the covenants contained in the financing agreements relating to our indebtedness at the time. Our credit facilities contain covenants including maximum total net liabilities over total net assets (effective in general after delivery of the vessels), minimum net worth and loan to value ratio covenants of generally lower than 75% or 80% and for certain facilities, as amended for a specific period of time till December 31, 2018 to be ranging from a maximum of 80% to 85%. If we breach any such covenants in the future and we are unable to remedy the relevant breach, our lenders could accelerate or require us to prepay a portion of our debt and foreclose on our vessels. In addition, if the book value of a vessel is impaired due to unfavorable market conditions, we would incur a loss that could have a material adverse effect on our business, financial condition and results of operations.

In addition, as vessels grow older, they generally decline in value. We will review our vessels for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable.

We review certain indicators of potential impairment, such as undiscounted projected operating cash flows expected from the future operation of the vessels, which can be volatile for vessels employed on short-term charters or in the spot market. Any impairment charges incurred as a result of declines in charter rates would negatively affect our financial condition and results of operations. In addition, if we sell any vessel at a time when vessel prices have fallen and before we have recorded an impairment adjustment to our financial statements, the sale may be at less than the vessel's carrying amount on our financial statements, resulting in a loss and a reduction in earnings. Conversely, if vessel values are elevated at a time when we wish to acquire additional vessels, the cost of acquisition may increase and this could materially adversely affect our business, financial condition and results of operations.

Future increases in vessel operating expenses, including rising fuel prices, could materially adversely affect our business, financial condition and results of operations.

Under our time charter agreements, the charterer is responsible for substantially all of the voyage expenses, including port and canal charges and fuel costs, and we are generally responsible for vessel operating expenses. Vessel operating expenses are the costs of operating a vessel, primarily consisting of crew wages and associated costs, insurance premiums, management fees, lubricants and spare parts and repair and maintenance costs. In particular, the cost of fuel is a significant factor in negotiating charter rates. As a result, an increase in the price of fuel beyond our expectations may adversely affect our profitability. The price and supply of fuel is unpredictable and fluctuates based on events outside our control, including geopolitical developments, supply and demand for oil, actions by members of OPEC and other oil and gas producers, war, terrorism and unrest in oil producing countries and regions, regional production patterns and environmental concerns and regulations.

We have fixed the fees for ship management services of our owned fleet, provided by a subsidiary of Navios Holdings, through May 2020 at \$6,500 per MR2 product tanker and chemical tanker vessel, \$7,150 per LR1 product tanker vessel and \$9,500 per VLCC vessel. Drydocking expenses under our Management Agreement are reimbursed at cost for all vessels.

Table of Contents

Following the Merger with Navios Midstream, completed on December 13, 2018, the Management Agreement covers the vessels acquired.

We generally receive a daily rate for the use of our vessels, which is fixed through the term of the applicable charter agreement. Our charter agreements do not provide for any increase in the daily hire rate in the event that vessel-operating expenses increase during the term of the charter agreement. Increases in the fees for shipmanagement services of our vessels over the term of a charter agreement will effectively reduce our operating income and, if such increases in operating expenses are significant, adversely affect our business, financial condition and results of operations.

The crude oil, product and chemical tanker sectors are subject to seasonal fluctuations in demand and, therefore, may cause volatility in our operating results.

The crude oil, product and chemical tanker sectors of the shipping industry have historically exhibited seasonal variations in demand and, as a result, in charter hire rates. This seasonality may result in quarter-to-quarter volatility in our operating results. The product and chemical tanker markets are typically stronger in the fall and winter months in anticipation of increased consumption of oil and natural gas in the northern hemisphere. In addition, unpredictable weather patterns in these months tend to disrupt vessel scheduling and supplies of certain commodities. As a result, revenues are typically weaker during the fiscal quarters ended June 30 and September 30, and, conversely, typically stronger in fiscal quarters ended December 31 and March 31. Our operating results, therefore, may be subject to seasonal fluctuations.

A decrease in the level of China's imports of crude oil or petroleum products or a decrease in oil trade globally could have a material adverse impact on our charterers' business and, in turn, could cause a material adverse impact on our results of operations, financial condition and cash flows.

China imports significant quantities of crude oil and trades significant quantities of petroleum products. For example in 2016, China imported about 354 million tons of crude oil by sea compared with crude oil imports to the United States of about 238 million tons. In 2017, China imported 386 million tons crude oil by sea (the United States imported 232 million tons; 2017 is the latest available full year data). Our tanker vessels are deployed by our charterers on routes involving crude oil and petroleum product trades in and out of emerging markets, and our charterers' oil shipping and business revenue may be derived from the shipment of goods within and to the Asia Pacific region from various overseas export markets. Any reduction in or hindrance to China-based importers could have a material adverse effect on the growth rate of China's imports and on our charterers' business. For instance, the government of China has implemented economic policies aimed at reducing pollution and increasing the strategic stock piling of crude oil. Should these policies change, this may have the effect of reducing crude oil imports or petroleum product exports and may, in turn, result in a decrease in demand for oil shipping. Additionally, though in China there is an increasing level of autonomy and a gradual shift in emphasis to a market economy and enterprise reform, many of the reforms, particularly some limited price reforms that result in the prices for certain commodities being principally determined by market forces, are unprecedented or experimental and may be subject to revision, change or abolition. The level of imports to and exports from China could be adversely affected by changes to these economic reforms by the Chinese government, as well as by changes in political, economic and social conditions or other relevant policies of the Chinese government. Although China exerts a large effect on the seaborne market for crude oil and petroleum products, any decreases in trade in those commodities by any of the countries in other major trading regions in North America, Europe and Asia could depress time charter rates which could have a material adverse effect on our business, results of operations, financial condition and our ability to pay cash distributions to our shareholders.

Our operations expose us to the risk that increased trade protectionism from China, the United States or other nations will adversely affect our business. If the global recovery is undermined by downside risks and the recent economic downturn returns, governments may turn to trade barriers to protect their domestic industries against foreign imports, thereby depressing the demand for shipping. Specifically, increasing trade protectionism in the markets that our charterers serve may cause (i) a decrease in cargoes available to our charterers in favor of Chinese charterers and Chinese owned ships and (ii) an increase in the risks associated with importing goods to China. Any increased trade barriers or restrictions on trade, especially trade with China, would have an adverse impact on our charterers' business, operating results and financial condition and could thereby affect their ability to make timely charter hire payments to us and to renew and increase the number of their time charters with us. This could have a material adverse effect on our business, results of operations, financial condition and our ability to pay cash distributions to our unitholders.

The employment of our vessels could be adversely affected by an inability to clear the oil majors' risk assessment process, and we could be in breach of our charter agreements with all of our tanker vessels.

The shipping industry, and especially the shipment of crude oil, refined petroleum products (clean and dirty) and bulk liquid chemicals, has been, and will remain, heavily regulated. The so-called "oil majors," such as Exxon Mobil, BP p.l.c., Royal Dutch Shell plc., Chevron, ConocoPhillips and Total S.A., together with a number of commodities traders, represent a significant percentage of the production, trading and shipping logistics (terminals) of crude oil and refined products worldwide. Concerns for the environment have led the oil majors to develop and implement a strict ongoing due diligence process when selecting their commercial

Table of Contents

partners. This vetting process has evolved into a sophisticated and comprehensive risk assessment of both the vessel operator and the vessel, including physical ship inspections, completion of vessel inspection questionnaires performed by accredited inspectors and the production of comprehensive risk assessment reports. In the case of term charter relationships, additional factors are considered when awarding such contracts, including:

office assessments and audits of the vessel operator;

the operator's environmental, health and safety record;

compliance with the standards of the International Maritime Organization (the IMO), a United Nations agency that issues international trade standards for shipping;

compliance with oil majors' codes of conduct, policies and guidelines, including transparency, anti-bribery and ethical conduct requirements and relationships with third parties;

compliance with heightened industry standards that have been set by several oil companies;

shipping industry relationships, reputation for customer service, technical and operating expertise;

shipping experience and quality of ship operations, including cost-effectiveness;

quality, experience and technical capability of crews;

Under the terms of our charter agreements, our charterers require that these vessels and the technical manager are vetted and approved to transport oil products by multiple oil majors. Our failure to maintain any of our vessels to the standards required by the oil majors could put us in breach of the applicable charter agreement and lead to termination of such agreement, and could give rise to impairment in the value of our vessels.

Should we not be able to successfully clear the oil majors' risk assessment processes on an ongoing basis, the future employment of our vessels, as well as our ability to obtain charters, whether medium- or long-term, could be adversely affected. Such a situation may lead to the oil majors' terminating existing charters and refusing to use our vessels in the future, which would adversely affect our results of operations and cash flows.

We depend on significant customers for part of our revenue. Charterers may terminate or default on their obligations to us, which could materially adversely affect our results of operations and cash flow, and breaches of the charters may be difficult to enforce.

We derive a significant part of our revenue from a number of charterers. For the year ended December 31, 2018, Navios Acquisition's customers representing 10% or more of total revenue were Navig8 Group of Companies (Navig8) and Mansel LTD (Mansel) which accounted for 39.2% and 12.1%, respectively, of our total revenue. The loss of these

or any of our customers, a customer's failure to make payments or perform under any of the applicable charters, a customer's termination of any of the applicable charters, the loss or damage beyond repair to any of our vessels, our failure to deliver the vessel within a fixed period of time or a decline in payments under the charters could have a material adverse effect on our business, results of operations and financial condition. The charter agreements for our vessels are generally governed by English law and provide for dispute resolution in English courts or London-based arbitral proceedings. There can be no assurance that we would be able to enforce any judgments against these charterers in jurisdictions where they are based or have their primary assets and operations. Even after a charter contract is entered, charterers may terminate charters early under certain circumstances. The events or occurrences that will cause a charter to terminate or give the charterer the option to terminate the charter generally include a total or constructive total loss of the related vessel, the requisition for hire of the related vessel, the vessel becoming subject to seizure for more than a specified number of days or the failure of the related vessel to meet specified performance criteria.

In addition, the ability of a charterer to perform its obligations under a charter will depend on a number of factors that are beyond our control. These factors may include general economic conditions, the condition of the crude oil, product and chemical tanker sectors of the shipping industry, the charter rates received for specific types of vessels and various operating expenses. The costs and delays associated with the default by a charterer of a vessel may be considerable and may adversely affect our business, results of operations, cash flows and financial condition.

We cannot predict whether our charterers will, upon the expiration of their charters, re-charter our vessels on favorable terms or at all. If our charterers decide not to re-charter our vessels, we may not be able to re-charter them on terms similar to our current charters or at all. Even if we manage to successfully charter our vessels in the future, our charterers may go bankrupt or fail to perform their obligations under the charter agreements, they may delay payments or suspend payments altogether, they may terminate the charter agreements prior to the agreed-upon expiration date or they may attempt to renegotiate the terms of the charters. In the future, we may also employ our vessels on the spot charter market, which is subject to greater rate fluctuation than the time charter market. If we receive lower charter rates under replacement charters or are unable to re-charter all of our vessels, our results of operations and financial condition could be materially adversely affected.

Table of Contents

We are subject to inherent operational risks that may not be adequately covered by our insurance. If we experience a catastrophic loss and our insurance is not adequate to cover such loss, it could lower our profitability and be detrimental to operations.

The operation of ocean-going vessels in international trade is inherently risky. The ownership and operation of vessels in international trade is affected by a number of inherent risks, including mechanical failure, personal injury, vessel and cargo loss or damage, business interruption due to political conditions in foreign countries, hostilities, piracy, terrorism, labor strikes and/or boycotts, adverse weather conditions and catastrophic marine disaster, including environmental accidents and collisions. All of these risks could result in liability, loss of revenues, increased costs and loss of reputation. Although we carry insurance for our fleet against risks commonly insured against by vessel owners and operators, including hull and machinery insurance, war risks insurance and protection and indemnity insurance (which include environmental damage and pollution insurance), all risks may not be adequately insured against, and any particular claim may not be paid. We do not currently maintain off-hire insurance, which would cover the loss of revenue during extended vessel off-hire periods, such as those that occur during an unscheduled drydocking due to damage to the vessel from accidents. Other events that may lead to off-hire periods include natural or man-made disasters that result in the closure of certain waterways and prevent vessels from entering or leaving certain ports. Accordingly, any extended vessel off-hire, due to an accident or otherwise, could have a material adverse effect on our business. Any claims covered by insurance would be subject to deductibles, and since it is possible that a large number of claims may be brought, the aggregate amount of these deductibles could be material.

We may be unable to procure adequate insurance coverage at commercially reasonable rates in the future. For example, more stringent environmental regulations have led in the past to increased costs for, and in the future may result in the lack of availability of, insurance against risks of environmental damage or pollution. A catastrophic oil spill or marine disaster could exceed our insurance coverage, which could harm our business, financial condition and operating results. Changes in the insurance markets attributable to terrorist attacks may also make certain types of insurance more difficult for us to obtain. In addition, the insurance that may be available to us may be significantly more expensive than our existing coverage. We do not carry strike insurance.

Even if our insurance coverage is adequate to cover our losses, we may not be able to timely obtain a replacement vessel in the event of a loss. We may also be subject to calls, or premiums, in amounts based not only on our own claim records but also the claim records of all other members of the protection and indemnity associations through which we receive indemnity insurance coverage for tort liability. In addition, our protection and indemnity associations may not have enough resources to cover claims made against them. Our payment of these calls could result in significant expenses to us, which could reduce our cash flows and place strains on our liquidity and capital resources. Furthermore, in the future, we may not be able to obtain adequate insurance coverage at reasonable rates for our fleet. Our insurance policies also contain deductibles, limitations and exclusions which, although we believe will be standard for the shipping industry, may result in significant increased overall costs to us.

We may be subject to litigation that, if not resolved in our favor and not sufficiently insured against, could have a material adverse effect on us.

We have been and may be, from time to time, involved in various litigation matters. These matters may include, among other things, contract disputes, personal injury claims, environmental claims or proceedings, and other tort claims, employment matters, governmental claims for taxes or duties, and other litigation that arises in the ordinary course of our business. Although we intend to defend these matters vigorously, we cannot predict with certainty the outcome or effect of any claim or other litigation matter, and the ultimate outcome of any litigation or the potential costs to resolve them may have a material adverse effect on us. Insurance may not be applicable or sufficient in all cases and/or insurers may not remain solvent which may have a material adverse effect on our financial condition.

We are subject to various laws, regulations and conventions, including environmental and safety laws that could require significant expenditures both to maintain compliance with such laws and to pay for any uninsured environmental liabilities including any resulting from a spill or other environmental incident.

The shipping business and vessel operation are materially affected by government regulation in the form of international conventions, national, state and local laws, and regulations in force in the jurisdictions in which vessels operate, as well as in the country or countries of their registration. Governmental regulations, safety or other equipment standards, as well as compliance with standards imposed by maritime self-regulatory organizations and customer requirements or competition, may require us to make capital and other expenditures. Because such conventions, laws and regulations are often revised, we cannot predict the ultimate cost of complying with such conventions, laws and regulations, or the impact thereof on the fair market price or useful life of our vessels. In order to satisfy any such requirements, we may be required to take any of our vessels out of service for extended periods of time, with corresponding losses of revenues. In the future, market conditions may not justify these expenditures or enable us to operate our vessels, particularly older vessels, profitably during the remainder of their economic lives. This could lead to significant asset write downs. In addition, violations of environmental and safety regulations can result in substantial penalties and, in certain instances, seizure or detention of our vessels.

Table of Contents

Additional conventions, laws and regulations may be adopted that could limit our ability to do business, require capital expenditures or otherwise increase our cost of doing business, which may materially adversely affect our operations, as well as the shipping industry generally. For example, in various jurisdictions, legislation has been enacted, or is under consideration, that would impose more stringent requirements on air pollution and effluent discharges from our vessels. For example, the IMO periodically proposes and adopts amendments to revise the International Convention for the Prevention of Pollution from Ships (MARPOL), such as the revision to Annex VI which came into force on July 1, 2010. The revised Annex VI implements a phased reduction of the sulfur content of fuel and allows for stricter sulfur limits in designated emission control areas (ECAs). Thus far, ECAs have been formally adopted for the Baltic Sea area (limits SOx emissions only); the North Sea area including the English Channel (limiting SOx emissions only) and the North American ECA (which came into effect on August 1, 2012 limiting SOx, NOx and particulate matter emissions). In October 2016, the IMO approved the designation of the North Sea and the Baltic Sea as ECAs for NOx under Annex VI, which was scheduled for adoption in 2017 and would take effect in January 2021. The United States Caribbean Sea ECA entered into force on January 1, 2013 and has been effective since January 1, 2014, limiting SOx, NOx and particulate matter emissions. In January 2015, the limit for fuel oil sulfur levels fell to 0.10% m/m in ECAs established to limit SOx and particulate matter emissions.

After considering the issue for many years, the IMO announced on October 27, 2016 that it was proceeding with a requirement for 0.5% m/m sulfur content in marine fuel (down from current levels of 3.5%) outside the ECAs starting on January 1, 2020. Under Annex VI, the 2020 date was subject to review as to the availability of the required fuel oil. Annex VI required the fuel availability review to be completed by 2018 but was ultimately completed in 2016. Therefore, by 2020, ships will be required to remove sulfur from emissions through the use of emission control equipment, or purchase marine fuel with 0.5% sulfur content, which may see increased demand and higher prices due to supply constraints. Installing pollution control equipment or using lower sulfur fuel could result in significantly increased costs to our company. Similarly, MARPOL Annex VI requires Tier III standards for NOx emissions to be applied to ships constructed and engines installed in ships operating in NOx ECAs from January 1, 2016.

California has adopted more stringent low sulfur fuel requirements within California-regulated waters.

Compliance with new emissions standards could require modifications to vessels or the use of more expensive fuel. While it is unclear how new emissions standards will affect the employment of our vessels, over time it is possible that ships not retrofitted to comply with new standards may become less competitive.

In addition, the IMO, the United States and states within the United States have proposed or implemented requirements relating to the management of ballast water to prevent the harmful effects of foreign invasive species. In February 2004, the IMO adopted the International Convention for the Control and Management of Ships Ballast Water and Sediments (the BWM Convention). The BWM Convention s implementing regulations call for a phased introduction of mandatory ballast water exchange requirements, to be replaced in time with mandatory concentration limits, as well as other obligations including recordkeeping requirements and implementation of a Ballast Water and Sediments Management Plan. The BWM convention entered into force on September 8, 2017. As of February 11, 2019, the BWM Convention had 79 contracting states for 80.94% of world gross tonnage. New ships constructed after September 8, 2017 must comply on delivery with the BWM Convention. For vessels constructed prior to September 8, 2017, installation of ballast water management systems must take place at the first renewal survey following September 8, 2017 (the date the BWM Convention entered into force). Ships built before September 8, 2017 must comply with IMO discharge standards by the due date for their IOPPC renewal survey under MARPOL Annex 1. All ships must meet the IMO ballast water discharge standard by September 8, 2024. The BWM Convention requires ships to manage ballast water in a manner that removes, renders harmless or avoids the uptake or discharge of aquatic organisms and pathogens within ballast water and sediment. Recently updated Ballast Water and Sediment Management Plan guidance includes more robust testing and performance specifications. The entry of the BWM

Convention and revised guidance, as well as similar ballast water treatment requirements in certain jurisdictions (such as the United States and states within the United States), will likely result in substantial compliance costs relating to the installation of equipment on our vessels to treat ballast water before it is discharged and other additional ballast water management and reporting requirements. In the United States, the Vessel Incidental Discharge Act (VIDA) was signed into law on December 4, 2018, which requires the U.S. Coast Guard to address the regulation of discharges incidental to the normal operation of commercial vessels into navigable waters, including management of ballast water. This change is expected to result in a simplification of the current patch-work state of ballast water regulation in the United States, which is currently variably regulated by the U.S. Environmental Protection Agency and the various states.

The operation of vessels is also affected by the requirements set forth in the International Safety Management Code (the ISM Code). The ISM Code requires ship owners and bareboat charterers to develop and maintain an extensive Safety Management System that includes the adoption of a safety and environmental protection policy setting forth instructions and procedures for safe vessel operation and describing procedures for dealing with emergencies. Further to this, the IMO has introduced the first ever mandatory measures for an international greenhouse gas reduction regime for a global industry sector. These energy efficiency measures took effect on January 1, 2013 and apply to all ships of 400 gross tonnage and above. They include the development of a ship energy efficiency management plan (SEEMP) which is akin to a safety management plan, with which the industry will have to comply. The failure of a ship owner or bareboat charterer to comply with the ISM Code and IMO measures may subject such party to increased liability, may decrease available insurance coverage for the affected vessels, and may result in a denial of access to, or detention in, certain ports.

We operate a fleet of crude, product and chemical tankers that are subject to national and international laws governing pollution from such vessels. Several international conventions impose and limit pollution liability from vessels. An owner of a tanker vessel carrying a cargo of persistent oil as defined by the International Convention for Civil Liability for Oil Pollution Damage (the

Table of Contents

CLC) is subject under the convention to strict liability for any pollution damage caused in a contracting state by an escape or discharge from cargo or bunker tanks. This liability is subject to a financial limit calculated by reference to the tonnage of the ship, and the right to limit liability may be lost if the spill is caused by the ship owner's intentional or reckless conduct. Liability may also be incurred under the CLC for a bunker spill from the vessel even when she is not carrying such cargo, but is in ballast.

When a tanker is carrying clean oil products that do not constitute persistent oil that would be covered under the CLC, liability for any pollution damage will generally fall outside the CLC and will depend on other international conventions or domestic laws in the jurisdiction where the spillage occurs. The same principle applies to any pollution from the vessel in a jurisdiction which is not a party to the CLC. The CLC applies in over 100 jurisdictions around the world, but it does not apply in the United States, where the corresponding liability laws such as the Oil Pollution Act of 1990 (the OPA) discussed below, are particularly stringent. For vessel operations not covered by the CLC, including those operated under our fleet, at present, international liability for oil pollution is governed by the International Convention on Civil Liability for Bunker Oil Pollution Damage (the Bunker Convention). In 2001, the IMO adopted the Bunker Convention, which imposes strict liability on ship owners for pollution damage and response costs incurred in contracting states caused by discharges, or threatened discharges, of bunker oil from all classes of ships not covered by the CLC. The Bunker Convention also requires registered owners of ships over a certain size to maintain insurance to cover their liability for pollution damage in an amount equal to the limits of liability under the applicable national or international limitation regime, including liability limits calculated in accordance with the Convention on Limitation of Liability for Maritime Claims 1976, as amended (the 1976 Convention), discussed in more detail in the following paragraph. The Bunker Convention became effective in contracting states on November 21, 2008 and, as of February 11, 2019, had 91 contracting states, representing 92.85% of the gross tonnage of the world's merchant fleet. In non-contracting states, liability for such bunker oil pollution typically is determined by the national or other domestic laws in the jurisdiction where the spillage occurs.

The CLC and Bunker Convention also provide vessel owners a right to limit their liability, depending on the applicable national or international regime. The CLC includes its own liability limits. The 1976 Convention is the most widely applicable international regime limiting maritime pollution liability. Rights to limit liability under the 1976 Convention are forfeited where a spill is caused by a ship owner's intentional or reckless conduct. Certain jurisdictions have ratified the IMO's Protocol of 1996 to the 1976 Convention, referred to herein as the Protocol of 1996. The Protocol of 1996 provides for substantially higher liability limits in those jurisdictions than the limits set forth in the 1976 Convention. Finally, some jurisdictions, such as the United States, are not a party to either the 1976 Convention or the Protocol of 1996, and, therefore, a ship owner's rights to limit liability for maritime pollution in such jurisdictions may be uncertain.

Environmental legislation in the United States merits particular mention as it is in many respects more onerous than international laws, representing a high-water mark of regulation with which ship owners and operators must comply, and of liability likely to be incurred in the event of non-compliance or an incident causing pollution. Though it has been several years since the 2010 Deepwater Horizon oil spill in the Gulf of Mexico (the Deepwater Horizon incident), such regulation may become even stricter because of the incident's impact. In the United States, the OPA establishes an extensive regulatory and liability regime for the protection and cleanup of the environment from cargo and bunker oil spills from vessels, including tankers. The OPA covers all owners and operators whose vessels trade in the United States, its territories and possessions or whose vessels operate in United States waters, which includes the United States territorial sea and its 200 nautical mile exclusive economic zone. Under the OPA, vessel owners, operators and bareboat charterers are responsible parties and are jointly, severally and strictly liable (unless the spill results solely from the act or omission of a third party, an act of God or an act of war) for all containment and clean-up costs and other damages arising from discharges or substantial threats of discharges, of oil from their vessels. In response to the Deepwater Horizon incident, the U.S. House of Representatives passed and the U.S. Senate considered

but did not pass a bill to strengthen certain requirements of the OPA; similar legislation may be introduced in the future.

In addition to potential liability under the federal OPA, vessel owners may in some instances incur liability on an even more stringent basis under state law in the particular state where the spillage occurred. For example, California regulations prohibit the discharge of oil, require an oil contingency plan be filed with the state, require that the ship owner contract with an oil response organization and require a valid certificate of financial responsibility, all prior to the vessel entering state waters.

In recent years, the EU has become increasingly active in the field of regulation of maritime safety and protection of the environment. In some areas of regulation the EU has introduced new laws without attempting to procure a corresponding amendment to international law. Notably, in 2005 the EU adopted a directive, as amended in 2009, on ship-source pollution, imposing criminal sanctions for pollution not only where pollution is caused by intent or recklessness (which would be an offence under MARPOL), but also where it is caused by serious negligence. The concept of serious negligence may be interpreted in practice to be little more than ordinary negligence. The directive could therefore result in criminal liability being incurred in circumstances where it would not be incurred under international law. In February 2017, EU member states met to consider independently regulating the shipping industry under the Emissions Trading System (ETS), which requires ETS-regulated businesses to report on carbon emissions and provides for a credit trading system for carbon allowances. On February 15, 2017, European Parliament voted in favor of a bill to include maritime shipping in the ETS by 2023 if the IMO has not promulgated a comparable system by 2021. In November 2017, the Council of Ministers, EU's main decision making body, agreed that Europe should act on shipping emissions from 2023 if the IMO fails to deliver effective global measures. In 2018, IMO's urgent call to action to bring about ship greenhouse gas emissions reductions before 2023 was met with industry push-back by many countries. Depending on how fast IMO and the EU move on this issue, the ETS may result in additional compliance costs for our vessels.

Table of Contents

In response to the Deepwater Horizon incident, the European Union issued Directive 2013/30/EU of the European Parliament and of the Council of June 12, 2013 on safety of offshore oil and gas operations. Implemented on July 19, 2015, the objective of this Directive is to reduce as far as possible the occurrence of major accidents relating to offshore oil and gas operations and to limit their consequences, thus increasing the protection of the marine environment and coastal economies against pollution, establishing minimum conditions for safe offshore exploration and exploitation of oil and gas and limiting possible disruptions to Union indigenous energy production, and to improve the response mechanisms in case of an accident. As far as the environment is concerned, the UK has various new or amended regulations such as: the Offshore Petroleum Activities (Offshore Safety Directive) (Environmental Functions) Regulations 2015 (OSDEF), the 2015 amendments to the Merchant Shipping (Oil Pollution Preparedness, Response and Cooperation Convention) Regulations 1998 (OPRC 1998) and other environmental Directive requirements, specifically the Environmental Management System. The Offshore Petroleum Licensing (Offshore Safety Directive) Regulations 2015 will implement the licensing Directive requirements.

Criminal liability for a pollution incident could not only result in us incurring substantial penalties or fines, but may also, in some jurisdictions, facilitate civil liability claims for greater compensation than would otherwise have been payable.

We maintain insurance coverage for each owned vessel in our fleet against pollution liability risks in the amount of \$1.0 billion in the aggregate for any one event. The insured risks include penalties and fines as well as civil liabilities and expenses resulting from accidental pollution. However, this insurance coverage is subject to exclusions, deductibles and other terms and conditions. If any liabilities or expenses fall within an exclusion from coverage, or if damages from a catastrophic incident exceed the aggregate liability of \$1.0 billion for any one event, our cash flow, profitability and financial position would be adversely impacted.

Climate change and government laws and regulations related to climate change could negatively impact our financial condition.

We are and will be, directly and indirectly, subject to the effects of climate change and may, directly or indirectly, be affected by government laws and regulations related to climate change. A number of countries have adopted or are considering the adoption of regulatory frameworks to reduce greenhouse gas emissions, such as carbon dioxide, methane and nitrogen oxides. In the United States, the United States Environmental Protection Agency (EPA) has declared greenhouse gases to be dangerous pollutants and has issued greenhouse gas reporting requirements for emissions sources in certain industries (which currently do not include the shipping industry). The EPA does require owners of vessels subject to MARPOL Annex VI to maintain records for nitrogen oxides standards and in-use fuel specifications.

In addition, while the emissions of greenhouse gases from international shipping are not subject to the Kyoto Protocol to the United Nations Framework Convention on Climate Change (the UNFCCC), which requires adopting countries to implement national programs to reduce greenhouse gas emissions, the IMO intends to develop limits on greenhouse gases from international shipping. It has responded to the global focus on climate change and greenhouse gas emissions by developing specific technical and operational efficiency measures and a work plan for market-based mechanisms in 2011. These include the mandatory measures of SEEMP, outlined above, and an energy efficiency design index (EEDI) for new ships. The IMO is also considering its position on market-based measures through an expert working group. Among the numerous proposals being considered by the working group are the following: a port state levy based on the amount of fuel consumed by the vessel on its voyage to the port in question; a global emissions trading scheme which would allocate emissions allowances and set an emissions cap; and an international fund establishing a global reduction target for international shipping, to be set either by the UNFCCC or the IMO.

At its 68th session (2015), the Marine Environmental Protection Committee (the MEPC) amended the 2014 Guidelines on EEDI survey and certification as well as the method of calculating an EEDI for new ships, the latter of which was again amended at the 70th session (2016). At its 70th session, the MEPC also adopted mandatory requirements for ships of 5,000 gross tonnage or greater to collect fuel consumption data for each type of fuel used, and report the data to the flag State after the end of each calendar year.

At the 72nd MEPC session (April 2018), the committee adopted the goal of reducing annual greenhouse gas emissions from ships by at least 50% by 2050 as compared to 2008 levels, which if implemented could significantly increase operational costs associated with equipment upgrades and fuel costs.

In December 2011, UN climate change talks took place in Durban and concluded with an agreement referred to as the Durban Platform for Enhanced Action. The Durban Conference did not result in any proposals specifically addressing the shipping industry's role in climate change but the progress that has been made by the IMO in this area was widely acknowledged throughout the negotiating bodies of the UNFCCC process and an ad hoc working group was established.

Although regulation of greenhouse gas emissions in the shipping industry was discussed during the 2015 UN Climate Change Conference in Paris (the Paris Conference), the agreement reached among the 195 nations did not expressly reference the shipping industry. Following the Paris Conference, the IMO announced it would continue its efforts on this issue at the MEPC, and at its 70th

Table of Contents

session, the MEPC approved a roadmap for developing a comprehensive GHG emissions reduction strategy for ships, which includes the goal of adopting an initial strategy and emission reduction commitments in 2018. The roadmap also provides for additional studies and further intersessional work, continued at the 71st session in 2017, with a goal of adopting a revised strategy in 2023 to include short-, mid- and long-term reduction measures and schedules for implementation. In April 2018, the committee charged with creating the reduction strategy must finalize the initial draft of the strategy and submit a report to MEPC.

On August 3, 2017, the U.S. formally submitted a notice of withdrawal from the Paris Agreement. Thus far, no other nations have withdrawn from the Paris Agreement, so it remains to be seen whether the withdrawal will significantly impact greenhouse gas developments moving forward. The United Nations Katowice Climate Change Conference occurred December 2-14, 2018. The key objective of the meeting was to begin adopting the implementation guidelines of the Paris Climate Change Agreement.

The EU announced in April 2007 that it planned to expand the EU emissions trading scheme by adding vessels, and a proposal from the European Commission (EC) was expected if no global regime for reduction of seaborne emissions had been agreed to by the end of 2011. As of January 31, 2011, the EC had stopped short of proposing that emissions from ships be included in the EU s emissions-trading scheme. However, on October 1, 2012, it announced that it would propose measures to monitor, verify and report on greenhouse-gas emissions from the shipping sector. On June 28, 2013, the EC adopted a communication setting out a strategy for progressively including greenhouse gas emissions from maritime transport in the EU s policy for reducing its overall GHG emissions. The first step proposed by the EC was an EU Regulation (as defined below) to an EU-wide system for the monitoring, reporting and verification of carbon dioxide emissions from large ships starting in 2018. The EU Regulation (2015/757) was adopted on April 29, 2015 and took effect on July 1, 2015, with monitoring, reporting and verification requirements beginning on January 1, 2018. This Regulation appears to be indicative of an intent to maintain pressure on the international negotiating process. The EC also adopted an Implementing Regulation, which entered into force in November 2016, setting templates for monitoring plans, emissions reports and compliance documents pursuant to Regulation 2015/757.

We cannot predict with any degree of certainty what effect, if any, possible climate change and government laws and regulations related to climate change will have on our operations, whether directly or indirectly. However, we believe that climate change, including the possible increase in severe weather events resulting from climate change, and government laws and regulations related to climate change may affect, directly or indirectly, (i) the cost of the vessels we may acquire in the future, (ii) our ability to continue to operate as we have in the past, (iii) the cost of operating our vessels, and (iv) insurance premiums, deductibles and the availability of coverage. As a result, our financial condition could be negatively impacted by significant climate change and related governmental regulation, and that impact could be material.

We are subject to vessel security regulations and we incur costs to comply with adopted regulations. We may be subject to costs to comply with similar regulations that may be adopted in the future in response to terrorism.

Since the terrorist attacks of September 11, 2001, there have been a variety of initiatives intended to enhance vessel security. On November 25, 2002, the Maritime Transportation Security Act of 2002 (the MTSA) came into effect. To implement certain portions of the MTSA, in July 2003, the U.S. Coast Guard issued regulations requiring the implementation of certain security requirements aboard vessels operating in waters subject to the jurisdiction of the United States. Similarly, in December 2002, amendments to the International Convention for the Safety of Life at Sea (the SOLAS) created a new chapter of the convention dealing specifically with maritime security. The new chapter went into effect in July 2004, and imposes various detailed security obligations on vessels and port authorities, most of which are contained in the International Ship and Port Facilities Security Code (the ISPS Code). Among the various

requirements are:

on-board installation of automatic information systems (AIS), to enhance vessel-to-vessel and vessel-to-shore communications;

on-board installation of ship security alert systems;

the development of vessel security plans; and

compliance with flag state security certification requirements.

The U.S. Coast Guard regulations, intended to be aligned with international maritime security standards, exempt non-U.S. vessels from MTSA vessel security measures, provided such vessels have on board a valid International Ship Security Certificate (ISSC) that attests to the vessel's compliance with SOLAS security requirements and the ISPS Code. Starting January 1, 2016, the IMDG Code also included updates to the provisions for radioactive material, reflecting the latest provisions from the International Atomic Energy Agency, or the IAEA, new marking requirements for overpack and salvage and updates to various individual packing requirements. We will implement the various security measures addressed by the MTSA, SOLAS and the ISPS Code and take measures for our vessels or vessels that we charter to attain compliance with all applicable security requirements within the prescribed time periods. Although management does not believe these additional requirements will have a material financial impact on our operations, there can be no assurance that there will not be an interruption in operations to bring vessels into compliance with the applicable requirements and any such interruption could cause a decrease in charter revenues. Furthermore, additional security measures could be required in the future that could have significant financial impact on us.

Table of Contents

Our international activities increase the compliance risks associated with economic and trade sanctions imposed by the United States, the European Union and other jurisdictions.

Iran

Prior to January 2016, the scope of sanctions imposed against Iran, the government of Iran and persons engaging in certain activities or doing certain business with and relating to Iran was expanded by a number of jurisdictions, including the United States, the European Union and Canada. In 2010, the U.S. enacted the Comprehensive Iran Sanctions Accountability and Divestment Act (CISADA), which expanded the scope of the former Iran Sanctions Act. The scope of U.S. sanctions against Iran were expanded subsequent to CISADA by, among other U.S. laws, the National Defense Authorization Act of 2012 (the 2012 NDAA), the Iran Threat Reduction and Syria Human Rights Act of 2012 (ITRA), Executive Order 13662, and the Iran Freedom and Counter-Proliferation Act of 2012 (IFCA). The foregoing laws, among other things, expanded the application of prohibitions to non-U.S. companies such as our company and to transactions with no U.S. nexus, and introduced limits on the ability of non-U.S. companies and other non-U.S. persons to do business or trade with Iran when such activities relate to specific activities such as investment in Iran, the supply or export of refined petroleum or refined petroleum products to Iran, the supply and delivery of goods to Iran which could enhance Iran's petroleum or energy sectors, and the transportation of crude oil from Iran to countries which do not enjoy Iran crude oil sanctions waivers (our tankers called in Iran but did not engage in the prohibited activities specifically identified by these sanctions).

U.S. economic sanctions on Iran fall into two general categories: Primary sanctions, which prohibit U.S. persons or U.S. companies and their foreign branches, foreign owned or controlled subsidiaries, U.S. citizens, U.S. permanent residents, persons within the territory of the United States from engaging in all direct and indirect trade and other transactions with Iran without U.S. government authorization, and secondary sanctions, which are mainly nuclear-related sanctions. While most of the U.S. nuclear-related sanctions with respect to Iran (including, inter alia, CISADA, ITRA, and IFCA) and the EU sanctions on Iran were initially lifted on January 16, 2016 through the implementation of the Joint Comprehensive Plan of Action (JCPOA) entered into between the permanent members of the United Nations Security Council (China, France, Russia, the United Kingdom and the United States) and Germany, there are still certain limitations under that sanctions framework in place with which we need to comply. The primary sanctions with which U.S. persons or transactions with a U.S. nexus must comply are still in force and have not been lifted or relaxed. However, the following sanctions which were lifted under the JCPOA were reimposed (snapped back) on May 8, 2018 as a result of the U.S. withdrawal from the JCPOA:

Sanctions on the purchase or acquisition of U.S. dollar banknotes by the Government of Iran;

Sanctions on Iran's trade in gold or precious metals;

Sanctions on the direct or indirect sale, supply, or transfer to or from Iran of graphite, raw, or semi-finished metals such as aluminum and steel, coal, and software for integrating industrial processes;

Sanctions on significant transactions related to the purchase or sale of Iranian rials, or the maintenance of significant funds or accounts outside the territory of Iran denominated in the Iranian rial;

Sanctions on the purchase, subscription to, or facilitation of the issuance of Iranian sovereign debt; and

Sanctions on Iran's automotive sector.

Following a 180-day wind-down period ending on November 4, 2018, the U.S. government will re-impose the following sanctions that were lifted pursuant to the JCPOA, including sanctions on associated services related to the activities below:

Sanctions on Iran's port operators, and shipping and shipbuilding sectors, including on the Islamic Republic of Iran Shipping Lines (IRISL), South Shipping Line Iran, or their affiliates;

Sanctions on petroleum-related transactions with, among others, the National Iranian Oil Company (NIOC), Naftiran Intertrade Company (NICO), and National Iranian Tanker Company (NITC), including the purchase of petroleum, petroleum products, or petrochemical products from Iran;

Sanctions on transactions by foreign financial institutions with the Central Bank of Iran and designated Iranian financial institutions under Section 1245 of the National Defense Authorization Act for Fiscal Year 2012 (NDAA);

Sanctions on the provision of specialized financial messaging services to the Central Bank of Iran and Iranian financial institutions described in Section 104(c)(2)(E)(ii) of the Comprehensive Iran Sanctions and Divestment Act of 2010 (CISADA);

Sanctions on the provision of underwriting services, insurance, or reinsurance; and

Table of Contents

Sanctions on Iran's energy sector.

U.S. Iran sanctions also prohibit significant transactions with any individual or entity that the U.S. Government has designated as an Iran sanctions target.

EU sanctions remain in place in relation to the export of arms and military goods listed in the EU common military list, missiles-related goods and items that might be used for internal repression. The main nuclear-related EU sanctions which remain in place include restrictions on:

Graphite and certain raw or semi-finished metals such as corrosion-resistant high-grade steel, iron, aluminum and alloys, titanium and alloys and nickel and alloys (as listed in Annex VIIB to EU Regulation 267/2012 as updated by EU Regulation 2015/1861 (the "EU Regulation"));

Goods listed in the Nuclear Suppliers Group list (listed in Annex I to the EU Regulation);

Goods that could contribute to nuclear-related or other activities inconsistent with the JCPOA (as listed in Annex II to the EU Regulation); and

Software designed for use in nuclear/military industries (as listed in Annex VIIA to the EU Regulation).

The above EU sanctions activities can only be engaged if prior authorization (granted on a case-by-case basis) is obtained. The remaining restrictions apply to the sale, supply, transfer or export, directly or indirectly to any Iranian person/for use in Iran, as well as the provision of technical assistance, financing or financial assistance in relation to the restricted activity. Certain individuals and entities remain sanctioned and the prohibition to make available, directly or indirectly, economic resources or assets to or for the benefit of sanctioned parties remains. Economic resources is widely defined and it remains prohibited to provide vessels for a fixture from which a sanctioned party (or parties related to a sanctioned party) directly or indirectly benefits. It is therefore still necessary to carry out due diligence on the parties and cargoes involved in fixtures involving Iran.

Russia/Ukraine

As a result of the crisis in Ukraine and the annexation of Crimea by Russia in 2014, both the U.S. and EU have implemented sanctions against certain Russian individuals and entities.

The EU has imposed travel bans and asset freezes on certain Russian persons and entities pursuant to which it is prohibited to make available, directly or indirectly, economic resources or assets to or for the benefit of the sanctioned parties. Certain Russian ports including Kerch Commercial Seaport; Sevastopol Commercial Seaport and Port Feodosia are subject to the above restrictions. Other entities are subject to sectoral sanctions which limit the provision of equity financing and loans to the listed entities. In addition, various restrictions on trade have been implemented which, amongst others, include a prohibition on the import into the EU of goods originating in Crimea or Sevastopol as well as restrictions on trade in certain dual-use and military items and restrictions in relation to various items of technology associated with the oil industry for use in deep water exploration and production, Arctic oil exploration and production or shale oil projects in Russia. As such, it is important to carry out due diligence on the parties and cargoes involved in fixtures relating to Russia.

The United States has imposed sanctions against certain designated Russian entities and individuals (U.S. Russian Sanctions Targets). These sanctions block the property and all interests in property of the U.S. Russian Sanctions Targets. This effectively prohibits U.S. persons from engaging in any economic or commercial transactions with the U.S. Russian Sanctions Targets unless the same are authorized by the U.S. Treasury Department. Similar to EU sanctions, U.S. sanctions also entail restrictions on certain exports from the United States to Russia and the imposition of Sectoral Sanctions which restrict the provision of equity and debt financing to designated Russian entities. While the prohibitions of these sanctions are not directly applicable to us, we have compliance measures in place to guard against transactions with U.S. Russian Sanctions Targets which may involve the United States or U.S. persons and thus implicate prohibitions. The United States also maintains prohibitions on trade with Crimea.

The U.S. has also taken a number of steps toward implementing aspects of the Countering America's Adversaries Through Sanctions Act (CAATSA), a major piece of sanctions legislation.

Under CAATSA, the U.S. has imposed secondary sanctions relating to Russia's energy export pipelines, investments in special Russian crude oil projects. CAATSA has a provision that requires the U.S. President to sanction persons who knowingly engage in significant transactions with parties affiliated with Russia's defense and intelligence sectors.

Table of Contents

Venezuela-Related Sanctions

The U.S. sanctions with respect to Venezuela prohibit dealings with designated Venezuelan government officials, and curtail the provision of financing to Petroleos de Venezuela S.A. (PDVSA) and other government entities. EU sanctions against Venezuela are primarily governed by EU Council Regulation 2017/2063 of 13 November 2017 concerning restrictive measures in view of the situation in Venezuela. This includes financial sanctions and restrictions on listed persons and an, arms embargo and related prohibitions and restrictions including restrictions related to internal repression.

In particular, on August 24, 2017 by executive order 13808, the Trump Administration Imposed Additional Sanctions With Respect to Situation in Venezuela. EO 13808 amended the Venezuela sanctions as follows:

Expanded the definition of Government of Venezuela to include PDVSA (Section 3); and

Added prohibitions on all transactions related to:

New debt with a maturity of greater than 90 days of PDVSA;

New debt with a maturity of greater than 30 days or new equity of the Government of Venezuela, other than debt of PDVSA;

Bonds issued by the Government of Venezuela prior to August 25, 2017, the EO s effective date;

Dividend payments or other distributions of profits to the Government of Venezuela from any entity directly or indirectly owned or controlled by the Government of Venezuela; or

Direct or indirect purchase by US persons or persons within the US of securities from the Government of Venezuela, other than securities qualifying as new debt with a maturity of less than or equal to 90 or 30 days as covered by the EO (Section 1).

Additionally, all transactions related to, provision of financing for, and other dealings in, by a United States person or within the United States, any digital currency, digital coin, or digital token, that was issued by, for, or on behalf of the Government of Venezuela on or after January 9, 2018, are prohibited.

On January 25, 2019, Executive Order 13857 expanded the definition of Government of Venezuela to include persons that have acted, or have purported to act, on behalf of the Government of Venezuela, including members of the Maduro regime.

On January 28, 2019, the OFAC (i) designated PDVSA for operating in the oil sector of Venezuela; and (ii) issued eight new General Licenses.

Other U.S. Economic Sanctions Targets

In addition to Iran and certain Russian entities and individuals, as indicated above, the United States maintains economic sanctions against Syria, Cuba, North Korea, and sanctions against entities and individuals (such as entities and individuals in the foregoing targeted countries, designated terrorists, narcotics traffickers) whose names appear on the List of SDNs and Blocked Persons maintained by the U.S. Treasury Department (collectively, Sanctions Targets). We are subject to the prohibitions of these sanctions to the extent that any transaction or activity we engage in involves Sanctions Targets and a U.S. person or otherwise has a nexus to the United States.

Other E.U. Economic Sanctions Targets

The EU also maintains sanctions against Syria, North Korea and certain other countries and against individuals listed by the EU. These restrictions apply to our operations and as such, to the extent that these countries may be involved in any business it is important to carry out checks to ensure compliance with all relevant restrictions and to carry out due diligence checks on counterparties and cargoes.

Compliance

Considering the aforementioned prohibitions of U.S. as well as EU sanctions and the nature of our business, there is a sanctions risk for us due to the worldwide trade of our vessels, which we seek to minimise by the implementation of our corporate Sanctions policy and our compliance with all applicable sanctions and embargo laws and regulations. Although we intend to maintain such compliance, there can be no assurance that we will be in compliance in the future, particularly as the scope of certain laws may be unclear and may be subject to changing interpretations, and the law may change. Moreover, despite, for example, relevant provisions in charter parties forbidding the use of our vessels in trade that would violate economic sanctions, our charterers may nevertheless violate applicable sanctions and embargo laws and regulations and those violations could in turn negatively affect our reputation and be imputed to us.

In addition, given our relationship with Navios Holdings and its affiliates, we cannot give any assurance that an adverse finding against Navios Holdings and/or its affiliates by a governmental or legal authority or others with respect to the matters discussed herein or any future matter related to regulatory compliance by Navios Holdings and/or its affiliates will not have a material adverse impact on our business, reputation or the market price or trading of our common shares.

Table of Contents

We are constantly monitoring developments in the United States, the European Union and other jurisdictions that maintain economic sanctions against Iran, other countries, and other sanctions targets, including developments in implementation and enforcement of such sanctions programs. Expansion of sanctions programs, embargoes and other restrictions in the future (including additional designations of countries and persons subject to sanctions), or modifications in how existing sanctions are interpreted or enforced, could prevent our vessels from calling in ports in sanctioned countries or could limit their cargoes. If any of the risks described above materialize, it could have a material adverse impact on our business and results of operations.

To reduce the risk of violating economic sanctions, we have a policy of compliance with applicable economic sanctions laws and have implemented and continue to implement and diligently follow compliance procedures to avoid economic sanctions violations.

We could be materially adversely affected by violations of the U.S. Foreign Corrupt Practices Act, the U.K. Bribery Act and anti-corruption laws in other applicable jurisdictions.

We are subject to anti-corruption, anti-bribery, anti-money laundering and similar laws and regulations in various jurisdictions in which we conduct activities, including the U.S. Foreign Corrupt Practices Act (FCPA), and other anti-corruption laws and regulations. In addition, we may be subject to the U.K. Bribery Act 2010. The FCPA and the U.K. Bribery Act 2010 prohibit us and our officers, directors, employees and business partners acting on our behalf, including agents, from corruptly offering, promising, authorizing or providing anything of value to a foreign official for the purposes of influencing official decisions or obtaining or retaining business or otherwise obtaining favorable treatment. The FCPA also requires companies to make and keep books, records and accounts that accurately reflect transactions and dispositions of assets and to maintain a system of adequate internal accounting controls. The UK Bribery Act also prohibits non-governmental commercial bribery and soliciting or accepting bribes. A violation of these laws or regulations could adversely affect our business, results of operations, financial condition and reputation.

As an international shipping company, we operate in countries known to present heightened risks for corruption. In addition, our business requires us to interact with government officials, including port officials, harbor masters, maritime regulators, customs officials and pilots, and we have client relationships with state-owned enterprises. Both factors raise the risk of anticorruption issues.

Non-compliance with anti-corruption, anti-bribery or anti-money laundering laws could subject us to whistleblower complaints, adverse media coverage, investigations, and severe administrative, civil and criminal sanctions, collateral consequences, remedial measures and legal expenses, all of which could materially and adversely affect our business, results of operations, financial condition and reputation. Compliance with the FCPA, the U.K. Bribery Act and other applicable anti-corruption laws and related regulations and policies imposes potentially significant costs and operational burdens on us. Although we have policies and procedures in place to mitigate the risk of non-compliance with anti-corruption, anti-bribery or anti-money laundering laws, including our Code of Ethics and anti-bribery and anti-corruption policy, we may not be able to adequately prevent or detect all possible violations under applicable anti-bribery and anti-corruption legislation, including by third-party agents.

Increased inspection procedures and tighter import and export controls could increase costs and disrupt our business.

International shipping is subject to various security and customs inspections and related procedures in countries of origin and destination. Inspection procedures can result in the seizure of contents of vessels, delays in the loading, offloading or delivery and the levying of customs, duties, fines and other penalties.

It is possible that changes to inspection procedures could impose additional financial and legal obligations on us. Furthermore, changes to inspection procedures could also impose additional costs and obligations on our future customers and may, in certain cases, render the shipment of certain types of cargo impractical. Any such changes or developments may have a material adverse effect on our business, financial condition, and results of operations.

A failure to pass inspection by classification societies could result in our vessels becoming unemployable unless and until they pass inspection, resulting in a loss of revenues from such vessels for that period and a corresponding decrease in operating cash flows.

The hull and machinery of every commercial vessel must be inspected and approved by a classification society authorized by its country of registry. The classification society certifies that a vessel is safe and seaworthy in accordance with the applicable rules and regulations of the country of registry of the vessel and with SOLAS. A vessel must undergo an annual survey, an intermediate survey and a special survey. In lieu of a special survey, a vessel's machinery may be on a continuous survey cycle, under which the machinery would be surveyed periodically over a five-year period. Every vessel is also required to be drydocked every two to three years for inspection of the underwater parts of such vessel. If any of our vessels fail any annual survey, intermediate survey, or special

Table of Contents

survey, the vessel may be unable to trade between ports and, therefore, would be unemployable, potentially causing a negative impact on our revenues due to the loss of revenues from such vessel until it was able to trade again. Further, if any vessel fails a classification survey and the condition giving rise to the failure is not cured within a reasonable time, the vessel may lose coverage under various insurance programs, including hull & machinery insurance and/or protection & indemnity insurance.

The operation of ocean-going vessels entails the possibility of marine disasters, including damage or destruction of a vessel due to accident, the loss of a vessel due to piracy, terrorism or political conflict, damage or destruction of cargo and similar events that are inherent operational risks of the tanker industry and may cause a loss of revenue from affected vessels and damage to our business reputation and condition, which may in turn lead to loss of business.

The operation of ocean-going vessels entails certain inherent risks that may adversely affect our business and reputation. Our vessels and their cargoes are at risk of being damaged or lost due to events such as:

damage or destruction of a vessel due to marine disaster such as a collision;

the loss of a vessel due to piracy and terrorism;

cargo and property losses or damage as a result of the foregoing or less drastic causes such as human error, mechanical failure, grounding, fire, explosions and bad weather;

environmental accidents as a result of the foregoing; and

business interruptions and delivery delays caused by mechanical failure, human error, acts of piracy, war, terrorism, political action in various countries, labor strikes, potential government expropriation of our vessels or adverse weather conditions.

In addition, increased operational risks arise as a consequence of the complex nature of the crude oil, product and chemical tanker industry, the nature of services required to support the industry, including maintenance and repair services, and the mechanical complexity of the tankers themselves. Compared to other types of vessels, tankers are exposed to a higher risk of damage and loss by fire, whether ignited by a terrorist attack, collision or other cause, due to the high flammability and high volume of the oil transported in tankers. Damage and loss could also arise as a consequence of a failure in the services required to support the industry, for example, due to inadequate dredging. Inherent risks also arise due to the nature of the product transported by our vessels. Any damage to, or accident involving, our vessels while carrying crude oil could give rise to environmental damage or lead to other adverse consequences. Each of these inherent risks may also result in death or injury to persons, loss of revenues or property, higher insurance rates, damage to our customer relationships, delay or rerouting.

Any of these circumstances or events could substantially increase our costs. For example, the costs of replacing a vessel or cleaning up environmental damage could substantially lower our revenues by taking vessels out of operation permanently or for periods of time. Furthermore, the involvement of our vessels in a disaster or delays in delivery, damage or the loss of cargo may harm our reputation as a safe and reliable vessel operator and cause us to lose

business. Our vessels could be arrested by maritime claimants, which could result in the interruption of business and decrease revenue and lower profitability.

Some of these inherent risks could result in significant damage, such as marine disaster or environmental incidents, and any resulting legal proceedings may be complex, lengthy, costly and, if decided against us, any of these proceedings or other proceedings involving similar claims or claims for substantial damages may harm our reputation and have a material adverse effect on our business, results of operations, cash flow and financial position. In addition, the legal systems and law enforcement mechanisms in certain countries in which we operate may expose us to risk and uncertainty. Further, we may be required to devote substantial time and cost defending these proceedings, which could divert attention from management of our business. Crew members, tort claimants, claimants for breach of certain maritime contracts, vessel mortgagees, suppliers of goods and services to a vessel, shippers of cargo and other persons may be entitled to a maritime lien against a vessel for unsatisfied debts, claims or damages, and in many circumstances a maritime lien holder may enforce its lien by arresting a vessel through court processes. Additionally, in certain jurisdictions, such as South Africa, under the sister ship theory of liability, a claimant may arrest not only the vessel with respect to which the claimant's lien has arisen, but also any associated vessel owned or controlled by the legal or beneficial owner of that vessel. If any vessel ultimately owned and operated by us is arrested, this could result in a material loss of revenues, or require us to pay substantial amounts to have the arrest lifted.

Any of these factors may have a material adverse effect on our business, financial conditions and results of operations.

The smuggling of drugs or other contraband onto our vessels may lead to governmental claims against us.

We expect that our vessels will call in ports in South America and other areas where smugglers attempt to hide drugs and other contraband on vessels, with or without the knowledge of crew members. To the extent our vessels are found with contraband, whether inside or attached to the hull of our vessel and whether with or without the knowledge of any of our crew, we may face governmental or other regulatory claims which could have an adverse effect on our business, results of operations, cash flows and financial condition. Under some jurisdictions, vessels used for the conveyance of illegal drugs could result in forfeiture of the vessel to the government of such jurisdiction.

Table of Contents***Security breaches and disruptions to our information technology infrastructure could interfere with our operations and expose us to liability which could have a material adverse effect on our business, financial condition, cash flows and results of operations.***

In the ordinary course of business, we rely on information technology networks and systems to process, transmit, and store electronic information, and to manage or support a variety of business processes and activities. Additionally, we collect and store certain data, including proprietary business information and customer and employee data, and may have access to other confidential information in the ordinary course of our business. Despite our cybersecurity measures, which includes active monitoring, training, reporting and other activities designed to protect and secure our data, our information technology networks and infrastructure may be vulnerable to damage, disruptions, or shutdowns due to attack by hackers or breaches, employee error or malfeasance, data leakage, power outages, computer viruses and malware, telecommunication or utility failures, systems failures, natural disasters, or other catastrophic events. Any such events could result in legal claims or proceedings, liability or penalties under privacy or other laws, disruption in operations, and damage to our reputation, which could have a material adverse effect on our business, financial condition, cash flows and results of operations.

Acts of piracy on ocean-going vessels have increased in frequency and magnitude, which could adversely affect our business.

Acts of piracy have historically affected ocean-going vessels trading in certain regions of the world, such as the South China Sea and the Gulf of Aden off the coast of Somalia. Piracy continues to occur in the Gulf of Aden off the coast of Somalia and increasingly in the Gulf of Guinea. Although both the frequency and success of attacks have diminished recently, we will still consider potential acts of piracy to be a material risk to the international container shipping industry, and protection against the risk requires vigilance. In January 2014, the Nave Atropos, a vessel owned by us, came under attack from a pirate action group in international waters off the coast of Yemen and in February 2016, the Nave Jupiter, a vessel also owned by us, came under attack from pirate action groups on her way out from her loading terminal about 50 nautical miles off Bayelsa, Nigeria. In both instances, the crew and the on-board security team successfully implemented the counter piracy action plan and standard operating procedures to deter the attack with no consequences to the vessels or their crew. These piracy attacks have resulted in regions (in which our vessels are deployed) being characterized by insurers as war risk zones or Joint War Committee war and strikes listed areas. Premiums payable for insurance coverage could increase significantly and insurance coverage may be more difficult to obtain. Crew costs, including those due to employing onboard security guards, could increase in such circumstances. While the use of security guards is intended to deter and prevent the hijacking of our vessels, it could also increase our risk of liability for death or injury to persons or damage to personal property. In addition, while we believe the charterer remains liable for charter payments when a vessel is seized by pirates, the charterer may dispute this and withhold charter hire until the vessel is released. Although we insure against these losses to the extent practicable, the risk remains of uninsured losses which could significantly affect our business. Costs are incurred in taking additional security measures in accordance with Best Management Practices to Deter Piracy, notably those contained in the BMP3 industry standard. A number of flag states have signed the 2009 New York Declaration, which expresses commitment to Best Management Practices in relation to piracy and calls for compliance with them as an essential part of compliance with the ISPS Code. A charterer may also claim that a vessel seized by pirates was not on-hire for a certain number of days and it is therefore entitled to cancel the charter party, a claim that we would dispute. We may not be adequately insured to cover losses from these incidents, which could have a material adverse effect on us. In addition, detention hijacking as a result of an act of piracy against our vessels, an increase in cost, or unavailability of insurance for our vessels, could have a material adverse impact on our business, financial condition, results of operations and cash flows. Acts of piracy on ocean-going vessels could adversely affect our business and operations.

Governments could requisition vessels of a target business during a period of war or emergency, resulting in a loss of earnings.

A government could requisition a business vessels for title or hire. Requisition for title occurs when a government takes control of a vessel and becomes her owner, while requisition for hire occurs when a government takes control of a vessel and effectively becomes her charterer at dictated charter rates. Generally, requisitions occur during periods of war or emergency, although governments may elect to requisition vessels in other circumstances. Although we would be entitled to compensation in the event of a requisition of one or more of our vessels, requisition of one or more of our vessels would have a substantial negative effect on us as we would potentially lose all revenues and earnings from the requisitioned vessels and permanently lose the vessels. Such losses might be partially offset if the requisitioning government compensated us for the requisition.

Disruptions in global financial markets and the resulting governmental action, political and governmental instability, terrorist attacks, regional armed conflicts, general political unrest could have a material adverse impact on our results of operations, financial condition and cash flows.

Terrorist attacks in certain parts of the world, such as the attacks on the United States on September 11, 2001 or more recently in Paris and London, and the continuing response of the United States and other countries to these attacks, as well as the threat of future terrorist attacks, continue to cause uncertainty and volatility in the world financial markets and may affect our business, results of

Table of Contents

operations and financial condition. The continuing refugee crisis in the European Union, the continuing war in Syria and advances of ISIS and other terrorist organizations in the Middle East, conflicts in Iraq, general political unrest in Ukraine, and political tension or conflicts in the Asia Pacific Region such as in the South China Sea and North Korea have led to increased volatility in global credit and equity markets. In addition, global financial markets and economic conditions have been severely disrupted and volatile in recent years and remain subject to significant vulnerabilities, such as the deterioration of fiscal balances and the rapid accumulation of public debt, continued deleveraging in the banking sector and a limited supply of credit. Credit markets as well as the debt and equity capital markets were exceedingly distressed during 2008 and 2009 and have been volatile since that time. The resulting uncertainty and volatility in the global financial markets may accordingly affect our business, results of operations and financial condition. These uncertainties, as well as future hostilities or other political instability in regions where our vessels trade, could also affect trade volumes and patterns and adversely affect our operations, and otherwise have a material adverse effect on our business, results of operations and financial condition, as well as our cash flows and cash available for distributions to our unit holders and repurchases of common units.

Further, as a result of the ongoing political and economic turmoil in Greece resulting from the sovereign debt crisis and the related austerity measures implemented by the Greek government, the operations of our Manager located in Greece may be subjected to new regulations and potential shift in government policies that may require us to incur new or additional compliance or other administrative costs and may require the payment of new taxes or other fees. We also face the risk that strikes, work stoppages, civil unrest and violence within Greece may disrupt the shoreside operations of our Manager located in Greece.

Specifically, these issues, along with the re-pricing of credit risk and the difficulties currently experienced by financial institutions, have made, and will likely continue to make, it difficult to obtain financing. As a result of the disruptions in the credit markets and higher capital requirements, many lenders have increased margins on lending rates, enacted tighter lending standards, required more restrictive terms (including higher collateral ratios for advances, shorter maturities and smaller loan amounts), or have refused to refinance existing debt at all.

Furthermore, certain banks that have historically been significant lenders to the shipping industry have reduced or ceased lending activities in the shipping industry. Additional tightening of capital requirements and the resulting policies adopted by lenders, could further reduce lending activities. We may experience difficulties obtaining financing commitments or be unable to fully draw on the capacity under our committed term loans in the future if our lenders are unwilling to extend financing to us or unable to meet their funding obligations due to their own liquidity, capital or solvency issues. We cannot be certain that financing will be available on acceptable terms or at all. If financing is not available when needed, or is available only on unfavorable terms, we may be unable to meet our future obligations as they come due. Our failure to obtain such funds could have a material adverse effect on our business, results of operations and financial condition, as well as our cash flows, including cash available for distributions to our unit holders and repurchases of common units. In the absence of available financing, we also may be unable to take advantage of business opportunities or respond to competitive pressures.

As international tankers companies often generate most or all of their revenues in U.S. dollars but incur a portion of their expenses in other currencies, exchange rate fluctuations could cause us to suffer exchange rate losses, thereby increasing expenses and reducing income.

We engage in worldwide commerce with a variety of entities. Although our operations may expose us to certain levels of foreign currency risk, our transactions are predominantly U.S. dollar-denominated. Transactions in currencies other than the functional currency are translated at the exchange rate in effect at the date of each transaction. Expenses incurred in foreign currencies against which the U.S. dollar falls in value can increase, decreasing our income. A greater percentage of our transactions and expenses in the

future may be denominated in currencies other than the U.S. dollar. As part of our overall risk management policy, we will attempt to hedge these risks in exchange rate fluctuations from time to time. We may not always be successful in such hedging activities and, as a result, our operating results could suffer as a result of un-hedged losses incurred as a result of exchange rate fluctuations. For example, as of December 31, 2018, the value of the U.S. dollar as compared to the Euro increased by approximately 4.9% compared with the respective value as of December 31, 2017. A greater percentage of our transactions and expenses in the future may be denominated in currencies other than the U.S. dollar.

Labor interruptions and problems could disrupt our business.

Certain of our vessels are manned by masters, officers and crews that are employed by third parties. If not resolved in a timely and cost-effective manner, industrial action or other labor unrest could prevent or hinder our operations from being carried out normally and could have a material adverse effect on our business, results of operations, cash flow and financial condition.

Our right to be indemnified against certain damages may be inadequate.

The Securities Purchase Agreement for the VLCC vessels acquired through the VLCC Acquisition has a cap on indemnity obligations, subject to certain exceptions, of \$58.7 million. Although we performed substantial due diligence with respect to the VLCC Acquisition, there can be no assurance that there will not be undisclosed liabilities or other matters not discovered in the course

Table of Contents

of such due diligence and the \$58.7 million indemnity may be inadequate to cover these or other damages related to breaches of such agreement. In addition, since the return to Navios Acquisition of 14,477 shares on November 4, 2011 in settlement of claims relating to representation and warranties attributable to the sellers and the return of the balance of the escrow shares to the sellers, it may be difficult to enforce an arbitration award for any amount of damages.

Risks Related to Our Relationship with Navios Holdings and Its Affiliates

Navios Holdings has limited experience in the crude oil, product and chemical tanker sectors.

Navios Tankers Management Inc. (the **Manager**), a wholly owned subsidiary of Navios Holdings, oversees the commercial and administrative management of our entire fleet and the technical management of a portion of our fleet. Navios Holdings is a vertically-integrated seaborne shipping and logistics company with 60 years of operating history in the shipping industry that held approximately 35.4% of our shares of common stock as of March 31, 2019. Other than with respect to South American operations, Navios Holdings' experience in the crude oil, chemical and product tanker sectors dates to 2010. Navios Holdings or the **Manager** may make decisions that a more experienced operator in the sector might not make. If Navios Holdings or the **Manager** is not able to properly assess or ascertain a particular aspect of the crude oil, product or chemical tanker sectors, it could have a material adverse effect on our operations.

Navios Holdings may compete directly with us, causing certain officers to have a conflict of interest.

Angeliki Frangou is an officer and director of Navios Holdings, Navios Partners, Navios Acquisition and Navios Maritime Containers L.P. (**Navios Containers**). We operate in the crude oil, product and chemical tanker sectors of the shipping industry, and although Navios Holdings does not currently have any significant exposure in those sectors, there is no assurance it will not enter them. If it does, we may compete directly with Navios Holdings for business opportunities.

Navios Holdings, Navios Partners, Navios Acquisition and Navios Containers share certain officers and directors who may not be able to devote sufficient time to our affairs, which may affect our ability to conduct operations and generate revenues.

Some of our officers provide services to Navios Holdings, Navios Partners and Navios Containers and their affiliates. For instance, Angeliki Frangou is an officer and director of Navios Holdings, Navios Acquisition, Navios Partners and Navios Containers. As a result, demands for our officers' time and attention as required from Navios Acquisition, Navios Partners, Navios Holdings and Navios Containers may conflict from time to time and her limited devotion of time and attention to our business may hurt the operation of our business.

The loss of key members of our senior management team could disrupt the management of our business.

We believe that our success depends on the continued contributions of the members of our senior management team, including Angeliki Frangou, our Chairman and Chief Executive Officer. The loss of the services of Ms. Frangou or one of our other executive officers or senior management members could impair our ability to identify and secure new charter contracts, to maintain good customer relations and to otherwise manage our business, which could have a material adverse effect on our financial performance and our ability to compete.

We are dependent on a subsidiary of Navios Holdings for the commercial and administrative management of our fleet and the technical management of a portion of our fleet, which may create conflicts of interest.

As we subcontract the technical and commercial management of our fleet, including crewing, maintenance and repair, to the Manager, and on an interim basis to other third party managers, the loss of these services or the failure of the Manager to perform these services could materially and adversely affect the results of our operations. Although we may have rights against the Manager if it defaults on its obligations to us, you will have no recourse directly against it. Further, we expect that we will need to seek approval from our respective lenders to change our commercial and technical managers. Navios Holdings has responsibilities and relationships to owners other than Navios Acquisition that could create conflicts of interest between us and Navios Holdings or the Manager. These conflicts may arise in connection with the provision of chartering services to us for our fleet versus carriers managed by Navios Holdings subsidiaries or other companies affiliated with Navios Holdings.

Navios Holdings, our affiliate and a greater than 5% holder of our common stock, Angeliki Frangou, our Chairman and Chief Executive Officer, and certain of our officers and directors collectively own a substantial interest in us, and, as a result, may influence certain actions requiring stockholder vote.

As of March 31, 2019, Navios Holdings, Angeliki Frangou, our Chairman and Chief Executive Officer, and certain of our officers and directors beneficially own, in the aggregate, 39.6 % of our issued and outstanding shares of common stock, which permits them to influence the outcome of effectively all matters requiring approval by our stockholders at such time, including the election of directors and approval of significant corporate transactions. Furthermore, if Navios Holdings and Ms. Frangou or an affiliate ceases to hold a minimum of 30% of our common stock, then we will be in default under our credit facilities.

Table of Contents

Risks Related to Our Common Stock and Capital Structure

We are incorporated in the Republic of the Marshall Islands, a country that does not have a well-developed body of corporate law, which may negatively affect the ability of public stockholders to protect their interests.

Our corporate affairs are governed by our amended and restated articles of incorporation and bylaws, and by the Marshall Islands Business Corporations Act (the “BCA”). The provisions of the BCA resemble provisions of the corporation laws of a number of states in the United States. However, there have been few judicial cases in the Republic of the Marshall Islands interpreting the BCA. The rights and fiduciary responsibilities of directors under the law of the Republic of the Marshall Islands are not as clearly established as the rights and fiduciary responsibilities of directors under statutes or judicial precedent in existence in certain United States jurisdictions. Stockholder rights may differ as well. While the BCA does specifically incorporate the non-statutory law, or judicial case law, of the State of Delaware and other states with substantially similar legislative provisions, public stockholders may have more difficulty in protecting their interests in the face of actions by the management, directors or controlling stockholders than would stockholders of a corporation incorporated in a United States jurisdiction.

We are incorporated under the laws of the Marshall Islands and our directors and officers are non-U.S. residents, and although you may bring an original action in the courts of the Marshall Islands or obtain a judgment against us, our directors or our management based on U.S. laws in the event you believe your rights as a stockholder have been infringed, it may be difficult to enforce judgments against us, our directors or our management.

We are incorporated under the laws of the Republic of the Marshall Islands and all of our assets are located outside of the United States. Our business will be operated primarily from our offices in Monte Carlo, Monaco. In addition, our directors and officers are non-residents of the United States, and all or a substantial portion of the assets of these nonresidents are located outside the United States. As a result, it may be difficult or impossible for you to bring an action against us or against these individuals in the United States if you believe that your rights have been infringed under securities laws or otherwise. Even if you are successful in bringing an action of this kind, the laws of the Marshall Islands and of other jurisdictions may prevent or restrict you from enforcing a judgment against our assets or the assets of our directors and officers. Although you may bring an original action against us or our affiliates in the courts of the Marshall Islands based on U.S. laws, and the courts of the Marshall Islands may impose civil liability, including monetary damages, against us or our affiliates for a cause of action arising under Marshall Islands law, it may be impracticable for you to do so given the geographic location of the Marshall Islands.

Since we are a foreign private issuer, we are not subject to certain SEC regulations that companies incorporated in the United States would be subject to.

We are a “foreign private issuer” within the meaning of the rules promulgated under the Securities Exchange Act of 1934, as amended (the “Exchange Act”). As such, we are exempt from certain provisions applicable to United States public companies including:

the rules under the Exchange Act requiring the filing with the SEC of quarterly reports on Form 10-Q or current reports on Form 8-K;

the sections of the Exchange Act regulating the solicitation of proxies, consents or authorizations in respect of a security registered under the Exchange Act;

the provisions of Regulation FD of the Exchange Act aimed at preventing issuers from making selective disclosures of material information; and

the sections of the Exchange Act requiring insiders to file public reports of their stock ownership and trading activities and establishing insider liability for profits realized from any short-swing trading transaction (i.e., a purchase and sale, or sale and purchase, of the issuer's equity securities within less than six months).

Accordingly, investors in our common stock may not be able to obtain all of the information of the type described above, and our stockholders may not be afforded the same protections or information generally available to investors holding shares in public companies in the United States.

Anti-takeover provisions in our amended and restated articles of incorporation could make it difficult for our stockholders to replace or remove our current board of directors or could have the effect of discouraging, delaying or preventing a merger or acquisition, which could adversely affect the market price of our common stock.

Table of Contents

Several provisions of our amended and restated articles of incorporation and bylaws could make it difficult for our stockholders to change the composition of our board of directors in any one year, preventing them from changing the composition of our management. In addition, the same provisions may discourage, delay or prevent a merger or acquisition that stockholders may consider favorable. These provisions include those that:

authorize our board of directors to issue blank check preferred stock without stockholder approval;

provide for a classified board of directors with staggered, three-year terms;

require a super-majority vote in order to amend the provisions regarding our classified board of directors with staggered, three-year terms; and

prohibit cumulative voting in the election of directors.

These anti-takeover provisions could substantially impede the ability of stockholders to benefit from a change in control and, as a result, may adversely affect the market price of our common stock and your ability to realize any potential change of control premium.

Registration rights held by our initial stockholders and others may have an adverse effect on the market price of our common stock.

Certain stockholders, which include Navios Holdings and certain members of the management of Navios Acquisition, Navios Holdings and Navios Partners, are entitled to demand that we register the resale of their common stock totaling approximately 4,488,033 shares. In addition, one third-party holder has an effective resale registration statement with respect to 111,850 shares of common stock. If all of these stockholders exercise their registration rights with respect to all of their shares of common stock, including the effective resale registration statement, there will be an additional approximately 4,599,883 shares of common stock eligible for trading in the public market. The presence of these additional shares may have an adverse effect on the market price of our common stock.

The New York Stock Exchange may delist our securities from quotation on its exchange, which could limit your ability to trade our securities and subject us to additional trading restrictions.

Our securities are listed on the New York Stock Exchange (the NYSE), a national securities exchange. The NYSE minimum listing standards require that we meet certain requirements relating to stockholders' equity, number of round-lot holders, market capitalization, aggregate market value of publicly held shares and distribution requirements.

Although we currently satisfy the NYSE minimum listing standards, we cannot assure you that our securities will continue to be listed on NYSE in the future. If NYSE delists our securities from trading on its exchange, we could face significant material adverse consequences, including:

a limited availability of market quotations for our securities;

a limited amount of news and analyst coverage for us;

a decreased ability for us to issue additional securities or obtain additional financing in the future;

limited liquidity for our stockholders due to thin trading; and

loss of our tax exemption under Section 883 of the U.S. Internal Revenue Code of 1986, as amended (the Code), loss of preferential capital gain tax rates for certain dividends received by certain non-corporate U.S. holders and loss of mark-to-market election by U.S. holders in the event we are treated as a passive foreign investment company (PFIC).

Risks Related to Our Indebtedness

We have substantial indebtedness and may incur substantial additional indebtedness, which could adversely affect our financial health and our ability to obtain financing in the future, react to changes in our business and make debt service payments.

We have substantial indebtedness, and we may also increase the amount of our indebtedness in the future. The terms of our credit facilities and other instruments and agreements governing our indebtedness do not prohibit us from doing so. Our substantial indebtedness could have important consequences for our stockholders.

Because of our substantial indebtedness:

our ability to obtain additional financing for working capital, capital expenditures, debt service requirements, vessel or other acquisitions or general corporate purposes may be impaired in the future;

if new debt is added to our debt levels after the vessel acquisition, the related risks that we now face would increase and we may not be able to meet all of our debt obligations;

Table of Contents

a substantial portion of our cash flow from operations must be dedicated to the payment of principal and interest on our indebtedness, thereby reducing the funds available to us for other purposes, and there can be no assurance that our operations will generate sufficient cash flow to service this indebtedness;

we will be exposed to the risk of increased interest rates because our borrowings under the credit facilities will be at variable rates of interest;

It may be more difficult for us to satisfy our obligations to our lenders, resulting in possible defaults on and acceleration of such indebtedness;

we may be more vulnerable to general adverse economic and industry conditions;

we may be at a competitive disadvantage compared to our competitors with less debt or comparable debt at more favorable interest rates and, as a result, we may not be better positioned to withstand economic downturns;

our ability to refinance indebtedness may be limited or the associated costs may increase; and

our flexibility to adjust to changing market conditions and ability to withstand competitive pressures could be limited, or we may be prevented from carrying out capital spending that is necessary or important to our growth strategy and efforts to improve operating margins or our business.

Highly leveraged companies are significantly more vulnerable to unanticipated downturns and setbacks, whether directly related to their business or flowing from a general economic or industry condition, and therefore are more vulnerable to a business failure or bankruptcy.

The agreements and instruments governing our indebtedness and other obligations do or will contain restrictions, limitations and obligations that could significantly impact our ability to operate our business and adversely affect our stockholders.

The agreements and instruments governing our indebtedness and other commitments we enter into, including certain credit lines to our affiliates, impose certain operating and financial restrictions on us.

Among other restrictions, these restrictions and our other obligations and commitments may limit our ability to:

incur or guarantee additional indebtedness or issue certain preferred stock;

create liens on our assets;

make investments;

engage in mergers and acquisitions or sell all or substantially all of our properties or assets;

redeem or repurchase capital stock, pay dividends or make other restricted payments and investments;

make capital expenditures;

change the management of our vessels or terminate the management agreements we have relating to our vessels;

enter into long-term charter arrangements without the consent of the lender;

transfer or sell any of our vessels;

enter into certain transactions with our affiliates; and

reduce our cash available for growth and other purposes.

Therefore, we will need to seek permission from our lenders in order to engage in some corporate and commercial actions that we believe would be in the best interest of our business, and a denial of permission may make it difficult for us to successfully execute our business strategy or effectively compete with companies that are not similarly restricted. Our lenders' interests may be different from our interests, and we cannot guarantee that we will be able to obtain our lenders' permission when needed. This may prevent us from taking actions that are in our best interest. Any future credit agreement may include similar or more restrictive restrictions.

Additionally, in September 2016 we had entered into an agreement with Navios Holdings, pursuant to which we have provided Navios Holdings with a credit facility of up to \$70.0 million. On November 3, 2017, Navios Holdings prepaid in full the outstanding amount of \$55.1 million.

Our credit facilities contain requirements that the value of the collateral provided pursuant to the credit facilities must equal or exceed by a certain percentage the amount of outstanding borrowings under the credit facilities and that we maintain a minimum liquidity level. In addition, our credit facilities contain additional restrictive covenants, including a minimum net worth requirement and maximum total net liabilities over net assets requirement. It is an event of default under our credit facilities if such covenants are not complied with or if Navios Holdings, Ms. Angeliki Frangou, our Chairman and Chief Executive Officer, and their respective

Table of Contents

affiliates cease to hold a minimum percentage of our issued stock. In addition, the indenture governing the notes also contains certain provisions obligating us in certain instances to make offers to purchase outstanding notes with the net proceeds of certain sales or other dispositions of assets or upon the occurrence of an event of loss with respect to a mortgaged vessel, as defined in the indenture. Our ability to comply with the covenants and restrictions contained in our agreements and instruments governing our indebtedness may be affected by economic, financial and industry conditions and other factors beyond our control. If we are unable to comply with these covenants and restrictions, our indebtedness could be accelerated. If we are unable to repay indebtedness, our lenders could proceed against the collateral securing that indebtedness. In any such case, we may be unable to borrow under our credit facilities and may not be able to repay the amounts due under our agreements and instruments governing our indebtedness. This could have serious consequences on our financial condition and results of operations and could cause us to become bankrupt or insolvent. Our ability to comply with these covenants in future periods will also depend substantially on the value of our assets, our charter rates, our success at keeping our costs low and our ability to successfully implement our overall business strategy. Any future credit agreement or amendment or debt instrument may contain similar or more restrictive covenants.

Our ability to generate the significant amount of cash needed to service our other indebtedness and our ability to refinance all or a portion of our indebtedness or obtain additional financing depends on many factors beyond our control.

Our ability to make scheduled payments on or to refinance our obligations under, our indebtedness will depend on our financial and operating performance, which, in turn, will be subject to prevailing economic and competitive conditions and to financial and business factors, many of which may be beyond our control.

We will use cash to pay the principal and interest on our indebtedness. These payments limit funds otherwise available for working capital, capital expenditures, vessel acquisitions and other purposes. As a result of these obligations, our current liabilities may exceed our current assets. We may need to take on additional indebtedness as we expand our fleet, which could increase our ratio of indebtedness to equity. The need to service our indebtedness may limit funds available for other purposes and our inability to service indebtedness in the future could lead to acceleration of our indebtedness and foreclosure on our owned vessels.

Our credit facilities mature on various dates through 2026, our ship mortgage notes mature on November 15, 2021 and our Term Loan B in June 2020. In addition, borrowings under certain of the credit facilities have amortization requirements prior to final maturity. We cannot assure you that we will be able to refinance any of our indebtedness or obtain additional financing, particularly because of our anticipated high levels of indebtedness and the indebtedness incurrence restrictions imposed by the agreements governing our indebtedness, as well as prevailing market conditions.

We could face substantial liquidity problems and might be required to dispose of material assets or operations to meet our indebtedness service and other obligations. Our credit facilities, the indenture governing our notes and any future indebtedness may restrict our ability to dispose of assets and use the proceeds from any such dispositions. If we do not reinvest the proceeds of asset sales in our business (in the case of asset sales of no collateral with respect to such indebtedness) or in new vessels or other related assets that are mortgaged in favor of the lenders under our credit facilities (in the case of assets sales of collateral securing), we may be required to use the proceeds to repurchase senior indebtedness. We cannot assure you we will be able to consummate any asset sales, or if we do, what the timing of the sales will be or whether the proceeds that we realize will be adequate to meet indebtedness service obligations when due.

Most of our credit facilities require that we maintain loan to collateral value ratios in order to remain in compliance with the covenants set forth therein. If the value of such collateral falls below such required level, we would be required to either prepay the loans or post additional collateral to the extent necessary to bring the value of the collateral as compared to the aggregate principal amount of the loan back to the required level. We cannot assure you that we will have the cash on hand or the financing available to prepay the loans or have any unencumbered assets available to post as additional collateral. In such case, we would be in default under such credit facility and the collateral securing such facility would be subject to foreclosure by the applicable lenders.

We are exposed to volatility in the London Interbank Offered Rate, or LIBOR, which can affect our profitability, earnings and cash flow.

The loans under our credit facilities are generally advanced at a floating rate based on LIBOR, which was volatile in prior years and has been steadily increasing in recent years. LIBOR can affect the amount of interest payable on our debt, which, in turn, could have an adverse effect on our earnings and cash flow.

Our financial condition could be materially adversely affected as we have not entered into interest rate hedging arrangements to hedge our exposure to the interest rates applicable to our credit facilities and may not enter into interest rate hedging arrangements for these or any other financing arrangements we may enter into in the future, including those we may enter into to finance a portion of the amounts payable with respect to newbuildings or acquisitions.

We may enter into derivative contracts to hedge our overall exposure to interest rate risk. Entering into swaps and other derivatives transactions is inherently risky and presents possibilities for incurring significant expenses. The derivatives strategies that we may employ may not be successful or effective, and we could, as a result, incur substantial additional interest and breakage costs.

Table of Contents***Changes in the method of determining LIBOR, or the replacement of LIBOR with an alternative reference rate, may adversely affect interest expense related to outstanding debt.***

Our outstanding debt bears interest rates in relation to LIBOR. On July 27, 2017, the United Kingdom's Financial Conduct Authority, which regulates LIBOR, announced that it intends to phase out LIBOR by the end of 2021. It is unclear if at that time whether or not LIBOR will cease to exist or if new methods of calculating LIBOR will be established such that it continues to exist after 2021. The U.S. Federal Reserve, in conjunction with the Alternative Reference Rates Committee, a steering committee comprised of large U.S. financial institutions, is considering replacing U.S. dollar LIBOR with a new index calculated by short-term repurchase agreements, backed by Treasury securities (SOFR). SOFR is observed and backward looking, which stands in contrast with LIBOR under the current methodology, which is an estimated forward-looking rate and relies, to some degree, on the expert judgment of submitting panel members. Whether or not SOFR attains market traction as a LIBOR replacement tool remains in question. As such, the future of LIBOR at this time is uncertain. If LIBOR ceases to exist, we may need to renegotiate our credit agreements that utilize LIBOR as a factor in determining the interest rate. In addition, lenders have recently insisted on provisions that entitle the lenders, in their discretion, to replace published LIBOR as the base for the interest calculation with their cost-of-funds rate. Such provisions could significantly increase our lending costs, which would have an adverse effect on our profitability, earnings and cash flow.

The international nature of our operations may make the outcome of any bankruptcy proceedings difficult to predict.

We are incorporated under the laws of the Republic of the Marshall Islands and our subsidiaries are also incorporated under the laws of the Republic of the Marshall Islands, the Cayman Islands, Hong Kong and certain other countries other than the United States, and we conduct operations in countries around the world. Consequently, in the event of any bankruptcy, insolvency or similar proceedings involving us or one of our subsidiaries, bankruptcy laws other than those of the United States could apply. We have limited operations in the United States. If we become a debtor under the United States bankruptcy laws, bankruptcy courts in the United States may seek to assert jurisdiction over all of our assets, wherever located, including property situated in other countries. There can be no assurance, however, that we would become a debtor in the United States or that a United States bankruptcy court would be entitled to, or accept, jurisdiction over such bankruptcy case or that courts in other countries that have jurisdiction over us and our operations would recognize a United States bankruptcy court's jurisdiction if any other bankruptcy court would determine it had jurisdiction.

We may be unable to raise funds necessary to finance the change of control repurchase offer required by the indenture governing our notes.

If we experience specified changes of control, we would be required to make an offer to repurchase all of our outstanding notes (unless otherwise redeemed) at a price equal to 101% of the principal amount thereof plus accrued and unpaid interest, if any, to the repurchase date. The occurrence of specified events that could constitute a change of control will constitute a default under our credit facilities. There are also change of control events that would constitute a default under the credit facilities that would not be a change of control under the indenture. In addition, our credit facilities prohibit the purchase of notes by us in the event of a change of control, unless and until such time as the indebtedness under our credit facilities is repaid in full. As a result, following a change of control event, we would not be able to repurchase notes unless we first repay all indebtedness outstanding under our credit facilities and any of our other indebtedness that contains similar provisions; or obtain a waiver from the holders of such indebtedness to permit us to repurchase the notes. We may be unable to repay all of that indebtedness or obtain a waiver of that type. Any requirement to offer to repurchase outstanding notes may therefore require us to refinance our other outstanding debt, which we may not be able to do on commercially reasonable terms, if at all. In addition,

our failure to purchase the notes after a change of control in accordance with the terms of the indenture would constitute an event of default under the indenture, which in turn would result in a default under our credit facilities.

Our inability to repay the indebtedness under our credit facilities will constitute an event of default under the indenture governing our notes, which could have materially adverse consequences to us. In the event of a change of control, we cannot assure you that we would have sufficient assets to satisfy all of our obligations under our credit facilities and the notes. Our future indebtedness may also require such indebtedness to be repurchased upon a change of control.

We may require additional financing to acquire vessels or businesses or to exercise vessel purchase options, to finance any planned growth, and such financing may not be available.

In the future, we may be required to make substantial cash outlays to exercise options or to acquire vessels or business and will need additional financing to cover all or a portion of the purchase prices. We may seek to cover the cost of such items with new debt collateralized by the vessels to be acquired, if applicable, but there can be no assurance that we will generate sufficient cash or that debt financing will be available. Moreover, the covenants in our credit facilities, the indenture or other debt may make it more difficult to obtain such financing by imposing restrictions on what we can offer as collateral.

Table of Contents**Tax Risks*****U.S. tax authorities could treat us as a passive foreign investment company, which could have adverse U.S. federal income tax consequences to U.S. holders.***

We will be treated as a passive foreign investment company, (PFIC), for U.S. federal income tax purposes if either (1) at least 75% of our gross income for any taxable year consists of certain types of passive income or (2) at least 50% of the average value of our assets produce or are held for the production of those types of passive income. For purposes of these tests, passive income includes dividends, interest, and gains from the sale or exchange of investment property and rents and royalties other than rents and royalties that are received from unrelated parties in connection with the active conduct of a trade or business. For purposes of these tests, income derived from the performance of services does not constitute passive income. U.S. stockholders of a PFIC may be subject to a disadvantageous U.S. federal income tax regime with respect to the income derived by the PFIC, the distributions they receive from the PFIC and the gain, if any, they derive from the sale or other disposition of their shares in the PFIC.

Based on our current and projected methods of operations, and an opinion of counsel, we believe that we were not a PFIC for the 2011 through 2018 taxable years (we were treated as a PFIC for the 2008 through 2010 taxable years), and we do not believe that we will be a PFIC for 2018 and subsequent taxable years. For post-2010 taxable years, our U.S. counsel, Thompson Hine LLP, is of the opinion that (1) the income we receive from the time chartering activities and assets engaged in generating such income should not be treated as passive income or assets, respectively, and (2) so long as our income from time charters exceeds 25.0% of our gross income for each taxable year after our 2010 taxable year and the value of our vessels contracted under time charters exceeds 50.0% of the average value of our assets for each taxable year after our 2010 taxable year, we should not be a PFIC for any taxable year after our 2010 taxable year. This opinion is based on representations and projections provided to our counsel by us regarding our assets, income and charters, and its validity is conditioned on the accuracy of such representations and projections.

We may have to pay tax on United States source income, which would reduce our earnings.

Under the Code, 50% of the gross transportation income of a vessel-owning or chartering corporation, such as us and our subsidiaries, that is attributable to transportation that either begins or ends, but that does not both begin and end, in the United States is characterized as U.S. Source International Transportation Income and such U.S. Source International Transportation Income is generally subject to a 4% U.S. federal income tax without allowance for deduction or, if such U.S. Source International Transportation Income is effectively connected with the conduct of a trade or business in the United States, U.S. federal corporate income tax (presently imposed at 21.0% rate) as well as a branch profits tax (presently imposed at a 30.0% rate on effectively connected earnings), unless the non-U.S. corporation qualifies for exemption from tax under Section 883 of the Code and the treasury regulations promulgated thereunder (Treasury Regulations). In general, the exemption from U.S. federal income taxation under Section 883 of the Code provides that if a non-U.S. corporation satisfies the requirements of Section 883 of the Code and the Treasury Regulations, it will not be subject to the net basis and branch profit taxes or the 4% gross basis tax on its U.S. Source International Transportation Income.

We expect that we and each of our vessel-owning subsidiaries have qualified for this statutory tax exemption and we will take this position for U.S. federal income tax return reporting purposes for our 2018 taxable year. However, the delisting of our securities from quotation on the NYSE (or other factual circumstances beyond our control) could cause us to lose the benefit of this tax exemption and thereby become subject to U.S. federal income tax on our U.S. Source International Transportation Income. *See* Risks Related to our Common Stock and Capital Structure The New York Stock Exchange may delist our securities from quotation on its exchange, which could limit your ability to trade our securities and subject us to additional trading restrictions.

If we or our vessel-owning subsidiaries are not entitled to this exemption under Section 883 for any taxable year, we or our subsidiaries would be subject for those years to a 4% U.S. federal income tax (without allowance for deduction) on our U.S. Source International Transportation Income. The imposition of this taxation could have a negative effect on our business and would result in decreased earnings.

Actions taken by our shareholders could result in our being treated as a controlled foreign corporation, which could have adverse U.S. federal income tax consequences to certain U.S. holders.

Although we believe that Navios Acquisition likely was not a controlled foreign corporation (a CFC) as of December 31, 2018, or at any time during 2018, tax rules recently enacted by the Tax Cuts and Jobs Act, including the imposition of so-called downward attribution for purposes of determining whether a non-U.S. corporation is a CFC, may result in Navios Acquisition being treated as a CFC for U.S. federal income tax purposes in the future. Through downward attribution, U.S. subsidiaries of Navios Holdings are treated as constructive owners of the equity of Navios Acquisition for purposes of determining whether Navios Acquisition is a CFC. If, in the future, U.S. holders (including U.S. subsidiaries of Navios Holdings, as discussed above) that each own 10.0% or more (by vote or value) of the equity of Navios Acquisition own in the aggregate more than 50% of the equity of Navios Acquisition (by vote or value), in each case, directly, indirectly, or constructively, Navios Acquisition should become a CFC.

Table of Contents

U.S. holders who at all times own less than 10% of our equity should not be affected. However, if we were to become a CFC, any U.S. holder owning 10% or more (by vote or value), directly, indirectly, or constructively (but not through downward attribution) of our equity could be subject to U.S. federal income tax in respect of a portion of our earnings. Any U.S. holder of Navios Acquisition that owns 10% or more (by vote or value), directly, indirectly, or constructively, of the equity of Navios Acquisition should consult its own tax advisor regarding U.S. federal tax consequences that may result from Navios Acquisition being treated as a CFC. (*see United States Federal Income Taxation of U.S. Holders – Controlled Foreign Corporation*).

Other Tax Jurisdictions

In accordance with the currently applicable Greek law, foreign flagged vessels that are managed by Greek or foreign ship management companies having established an office in Greece are subject to duties towards the Greek state which are calculated on the basis of the relevant vessels' tonnage. The payment of said duties exhausts the tax liability of the foreign ship owning company and the relevant manager against any tax, duty, charge or contribution payable on income from the exploitation of the foreign flagged vessel. In case that tonnage tax and/or similar taxes/duties are paid to the vessel's flag state, these are deducted from the amount of the duty to be paid in Greece.

Item 4. Information on the Company

A. History and development of Navios Acquisition

Navios Acquisition was formed on March 14, 2008 under the laws of the Republic of the Marshall Islands and has its principal offices located at 7 Avenue de Grande Bretagne, Office 11B2, Monte Carlo, MC 98000 Monaco. Our agent for service is Trust Company of the Marshall Islands, Inc., located at Trust Company Complex, Ajeltake Island, P.O. Box 1405, Majuro, Marshall Islands MH96960.

Navios Acquisition owns a large fleet of modern crude oil, refined petroleum product and chemical tankers providing world-wide marine transportation services. The Company's strategy is to charter its vessels to international oil companies, refiners and large vessel operators under long, medium and short-term contracts. The Company is committed to providing quality transportation services and developing and maintaining long-term relationships with its customers.

On July 1, 2008, Navios Acquisition completed its IPO. On May 28, 2010, Navios Acquisition consummated the vessel acquisition which constituted its initial business combination. Following such transaction, Navios Acquisition commenced its operations as an operating company.

On December 13, 2018, the Company completed the merger (the "Merger") contemplated by the previously announced Agreement and Plan of Merger, (the "Merger Agreement"), dated as of October 7, 2018, by and among Navios Acquisition, its direct wholly-owned subsidiary NMA Sub LLC ("Merger Sub"), Navios Midstream and Navios Midstream Partners GP LLC (the "NAP General Partner"). Pursuant to the Merger Agreement, Merger Sub merged with and into Navios Midstream, with Navios Midstream surviving as a wholly-owned subsidiary of Navios Acquisition.

Under the terms of the transaction, Navios Acquisition acquired all of the outstanding publicly held common units of Navios Midstream through the issuance of 3,683,284 newly issued shares of Navios Acquisition common stock in exchange for the publicly held common units of Navios Midstream at an exchange ratio of 0.42 shares of Navios Acquisition for each Navios Midstream common unit.

As of December 31, 2018, Navios Acquisition owned a 100% limited partner interest in Navios Midstream, which included a 3.4% general partner interest.

As of December 31, 2018, Navios Holdings had 32.8% of the voting power and 35.8% of the economic interest in Navios Acquisition.

Equity Transactions

Series C Convertible Preferred Stock

On March 30, 2011, pursuant to an Exchange Agreement Navios Holdings exchanged 511,733 shares of Navios Acquisition's common stock it held for 1,000 non-voting Series C Convertible Preferred Stock of Navios Acquisition. Each holder of shares of Series C Convertible Preferred Stock shall be entitled at their option at any time, after March 31, 2013 to convert all or any of the outstanding shares of Series C Convertible Preferred Stock into a number of fully paid and non-assessable shares of Common Stock determined by multiplying each share of Series C Convertible Preferred Stock to be converted by 512, subject to certain limitations. Upon the declaration of a common stock dividend, the holders of the Series C Convertible Preferred Stock are entitled to receive dividends on the Series C Convertible Preferred Stock in an amount equal to the amount that would have been received in the number of shares of Common Stock into which the Shares of Series C Convertible Preferred Stock held by each holder thereof could be converted. For the purpose of calculating earnings / (loss) per share this preferred stock is treated as in-substance common stock and is allocated income / (losses) and considered in the diluted calculation. On February 7, 2019, all of the outstanding Series C convertible preferred shares of Navios Acquisition were converted into 511,733 shares of common stock.

Table of Contents

As of each of December 31, 2018 and December 31, 2017 the Company's issued and outstanding preferred stock consisted of the 1,000 Series C Convertible Preferred Stock.

Common Stock

The Board of Directors of Navios Acquisition has approved 1-for-15 reverse stock split of its issued and outstanding shares of common stock and on November 9, 2018, the reverse stock split was approved by Navios Acquisition's stockholders. The reverse stock split was effective since November 14, 2018 and the common stock commenced trading on such date on a split adjusted basis.

In February 2018, the Board of Directors of Navios Acquisition authorized a stock repurchase program for up to \$25.0 million of Navios Acquisition's common stock, for two years. Stock repurchases will be made from time to time for cash in open market transactions at prevailing market prices or in privately negotiated transactions. The timing and amount of repurchases under the program will be determined by management based upon market conditions and other factors. Repurchases may be made pursuant to a program adopted under Rule 10b5-1 under the Securities Exchange Act of 1934, as amended. The program does not require any minimum repurchase or any specific number or amount of shares of common stock and may be suspended or reinstated at any time in Navios Acquisition's discretion and without notice. The Board of Directors will review the program periodically. Repurchases will be subject to restrictions under Navios Acquisition's credit facilities and indenture. As of December 31, 2018, the Company had repurchased and cancelled 670,962 shares of common stock, at a total cost of approximately \$7.1 million.

Under the terms of the Merger with Navios Midstream on December 13, 2018, Navios Acquisition acquired all of the outstanding publicly held common units of Navios Midstream through the issuance of 3,683,284 newly issued shares of Navios Acquisition common stock in exchange for the publicly held common units of Navios Midstream at an exchange ratio of 0.42 shares of Navios Acquisition for each Navios Midstream common unit.

As of December 31, 2018, the Company was authorized to issue 250,000,000 shares of \$0.0001 par value common stock of which 13,280,927 were issued and outstanding.

As of March 31, 2019, the Company has repurchased 734,920 shares of common stock, for a total cost of approximately \$7.5 million.

As of March 31, 2019, 13,728,371 shares of common stock were issued and outstanding.

B. Business Overview

Introduction

Navios Acquisition owns a large fleet of modern crude oil, refined petroleum product and chemical tankers providing worldwide marine transportation services. Our strategy is to charter our vessels to international oil companies, refiners and large vessel operators under long, medium and short-term contracts. We are committed to providing quality transportation services and developing and maintaining long-term relationships with our customers. We believe that the Navios brand will allow us to take advantage of increasing global environmental concerns that have created a demand in the petroleum products/crude oil seaborne transportation industry for vessels and operators that are able to conform to the stringent environmental standards currently being imposed throughout the world.

Navios Acquisition's Fleet

As of April 18, 2019, our fleet consisted of a total of 42 double-hulled tanker vessels, aggregating approximately 5.7 million deadweight tons, or dwt. The fleet includes 12 Very Large Crude Carrier (VLCC) tankers (over 200,000 dwt per ship), which transport crude oil, eight Long Range 1 (LR1) product tankers (60,000-79,999 dwt per ship), 18 Medium Range 2 (MR2) product tankers (30,000-59,999 dwt per ship), two chemical tankers (25,000 dwt per ship), which transport refined petroleum products and bulk liquid chemicals and two bareboat VLCC chartered-in vessels to be delivered in the third and fourth quarter of 2020, respectively. We have also exercised our option for third VLCC newbuilding under bareboat operating lease with expected delivery in the third quarter of 2021. All our vessels are currently chartered-out to high-quality counterparties, including affiliates of Navig8 and Mansel, with an average remaining charter period of approximately one year. As of April 18, 2019, we had contracts covering 50.9% of available days in 2019 and 7.0 % of available days in 2020.

(1) Net time charter-out rate per day (net of commissions), presented in U.S. Dollars.

(2) Estimated dates assuming the midpoint of the redelivery period by charterers, including owner's extension options not declared yet.

(3) Charterer's option to extend the charter for six months at \$11,850 net per day plus profit sharing arrangements.

Table of Contents

- (4) The premium for the Nave Equinox when vessel is trading on ice or follows ice breaker is \$1,975 net per day.
- (5) Rate can increase to \$19,013 net per day in year one and \$19,393 in year two calculated based on a formula. Charterer's option to extend the charter for two years at \$14,708 net per day for the first year and \$15,002 net per day for the second year, plus profit sharing arrangements for both years.
- (6) Charterer's option to extend the charter for six months at \$12,750 net per day plus profit sharing arrangements.
- (7) Rate based on VLCC pool earnings, evergreen upon notice.
- (8) Rate based on chemical tankers pool earnings.
- (9) Charterer's option to extend the charter for six months at \$13,331 net per day.
- (10) Profit sharing arrangement 100% on actual pool earnings. Any adjustment by the charterers for the expense/loss will be settled initially in January 2019 and every two months thereafter.
- (11) Profit sharing arrangement 50% on actual pool earnings. Any adjustment by the charterers for the expense/loss will be provisionally settled on a quarterly basis and finally settled at the end of the charter period. Charterer's option to extend the charter for one year at \$20,475 net per day.
- (12) Contract provides 100% of BTR TD3C-TCE index plus \$2,000 up to \$37,525 and 50% thereafter with \$19,158 floor.
- (13) Rate based on LR1 pool earnings.
- (14) Calculated annually based on the actual earnings of the vessel. Any profit is split between the owner and the charterer with the owner receiving the percentage stated in the table above.
- (15) Profit sharing 50% on actual pool earnings at the end of the charter period. Any adjustment by the charterers for the expense/loss will be settled accordingly at the end of the charter period.
- (16) Charterer's option to extend the charter for one year at \$17,036 net per day.
- (17) Charterer's option to extend the bareboat charter for five years at \$29,751 net per day.
- (18) Charterer's option to extend the charter for one year at \$15,159 net per day.
- (19) Calculated annually on the basis of the weighted average of the daily values of four Baltic Exchange Tanker Routes for the past four quarters adjusted for certain agreed specifications (i.e. actual consumption and other voyage expenses). Any profit is split between the owner and the charterer with the owner receiving the percentage stated in the table above.

* Bareboat chartered-in vessels with purchase option, expected to be delivered in the second half of 2020.

** In March 2019, the Shinyo Ocean, a 2001-built VLCC vessel of 281,395 dwt was involved in a collision incident. The Company maintains insurance coverage for such types of events (subject to applicable deductibles and other customary limitations).

Competitive Strengths

We believe that the following strengths will allow us to maintain a competitive advantage within the international shipping market:

Modern, High Quality Fleet. We own a large fleet of modern, high quality double hull tankers that are designed for enhanced safety and low operating costs. We believe that the increased enforcement of stringent environmental standards currently being imposed throughout the world has resulted in a shift in major charterers' preference towards greater use of modern double hull vessels. We also have a large proportion of young product tankers in our fleet. Since our inception, we have committed to and have fully financed investments of over \$2.1 billion, including investments of approximately \$0.8 billion in newbuilding constructions. As of April 18, 2019, our fleet had an average age of approximately 8.5 years. We believe that owning and maintaining a modern, high quality fleet reduces off hire time and operating costs, improves

safety and environmental performance and provides us with a competitive advantage in securing employment for our vessels.

Operating Visibility Through Contracted Revenues. All of the vessels that we have taken delivery of as of April 18, 2019, are employed with an average remaining charter period of approximately one year, and we believe our existing employment coverage provides us with predictable, contracted revenues and operating visibility. As of April 18, 2019, we had contracts covering 50.9% of available days in 2019 and 7.0% of available days in 2020.

Diversified Fleet. Our diversified fleet, which includes VLCC, product and chemical tankers, allows us to serve our customers' international crude oil, petroleum product and liquid bulk chemical transportation needs. VLCC tankers transport crude oil and operate on primarily long-haul trades from the Arabian Gulf or West Africa to the Far East, North America and Europe. Product tankers transport a large number of different refined oil products, such as naphtha, gasoline, kerosene, jetfuel and gasoil, and principally operate on short to medium-haul routes. Chemical tankers transport primarily organic and inorganic chemicals, vegetable oils and animal fats. We believe that our fleet of vessels servicing the crude oil, product and chemical tanker transportation sectors provides us with more balanced exposure to oil and commodities and more diverse opportunities to generate revenues than would focus on any single shipping sector.

Table of Contents

High Quality Counterparties. Our strategy is to charter our vessels to international oil companies, refiners and large vessel operators under long, medium and short term contracts. We are committed to providing safe and quality transportation services and developing and maintaining long term relationships with our customers, and we believe that our modern fleet will allow us to charter out our vessels to what management views as high quality counterparties and for long periods of time. Our current charterers include: Dalian Ocean Shipping Co. Ltd. (Cosco Dalian), a Chinese state-owned enterprise; Shell, one of the largest global groups of energy and petrochemical companies, operating in over 90 countries; Navig8 which controls a substantial fleet of product chemical tankers; Mansel, which is the commercial tanker shipping arm of the Vitol Group., a major oil trader, trading over 5 million barrels of crude and product per day, Chevron, one of the world's leading integrated energy companies and Saudi Aramco, the state owned oil company of the Kingdom of Saudi Arabia.

An Experienced Management Team and a Strong Brand. We have an experienced management team that we believe is well regarded in the shipping industry. The members of our management team have considerable experience in the shipping and financial industries. We also believe that we will be able to leverage the management structure at our affiliate, Navios Holdings, which benefits from a reputation for reliability and performance and operational experience in both the tanker and drybulk markets. Our management team is led by Angeliki Frangou, our Chairman and Chief Executive Officer, who has over 26 years of experience in the shipping industry. Ms. Frangou is also the Chairman & Chief Executive Officer of Navios Holdings, Navios Partners and Navios Containers and has been a Chief Executive Officer of various shipping and finance companies in the past. Ms. Frangou is a member of a number of recognized shipping committees. We believe that our well respected management team and strong brand may present us with market opportunities not afforded to other industry participants.

Business Strategy

We seek to generate predictable and growing cash flow through the following:

Strategically Manage Sector Exposure. We operate a fleet of crude carriers and product and chemical tankers, which we believe provides us with diverse opportunities with a range of producers and consumers. As we grow our fleet, we expect to adjust our relative emphasis among the crude oil, product and chemical tanker sectors according to our view of the relative opportunities in these sectors. We believe that having a mixed fleet of tankers provides the flexibility to adapt to changing market conditions and will allow us to capitalize on sector specific opportunities through varying economic cycles.

Enhance Operating Visibility With Our Employment Strategy. We believe that we are a safe, cost-efficient operator of modern and well-maintained tankers. We also believe that these attributes, together with our strategy of proactively working towards meeting our customers' chartering needs, will contribute to our ability to attract leading charterers as customers and to our success in obtaining attractive long-term contracts. We will also seek profit sharing arrangements in our time charters, to provide us with potential incremental revenue above the contracted minimum charter rates. Depending on the then applicable market conditions, we intend to deploy our vessels to leading charterers on a mix of long, medium and short-term time contracts, with a greater emphasis on long-term charters and profit sharing. We believe that this chartering strategy will afford us opportunities to capture increased profits during strong charter markets, while benefiting from the relatively stable cash flows and high utilization rates associated with longer-term

time charters. As of April 18, 2019, we had charters covering 50.9 % of available days in 2019 and 7.0 % of available days in 2020.

Actively Manage our Fleet to Maximize Return on Capital over Market Cycles. We plan to actively manage the size and composition of our fleet through opportunistic acquisitions and dispositions as part of our effort to achieve above-market returns on capital for our vessel assets. Using Navios Holdings' global network of relationships and extensive experience in the maritime transportation industry, coupled with its commercial, financial and operational expertise, we plan to opportunistically grow our fleet through the timely and selective acquisition of high-quality newbuilding or secondhand vessels when we believe those acquisitions will result in attractive returns on invested capital and increased cash flow. We also intend to engage in opportunistic dispositions where we can achieve attractive values for our vessels as we assess the market cycle. We believe our diverse and versatile fleet, combined with the experience and long-standing relationships of Navios Holdings with participants in the maritime transportation industry, position us to identify and take advantage of attractive acquisition opportunities.

Leverage the Experience, Brand, Network and Relationships of Navios Holdings. We intend to capitalize on the global network of relationships that Navios Holdings has developed during its long history of investing and operating in the marine transportation industry. This includes decades-long relationships with leading charterers, financing sources and key shipping industry players. When charter markets and vessel prices are depressed and vessel financing is difficult to obtain we believe the relationships and experience of Navios Holdings and its management enhances our ability to acquire young, technically advanced vessels at cyclically low prices and employ them under attractive charters with leading charterers. Navios Holdings' long involvement and reputation for reliability in the Asia Pacific region have also allowed it to develop privileged relationships with many of the largest institutions in Asia. Through its established reputation and relationships, Navios Holdings has had access to opportunities not readily available to most other industry participants that lack Navios Holdings' brand recognition, credibility and track record.

Table of Contents

Benefit from Navios Holdings Risk Management Practices and Corporate Managerial Support. Risk management requires the balancing of a number of factors in a cyclical and potentially volatile environment. In part, this requires a view of the overall health of the market, as well as an understanding of capital costs and returns. Navios Holdings actively engages in assessing financial and other risks associated with fluctuating market rates, fuel prices, credit risks, interest rates and foreign exchange rates. Navios Holdings closely monitors credit exposure to charterers and other counterparties and has established policies designed to ensure that contracts are entered into with counterparties that have appropriate credit history. We believe that Navios Acquisition benefits from these established policies.

Sustain a Competitive Cost Structure. Pursuant to our management agreement with the Manager, a wholly owned subsidiary of Navios Holdings, the Manager coordinates and oversees the commercial, technical and administrative management of our fleet. We believe that the Manager is able to do so at rates competitive with those that would be available to us through independent vessel management companies. For example, pursuant to our amended management agreement with Navios Holdings, management fees of our vessels are fixed through May 2020. We believe this external management arrangement will enhance the scalability of our business by allowing us to grow our fleet without incurring significant additional overhead costs. We believe that we will be able to leverage the economies of scale of Navios Holdings and manage operating, maintenance and corporate costs. At the same time, we believe the young age and high-quality of the vessels in our fleet, coupled with Navios Holdings' safety and environmental record, will position us favorably within the crude oil, product and chemical tanker transportation sectors with our customers and for future business opportunities.

Our Customers

We provide or will provide seaborne shipping services under contracts with customers that we believe are creditworthy.

Our major customers during 2018 were Navig8 and Mansel. For the year ended December 31, 2018, these two customers accounted for 39.2%, and 12.1%, respectively, of Navios Acquisition's revenue.

Our major customers during 2017 were: Navig8, Mansel and Shell Tankers Singapore Private LTD (Shell). For the year ended December 31, 2017, these three customers accounted for 31.9%, 14.3% and 13.7%, respectively, of Navios Acquisition's revenue.

Our major customers during 2016 were: Navig8, Shell and Mansel. For the year ended December 31, 2016, these three customers accounted for 33.0%, 20.0% and 14.7%, respectively, of Navios Acquisition's revenue.

Although we believe that if any one of our contracts were terminated we could re-charter the related vessel at the prevailing market rate relatively quickly, the permanent loss of a significant customer or a substantial decline in the amount of services requested by a significant customer could harm our business, financial condition and results of operations if we were unable to re-charter our vessel on a favorable basis due to then-current market conditions, or otherwise.

Competition

The market for international seaborne crude oil transportation services is fragmented and highly competitive. Seaborne crude oil transportation services generally are provided by two main types of operators: major oil company captive fleets (both private and state-owned) and independent ship owner fleets. In addition, several owners and

operators pool their vessels together on an ongoing basis, and such pools are available to customers to the same extent as independently owned and operated fleets. Many major oil companies and other oil trading companies also operate their own vessels and use such vessels not only to transport their own crude oil but also to transport crude oil for third party charterers in direct competition with independent owners and operators in the tanker charter market. Competition for charters is intense and is based upon price, location, size, age, condition and acceptability of the vessel and its manager. Due in part to the fragmented tanker market, competitors with greater resources could enter the tanker market and operate larger fleets through acquisitions or consolidations and may be willing or able to accept lower prices than us, which could result in our achieving lower revenues from our vessels. See Risk Factors Our growth depends on our ability to obtain customers, for which we face substantial competition. In the highly competitive tanker industry, we may not be able to compete for charters with new entrants or established companies with greater resources, which may adversely affect our results of operations.

Time Charters

A time charter is a contract for the use of a vessel for a fixed period of time at a specified daily rate. Under a time charter, the vessel owner provides crewing and other services related to the vessel's operation, the cost of which is included in the daily rate and the customer is responsible for substantially all of the vessel voyage costs. Most of the vessels in our fleet are hired out under time charters, and we intend to continue to hire out our vessels under time charters. The following discussion describes the material terms common to all of our time charters.

Table of Contents

Base Hire Rate

Base hire rate refers to the basic payment from the customer for the use of the vessel. The hire rate is generally payable monthly, in advance on the first day of each month, in U.S. Dollars as specified in the charter.

Off-hire

When the vessel is off-hire, the charterer generally is not required to pay the base hire rate, and we are responsible for all costs. Prolonged off-hire may lead to vessel substitution or termination of the time charter. A vessel generally will be deemed off-hire if there is a loss of time due to, among other things:

operational deficiencies; drydocking for repairs, maintenance or inspection; equipment breakdowns; or delays due to accidents, crewing strikes, certain vessel detentions or similar problems; or

the shipowner's failure to maintain the vessel in compliance with its specifications and contractual standards or to provide the required crew.

Under some of our charters, the charterer is permitted to terminate the time charter if the vessel is off-hire for an extended period, which is generally defined as a period of 90 or more consecutive off-hire days.

Termination

We are generally entitled to suspend performance under the time charters covering our vessels if the customer defaults in its payment obligations. Under some of our time charters, either party may terminate the charter in the event of war in specified countries or in locations that would significantly disrupt the free trade of the vessel. Some of our time charters covering our vessels require us to return to the charterer, upon the loss of the vessel, all advances paid by the charterer but not earned by us.

Pooling Arrangements

For vessels operating in pooling arrangements, the Company earns a portion of total revenues generated by the pool, net of expenses incurred by the pool. The amount allocated to each pool participant vessel, including the Company's vessels, is determined in accordance with an agreed-upon formula, which are determined by the margins awarded to each vessel in the pool based on the vessel's age, design and other performance characteristics. Revenue under pooling arrangements is accounted for as variable rate operating leases on the accrual basis and is recognized in the period in which the variability is resolved. The Company recognizes net pool revenue on a monthly and quarterly basis, when the vessel has participated in a pool during the period and the amount of pool revenue can be estimated reliably based on the pool report. The allocation of such net revenue may be subject to future adjustments by the pool however, such changes are not expected to be material.

Voyage Contracts

The Company's revenues earned under voyage contracts (revenues for the transportation of cargo) were previously recognized ratably over the estimated relative transit time of each voyage. A voyage was deemed to commence when a vessel was available for loading and was deemed to end upon the completion of the discharge of the current cargo. Under a voyage charter, a vessel is provided for the transportation of specific goods between specific ports in return

for payment of an agreed upon freight per ton of cargo. Upon adoption of ASC 606, the Company recognizes revenue ratably from port of loading to when the charterer's cargo is discharged as well as defer costs that meet the definition of costs to fulfill a contract and relate directly to the contract.

Expenses

Management fees:

Pursuant to the Management Agreement dated May 28, 2010 and as amended in May 2012, May 2014 and May 2016, the Manager provided commercial and technical management services to Navios Acquisition's vessels for a fixed daily fee of: (a) \$6,350 per MR2 product tanker and chemical tanker vessel; (b) \$7,150 per LR1 product tanker vessel; and (c) \$9,500 per VLCC, through May 2018.

Pursuant to an amendment to the Management Agreement dated as of May 3, 2018, Navios Acquisition fixed the fees for commercial and technical ship management services of its fleet for two additional years from May 29, 2018 through May 2020, at a fixed daily fee of: (a) \$6,500 per MR2 product tanker and chemical tanker vessel; (b) \$7,150 per LR1 product tanker vessel; and (c) the current daily fee of \$9,500 per VLCC.

Table of Contents

Following the Merger with Navios Midstream, completed on December 13, 2018, the Management Agreement covers the vessels acquired.

Dry docking expenses are reimbursed at cost.

Total management fees for each of the years ended December 31, 2018, 2017 and 2016 amounted to \$94.0 million, \$95.0 million and \$97.9 million, respectively (which does not include \$0.7 million under direct vessel expenses).

General and administrative expenses:

On May 28, 2010, Navios Acquisition entered into an Administrative Services Agreement with Navios Holdings, pursuant to which Navios Holdings provides certain administrative management services to Navios Acquisition which include: bookkeeping, audit and accounting services, legal and insurance services, administrative and clerical services, banking and financial services, advisory services, client and investor relations and other services. Navios Holdings is reimbursed for reasonable costs and expenses incurred in connection with the provision of these services. In May 2014, Navios Acquisition extended the duration of its existing Administrative Services Agreement with Navios Holdings, until May 2020.

Following the Merger with Navios Midstream, completed on December 13, 2018, the Administrative Services Agreement covers such services as they pertain to the vessels acquired.

For each of the years ended December 31, 2018, 2017 and 2016 the expense arising from administrative services rendered by Navios Holdings was \$8.9 million, \$9.0 million and \$9.4 million, respectively.

Management of Ship Operations, Administration and Safety

Navios Holdings provides, through a wholly owned subsidiary, expertise in various functions critical to our operations. Pursuant to the Management Agreement and an Administrative Services Agreement with Navios Holdings, we have access to human resources, financial and other administrative functions, including:

bookkeeping, audit and accounting services;

administrative and clerical services;

banking and financial services; and

client and investor relations.

Technical management services are also provided, including:

commercial management of the vessel;

vessel maintenance and crewing;

purchasing and insurance; and

shipyard supervision.

For more information on the Management Agreement and the Administrative Services Agreement we have with Navios Holdings, please read Item 7. Major Stockholders and Related Party Transactions .

Oil Company Tanker Vetting Process

Traditionally there have been relatively few charterers in the oil transportation business and that part of the industry has been undergoing consolidation. The so called oil majors, such as Exxon Mobil, BP p.l.c., Royal Dutch Shell plc., Chevron, ConocoPhillips and Total S.A., together with a few smaller companies, represent a significant percentage of the production, trading and, especially, seaborne transportation of crude oil and refined petroleum products worldwide. Concerns about the environment have led oil majors to develop and implement a strict due diligence process, known as vetting, when selecting vessels and considering their managers. Vetting has evolved into a sophisticated and comprehensive assessment of both the vessel and the vessel manager. While numerous factors are considered and evaluated prior to a commercial decision, the oil majors, through their association, Oil Companies International Marine Forum (OCIMF), have developed two basic tools: the Ship Inspection Report program, which is known as SIRE, and the Tanker Management & Self Assessment program, which is known as TMSA. The former is a physical ship inspection based upon a thorough vessel inspection questionnaire and performed by accredited OCIMF inspectors, resulting in a report being logged on SIRE, while the latter is a recent addition to the risk assessment tools used by the oil majors. Based upon commercial risk, there are three levels of assessment used by oil majors:

terminal use, which clears a vessel to call at one of the oil major s terminals;

voyage charter, which clears the vessel for a single voyage; and

period charter, which clears the vessel for use for an extended period of time.

Table of Contents

The depth and complexity of each of these levels of assessment varies. Each charter agreement for our vessels requires that the applicable vessel have a valid SIRE report (less than six months old) in the OCIMF website as recommended by OCIMF. In addition, under the terms of the charter agreements, the charterers require that our vessels and their technical managers be vetted and approved to transport crude oil or refined petroleum products (as applicable). The technical manager is responsible for obtaining and maintaining the vetting approvals required to successfully charter our vessels.

Governmental and Other Regulations

Sources of Applicable Rules and Standards

Shipping is one of the world's most heavily regulated industries, and, in addition, it is subject to many industry standards. Government regulation significantly affects the ownership and operation of vessels. These regulations consist mainly of rules and standards established by international conventions, but they also include national, state, and local laws and regulations in force in jurisdictions where vessels may operate or are registered, and which are commonly more stringent than international rules and standards. This is the case particularly in the United States and, increasingly, in Europe.

A variety of governmental and private entities subject vessels to both scheduled and unscheduled inspections. These entities include local port authorities (the U.S. Coast Guard, harbor masters or equivalent entities), classification societies, flag state administration (country vessel of registry), and charterers, particularly terminal operators. Certain of these entities require vessel owners to obtain permits, licenses, and certificates for the operation of their vessels. Failure to maintain necessary permits or approvals could require a vessel owner to incur substantial costs or temporarily suspend operation of one or more of its vessels.

Heightened levels of environmental and quality concerns among insurance underwriters, regulators, and charterers continue to lead to greater inspection and safety requirements on all vessels and may accelerate the scrapping of older vessels throughout the industry. Increasing environmental concerns have created a demand for vessels that conform to stricter environmental standards. Vessel owners are required to maintain operating standards for all vessels that will emphasize operational safety, quality maintenance, continuous training of officers and crews and compliance with U.S. and international regulations.

Ship Safety Regulation

The International Maritime Organization, or IMO, has adopted a number of international conventions concerned with ship safety and with preventing, reducing or controlling pollution from ships. These fall into two main categories, consisting firstly of those concerned generally with ship safety standards, and secondly of those specifically concerned with measures to prevent pollution.

In the former category the primary international instrument is the Safety of Life at Sea Convention of 1974, as amended, or SOLAS, together with the regulations and codes of practice that form part of its regime. Much of SOLAS is not directly concerned with preventing pollution, but some of its safety provisions are intended to prevent pollution as well as promote safety of life and preservation of property. These regulations have been and continue to be regularly amended as new and higher safety standards are introduced with which we are required to comply.

An amendment of SOLAS introduced the International Safety Management (ISM) Code, which has been effective since July 1998. Under the ISM Code the party with operational control of a vessel is required to develop an extensive safety management system that includes, among other things, the adoption of a safety and environmental protection

policy setting forth instructions and procedures for operating its vessels safely and describing procedures for responding to emergencies. The ISM Code requires that vessel operators obtain a safety management certificate for each vessel they operate. This certificate evidences compliance by a vessel's management with code requirements for a safety management system. No vessel can obtain a certificate unless its manager has been awarded a document of compliance, issued by the flag state for the vessel, under the ISM Code. Noncompliance with the ISM Code and other IMO regulations, such as the mandatory ship energy efficiency management plan (SEEMP) which is akin to a safety management plan and came into effect on January 1, 2013, may subject a ship owner to increased liability, may lead to decreases in available insurance coverage for affected vessels, and may result in the denial of access to, or detention in, some ports. For example, the United States Coast Guard and European Union authorities have indicated that vessels not in compliance with the ISM Code will be prohibited from trading in ports in the United States and European Union. Each vessel's certificate evidencing compliance with the ISM Code and the ISPS Code, described below, must be periodically renewed and compliance must be periodically verified.

Security Regulations

Since the terrorist attacks of September 11, 2001, there have been a variety of initiatives intended to enhance vessel security. In 2002, Marine Transportation Security Act (MTSA) came into effect. To implement certain portions of the MTSA, in 2003, the U.S. Coast Guard issued regulations requiring the implementation of certain security requirements aboard vessels operating in waters subject to the jurisdiction of the United States. Similarly, in 2002, amendments to SOLAS imposed various detailed security obligations on vessels and port authorities, most of which are contained in the International Ship and Port Facility Security Code (ISPS Code). Among the various requirements are:

Table of Contents

on-board installation of automatic information systems to enhance vessel-to-vessel and vessel-to-shore communications;

on-board installation of ship security alert systems;

the development of vessel security plans; and

compliance with flag state security certification requirements.

The U.S. Coast Guard regulations, intended to be aligned with international maritime security standards, exempt non-U.S. vessels from MTSA vessel security measures, provided such vessels had on board, by July 1, 2004, a valid International Ship Security Certificate (ISSC) that attests to the vessel's compliance with SOLAS security requirements and the ISPS Code.

International Regulations to Prevent Pollution from Ships

In the second main category of international regulation, the primary instrument is the International Convention for the Prevention of Pollution from Ships, or MARPOL, which imposes environmental standards on the shipping industry set out in Annexes I-VI of MARPOL. These contain regulations for the prevention of pollution by oil (Annex I), by noxious liquid substances in bulk (Annex II), by harmful substances in packaged forms within the scope of the International Maritime Dangerous Goods Code (Annex III), by sewage (Annex IV), by garbage (Annex V), and by air emissions (Annex VI).

These regulations have been and continue to be regularly amended as new and more stringent standards of pollution prevention are introduced with which we are required to comply. For example, MARPOL Annex VI, together with the NOx Technical Code established thereunder, sets limits on sulfur oxide and nitrogen oxide emissions from ship exhausts and prohibits deliberate emissions of ozone depleting substances, such as chlorofluorocarbons. It also includes a global cap on the sulfur content of fuel oil and allows for special areas to be established with more stringent controls on emissions. Originally adopted in September 1997, Annex VI came into force in May 2005 and was amended in October 2008 (as was the NOx Technical Code) to provide for progressively more stringent limits on such emissions from 2010 onwards. The revised Annex VI provides, in particular, for a reduction of the global sulfur cap. After considering the issue for many years, the IMO announced on October 27, 2016 that it was proceeding with a requirement for 0.5% m/m sulfur content in marine fuel (down from current levels of 3.5%) outside the ECAs starting on January 1, 2020. Under Annex VI, the 2020 date was subject to review as to the availability of the required fuel oil. Annex VI required the fuel availability review to be completed by 2018 but was ultimately completed in 2016. Therefore, by 2020, ships will be required to remove sulfur from emissions through the use of emission control equipment, or purchase marine fuel with 0.5% sulfur content, which may see increased demand and higher prices due to supply constraints. Installing pollution control equipment or using lower sulfur fuel could result in significantly increased costs to our company. Similarly Annex VI requires Tier III standards for NOx emissions to be applied to ships constructed and engines installed in ships operating in NOx ECAs from January 1, 2016. We anticipate incurring costs to comply with these more stringent standards by implementing measures such as fuel switching, vessel modification adding distillate fuel storage capacity, or addition of exhaust gas cleaning scrubbers, and may require installation and operation of further control equipment at significantly increased cost.

The revised Annex VI further allows for designation, in response to proposals from member parties, of Emission Control Areas (ECAs) that impose accelerated and/or more stringent requirements for control of sulfur oxide,

particulate matter, and nitrogen oxide emissions. Thus far, ECAs have been formally adopted for the Baltic Sea area (limits SOx emissions only); the North Sea area including the English Channel (limiting SOx emissions only) and the North American ECA (which came into effect from August 1, 2012 limiting SOx, NOx and particulate matter emissions). In October 2016, the IMO approved the designation of the North Sea and Baltic Sea as ECAs for NOx under Annex VI as well, which is scheduled for adoption in 2017 and would take effect in January 2021. The United States Caribbean Sea ECA entered into force on January 1, 2013 and has been effective since January 1, 2014, limiting SOx, NOx and particulate matter emissions. For the currently-designated ECAs, much lower sulfur limits on fuel oil content are being phased in (0.1% from January 1, 2015).

At its 68th session (2015), the Marine Environmental Protection Committee (the MEPC) amended the 2014 Guidelines on EEDI survey and certification as well as the method of calculating of EEDI for new ships, the latter of which was again amended at the 70th session (2016). At its 70th session, the MEPC also adopted mandatory requirements for ships of 5,000 gross tonnage or greater to collect fuel consumption data for each type of fuel used, and report the data to the flag State after the end of each calendar year. At the 72nd MEPC session (April 2018), the committee adopted the goal of reducing annual greenhouse gas emissions from ships by at least 50% by 2050 as compared to 2008 levels, which if implemented could significantly increase operational costs associated with equipment upgrades and fuel costs.

The revised Annex I to the MARPOL Convention entered into force in January 2007. It incorporates various amendments to the MARPOL Convention and imposes construction requirements for oil tankers delivered on or after January 1, 2010. On August 1, 2007, Regulation 12A (an amendment to Annex I) came into force imposing performance standards for accidental oil fuel outflow and requiring oil fuel tanks to be located inside the double-hull in all ships with an aggregate oil fuel capacity of 600 cubic meters and above, and which are delivered on or after August 1, 2010, including ships for which the building contract is entered into on or after August 1, 2007 or, in the absence of a contract, for which keel is laid on or after February 1, 2008. We intend that all of our newbuild tanker vessels, if any, will comply with Regulation 12A.

Table of Contents*Greenhouse Gas Emissions*

In February 2005, the Kyoto Protocol to the United Nations Framework Convention on Climate Change entered into force. Pursuant to the Kyoto Protocol, adopting countries are required to implement national programs to reduce emissions of certain gases, generally referred to as greenhouse gases, which are suspected of contributing to global warming. Currently, the greenhouse gas emissions from international shipping do not come under the Kyoto Protocol.

In December 2011, UN climate change talks took place in Durban and concluded with an agreement referred to as the Durban Platform for Enhanced Action. In preparation for the Durban Conference, the International Chamber of Shipping (ICS) produced a briefing document, confirming the shipping industry's commitment to cut shipping emissions by 20% by 2020, with significant further reductions thereafter. The ICS called on the participants in the Durban Conference to give the IMO a clear mandate to deliver emissions reductions through market-based measures, for example a shipping industry environmental compensation fund. Notwithstanding the ICS's request for global regulation of the shipping industry, the Durban Conference did not result in any proposals specifically addressing the shipping industry's role in climate change.

Although regulation of greenhouse gas emissions in the shipping industry was discussed during the 2015 UN Climate Change Conference in Paris (the Paris Conference), the agreement reached among the 195 nations did not expressly reference the shipping industry. Following the Paris Conference, the IMO announced it would continue its efforts on this issue at the MEPC, and at its 70th session, the MEPC approved a Roadmap for developing a comprehensive GHG emissions reduction strategy for ships, which includes the goal of adopting an initial strategy and emission reduction commitments in 2018. The Roadmap also provides for additional studies and further intersessional work, to be continued at the 71st session in 2017, with a goal of adopting a revised strategy in 2023 to include short-, mid- and long-term reduction measures and schedules for implementation.

On June 28, 2013, the European Commission (EC) adopted a communication setting out a strategy for progressively including greenhouse gas emissions from maritime transport in the EU's policy for reducing its overall GHG emissions. The first step proposed by the EC was an EU Regulation to an EU-wide system for the monitoring, reporting and verification of carbon dioxide emissions from large ships starting in 2018. The Regulation was adopted on April 29, 2015 and took effect on July 1, 2015, with monitoring, reporting and verification requirements beginning on January 1, 2018. This Regulation appears to be indicative of an intent to maintain pressure on the international negotiating process. The EC also adopted an Implementing Regulation, which entered into force November 2016, setting templates for monitoring plans, emissions reports and compliance documents pursuant to Regulation 2015/757.

Other International Regulations to Prevent Pollution

In addition, the IMO, the United States and states within the United States have proposed or implemented requirements relating to the management of ballast water to prevent the harmful effects of foreign invasive species. In February 2004, the IMO adopted the International Convention for the Control and Management of Ships' Ballast Water and Sediments (the BWM Convention). The BWM Convention's implementing regulations call for a phased introduction of mandatory ballast water exchange requirements, to be replaced in time with mandatory concentration limits, as well as other obligations including recordkeeping requirements and implementation of a Ballast Water and Sediments Management Plan. The BWM Convention entered into force on September 8, 2017. As of February 11, 2019, the BWM Convention had 79 contracting states for 80.94% of world gross tonnage. New ships constructed after September 8, 2017 must comply on delivery with the BWM Convention. For vessels constructed prior to September 8, 2017, installation of ballast water management systems must take place at the first renewal survey following September 8, 2017 (the date the BWM Convention entered into force). Ships built before September 8, 2017 must comply with IMO discharge standards by the due date for their IOPPC renewal survey under MARPOL Annex 1. All

ships must meet the IMO ballast water discharge standard by September 8, 2024. The BWM Convention requires ships to manage ballast water in a manner that removes, renders harmless or avoids the uptake or discharge of aquatic organisms and pathogens within ballast water and sediment. Recently updated Ballast Water and Sediment Management Plan guidance includes more robust testing and performance specifications. The entry of the BWM Convention and revised guidance, as well as similar ballast water treatment requirements in certain jurisdictions (such as the United States and states within the United States), will likely result in substantial compliance costs relating to the installation of equipment on our vessels to treat ballast water before it is discharged and other additional ballast water management and reporting requirements. In the United States, the Vessel Incidental Discharge Act (VIDA) was signed into law on December 4, 2018, which requires the U.S. Coast Guard to address the regulation of discharges incidental to the normal operation of commercial vessels into navigable waters, including management of ballast water. This change is expected to result in a simplification of the current patch-work state of ballast water regulation in the United States, which is currently variably regulated by the U.S. Environmental Protection Agency and the various states.

Table of Contents

European Regulations

European regulations in the maritime sector are in general based on international law. However, since the *Erika* incident in 1999, the European Community has become increasingly active in the field of regulation of maritime safety and protection of the environment. It has been the driving force behind a number of amendments of MARPOL (including, for example, changes to accelerate the time-table for the phase-out of single hull tankers, and to prohibit the carriage in such tankers of heavy grades of oil), and if dissatisfied either with the extent of such amendments or with the time-table for their introduction it has been prepared to legislate on a unilateral basis. It should be noted, for instance, that the EU has its own regime as far as ship emissions are concerned and whilst it does in some respects reflect the IMO regime, this is not always the case. As far as sulfur dioxide emissions are concerned, for example, the EU regulation has not just caught up with the IMO limits for sulfur in ECAs, but it continues to have certain elements that exceed IMO regulations (e.g., as of January 1, 2015, EU Member States must ensure that ships in the Baltic, the North Sea and the English Channel are using gas oils with a sulfur content of no more than 0.10%).

In some instances where it has done so, international regulations have subsequently been amended to the same level of stringency as that introduced in Europe, but the risk is well established that EU regulations may from time to time impose burdens and costs on shipowners and operators which are additional to those involved in complying with international rules and standards. In December 2016, the EU signed into law the National Emissions Ceiling (NEC) Directive, which entered into force on December 31, 2016. The NEC must be implemented by individual member states through particular laws in each state by June 30, 2018. The NEC aims to set stricter emissions limits on SO₂, ammonia, non-methane volatile organic compounds, NO_x and fine particulate (PM_{2.5}) by setting new upper limits for emissions of these pollutants, starting in 2020. While the NEC is not specifically directed toward the shipping industry, the EU specifically mentions the shipping industry in its announcement of the NEC as a contributor to emissions of PM_{2.5}, SO₂ and NO_x. Implementation of new laws by member states to reduce emissions may ultimately result in increased costs to us to comply with the more stringent standards.

In some areas of regulation the EU has introduced new laws without attempting to procure a corresponding amendment of international law. Notably, it adopted in 2005 a directive on ship-source pollution, imposing criminal sanctions for pollution not only where this is caused by intent or recklessness (which would be an offense under MARPOL), but also where it is caused by serious negligence. The directive could therefore result in criminal liability being incurred in circumstances where it would not be incurred under international law. Experience has shown that in the emotive atmosphere often associated with pollution incidents, retributive attitudes towards ship interests have found expression in negligence being alleged by prosecutors and found by courts. Moreover, there is skepticism that the notion of serious negligence is likely to prove any narrower in practice than ordinary negligence. Criminal liability for a pollution incident could not only result in us incurring substantial penalties or fines but may also, in some jurisdictions, facilitate civil liability claims for greater compensation than would otherwise have been payable.

United States Environmental Regulations and Laws Governing Civil Liability for Pollution

Environmental legislation in the United States merits particular mention as it is in many respects more onerous than international laws, representing a high-water mark of regulation with which shipowners and operators must comply, and of liability likely to be incurred in the event of non-compliance or an incident causing pollution.

U.S. federal legislation, including notably the Oil Pollution Act of 1990, or OPA, establishes an extensive regulatory and liability regime for the protection and cleanup of the environment from oil spills, including cargo or bunker oil spills from tankers. OPA affects all owners and operators whose vessels trade in the United States, its territories and possessions or whose vessels operate in United States waters, which includes the United States territorial sea and its 200 nautical mile exclusive economic zone. Under OPA, vessel owners, operators and bareboat charterers are

responsible parties and are jointly, severally and strictly liable (unless the spill results solely from the act or omission of a third party, an act of God or an act of war) for all containment and clean-up costs and other damages arising from discharges or substantial threats of discharges, of oil from their vessels. In addition to potential liability under OPA as the relevant federal legislation, vessel owners may in some instances incur liability on an even more stringent basis under state law in the particular state where the spillage occurred.

Title VII of the Coast Guard and Maritime Transportation Act of 2004, or the CGMTA, amended OPA to require the owner or operator of any non-tank vessel of 400 gross tons or more, that carries oil of any kind as a fuel for main propulsion, including bunkers, to prepare and submit a response plan for each vessel on or before August 8, 2005. The implementing regulations took effect on October 30, 2013. The vessel response plans must include detailed information on actions to be taken by vessel personnel to prevent or mitigate any discharge or substantial threat of such a discharge of ore from the vessel due to operational activities or casualties.

OPA liability limits are periodically adjusted for inflation, and the U.S. Coast Guard issued a final rule on November 19, 2015 to reflect increases in the Consumer Price Index. With this adjustment, OPA currently limits liability of the responsible party for single-hull tank vessels over 3,000 gross tons to the greater of \$3,500 per gross ton or \$25.846 million (this amount is reduced to \$7.05 million if the vessel is less than 3,000 gross tons). For tank vessels over 3,000 gross tons, other than a single-hull vessel, liability is limited to \$2,200 per gross ton or \$18.8 million (or \$4.7 million for a vessel less than 3,000 gross tons), whichever is greater. Under the OPA, these liability limits do not apply if an incident was directly caused by violation of applicable United States federal safety, construction or operating regulations or by a responsible party's gross negligence or willful misconduct, or if the responsible party fails or refuses to report the incident or to cooperate and assist in connection with oil removal activities.

Table of Contents

In response to the Deepwater Horizon incident in the Gulf of Mexico, in 2010 the U.S. Congress proposed, but did not formally adopt, legislation to amend OPA to mandate stronger safety standards and increased liability and financial responsibility for offshore drilling operations. While Congressional activity on this topic is expected to continue to focus on offshore facilities rather than on vessels generally, it cannot be known with certainty what form any such new legislative initiatives may take.

In addition, the Comprehensive Environmental Response, Compensation, and Liability Act, or CERCLA, which applies to the discharge of hazardous substances (other than oil) whether on land or at sea, contains a similar liability regime and provides for cleanup, removal and natural resource damages. Liability under CERCLA is limited to the greater of \$300 per gross ton, or \$5.0 million for vessels carrying any hazardous substances as cargo, or \$0.5 million for vessels not carrying hazardous substances as cargo or residue, unless the incident is caused by gross negligence, willful misconduct, or a violation of certain regulations, in which case liability is unlimited.

Similarly, in response to the Deepwater Horizon incident, the EU issued Directive 2013/30/EU of the European Parliament and of the Council of June 12, 2013 on safety of offshore oil and gas operations. The objective of this Directive is to reduce as far as possible the occurrence of major accidents relating to offshore oil and gas operations and to limit their consequences, thus increasing the protection of the marine environment and coastal economies against pollution, establishing minimum conditions for safe offshore exploration and exploitation of oil and gas and limiting possible disruptions to Union indigenous energy production, and to improve the response mechanisms in case of an accident. Member states had to implement the Directive by July 19, 2015. As far as the environment is concerned, the UK has various regulations such as: the Offshore Petroleum Activities (Offshore Safety Directive) (Environmental Functions) Regulations 2015 (OSDEF), the 2015 amendments to the Merchant Shipping (Oil Pollution Preparedness, Response and Cooperation Convention) Regulations 1998 (OPRC 1998) and other environmental Directive requirements, specifically the Environmental Management System. The Offshore Petroleum Licensing (Offshore Safety Directive) Regulations 2015 will implement the licensing Directive requirements.

We currently maintain, for each of our owned vessels, insurance coverage against pollution liability risks in the amount of \$1.0 billion per incident. The insured risks include penalties and fines as well as civil liabilities and expenses resulting from accidental pollution. However, this insurance coverage is subject to exclusions, deductibles and other terms and conditions. If any liabilities or expenses fall within an exclusion from coverage, or if damages from a catastrophic incident exceed the \$1.0 billion limitation of coverage per incident, our cash flow, profitability and financial position could be adversely impacted.

Under OPA, an owner or operator of a fleet of vessels is required only to demonstrate evidence of financial responsibility in an amount sufficient to cover the vessel in the fleet having the greatest maximum liability under OPA. Under the self-insurance provisions, the shipowner or operator must have a net worth and working capital, measured in assets located in the United States against liabilities located anywhere in the world, that exceeds the applicable amount of financial responsibility. We have complied with the U.S. Coast Guard regulations by providing a certificate of responsibility from third party entities that are acceptable to the U.S. Coast Guard evidencing sufficient self-insurance.

The U.S. Coast Guard's regulations concerning certificates of financial responsibility provide, in accordance with OPA, that claimants may bring suit directly against an insurer or guarantor that furnishes certificates of financial responsibility. If such insurer or guarantor is sued directly, it is prohibited from asserting any contractual defense that it may have had against the responsible party and is limited to asserting those defenses available to the responsible party and the defense that the incident was caused by the willful misconduct of the responsible party. Certain organizations, which had typically provided certificates of financial responsibility under pre-OPA laws, including the major protection and indemnity organizations, have declined to furnish evidence of insurance for vessel owners and

operators if they are subject to direct actions or required to waive insurance policy defenses. This requirement may have the effect of limiting the availability of the type of coverage required by the Coast Guard and could increase our costs of obtaining this insurance as well as the costs of our competitors that also require such coverage.

OPA specifically permits individual states to impose their own liability regimes with regard to oil pollution incidents occurring within their boundaries, and some states' environmental laws impose unlimited liability for oil spills. In some cases, states which have enacted such legislation have not yet issued implementing regulations defining vessels owners' responsibilities under these laws.

The United States Clean Water Act (CWA) prohibits the discharge of oil or hazardous substances in U.S. navigable waters and imposes strict liability in the form of penalties for unauthorized discharges. The CWA also imposes substantial liability for the costs of removal, remediation and damages and complements the remedies available under CERCLA. The EPA regulates the discharge of ballast water and other substances incidental to the normal operation of vessels in U.S. waters using a Vessel General Permit (VGP) system pursuant to the CWA, in order to combat the risk of harmful organisms that can travel in ballast water carried from foreign ports and to minimize the risk of water pollution through numerous specified effluent streams incidental to the normal operation of vessels. On March 28, 2013 the EPA adopted the 2013 VGP which took effect on December 19, 2013. The 2013 VGP is valid for five years and expires at the end of this year. The VGP imposes a numeric standard to control the release of non-indigenous invasive species in ballast water discharges. In addition, through the CWA certification provisions that allow U.S. states to place additional conditions on use of the VGP within state waters, a number of states have proposed or implemented a variety of stricter ballast water requirements including, in some states, specific treatment standards.

Table of Contents

On December 4, 2018, the Vessel Incidental Discharge Act (VIDA) was signed into law, which establishes a new framework for regulation of discharges incidental to the normal operation of commercial vessels into navigable waters of the United States, including management of ballast water. Under VIDA, the U.S. EPA is required to develop performance standards within two years and then requires the U.S. Coast Guard to develop regulations for the implementation and enforcement of those standards within the following two years. This change is expected to result in a simplification of the current patch-work of ballast water regulation in the United States, which is currently variably regulated by the U.S. Environmental Protection Agency and the various states. As a result of the passage of VIDA, the current VGP will remain in force until the U.S. Coast Guard finalizes its regulations under VIDA. Coast Guard regulations require commercial ships operating in U.S. waters to manage ballast water by meeting certain requirements, which include using a U.S. type-approved Ballast Water Management System (BWMS), temporarily using a foreign-type BWMS that has been accepted by the Coast Guard, using ballast water obtained from a U.S. Public Water System, discharge ballast water into a shore-side facility or not discharge ballast water within 12 nautical miles. Vessel owners/operators may request an extension to the compliance deadline by showing that, despite all efforts, it cannot comply with one of the approved systems or compliance methods. There are numerous foreign-approved Ballast Water Treatment Systems (BWTS) in the Coast Guard s list of approved Alternate Management Systems. The Coast Guard has type approved numerous Ballast Water Management Systems (BWMS), which claim to meet the range of requirements that most vessel owners and operators described in their extension requests in the past. Due to the increase in approvals, it will become more difficult to receive compliance extensions and thus could result in significant costs to install an approved BWTS. Failure to comply with U.S. ballast water regulations, including installation of BWTS by September 8, 2017, could result in civil or criminal fines or penalties.

The Federal Clean Air Act (CAA) requires the EPA to promulgate standards applicable to emissions of volatile organic compounds and other air contaminants. Our vessels are subject to CAA vapor control and recovery standards (VCS) for cleaning fuel tanks and conducting other operations in regulated port areas, and to CAA emissions standards for so-called Category 3 marine diesel engines operating in U.S. waters. In April 2010, EPA adopted regulations implementing the provision of MARPOL Annex VI regarding emissions from Category 3 marine diesel engines. Under these regulations, both U.S. and foreign-flagged ships must comply with the applicable engine and fuel standards of Annex VI, including the stricter North America ECA standards which took effect in August 2012, when they enter U.S. ports or operate in most internal U.S. waters including the Great Lakes. Annex VI requirements are discussed in greater detail above under International regulations to prevent pollution from ships. We may incur costs to install control equipment on our vessels to comply with the new standards.

Also under the CAA, since 1990 the U.S. Coast Guard has regulated the safety of VCSs that are required under EPA and state rules. Our vessels operating in regulated port areas have installed VCSs that are compliant with EPA, state and U.S. Coast Guard requirements. On July 16, 2013, the U.S. Coast Guard adopted regulations that made its VCS requirements more compatible with new EPA and State regulations, reflected changes in VCS technology, and codified existing U.S. Coast Guard guidelines. We intend to comply with all applicable state and U.S. federal regulations in the ports where our vessels call.

International Laws Governing Civil Liability to Pay Compensation or Damages

We operate a fleet of crude, product and chemical tankers that are subject to national and international laws governing pollution from such vessels. Several international conventions impose and limit pollution liability from vessels. An owner of a tanker vessel carrying a cargo of persistent oil as defined by the International Convention for Civil Liability for Oil Pollution Damage (the CLC) is subject under the convention to strict liability for any pollution damage caused in a contracting state by an escape or discharge from cargo or bunker tanks. This liability is subject to a financial limit calculated by reference to the tonnage of the ship, and the right to limit liability may be lost if the spill is caused by the shipowner s intentional or reckless conduct. Liability may also be incurred under the CLC for a

bunker spill from the vessel even when she is not carrying such cargo, but is in ballast.

When a tanker is carrying clean oil products that do not constitute persistent oil that would be covered under the CLC, liability for any pollution damage will generally fall outside the CLC and will depend on other international conventions or domestic laws in the jurisdiction where the spillage occurs. The same principle applies to any pollution from the vessel in a jurisdiction that is not a party to the CLC. The CLC applies in over 100 jurisdictions around the world, but it does not apply in the United States, where the corresponding liability laws such as the OPA discussed above, are particularly stringent.

In 2001, the IMO adopted the International Convention on Civil Liability for Bunker Oil Pollution Damage, or the Bunker Convention, which imposes strict liability on shipowners for pollution damage in jurisdictional waters of ratifying states caused by discharges of bunker oil. The Bunker Convention defines bunker oil as any hydrocarbon mineral oil, including lubricating oil, used or intended to be used for the operation or propulsion of the ship, and any residues of such oil. The Bunker Convention also requires registered owners of ships over a certain size to maintain insurance for pollution damage in an amount equal to the limits of liability under the applicable national or international limitation regime (but not exceeding the amount calculated in accordance with the Convention on Limitation of Liability for Maritime Claims of 1976, as amended, or the 1976 Convention). The Bunker Convention became effective in contracting states on November 21, 2008 and, as of February 11, 2019, had 91 contracting states, representing 92.85% of the gross tonnage of the world's merchant fleet. In other jurisdictions liability for spills or releases of oil from ships' bunkers continues to be determined by the national or other domestic laws in the jurisdiction where the events or damages occur.

Table of Contents

The Bunker Convention also provides vessel owners a right to limit their liability, depending on the applicable national or international regime. The 1976 Convention is the most widely applicable international regime limiting maritime pollution liability. Rights to limit liability under the 1976 Convention are forfeited where a spill is caused by a ship owner's intentional or reckless conduct. Certain jurisdictions have ratified the IMO's Protocol of 1996 to the 1976 Convention, referred to herein as the Protocol of 1996. The Protocol of 1996 provides for substantially higher liability limits in those jurisdictions than the limits set forth in the 1976 Convention. Finally, some jurisdictions, such as the United States, are not a party to either the 1976 Convention or the Protocol of 1996, and, therefore, a ship owner's rights to limit liability for maritime pollution in such jurisdictions may be uncertain.

Inspection by Classification Societies

Every sea going vessel must be inspected and approved by a classification society. The classification society certifies that the vessel is in class, signifying that the vessel has been built and maintained in accordance with the rules of the classification society and complies with applicable rules and regulations of the vessel's country of registry and the international conventions of which that country is a member. In addition, where surveys are required by international conventions and corresponding laws and ordinances of a flag state, the classification society will undertake them on application or by official order, acting on behalf of the authorities concerned. The classification society also undertakes, on request, other surveys and checks that are required by regulations and requirements of the flag state or port authority. These surveys are subject to agreements made in each individual case or to the regulations of the country concerned. For maintenance of the class, regular and extraordinary surveys of hull, machinery (including the electrical plant) and any special equipment classed are required to be performed as follows:

Annual Surveys: For ocean-going ships, annual surveys are conducted for the hull and the machinery (including the electrical plant) and, where applicable, for special equipment classed, at intervals of 12 months from the date of commencement of the class period indicated in the certificate.

Intermediate Surveys: Extended annual surveys are referred to as intermediate surveys and typically are conducted two and a half years after commissioning and each class renewal. Intermediate surveys may be carried out on the occasion of the second or third annual survey.

Class Renewal Surveys: Class renewal surveys, also known as special surveys, are carried out for the ship's hull, machinery (including the electrical plant), and for any special equipment classed, at the intervals indicated by the character of classification for the hull. At the special survey, the vessel is thoroughly examined, including audio-gauging, to determine the thickness of its steel structure. Should the thickness be found to be less than class requirements, the classification society would prescribe steel renewals. The classification society may grant a one year grace period for completion of the special survey under certain conditions. Substantial amounts of money may have to be spent for steel renewals to pass a special survey if the vessel experiences excessive wear and tear. In lieu of the special survey every four or five years, depending on whether a grace period was granted, a shipowner has the option of arranging with the classification society for the vessel's integrated hull or machinery to be on a continuous survey cycle, in which every part of the vessel would be surveyed within a five-year cycle.

Risk of Loss and Liability Insurance*General*

The operation of any cargo vessel includes risks such as mechanical failure, physical damage, collision, property loss, and cargo loss or damage and business interruption due to political circumstances in foreign countries, hostilities and labor strikes. In addition, there is always an inherent possibility of marine disaster, including oil spills and other environmental mishaps, and the liabilities arising from owning and operating vessels in international trade. The OPA, which imposes virtually unlimited liability upon owners, operators and demise charterers of any vessel trading in the United States exclusive economic zone for certain oil pollution accidents in the United States, has made liability insurance more expensive for ship owners and operators trading in the United States market. While we believe that our present insurance coverage is adequate, not all risks can be insured, and there can be no guarantee that any specific claim will be paid, or that we will always be able to obtain adequate insurance coverage at reasonable rates.

Hull and Machinery Insurance

We have obtained marine hull and machinery and war risk insurance, which include coverage of the risk of actual or constructive total loss, for all of our owned vessels. Each of the owned vessels is covered for up to at least fair market value, with deductibles of \$0.1 million per Handymax and Panamax tanker vessel and \$0,25 million per VLCC tanker. We have also extended our war risk insurance to include war loss of hire for any loss of time to the vessel, including for physical repairs, caused by a warlike incident and piracy seizure for up to 270 days of detention / loss of time. There are no deductibles for the war risk insurance or the war loss of hire cover in case of piracy.

We have arranged, as necessary, increased value insurance for our vessels. With the increased value insurance, in case of total loss of the vessel, we will be able to recover the sum insured under the increased value policy in addition to the sum insured under the hull and machinery policy. Increased value insurance also covers excess liabilities that are not recoverable in full by the hull and machinery policies by reason of underinsurance.

Table of Contents
Protection and Indemnity Insurance

Protection and indemnity insurance is expected to be provided by mutual protection and indemnity associations, or P&I Associations, who indemnify members in respect of discharging their tortious, contractual or statutory third-party legal liabilities arising from the operation of an entered ship. Such liabilities include but are not limited to third-party liability and other related expenses from injury or death of crew, passengers and other third parties, loss or damage to cargo, claims arising from collisions with other vessels, damage to other third-party property, pollution arising from oil or other substances, and salvage, towing and other related costs, including wreck removal. Protection and indemnity insurance is a form of mutual indemnity insurance, extended by protection and indemnity mutual associations and always provided in accordance with the applicable associations' rules and members' agreed upon terms and conditions.

Navios Acquisition's fleet is currently entered for protection and indemnity insurance with International Group associations where, in line with all International Group Clubs, coverage for oil pollution is limited to \$1.0 billion per event. The 13 P&I Associations that comprise the International Group insure approximately 95% of the world's commercial tonnage and have entered into a pooling agreement to collectively reinsure each association's liabilities. Each vessel that Navios Acquisition acquires will be entered with P&I Associations of the International Group. Under the International Group reinsurance program for the current policy year, each P&I club in the International Group is responsible for the first \$10.0 million of every claim. In every claim the amount in excess of \$10.0 million and up to \$80.0 million is shared by the clubs under the pooling agreement. Any claim in excess of \$80.0 million is reinsured by the International Group in the international reinsurance market under the General Excess of Loss Reinsurance Contract. This policy currently provides an additional \$2.0 billion of coverage for non-oil pollution claims. Further to this, an additional reinsurance layer has been placed by the International Group for claims up to \$1.0 billion in excess of \$2.08 billion, i.e., \$3.08 billion in total. For passengers and crew claims the overall limit is \$3.0 billion for any one event with any one vessel with a sub-limit of \$2.0 billion for passengers. With the exception of pollution, passenger or crew claims, should any other P&I claim exceed Group reinsurance limits, the provisions of all International Group Club's overspill claim rules will operate and members of any International Group Club will be liable for additional contributions in accordance with such rules. To date, there has never been an overspill claim, or one even nearing this level.

As a member of a P&I Association, which is a member of the International Group, Navios Acquisition will be subject to calls payable to the associations based on the individual fleet record, the associations' overall claim records as well as the claim records of all other members of the individual associations, and members of the pool of P&I Associations comprising the International Group. The P&I Associations' policy year commences on February 20th. Calls are levied by means of Estimated Total Premiums (ETP) and the amount of the final installment of the ETP varies according to the actual total premium ultimately required by the club for a particular policy year. Members have a liability to pay supplementary calls which might be levied by the board of directors of the club if the ETP is insufficient to cover amounts paid out by the club.

Should a member leave or entry cease with any of the associations, at the club's managers discretion, they may be also be liable to pay release calls or provide adequate security for the same amount. Such calls are levied in respect of potential outstanding club/member liabilities on open policy years and include but are not limited to liabilities for deferred calls and supplementary calls.

Uninsured Risks

Not all risks are insured and not all risks are insurable. The principal insurable risks which nonetheless remain uninsured across our fleet are loss of hire and strikes, except in cases of loss of hire due to war or a piracy event or due

to presence or suspected presence of Contraband on board. Specifically, Navios Acquisition does not insure these risks because the costs are regarded as disproportionate. These insurances provide, subject to a deductible, a limited indemnity for hire that would not be receivable by the shipowner for reasons set forth in the policy. Should a vessel on time charter, where the vessel is paid a fixed hire day by day, suffer a serious mechanical breakdown, the daily hire will no longer be payable by the charterer. Under some circumstances, an event of force majeure may also permit the charterer to terminate the time charter or suspend payment of charter hire. The purpose of the loss of hire insurance is to secure the loss of hire during such periods. In the case of strikes insurance, if a vessel is being paid a fixed sum to perform a voyage and the ship becomes strike bound at a loading or discharging port, the insurance covers the loss of earnings during such periods.

Exchange Controls

Under Marshall Islands law, there are currently no restrictions on the export or import of capital, including foreign exchange controls or restrictions that affect the remittance of dividends, interest or other payments to non-resident holders of Navios Acquisition's securities.

Table of Contents***Facilities***

We have offices at 7 Avenue de Grande Bretagne, Office 11B2, Monte Carlo, MC 98000 Monaco. We believe that our office facilities are suitable and adequate for our business as it is presently conducted. We presently occupy office space provided by Navios Holdings. Navios Holdings has agreed that it will make such office space, as well as certain office and secretarial services, available to us, as may be required by us from time to time.

Crewing and Staff

The Manager crews its vessels primarily with Greek, Filipino, Romanian, Russian, Ukrainian and Croatian officers and Filipino seamen. The Manager is responsible for selecting its Greek officers. For other nationalities, officers and seamen are referred to us by local crewing agencies. Navios Acquisition requires that all of its seamen have the qualifications and licenses required to comply with international regulations and shipping conventions.

Administrative Services

On May 28, 2010, Navios Acquisition entered into an Administrative Services Agreement with Navios Holdings, pursuant to which Navios Holdings provides certain administrative management services to Navios Acquisition, which include: bookkeeping, audit and accounting services, legal and insurance services, administrative and clerical services, banking and financial services, advisory services, client and investor relations and other services. Navios Holdings is reimbursed for reasonable costs and expenses incurred in connection with the provision of these services. In May 2014, Navios Acquisition extended the duration of its existing Administrative Services Agreement with Navios Holdings, until May 2020.

Following the Merger with Navios Midstream, completed on December 13, 2018, the Administrative Services Agreement covers such services as they pertain to the vessels acquired.

See Item 7B-Related Party Transactions the Administrative Services Agreement.

Legal Proceedings

The Company is involved in various disputes and arbitration proceedings arising in the ordinary course of business. Provisions have been recognized in the financial statements for all such proceedings where the Company believes that a liability may be probable and for which the amounts are reasonably estimable, based upon facts known at the date of the financial statements were prepared. We maintain insurance policies with insurers in amounts and with coverage and deductibles as our board of directors believes are reasonable and prudent. In the opinion of the management, the ultimate disposition of these matters individually and in aggregate will not materially affect the Company's financial position, results of operations or liquidity.

C. Organizational Structure

The table below lists the Company's wholly-owned subsidiaries as of December 31, 2018.

(1) Former vessel-owner of the Shinyo Splendor, which was sold to an unaffiliated third party on May 6, 2014.

(2) Former vessel-owner of the Shinyo Navigator, which was sold to an unaffiliated third party on December 6, 2013.

- (3) Navios Midstream acquired all of the outstanding shares of capital stock of the vessel-owning subsidiary on March 29, 2018.
- (4) Each company had the rights over a shipbuilding contract of an MR2 product tanker vessel. In February 2015, these shipbuilding contracts were terminated, with no exposure to Navios Acquisition, due to the shipyard's inability to issue a refund guarantee.
- (5) Former vessel-owner of the Nave Lucida, which was sold to an unaffiliated third party on January 27, 2016.
- (6) Former vessel-owner of the Nave Universe, which was sold to an unaffiliated third party on October 4, 2016.
- (7) Former vessel-owner of the Nave Constellation which was sold to an unaffiliated third party on November 15, 2016.
- (8) Currently, vessel-operating company under a sale and leaseback transaction.
- (9) Bareboat chartered-in vessels with purchase option.
- (10) In March 2019, the Shinyo Ocean, a 2001-built VLCC vessel of 281,395 dwt was involved in a collision incident. The Company maintains insurance coverage for such types of events (subject to applicable deductibles and other customary limitations).
- (11) Merger subsidiary which merged with and into Navios Midstream, with Navios Midstream surviving as a wholly owned subsidiary of Navios Acquisition in accordance with the Merger Agreement.

Table of Contents

Affiliates included in the financial statements accounted for under the equity method:

In the consolidated financial statements of Navios Acquisition, Navios Europe I Inc. (Navios Europe I) with ownership interest of 47.5% and Navios Europe II Inc. (Navios Europe II) with ownership interest of 47.5% are included as affiliates and are accounted for under the equity method, for such periods during which the entities were affiliates of Navios Acquisition. See Note 10 to the Notes to Consolidated Financial Statements, included elsewhere within this Annual Report.

On November 16, 2017, in accordance with the terms of the Limited Partnership Agreement of Navios Midstream all of the 9,342,692 subordinated units of Navios Midstream converted into common units on a one-for-one basis. Following their conversion into common units, these units have the same distribution rights as all other common units.

On June 18, 2018, in accordance with the terms of the Partnership Agreement all of the issued and outstanding 1,592,920 subordinated Series A units of Navios Midstream converted into Navios Midstream's existing common units on a one-for-one basis. Following their conversion into common units, these units have the same distribution rights as all other common units.

On December 13, 2018, Navios Acquisition completed the Merger contemplated by the previously announced Merger Agreement, dated as of October 7, 2018, by and among Navios Acquisition, Merger Sub, Navios Midstream and NAP General Partner. Pursuant to the Merger Agreement, Merger Sub merged with and into Navios Midstream, with Navios Midstream surviving as a wholly-owned subsidiary of Navios Acquisition.

Navios Midstream was accounted for as an affiliate under the equity method up to December 13, 2018, the date of obtaining control of Navios Midstream, and is included as a 100% wholly owned subsidiary in the consolidated financial statements of Navios Acquisition thereafter. Please refer to Note 3 and Note 10.

D. Property, plants and equipment

Other than our vessels, we do not have any other material property, plants or equipment.

Item 4A. Unresolved Staff Comments

None.

Item 5. Operating and Financial Review and Prospects

Overview

We are an owner and operator of tanker vessels focusing in the transportation of petroleum products (clean and dirty) and bulk liquid chemicals and we are incorporated in the Republic of the Marshall Islands.

On May 25, 2010, we consummated the Product and Chemical Tanker Acquisition, the acquisition of 13 vessels (11 product tankers and two chemical tankers), for an aggregate purchase price of \$457.7 million, including amounts to be paid for future contracted vessels to be delivered. On September 10, 2010, we consummated the VLCC Acquisition, for an aggregate purchase price of \$587.0 million.

On October 9, 2013, Navios Holdings, Navios Acquisition and Navios Partners established Navios Europe I and have economic interests of 47.5%, 47.5% and 5.0%, respectively. Navios Europe I is engaged in the marine transportation industry through the ownership of five tankers and five container vessels. Effective November 2014, Navios Holdings, Navios Acquisition and Navios Partners have voting interest of 50%, 50% and 0%, respectively. On February 21, 2017, Navios Holdings agreed to transfer to Navios Partners its participation in Navios Revolving Loans I and Navios Term Loans I, both relating to Navios Europe I, for a consideration of \$4.1 million in cash and 13,076,923 newly issued common units of Navios Partners.

On October 13, 2014, Navios Acquisition formed Navios Midstream under the laws of the Marshall Islands. Navios Maritime Midstream Partners GP LLC, or the general partner, a wholly-owned subsidiary of Navios Acquisition, was also formed on that date to act as the general partner of Navios Midstream and received a 2.0% general partner interest in Navios Midstream.

On February 18, 2015, Navios Holdings, Navios Acquisition and Navios Partners established Navios Europe II and have economic interests of 47.5%, 47.5% and 5.0%, respectively, and voting interests of 50%, 50% and 0%, respectively. Navios Europe II is engaged in the marine transportation industry through the ownership of seven dry bulk and seven container vessels.

On December 13, 2018, Navios Acquisition completed the Merger contemplated by the previously announced Merger Agreement, dated as of October 7, 2018, by and among Navios Acquisition, Merger Sub, Navios Midstream and NAP General Partner. Pursuant to the Merger Agreement, Merger Sub merged with and into Navios Midstream, with Navios Midstream surviving as a wholly-owned subsidiary of Navios Acquisition. Following the Merger the results of operations of Navios Midstream are consolidated under Navios Acquisition.

Table of Contents**Fleet Development*****Disposal of vessels*****2019**

On March 25, 2019, Navios Acquisition sold the C. Dream, a 2000-built VLCC vessel of 298,570 dwt to an unaffiliated third party for a sale price of \$21.8 million.

2018

On March 29, 2018, Navios Acquisition sold all the shares of the vessel-owning subsidiary of the Nave Galactic, a 2009-built VLCC vessel of 297,168 dwt to Navios Midstream for a sale price of \$44.5 million, which was paid as of March 31, 2018. The gain on sale of the vessel, upon write-off of the unamortized dry-docking of \$0.5 million and working capital items of \$0.4 million (including costs of \$0.2 million), was \$0.03 million.

2016

On January 27, 2016, Navios Acquisition sold the Nave Lucida to an unaffiliated third party for net cash proceeds of \$18.4 million. The gain on sale of the vessel, upon write-off of the unamortized dry-docking, was \$2.3 million.

On October 4, 2016, Navios Acquisition sold the Nave Universe to an unaffiliated third party for net cash proceeds of \$35.8 million. As of June 30, 2016, the vessel was classified as held for sale as the relevant criteria for the classification were met. The gain on sale of the vessel was \$4.8 million.

On November 15, 2016, Navios Acquisition sold the Nave Constellation to an unaffiliated third party for net cash proceeds of \$35.8 million. As of June 30, 2016, the vessel was classified as held for sale as the relevant criteria for the classification were met. The gain on sale of the vessel was \$4.6 million.

- (1) Former vessel-owner of the Shinyo Splendor, which was sold to an unaffiliated third party on May 6, 2014.
- (2) Former vessel-owner of the Shinyo Navigator, which was sold to an unaffiliated third party on December 6, 2013.
- (3) Navios Midstream acquired all of the outstanding shares of capital stock of the vessel-owning subsidiary on March 29, 2018.
- (4) Each company had the rights over a shipbuilding contract of an MR2 product tanker vessel. In February 2015, these shipbuilding contracts were terminated, with no exposure to Navios Acquisition, due to the shipyard's inability to issue a refund guarantee.
- (5) Former vessel-owner of the Nave Lucida, which was sold to an unaffiliated third party on January 27, 2016.
- (6) Former vessel-owner of the Nave Universe, which was sold to an unaffiliated third party on October 4, 2016.
- (7) Former vessel-owner of the Nave Constellation, which was sold to an unaffiliated third party on November 15, 2016.

Table of Contents

- (8) Currently, vessel-operating company under a sale and leaseback transaction.
- (9) Bareboat chartered-in vessels with purchase option.
- (10) In March 2019, the Shinyo Ocean, a 2001-built VLCC vessel of 281,395 dwt was involved in a collision incident. The Company maintains insurance coverage for such types of events (subject to applicable deductibles and other customary limitations).
- (11) Merger subsidiary which merged with and into Navios Midstream, with Navios Midstream surviving as a wholly owned subsidiary of Navios Acquisition in accordance with the Merger Agreement.

Our Charters

Our major customers during 2018 were Navig8 and Mansel. For the year ended December 31, 2018, these two customers accounted for 39.2%, and 12.1%, respectively, of Navios Acquisition's revenue.

Our major customers during 2017 were Navig8, Mansel and Shell. For the year ended December 31, 2017, these three customers accounted for 31.9%, 14.3% and 13.7%, respectively, of Navios Acquisition's revenue.

Our major customers during 2016 were Navig8, Shell and Mansel. For the year ended December 31, 2016, these three customers accounted for 33.0%, 20.0% and 14.7%, respectively, of Navios Acquisition's revenue.

No other customers accounted for 10% or more of total revenue for any of the years presented.

Our revenues are driven by the number of vessels in the fleet, the number of days during which the vessels operate and our charter hire rates, which, in turn, are affected by a number of factors, including:

the duration of the charters;

the level of spot and long-term market rates at the time of charter;

decisions relating to vessel acquisitions and disposals;

the amount of time spent positioning vessels;

the amount of time that vessels spend undergoing repairs and upgrades in drydock;

the age, condition and specifications of the vessels; and

the aggregate level of supply and demand in the tanker shipping industry.

Time charters are available for varying periods, ranging from a single trip (spot charter) to long-term which may be any number of years. In general, a long-term time charter assures the vessel owner of a consistent stream of revenue. Operating the vessel in the spot market affords the owner greater spot market opportunity, which may result in high rates when vessels are in high demand or low rates when vessel availability exceeds demand. We intend to operate our

vessels in a mix of short-term and long-term charter markets. Vessel charter rates are affected by world economics, international events, weather conditions, strikes, governmental policies, supply and demand and many other factors that might be beyond our control.

We could lose a customer or the benefits of a charter if:

the customer fails to make charter payments because of its financial inability, disagreements with us or otherwise;

the customer exercises certain rights to terminate the charter of the vessel;

the customer terminates the charter because we fail to deliver the vessel within a fixed period of time, the vessel is lost or damaged beyond repair, there are serious deficiencies in the vessel or prolonged periods of off-hire, or we default under the charter; or

a prolonged force majeure event affecting the customer, including damage to or destruction of relevant production facilities, war or political unrest prevents us from performing services for that customer.

If we lose a charter, we may be unable to re-deploy the related vessel on terms as favorable to us due to the long-term nature of most charters and the cyclical nature of the industry or we may be forced to charter the vessel on the spot market at then market rates which may be less favorable than the charter that has been terminated. The loss of any of our customers, time charters or vessels, or a decline in payments under our charters, could have a material adverse effect on our business, results of operations and financial condition and our ability to make cash distributions in the event we are unable to replace such customer, time charter or vessel.

Under some of our time charters, either party may terminate the charter contract in the event of war in specified countries or in locations that would significantly disrupt the free trade of the vessel. Some of the time charters covering our vessels require us to return to the charterer, upon the loss of the vessel, all advances paid by the charterer but not earned by us.

Table of Contents

Vessels Operations

Under our charters, our vessel manager is generally responsible for commercial, technical, health and safety and other management services related to the vessels' operation, and the charterer is responsible for bunkering and substantially all of the vessel voyage costs, including canal tolls and port charges.

Management fees

Pursuant to the Management Agreement dated May 28, 2010 and as amended in May 2012, May 2014 and May 2016, the Manager provided commercial and technical management services to Navios Acquisition's vessels for a fixed daily fee of: (a) \$6,350 per MR2 product tanker and chemical tanker vessel; (b) \$7,150 per LR1 product tanker vessel; and (c) \$9,500 per VLCC, through May 2018.

Pursuant to an amendment to the Management Agreement dated as of May 3, 2018, Navios Acquisition fixed the fees for commercial and technical ship management services of its fleet for two additional years from May 29, 2018 through May 2020, at a fixed daily fee of: (a) \$6,500 per MR2 product tanker and chemical tanker vessel; (b) \$7,150 per LR1 product tanker vessel; and (c) the current daily fee of \$9,500 per VLCC.

Following the Merger with Navios Midstream, completed on December 13, 2018, the Management Agreement covers the vessels acquired.

Dry docking expenses are reimbursed at cost.

Extraordinary costs and expenses include fees and costs resulting from:

time spent on insurance and salvage claims;

time spent vetting and pre-vetting the vessels by any charterers in excess of 10 days per vessel per year;

the deductible of any insurance claims relating to the vessels or for any claims that are within such deductible range;

the significant increase in insurance premiums which are due to factors such as acts of God outside the control of the Manager;

repairs, refurbishment or modifications, including those not covered by the guarantee of the shipbuilder or by the insurance covering the vessels, resulting from maritime accidents, collisions, other accidental damage or unforeseen events (except to the extent that such accidents, collisions, damage or events are due to the fraud, gross negligence or willful misconduct of the Manager, its employees or its agents, unless and to the extent otherwise covered by insurance);

expenses imposed due to any improvement, upgrade or modification to, structural changes with respect to the installation of new equipment aboard any vessel that results from a change in, an introduction of new, or a change in the interpretation of, applicable laws, at the recommendation of the classification society for that vessel or otherwise;

costs associated with increases in crew employment expenses resulting from an introduction of new, or a change in the interpretation of, applicable laws or resulting from the early termination of the charter of any vessel;

any taxes, dues or fines imposed on the vessels or the Manager due to the operation of the vessels;

expenses incurred in connection with the sale or acquisition of a vessel such as inspections and technical assistance; and

any similar costs, liabilities and expenses that were not reasonably contemplated by us and the Manager as being encompassed by or a component of the fixed daily fees at the time the fixed daily fees were determined.

Payment of any extraordinary fees or expenses to the Manager could significantly increase our vessel operating expenses and impact our results of operations.

During the remaining term of the Management Agreement, we expect that we will reimburse the Manager for all of the actual operating costs and expenses it incurs in connection with the management of our fleet.

Administrative Services

On May 28, 2010, Navios Acquisition entered into an Administrative Services Agreement with Navios Holdings, pursuant to which Navios Holdings provides certain administrative management services to Navios Acquisition which include: bookkeeping, audit and accounting services, legal and insurance services, administrative and clerical services, banking and financial services, advisory services, client and investor relations and other services. Navios Holdings is reimbursed for reasonable costs and expenses incurred in connection with the provision of these services.

Table of Contents

In May 2014, Navios Acquisition extended the duration of its existing Administrative Services Agreement with Navios Holdings, until May 2020.

Following the Merger with Navios Midstream, completed on December 13, 2018, the Administrative Services Agreement covers such services as they pertain to the vessels acquired.

A. Operating results

Trends and Factors Affecting Our Future Results of Operations

We believe the principal factors that will affect our future results of operations are the economic, regulatory, political and governmental conditions that affect the shipping industry generally and that affect conditions in countries and markets in which our vessels engage in business. Other key factors that will be fundamental to our business, future financial condition and results of operations include:

the demand for seaborne transportation services;

the ability of Navios Holdings' commercial and chartering operations to successfully employ our vessels at economically attractive rates, particularly as our fleet expands and our charters expire;

the effective and efficient technical management of our vessels;

Navios Holdings' ability to satisfy technical, health, safety and compliance standards of major commodity traders; and

the strength of and growth in the number of our customer relationships, especially with major commodity traders.

In addition to the factors discussed above, we believe certain specific factors will impact our combined and consolidated results of operations. These factors include:

the charter hire earned by our vessels under our charters;

our access to capital required to acquire additional vessels and/or to implement our business strategy;

our ability to sell vessels at prices we deem satisfactory;

our level of debt and the related interest expense and amortization of principal; and

the level of any dividend to our stockholders.

Period over Period Comparisons

Year Ended December 31, 2018 Compared to the Year Ended December 31, 2017

The following table presents consolidated revenue and expense information for the years ended December 31, 2018 and 2017. This information was derived from the audited consolidated financial statements of Navios Acquisition for the respective periods.

(in thousands of U.S. dollars)	Year ended December 31, 2018	Year ended December 31, 2017
Revenue	\$ 187,946	\$ 227,288
Time charter and voyage expenses	(31,593)	(21,919)
Direct vessel expenses	(7,656)	(4,198)
Management fees (entirely through related party transactions)	(94,019)	(94,973)
General and administrative expenses	(18,569)	(13,969)
Depreciation and amortization	(56,307)	(56,880)
Interest income	7,998	10,042
Interest expense and finance cost	(77,975)	(76,438)
Bargain purchase gain	68,951	
Gain on sale of vessels	25	
Loss in net earnings of affiliated companies	(61,284)	(46,657)
Other income	28	82
Other expense	(3,918)	(1,277)
Net loss	\$ (86,373)	\$ (78,899)

Set forth below are selected historical and statistical data for Navios Acquisition for each of the years ended December 31, 2018 and 2017 that we believe may be useful in better understanding Navios Acquisition's financial position and results of operations.

Table of Contents

	Year ended December 31, 2018	Year ended December 31, 2017
FLEET DATA		
Available days ⁽¹⁾	12,735	12,904
Operating days ⁽²⁾	12,665	12,843
Fleet utilization ⁽³⁾	99.4%	99.5%
Vessels operating at period end	41	36
AVERAGE DAILY RESULTS		
Time Charter Equivalent (TCE) Rate per day (4)	\$ 13,855	\$ 17,186

- (1) **Available days:** Available days for the fleet are total calendar days the vessels were in Navios Acquisition's possession for the relevant period after subtracting off-hire days associated with major repairs, drydocking or special surveys. The shipping industry uses available days to measure the number of days in a relevant period during which vessels should be capable of generating revenues.
- (2) **Operating days:** Operating days are the number of available days in the relevant period less the aggregate number of days that the vessels are off-hire due to any reason, including unforeseen circumstances. The shipping industry uses operating days to measure the aggregate number of days in a relevant period during which vessels actually generate revenues.
- (3) **Fleet utilization:** Fleet utilization is the percentage of time that Navios Acquisition's vessels were available for generating revenue, and is determined by dividing the number of operating days during a relevant period by the number of available days during that period. The shipping industry uses fleet utilization to measure a company's efficiency in finding suitable employment for its vessels and minimizing the amount of days that its vessels are off hire for reasons other than scheduled repairs, dry dockings or special surveys.
- (4) **TCE Rate:** The TCE Rate per day is defined as voyage and time charter revenues less voyage expenses excluding backstop expense during a period divided by the number of available days during the period. The TCE Rate per day is a standard shipping industry performance measure used primarily to present the actual daily earnings generated by vessels of various types of charter contracts for the number of available days of the fleet.

Revenue: Revenue for the year ended December 31, 2018 decreased by \$39.3 million, or 17.3%, to \$187.9 million, as compared to \$227.3 million for the same period of 2017. The decrease was mainly attributable to a: (a) decrease in the market rates during the year ended December 31, 2018, as compared to the same period in 2017; and (b) decrease in revenue of \$8.2 million mainly due to the sale of the Nave Galactic to Navios Midstream in March 2018; partially mitigated by the increase in revenue of \$5.1 million due to the acquisition and resulting consolidation of Navios Midstream on December 13, 2018. Available days of the fleet decreased from 12,904 days for the year ended December 31, 2017 to 12,735 days for the year ended December 31, 2018. The TCE Rate decreased from \$17,186 for the year ended December 31, 2017, to \$13,855 for the year ended December 31, 2018.

Time charter and voyage expenses: Time charter and voyage expenses for the year ended December 31, 2018 increased by approximately \$9.7 million to \$31.6 million, as compared to \$21.9 million for the same period of 2017. The increase was mainly attributable to a: (a) \$3.7 million increase in the backstop commitment; and (b) \$6.3 million increase in bunkers consumption and voyage expenses due to spot voyages in the period; partially mitigated by a \$0.4 million decrease in brokers' commission.

Direct vessel expenses: Direct vessel expenses, comprising of the amortization of dry dock and special survey costs of certain vessels of our fleet for the year ended December 31, 2018 increased by \$3.5 million to \$7.7 million as compared to \$4.2 million for the year ended December 31, 2017.

Management fees: Management fees for the year ended December 31, 2018 decreased by \$1.0 million to \$94.0 million, as compared to \$95.0 million for the year ended December 31, 2017. The decrease was due to the sale of the Nave Galactic to Navios Midstream in March 2018, and was partially mitigated by (i) the increase of \$1.0 million due to the acquisition and resulting consolidation of Navios Midstream on December 13, 2018; and (ii) the amendment to the fees under our Management Agreement.

General and administrative expenses: Total general and administrative expenses for the year ended December 31, 2018 increased by \$4.6 million to \$18.6 million compared to \$14.0 million for the year ended December 31, 2017.

The increase was mainly attributable to a: (a) \$2.5 million increase in other professional fees and expenses, including \$2.2 million of transaction costs related to the Merger with Navios Midstream on December 13, 2018; (b) \$1.1 million increase of compensation to the directors and officers of the Company after the Merger; and (c) \$1.0 million increase in stock based compensation after the Merger.

For the years ended December 31, 2018 and 2017, the expenses charged by Navios Holdings for administrative services were \$8.9 million and \$9.0 million, respectively.

Table of Contents

Depreciation and amortization: Depreciation and amortization for the year ended December 31, 2018 decreased by \$0.6 million to \$56.3 million from \$56.9 million compared to December 31, 2017, due to \$1.3 million decrease resulting from the sale of the Nave Galactic in March 2018; partially mitigated by a \$0.8 million increase in depreciation expense due to the Merger with Navios Midstream on December 13, 2018. Depreciation of a vessel is calculated using an estimated useful life of 25 years from the date the vessel was originally delivered from the shipyard.

Interest income: Interest income for year ended December 31, 2018 decreased by \$2.0 million to \$8.0 million compared to \$10.0 million for the year ended December 31, 2017. The decrease was mainly attributable to a \$4.5 million decrease of the interest income accrued during the year ended December 31, 2018 under the loan granted to Navios Holdings which was fully repaid in November 2017; partially mitigated by a: (i) \$2.1 million increase of the interest income accrued under the revolving loan granted to Navios Europe I and Navios Europe II; and (ii) \$0.3 million increase in other interest income.

Interest expense and finance cost: Interest expense and finance cost for the year ended December 31, 2018 increased by \$1.5 million to \$78.0 million, as compared to \$76.4 million for the year ended December 31, 2017. The weighted average interest rate for the year ended December 31, 2018 increased to 6.94% from 6.45% for the year ended December 31, 2017. The average outstanding loan balance decreased to \$380.7 million for the year ended December 31, 2018 as compared to \$428.1 million for the year ended December 31, 2017. As of December 31, 2018 and 2017, the outstanding loan balance under Navios Acquisition's credit facilities was \$1.2 billion and \$1.1 billion, respectively.

Bargain purchase gain: The excess of the fair value of the identifiable net assets acquired upon Merger with Navios Midstream of \$123.5 million over the total purchase price consideration of \$54.5 million, resulted in a bargain purchase gain in the amount of \$69.0 million for the year ended December 31, 2018. Please refer to Note 3.

Gain on sale of vessels: The gain on sale of vessel for the year ended December 31, 2018 was \$0.03 million due to the sale of the Nave Galactic on March 29, 2018.

Loss in net earnings of affiliated companies: Loss in net earnings of affiliated companies increased by \$14.6 million to \$61.3 million loss for the year ended December 31, 2018, as compared to \$46.7 million loss for the year ended December 31, 2017. The increase mainly resulted from a: (i) \$75.7 million loss on acquisition of control of Navios Midstream on December 13, 2018 partially mitigated by the accelerated amortization of the deferred gain of \$6.8 million recognized in relation to the sale of the Nave Celeste and the C. Dream to Navios Midstream in June 2015, as compared to \$59.1 million non-cash other-than-temporary impairment (OTTI) loss relating to its investment in Navios Midstream recognized during the year ended December 31, 2017; and (ii) \$5.7 million decrease in equity in net earnings of Navios Midstream, mainly due to the \$6.0 million net negative effect from the sale of the Shinyo Kannika by Navios Midstream to an unaffiliated third party; partially mitigated by \$0.9 million increase in the income recognized for Navios Europe I and Navios Europe II.

Other income: Other income amounted to \$0.03 million for the year ended December 31, 2018, compared to \$0.1 million for the year ended December 31, 2017.

Other expense: Other expense increased by \$2.6 million to \$3.9 million for the year ended December 31, 2018, as compared to \$1.3 million for the same period in 2017.

Year Ended December 31, 2017 Compared to the Year Ended December 31, 2016

Edgar Filing: Navios Maritime Acquisition CORP - Form 20-F

The following table presents consolidated revenue and expense information for the years ended December 31, 2017 and 2016. This information was derived from the audited consolidated financial statements of Navios Acquisition for the respective periods.

(in thousands of U.S. dollars)	Year ended December 31, 2017	Year ended December 31, 2016
Revenue	\$ 227,288	\$ 290,245
Time charter and voyage expenses	(21,919)	(4,980)
Direct vessel expenses	(4,198)	(3,567)
Management fees (entirely through related party transactions)	(94,973)	(97,866)

Interest expense and finance cost	(76,438)	(75,987)
Gain on sale of vessels		11,749
Equity/ (loss) in net earnings of affiliated companies	(46,657)	15,499
Other income	82	377
Other expense	(1,277)	(2,685)
Net (loss)/ income	\$ (78,899)	\$ 62,878

Table of Contents

Set forth below are selected historical and statistical data for Navios Acquisition for each of the years ended December 31, 2017 and 2016 that we believe may be useful in better understanding Navios Acquisition's financial position and results of operations.

	Year ended December 31, 2017	Year ended December 31, 2016
FLEET DATA		
Available days ⁽¹⁾	12,904	13,753
Operating days ⁽²⁾	12,843	13,716
Fleet utilization ⁽³⁾	99.5%	99.7%
Vessels operating at period end	36	36
AVERAGE DAILY RESULTS		
Time Charter Equivalent (TCE) Rate per day (4)	\$ 17,186	\$ 20,742

- (1) **Available days:** Available days for the fleet are total calendar days the vessels were in Navios Acquisition's possession for the relevant period after subtracting off-hire days associated with major repairs, drydocking or special surveys. The shipping industry uses available days to measure the number of days in a relevant period during which vessels should be capable of generating revenues.
- (2) **Operating days:** Operating days are the number of available days in the relevant period less the aggregate number of days that the vessels are off-hire due to any reason, including unforeseen circumstances. The shipping industry uses operating days to measure the aggregate number of days in a relevant period during which vessels actually generate revenues.
- (3) **Fleet utilization:** Fleet utilization is the percentage of time that Navios Acquisition's vessels were available for generating revenue, and is determined by dividing the number of operating days during a relevant period by the number of available days during that period. The shipping industry uses fleet utilization to measure a company's efficiency in finding suitable employment for its vessels and minimizing the amount of days that its vessels are off hire for reasons other than scheduled repairs, dry dockings or special surveys.
- (4) **TCE Rate:** The TCE Rate per day is defined as voyage and time charter revenues less voyage expenses during a period divided by the number of available days during the period. The TCE Rate per day is a standard shipping industry performance measure used primarily to present the actual daily earnings generated by vessels of various types of charter contracts for the number of available days of the fleet.

Revenue: Revenue for the year ended December 31, 2017 decreased by \$63.0 million, or 21.7%, to \$227.3 million, as compared to \$290.2 million for the same period of 2016. The decrease was mainly attributable to a: (i) decrease in the market rates during the year ended December 31, 2017, as compared to the same period in 2016; and (ii) decrease in revenue by \$10.8 million due to the sale of one MR2 product tanker in January 2016 and two chemical tankers in the fourth quarter of 2016. Available days of the fleet decreased to 12,904 days for the year ended December 31, 2017, as compared to 13,753 days for the year ended December 31, 2016. The TCE Rate decreased to \$17,186 for the year ended December 31, 2017, from \$20,742 for the year ended December 31, 2016.

Time charter and voyage expenses: Time charter and voyage expenses for the year ended December 31, 2017 increased by approximately \$16.9 million to \$21.9 million, as compared to \$5.0 million for the year ended December 31, 2016. The increase was attributable to a: (i) \$16.4 million backstop commitment to Navios Midstream; and (ii) \$1.0 million increase in bunkers and other voyage expenses; partially mitigated by a \$0.6 million decrease in

broker commission costs.

Direct vessel expenses: Direct vessel expenses for the year ended December 31, 2017 increased by \$0.6 million to \$4.2 million as compared to \$3.6 million for the year ended December 31, 2016. The increase was attributable to a \$1.4 million increase in amortization of dry dock and special survey cost; partially mitigated by a \$0.7 million decrease in expenses incurred in connection with specialized work performed on certain vessels of our fleet for the year ended December 31, 2016.

Management fees: Management fees for the year ended December 31, 2017 decreased by \$2.9 million to \$95.0 million, as compared to \$97.9 million for the year ended December 31, 2016, attributable to the decrease in the number of vessels operating under Navios Acquisition's fleet, partially mitigated by the increase in management fees in effect as of May 29, 2016, described below. Pursuant to our Management Agreement, the Manager, a wholly owned subsidiary of Navios Holdings, provided commercial and technical management services to Navios Acquisition's vessels for a daily fee of: (a) \$6,000 per MR2 product tanker and chemical tanker vessel; (b) \$7,000 per LR1 product tanker vessel; and (c) \$9,500 per VLCC, through May 2016. Navios Acquisition fixed the fees for commercial and technical ship management services of its fleet for two additional years from May 29, 2016 through May 2018, at a daily fee of: (a) \$6,350 per MR2 product tanker and chemical tanker vessel; (b) \$7,150 per LR1 product tanker vessel; and (c) \$9,500 per VLCC.

General and administrative expenses: Total general and administrative expenses for the year ended December 31, 2017 decreased by approximately \$3.1 million to \$14.0 million compared to \$17.1 million for the year ended December 31, 2016.

Table of Contents

The decrease was mainly attributable to a: (a) \$2.0 million decrease of compensation to the directors and/ or officers of the Company; and (b) \$0.6 million decrease in other general and administrative expenses, including professional fees and expenses.

For the years ended December 31, 2017 and 2016, the expenses charged by Navios Holdings for administrative services were \$9.0 million and \$9.4 million, respectively.

The remaining balance of \$5.0 million and \$7.6 million of general and administrative expenses for the years ended December 31, 2017 and 2016, respectively, related to stock based compensation and compensation expense, as well as legal, consulting, travel and professional fees including audit fees.

Depreciation and amortization: Depreciation and amortization for the year ended December 31, 2017 decreased by \$0.7 million to \$56.9 million from \$57.6 million compared to December 31, 2016, due to the sale of vessels mentioned above. Depreciation of a vessel is calculated using an estimated useful life of 25 years from the date the vessel was originally delivered from the shipyard.

Interest income: Interest income for year ended December 31, 2017 increased by \$5.3 million to \$10.0 million compared to \$4.8 million for the year ended December 31, 2016. The increase was mainly attributable to the increase of the interest income accrued under the revolving loans granted to Navios Holdings, Navios Europe I and Navios Europe II.

Interest expense and finance cost: Interest expense and finance cost for the year ended December 31, 2017 increased by \$0.5 million to \$76.4 million, as compared to \$76.0 million for the year ended December 31, 2016. The increase was due to the increase in the weighted average interest rate for the year ended December 31, 2017 to 6.45% from 6.0% for the year ended December 31, 2016 and to an increase of \$0.6 million in the amortization and write-off of deferred finance cost to \$4.4 million for the year ended December 31, 2017, as compared to \$3.7 million for the same period of 2016. The average outstanding loan balance decreased to \$428.1 million for the year ended December 31, 2017 as compared to \$503.6 million for the year ended December 31, 2016. As of December 31, 2017 and 2016, the outstanding loan balance under Navios Acquisition's credit facilities was \$1,077.7 million and \$1,111.2 million, respectively.

Gain on sale of vessels: There was no gain on sale of vessels for the year ended December 31, 2017, as compared to \$11.7 million for the same period in 2016, due to the sale of the Nave Constellation, the Nave Universe and the Nave Lucida to unaffiliated third parties for total net cash proceeds of \$90.0 million.

Equity/ (loss) in net earnings of affiliated companies: Equity in net earnings of affiliated companies decreased by \$62.2 million to \$46.7 million loss for the year ended December 31, 2017, as compared to \$15.5 million equity for the same period in 2016.

The decrease mainly resulted from a: (i) \$59.1 million non-cash other-than-temporary impairment (OTTI) loss relating to its investment in Navios Midstream recognized during the year ended December 31, 2017; and (ii) \$3.9 million decrease in equity in net earnings of Navios Midstream; partially mitigated by a \$0.9 million increase in the income recognized for Navios Europe I and Navios Europe II.

Other income: Other income amounted to \$0.1 million for the year ended December 31, 2017, compared to \$0.4 million for the year ended December 31, 2016.

Other expense: Other expense decreased by \$1.4 million to \$1.3 million for the year ended December 31, 2017, as compared to \$2.7 million for the same period in 2016.

B. Liquidity and Capital Resources and Uses

Our primary short-term liquidity needs are to fund general working capital requirements, dry docking expenditures, minimum cash balance maintenance as per our credit facility agreements and debt repayment, and other obligations from time to time, while our long-term liquidity needs primarily relate to expansion and investment capital expenditures and other maintenance capital expenditures and debt repayment. Expansion capital expenditures are primarily for the purchase or construction of vessels to the extent the expenditures increase the operating capacity of or revenue generated by our fleet, while maintenance capital expenditures primarily consist of dry docking expenditures and expenditures to replace vessels in order to maintain the operating capacity of or revenue generated by our fleet. We anticipate that our primary sources of funds for our short-term liquidity needs will be cash flows from operations, long-term borrowings and proceeds from asset sales. As of December 31, 2018, Navios Acquisition's current assets totaled \$104.0 million, while current liabilities totaled \$92.2 million, resulting in a positive working capital position of \$11.8 million.

Navios Acquisition's cash forecast indicates that it will generate sufficient cash for at least the next 12 months following April 19, 2019 to make the required principal and interest payments on its indebtedness, provide for the normal working capital requirements of the business and remain in a positive working capital position. Generally, our long-term sources of funds derive from cash from operations, long-term bank borrowings and other debt or equity financings. We expect that we will rely upon cash from operations and upon external financing sources, including bank borrowings, to fund acquisitions, expansion and investment capital expenditures and other commitments we have entered into. We cannot assure you that we will be able to secure adequate financing or obtaining additional funds on favorable terms, to meet our liquidity needs. Please also refer to Item 3.D. Risk Factors - Risks Related to Our Indebtedness.

Table of Contents

In March and April 2019, Navios Acquisition entered into sale and lease back agreements for \$103.2 million in order to refinance \$50.3 million outstanding on the existing facility on three product tankers and to finance two product tankers that were previously financed by Eurobank Ergasias S.A. and were fully prepaid in March 2019 by the amount of \$32.2 million. Navios Acquisition has a purchase obligation to acquire the vessels at the end of the lease term and under ASC 842-40, the transaction was determined to be a failed sale. As a result of the refinancing, as of December 31, 2018, \$46.3 million was reclassified from Current portion of long-term debt, net of deferred finance cost to Long term debt, net of current portion, premium and net of deferred finance cost. The agreements will be repayable in 28 equal consecutive quarterly installments of \$2.3 million each, with a repurchase obligation of \$39.7 million on the last repayment date. The agreements mature in March and April 2026 and bear interest at LIBOR plus 350 bps per annum.

Navios Acquisition may use funds to repurchase its outstanding capital stock and/or indebtedness from time to time. Repurchases may be made in the open market, or through privately negotiated transactions or otherwise, in compliance with applicable laws, rules and regulations, at prices and on terms Navios Acquisition deems appropriate and subject to its cash requirements for other purposes, compliance with the covenants under Navios Acquisition's debt agreements, and other factors management deems relevant.

In February 2018, the Board of Directors of Navios Acquisition authorized a stock repurchase program for up to \$25.0 million of Navios Acquisition's common stock, for two years. Stock repurchases will be made from time to time for cash in open market transactions at prevailing market prices or in privately negotiated transactions. The timing and amount of repurchases under the program will be determined by management based upon market conditions and other factors. Repurchases may be made pursuant to a program adopted under Rule 10b5-1 under the Securities Exchange Act of 1934, as amended. The program does not require any minimum repurchase or any specific number or amount of shares of common stock and may be suspended or reinstated at any time in Navios Acquisition's discretion and without notice. The Board of Directors will review the program periodically. Repurchases will be subject to restrictions under Navios Acquisition's credit facilities and indenture. As of March 31, 2019, the Company has repurchased 734,920 shares of common stock, for a total cost of approximately \$7.5 million.

As of March 31, 2019, 13,728,371 shares of common stock were issued and outstanding.

Cash flows for the year ended December 31, 2018 compared to the year ended December 31, 2017:

The following table presents cash flow information for the years ended December 31, 2018 and 2017. This information was derived from the audited consolidated statement of cash flows of Navios Acquisition for the respective periods.

(Expressed in thousands of U.S. dollars)	Year Ended December 31, 2018	Year Ended December 31, 2017
Net cash (used in)/ provided by operating activities	\$ (38,709)	\$ 45,968
Net cash provided by investing activities	79,813	52,378
Net cash used in financing activities	(80,953)	(68,546)
Net (decrease)/ increase in cash and cash equivalents and restricted cash	\$ (39,849)	\$ 29,800

Cash (used in)/ provided by operating activities for the year ended December 31, 2018 as compared to the year ended December 31, 2017:

Net cash used in operating activities decreased by \$84.7 million to \$38.7 million outflow for the year ended December 31, 2018 as compared to net cash provided by operating activities of \$46.0 million inflow for the same period in 2017. The decrease is analyzed as follows:

The net loss for the year ended December 31, 2018 was \$86.4 million compared to \$78.9 million loss for the year ended December 31, 2017. In determining net cash used in operating activities for the year ended December 31, 2018, the net loss was adjusted for the effect of \$69.0 million for bargain purchase gain, \$61.3 million for equity/ (loss) in net earnings of affiliated companies, depreciation and amortization of \$56.3 million, \$7.7 million for the amortization of drydock and special survey costs, \$3.7 million for amortization and write-off of deferred finance costs and bond premium, \$1.1 million stock based compensation and \$0.03 million for gain on sale of vessels.

Prepaid expenses and other current assets increased by \$2.2 million. The increase was mainly due to inventories and voyage related expenses of \$0.6 million, working capital advances required under certain charter contracts of \$1.4 million and other prepaid expenses of \$0.3 million.

Accounts receivable increased by \$2.1 million. The increase was attributed to the increase in receivables due from charterers.

Table of Contents

Amounts due from/ to related parties, including current and non-current portion, increased by \$13.5 million from \$51.4 million receivable as of December 31, 2017 to \$64.9 million receivable as of December 31, 2018. This increase was due to (a) \$17.1 million decrease in payables to Navios Midstream including backstop commitment; and (b) \$10.6 million increase in interest receivable on the Navios Loans granted to Navios Europe I and Navios Europe II.; partially mitigated by a (i) \$7.1 million increase in payables for management fees, general and administrative expenses and other expenses; and (ii) \$7.1 million increase in payables for drydock and special survey costs incurred for certain vessels of the fleet.

Other long-term assets as of December 31, 2018 and December 31, 2017 amounted to \$0 and \$0.9 million, respectively due to working capital advances required under certain charter contracts that were classified under prepaid expenses and other current assets as of December 31, 2018.

Accounts payable increased by \$3.3 million. The increase was due to a: (a) \$1.4 million increase of payables for bunkers; (b) \$1.3 million increase in legal and professional payables; and (c) \$1.4 million increase in other payables; partially mitigated by: (i) \$0.6 million decrease in payables for port expenses; and (ii) \$0.3 million decrease in brokers payable.

Accrued expenses decreased by \$2.8 million. The decrease was mainly attributable to the decrease of: (a) accrued interest of \$2.2 million; and (b) accrued voyage and other expenses of \$0.9 million; partially mitigated by other accrued expenses of \$0.3 million.

Payment for dry dock and special survey costs incurred in the years ended December 31, 2018 and December 31, 2017 was \$19.4 million and \$14.9 million, respectively, and related to drydock and special survey costs incurred for certain vessels of the fleet.

Deferred revenue primarily relates to cash received from charterers prior to it being earned and also includes as of December 31, 2017 the current portion of deferred gain on sale of the Nave Celeste and the C. Dream to Navios Midstream. Deferred revenue relating to cash received from charterers was recognized as revenue over the voyage or charter period. Deferred revenue decreased by \$5.4 million.

Cash provided by investing activities for the year ended December 31, 2018 as compared to the year ended December 31, 2017:

Net cash provided by investing activities increased by \$27.4 million to \$79.8 million at December 31, 2018 from \$52.4 million at December 31, 2017.

Net cash provided by investing activities for the year ended December 31, 2018, resulted from: (i) \$44.5 million of net proceeds from sale of vessel; (ii) \$25.3 million acquired cash from the Navios Midstream Merger; and (iii) \$10.1 million from dividends received from affiliates.

Net cash provided by investing activities for the year ended December 31, 2017, resulted from: (i) a \$55.1 million loan repayment from Navios Holdings; and (ii) a \$11.0 million from dividends received from affiliates. The increase was mitigated by a: (a) \$13.7 million loan granted to Navios Europe II (Navios Revolving Loans II); and (b) \$0.1 million investment in Navios Midstream in order to maintain the 2% general partner interest.

Cash used in financing activities for the year ended December 31, 2018 as compared to the year ended December 31, 2017:

Net cash used in financing activities increased by \$12.4 million to an \$81.0 million outflow at December 31, 2018 from a \$68.5 million outflow in the year ended December 31, 2017.

Net cash used in financing activities for the year ended December 31, 2018, resulted from: (i) \$131.1 million of loan repayments; (ii) \$12.2 million of dividends paid; and (iii) \$7.1 million acquisition of treasury stock; partially mitigated by \$69.5 million in proceeds from finance lease, net of deferred finance costs.

Net cash used in financing activities for the year ended December 31, 2017, resulted from: (i) \$84.2 million of loan repayments; (ii) \$31.6 million of dividends paid; and (iii) \$2.5 million redemption of puttable common stock; partially mitigated by \$49.8 million in loan proceeds, net of deferred finance costs.

Cash flows for the year ended December 31, 2017 compared to the year ended December 31, 2016:

The following table presents cash flow information for the years ended December 31, 2017 and 2016. This information was derived from the audited consolidated statement of cash flows of Navios Acquisition for the respective periods.

(Expressed in thousands of U.S. dollars)	Year Ended December 31, 2017	Year Ended December 31, 2016
Net cash provided by operating activities	\$ 45,968	\$ 92,721
Net cash provided by investing activities	52,378	43,505
Net cash used in financing activities	(68,546)	(141,213)
Net increase/ (decrease) in cash and cash equivalents and restricted cash	\$ 29,800	\$ (4,987)

Table of Contents

Cash provided by operating activities for the year ended December 31, 2017 as compared to the year ended December 31, 2016:

Net cash provided by operating activities decreased by approximately \$46.8 million to \$46.0 million for the year ended December 31, 2017 as compared to net cash provided by operating activities of \$92.7 million for the same period in 2016. The decrease is analyzed as follows:

The net loss for the year ended December 31, 2017 was \$78.9 million compared to income of \$62.9 million for the year ended December 31, 2016. In determining net cash provided by operating activities for the year ended December 31, 2017, the net loss was adjusted for the effect of depreciation and amortization of \$56.9 million, \$56.9 million for equity/ (loss) in net earnings of affiliated companies, net of dividends received, \$4.2 million for the amortization of drydock and special survey costs, \$3.8 million for amortization and write-off of deferred finance costs and bond premium, \$0.1 million stock based compensation.

Amounts due from related parties, short-term, decreased by \$11.1 million to \$13.9 million at December 31, 2017 from \$25.0 million at December 31, 2016. The balances related mainly to management fees in accordance with the Management Agreement. Please refer to the relevant discussion below, under **Related Party Transactions** .

Payment for dry dock and special survey costs incurred in the years ended December 31, 2017 and December 31, 2016 was \$14.9 million and \$3.8 million, respectively, and related to drydock and special survey costs incurred for certain vessels of the fleet.

Accounts receivable decreased by \$8.1 million from \$20.9 million for the year ended December 31, 2016, to \$12.8 million for the year ended December 31, 2017. The decrease was attributed to the decrease in receivables due from charterers.

Amounts due from related parties, long term, excluding the Navios Holdings Credit Facility, increased by \$25.2 million from \$29.4 million as of December 31, 2016, to \$54.6 million as of December 31, 2017, which mainly related to management fees in accordance with the Management Agreement and the \$13.7 million loan granted to Navios Europe II, classified under **Cash provided by / (used in) investing activities** . Please refer to the relevant discussion below, under **Related Party Transactions** .

Accounts payable decreased by \$1.0 million to \$3.9 million at December 31, 2017 from \$4.9 million at December 31, 2016.

Amounts due to related parties, short-term as of December 31, 2017 and December 31, 2016 was \$17.1 million and \$0, respectively, and mainly consisted of backstop commitment liability of \$16.4 million and other payables to Navios Midstream.

Prepaid expenses and other current assets increased to \$6.5 million for the year ended December 31, 2017 from \$4.6 million for the year ended December 31, 2016, mainly due to working capital advances required under certain charter contracts, under the long-term assets.

Other long-term assets amounted to \$0.9 million for the each of the years ended December 31, 2017 and 2016.

Accrued expenses increased by \$1.2 million to \$12.2 million for the year ended December 31, 2017, from \$11.0 million on December 31, 2016. The increase was mainly attributable to the increase of accrued voyage and other expenses.

Deferred revenue primarily relates to cash received from charterers prior to it being earned and also includes the current portion of deferred gain on sale of the Nave Celeste and the C. Dream to Navios Midstream. Deferred revenue relating to cash received from charterers was recognized as revenue over the voyage or charter period. Deferred revenue decreased by \$3.5 million to \$5.0 million for the year ended December 31, 2017 from \$8.5 million on December 31, 2016.

Cash provided by investing activities for the year ended December 31, 2017 as compared to the year ended December 31, 2016:

Net cash provided by investing activities increased by \$8.9 million to \$52.4 million at December 31, 2017 from \$43.5 million at December 31, 2016.

Net cash provided by investing activities for the year ended December 31, 2017, resulted from: (i) a \$55.1 million loan repayment from Navios Holdings; and (ii) \$11.0 million from dividends received from affiliates. The increase was mitigated by a: (a) \$13.7 million loan granted to Navios Europe II (Navios Revolving Loans II); and (b) \$0.1 million investment in Navios Midstream in order to maintain the 2% general partner interest.

Net cash provided by investing activities for the year ended December 31, 2016, resulted from: (i) \$90.0 million net proceeds from sale of vessels; and (ii) \$7.2 million from dividends received from affiliates. The increase was mitigated by a: (i) \$49.3 million loan granted to Navios Holdings, net of issuance fees and costs; (ii) \$4.3 million loan granted to Navios Europe II (Navios Revolving Loans II); and (iii) \$0.1 million investment in Navios Midstream in order to maintain the 2% general partner interest.

Table of Contents***Cash used in financing activities for the year ended December 31, 2017 as compared to the year ended December 31, 2016:***

Net cash used in financing activities decreased by \$72.7 million to a \$68.5 million outflow at December 31, 2017 from a \$141.2 million outflow in the year ended December 31, 2016.

Net cash used in financing activities for the year ended December 31, 2017, resulted from: (i) \$84.2 million of loan repayments; (ii) \$31.6 million of dividends paid; (iii) a \$2.5 million redemption of puttable common stock; and was partially mitigated by \$49.8 million in loan proceeds, net of deferred finance costs.

Net cash used in financing activities for the year ended December 31, 2016, resulted from: (i) \$105.5 million of loan repayments; (ii) \$31.7 million of dividends and (iii) \$4.0 million for the redemption of puttable common stock.

Reconciliation of EBITDA and Adjusted EBITDA to Net Cash from Operating Activities

	Year Ended December 31, 2018	Year Ended December 31, 2017	Year Ended December 31, 2016
Expressed in thousands of U.S. dollars			
Net cash (used in)/ provided by operating activities	\$ (38,709)	\$ 45,968	\$ 92,721
Net (decrease)/ increase in operating assets	(2,152)	(4,119)	21,038

Net cash used in financing activities	\$ (80,953)	\$ (68,546)	\$ (141,213)

EBITDA in this document represents net (loss)/income before interest and finance costs, before depreciation and amortization and before income taxes. Adjusted EBITDA in this document represents EBITDA excluding certain items, such as stock-based compensation, gain on sale of vessels, gain/ (loss) on debt repayment and OTTI loss on equity investment.

We use Adjusted EBITDA as liquidity measure and reconcile EBITDA and Adjusted EBITDA to net cash provided by/ (used in) operating activities, the most comparable U.S. GAAP liquidity measure. EBITDA in this document is calculated as follows: net cash provided by/(used in) operating activities adding back, when applicable and as the case may be, the effect of: (i) net increase/(decrease) in operating assets; (ii) net (increase)/decrease in operating liabilities; (iii) net interest cost; (iv) amortization and write off of deferred finance costs and other related expenses; (v) equity/ (loss) in net earnings of affiliated companies, net of dividends received; (vi) loss on revaluation on previously held interest in Navios Midstream upon obtaining control; (vii) bargain purchase gain; (viii) accelerated amortization of deferred gain; (ix) payments for dry dock and special survey costs; (x) impairment charges; (xi) gain/ loss on sale of assets; (xii) gain/ (loss) on debt repayment; and (xiii) stock- based compensation. Navios Acquisition believes that EBITDA and Adjusted EBITDA are each the basis upon which liquidity can be assessed and present useful information to investors regarding Navios Acquisition's ability to service and/or incur indebtedness, pay capital expenditures, meet working capital requirements and pay dividends. Navios Acquisition also believes that EBITDA and Adjusted EBITDA are used: (i) by potential lenders to evaluate potential transactions; (ii) to evaluate and price potential acquisition candidates; and (iii) by securities analysts, investors and other interested parties in the evaluation of companies in our industry.

EBITDA and Adjusted EBITDA have limitations as an analytical tool, and should not be considered in isolation or as a substitute for the analysis of Navios Acquisition's results as reported under U.S. GAAP. Some of these limitations are: (i) EBITDA and Adjusted EBITDA do not reflect changes in, or cash requirements for, working capital needs; and (ii) although depreciation and amortization are non-cash charges, the assets being depreciated and amortized may have to be replaced in the future. EBITDA and Adjusted EBITDA do not reflect any cash requirements for such capital expenditures. Because of these limitations, EBITDA and Adjusted EBITDA should not be considered as a principal indicator of Navios Acquisition's performance. Furthermore, our calculation of EBITDA and Adjusted EBITDA may not be comparable to that reported by other companies due to differences in methods of calculation.

Adjusted EBITDA, affected by the items described in the table above, excluded the (i) \$6.0 million net negative effect on equity/ (loss) in net earnings of affiliated companies due to the sale of the Shinyo Kannika by Navios Midstream to an unaffiliated third party; (ii) \$75.7 million loss on revaluation of previously held interest; (iii) \$69.0 million bargain purchase gain; (iv) \$6.8 million accelerated amortization of the deferred gain recognized in relation to the sale of the Nave Celeste and the C. Dream to Navios Midstream in June 2015; (v) \$0.03 million gain on sale of vessel; and (vi) \$1.1 million stock-based compensation expense. Adjusted EBITDA decreased by approximately \$53.1 million to \$54.6 million for the year ended December 31, 2018, as compared to \$107.7 million for the same period of 2017. The decrease in Adjusted EBITDA was mainly due to a: (a) \$39.3 million decrease in revenue, as described above; (b) \$9.7 million increase in time charter and voyage expenses, as described above; (c) \$3.6 million increase in general and administrative expenses (excluding \$1.1 million increase in stock-based compensation); (d) \$2.6 million increase in

other expenses; and (e) \$0.1 million decrease in other income; partially mitigated by a: (i) \$1.2 million increase in equity /(loss) in net earnings of affiliated companies; and (ii) \$1.0 million decrease in management fees.

Adjusted EBITDA, affected by the items described in the table above, excluded the \$59.1 million OTTI loss, as discussed above, and \$0.1 million non-cash stock-based compensation and decreased by approximately \$75.6 million to \$107.7 million for the year ended December 31, 2017, as compared to \$183.3 million for the same period of 2016. The decrease in Adjusted EBITDA was mainly due to a: (a) \$63.0 million decrease in revenue, as described above; (b) \$16.9 million increase in time charter expenses mainly due to the \$16.4 million accrued backstop commitment to Navios Midstream; and (c) \$3.1 million decrease in equity/ (loss) in net earnings of affiliated companies, (excluding the \$59.1 million of non-cash impairment loss on equity investment in Navios Midstream), partially mitigated by a: (i) \$2.3 million decrease in general and administrative expenses (excluding stock-based compensation); (ii) \$2.9 million decrease in management fees, mainly due to the sale of one MR2 product tanker in January 2016 and two chemical tankers in the fourth quarter of 2016; (iii) \$1.4 million decrease in other expense; (iv) \$0.7 million decrease in direct vessel expenses (excluding amortization of dry dock and special survey costs); and (v) \$0.1 million increase in other income (excluding the \$0.4 million gain on debt repayment incurred in 2016).

Long-Term Debt Obligations and Credit Arrangements

Ship Mortgage Notes:

8 1/8% First Priority Ship Mortgages: On November 13, 2013, the Company and its wholly owned subsidiary, Navios Acquisition Finance (US) Inc. (Navios Acquisition Finance and together with the Company, the 2021 Co-Issuers) issued \$610.0 million in first priority ship mortgage notes (the Existing Notes) due on November 15, 2021 at a fixed rate of 8.125%.

On March 31, 2014, the Company completed a sale of \$60.0 million of its first priority ship mortgage notes due in 2021 (the Additional Notes, and together with the Existing Notes, the 2021 Notes). The terms of the Additional Notes are identical to the Existing Notes and were issued at 103.25% plus accrued interest from November 13, 2013.

Table of Contents

The 2021 Notes are fully and unconditionally guaranteed on a joint and several basis by all of Navios Acquisition's subsidiaries with the exception of Navios Acquisition Finance (a co-issuer of the 2021 Notes) and the exception of Navios Midstream subsidiaries.

The 2021 Co-Issuers currently have the option to redeem the 2021 Notes in whole or in part, at a fixed price of 106.094% of the principal amount, which price declines ratably until it reaches par in 2019, plus accrued and unpaid interest, if any.

In addition, upon the occurrence of certain change of control events, the holders of the 2021 Notes will have the right to require the 2021 Co-Issuers to repurchase some or all of the 2021 Notes at 101% of their face amount, plus accrued and unpaid interest to the repurchase date.

The 2021 Notes contain covenants which, among other things, limit the incurrence of additional indebtedness, issuance of certain preferred stock, the payment of dividends, redemption or repurchase of capital stock or making restricted payments and investments, creation of certain liens, transfer or sale of assets, entering in transactions with affiliates, merging or consolidating or selling all or substantially all of the 2021 Co-Issuers' properties and assets and creation or designation of restricted subsidiaries. The 2021 Co-Issuers were in compliance with the covenants as of December 31, 2018.

The Existing Notes and the Additional Notes are treated as a single class for all purposes under the indenture including, without limitation, waivers, amendments, redemptions and other offers to purchase and the Additional Notes rank evenly with the Existing Notes. The Additional Notes and the Existing Notes have the same CUSIP number.

Guarantees

The Company's 2021 Notes are fully and unconditionally guaranteed on a joint and several basis by all of the Company's subsidiaries with the exception of Navios Acquisition Finance (a co-issuer of the 2021 Notes) and the exception of Navios Midstream subsidiaries. The Company's 2021 Notes are unregistered. The guarantees of our subsidiaries that own mortgaged vessels are senior secured guarantees and the guarantees of our subsidiaries that do not own mortgaged vessels are senior unsecured guarantees. All subsidiaries, including Navios Acquisition Finance and Navios Midstream subsidiaries are 100% owned. Navios Acquisition does not have any independent assets or operations.

Credit Facilities

Commerzbank AG, Alpha Bank A.E., and Credit Agricole Corporate and Investment Bank: Navios Acquisition assumed a loan agreement dated April 7, 2010, with Commerzbank AG, Alpha Bank A.E. and Credit Agricole Corporate and Investment Bank of up to \$150.0 million (divided in six equal tranches of \$25.0 million each) to partially finance the construction of two chemical tankers

and four product tankers. Each tranche of the facility is repayable in 12 equal semi-annual installments of \$0.75 million each with a final balloon payment of \$16.0 million to be repaid on the last repayment date. The repayment of each tranche started six months after the delivery date of the respective vessel which that tranche financed. It bears interest at a rate of LIBOR plus 250 bps. The loan also requires compliance with certain financial covenants. On January 27, 2017, Navios Acquisition repaid \$16.0 million being the balloon instalment for another of the remaining five tranches. In April 2018, the Company fully repaid the outstanding balance of \$69.3 million. Following the prepayment, an amount of \$0.02 million was written-off in consolidated statement of operations.

BNP Paribas S.A. Bank and DVB Bank S.E.: Navios Acquisition assumed a loan agreement dated April 8, 2010, of up to \$75.0 million (divided in three equal tranches of \$25.0 million each) to partially finance the purchase price of three product tankers. Each of the tranches is repayable in 12 equal semi-annual installments of \$0.75 million each with a final balloon payment of \$16.0 million to be repaid on the last repayment date. The repayment date of each tranche started six months after the delivery date of the respective vessel which that tranche finances. It bears interest at a rate of LIBOR plus 250 bps. The loan also requires compliance with certain financial covenants. As of December 31, 2018, an amount of \$51.8 million was outstanding.

Eurobank Ergasias S.A.: On October 26, 2010, Navios Acquisition entered into a loan agreement with Eurobank Ergasias S.A. of up to \$52.2 million, of which \$51.6 million has been drawn (divided into two tranches of \$26.1 million and \$25.5 million, respectively) to partially finance the acquisition costs of two LR1 product tanker vessels. Each tranche of the facility is repayable in 32 quarterly installments of \$0.35 million and \$0.34 million, respectively, with a final balloon payment of \$15.1 million and \$14.7 million, respectively, to be repaid on the last repayment date. The repayment of each tranche started three months after the delivery date of the respective vessel. The loan bears interest at a rate of LIBOR plus (i) 250 bps for the period prior to the delivery date in respect of the vessel being financed, and (ii) thereafter 275 bps. The loan also requires compliance with certain financial covenants. The amount of \$32.8 million was outstanding as of December 31, 2018 and it was fully prepaid in March 2019.

Eurobank Ergasias S.A.: On December 6, 2010, Navios Acquisition entered into a loan agreement with Eurobank Ergasias S.A. of up to \$52.0 million out of which \$46.2 million has been drawn (divided into two tranches of \$23.1 million each) to partially finance the acquisition costs of two LR1 product tanker vessels. Each tranche of the facility is repayable in 32 equal quarterly installments of \$0.31 million each with a final balloon payment of \$13.3 million, to be repaid on the last repayment date. The repayment of each tranche started three months after the delivery date of the respective vessel. It bears interest at a rate of LIBOR plus 300 bps. The loan also requires compliance with certain financial covenants. The amount of \$31.2 million was outstanding as of December 31, 2018, under this loan agreement.

Table of Contents

Norddeutsche Landesbank Girozentrale: On December 29, 2011, Navios Acquisition entered into a loan agreement with Norddeutsche Landesbank Girozentrale of up to \$28.1 million to partially finance the purchase price of one MR2 product tanker vessel. The facility is repayable in 32 quarterly installments of \$0.39 million each with a final balloon payment of \$15.6 million to be repaid on the last repayment date. The repayment started three months after the delivery of the vessel and bears interest at a rate of LIBOR plus: (a) up to but not including the drawdown date of, 175 bps per annum; (b) thereafter until, but not including, the tenth repayment date, 250 bps per annum; and (c) thereafter 300 bps per annum. The loan also requires compliance with certain financial covenants. During the first quarter of 2015, the facility was fully drawn and as of December 31, 2018, an amount of \$22.3 million was outstanding under this loan agreement.

DVB Bank S.E. and Credit Agricole Corporate and Investment Bank: On December 29, 2011, Navios Acquisition entered into a loan agreement with DVB Bank SE and Investment Bank of up to \$56.3 million (divided into two tranches of \$28.1 million each) to partially finance the purchase price of two MR2 product tanker vessels. Each tranche of the facility is repayable in 32 quarterly installments of \$0.39 million each with a final balloon payment of \$15.6 million to be repaid on the last repayment date. The repayment started three months after the delivery of the respective vessel and bears interest at a rate of LIBOR plus: (a) up to but not including the drawdown date of, 175 bps per annum; (b) thereafter until, but not including, the tenth repayment date, 250 bps per annum; and (c) thereafter 300 bps per annum. The loan also requires compliance with certain financial covenants. As of December 31, 2018, an amount of \$42.6 million was outstanding.

ABN AMRO Bank N.V.: In February 2017, the Company drew \$26.7 million under this credit facility with ABN AMRO Bank N.V., which was secured with its two chemical tankers, following the full repayment of the previous financing arrangements. The facility was repayable in four equal consecutive quarterly installments of \$0.7 million each, with a final balloon payment of the balance to be repaid on the last repayment date. The loan bore interest at LIBOR plus 400 bps per annum. In June, 2017, the Company prepaid the outstanding balance of \$26.0 and an amount of \$0.7 million was written-off from the deferred finance costs. As of December 31, 2018, there was no outstanding amount under this facility and the loan matured in February 2018.

Deutsche Bank AG Filiale Deutschlandgeschäft and Skandinaviska Enskilda Banken AB: In November 2015, Navios Acquisition, entered into a term loan facility of up to \$125.0 million (divided into five tranches) with Deutsche Bank AG Filiale Deutschlandgeschäft and Skandinaviska Enskilda Banken AB for the: (i) financing of the purchase price of the Nave Spherical; and (ii) the refinancing of the existing facility with Deutsche Bank AG Filiale Deutschlandgeschäft and Skandinaviska Enskilda Banken AB, dated July 18, 2014. Four of the five tranches of the facility are repayable in 20 quarterly installments of between approximately \$0.44 million and \$1.9 million, each with a final balloon repayment to be made on the last repayment date. The fifth tranche is repayable in 16 quarterly installments of between approximately \$0.7 million and \$0.8 million, each. The maturity date of the loan is in the fourth quarter of 2020. The credit facility bears interest at LIBOR plus 295 bps per annum.

On March 23, 2018, Navios Acquisition prepaid \$26.8 million, being the respective tranche of the Deutsche Bank AG Filiale Deutschlandgeschäft and Skandinaviska Enskilda Banken AB facility that was drawn to finance the Nave Equinox and the Nave Pyxis, which substituted the Nave Galactic as collateral vessels under the 8 1/8% 2021 Notes. Following the prepayment, an amount of \$0.3 million was written-off in the consolidated statement of operations. As of December 31, 2018 the outstanding balance under this facility was \$46.8 million.

HSH Nordbank: In June 2017, Navios Acquisition entered into a loan facility for an amount of \$24.0 million to refinance the credit facility with ABN AMRO Bank N.V. of its two chemical tankers. The facility is repayable in 17 equal consecutive quarterly installments of \$0.6 million each, with a final balloon payment of the balance to be repaid on the last repayment date. The facility matures in September 2021 and bears interest at LIBOR plus 300 bps per

annum. As of December 31, 2018, the outstanding balance under this facility was \$20.6 million.

BNP Paribas S.A. Bank: On December 18, 2015, Navios Acquisition, through certain of its wholly owned subsidiaries, entered into a term loan facility agreement of up to \$44.0 million with BNP Paribas, as agent and the lenders named therein, for the partial post-delivery financing of a LR1 product tanker and a MR2 product tanker. The facility is repayable in 12 equal consecutive semi-annual installments in the amount of \$2.0 million in aggregate, with a final balloon payment of \$20.0 million to be repaid on the last repayment date. The maturity date of the loan is in December 2021. The loan bears interest at LIBOR plus 230 bps per annum. As of December 31, 2018, an amount of \$32.0 million was outstanding under this facility.

Amounts drawn under the facilities are secured by first preferred mortgages on Navios Acquisition's vessels and other collateral and are guaranteed by each vessel-owning subsidiary. The credit facilities contain a number of restrictive covenants that prohibit or limit Navios Acquisition from, among other things: incurring or guaranteeing indebtedness; entering into affiliate transactions; changing the flag, class, management or ownership of Navios Acquisition's vessels; changing the commercial and technical management of Navios Acquisition's vessels; selling Navios Acquisition's vessels; and subordinating the obligations under each credit facility to any general and administrative costs relating to the vessels, including the fixed daily fee payable under the management agreement. The credit facilities also require Navios Acquisition to comply with the ISM Code and ISPS Code and to maintain valid safety management certificates and documents of compliance at all times.

Table of Contents**Sale and Leaseback Agreements**

On March 31, 2018, Navios Acquisition entered into a \$71.5 million sale and leaseback agreement with CMB Financial Leasing Co., Ltd to refinance the outstanding balance of the existing facility on four product tankers. Navios Acquisition has a purchase obligation to acquire the vessels at the end of the lease term and under ASC 842-40, the transaction was accounted for as a failed sale. In accordance with ASC 842-40 the Company did not derecognize the respective vessels from its balance sheet and accounted for the amounts received under sale and lease back agreement as a financial liability. The agreement is repayable in 24 equal consecutive quarterly installments of \$1.5 million each, with a repurchase obligation of \$35.8 million on the last repayment date. The agreement matures in April 2024 and bears interest at LIBOR plus 305 bps per annum. In April 2018, the Company drew \$71.5 million under this agreement. As of December 31, 2018, the outstanding balance under this agreement was \$68.5 million and the proceeds net of the deferred finance costs are included within line item Loan proceeds, net of deferred finance costs of the Financing Activities in the consolidated statements of cash flows.

In March and April 2019, Navios Acquisition entered into sale and lease back agreements with AVIC International leasing Co, Ltd for \$103.2 million in order to refinance \$50.3 million outstanding on the existing facility on three product tankers and to finance two product tankers that were previously financed by Eurobank Ergasias S.A. and were fully prepaid in March 2019 by the amount of \$32.2 million. Navios Acquisition has a purchase obligation to acquire the vessels at the end of the lease term and under ASC 842-40, the transaction was determined to be a failed sale. As a result of the refinancing, a result of the refinancing, as of December 31, 2018, \$46.3 million was reclassified from Current portion of long-term debt, net of deferred finance cost to Long term debt, net of current portion, premium and net of deferred finance cost. The facility will be repayable in 28 equal consecutive quarterly installments of \$2.2 million each, with a final balloon payment of \$39.2 million to be repaid on the last repayment date. The facility matures in April 2026 and bears interest at LIBOR plus 350 bps per annum.

Term Loan B

On June 18, 2015, Navios Midstream and Navios Maritime Midstream Partners Finance (US) Inc., as co-borrowers, completed the issuance of the \$205.0 million Term Loan B (the Term Loan B). The Term Loan B is set to mature on June 18, 2020 and is repayable in equal quarterly installments of 0.25% of the initial principal amount of the Term Loan B, beginning on September 18, 2015, with a final payment of the aggregate principal amount of the Term Loan B, plus accrued and unpaid interest, due on the maturity. The Term Loan B bears interest at LIBOR plus 4.50% per annum.

Amounts drawn under the Term Loan B are secured by first preferred mortgages on Navios Midstream's vessels and other collateral and are guaranteed by each vessel-owning subsidiary, with the exception of all the other Navios Acquisition's subsidiaries.

Following the acquisition of the Nave Galactic and the sale of the Shinyo Kannika, the Nave Galactic substituted for the Shinyo Kannika under the Term Loan B.

As of December 31, 2018, a balance of \$197.8 million was outstanding under the Term Loan B.

In March 2019, Navios Midstream sold the following VLCCs to Navios Acquisition: Shinyo Kieran for a price of \$87.5 million, Shinyo Saowalak for a price of \$79.5 million, Nave Celeste for a price of \$28.0 million and the Nave Galactic for a price of \$43.8 million. In addition, the company acquired from Navios Acquisition the following vessels: Nave Orbit for a price of \$18.0 million, Nave Equator for a price of \$18.0 million, Nave Buena Suerte for a price of \$51.3 million, Nave Ariadne for a price of \$16.0 million, Nave Cielo for a price of \$16.0 million, Nave

Atropos for a price of \$30.8 million, Nave Pulsar for a price of \$15.8 million, Nave Equinox for a price of \$15.8 million, Nave Pyxis for a price of \$28.5 million and Bougainville for a price of \$27.0 million. The vessels that were sold were released as collaterals from Term Loan B and were replaced by the ones acquired.

The loan facilities include, among other things, compliance with loan to value ratios and certain financial covenants: (i) minimum liquidity higher of \$40.0 million or \$1.0 million per vessel; (ii) net worth ranging from \$50.0 million to \$135.0 million; and (iii) total liabilities divided by total assets, adjusted for market values to be generally lower than 75% or 80% and for certain facilities, as amended for a specific period of time till December 31, 2018 to be ranging from a maximum of 80% to 85%. It is an event of default under the credit facilities if such covenants are not complied with, including the loan to value ratios for which the Company may provide sufficient additional security to prevent such an event.

The Term Loan B requires maintenance of a loan to value ratio of no greater than 0.85 to 1.0 and a minimum interest coverage ratio of at least 3.75 to 1.0, and other restrictive covenants including restrictions on indebtedness, liens, acquisitions and investments, restricted payments and dispositions. The Term Loan B also provides for excess cash flow prepayments and customary events of default.

As of December 31, 2018, the Company was in compliance with its covenants.

Table of Contents**C. Research and development, patents and licenses, etc.**

Not applicable.

D. Trend information

Our results of operations depend primarily on the charter hire rates that we are able to realize for our vessels, which depend on the demand and supply dynamics characterizing the tanker market at any given time. For other trends affecting our business, please see other discussions in Item 5. Operating and Financial Review and Prospects .

E. Off-Balance Sheet Arrangements

Charter hire payments to third parties for chartered-in vessels are treated as operating leases for accounting purposes. As of December 31, 2018, Navios Acquisition was contingently liable to charter-in certain vessels from Navios Midstream. Please see discussion in Item 5F. Contractual Obligations and Contingencies .

F. Contractual Obligations and Contingencies

The following table summarizes our long-term contractual obligations as of December 31, 2018:

(In thousands of U.S. dollars)	Payments due by period (unaudited) ⁽¹⁾				Total
	Less than 1 year	1-3 years	3-5 years	More than 5 years	
Long-term debt obligations ⁽¹⁾	\$ 52,365	\$ 1,026,924	\$ 73,292	\$ 63,819	\$ 1,216,400
Lease obligations (time charters) for vessels to be delivered ⁽²⁾		\$ 23,037	\$ 33,434	\$ 144,270	\$ 200,741
Total contractual obligations	\$ 52,365	\$ 1,049,961	\$ 106,726	\$ 208,089	\$ 1,417,141

(1) The amount identified does not include interest costs associated with the outstanding credit facilities, which are based on LIBOR, plus the costs of complying with any applicable regulatory requirements and a margin ranging from 230 bps to 450 bps per annum or the \$670.0 million 2021 Notes which have a fixed rate of 8.125%.

(2) In September 2018, Navios Acquisition agreed to a 12-year bareboat charter-in agreement with de-escalating purchase options for two newbuild Japanese VLCCs delivering in the third and fourth quarter of 2020, respectively.

Navios Holdings, Navios Acquisition and Navios Partners have made available to Navios Europe I revolving loans up to \$24.1 million to fund working capital requirements (collectively, the Navios Revolving Loans I). In December 2018, the availability under the Revolving Loans I was increased by \$30.0 million. As of December 31, 2018, the amount undrawn under the Navios Revolving Loans I was \$12.0 million, of which Navios Acquisition may be required to fund an amount ranging from \$0 to \$12.0 million. See Note 17 for the investment in Navios Europe I.

Navios Holdings, Navios Acquisition and Navios Partners have made available to Navios Europe II revolving loans up to \$57.5 million to fund working capital requirements (collectively, the Navios Revolving Loans II). As of December 31, 2018, the amount undrawn under the Navios Revolving Loans II was \$4.5 million, of which Navios

Acquisition may be required to fund an amount ranging from \$0 to \$4.5 million. See Note 17 for the investment in Navios Europe II.

On November 18, 2014, Navios Acquisition entered into backstop agreements with Navios Midstream. In accordance with the terms of the backstop agreements, Navios Acquisition has provided backstop commitments for a two-year period as of the redelivery of each of the Nave Celeste, the Shinyo Ocean and the Shinyo Kannika from their original charters, at a net rate of \$35,000, \$38,400 and \$38,025, respectively. Navios Midstream has currently entered into new charter contracts for the above vessels with third parties upon their redelivery in first quarter of 2017. Those contracts provide for index linked charter rates or pool earnings as the case may be. Backstop commitments will be triggered if the actual rates achieved are below the backstop rates. Please refer to Related Party Transactions .

The backstop commitment for Shinyo Kannika terminated following the sale of this vessel in March 2018. Navios Acquisition agreed to extend the backstop commitment of the Shinyo Kannika to the Nave Galactic, following the sale of the latter to Navios Midstream in March 2018.

In January and February 2019, all Backstop Agreements expired pursuant to their initial terms.

Navios Acquisition leases office space in Monaco pursuant to a five year lease agreement, dated July 1, 2018, that expires in June 2023, for a monthly rent of approximately \$0.01 million.

On September 19, 2016, Navios Acquisition entered into a \$70.0 million secured loan facility with Navios Holdings. Please refer to the relevant discussion below, under Related Party Transactions .

Table of Contents**Critical Accounting Policies**

Our consolidated financial statements have been prepared in accordance with U.S. GAAP. The preparation of these financial statements requires us to make estimates in the application of our accounting policies based on the best assumptions, judgments and opinions of management. Following is a discussion of the accounting policies that involve a higher degree of judgment and the methods of their application that affect the reported amount of assets and liabilities, revenues and expenses and related disclosure of contingent assets and liabilities at the date of our financial statements. Actual results may differ from these estimates under different assumptions or conditions.

Critical accounting policies are those that reflect significant judgments or uncertainties, and potentially result in materially different results under different assumptions and conditions. For a description of all of our significant accounting policies, see Note 2 to the Consolidated Financial Statements, included herein.

Fair Value of Vessels: As of December 31, 2018, Navios Acquisition owned and operated a fleet of 41 vessels, with an aggregate carrying value of \$1,452.2 million, including the unamortized portion of deferred drydock and special survey costs related to the vessel and intangible assets. On a vessel-by-vessel basis, as of December 31, 2018, the carrying value of 29 of Navios Acquisition's vessels (including the unamortized portion of deferred drydock and special survey costs and intangible assets related to the vessel) exceeds the estimated fair value of those same vessels by approximately \$174.4 million in the aggregate (the unrealized loss).

As of December 31, 2017, Navios Acquisition owned and operated a fleet of 36 vessels, with an aggregate carrying value of \$1,271.0 million, including the unamortized portion of deferred drydock and special survey costs related to the vessel. On a vessel-by-vessel basis, as of December 31, 2017, the carrying value of 30 of Navios Acquisition's vessels (including the unamortized portion of deferred drydock and special survey costs related to the vessel) exceeds the estimated fair value of those same vessels by approximately \$154.3 million in the aggregate (the unrealized loss).

A vessel-by-vessel summary as of December 31, 2018 follows (with an * indicating those individual vessels whose carrying value exceeds its estimated fair value, including the related time charter, if any):

Vessel name	Date of Acquisition	Purchase Price	Carrying Value as of December 31, 2018
(In millions of U.S. dollars)			
Nave Cielo	6/29/2010	\$ 43.7	\$ 31.1*
Nave Ariadne	7/2/2010	\$ 43.7	\$ 29.6*
Nave Cosmos	10/27/2010	\$ 31.8	\$ 22.7*
Nave Polaris	1/27/2011	\$ 31.8	\$ 23.0*
Nave Orbit	7/12/2011	\$ 42.5	\$ 26.6*
Nave Equator	7/18/2011	\$ 42.4	\$ 26.6*
Nave Andromeda	11/14/2011	\$ 44.3	\$ 33.8*
Nave Estella	1/20/2012	\$ 44.6	\$ 33.6*

Although the aforementioned excess of carrying value over fair value represents an estimate of the loss that Navios Acquisition would sustain on a hypothetical disposition of those vessels as of December 31, 2018, the recognition of the unrealized loss absent a disposition (i.e., as an impairment) would require, among other things, that a triggering event had occurred and that the undiscounted cash flows attributable to the vessel are also less than the carrying value of the vessel (including the unamortized portion of deferred drydock and special survey costs related to the vessel).

Use of Estimates: The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the dates of the financial statements and the reported amounts of revenues and expenses during the reporting periods. On an on-going basis, management evaluates the estimates and judgments, including those related to uncompleted voyages, future drydock dates, the selection of useful lives for tangible assets and scrap value expected future cash flows from long-lived assets to support impairment tests, provisions necessary for accounts receivable, provisions for legal disputes, and contingencies and the valuation estimates inherent in the deconsolidation gain. Management bases its estimates and judgments on historical experience and on various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results could differ from those estimates under different assumptions and/or conditions.

Vessels, Net: Vessels are stated at historical cost, which consists of the contract price, delivery and acquisition expenses and capitalized interest costs while under construction. Vessels acquired in an asset acquisition or in a business combination are recorded at fair value. Subsequent expenditures for major improvements and upgrading are capitalized, provided they appreciably extend the life, increase the earning capacity or improve the efficiency or safety of the vessels. Expenditures for routine maintenance and repairs are expensed as incurred.

Depreciation is computed using the straight line method over the useful life of the vessels, after considering the estimated residual value. Management estimates the residual values of our tanker vessels based on a scrap value cost of steel times the weight of the ship noted in lightweight ton (LWT). Residual values are periodically reviewed and revised to recognize changes in conditions, new regulations or other reasons. Revisions of residual values affect the depreciable amount of the vessels and affects depreciation expense in the period of the revision and future periods. The management after considering current market trends for scrap rates and 10-year average historical scrap rates of

the residual values of the Company's vessels, estimates scrap value at a rate of \$360 per LWT. Management estimates the useful life of our vessels to be 25 years from the vessel's original construction. However, when regulations place limitations over the ability of a vessel to trade on a worldwide basis, its useful life is re-estimated to end at the date such regulations become effective.

Impairment of long-lived Asset Group: Vessels, other fixed assets and other long-lived assets held and used by Navios Acquisition are reviewed periodically for potential impairment whenever events or changes in circumstances indicate that the carrying amount of a particular asset may not be fully recoverable. Navios Acquisition's management evaluates the carrying amounts and periods over which long-lived assets are depreciated to determine if events or changes in circumstances have occurred that would require modification to their carrying values or useful lives. In evaluating useful lives and carrying values of long-lived assets, certain indicators of potential impairment are reviewed such as, undiscounted projected operating cash flows, vessel sales and purchases, business plans and overall market conditions.

Table of Contents

Undiscounted projected net operating cash flows are determined for each asset group and compared to the carrying value of the vessel, the unamortized portion of deferred dry-dock and special survey costs and related carrying value of the intangible with respect to the time charter agreement attached to that vessel or the carrying value of deposits for newbuildings; if any. Within the shipping industry, vessels are often bought and sold with a charter attached. The value of the charter may be favorable or unfavorable when comparing the charter rate to then current market rates. The loss recognized either on impairment (or on disposition) will reflect the excess of carrying value over fair value (selling price) for the vessel individual asset group.

During the fourth quarter of fiscal 2018, management concluded that, market rates decreased during the year and events occurred and circumstances had changed, over previous years, which indicated the potential impairment of Navios Acquisition's long-lived assets may exist. These indicators included continued volatility in the charter market and the related impact of the tanker sector has on management's expectation for future revenues. As a result, an impairment assessment of long-lived assets or identified asset groups was performed. Management assessment concluded that there were no impairment indicators of the Navios Midstream long-lived assets that were acquired on December 13, 2018 due to the short period from the acquisition date through December 31, 2018.

The Company determined undiscounted projected net operating cash flows for each vessel and compared it to the vessel's carrying value together with the unamortized portion of deferred dry-dock and special survey costs and the carrying value of the related intangible, if applicable. The significant factors and assumptions used in the undiscounted projected net operating cash flow analysis included: determining the projected net operating cash flows by considering the charter revenues from existing time charters for the fixed fleet days (Company's remaining charter agreement rates) and an estimated daily time charter equivalent for the unfixed days (based on the 10-year average historical one year time charter rates) over the remaining economic life of each vessel, net of brokerage and address commissions, excluding days of scheduled off-hires, management fees fixed until May 2020 and thereafter assuming an annual increase of 3.0% and utilization rate of 99.5% based on the fleets historical performance.

We determine projected cash flows for unfixed days using an estimated daily time charter rate based on the 10-year historical average (of the one-year charter rate for similar vessels or the 10-year average spot rate for chemical tankers since the 10-year average rates of a one-year time charter are not available for chemical tankers). We consider this approach to be reasonable and appropriate. However, for the purposes of presenting our investors with additional information to determine how the Company's future results of operations may be impacted, we set forth below an analysis that shows the five-year, three-year and one-year historical averages (of the one-year charter rate for similar vessels or the average spot rate for chemical tankers) in lieu of the 10-year historical average (of the one-year charter rate for similar vessels or the average spot rate for chemical tankers) and the effect the use of each of these rates would have on the Company's impairment analysis.

	December 31, 2018		December 31, 2017	
	Number of	Amount (U.S.	Number of	Amount (U.S.
	vessels	millions)	vessels	millions)
	(*)	(**)	(*)	(**)
5-year historical average rate				
3-year historical average rate	11	21.1		
1-year historical average rate	21	148.4	21	146.0

(*) Number of vessels the carrying value of which would not have been recovered.

(**) Aggregate carrying value that exceeds the estimated fair value (the unrealized loss).

In connection with its impairment testing on its vessels as of December 31, 2018, the Company performed sensitivity analysis on the most sensitive and/or subjective assumptions that have the potential to affect the outcome of the test, principally the projected charter rate used to forecast future cash flow for unfixed days. In that regard, there would continue to be no impairment required to be recognized on any of the Company's vessels when assuming a decline in the 10-year average (of the one-year charter rate for similar vessels), which is the rate that the Group uses to forecast future cash flows for unfixed days, ranging from 3.0% to 39.0%, excluding the vessels of Navios Midstream (depending on the vessel).

In addition, the Company compared the 10-year historical average (of the one-year charter rate for similar vessels) with the five-year historical average (of the one-year charter rate for similar vessels), three-year historical average (of the one-year charter rate for similar vessels), and one-year average (for similar vessels). The table below compares the 10-year historical average and the rates for five-year, three-year and one-year historical average, each as of December 31, 2018:

Table of Contents

	Historical Average of One-year Charter Rates (over Various Periods) vs. the 10-year Historical Average (of the One-Year Charter Rate)		
	5-Year Average	3-Year Average	1-Year Average
	(% above/ (below) the 10-year average)		
Chemicals	7.5%	(20.3%)	(16.8%)
MR2s	2.7%	(3.9%)	(8.7%)
LR1s	3.0%	(9.2%)	(20.2%)
VLCCs	6.0%	(6.1%)	(25.6%)

As disclosed elsewhere, the fleet includes 29 vessels for which the carrying value exceeds the estimated fair value of those same vessels by approximately \$174.4 million in the aggregate (the unrealized loss). If testing for impairment using historical rates for five-year historical average of the one-year charter rate (for similar vessels), in lieu of the 10-year historical average (of the one-year charter rate for similar vessels), the Company estimates that none of its vessels, would have carrying values in excess of their projected undiscounted future cash flows. If testing for impairment using historical rates for three year and one-year charters historical average (of the one-year charter rate for similar vessels) in lieu of the 10-year historical average (of the one-year charter rate for similar vessels), the Company estimates that 11 and 21 of its vessels, respectively would have carrying values in excess of their projected undiscounted future cash flows.

The assessment concluded that step two of the impairment analysis was not required and no impairment of vessels, existed as of December 31, 2018, as the undiscounted projected net operating cash flows exceeded the carrying value.

In the event that impairment would occur, the fair value of the related asset would be determined and a charge would be recognized in the statements of operations calculated by comparing the asset's carrying value to its fair value. Fair value is estimated primarily through the use of third-party valuations performed on an individual vessel basis.

Although management believes the underlying assumptions supporting this assessment are reasonable, if charter rate trends and the length of the current market downturn vary significantly from our forecasts, management may be required to perform step two of the impairment analysis in the future that could expose Navios Acquisition to material impairment charges in the future.

There was no impairment loss recognized for the years ended December 31, 2018, 2017 and 2016.

Revenue Recognition: On January 1, 2018, the Company adopted the provisions of ASC 606, *Revenue from Contracts with Customers* (ASC 606). The guidance provides a unified model to determine how revenue is recognized. In doing so, the Company makes judgments including identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price, and allocating the transaction price to each performance obligation. Revenue is recognized when (or as) the Company transfers promised goods or services to its customers in amounts that reflect the consideration to which the company expects to be entitled to in exchange for those goods or services, which occurs when (or as) the Company satisfies its contractual obligations and transfers control of the promised goods or services to its customers. Revenues are recognized to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In determining the appropriate amount of revenue to be recognized as it fulfills its obligations under its agreements, the Company performs the following steps: (i) identification of the promised

goods or services in the contract; (ii) determination of whether the promised goods or services are performance obligations, including whether they are distinct in the context of the contract; (iii) measurement of the transaction price, including the constraint on variable consideration; (iv) allocation of the transaction price to the performance obligations based on estimated selling prices; and (v) recognition of revenue when (or as) the Company satisfies each performance obligation.

The Company's contract revenues from time chartering and pooling arrangements are governed by ASU 2016-02 Leases. Upon adoption of ASC 606 and ASC 842, the timing and recognition of earnings from the pool arrangements and time charter contracts to which the Company is party did not change from previous practice. The Company has determined to recognize lease revenue as a combined single lease component for all time charters (operating leases) as the related lease component and non lease component will have the same timing and pattern of the revenue recognition of the combined single lease component. The performance obligations in a time charter contract are satisfied over term of the contract beginning when the vessel is delivered to the charterer until it is redelivered back to the Company. As a result of the adoption of these standards, there was no effect on the Company's opening retained earnings, consolidated balance sheets and consolidated statements of operations.

Revenue from time chartering

Revenues from time chartering of vessels are accounted for as operating leases and are thus recognized on a straight-line basis as the average revenue over the rental periods of such charter agreements, as service is performed. A time charter involves placing a vessel at the charterers' disposal for a period of time during which the charterer uses the vessel in return for the payment of a specified daily hire rate. Under time charters, operating costs such as for crews, maintenance and insurance are typically paid by the owner of the vessel. Revenues from time chartering of vessels were \$122.2 million, \$177.7 million and \$231.4 million for the years ended December 31, 2018, 2017 and 2016 respectively.

Table of Contents*Pooling arrangements*

For vessels operating in pooling arrangements, the Company earns a portion of total revenues generated by the pool, net of expenses incurred by the pool. The amount allocated to each pool participant vessel, including the Company's vessels, is determined in accordance with an agreed-upon formula, which determines the margins awarded to each vessel in the pool based on the vessel's age, design and other performance characteristics. Revenue under pooling arrangements is accounted for as variable rate operating leases on the accrual basis and is recognized in the period in which the variability is resolved. The Company recognizes net pool revenue on a monthly and quarterly basis, when the vessel has participated in a pool during the period and the amount of pool revenue can be estimated reliably based on the pool report. The allocation of such net revenue may be subject to future adjustments by the pool however, such changes are not expected to be material. Revenue for vessels operating in pooling arrangements amounted to \$53.0 million, \$46.6 million and \$50.8 million, for the years ended December 31, 2018, 2017 and 2016, respectively.

Revenue from voyage contracts

The Company's revenues earned under voyage contracts (revenues for the transportation of cargo) were previously recognized ratably over the estimated relative transit time of each voyage. A voyage was deemed to commence when a vessel was available for loading and was deemed to end upon the completion of the discharge of the current cargo. Under a voyage charter, a vessel is provided for the transportation of specific goods between specific ports in return for payment of an agreed upon freight per ton of cargo. Upon adoption of ASC 606, the Company recognizes revenue ratably from port of loading to when the charterer's cargo is discharged as well as defer costs that meet the definition of costs to fulfill a contract and relate directly to the contract. For the years ended December 31, 2018, 2017, and 2016 revenues under voyage contracts were \$11.6 million, \$2.1 million, and \$0.4 million respectively. Capitalized costs as of December 31, 2018 related to costs to fulfill the contract amounted to \$0.5 million, as compared to \$0 for the same period in 2017, and are included under caption Prepaid expenses and other current assets. Accounts receivable, net, as of December 31, 2018 that related to voyage contracts is \$7.3 million (December 31, 2017: \$0.1 million). The majority of revenue from voyage contracts is usually collected after the discharging takes place.

Revenue from profit sharing

Profit-sharing revenues are calculated at an agreed percentage of the excess of the charterer's average daily income (calculated on a quarterly or half-yearly basis) over an agreed amount and accounted for on an accrual basis based on provisional amounts and for those contracts that provisional accruals cannot be made due to the nature of the profit share elements, these are accounted for on the actual cash settlement. Profit sharing for the years ended December 31, 2018, 2017 and 2016 amounted to \$1.1 million, \$0.9 million and \$7.6 million, respectively.

Revenues are recorded net of address commissions. Address commissions represent a discount provided directly to the charterers based on a fixed percentage of the agreed upon charter or freight rate. Since address commissions represent a discount (sales incentive) on services rendered by the Company and no identifiable benefit is received in exchange for the consideration provided to the charterer, these commissions are presented as a reduction of revenue.

Investments in Equity Securities: Navios Acquisition evaluates its equity method investments, for other than temporary impairment, on a quarterly basis. Consideration is given to (1) the length of time and the extent to which the fair value has been less than the carrying value, (2) the financial condition and near-term prospects and (3) the intent and ability of the Company to retain its investments for a period of time sufficient to allow for any anticipated recovery in fair value.

Navios Acquisition considers whether the fair values of its equity method investments have declined below their carrying values whenever adverse events or changes in circumstances indicate that the carrying value may not be recoverable. If we consider any such decline to be other-than-temporary (based on various factors, including historical financial results, economic and industry events resulting in changes in the affiliate's trading performance and the overall health of the affiliate's industry), then we would write down the carrying amount of the investment to its estimated fair value.

On December 13, 2018, Navios Acquisition completed the Merger contemplated by the previously announced Merger Agreement, dated as of October 7, 2018, by and among Navios Acquisition, Merger Sub, Navios Midstream and NAP General Partner. Pursuant to the Merger Agreement, Merger Sub merged with and into Navios Midstream, with Navios Midstream surviving as a wholly-owned subsidiary of Navios Acquisition.

Pursuant to the terms of the Merger Agreement, each outstanding common unit representing limited partner interests in Navios Midstream held by a common unit holder other than Navios Acquisition, Navios Midstream or their respective subsidiaries (the "NAP Public Units") was converted into the right to receive 0.42 shares of NNA common stock. As a result of the Merger, 3,683,284 shares of NNA common stock were issued to former holders of NAP Public Units.

As of December 13, 2018 the book value of the investment in Navios Midstream was \$107.2 million and the market value of the investment was \$31.5 million, resulting in a loss of \$75.7 million.

Table of Contents**Recent Accounting Pronouncements**

In August 2018, FASB issued ASU 2018-13, Fair Value Measurement (Topic 820): Disclosure Framework-Changes to the Disclosure Requirements for Fair Value Measurement . This update modifies the disclosure requirements on fair value measurements. ASU 2018-13 is effective for fiscal years beginning after December 15, 2019, and earlier adoption is permitted.

In October 2018, FASB issued ASU 2018-17, Consolidation (Topic 810): Targeted Improvements to Related Party Guidance for Variable Interest Entities (ASU 2018-17). ASU 2018-17 provides that indirect interests held through related parties in common control arrangements should be considered on a proportional basis for determining whether fees paid to decision makers and service providers are variable interests. This is consistent with how indirect interests held through related parties under common control are considered for determining whether a reporting entity must consolidate a Variable Interest Entity (VIE). For Public business entities the amendments are effective for fiscal years beginning after December 15, 2019, and interim periods within those fiscal years. Early adoption is permitted.

In June 2016, FASB issued ASU 2016-13, Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. This standard requires entities to measure all expected credit losses of financial assets held at a reporting date based on historical experience, current conditions, and reasonable and supportable forecasts in order to record credit losses in a more timely matter. ASU 2016-13 also amends the accounting for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration. The standard is effective for interim and annual reporting periods beginning after December 15, 2019, although early adoption is permitted for interim and annual periods beginning after December 15, 2018. In November 2018, FASB issued ASU 2018-19 Codification Improvements to topic 326, Financial Instruments-Credit Losses . The amendments in this update clarify that operating lease receivables are not within the scope of ASC 326-20 and should instead be accounted for under the new leasing standard, ASC 842.

The Company is currently assessing the impact of the aforementioned accounting guidance will have on its consolidated financial statements.

Item 6. Directors, Senior Management and Employees**A. Directors and Senior Management**

Set forth below are the names, ages and positions of Navios Acquisition's directors, executive officers and key employees.

Name	Age	Position
Angeliki Frangou	54	Chairman, Chief Executive Officer and Director
Leonidas Korres	43	Co- Chief Financial Officer
Erifili Tsironi	44	Co- Chief Financial Officer
Vasiliki Papaefthymiou	50	Secretary
Anna Kalathakis	49	Director, Senior Vice President Legal Risk Management
George Galatis	56	Director
Brigitte Noury	72	Director
Ted C. Petrone	64	Director

Nikolaos Veraros, CFA	49	Director
Eleni Warren	70	Director
Christos Kokkinis	67	Director

Angeliki Frangou has been our Chairman and Chief Executive Officer since our inception. Ms. Frangou has also been Chairman and CEO of Navios Holdings (NYSE: NM) our sponsor since August 2005. In addition, Ms. Frangou has been the Chairman and Chief Executive Officer of Navios Partners (NYSE: NMM), an affiliated limited partnership, since August 2007, and the Chairman and Chief Executive Officer of Navios Containers (Nasdaq: NMCI), an affiliated limited partnership, since April 2017. Ms. Frangou has been the Chairman of the Board of Directors of Navios South American Logistics Inc. since its inception in December 2007. Ms. Frangou is the Chairman of IRF European Finance Investments Ltd., listed on the SFM of the London Stock Exchange, and is also a Member of the Board of the United Kingdom Mutual Steam Ship Assurance Association (Bermuda) Limited. Since 2015, she has also been a Board Member of the Union of Greek Shipowners, as well as on the Board of Trustees of Fairleigh Dickinson University. Since 2013, Ms. Frangou has been a Member of the Board of Visitors of the Columbia University School of Engineering and Applied Science. Ms. Frangou also acts as Vice Chairman of the China Classification Society Mediterranean Committee, and is a member of the International General Committee and of the Hellenic and Black Sea Committee of Bureau Veritas, and is also a member of the Greek Committee of Nippon Kaiji Kyokai. Ms. Frangou received a bachelor's degree in Mechanical Engineering, summa cum laude, from Fairleigh Dickinson University and a master's degree in Mechanical Engineering from Columbia University.

Table of Contents

Leonidas Korres has been our Chief Financial Officer since April 2010 and Co-Chief Financial Officer following the completion of the merger between Navios Maritime Acquisition Corporation and Navios Maritime Midstream Partners L.P. Mr. Korres also serves as Senior Vice President for Business Development of Navios Holdings from January 2010 and Head of Research of Navios Group since January 2018. Mr. Korres served as the Special Secretary for Public Private Partnerships in the Ministry of Economy and Finance of the Hellenic Republic from October 2005 until November 2009. Prior to that, from April 2004 to October 2005, Mr. Korres served as Special Financial Advisor to the Minister of Economy and Finance of the Hellenic Republic and as liquidator of the Organizational Committee for the Olympic Games Athens 2004 S.A. From 2001 to 2004, Mr. Korres worked as a senior financial advisor for KPMG Corporate Finance. From October 2007 until January 2010, Mr. Korres was a member of the board of directors of Navios Partners. From May 2003 to December 2006, Mr. Korres was Chairman of the Center for Employment and Entrepreneurship, a non-profit company. From June 2008 until February 2009, Mr. Korres served as a board member and audit committee member of Hellenic Telecommunications Organization S.A. (trading on the Athens Stock Exchange and the New York Stock Exchange). From June 2004 until November 2009, Mr. Korres served on the board of Hellenic Olympic Properties S.A., which was responsible for operating the Olympic venues. Mr. Korres earned his bachelor's degree in Economics from the Athens University of Economics and Business and his master's degree in Finance from the University of London.

Erifili Tsironi has been our Senior Vice President – Credit Management since October 2014. Following the completion of the merger between Navios Maritime Acquisition Corporation and Navios Maritime Midstream Partners L.P., Ms. Tsironi has been appointed as Co-Chief Financial Officer of Navios Maritime Acquisition Corporation. She previously served as Chief Financial Officer of Navios Maritime Midstream Partners L.P from its inception in 2014 until the completion of the merger. Ms. Tsironi has over 17 years experience in banking focusing on ship finance. Before joining us, she was Global Dry Bulk Sector Coordinator and Senior Vice President at DVB Bank SE. Ms. Tsironi joined the Bank in 2000 serving as Assistant Local Manager and Senior Relationship Manager. Previously, she served as account manager in ANZ Investment Bank / ANZ Grindlays Bank Ltd from May 1997 until December 1999. Ms. Tsironi holds a BSc. in Economics, awarded with Honours, from the London School of Economics and Political Science and a MSc in Shipping, Trade and Finance, awarded with Distinction, from Cass Business School of City University in London.

Vasiliki Papaefthymiou has been our Secretary since our inception. Ms. Papaefthymiou has also served as Navios Holdings' Executive Vice President – Legal and a member of its Board of Directors since August 25, 2005, and prior to that was a member of the Board of Directors of ISE. Ms. Papaefthymiou has also served as General Counsel for Maritime Enterprises Management S.A. since October 2001, where she has advised the company on shipping, corporate and finance legal matters. Ms. Papaefthymiou provided similar services as General Counsel to Franser Shipping from October 1991 to September 2001. Ms. Papaefthymiou received her undergraduate degree from the Law School of the University of Athens and a master's degree in maritime law from Southampton University in the United Kingdom. Ms. Papaefthymiou is admitted to practice law before the Bar in Piraeus, Greece.

Anna Kalathakis has been a member of our Board of Directors and Senior Vice President – Legal Risk Management since May 2010. Ms. Kalathakis has been Chief Legal Risk Officer since November 2012 and Senior Vice President Legal Risk Management of Navios Holdings from December 2005 until October 2012. Before joining Navios Holdings, Ms. Kalathakis was the General Manager of the Greek office of A Bilbrough & Co. Ltd. (Managers of the London Steam-Ship Owners' Mutual Insurance Association Limited, the London P&I Club) and an Associate Director of the London P&I Club where she gained experience in the handling of liability and contractual disputes in both the dry and tanker shipping sectors (including collisions, oil pollution incidents, groundings, etc.). She previously worked for a U.S. maritime law firm in New Orleans, having qualified as a lawyer in Louisiana in 1995, and also served in a similar capacity for a London maritime law firm. She qualified as a solicitor in England and Wales in 1999 and was admitted to the Piraeus Bar in Greece in 2003. She received a bachelor's degree in International Relations from

Georgetown University; she holds a Master of Business Administration degree from European University in Brussels; and a Juris Doctor degree from Tulane Law School.

George Galatis has served as a member of our Board of Directors since July 2010. He is currently the Executive Vice President Product Development at Demo Pharmaceutical Industry having served as a Senior Vice President Project Development since 1999. Mr. Galatis also served as a technical manager in Pharmaceutical Industry Projects at Telos Consulting Ltd. of London from 1994 to 1999. Previously, Mr. Galatis served as an engineer, technical manager and product manager at various shipping companies in the United States and the U.K. Mr. Galatis is a mechanical engineer and holds a bachelor's degree in Mechanical Engineering and master's degree in robotics from the University of Newcastle upon Tyne. Mr. Galatis is also a member of our Nominating Committee and is an independent director.

Brigitte Noury has been a member of our Board of Directors since May 2010. Ms. Noury served from March 2002 until December 2009 as Director of Corporate & Investment Banking Asset & Recovery Management Europe for Societe Generale. She also served from June 1989 until February 2002 as Head of Shipping at Societe Generale. In addition, she served as Vice President Shipping at Banque Indosuez from 1987 to 1989. Before that Ms. Noury served as Financial Controller at Banque Internationale pour l'Afrique Occidentale (later acquired by BNP Paribas). Ms. Noury received a master's degree in Economic Sciences and a diploma in Business Administration from the University of Dijon. Ms. Noury is also a member of our Audit Committee and Nominating Committee and is an independent director.

Table of Contents

Ted C. Petrone has been a member of our Board of Directors since our inception and was our President from our inception until December 2014. He has also been a director of Navios Holdings since May 2007, and served as President of Navios Corporation from September 2006 until December 2014. He currently serves as Navios Corporation's Vice Chairman, a position he has held since December 2014. Mr. Petrone has served in the maritime industry for 42 years, 38 of which he has spent with Navios Holdings. After joining Navios Holdings as an assistant vessel operator, Mr. Petrone worked there in various operational and commercial positions. Mr. Petrone was previously responsible for all the aspects of the daily commercial activity, encompassing the trading of tonnage, derivative hedge positions and cargoes. Mr. Petrone graduated from New York Maritime College at Fort Schuyler with a bachelor in science degree in maritime transportation. He has also served aboard U.S. Navy (Military Sealift Command) tankers.

Nikolaos Veraros, CFA, has been a member of our Board of Directors since June 2008. Mr. Veraros has over 18 years of experience in shipping finance and currently serves as a financial consultant to various shipping companies. He has also worked as a senior equity analyst for National Securities, S.A., a subsidiary of National Bank of Greece. Mr. Veraros is a Chartered Financial Analyst (CFA), a Certified Market Maker for Derivatives in the Athens Stock Exchange, and a Certified Analyst from the Hellenic Capital Market Commission. He is currently part time lecturer of shipping finance at King's College of the University of London. Mr. Veraros received his bachelor of science degree in business administration from the Athens University of Economics and Business, from which he graduated as valedictorian, and his master of business administration degree in Finance and Accounting from the William E. Simon Graduate School of Business Administration at the University of Rochester. Mr. Veraros is also the Chairman of our Audit Committee and is an independent director.

Eleni Warren has served as a member of our Board of Directors since June 2017. She is a lawyer by training with more than 35 years of experience in banking and financial services. Mrs. Warren joined V&P Law Firm (the predecessor to the firm now known as PPT Legal) in 1986, where she was partner from 2011 until April 2017. From 1986 Mrs. Warren was in-house legal advisor of Credit Commercial de France S.A., Athens. She was also the head of the Compliance Department of that bank for several years, overseeing compliance with the basic principles and criteria applicable to credit and financial institutions supervised by the Bank of Greece and with the internal rules applied by the Head Office of HSBC France (ex Credit Commercial de France S.A.). From 1981 to 2017, Mrs. Warren was a member of the Athens Bar. She obtained her law degree from the Law School of the University of Athens and also holds a bachelor degree in Political Sciences from Athens Pantion University. Mrs. Warren is an independent director.

Christos Kokkinis has over 35 years of experience in ship finance and he is currently an independent consultant on shipping financial matters and a Board member of the Onassis Cardiac Surgery Center. He spent 19 years at Alpha Bank, having established and served as the Head of the Shipping Division since 1997. Previously, he worked in Citibank Shipping Bank S.A. from where he left as Vice President to join ABN AMRO Bank, where he held the position of the Manager of Shipping Finance from 1991 until 1997. He served on the board of Navios Maritime Midstream Partners L.P. as a non-executive director from October 2014 until December 2018. Mr. Kokkinis holds a bachelor's degree from the Law School of the University of Athens and a master's degree in Business Administration (M.B.A.) in finance and international business from Rutgers University, USA.

B. Compensation

Compensation

Our independent directors are entitled to receive \$50,000 in cash per year, from the respective start of their service on our Board of Directors. Ms. Frangou receives a fee of \$150,000 per year for acting as a director and as our Chairman of the Board. No other executive officer has received any cash compensation for services rendered.

For the year ended December 31, 2018 the compensation paid, in the aggregate, to our executive officers and directors was \$0.4 million.

In December 2018, Navios Acquisition authorized and issued in the aggregate 129,269 restricted shares of common stock to its directors and officers. These awards of restricted common stock are based on service conditions only and vest over four years.

As of December 31, 2018 the amount of \$2.0 million was included in accrued legal and professional fees that was authorized and approved by the Compensation Committee of Navios Acquisition in December 2018 to the directors and officers of the Company, subject to fulfillment of certain service conditions that were provided and completed as of December 31, 2018. The total amount of \$3.9 million was recorded in general and administrative expenses on the statements of operations for the years ended December 31, 2018.

C. Board Practices

Board Classes

Our Board of Directors is divided into three classes with only one class of directors being elected in each year and each class serving a three-year term. The term of office of the second class of directors, currently consisting of Ted C. Petrone, Nikolaos Veraros and Christos Kokkinis, will expire at our 2019 annual meeting of stockholders. The term of office of the third class of directors, consisting of Angeliki Frangou and Anna Kalathakis, will expire at our 2020 annual meeting of stockholders. The term of office of the first class of directors, consisting of George Galatis, Brigitte Noury, and Eleni Warren, will expire at our 2021 annual meeting of stockholders, as their term was renewed for three years at our 2018 annual meeting.

Table of Contents

Director Independence

Our Board of Directors has determined that Messrs. Veraros, Galatis, Kokkinis, Ms. Noury and Ms. Warren are independent directors as defined in the NYSE listing standards and Rule 10A-3 of the Exchange Act. We will always seek to have a board of directors comprising of a majority of independent directors.

Board committees

Our Board of Directors has an audit committee, a nominating committee and a compensation committee. Our Board of Directors has adopted a charter for the audit committee as well as a code of conduct and ethics that governs the conduct of our directors and officers. From time to time the Board may create special committees to address particular situations or transactions, such as potential conflict of interest transactions that may arise with our affiliated companies. The members' duration and powers of any special committee will be as established by the Board as appropriate for the particular situation or transaction.

Audit committee

Our audit committee consists of Mr. Veraros, Mr. Kokkinis and Ms. Noury. Each member of our audit committee is financially literate under the current listing standards of the NYSE, and our Board of Directors has determined that Mr. Veraros qualifies as an audit committee financial expert, as such term is defined by SEC rules.

The audit committee reviews the professional services and independence of our independent registered public accounting firm and our accounts, procedures and internal controls. The audit committee also selects our independent registered public accounting firm, reviews and approves the scope of the annual audit, reviews and evaluates with the independent public accounting firm our annual audit and annual consolidated financial statements, reviews with management the status of internal accounting controls, evaluates problem areas having a potential financial impact on us that may be brought to the committee's attention by management, the independent registered public accounting firm or the board of directors, and evaluates all of our public financial reporting documents.

Any expense reimbursements payable to members of our audit committee are reviewed and approved by our Board of Directors, with the interested director or directors abstaining from such review and approval.

Nominating committee

A nominating committee of the board of directors has been established, which consists of Messrs. Veraros, Galatis, and Ms. Noury, each of whom is an independent director. The nominating committee is responsible for overseeing the selection of persons to be nominated to serve on our Board of Directors. The nominating committee considers persons identified by its members, management, stockholders, investment bankers and others.

Compensation committee

The board of directors has established a compensation committee of two independent directors, Mr. Veraros, who serves as Chairman, and Mr. Galatis. The compensation committee is governed by a written charter, which was approved by the board of directors. The compensation committee is responsible for reviewing and approving the compensation of the Company's executive officers, for establishing, reviewing and evaluating, in consultation with senior management, the long-term strategy of employee compensation and approving any material change to existing compensation plans.

Code of conduct and ethics

We have adopted a code of conduct and ethics applicable to our directors and officers in accordance with applicable federal securities laws and the rules of the NYSE.

Conflicts of Interest

Stockholders and potential investors should be aware of the following potential conflicts of interest:

None of our officers and directors is required to commit their full time to our affairs and, accordingly, they will have conflicts of interest in allocating management time among various business activities, including those related to Navios Holdings, Navios Partners, and Navios Containers.

Each of our directors has, or may come to have other fiduciary obligations. Angeliki Frangou, our Chairman and Chief Executive Officer, is the Chairman and Chief Executive Officer of Navios Holdings, Navios Partners, and Navios Containers. Ted C. Petrone, a member of our Board of Directors, is the Vice Chairman of Navios Corporation, a subsidiary of Navios Holdings and a member of the Board of Directors of Navios Containers. Ms. Kalathakis is Chief Legal Risk Officer of Navios Holdings.

Table of Contents

We entered a Management Agreement, initially set to expire on May 28, 2015, with a subsidiary of Navios Holdings, pursuant to which such subsidiary provides certain commercial and technical ship management services for a fixed daily fee. In May 2014, Navios Acquisition extended the duration of its existing Management Agreement with Navios Holdings, until May 2020 for fixed daily fees.

Pursuant to an amendment to the Management Agreement dated as of May 19, 2016, Navios Acquisition fixed the fees for commercial and technical ship management services of its fleet for two additional years from May 29, 2016, through May 2018, at a daily fee of: (a) \$6,350 per MR2 product tanker and chemical tanker vessel; (b) \$7,150 per LR1 product tanker vessel; and (c) \$9,500 per VLCC.

Pursuant to an amendment to the Management Agreement dated as of May 3, 2018, Navios Acquisition fixed the fees for commercial and technical ship management services of its fleet for two additional years from May 29, 2018 through May 2020, at a fixed daily fee of: (a) \$6,500 per MR2 product tanker and chemical tanker vessel; (b) \$7,150 per LR1 product tanker vessel; and (c) the current daily fee of \$9,500 per VLCC.

We entered into an Administrative Services Agreement with Navios Holdings, initially set to expire on May 28, 2015, pursuant to which a subsidiary of Navios Holdings provides certain administrative management services to Navios Acquisition which include: bookkeeping, audit and accounting services, legal and insurance services, administrative and clerical services, banking and financial services, advisory services, client and investor relations and other services. Navios Holdings is reimbursed for reasonable costs and expenses incurred in connection with the provision of these services. In May 2014, the duration of its existing Administrative Services Agreement was extended until May 2020 pursuant to its existing terms.

On September 19, 2016, Navios Acquisition entered into a \$70.0 million secured loan facility with Navios Holdings. The loan facility is secured by all of Navios Holdings' interest in Navios Acquisition and 78.5% of Navios Holdings' interest in Navios Logistics, representing a majority of the shares outstanding of Navios Logistics. On November 3, 2017, Navios Holdings prepaid in full the outstanding amount of \$55.1 million.

On December 13, 2018, Navios Acquisition completed the Merger contemplated by the previously announced Merger Agreement, dated as of October 7, 2018, by and among Navios Acquisition, Merger Sub, Navios Midstream and NAP General Partner. Pursuant to the Merger Agreement, Merger Sub merged with and into Navios Midstream, with Navios Midstream surviving as a wholly-owned subsidiary of Navios Acquisition.

Pursuant to the terms of the Merger Agreement, each outstanding common unit representing limited partner interests in Navios Midstream held by a common unit holder other than Navios Acquisition, Navios Midstream or their respective subsidiaries (the "NAP Public Units") was converted into the right to receive 0.42 shares of NNA common stock. As a result of the Merger, 3,683,284 shares of NNA common stock were issued to former holders of NAP Public Units.

Please see Item 5.B. Liquidity and Capital Resources and Uses .

We have not adopted a policy that expressly prohibits our directors, officers, security holders or affiliates from having a direct or indirect pecuniary interest in any investment to be acquired or disposed of by us or in any transaction to which we are a party or have an interest. Nor do we have a policy that expressly prohibits any such persons from engaging for their own account in business activities of the types conducted by us. Accordingly, such parties may have an interest in certain transactions in which we are involved, and may also compete with us.

We cannot assure you that any of the above mentioned conflicts will be resolved in our favor.

Navios Holdings has a significant ownership interest in us. As a result of Navios Holdings' significant ownership stake in us and our common management, there are certain potential conflicts of interest, including potential competition as to acquisition targets and, after an acquisition has been consummated, potential competition and business relationships with each other.

All ongoing and future transactions between us and any of our officers and directors or their respective affiliates, including Navios Holdings, will be on terms believed by us to be no less favorable than are available from unaffiliated third parties, and such transactions will require prior approval, in each instance, by a unanimous vote of our disinterested independent directors or the members of our board who do not have an interest in the transaction.

Please see Item 7. Major Stockholders and Related Party Transactions.

Table of Contents**Facilities**

We do not own any real estate or other physical property. Our principal executive office is located at 7 Avenue de Grande Bretagne, Office 11B2, Monte Carlo, MC 98000 Monaco.

D. Employees

Employees of Navios Holdings and its subsidiaries provide assistance to us and our operating subsidiaries pursuant to the Management Agreement and the Administrative Services Agreement; therefore Navios Acquisition does not employ additional staff.

The Manager crews its vessels primarily with Greek, Filipino, Romanian, Russian, Ukrainian and Croatian officers and Filipino seamen. The Manager is responsible for selecting its Greek officers. For other nationalities, officers and seamen are referred to us by local crewing agencies. Navios Acquisition requires that all of its seamen have the qualifications and licenses required to comply with international regulations and shipping conventions.

Navios Holdings also provides on-shore advisory, operational and administrative support to us pursuant to service agreements. Please see Item 7. Major Stockholders and Related Party Transactions.

E. Share Ownership

The following table sets forth certain information regarding beneficial ownership, based on 13,728,371 shares of common stock outstanding as of March 31, 2019, of our common stock held by Navios Holdings, each of our officers and directors (who own in excess of 1% of our outstanding shares of common stock) and by all of our directors and officers as a group. The information is not necessarily indicative of beneficial ownership for any other purposes.

Unless otherwise indicated, we believe that all persons named in the table have sole voting and investment power with respect to all shares of common stock beneficially owned by them.

Name and Address of Beneficial Owner⁽¹⁾	Amount of Beneficial Ownership	Percentage of Common Stock
Navios Maritime Holdings Inc. ⁽²⁾	4,865,147 ⁽²⁾	35.20%
Angeliki Frangou ⁽³⁾	561,104	4.06%
All of our officers and directors as a group ⁽³⁾	604,074	4.37%

No other director or executive officer owns greater than 1% of our common stock.

(1) Unless otherwise indicated, the business address of each of the individuals is c/o Navios Maritime Holdings Inc., 7 Avenue de Grande Bretagne, Office 11B2, Monte Carlo, MC 98000 Monaco.

- (2) Navios Holdings is a U.S. public company controlled by its board of directors, which consists of the following seven members: Angeliki Frangou (our Chairman and Chief Executive Officer), Vasiliki Papaefthymiou, Shunji Sasada, Spyridon Magoulas, John Stratakis, Stathis Loizos and George Malanga. Shares of common stock are beneficially owned through Alpha Merit Corporation, a wholly-owned subsidiary of Navios Holdings.
- (3) Includes 100,000 options vested but not yet exercised.

Item 7. Major Stockholders and Related Party Transactions

A. Major Stockholders

The following table sets forth the beneficial ownership of our common stock by each person we know to beneficially own more than 5% of our common stock based upon 13,728,371 shares of common stock outstanding as of March 31, 2019 and the amounts and percentages as are contained in the public filings of such persons and based on knowledge of the Company. The number of shares of common stock beneficially owned by each person is determined under SEC rules and the information is not necessarily indicative of beneficial ownership for any other purpose. Under SEC rules, a person beneficially owns any units as to which the person has or shares voting or investment power. In addition, a person beneficially owns any shares of common stock that the person or entity has the right to acquire as of April 19, 2019 through the exercise of any right. All of the stockholders, including the stockholders listed in this table, are entitled to one vote per share of common stock held.

Table of Contents

Name of Beneficial Owner	Amount of Beneficial Ownership	Percentage of Common Stock
Navios Maritime Holdings Inc. ⁽¹⁾	4,865,147 ⁽⁴⁾	35.20%
A. Lawrence Carroll Trust ⁽²⁾	975,000	7.38%
Invesco Ltd. ⁽³⁾	505,890	3.8%

- (1) The business address of the reporting person is offices at 7 Avenue de Grande Bretagne, Office 11B2, Monte Carlo, MC 98000 Monaco. The foregoing information was derived from a Schedule 13D/A filed with the SEC on November 28, 2017.
- (2) The business address of the reporting person is 415 L Ambiance Drive, #804, Longboat Key, FL 34228. The foregoing information was derived from a schedule 13G/A filed with the SEC on February 2, 2018.
- (3) The business address of the reporting person is 1555 Peachtree Street NE, Suite 1800, Atlanta, GA 30309. The foregoing information was derived from a Schedule 13G filed with the SEC on February 14, 2018.
- (4) Beneficially owned through Alpha Merit Corporation, a wholly-owned subsidiary of Navios Holdings.

B. Related Party Transactions***The Navios Holdings Credit Facilities***

On September 19, 2016, Navios Acquisition entered into a \$70.0 million secured loan facility with Navios Holdings. The loan facility is secured by all of Navios Holdings' interest in Navios Acquisition and 78.5% of Navios Holdings' interest in Navios South American Logistics Inc. Navios Logistics, representing a majority of the shares outstanding of Navios Logistics. The secured loan facility provided for an arrangement fee of \$0.7 million, is available for up to five drawings and has a fixed interest rate of 8.75% with a maturity date of November 15, 2018. On November 3, 2017, Navios Holdings prepaid in full the outstanding amount with a payment of \$55.1 million. The prepayment amount consisted of the \$50.0 million drawn under the facility and \$5.1 million of accrued interest. As of December 31, 2018 and December 31, 2017, there was no outstanding receivable balance. The arrangement fee was deferred and amortized using the effective interest rate method. Total interest income, including amortization of deferred fees, for the year ended December 31, 2018 and December 31, 2017 amounted to \$0 and \$4.5 million, respectively.

In March 2016, Navios Acquisition entered into the \$50.0 million Revolver with Navios Holdings, which was available for multiple drawings up to a limit of \$50.0 million. The Revolver had a margin of LIBOR plus 300bps and a maturity in December 2018. On April 14, 2016, Navios Acquisition and Navios Holdings announced that the Revolver was terminated. No borrowings had been made under the Revolver.

The Management Agreement

We have entered into Management Agreement with the Manager, pursuant to which the Manager provides certain commercial and technical ship management services to us. These services will be provided in a commercially reasonable manner in accordance with customary ship management practice and under our direction. The Manager will provide these services to us directly but may subcontract for certain of these services with other entities, including other Navios Holdings subsidiaries.

The commercial and technical management services will include:

the commercial and technical management of vessels: managing day-to-day vessel operations including negotiating charters and other employment contracts for the vessels and monitoring payments thereunder, ensuring regulatory compliance, arranging for the vetting of vessels, procuring and arranging for port entrance and clearance, appointing counsel and negotiating the settlement of all claims in connection with the operation of each vessel, appointing adjusters and surveyors and technical consultants as necessary, and providing technical support;

vessel maintenance and crewing: including the supervision of the maintenance and general efficiency of vessels and ensuring the vessels are in seaworthy and good operating condition, arranging our hire of qualified officers and crew, arranging for all transportation, board and lodging of the crew, negotiating the settlement and payment of all wages; and

purchasing and insurance: purchasing stores, supplies and parts for vessels, arranging insurance for vessels (including marine hull and machinery insurance, protection and indemnity insurance and war risk and oil pollution insurance).

Pursuant to the Management Agreement dated May 28, 2010 and as amended in May 2012, May 2014 and May 2016, the Manager provided commercial and technical management services to Navios Acquisition's vessels for a fixed daily fee of: (a) \$6,350 per MR2 product tanker and chemical tanker vessel; (b) \$7,150 per LR1 product tanker vessel; and (c) \$9,500 per VLCC, through May 2018.

Table of Contents

Pursuant to an amendment to the Management Agreement dated as of May 3, 2018, Navios Acquisition fixed the fees for commercial and technical ship management services of its fleet for two additional years from May 29, 2018 through May 2020, at a fixed daily fee of: (a) \$6,500 per MR2 product tanker and chemical tanker vessel; (b) \$7,150 per LR1 product tanker vessel; and (c) the current daily fee of \$9,500 per VLCC.

Following the Merger with Navios Midstream, completed on December 13, 2018, the Management Agreement covers vessels acquired.

Dry docking expenses are reimbursed at cost.

Total management fees for each of the years ended December 31, 2018, 2017 and 2016 amounted to \$94.0 million, \$95.0 million and \$97.9 million, respectively.

Included in direct vessel expenses is an amount of \$0.7 million for the year ended December 31, 2016, that was incurred for specialized work performed in connection with certain vessels of our fleet.

The Management Agreement may be terminated prior to the end of its term by us upon 120-days notice if there is a change of control of the Manager or by the Manager upon 120-days notice if there is a change of control of Navios Acquisition. In addition, the Management Agreement may be terminated by us or by the Manager upon 120-days notice if:

the other party breaches the agreement;

a receiver is appointed for all or substantially all of the property of the other party;

an order is made to wind up the other party;

a final judgment or order that materially and adversely affects the other party's ability to perform the Management Agreement is obtained or entered and not vacated or discharged; or

the other party makes a general assignment for the benefit of its creditors, files a petition in bankruptcy or liquidation or commences any reorganization proceedings.

Furthermore, at any time after the first anniversary of the Management Agreement, the Management Agreement may be terminated prior to the end of its initial term by us or by the Manager upon 365-days notice for any reason other than those described above.

In addition to the fixed daily fees payable under the Management Agreement, the Management Agreement provides that the Manager will be entitled to reasonable supplementary remuneration for extraordinary fees and costs resulting from:

time spent on insurance and salvage claims;

time spent vetting and pre-vetting the vessels by any charterers in excess of 10 days per vessel per year;

the deductible of any insurance claims relating to the vessels or for any claims that are within such deductible range;

the significant increase in insurance premiums which are due to factors such as acts of God outside the control of the Manager;

repairs, refurbishment or modifications, including those not covered by the guarantee of the shipbuilders or by the insurance covering the vessels, resulting from maritime accidents, collisions, other accidental damage or unforeseen events (except to the extent that such accidents, collisions, damage or events are due to the fraud, gross negligence or willful misconduct of the Manager, its employees or its agents, unless and to the extent otherwise covered by insurance);

expenses imposed due to any improvement, upgrade or modification to, structural changes with respect to the installation of new equipment aboard any vessel that results from a change in, an introduction of new, or a change in the interpretation of, applicable laws, at the recommendation of the classification society for that vessel or otherwise;

costs associated with increases in crew employment expenses resulting from an introduction of new, or a change in the interpretation of, applicable laws or resulting from the early termination of the charter of any vessel;

any taxes, dues or fines imposed on the vessels or the Manager due to the operation of the vessels;

expenses incurred in connection with the sale or acquisition of a vessel such as inspections and technical assistance; and

any similar costs, liabilities and expenses that were not reasonably contemplated by us and the Manager as being encompassed by or a component of the fixed daily fees at the time the fixed daily fees were determined.

Under the Management Agreement, neither we nor the Manager will be liable for failure to perform any of our or its obligations, respectively, under the Management Agreement by reason of any cause beyond our or its reasonable control.

Table of Contents

In addition, the Manager will have no liability for any loss arising in the course of the performance of the commercial and technical management services under the Management Agreement unless and to the extent that such loss is proved to have resulted solely from the fraud, gross negligence or willful misconduct of the Manager or its employees, in which case (except where such loss has resulted from the Manager's intentional personal act or omission and with knowledge that such loss would probably result) the Manager's liability will be limited to \$3.0 million for each incident or series of related incidents.

Further, under our Management Agreement, we have agreed to indemnify the Manager and its employees and agents against all actions that may be brought against them under the Management Agreement including, without limitation, all actions brought under the environmental laws of any jurisdiction, or otherwise relating to pollution or the environment, and against and in respect of all costs and expenses they may suffer or incur due to defending or settling such action; provided, however, that such indemnity excludes any or all losses which may be caused by or due to the fraud, gross negligence or willful misconduct of the Manager or its employees or agents, or any breach of the Management Agreement by the Manager.

The Administrative Services Agreement

On May 28, 2010, Navios Acquisition entered into an Administrative Services Agreement with Navios Holdings, pursuant to which Navios Holdings provides certain administrative management services to Navios Acquisition which include: bookkeeping, audit and accounting services, legal and insurance services, administrative and clerical services, banking and financial services, advisory services, client and investor relations and other services. Navios Holdings is reimbursed for reasonable costs and expenses incurred in connection with the provision of these services. In May 2014, Navios Acquisition extended the duration of its existing Administrative Services Agreement with Navios Holdings, until May 2020.

Following the Merger with Navios Midstream, completed on December 13, 2018, the Administrative Services Agreement covers vessels acquired.

The Administrative Services Agreement may be terminated prior to the end of its term by us upon 120-days' notice if there is a change of control of Navios Holdings or by Navios Holdings upon 120-days' notice if there is a change of control of us. In addition, the Administrative Services Agreement may be terminated by us or by Navios Holdings upon 120-days' notice if:

the other party breaches the agreement;

a receiver is appointed for all or substantially all of the property of the other party;

an order is made to wind up the other party;

a final judgment or order that materially and adversely affects the other party's ability to perform the Administrative Services Agreement is obtained or entered and not vacated or discharged; or

the other party makes a general assignment for the benefit of its creditors, files a petition in bankruptcy or liquidation or commences any reorganization proceedings.

Furthermore, at any time after the first anniversary of the Administrative Services Agreement, the Administrative Services Agreement may be terminated by us or by Navios Holdings upon 365-days notice for any reason other than those described above.

The administrative services include:

bookkeeping, audit and accounting services: assistance with the maintenance of our corporate books and records, assistance with the preparation of our tax returns and arranging for the provision of audit and accounting services;

legal and insurance services: arranging for the provision of legal, insurance and other professional services and maintaining our existence and good standing in necessary jurisdictions;

administrative and clerical services: providing office space, arranging meetings for our security holders, arranging the provision of IT services, providing all administrative services required for subsequent debt and equity financings and attending to all other administrative matters necessary to ensure the professional management of our business;

banking and financial services: providing cash management including assistance with preparation of budgets, overseeing banking services and bank accounts, arranging for the deposit of funds, negotiating loan and credit terms with lenders and monitoring and maintaining compliance therewith;

advisory services: assistance in complying with United States and other relevant securities laws;

client and investor relations: arranging for the provision of, advisory, clerical and investor relations services to assist and support us in our communications with our security holders; and client and investor relations; and

integration of any acquired businesses.

Table of Contents

We will reimburse Navios Holdings for reasonable costs and expenses incurred in connection with the provision of these services within 15 days after Navios Holdings submits to us an invoice for such costs and expenses, together with any supporting detail that may be reasonably required.

Under the Administrative Services Agreement, we have agreed to indemnify Navios Holdings and its employees against all actions which may be brought against them under the Administrative Services Agreement including, without limitation, all actions brought under the environmental laws of any jurisdiction, and against and in respect of all costs and expenses they may suffer or incur due to defending or settling such actions; provided, however, that such indemnity excludes any or all losses that may be caused by or due to the fraud, gross negligence or willful misconduct of Navios Holdings or its employees or agents.

For each of the years ended December 31, 2018, 2017 and 2016 the expense arising from administrative services rendered by Navios Holdings amounted to \$8.9 million, \$9.0 million and \$9.4 million, respectively.

Balance due from related parties (excluding Navios Europe I, Navios Europe II)

Balance due from related parties as of December 31, 2018 and December 31, 2017 was \$15.8 million and \$18.0 million, respectively, and included the short-term and long-term amounts due from Navios Holdings. The balances mainly consisted of administrative expenses and special survey and dry docking expenses for certain vessels of our fleet, as well as management fees, in accordance with the Management Agreement.

Balance due to related parties, short-term

Amounts due to related parties, short-term as of December 31, 2018 was \$12.0 million and mainly consisted of payables to Navios Holdings. As of December 31, 2017 the amounts due to related parties, short-term were \$17.1 million, and mainly consisted of backstop commitment liability payable to Navios Midstream. In the first quarter of 2018, Navios Acquisition paid to Navios Midstream the amount of \$16.4 million regarding the backstop commitment.

Navios Midstream Merger Agreement

On December 13, 2018, Navios Acquisition completed the Merger contemplated by the Merger Agreement, dated as of October 7, 2018, by and among Navios Acquisition, its direct wholly-owned subsidiary Merger Sub, Navios Midstream and NAP General Partner. Pursuant to the Merger Agreement, Merger Sub merged with and into Navios Midstream, with Navios Midstream surviving as a wholly-owned subsidiary of Navios Acquisition.

Omnibus Agreements

The Acquisition Omnibus Agreement

We have entered an Acquisition Omnibus Agreement with Navios Holdings and Navios Partners. The following discussion describes certain provisions of the Acquisition Omnibus Agreement.

Noncompetition

Navios Holdings and Navios Partners agree not to acquire, charter-in or own Liquid Shipment Vessels (as hereinafter defined). For purposes of the Acquisition Omnibus Agreement, Liquid Shipment Vessels means vessels intended primarily for the sea going shipment of liquid products, including chemical and petroleum-based products, except for

container vessels and vessels that will be employed primarily in operations in South America. This restriction will not prevent Navios Holdings or any of its controlled affiliates or Navios Partners (other than us and our subsidiaries) from:

- (1) acquiring a Liquid Shipment Vessel(s) from us for fair market value;
- (2) acquiring a Liquid Shipment Vessel(s) as part of the acquisition of a controlling interest in a business or package of assets and owning those vessels; provided, however, that:
 - a. if less than a majority of the value of the total assets or business acquired is attributable to a Liquid Shipment Vessel(s) and related charters, as determined in good faith by the board of directors of Navios Holdings or Navios Partners, as the case may be, Navios Holdings or Navios Partners, as the case may be, must offer to sell a Liquid Shipment Vessel(s) and related charters to us for their fair market value plus any additional tax or other similar costs to Navios Holdings that would be required to transfer a Liquid Shipment Vessel(s) and related charters to us separately from the acquired business; and
 - b. if a majority or more of the value of the total assets or business acquired is attributable to a Liquid Shipment Vessel(s) and related charters, as determined in good faith by the board of directors of Navios Holdings or Navios Partners, as the case may be, Navios Holdings or Partners, as the case may be, shall notify us in writing, of the proposed acquisition. We shall, not later than the 15th calendar day following receipt of such notice, notify Navios Holdings or Navios Partners, as the case may be, if we wish to acquire such a Liquid Shipment Vessel(s) and related charters forming part of the business or package of assets in cooperation and simultaneously with Navios Holdings or Navios Partners, as the case may be, acquiring a Liquid Shipment Vessel(s) and related charters forming part of that business or package of assets. If we do not notify Navios Holdings of our intent to pursue the acquisition within 15 calendar days, Navios Holdings may proceed with the acquisition as provided in (a) above.

Table of Contents

- (3) acquiring a non-controlling interest in any company, business or pool of assets;
- (4) acquiring or owning a Liquid Shipment Vessel(s) and related charter if we do not fulfill our obligation, under any existing or future written agreement, to purchase such vessel in accordance with the terms of any such agreement;
- (5) acquiring or owning a Liquid Shipment Vessel(s) subject to the offers to us described in paragraphs (3) and (4) above pending our determination whether to accept such offers and pending the closing of any offers we accept;
- (6) providing ship management services relating to any vessel whatsoever, including to a Liquid Shipment Vessel(s) owned by the controlled affiliates of Navios Holdings; or
- (7) acquiring or owning a Liquid Shipment Vessel(s) if we have previously advised Navios Holdings or Navios Partners, as the case may be, that we consent to such acquisition, or if we have been offered the opportunity to purchase such vessel pursuant to the Acquisition Omnibus Agreement and failed to do so.

If Navios Holdings or Navios Partners, as the case may be, or any of their respective controlled affiliates (other than us or our subsidiaries) acquires or owns a Liquid Shipment Vessel(s) pursuant to any of the exceptions described above, it may not subsequently expand that portion of its business other than pursuant to those exceptions.

In addition, under the Acquisition Omnibus Agreement we have agreed, and will cause our subsidiaries to agree, not to acquire, own, operate or charter drybulk carriers (Drybulk Carriers). Pursuant to an agreement between them, Navios Holdings and Navios Partners may be entitled to a priority over each other depending on the class and charter length of any Drybulk Carrier. This restriction will not:

- (1) prevent us or any of our subsidiaries from acquiring a Drybulk Carrier(s) and any related charters as part of the acquisition of a controlling interest in a business or package of assets and owning and operating or chartering those vessels; provided, however, that:
 - (a) if less than a majority of the value of the total assets or business acquired is attributable to a Drybulk Carrier(s) and related charter(s), as determined in good faith by us, we must offer to sell such Drybulk Carrier(s) and related charter to Navios Holdings or Navios Partners, as the case may be, for their fair market value plus any additional tax or other similar costs to us that would be required to transfer the Drybulk Carrier(s) and related charter(s) to Navios Holdings or Navios Partners, as the case may be, separately from the acquired business; and
 - (b) if a majority or more of the value of the total assets or business acquired is attributable to a Drybulk Carrier(s) and related charter(s), as determined in good faith by us, we shall notify Navios Holdings or Navios Partners, as the case may be, in writing of the proposed acquisition. Navios Holdings or Navios Partners, as the case may be, shall, not later than the 15th calendar day following receipt of such notice, notify us if it wishes to acquire the Drybulk Carrier(s) forming part of the business or package of assets in cooperation and simultaneously with us acquiring the Non-Drybulk Carrier assets forming part of that business or package of assets. If Navios Holdings and Navios Partners do not notify us of their intent to pursue the acquisition within 15 calendar days, we may proceed with the acquisition as provided in (a) above.
- (2) prevent us or any of our subsidiaries from owning, operating or chartering a Drybulk Carrier(s) subject to the offer to Navios Holdings or Navios Partners described in paragraph (1) above, pending their determination whether to accept such offer and pending the closing of any offer they accept; or

(3) prevent us or any of our subsidiaries from acquiring, operating or chartering a Drybulk Carrier(s) if Navios Holdings and Navios Partners have previously advised us that they consent to such acquisition, operation or charter, or if they have previously been offered the opportunity to purchase such Drybulk Carrier(s) and have declined to do so.

If we or any of our subsidiaries owns, operates and charters Drybulk Carriers pursuant to any of the exceptions described above, neither we nor such subsidiary may subsequently expand that portion of our business other than pursuant to those exceptions.

The Midstream Omnibus Agreement

Navios Acquisition entered into an omnibus agreement (the *Midstream Omnibus Agreement*), with Navios Midstream, Navios Holdings and Navios Partners in connection with the Navios Midstream IPO, pursuant to which Navios Acquisition, Navios Midstream, Navios Holdings, Navios Partners and their controlled affiliates generally have agreed not to acquire or own any VLCCs, crude oil tankers, refined petroleum product tankers, liquefied petroleum gas (*LPG*) tankers or chemical tankers under time charters of five or more years without the consent of the Navios Midstream General Partner. The *Midstream Omnibus Agreement* contains significant exceptions that have allowed Navios Acquisition, Navios Holdings, Navios Partners or any of their controlled affiliates to compete with Navios Midstream under specified circumstances.

Table of Contents

Under the Midstream Omnibus Agreement, Navios Midstream and its subsidiaries have granted to Navios Acquisition a right of first offer on any proposed sale, transfer or other disposition of any of its VLCCs or any crude oil tankers, refined petroleum product tankers, LPG tankers or chemical tankers and related charters owned or acquired by Navios Midstream. Likewise, Navios Acquisition have agreed (and will cause its subsidiaries to agree) to grant a similar right of first offer to Navios Midstream for any of the VLCCs, crude oil tankers, refined petroleum product tankers, LPG tankers or chemical tankers under charter for five or more years it might own. These rights of first offer do not apply to a: (a) sale, transfer or other disposition of vessels between any affiliated subsidiaries, or pursuant to the terms of any charter or other agreement with a charter party, or (b) merger with or into, or sale of substantially all of the assets to, an unaffiliated third-party.

Navios Containers Omnibus Agreement

In connection with the Navios Maritime Containers Inc. (Navios Containers) private placement and listing on the Norwegian over-the-counter market effective June 8, 2017, Navios Acquisition entered into an omnibus agreement with Navios Containers, Navios Midstream, Navios Holdings and Navios Partners, pursuant to which Navios Acquisition, Navios Holdings, Navios Partners and Navios Midstream have granted to Navios Containers a right of first refusal over any container vessels to be sold or acquired in the future. The omnibus agreement contains significant exceptions that will allow Navios Acquisition, Navios Holdings, Navios Partners and Navios Midstream to compete with Navios Containers under specified circumstances.

Backstop Agreements

On November 18, 2014, Navios Acquisition entered into backstop agreements with Navios Midstream (Backstop Agreements). In accordance with the terms of the Backstop Agreements, Navios Acquisition has provided backstop commitments for a two-year period as of the redelivery of each of the Nave Celeste, the Shinyo Ocean and the Shinyo Kannika from their original charters, at a net rate of \$35,000, \$38,400 and \$38,025, respectively. Backstop commitments were triggered if the actual rates achieved were below the backstop rates. The Company has recognized expense of \$20.1 million up to December 13, 2018 and \$16.4 million as Time charter and voyage expenses in the consolidated statements of operations for the years ended December 31, 2018 and 2017, respectively. As of December 31, 2018, the accrued liability under the Backstop Agreements is eliminated as intercompany balance following the Merger with Navios Midstream. As of December 31, 2017, the accrued liability recognized was \$16.4 million and was paid to Navios Midstream in the first quarter of 2018. The backstop commitment for the Shinyo Kannika was terminated in relation to the sale of this vessel in March 2018. Navios Acquisition agreed to extend the backstop commitment of the Shinyo Kannika to the Nave Galactic, following the sale of the latter to Navios Midstream in March 2018.

In January and February 2019, all Backstop Agreements expired pursuant to their initial terms.

Navios Midstream General Partner Option Agreement with Navios Holdings

Navios Acquisition entered into an option agreement, dated November 18, 2014, with Navios Holdings under which Navios Acquisition grants Navios Holdings the option to acquire any or all of the outstanding membership interests in Navios Midstream General Partner and all of the incentive distribution rights in Navios Midstream representing the right to receive an increasing percentage of the quarterly distributions when certain conditions are met. The option shall expire on November 18, 2024. Any such exercise shall relate to not less than twenty-five percent of the option interest and the purchase price for the acquisition of all or part of the option interest shall be an amount equal to its fair market value.

Sale of C. Dream and Nave Celeste

As of December 31, 2018 and 2017, the unamortized deferred gain recognized in relation to the sale of Nave Celeste and C.Dream to Navios Midstream in June 2015 totaled \$0 and \$7.7 million, respectively, of which an amount of \$0 and \$1.0 million, respectively, was included in Deferred revenue . For the year ended December 31, 2018, the Company recognized a total amount of \$7.7 million in Equity/ (loss) in net earnings of affiliated companies including \$6.8 million of accelerated amortization of the deferred gain recognized following the merger with Navios Midstream.

For the years ended December 31, 2017 and 2016, Navios Acquisition recognized \$1.1 million and \$0.2 million of the deferred gain, respectively, in Equity/ (loss) in net earnings of affiliated companies , respectively. Please see Note 17: Transactions with related parties .

Participation in offerings of affiliates

On July 29, 2016, Navios Midstream launched a continuous offering sales program of its common units for an aggregate offering of up to \$25.0 million. Refer also to Note 10 Investment in affiliates .

On September 30, 2016, December 30, 2016, February 16, 2017 and May 5, 2017 Navios Acquisition entered into securities purchase agreements with Navios Midstream pursuant to which Navios Acquisition made an investment in Navios Midstream by purchasing 5,655, 1,143, 6,446 and 412 general partnership interests, respectively, for aggregate consideration of \$0.2 million in order to maintain its 2.0% partnership interest in Navios Midstream in light of such continuous offering sales program.

Table of Contents

The Company determined, under the equity method, that the issuance of common units of Navios Midstream qualified as a sale of shares by the investee. As a result, a net loss of \$0, \$0.05 million and \$0.2 million was recognized in

Equity/ (loss) in net earnings of affiliated companies for the years ended December 31, 2018, December 31, 2017 and December 31, 2016, respectively.

Navios Europe I

Navios Holdings, Navios Acquisition and Navios Partners have made available to Navios Europe I revolving loans up to \$24.1 million to fund working capital requirements. In December 2018, the availability under the Revolving Loans I was increased by \$30.0 million. See Note 10 for the investment in Navios Europe I.

Balance due from Navios Europe I as of December 31, 2018 amounted to \$22.7 million (December 31, 2017: \$19.4 million) which included the Navios Revolving Loans I of \$11.8 million (December 31, 2017: \$11.8 million), the non-current amount of \$4.2 million (December 31, 2017: \$3.2 million) related to the accrued interest income earned under the Navios Term Loans I under the caption Due from related parties, long-term and the accrued interest income earned under the Navios Revolving Loans I of \$6.6 million (December 31, 2017: \$4.5 million) under the caption Due from related parties, short-term.

The Navios Revolving Loans I and the Navios Term Loans I earn interest and an annual preferred return, respectively, at 12.7% per annum, on a quarterly compounding basis and are repaid from free cash flow (as defined in the loan agreement) to the fullest extent possible at the end of each quarter. There are no covenant requirements or stated maturity dates. As of December 31, 2018, the amount undrawn under the Navios Revolving Loans I was \$12.0 million, of which Navios Acquisition may be required to fund an amount ranging from \$0 to \$12.0 million.

Navios Europe II

Navios Holdings, Navios Acquisition and Navios Partners have made available to Navios Europe II revolving loans up to \$43.5 million to fund working capital requirements. In March 2017, the availability under the Navios Revolving Loans II was increased by \$14.0 million. See Note 10 for the investment in Navios Europe II.

Balance due from Navios Europe II as of December 31, 2018 amounted to \$38.5 million (December 31, 2017: \$31.1 million) which included the Navios Revolving Loans II of \$20.7 million (December 31, 2017: \$20.7 million), the non-current amount of \$5.8 million (December 31, 2017: \$3.8 million) related to the accrued interest income earned under the Navios Term Loans II under the caption Due from related parties, long-term and the accrued interest income earned under the Navios Revolving Loans II of \$12.0 million (December 31, 2017: \$6.7 million) under the caption Due from related parties, short-term.

The Navios Revolving Loans II and the Navios Term Loans II earn interest and an annual preferred return, respectively, at 18% per annum, on a quarterly compounding basis and are repaid from free cash flow (as defined in the loan agreement) to the fullest extent possible at the end of each quarter. There are no covenant requirements or stated maturity dates. As of December 31, 2018, the amount undrawn under the Navios Revolving Loans II was \$4.5 million, of which Navios Acquisition may be required to fund an amount ranging from \$0 to \$4.5 million.

Registration Rights

Pursuant to a registration rights agreement between us and our initial stockholders entered into in connection with the IPO, the holders of the sponsor units (and the common stock and warrants comprising such units and the common stock issuable upon exercise of such warrants), the sponsor warrants (and the common stock issuable upon exercise of

such warrants), the co-investment shares and such other shares of common stock purchased pursuant to the limit orders described above are entitled to three demand registration rights, piggy-back registration rights and short-form resale registration rights. We will bear the expenses incurred in connection with any such registration statements other than underwriting discounts or commissions for shares not sold by us. In addition, we have registered the 111,850 shares of common stock issued in connection with the VLCC Acquisition. The resale registration statement became effective on January 19, 2011.

In addition, in connection with the private placement of 1,180,166 shares that was completed on February 26, 2013, we have granted registration rights to Navios Holdings and certain members of the management of Navios Acquisition, Navios Holdings and Navios Partners.

In connection with the private placements of 1,095,890 shares and of 865,801 shares that were completed on May 21, 2013 and on September 16, 2013, respectively, we have granted registration rights to Navios Holdings.

Table of Contents

Rights of First Offer

Under the Acquisition Omnibus Agreement, we and our subsidiaries will grant to Navios Holdings and Navios Partners, as the case may be, a right of first offer on any proposed sale, transfer or other disposition of any of our Drybulk Carriers and related charters owned or acquired by us. Likewise, Navios Holdings and Navios Partners will agree (and will cause its subsidiaries to agree) to grant a similar right of first offer to us for any Liquid Shipment Vessels it might own. These rights of first offer will not apply to a: (a) sale, transfer or other disposition of vessels between any affiliated subsidiaries, or pursuant to the terms of any charter or other agreement with a counterparty; or (b) merger with or into, or sale of substantially all of the assets to, an unaffiliated third party.

Prior to engaging in any negotiation regarding any vessel disposition with respect to a Liquid Shipment Vessel(s) with a non-affiliated third party or any Drybulk Carrier(s) and related charter, we, Navios Holdings, or Navios Partners, as the case may be, will deliver a written notice to the other parties setting forth the material terms and conditions of the proposed transaction. During the 15-day period after the delivery of such notice, we, Navios Holdings or Navios Partners, as the case may be, will negotiate in good faith to reach an agreement on the transaction. If we do not reach an agreement within such 15-day period, we or Navios Holdings or Navios Partners, as the case may be, will be able within the next 180 calendar days to sell, transfer or dispose of the vessel to a third party (or to agree in writing to undertake such transaction with a third party) on terms generally no less favorable to us or Navios Holdings, as the case may be, than those offered pursuant to the written notice.

Upon a change of control of Navios Partners, the noncompetition and the right of first offer provisions of the Acquisition Omnibus Agreement will terminate immediately as to Navios Partners, but shall remain binding on us and Navios Holdings. Upon a change of control of Navios Holdings, the noncompetition and the right of first offer provisions of the Acquisition Omnibus Agreement shall terminate; provided, however, that in no event shall the noncompetition and the rights of first refusal terminate upon a change of control of Navios Holdings prior to the fourth anniversary of the Acquisition Omnibus Agreement. Upon change of control of us, the noncompetition and the right of first offer provisions of the Acquisition Omnibus Agreement will terminate immediately as to all parties of the Acquisition Omnibus Agreement.

C. Interest of Experts and Counsel

Not Applicable.

Item 8. *Financial Information*

A. Consolidated Statements and Other Financial Information

Consolidated Financial Statements: See Item 18.

Legal Proceedings

The Company is involved in various disputes and arbitration proceedings arising in the ordinary course of business. Provisions have been recognized in the financial statements for all such proceedings where the Company believes that a liability may be probable, and for which the amounts are reasonably estimable, based upon facts known at the date of the financial statements were prepared. In the opinion of the management, the ultimate disposition of these matters individually and in aggregate will not materially affect the Company's financial position, results of operations or

liquidity.

Dividend Policy

At the present time, Navios Acquisition intends to retain most of its available earnings generated by operations for the development and growth of the business. The continued declaration and payment of any dividend remains subject to the discretion of the Board of Directors, and will depend on, among other things, Navios Acquisition's cash requirements as measured by market opportunities and conditions. In addition, the terms and provisions of our current secured credit facilities and our indenture limit our ability to pay dividends in excess of certain amounts or if certain covenants are not met. (See also Long-Term Debt Obligations and Credit Arrangements.)

On January 26, 2018, the Board of Directors declared a quarterly cash dividend in respect of the fourth quarter of 2017 of \$0.30 per share of common stock payable on March 27, 2018 to stockholders of record as of March 22, 2018. A dividend in the aggregate amount of \$3.1 million was paid on March 27, 2018 out of which \$2.9 million was paid to the stockholders of record as of March 22, 2018 and \$0.2 million was paid to Navios Holdings, the holder of the 1,000 shares of Series C Convertible Preferred Stock.

On May 4, 2018, the Board of Directors declared a quarterly cash dividend in respect of the first quarter of 2018 of \$0.30 per share of common stock payable on June 27, 2018 to stockholders of record as of June 21, 2018. A dividend in the aggregate amount of \$3.1 million was paid on June 27, 2018 out of which \$2.9 million was paid to the stockholders of record as of June 21, 2018 and \$0.2 million was paid to Navios Holdings, the holder of the 1,000 shares of Series C Convertible Preferred Stock.

Table of Contents

On July 31, 2018, the Board of Directors declared a quarterly cash dividend in respect of the second quarter of 2018 of \$0.30 per share of common stock payable on September 27, 2018 to stockholders of record as of September 20, 2018. A dividend in the aggregate amount of \$3.0 million was paid on September 27, 2018 out of which \$2.9 million was paid to the stockholders of record as of September 20, 2018 and \$0.2 million was paid to Navios Holdings, the holder of the 1,000 shares of Series C Convertible Preferred Stock.

On November 2, 2018, the Board of Directors declared a quarterly cash dividend in respect of the third quarter of 2018 of \$0.30 per share of common stock payable on December 5, 2018 to stockholders of record as of November 27, 2018. A dividend in the aggregate amount of \$3.0 million was paid on December 5, 2018 out of which \$2.9 million was paid to the stockholders of record as of November 27, 2018 and \$0.2 million was paid to Navios Holdings, the holder of the 1,000 shares of Series C Convertible Preferred Stock.

For the years ended December 31, 2018, December 31, 2017 and December 31, 2016, Navios Acquisition had no outstanding Series B and Series D Preferred Stock.

On January 25, 2019, the Board of Directors declared a quarterly cash dividend in respect of the fourth quarter of 2018 of \$0.30 per share of common stock which was paid on March 27, 2019 to stockholders of record as of February 27, 2019. The declaration and payment of any further dividends remain subject to the discretion of the Board of Directors and will depend on, among other things, Navios Acquisition's cash requirements as measured by market opportunities and restrictions under its credit agreements and other debt obligations and such other factors as the Board of Directors may deem advisable.

B. Significant Changes

Not Applicable.

Item 9. Listing Details

Our shares of common stock are traded on the NYSE under the symbol NNA.

Item 10. Additional Information

A. Share Capital

Not applicable.

B. Memorandum and Articles of Association

Please refer to the filings on Form 6-K (file number 001-34104) filed with the U.S. Securities and Exchange Commission: Exhibit 99.9 of Form 6-K filed on June 4, 2010, Exhibit 3.1 of Form 6-K filed on February 10, 2011, Exhibit 1.1 of Form 6-K filed on September 21, 2010, Exhibit 1.1 of Form 6-K filed on November 9, 2010, Exhibit 1.1 to Form 6-K filed on April 12, 2011, and Exhibit 1.1 to Form 6-K filed on November 14, 2018, which the Company hereby incorporates herein by reference.

C. Material Contracts

The following is a summary of each material contract, other than material contracts entered into in the ordinary course of business, to which we or any of our subsidiaries is a party, for the two years immediately preceding the date of this Annual Report, each of which is included in the list of exhibits in Item 19.

Form of Right of First Refusal Agreement among Navios Maritime Acquisition Corporation, Navios Maritime Holdings, Inc. and Navios Maritime Partners L.P. (Previously filed as an exhibit to the Navios Acquisition Registration Statement on Form F-1, as amended (File No 333-151707) and hereby incorporated by reference)

Management Agreement dated May 28, 2010, between Navios Maritime Acquisition Corporation and Navios Ship Management Inc. (Previously filed as an exhibit to a Report on Form 6-K filed by Navios Acquisition on June 4, 2010, and hereby incorporated by reference)

Amendment to the Management Agreement dated May 4, 2012, between Navios Maritime Acquisition Corporation and Navios Tankers Manager Inc. (Previously filed as an exhibit to a Report on Form 6-K filed by Navios Acquisition on May 15, 2012, and hereby incorporated by reference)

Amendment to the Management Agreement dated May 14, 2014, between Navios Maritime Acquisition Corporation and Navios Tankers Management Inc. (Previously filed as an exhibit to a Report on Form 6-K filed by Navios Acquisition on May 22, 2014, and hereby incorporated by reference)

Table of Contents

Fourth Amendment to the Management Agreement, dated May 19, 2016, between Navios Maritime Acquisition Corporation and Navios Tankers Management Inc. (Previously filed as an exhibit to a Report on Form 6-K filed by Navios Acquisition on June 9, 2016 and hereby incorporated by reference)

Fifth Amendment to the Management Agreement, dated May 3, 2018, between Navios Maritime Acquisition Corporation and Navios Tankers Management Inc. (Previously filed as an exhibit to a Report on Form 6-K filed by Navios Acquisition on August 23, 2018 and hereby incorporated by reference)

Form of Management Agreement, between Navios Maritime Midstream Partners L.P. and Navios Tankers Management Inc. (Previously filed as an exhibit to Navios Midstream's Registration Statement on Form F-1, as amended (File No. 333-199235) and hereby incorporated by reference)

Facility Agreement for up to \$44.0 million term loan facility, dated December 18, 2015, among Tinos Shipping Corporation, Antipaxos Shipping Corporation, BNP Paribas and the Banks and Financial Institutions listed therein (Previously filed as an exhibit to a Report on Form 6-K filed by Navios Acquisition on January 6, 2016, and hereby incorporated by reference)

Loan Agreement for up to \$70.0 million, dated September 19, 2016, between Navios Maritime Holdings Inc. and Navios Maritime Acquisition Corporation (Previously filed as an exhibit to a Report on Form 6-K filed by Navios Acquisition on September 21, 2016, and hereby incorporated by reference)

Loan Agreement for \$24.0 million term loan facility, dated June 7, 2017, among Amorgos Shipping Corporation and Andros Shipping Corporation, HSH Nordbank AG, and the Banks and Financial Institutions listed therein (Previously filed as an exhibit to a Report on Form 6-K, filed by Navios Acquisition on August 17, 2017, and hereby incorporated by reference)

Credit Agreement for \$205.0 million term loan facility, dated June 18, 2015, among Navios Midstream Partners L.P., Navios Maritime Midstream Partners Finance (US) Inc., JPMorgan Chase Bank, N.A., Morgan Stanley Senior Funding, Inc., J.P. Morgan Securities LLC, Merrill Lynch, Pierce, Fenner & Smith, Credit Suisse Securities (USA) LLC, S. Goldman Advisors, LLC, ABN Amro Capital USA LLC and DVB Capital Markets LLC (Previously filed as an exhibit to Navios Midstream's Annual Report on Form 20-F for the year ended December 31, 2014 filed on March 17, 2015 and hereby incorporated by reference)

Registration Rights Agreement, dated February 26, 2013, between Navios Maritime Acquisition Corporation and Navios Maritime Holdings Inc. and the management investors party thereto (Previously filed as an exhibit to a Report on Form 6-K filed by Navios Acquisition on March 4, 2013, and hereby incorporated by reference)

Edgar Filing: Navios Maritime Acquisition CORP - Form 20-F

Registration Rights Agreement, dated May 21, 2013, between Navios Maritime Acquisition Corporation and Navios Maritime Holdings Inc. (Previously filed as an exhibit to a Report on Form 6-K filed by Navios Acquisition on May 30, 2013, and hereby incorporated by reference)

Registration Rights Agreement, dated September 16, 2013, between Navios Maritime Acquisition Corporation and Navios Maritime Holdings Inc. (Previously filed as an exhibit to a Report on Form 6-K filed by Navios Acquisition on September 18, 2013, and hereby incorporated by reference)

Backstop Agreement, dated November 18, 2014, between Navios Maritime Midstream Partners LP and Navios Maritime Acquisition Corporation (Previously filed as an exhibit to a Report on Form 20-F for Navios Maritime Midstream Partners LP filed by on March 17, 2015, and hereby incorporated by reference)

General Partner Option Agreement, dated November 18, 2014, between Navios Maritime Acquisition Corporation and Navios Maritime Holdings Inc. (Previously filed as an exhibit to Navios Midstream's Annual Report on Form 20-F for the year ended December 31, 2014 filed on March 17, 2015 and hereby incorporated by reference)

Option Agreement, dated November 18, 2014, between Navios Maritime Acquisition Corporation and Navios Maritime Holdings Inc. (Previously filed as an exhibit to a Report on Form 20-F for Navios Maritime Midstream Partners LP filed by Navios Acquisition on March 17, 2015, and hereby incorporated by reference)

Bareboat charters and Memoranda of Agreement, among Sea 66 Leasing Co. Limited, Sea 67 Leasing Co. Limited, Sea 68 Leasing Co. Limited and Sea 69 Leasing Co. Limited wholly owned subsidiaries of China Merchants Bank Limited, dated March 31, 2018, providing for the sale and leaseback of the NAVE ATRIA, NAVE AQUILA, NAVE BELLATRIX and NAVE ORION respectively (Previously filed as an exhibit to a Report on Form 20-F filed by Navios Acquisition on April 5, 2018, and hereby incorporated by reference)

Table of Contents

D. Exchange controls

Under the laws of the of the Marshall Islands, Cayman Islands, Hong Kong and the British Virgin Islands, the countries of incorporation of the Company and its subsidiaries, there are currently no restrictions on the export or import of capital, including foreign exchange controls, or restrictions that affect the remittance of dividends, interest or other payments to non-resident holders of our common stock.

E. Taxation of Holders

MATERIAL INCOME TAX CONSIDERATIONS

Marshall Islands Tax Considerations

We are incorporated in the Marshall Islands. Under current Marshall Islands law, we are not subject to tax on income or capital gains, and no Marshall Islands withholding tax will be imposed upon payments of dividends by us to our stockholders. Under the laws of Marshall Islands, of the companies' incorporation and vessels' registration, the companies are subject to registration and tonnage taxes which have been included in the daily management fee.

Other Jurisdictions

The Marshall Islands, Cayman Islands, British Virgin Islands, and Hong Kong, do not impose a tax on international shipping income. As of January 1, 2014, foreign-flagged vessels that are managed by Greek or foreign ship management companies in Greece are subject to duties towards the Greek state which are calculated on the basis of the relevant vessels' tonnage. The payment of such duties exhausts the tax liability of the foreign ship owning company and the relevant manager against any tax duty, charge or contribution payable on income from the exploitation of the foreign flagged vessel.

Material U.S. Federal Income Tax Consequences

The following discussion addresses the material U.S. federal income tax consequences relating to the purchase, ownership and disposition of shares of our common stock by beneficial owners of such shares. This discussion is based on current provisions of the Code, treasury regulations promulgated under the Code (Treasury Regulations), Internal Revenue Service (IRS) rulings and pronouncements, and judicial decisions now in effect, all of which are subject to change at any time by legislative, judicial or administrative action. Any such changes may be applied retroactively. No rulings from the IRS have been or will be sought with respect to the U.S. federal income tax consequences discussed below. The discussion below is not in any way binding on the IRS or the courts nor does it in any way constitute an assurance that the U.S. federal income tax consequences discussed herein will be accepted by the IRS or the courts.

The U.S. federal income tax consequences to a beneficial owner of shares of our common stock may vary depending upon such beneficial owner's particular situation or status. This discussion is limited to beneficial owners of shares of our common stock who hold such shares as capital assets, and it does not address aspects of U.S. federal income taxation that may be relevant to such beneficial owners that are subject to special treatment under U.S. federal income tax laws, including but not limited to: dealers in securities; banks and other financial institutions; insurance companies; tax-exempt organizations, plans or accounts; persons holding shares of our common stock as part of a hedge, straddle or other risk reduction transaction; persons holding shares of our common stock through partnerships, trusts or other entities; beneficial owners of shares of our common stock that own 2% or more (by vote or value) of our outstanding capital stock; U.S. Holders (as defined below) whose functional currency is not the U.S. dollar; and

controlled foreign corporations or passive foreign investment companies, as those terms are defined in the Code. In addition, this discussion does not consider the effects of any applicable foreign, state, local or other tax laws, or estate or gift tax considerations, or the alternative minimum tax.

For purposes of this discussion, a U.S. Holder is a beneficial owner of shares of our common stock that is, for U.S. federal income tax purposes: a citizen or resident of the United States; a corporation (or other entity that is classified as a corporation for U.S. federal income tax purposes) created or organized in or under the laws of the United States or any state thereof (including the District of Columbia); an estate the income of which is subject to U.S. federal income tax regardless of its source; or a trust, if a court within the United States can exercise primary supervision over its administration, and one or more United States persons (as defined in the Code) have the authority to control all of the substantial decisions of that trust (or the trust was in existence on August 20, 1996, was treated as a domestic trust on August 19, 1996 and validly elected to continue to be treated as a domestic trust).

For purposes of this discussion, a beneficial owner of shares of our common stock (other than a partnership or an entity or arrangement treated as a partnership for U.S. federal income tax purposes) that is not a U.S. Holder is a Non-U.S. Holder.

If a partnership or other entity or arrangement classified as a partnership for U.S. federal income tax purposes holds shares of our common stock, the tax treatment of its partners generally will depend upon the status of the partner, the activities of the partnership and certain determinations made at the partner level. If you are a partner in a partnership holding shares of our common stock, you should consult your own tax advisor regarding the tax consequences to you of the partnership's ownership of shares of our common stock.

Table of Contents

We urge beneficial owners of shares of our common stock to consult their own tax advisers as to the particular tax considerations applicable to them relating to the purchase, ownership and disposition of shares of our common stock, including the applicability of U.S. federal, state and local tax laws and non-U.S. tax laws.

U.S. Federal Income Taxation of Navios Acquisition

Navios Acquisition is a foreign company that is treated as a corporation for U.S. federal income tax purposes and it neither has made, nor intends to make, an election to be treated as other than a corporation for U.S. federal income tax purposes. Consequently, among other things, U.S. Holders will not directly be subject to U.S. federal income tax on their shares of our income, but rather will be subject to U.S. federal income tax on distributions received from us and dispositions of shares of our common stock as described below.

Taxation of Operating Income: In General

Under the Code, income derived from, or in connection with, the use (or hiring or leasing for use) of a vessel, or the performance of services directly related to the use of a vessel, is treated as Transportation Income. Such Transportation Income can arise, for example, from the use (or hiring or leasing for use) of vessels for use on a time, voyage or bareboat charter basis, from the participation in a pool, partnership, strategic alliance, joint operating agreement, code sharing arrangement or other joint venture it directly or indirectly owns or participates in that generates such income, or from the performance of services directly related to those uses.

Transportation Income that is attributable to transportation that either begins or ends, but that does not both begin and end, in the United States is considered to be 50.0% derived from sources within the United States (U.S. Source International Transportation Income). Transportation Income attributable to transportation that both begins and ends in the United States is considered to be 100.0% derived from sources within the United States (U.S. Source Domestic Transportation Income). Navios Acquisition is not permitted by law to engage in transportation that produces income which is considered to be 100% from sources within the United States. Transportation Income that is attributable to transportation exclusively between non-U.S. destinations is considered to be 100.0% derived from sources outside the United States. Transportation Income derived from sources outside the United States generally is not subject to U.S. federal income tax.

U.S. Source International Transportation Income generally is subject to a 4.0% U.S. federal income tax without allowance for deduction or, if such U.S. Source International Transportation Income is effectively connected with the conduct of a trade or business in the United States, U.S. federal corporate income tax (presently imposed at a 21.0% rate) as well as a branch profits tax (presently imposed at a 30.0% rate on effectively connected earnings), unless the non-U.S. corporation qualifies for exemption from tax under Section 883 of the Code.

Exemption of Operating Income From U.S. Federal Income Taxation

In general, the exemption from U.S. federal income taxation under Section 883 of the Code provides that if a non-U.S. corporation satisfies the requirements of Section 883 of the Code and the Treasury Regulations thereunder, it will not be subject to the net basis and branch profits taxes or the 4% gross basis tax (each as described below) on its U.S. Source International Transportation income.

Under Section 883 of the Code, we will be exempt from U.S. federal income taxation on our U.S. Source International Transportation income if:

1. we and our vessel-owning subsidiaries are organized in a foreign country (country of organization) that grants an equivalent exemption to corporations organized in the United States; and

2. either:

more than 50% of the value of our stock is owned, directly or indirectly, for at least half the number of days during the taxable year by (i) individuals who are residents of our country of organization or of another foreign country that grants an equivalent exemption to corporations organized in the United States, (ii) non-U.S. corporations that meet the Publicly Traded Test discussed below and are organized in a foreign country that grants an equivalent exemption to corporations organized in the United States or (iii) certain other qualified persons described in the applicable regulations, which we refer to as the Qualified Shareholder Stock Ownership Test, or

our stock is primarily and regularly traded on an established securities market in our country of organization, in another country that grants an equivalent exemption to U.S. corporations, or in the United States, which we refer to as the Publicly-Traded Test ; and

3. we meet certain substantiation, reporting and other requirements.

Table of Contents

Currently, the jurisdiction where we are incorporated, as well as the jurisdictions where our vessel-owning subsidiaries are incorporated, namely, the Republic of the Marshall Islands, the Cayman Islands, Hong Kong and the British Virgin Islands, grant an equivalent exemption to U.S. corporations. Therefore, at present, we will be exempt from U.S. federal income taxation with respect to our U.S. Source International Transportation income if we satisfy either the Qualified Shareholder Stock Ownership Test or the Publicly-Traded Test. Our ability to satisfy the Qualified Shareholder Stock Ownership Test and Publicly-Traded Test is discussed below.

The Treasury Regulations provide, in pertinent part, that stock of a foreign corporation will be considered to be primarily traded on an established securities market if the number of shares of each class of stock that are traded during any taxable year on all established securities markets in that country exceeds the number of shares in each such class that are traded during that year on established securities markets in any other single country. Our common stock is currently primarily traded on the NYSE.

Under the Treasury Regulations, our stock is considered to be regularly traded on an established securities market if one or more classes of our stock representing more than 50% of our outstanding shares, by total combined voting power of all classes of stock entitled to vote and total value, is listed on the market during the taxable year, which we refer to as the listing threshold. Since our common stock, which represents more than 50% of our outstanding shares by vote and value, is currently listed on the NYSE, we currently satisfy the listing requirement.

It is further required that with respect to each class of stock relied upon to meet the listing threshold (i) such class of stock is traded on the market, other than de minimis quantities, on at least 60 days during the taxable year or 1/6 of the days in a short taxable year; and (ii) the aggregate number of shares of such class of stock traded on such market during the taxable year is at least 10% of the average number of shares of such class of stock outstanding during such year or as appropriately adjusted in the case of a short taxable year. We currently satisfy the trading frequency and trading volume tests. Even if this were not the case, the regulations provide that the trading frequency and trading volume tests will be deemed satisfied by a class of stock if such class of stock is traded during the taxable year on an established market in the United States and such class of stock is regularly quoted by dealers making a market in such stock, which condition our common stock currently meets.

Notwithstanding the foregoing, the Treasury Regulations provide, in pertinent part, that our common stock will not be considered to be regularly traded on an established securities market for any taxable year in which 50% or more of the vote and value of the outstanding shares of our common stock are owned, actually or constructively under specified stock attribution rules, on more than half the days during the taxable year by persons who each own 5% or more of the vote and value of our common stock, which we refer to as the 5% Override Rule.

For purposes of being able to determine the persons who owns 5% or more of our common stock, or 5% Stockholders, the Treasury Regulations permit us to rely on Schedule 13G and Schedule 13D filings with the SEC to identify persons who have a 5% or more beneficial interest in our common stock. The Treasury Regulations further provide that an investment company that is registered under the Investment Company Act will not be treated as a 5% Stockholder for such purposes.

If our 5% Stockholders did own more than 50% of our common stock, then we would be subject to the 5% Override Rule unless we were able to establish that among the closely-held group of 5% Stockholders, there are sufficient 5% Stockholders that are qualified stockholders for purposes of Section 883 to preclude non-qualified 5% Stockholders in the closely-held group from owning 50% or more of the total value of each class of our stock for more than half the number of days during the taxable year. In order to establish this, sufficient 5% Stockholders that are qualified stockholders would have to comply with certain documentation and certification requirements designed to substantiate their identity as qualified stockholders. These requirements are onerous and there is no guarantee that we would be

able to satisfy them in all cases.

Alpha Merit Corporation (a Marshall Islands corporation) owns approximately 43.0% of our common stock. Navios Holdings (a Marshall Islands corporation) currently owns 100% of Alpha Merit Corporation. For more than half the days during 2017, Navios Holdings directly owned approximately 43.0% of our common stock for U.S. federal income tax purposes. Navios Holdings has represented to us that it presently meets the Publicly Traded Test and has agreed to comply with the documentation and certification requirements described above. Accordingly, we anticipate that we will not be subject to the 5% Override Rule. However, there can be no assurance that Navios Holdings will continue to meet the Publicly Traded Test or continue to be able to comply with the documentation and certification requirements described above. Consequently, there can be no assurance that we will not be subject to the 5% Override Rule in the future. Effective as of January 1, 2018, Alpha Merit Corporation became a disregarded entity of Navios Holdings for U.S. federal income tax purposes, and therefore, Navios Holdings is treated for U.S. federal income tax purposes as directly owning approximately 43.0% of our common stock.

Taxation in Absence of Exemption

To the extent the benefits of Section 883 are unavailable, our U.S. Source International Transportation Income, to the extent not considered to be effectively connected with the conduct of a U.S. trade or business, as described below, would be subject to a 4% tax imposed by Section 887 of the Code on a gross basis, without the benefit of deductions.

Since under the sourcing rules described above, no more than 50% of our U.S. Source International Transportation Income would be treated as being derived from U.S. sources, the maximum effective rate of U.S. federal income tax on our U.S. Source International Transportation Income would never exceed 2% of our gross income under the 4% gross basis tax regime.

Table of Contents

To the extent the benefits of the Section 883 exemption are unavailable and our U.S. Source International Transportation Income is considered to be effectively connected with the conduct of a U.S. trade or business, as described below, any such effectively connected U.S. Source International Transportation Income, net of applicable deductions, would be subject to the U.S. federal corporate income tax currently imposed at a 21.0 rate%. In addition, we may be subject to the 30% branch profits tax on any earnings and profits effectively connected with the conduct of such trade or business, as determined after allowance for certain adjustments, and on certain interest paid or deemed paid attributable to the conduct of our U.S. trade or business.

Our U.S. Source International Transportation Income would be considered effectively connected with the conduct of a U.S. trade or business only if:

we have, or are considered to have, a fixed place of business in the United States involved in the earning of shipping income; and

substantially all of our U.S. Source International Transportation Income is attributable to regularly scheduled transportation, such as the operation of a vessel that follows a published schedule with repeated sailings at regular intervals between the same points for voyages that begin or end in the United States.

We do not intend to have, or permit circumstances that would result in having any vessel operating to the United States on a regularly scheduled basis. Based on the foregoing and on the expected mode of our shipping operations and other activities, we believe that none of our U.S. Source International Transportation Income will be effectively connected with the conduct of a U.S. trade or business.

United States Taxation of Gain on Sale of Vessels

Regardless of whether we will qualify for exemption under Section 883, we should not be subject to U.S. federal income taxation with respect to gain realized on a sale of a vessel, provided that we did not depreciate the vessel for U.S. federal income tax purposes. If we took depreciation deductions with respect to the vessel for U.S. federal income tax purposes (which would be the case if the vessel had produced effectively connected income), upon the sale of such vessel, a portion of any gain realized on the sale would be sourced to the U.S. in proportion to the depreciation deductions taken in the U.S. compared to the total depreciation of the vessel.

United States Federal Income Taxation of U.S. Holders

Distributions

Subject to the discussion of the rules applicable to a PFIC below, any distributions made by us with respect to our common stock to a U.S. Holder will constitute dividends, which will be taxable as ordinary income, to the extent of our current or accumulated earnings and profits, as determined under U.S. federal income tax principles. Distributions in excess of our current and accumulated earnings and profits will be treated first as a nontaxable return of capital to the extent of the U.S. Holder's tax basis in our common stock on a dollar-for-dollar basis and thereafter as capital gain, which will be either long-term or short-term capital gain depending upon whether the U.S. Holder held the common shares for more than one year. Because Navios Acquisition is not a U.S. corporation, U.S. Holders that are corporations will not be entitled to claim a dividends received deduction with respect to any distributions they receive from us. Dividends paid with respect to Navios Acquisition's common stock will be treated as foreign source income and generally will be passive category income for purposes of computing allowable foreign tax credits for U.S.

foreign tax credit purposes.

Dividends received by a non-corporate U.S. Holder are taxed at ordinary income tax rates (currently, a maximum 37.0%) unless such dividends constitute qualified dividend income. Qualified dividend income generally includes a dividend paid by a foreign corporation if (i) the stock with respect to which such dividend was paid is readily tradable on an established securities market in the U.S., (ii) the foreign corporation is not a PFIC for the taxable year during which the dividend is paid and the immediately preceding taxable year (which we do not believe we have been for 2017, or will be for subsequent years, as discussed below), (iii) the non-corporate U.S. Holder has owned the stock for more than 60 days during the 121-day period beginning 60 days before the date on which the stock become ex-dividend (and has not entered into certain risk limiting transactions with respect to such stock), and (iv) the non-corporate U.S. Holder is not under an obligation to make related payments with respect to positions in substantially similar or related property. Qualified dividend income is subject to the long-term capital gain tax rate, which is currently a maximum of 20%. In addition, a 3.8% tax may apply to certain investment income. See **Medicare Tax** below. Because the common stock of Navios Acquisition was traded on the NYSE during 2018, dividends paid during 2018 to U.S. Holders that are U.S. citizens or individual residents should generally be qualified dividend income subject to the long-term capital gains tax rate. However if the NYSE were to delist our shares from trading on its exchange, future dividends may not constitute qualified dividend income. See **Risk Factors** above.

Special rules may apply to any amounts received in respect of our common stock that are treated as extraordinary dividends. In general, an extraordinary dividend is a dividend with respect to a share of common stock that is equal to or in excess of 10.0% of a U.S. Holder's adjusted tax basis (or fair market value upon the U.S. Holder's election) in such share. In addition, extraordinary dividends include dividends received within a one year period that, in the aggregate, equal or exceed 20.0% of a U.S. Holder's adjusted tax basis (or fair market value). If we pay an extraordinary dividend on our common stock that is treated as qualified dividend income, then any loss recognized by an individual U.S. Holder from the sale or exchange of such common stock will be treated as long-term capital loss to the extent of the amount of such dividend.

Table of Contents

Sale, Exchange or Other Disposition of Common Stock

Subject to the discussion of PFICs below, a U.S. Holder generally will recognize capital gain or loss upon a sale, exchange or other disposition of a share of our common stock in an amount equal to the difference between the amount realized by the U.S. Holder from such sale, exchange or other disposition and the U.S. Holder's adjusted tax basis in such stock. The U.S. Holder's initial tax basis in a share of our common stock generally will be the U.S. Holder's purchase price for the share and that tax basis will be reduced (but not below zero) by the amount of any distributions on our common stock that are treated as non-taxable returns of capital (as discussed under "Distributions" above). Such gain or loss will be treated as long-term capital gain or loss if the U.S. Holder's holding period is greater than one year at the time of the sale, exchange or other disposition. Such capital gain or loss will generally be treated as U.S.-source income or loss, as applicable, for U.S. foreign tax credit purposes.

A corporate U.S. Holder's capital gains, long-term and short-term, are taxed at ordinary income tax rates. If a corporate U.S. Holder recognizes a loss upon the disposition of our common stock, the corporate U.S. Holder is limited to using the loss to offset other capital gain. If a corporate U.S. Holder has no other capital gain in the tax year of the loss, it may carry the capital loss back three years and forward five years.

As described above, long-term capital gains of non-corporate U.S. Holders are subject to the current favorable maximum tax rate of 20%. In addition, a 3.8% tax may apply to certain investment income. See "Medicare Tax" below. A non-corporate U.S. Holder may deduct a capital loss resulting from a disposition of our common stock to the extent of capital gains plus up to \$3,000 (\$1,500 for married individuals filing separate tax returns) and may carry forward capital losses indefinitely.

Passive Foreign Investment Company Status and Significant Tax Consequences

In general, we will be treated as a PFIC with respect to a U.S. Holder if, for any taxable year in which such holder held our common stock, either:

at least 75% of our gross income for such taxable year consists of passive income (e.g., dividends, interest, capital gains and rents derived other than in the active conduct of a rental business); or

at least 50% of the average value of the assets held by us during such taxable year produce, or are held for the production of, passive income.

For purposes of determining whether we are a PFIC, we will be treated as earning and owning our proportionate share of the income and assets, respectively, of any subsidiary corporation in which we own at least 25% of the value of the subsidiary's stock. Income earned, or deemed earned, by us in connection with the performance of services will not constitute passive income. By contrast, rental income will constitute passive income unless we are treated as deriving our rental income in the active conduct of a trade or business under applicable rules.

Based on our current and projected methods of operations, and an opinion of counsel, we believe that we were not a PFIC for the 2011 through 2018 taxable years (we were treated as a PFIC for the 2008 through 2010 taxable years), and we do not believe that we will be a PFIC for 2018 and subsequent taxable years. For post-2010 taxable years, our U.S. counsel, Thompson Hine LLP, is of the opinion that (1) the income we receive from the time chartering activities and assets engaged in generating such income should not be treated as passive income or assets, respectively, and (2) so long as our income from time charters exceeds 25.0% of our gross income for each taxable year after our 2010

taxable year and the value of our vessels contracted under time charters exceeds 50.0% of the average value of our assets for each taxable year after our 2010 taxable year, we should not be a PFIC for any taxable year after our 2010 taxable year. This opinion is based on representations and projections provided to our counsel by us regarding our assets, income and charters, and its validity is conditioned on the accuracy of such representations and projections.

Our counsel's opinion is based principally on their conclusion that, for purposes of determining whether we are a PFIC, the gross income we derive (or are deemed to derive from any subsidiary in which we own at least 25% by value of the subsidiary's stock) from time chartering activities should constitute services income, rather than rental income. Correspondingly, such income should not constitute passive income, and the assets that we own and operate (or that we are deemed to own and operate through any subsidiary

in which we own at least 25% by value of the subsidiary's stock) in connection with the production of such income, in particular, the vessels we own (or we are deemed to own) that are subject to time charters, should not constitute passive assets for purposes of determining whether we are or have been a PFIC. We expect that all of the vessels in our fleet will be engaged in time chartering activities and intend to treat our income from those activities as non-passive income, and the vessels engaged in those activities as non-passive assets, for PFIC purposes.

Our counsel has advised us that there is a significant amount of legal authority consisting of the Code, legislative history, IRS pronouncements and rulings supporting our position that the income from our time chartering activities constitutes services income (rather than rental income). There is, however, no direct legal authority under the PFIC rules addressing whether income from time chartering activities is services income or rental income. Moreover, in a case not interpreting the PFIC rules, *Tidewater Inc. v. United States*, 565 F.3d 299 (5th Cir. 2009), the Fifth Circuit held that the vessel time charters at issue generated predominantly rental income

Table of Contents

rather than services income. However, the IRS stated in an Action on Decision (AOD 2010-001) that it disagrees with, and will not acquiesce to, the way that the rental versus services framework was applied to the facts in the Tidewater decision, and in its discussion stated that the time charters at issue in Tidewater would be treated as producing services income for PFIC purposes. The IRS's AOD, however, is an administrative action that cannot be relied upon or otherwise cited as precedent by taxpayers.

The opinion of our counsel is not binding on the IRS or any court. Thus, while we have received an opinion of our counsel in support of our position, there is a possibility that the IRS or a court could disagree with this position and the opinion of our counsel. In addition, although we intend to conduct our affairs in a manner to avoid being classified as a PFIC with respect to any taxable year, we cannot assure you that the nature of our operations will not change in the future.

As discussed more fully below, if we were to be treated as a PFIC for any taxable year in which a U.S. Holder owned our common stock, the U.S. Holder would be subject to different taxation rules depending on whether the U.S. Holder makes an election to treat us as a Qualified Electing Fund, which we refer to as a QEF election. (As previously discussed, we were not a PFIC for the 2011 through 2018 taxable years and we do not believe that we will be treated as a PFIC for 2018 and subsequent taxable years.) As an alternative to making a QEF election, the U.S. Holder may be able to make a mark-to-market election with respect to our common stock, as discussed below. In addition, if we were treated as a PFIC for any taxable year in which a U.S. Holder owned our common stock, the U.S. Holder generally would be required to file IRS Form 8621 with the U.S. Holder's U.S. federal income tax return for each year to report the U.S. Holder's ownership of such common stock. It should also be noted that, if we were treated as a PFIC for any taxable year in which a U.S. Holder owned our common stock and any of our non-U.S. subsidiaries were also a PFIC, the U.S. Holder would be treated as owning a proportionate amount (by value) of the shares of the lower-tier PFIC for purposes of the application of these rules.

Taxation of U.S. Holders Making a Timely QEF Election

If we were to be treated as a PFIC for any taxable year and a U.S. Holder makes a timely QEF election (any such U.S. Holder, an Electing Holder), the Electing Holder must report for U.S. federal income tax purposes its pro rata share of our ordinary earnings and net capital gain, if any, for our taxable year that ends with or within the Electing Holder's taxable year, regardless of whether or not the Electing Holder received any distributions from us in that year. Such income inclusions would not be eligible for the preferential tax rates applicable to qualified dividend income. The Electing Holder's adjusted tax basis in our common stock will be increased to reflect taxed but undistributed earnings and profits. Distributions to the Electing Holder of our earnings and profits that were previously taxed will result in a corresponding reduction in the Electing Holder's adjusted tax basis in our common stock and will not be taxed again once distributed. The Electing Holder would not, however, be entitled to a deduction for its pro rata share of any losses that we incur with respect to any year. An Electing Holder generally will recognize capital gain or loss on the sale, exchange or other disposition of our common stock.

Even if a U.S. Holder makes a QEF election for one of our taxable years, if we were a PFIC for a prior taxable year during which the U.S. Holder owned our common stock and for which the U.S. Holder did not make a timely QEF election, the U.S. Holder would also be subject to the more adverse rules described below under Taxation of U.S. Holders Not Making a Timely QEF or Mark-to-Market Election. However, under certain circumstances, a U.S. Holder may be permitted to make a retroactive QEF election with respect to us for any open taxable years in the U.S. Holder's holding period for our common stock in which we are treated as a PFIC. Additionally, to the extent that any of our subsidiaries is a PFIC, a U.S. Holder's QEF election with respect to us would not be effective with respect to the U.S. Holder's deemed ownership of the stock of such subsidiary and a separate QEF election with respect to such subsidiary would be required.

A U.S. Holder makes a QEF election with respect to any year that we are a PFIC by filing IRS Form 8621 with the U.S. Holder's U.S. federal income tax return. If, contrary to our expectations, we were to determine that we are treated as a PFIC for any taxable year, we would notify all U.S. Holders and would provide all necessary information to any U.S. Holder that requests such information in order to make the QEF election described above with respect to us and the relevant subsidiaries. A QEF election would not apply to any taxable year for which we are not a PFIC, but would remain in effect with respect to any subsequent taxable year for which we are a PFIC, unless the IRS consents to the revocation of the election.

Taxation of U.S. Holders Making a Mark-to-Market Election

If we were to be treated as a PFIC for any taxable year and, subject to the possibility that our common stock may be delisted by a qualifying exchange, our common stock were treated as marketable stock, then, as an alternative to making a QEF election, a U.S. Holder would be allowed to make a mark-to-market election with respect to our common stock, provided the U.S. Holder completes and files IRS Form 8621 in accordance with the relevant instructions and related Treasury Regulations. If that election is made, the U.S. Holder generally would include as ordinary income in each taxable year the excess, if any, of the fair market value of the U.S. Holder's common stock at the end of the taxable year over the holder's adjusted tax basis in the common stock. The U.S. Holder also would be permitted an ordinary loss in respect of the excess, if any, of the U.S. Holder's adjusted tax basis in the common stock over the fair market value thereof at the end of the taxable year, but only to the extent of the net amount previously included in income as a result of the mark-to-market election. A U.S. Holder's tax basis in the U.S. Holder's common stock would be adjusted to reflect any such income or loss recognized. Gain recognized on the sale, exchange or other disposition of our common stock would be treated as ordinary income, and any loss recognized on the sale, exchange or other disposition of the common stock would be treated as ordinary

Table of Contents

loss to the extent that such loss does not exceed the net mark-to-market gains previously included in income by the U.S. Holder. A mark-to-market election would not apply to our common stock owned by a U.S. Holder in any taxable year during which we are not a PFIC, but would remain in effect with respect to any subsequent taxable year for which we are a PFIC, unless our common stock is no longer treated as marketable stock or the IRS consents to the revocation of the election.

Even if a U.S. Holder makes a mark-to-market election for one of our taxable years, if we were a PFIC for a prior taxable year during which the U.S. Holder owned our common stock and for which the U.S. Holder did not make a timely mark-to-market election or a timely QEF election, the U.S. Holder would also be subject to the more adverse rules described below under *Taxation of U.S. Holders Not Making a Timely QEF or Mark-to-Market Election*.

Additionally, to the extent that any of our subsidiaries is a PFIC, a mark-to-market election with respect to our common stock would not apply to the U.S. Holder's deemed ownership of the stock of such subsidiary.

Taxation of U.S. Holders Not Making a Timely QEF or Mark-to-Market Election

If we were to be treated as a PFIC for any taxable year, a U.S. Holder who does not make either a timely QEF election or a timely mark-to-market election for that year (i.e., the taxable year in which the U.S. Holder's holding period commences), whom we refer to as a Non-Electing Holder, would be subject to special rules resulting in increased tax liability with respect to (1) any excess distribution (i.e., the portion of any distributions received by the Non-Electing Holder on our common stock in a taxable year in excess of 125.0% of the average annual distributions received by the Non-Electing Holder in the three preceding taxable years, or, if shorter, the Non-Electing Holder's holding period for the common stock), and (2) any gain realized on the sale, exchange or other disposition of our common stock. Under these special rules:

the excess distribution and any gain would be allocated ratably over the Non-Electing Holder's aggregate holding period for the common stock;

the amount allocated to the current taxable year and any year prior to the year we were first treated as a PFIC with respect to the Non-Electing Holder would be taxed as ordinary income; and

the amount allocated to each of the other taxable years would be subject to tax at the highest rate of tax in effect for the applicable class of taxpayer for that year, and an interest charge for the deemed deferral benefit would be imposed with respect to the resulting tax attributable to each such other taxable year.

Moreover, (i) any dividends received by a non-corporate U.S. Holder in a year in which we are a PFIC (or in which we were a PFIC in the preceding year) will not be treated as qualified dividend income and will be subject to tax at rates applicable to ordinary income and (ii) if a Non-Electing Holder who is an individual dies while owning our common stock, such holder's successor generally would not receive a step-up in tax basis with respect to such stock. Additionally, to the extent that any of our subsidiaries is a PFIC, the foregoing consequences would apply to the U.S. Holder's deemed receipt of any excess distribution on, or gain deemed realized on the disposition of, the stock of such subsidiary deemed owned by the U.S. Holder.

If we are treated as a PFIC for any taxable year during the holding period of a U.S. Holder, unless the U.S. Holder makes a timely QEF election, or a timely mark-to-market election, for the first taxable year in which

the U.S. Holder holds our common stock and in which we are a PFIC, we will continue to be treated as a PFIC for all succeeding years during which the U.S. Holder owns our common stock even if we are not a PFIC for such years. U.S. Holders are encouraged to consult their tax advisers with respect to any available elections that may be applicable in such a situation. In this regard, while it is our position and our U.S. counsel's position that we should not be a PFIC for taxable years 2011 through 2018 and we believe that we will not be a PFIC for subsequent taxable years, there is no assurance that these positions are correct. In addition, U.S. Holders should consult their tax advisers regarding the IRS information reporting and filing obligations that may arise as a result of the ownership of shares in a PFIC.

Controlled Foreign Corporation

Although we believe that Navios Acquisition likely was not a controlled foreign corporation (a CFC) as of December 31, 2018, or at any time during 2018, we believe that tax rules recently enacted by the Tax Cuts and Jobs Act, including the repeal of the prohibition against attribution, may result in Navios Acquisition being treated as a CFC for U.S. federal income tax purposes in the future. Navios Acquisition's status as a CFC depends in large part on the percentage of our equity held by Navios Holdings (either directly or indirectly through Alpha Merit Corporation), whether one or more U.S. Holders own 10.0% or more (by vote or value) of the equity of Navios Acquisition, and various other factors.

Tax rules recently enacted by the Tax Cuts and Jobs Act, including the imposition of so-called downward attribution for purposes of determining whether a non-U.S. corporation is a CFC, may result in Navios Acquisition being treated as a CFC for U.S. federal income tax purposes in the future. Currently, Navios Holdings beneficially owns 35.2% of our common stock indirectly through Alpha Merit Corporation. Through downward attribution, U.S. subsidiaries of Navios Holdings are treated as constructive owners of this stock interest for purposes of determining whether we are a CFC. If, in the future, U.S. Holders (including U.S. subsidiaries of Navios Holdings, as discussed above) that each own 10% or more of our equity (by vote or value), would own in the aggregate more than 50% of our equity (by vote or value), in each case, directly, indirectly, or constructively, we should become a CFC.

Table of Contents

The U.S. federal income tax consequences of U.S. holders who at all times own less than 10% of our equity, directly, indirectly, and constructively, should not be affected were we to become a CFC. However, were we to become a CFC any U.S. Holder who owns 10% or more of our equity (by vote or value), directly, indirectly, or constructively (but not through downward attribution) should be subject to U.S. federal income tax on its pro rata share of our so-called subpart F income and should be subject to U.S. federal income tax reporting requirements. Income from our time chartering activities could constitute subpart F income if it were derived from passive rental activities. But, Thompson Hine's opinion that the income we earn from our time chartering activities should not be treated as passive income is based principally on their conclusion that such income should constitute services income, rather than rental income (see *United States Federal Income Taxation of U.S. Holders - Passive Foreign Investment Company Status and Significant Tax Consequences*). So, we believe that the income we earn from our time chartering activities should not be treated as subpart F income and thus no such U.S. Holder should be subject to U.S. federal income tax on such income, regardless of whether IRS's position that the Section 883 exemption does not apply to subpart F income is correct. If, contrary to our belief discussed above, the income we earn from our time chartering activities were treated as subpart F income, it is unclear whether such income would nonetheless be exempted from U.S. federal income tax for so long as we qualify for the Section 883 exemption (see *U.S. Federal Income Taxation of Navios Acquisition Exemption of Operating Income from U.S. Federal Income Taxation*). In this regard, the IRS has taken the position in Revenue Ruling 87-15 that the Section 883 exemption does not cause subpart F income to be exempted from U.S. federal income tax. Any U.S. Holder of Navios Acquisition that owns 10% or more (by vote or value), directly, indirectly, or constructively, of the equity of Navios Acquisition should consult its own tax advisor regarding U.S. federal tax consequences that may result from Navios Acquisition being treated as a CFC.

Any U.S. Holder of Navios Acquisition or Navios Holdings that owns 10% or more (by vote or value) of the equity of Navios Acquisition or Navios Holdings, as the case may be, should consult its own tax advisor regarding U.S. federal tax consequences that may result from Navios Acquisition being treated as a CFC.

Medicare Tax

A U.S. Holder that is an individual or estate, or a trust that does not fall into a special class of trusts that is exempt from such tax, will generally be subject to a 3.8% tax on the lesser of (i) the U.S. Holder's net investment income for a taxable year and (ii) the excess of the U.S. Holder's modified adjusted gross income for such taxable year over \$200,000 (\$250,000 in the case of joint filers). For these purposes, net investment income will generally include dividends paid with respect to our common stock and net gain attributable to the disposition of our common stock (in each case, unless such common stock is held in connection with certain trades or businesses), but will be reduced by any deductions properly allocable to such income or net gain.

United States Federal Income Taxation of Non-U.S. Holders**Distributions**

A Non-U.S. Holder generally will not be subject to U.S. federal income tax or withholding tax on distributions received with respect to our common stock if the Non-U.S. Holder is not engaged in a U.S. trade or business. If the Non-U.S. Holder is engaged in a U.S. trade or business, our distributions will be subject to U.S. federal income tax to the extent they constitute income effectively connected with the Non-U.S. Holder's U.S. trade or business (and a corporate Non-U.S. Holder may also be subject to U.S. federal branch profits tax). However, distributions paid to a Non-U.S. Holder who is engaged in a trade or business may be exempt from taxation under an income tax treaty if the income arising from the distribution is not attributable to a U.S. permanent establishment maintained by the Non-U.S. Holder.

Sale, Exchange or other Disposition of Common Stock

In general, a Non-U.S. Holder will not be subject to U.S. federal income tax or withholding tax on any gain resulting from the disposition of our common stock provided the Non-U.S. Holder is not engaged in a U.S. trade or business. A Non-U.S. Holder that is engaged in a U.S. trade or business will be subject to U.S. federal income tax in the event the gain from the disposition of our common stock is effectively connected with the conduct of such U.S. trade or business (provided, in the case of a Non-U.S. Holder entitled to the benefits of an income tax treaty with the United States, such gain also is attributable to a U.S. permanent establishment). However, even if not engaged in a U.S. trade or business, individual Non-U.S. Holders may be subject to tax on gain resulting from the disposition of our common stock if they are present in the United States for 183 days or more during the taxable year of the disposition and meet certain other requirements.

Certain Information Reporting Requirements

Individual U.S. Holders (and to the extent specified in applicable Treasury Regulations, certain individual Non-U.S. Holders and certain U.S. Holders that are entities) that hold specified foreign financial assets, including our common stock, whose aggregate value exceeds \$75,000 at any time during the taxable year or \$50,000 on the last day of the taxable year (or such higher amounts as prescribed by applicable Treasury Regulations) are required to file a report on IRS Form 8938 with information relating to the assets

Table of Contents

for each such taxable year. Specified foreign financial assets would include, among other things, our common stock, unless such common stock is held in an account maintained by a U.S. financial institution (as defined). Substantial penalties apply to any failure to timely file IRS Form 8938, unless the failure is shown to be due to reasonable cause and not due to willful neglect. Additionally, in the event an individual U.S. Holder (and to the extent specified in applicable Treasury Regulations, an individual Non-U.S. Holder or a U.S. entity) that is required to file IRS Form 8938 does not file such form, the statute of limitations on the assessment of U.S. federal income taxes of such holder for the related tax year may not close until three years after the date that the required information is filed. U.S. Holders (including U.S. entities) and Non-U.S. Holders should consult their own tax advisors regarding their reporting obligations.

U.S. Backup Withholding Tax and Related Information Reporting Requirements

In general, dividend payments and payments of proceeds from the disposition of our common stock made to a non-corporate U.S. Holder may be subject to information reporting requirements. Such payments may also be subject to backup withholding tax (currently at a rate of 24%) if you are a non-corporate U.S. Holder and you:

fail to provide an accurate taxpayer identification number;

are notified by the IRS that you are subject to backup withholding because you have previously failed to report all interest or dividends required to be shown on your federal income tax returns; or

fail to comply with applicable certification requirements.

A U.S. Holder generally is required to certify its compliance with the backup withholding rules on IRS Form W-9.

Non-U.S. Holders may be required to establish their exemption from information reporting and backup withholding by certifying their status on an applicable IRS Form W-8.

Backup withholding tax is not an additional tax. Rather, you generally may obtain a credit of any amounts withheld against your liability for U.S. federal income tax (and obtain a refund of any amounts withheld in excess of such liability) by timely filing a U.S. federal income tax return with the IRS.

H. Documents on display

We file reports and other information with the SEC. These materials, including this Annual Report and the accompanying exhibits, may be inspected and copied at the public facilities maintained by the SEC at 100 F Street, N.E., Washington, D.C. 20549, or from the SEC's website <http://www.sec.gov>. You may obtain information on the

operation of the public reference room by calling 1 (800) SEC-0330 and you may obtain copies at prescribed rates.

I. Subsidiary information

Not applicable.

Item 11. *Quantitative and Qualitative Disclosures about Market Risks*

Foreign Exchange Risk

Our functional and reporting currency is the U.S. dollar. We engage in worldwide commerce with a variety of entities. Although our operations may expose us to certain levels of foreign currency risk, our transactions are predominantly U.S. dollar denominated. Transactions in currencies other than U.S. dollar are translated at the exchange rate in effect at the date of each transaction. Differences in exchange rates during the period between the date a transaction denominated in a foreign currency is consummated and the date on which it is either settled or translated, are recognized. Expenses incurred in foreign currencies against which the U.S. Dollar falls in value can increase thereby decreasing our income or vice versa if the U.S. dollar increases in value. For example, during the year ended December 31, 2018, the value of U.S. dollar increased by approximately 4.9% as compared to the Euro.

Table of Contents

Interest Rate Risk

In each of December 31, 2018 and 2017, Navios Acquisition had a total of \$1.2 billion and \$1.1 billion, respectively, in short term and long-term indebtedness. The debt is U.S. dollar-denominated. Borrowings under our credit facilities bear interest at rates based on a premium over U.S. \$ LIBOR except for the interest rate on the Notes which is fixed. Therefore, we are exposed to the risk that our interest expense may increase if interest rates rise. For the year ended December 31, 2018, 2017 and 2016 we paid interest on our outstanding debt at a weighted average interest rate of 6.94%, 6.5% and 6.0%, respectively. A 1% increase in LIBOR would have increased our interest expense for the years ended December 31, 2018, 2017 and 2016 by \$3.9 million, \$4.3 million and \$5.1 million, respectively.

Concentration of Credit Risk

Financial instruments, which potentially subject us to significant concentrations of credit risk, consist principally of trade accounts receivable. We closely monitor our exposure to customers for credit risk. We have policies in place to ensure that we trade with customers with an appropriate credit history. Our major customers during 2016 were: Navig8, Shell and Mansel. For the year ended December 31, 2016, these three customers accounted for 33.0%, 20.0% and 14.7%, respectively, of Navios Acquisition's revenue. Our major customers during 2017 were: Navig8, Shell and Mansel. For the year ended December 31, 2017, Navig8, Mansel and Shell accounted for 31.9%, 14.3% and 13.7%, respectively, of Navios Acquisition's revenue. Our major customers during 2018 were: Navig8 and Mansel. For the year ended December 31, 2018, Navig8 and Mansel accounted for 39.2% and 12.1%, respectively, of Navios Acquisition's revenue.

Cash and Cash Equivalents

Cash deposits and cash equivalents in excess of amounts covered by government-provided insurance are exposed to loss in the event of non-performance by financial institutions. The Company does maintain cash deposits and equivalents in excess of government-provided insurance limits. The Company also minimizes exposure to credit risk by dealing with a diversified group of major financial institutions.

Inflation

Inflation has had a minimal impact on vessel operating expenses and general and administrative expenses. Our management does not consider inflation to be a significant risk to direct expenses in the current and foreseeable economic environment.

PART II

Item 13. *Defaults, Dividend Arrearages and Delinquencies*

None.

Item 14. *Material Modifications to the Rights of Shareholders and Use of Proceeds*

None.

Item 15. Controls and Procedures

A. Disclosure Controls and Procedures

The management of Navios Acquisition, with the participation of the Chief Executive Officer and Chief Financial Officer, conducted an evaluation, pursuant to Rule 13a-15 promulgated under the Securities Act of 1934, as amended (the Exchange Act), of the effectiveness of our disclosure controls and procedures as of December 31, 2018. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective as of December 31, 2018.

Disclosure controls and procedures means controls and other procedures that are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms and that such information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosures.

Table of Contents

B. Management's annual report on internal control over financial reporting

The management of Navios Acquisition is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a-15(f) or 15d-15(f) of the Exchange Act. Navios Acquisition's internal control system was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles in the United States (GAAP).

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Navios Acquisition's management assessed the effectiveness of Navios Acquisition's internal control over financial reporting as of December 31, 2018. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control – Integrated Framework (2013). Based on its assessment, management concluded that, as of December 31, 2018, Navios Acquisition's internal control over financial reporting is effective based on those criteria.

Navios Acquisition's independent registered public accounting firm has issued an attestation report on Navios Acquisition's internal control over financial reporting.

C. Attestation report of the registered public accounting firm

Navios Acquisition's independent registered public accounting firm has issued an audit report on Navios Acquisition's internal control over financial reporting. This report appears on Page F-2 of the consolidated financial statements.

D. Changes in internal control over financial reporting

There have been no changes in internal controls over financial reporting (identified in connection with management's evaluation of such internal controls over financial reporting) that occurred during the year covered by this Annual Report that have materially affected, or are reasonably likely to materially affect, Navios Acquisition's internal controls over financial reporting.

Item 16A. Audit Committee Financial Expert

Our audit committee currently consists of three independent directors, Mr. Veraros, Mr. Kokkinis and Ms. Noury. Each member of our audit committee is financially literate under the current listing standards of the NYSE, and our board of directors has determined that Mr. Veraros qualifies as an audit committee financial expert, as such term is defined by the SEC. Mr. Veraros is independent under applicable NYSE and SEC standards.

Item 16B. Code of Ethics

We have adopted a code of conduct and ethics applicable to our directors and officers in accordance with applicable federal securities laws and the rules of the NYSE. The code is available for review on our website at <http://www.navios-acquisition.com>.

Item 16C. *Principal Accountant Fees and Services*

Audit Fees

Our principal accountants for the fiscal years 2018 and 2017 were PricewaterhouseCoopers S.A. The audit fees for the audit for each of the years ended December 31, 2018 and 2017 were \$0.3 million and \$0.2 million, respectively.

Audit-Related Fees

There were no audit-related fees billed in 2018 and 2017.

Tax Fees

There were no tax fees billed in 2018 and 2017.

Table of Contents**Other Fees**

There were no other fees billed in 2018 and 2017.

Audit Committee

The Audit Committee is responsible for the appointment, replacement, compensation, evaluation and oversight of the work of the independent auditors. As part of this responsibility, the audit committee pre-approves the audit and non-audit services performed by the independent auditors in order to assure that they do not impair the auditors independence from Navios Acquisition. The Audit Committee has adopted a policy which sets forth the procedures and the conditions pursuant to which services proposed to be performed by the independent auditors may be pre-approved.

The Audit Committee separately pre-approved all engagements and fees paid to our principal accountants in 2018 and 2017.

Item 16D. Exemptions from the Listing Standards for Audit Committees

Not applicable.

Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers

In February 2018, the Board of Directors of Navios Acquisition authorized a stock repurchase program for up to \$25.0 million of Navios Acquisition's common stock, for two years. Stock repurchases will be made from time to time for cash in open market transactions at prevailing market prices or in privately negotiated transactions. The timing and amount of repurchases under the program will be determined by management based upon market conditions and other factors. Repurchases may be made pursuant to a program adopted under Rule 10b5-1 under the Securities Exchange Act of 1934, as amended. The program does not require any minimum repurchase or any specific number or amount of shares of common stock and may be suspended or reinstated at any time in Navios Acquisition's discretion and without notice. The Board of Directors will review the program periodically. Repurchases will be subject to restrictions under Navios Acquisition's credit facilities and indenture.

The table below sets forth the repurchases made under the stock repurchase program during the fiscal year ended December 31, 2018.

Period	(a) Total Number of Shares Purchased ⁽¹⁾	(b) Average Price Paid per Share ⁽¹⁾	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽¹⁾	(d) Maximum Dollar Value of Shares that May Yet Be Purchased under the Plans or Programs
February 1, 2018 through February 28, 2018	178,620	\$ 11.33	178,620	\$ 22,976,943.31

Edgar Filing: Navios Maritime Acquisition CORP - Form 20-F

March 1, 2018 through March 31, 2018	165,816	12.76	165,816	\$ 20,861,041.23
April 1, 2018, through April 30, 2018	55,073	12.00	55,073	\$ 20,199,924.11
May 1, 2018 through May 31, 2018	20,263	11.25	20,263	\$ 19,972,041.21
June 1, 2018, through June 30, 2018	41,735	10.20	41,735	\$ 19,546,341.51
July 1, 2018, through July 31, 2018	29,456	8.78	29,456	\$ 19,287,725.99
August 1, 2018 through August 31, 2018	27,763	8.50	27,763	\$ 19,051,849.66

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and Board of Directors of

Navios Maritime Acquisition Corporation:

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Navios Maritime Acquisition Corporation and its subsidiaries (the Company) as of December 31, 2018 and 2017, and the related consolidated statements of operations, of changes in equity and of cash flows for each of the three years in the period ended December 31, 2018, including the related notes (collectively referred to as the consolidated financial statements). We also have audited the Company's internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2018 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control Integrated Framework (2013) issued by the COSO.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Annual Report on Internal Control over Financial Reporting, appearing under item 15 (b) of the Company's 2018 Annual Report on Form 20-F. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide

a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

/s/ PricewaterhouseCoopers S.A.

Athens, Greece

April 19, 2019

We have served as the Company's auditor since 2010.

NAVIOS MARITIME ACQUISITION CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. Dollars except share and per share data)

NOTE 1: DESCRIPTION OF ORGANIZATION AND BUSINESS OPERATIONS

Navios Maritime Acquisition Corporation (Navios Acquisition or the Company) (NYSE: NNA) owns a large fleet of modern crude oil, refined petroleum product and chemical tankers providing world-wide marine transportation services. The Company's strategy is to charter its vessels to international oil companies, refiners and large vessel operators under long, medium and short-term contracts. The Company is committed to providing quality transportation services and developing and maintaining long-term relationships with its customers. The operations of Navios Acquisition are managed by a subsidiary of Navios Maritime Holdings Inc. (Navios Holdings).

Navios Acquisition was incorporated in the Republic of the Marshall Islands on March 14, 2008. On July 1, 2008, Navios Acquisition completed its initial public offering (IPO). On May 28, 2010, Navios Acquisition consummated the vessel acquisition which constituted its initial business combination. Following such transaction, Navios Acquisition commenced its operations as an operating company.

In November 2014, Navios Maritime Midstream Partners L.P. (Navios Midstream), a company formed as a subsidiary of Navios Acquisition, completed an IPO of its units in the United States and was listed on the NYSE under the symbol NAP . (Refer to Note 10, Investment in affiliates). Navios Midstream was a publicly traded master limited partnership, through December 13, 2018, which owned, operated and acquired crude oil tankers, refined petroleum product tankers, chemical tankers and liquefied petroleum gas tankers under long-term employment contracts.

On November 16, 2017, in accordance with the terms of the Navios Midstream Partnership Agreement all of the issued and outstanding 9,342,692 subordinated units of Navios Midstream converted into common units on a one-for-one basis. Following their conversion into common units, these units had the same distribution rights as all other common units.

On December 13, 2018, the Company completed the merger (the Merger) contemplated by the previously announced Agreement and Plan of Merger, (the Merger Agreement), dated as of October 7, 2018, by and among Navios Acquisition, its direct wholly-owned subsidiary NMA Sub LLC (Merger Sub), Navios Midstream and Navios Midstream Partners GP LLC (the NAP General Partner). Pursuant to the Merger Agreement, Merger Sub merged with and into Navios Midstream, with Navios Midstream surviving as a wholly-owned subsidiary of Navios Acquisition.

Under the terms of the transaction, Navios Acquisition acquired all of the outstanding publicly held common units of Navios Midstream through the issuance of 3,683,284 newly issued shares of Navios Acquisition common stock in exchange for the publicly held common units of Navios Midstream at an exchange ratio of 0.42 shares of Navios Acquisition for each Navios Midstream common unit. Following the Merger the results of operations of Navios Midstream are consolidated under Navios Acquisition.

As of December 31, 2018, Navios Acquisition owned a 100% limited partner interest in Navios Midstream, which included a 3.4% general partner interest.

As of December 31, 2018, Navios Holdings had 32.8% of the voting power and 35.8% of the economic interest in Navios Acquisition.

As of December 31, 2018, Navios Acquisition had outstanding: 13,280,927 shares of common stock and 1,000 shares of Series C Convertible Preferred Stock held by Navios Holdings.

NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of presentation: The accompanying consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America (GAAP).

The Company historically presented changes in restricted cash and cash equivalents depending on the nature of the cash flow within the consolidated statement of cash flows. During the first quarter of 2018, the Company adopted the guidance codified in ASU 2016-18, Statement of Cash Flows (Topic 230): Restricted Cash (ASU 2016-18), which requires that restricted cash and cash equivalents be included as components of total cash and cash equivalents as presented on the statement of cash flows. The recognition and measurement guidance for restricted cash is not affected. The Company applied this guidance retrospectively to all prior periods presented in the Company's financial statements.

Table of Contents**NAVIOS MARITIME ACQUISITION CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

(Expressed in thousands of U.S. Dollars except share and per share data)

The reclassification of restricted cash in the statement of cash flows does not impact net income as previously reported or any prior amounts reported on the statements of operations, or balance sheet. The effect of the retrospective application of this change in accounting principle on the Company's statement of cash flows for the year ended December 31, 2017 resulted in an increase of operating cash flows in the amount of \$26 and a decrease of financing cash flows in the amount of \$2,085 with a corresponding decrease in cash and cash equivalents of \$2,059. The effect of the retrospective application of this change in accounting principle on the Company's statement of cash flows for the year ended December 31, 2016 resulted in a decrease of operating cash flows in the amount of \$224 and an increase of financing cash flows in the amount of \$750 with a corresponding increase in cash and cash equivalents of \$526.

Reverse Stock Split:

On November 9, 2018, the Stockholders of Navios Acquisition approved a one-for-15 reverse stock split of all outstanding common stock shares of the Company which was effected on November 14, 2018. The effect of the reverse stock split was to combine each 15 shares of outstanding common stock into one new share, with no change in authorized shares or par value per share, and to reduce the number of common stock shares outstanding from approximately 142.9 million shares to approximately 9.5 million shares. No fractional shares of common stock were issued in connection with the reverse stock split. Stockholders who would otherwise hold fractional shares of the Company's common stock received a cash payment in lieu thereof. All issued and outstanding shares of common stock, conversion terms of preferred stock, options to purchase common stock and per share amounts contained in the financial statements, in accordance with Staff Accounting Bulletin Topic 4C, have been retroactively adjusted to reflect the reverse split for all periods presented.

(ab) Early adoption of new accounting standards

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842) (ASU 2016-02). ASU 2016-02 will apply to both types of leases—capital (or finance) leases and operating leases. According to the new Accounting Standard, (a) lessees will be required to recognize assets and liabilities on the balance sheet for the rights and obligations created by all leases with terms of more than 12 months and (b) previous accounting standards for lessors will be updated to align certain requirements with the updates to lessee accounting standards and the revenue recognition accounting standards. ASU 2016-02 is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early application is permitted. In July 2018, the FASB issued ASU 2018-10, Codification Improvements to Topic 842 Leases (ASU 2018-10). The amendments in ASU 2018-10 affect narrow aspects of the guidance issued in the amendments in ASU 2016-02. The amendments in this Update affect the amendments in Update 2016-02, which are not yet effective, but for which early adoption upon issuance is permitted. For entities that early adopted Topic 842, the amendments are effective upon issuance of this Update, and the transition requirements are the same as those in Topic 842. For entities that have not adopted Topic 842, the effective date and transition requirements will be the same as the effective date and transition requirements in Topic 842. In addition in July 2018, the FASB issued ASU 2018-11, Targeted Improvements to Topic 842 Leases (ASU 2018-11). The improvements in ASU 2018-11 provide for (a) an optional new transition method for adoption that results in initial recognition of a

cumulative effect adjustment to retained earnings in the year of adoption and (b) a practical expedient for lessors, under certain circumstances, to combine the lease and non-lease components of revenues for presentation purposes.

The Company has elected to early adopt the requirements of ASU 2016-02 effective January 1, 2018, using the modified retrospective method which is consistent, with the approach the Company has elected under the new revenue standard, and elected to apply the additional optional transition method along with the following practical expedients: (i) a package of practical expedients which does not require the Company to reassess: (1) whether any expired or existing contracts are or contain leases; (2) lease classification for any expired or existing leases; and (3) whether initial direct costs for any expired or existing leases would qualify for capitalization under ASC 842; (ii) to account for non-lease components (primarily crew and maintenance services) of time charters as a single lease component as the timing and pattern of transfer of the non-lease components and associated lease component are the same, the lease components, if accounted for separately, would be classified as an operating lease, and such non-lease components are not predominant components of the combined component. The Company believes that combining the lease and non-lease components provides for more meaningful financial reporting as it is more reflective of the predominant component in the time charter contracts that is the lease component. As a result of adoption, there was no cumulative impact to the Company's retained earnings at January 1, 2018. The comparative information has not been restated and continues to be reported under the accounting standards in effect for those periods.

In December 2018, FASB issued ASU 2018-20, Leases (Topic 842), Narrow-Scope Improvements for Lessors : to clarify guidance for lessors on sales taxes and other similar taxes collected from lessees, certain lessor costs and recognition of variable payments for contracts with lease and non lease components. The Company has early adopted the standard effective January 1, 2018 and is using that date as the date of initial application. The adoption of this guidance had no impact on the Company's disclosures to the consolidated financial statements

Table of Contents

NAVIOS MARITIME ACQUISITION CORPORATION

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of U.S. Dollars except share and per share data)

(ac) Adoption of new accounting standards

On January 1, 2018, the Company adopted ASU No. 2014-09, Revenue from Contracts with Customers and the related amendments (ASC 606 or the new revenue standard) using the modified retrospective method, requiring to recognize the cumulative effect of adopting this guidance as an adjustment to the 2018 opening balance of retained earnings and not retrospectively adjusting prior periods. As a result of adoption, there was no cumulative impact to the Company's retained earnings at January 1, 2018. The comparative information has not been restated and continues to be reported under the accounting standards in effect for those periods. Please refer to Note 2 (w).

In August 2016, the FASB issued Accounting Standards Update No. 2016-15, Statement of Cash Flows: Classification of Certain Cash Receipts and Cash Payments (ASU 2016-15). This Update addresses eight specific cash flow issues with the objective of reducing the existing diversity in practice. The Company adopted the new guidance on January 1, 2018 and had no impact on the consolidated results of operations, financial condition, or cash flows.

(ad) Recent accounting pronouncements

In August 2018, FASB issued ASU 2018-13, Fair Value Measurement (Topic 820): Disclosure Framework-Changes to the Disclosure Requirements for Fair Value Measurement. This update modifies the disclosure requirements on fair value measurements. ASU 2018-13 is effective for fiscal years beginning after December 15, 2019, and earlier adoption is permitted.

In October 2018, FASB issued ASU 2018-17, Consolidation (Topic 810): Targeted Improvements to Related Party Guidance for Variable Interest Entities (ASU 2018-17). ASU 2018-17 provides that indirect interests held through related parties in common control arrangements should be considered on a proportional basis for determining whether fees paid to decision makers and service providers are variable interests. This is consistent with how indirect interests held through related parties under common control are considered for determining whether a reporting entity must consolidate a Variable Interest Entity (VIE). For Public business entities the amendments are effective for fiscal years beginning after December 15, 2019, and interim periods within those fiscal years. Early adoption is permitted.

In June 2016, FASB issued ASU 2016-13, Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. This standard requires entities to measure all expected credit losses of financial assets held at a reporting date based on historical experience, current conditions, and reasonable and supportable forecasts in order to record credit losses in a more timely matter. ASU 2016-13 also amends the accounting for credit losses on available-for-sale debt securities and purchased financial assets with credit deterioration. The standard is effective for interim and annual reporting periods beginning after December 15, 2019, although early adoption is permitted for interim and annual periods beginning after December 15, 2018. In November 2018, FASB issued ASU 2018-19 Codification Improvements to topic 326, Financial Instruments-Credit Losses. The amendments in this update clarify that operating lease receivables are not within the scope of ASC 326-20 and should instead be accounted for under the new leasing standard, ASC 842.

The Company is currently assessing the impact of the aforementioned accounting guidance will have on its consolidated financial statements.

(b) Principles of consolidation: The accompanying consolidated financial statements include the accounts of Navios Acquisition, a Marshall Islands corporation, and its majority owned subsidiaries. All significant intercompany balances and transactions have been eliminated in the consolidated statements.

The Company also consolidates entities that are determined to be variable interest entities (VIEs) as defined in the accounting guidance, if it determines that it is the primary beneficiary. A variable interest entity is defined as a legal entity where either (a) equity interest holders as a group lack the characteristics of a controlling financial interest, including decision making ability and an interest in the entity s residual risks and rewards, or (b) the equity holders have not provided sufficient equity investment to permit the entity to finance its activities without additional subordinated financial support, or (c) the voting rights of some investors are not proportional to their obligations to absorb the expected losses of the entity, their rights to receive the expected residual returns of the entity, or both and substantially all of the entity s activities either involve or are conducted on behalf of an investor that has disproportionately few voting rights.

Based on internal forecasts and projections that take into account reasonably possible changes in our trading performance, management believes that the Company has adequate financial resources to continue in operation and meet its financial commitments, including but not limited to capital expenditures and debt service obligations, for a period of at least twelve months from the date of issuance of these consolidated financial statements. Accordingly, the Company continues to adopt the going concern basis in preparing its financial statements.

Table of Contents**NAVIOS MARITIME ACQUISITION CORPORATION****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

(Expressed in thousands of U.S. Dollars except share and per share data)

(c) Equity method investments: Affiliates are entities over which the Company generally has between 20% and 50% of the voting rights, or over which the Company has significant influence, but it does not exercise control. Investments in these entities are accounted for under the equity method of accounting. Under this method, the Company records an investment in the stock of an affiliate at cost, and adjusts the carrying amount for its share of the earnings or losses of the affiliate subsequent to the date of investment and reports the recognized earnings or losses in income. Dividends received from an affiliate reduce the carrying amount of the investment. The Company recognizes gains and losses in earnings for the issuance of shares by its affiliates, provided that the issuance of such shares qualifies as a sale of such shares. When the Company's share of losses in an affiliate equals or exceeds its interest in the affiliate, the Company does not recognize further losses, unless the Company has incurred obligations or made payments on behalf of the affiliate.

Navios Acquisition evaluates its equity method investments, for other than temporary impairment, on a quarterly basis. Consideration is given to (1) the length of time and the extent to which the fair value has been less than the carrying value, (2) the financial condition and near-term prospects and (3) the intent and ability of the Company to retain its investments for a period of time sufficient to allow for any anticipated recovery in fair value.

(d) Subsidiaries: Subsidiaries are those entities in which the Company has an interest of more than one half of the voting rights and/or otherwise has power to govern the financial and operating policies. The acquisition method of accounting is used to account for the acquisition of subsidiaries if deemed to be a business combination. The cost of an acquisition is measured as the fair value of the assets given up, shares issued or liabilities undertaken at the date of acquisition. The excess of the cost of acquisition over the fair value of the net assets acquired and liabilities assumed is recorded as goodwill.

As of December 31, 2018, the entities included in these consolidated financial statements were:
