Each vessel has a capacity of 33,667 dwt and 1,932 teu and are sister ships built in 1990, in South Korea. The vessels are employed on short term charters until October 2007, at a rate of about \$17,000 per day.

-

In June 2007, took delivery of the M/V Clan Gladiator, a Handysize container ship the Company had previously agreed to acquire in May 2007, for \$25.7 million. The vessel has a capacity of 30,007 dwt and 1,742 teu, built in 1992, in Germany, The vessel is employed under a period charter contract at a rate of \$19,000 per day till April 2008.

-

Following these charter agreements, approximately 92% of Euroseas total fleet days in 2007 and approximately 33% in 2008 are fixed under period charters, already concluded spot charters, or, otherwise protected from market fluctuations.

Company Development:

-

In July 2007, the Company announced the simultaneous closing of its 5,000,000 share follow-on public offering and the full exercise of the underwriters' over-allotment option to purchase an additional 750,000 shares at a price of \$13.50 per share. Net proceeds to Euroseas after underwriting discounts and estimated offering expenses were approximately \$73 million. The Company intends to use the net proceeds to acquire additional vessels in the drybulk and container sectors and for general corporate purposes.

Aristides Pittas, Chairman and CEO of Euroseas commented: The second quarter of 2007 has been one of significant progress in the development of Euroseas as a public company. During the second quarter of 2007, we deployed the remaining of the proceeds of our January 2007 follow-on offering increasing our revenue base and market capitalization. Equally significantly, in June 2007, we completed our second follow-on common stock offering raising net proceeds of about \$73 million, funds that will enable us to continue our growth. We have already purchased two vessels the delivery of which earlier this month increased our fleet to 13 vessels. We intend to continue executing our plan to grow our fleet by focusing on age and size segments of the drybulk and containership sectors which we believe maximize our return on equity. The growth of our dividend from \$0.36 per share for the first six months of 2006 to \$0.49 per share for the first six months of 2007, a 36% increase, is the best evidence of the effectiveness of our investment and employment strategy, especially since it represents only a fraction of our net income even excluding any capital gains during those periods. We believe our strategy will enable us to continue providing consistent and significant dividends and overall returns to our shareholders.

Tasos Aslidis, Chief Financial Officer of Euroseas commented: The results of the first six months of 2007 reflect significantly higher revenues compared to the first six months of 2006 due to the higher average time charter equivalent rate our vessels have achieved and the higher number of vessels in our fleet. Specifically during the first six months of 2007, our fleet earned on average \$18,567 per vessel per day compared to \$13,434 per vessel per day during the same period in 2006. Daily vessel operating expenses including management fees during the first six months of 2007 reflect an increase of about 9% on a per vessel per day basis compared to the same period in 2006. This increase is mainly due to the increase in euro/dollar exchange rate and higher crew costs because of the increased competition in securing quality personnel.

As of today, including the vessels we recently took delivery of, 92% of our ship capacity days in 2007 have been fixed (including the spot voyages already concluded for which the revenue is already known). In 2008, 33% of our capacity is under time charter contracts or protected from market fluctuations. We believe that our contract coverage gives us a solid revenue base for 2007 and 2008, more predictable cash flows and sufficient downside protection, while still allowing us to participate in the potential upside of the spot market during periods of rising market rates.

Second Quarter 2007 Results:

For the second quarter of 2007, the Company reported total net revenues of \$15.6 million and net income of \$6.4 million representing a 52.9% increase and 3.0% decrease, respectively, over total net revenues of \$10.2 million and net income of \$6.6 million during the second quarter of 2006. On average, 10.08 vessels were operated during the second quarter 2007 earning an average time charter equivalent rate of \$18,776 per day compared to 8.38 vessels in the same period of 2006 earning on average \$13,778 per day. Net income for the second quarter of 2006 includes a \$2.2 million capital gain from the sale of M/V Pantelis P in May 2006. Excluding this capital gain, net income in the second quarter of 2007 represents an increase of 44.1% over the second quarter of 2006.

Adjusted EBITDA for the second quarter of 2007 was \$11.4 million, a 31.6% increase or \$8.6 million during the second quarter of 2006; exclusive of the capital gain in the second quarter of 2006. Adjusted EBITDA would have been \$6.4 million an increase of 75.8%. Please see below for Adjusted EBITDA reconciliation to net income and cash flow provided by operating activities.

Basic earnings per share for the second quarter of 2007 were \$0.35, calculated on 18,370,861 weighted average number of shares outstanding, compared to earnings per share of \$0.52, inclusive of a \$0.17 capital gain per share on the sale of M/V Pantelis P , for the second quarter of 2006, calculated on 12,620,114 weighted average number of shares outstanding. Diluted earnings per share were \$0.35 and \$0.52, inclusive of capital gains of \$0.17, for the second quarter of 2007 and 2006 respectively. The Company has recently declared a quarterly dividend of \$0.25 per share, which represents its eighth consecutive quarterly dividend and a 39% increase over last year's second quarter dividend.

Earnings per share for the second quarter of 2007 and 2006 do not include \$0.03 and (\$0.01) respectively of cash flow attributable to amortization of the fair value of period charter contracts acquired that is usually included by security analysts in their published estimates of earnings per share.

Results for the six month period ended June 30, 2007 included a capital gain of \$3.4 million from the sale of M/V Ariel , while results for the six month period ended June 30, 2006 included a capital gain of \$2.2 million from the sale of M/V Pantelis P , two of the Company's handysize vessels. Excluding the capital gains, net income and Adjusted EBITDA for the six month period ended June 30, 2007 increased 58.6% and 81.7%, respectively, over the same period of 2006.

Basic earnings per share for the six months ended June 30, 2007, were \$0.92, calculated on 17,258,629 weighted average number of shares outstanding, compared to earnings per share of \$0.80 for the same period of 2006 calculated on 12,449,194 weighted average number of shares outstanding. (1) Average number of vessels is the number of vessels that constituted our fleet for the relevant period, as measured by the sum of the number of calendar days each vessel was a part of our fleet during the period divided by the number of calendar days in that period.

(2) Calendar days. We define calendar days as the total number of days in a period during which each vessel in our fleet was in our possession including off-hire days associated with major repairs, drydockings or special or intermediate surveys. Calendar days are an indicator of the size of our fleet over a period and affect both the amount of revenues and the amount of expenses that we record during that period.

(3) Available days. We define available days as the total number of days in a period during which each vessel in our fleet was in our possession net of off-hire days associated with scheduled repairs, drydockings or special or intermediate surveys. The shipping industry uses available days to measure the number of days in a period during which vessels were available to generate revenues.

(4) Voyage days. We define voyage days as the total number of days in a period during which each vessel in our fleet was in our possession net of off-hire days associated with scheduled and unscheduled repairs, drydockings or special or intermediate surveys or days waiting to find employment or other offhire. The shipping industry uses voyage days to measure the number of days in a period during which vessels actually generate revenues.

(5) Fleet utilization. We calculate fleet utilization by dividing the number of our voyage days during a period by the number of our available days during that period. The shipping industry uses fleet utilization to measure a company's efficiency in finding suitable employment for its vessels and minimizing the amount of days that its vessels are off-hire for reasons such as unscheduled repairs or days waiting to find employment.

(6) Time charter equivalent, or TCE, is a measure of the average daily revenue performance of a vessel on a per voyage basis. Our method of calculating TCE is consistent with industry standards and is determined by dividing revenue generated from voyage charters net of voyage expenses by available days for the relevant time period. Voyage expenses primarily consist of port, canal and fuel costs that are unique to a particular voyage, which would otherwise be paid by the charterer under a time charter contract, as well as commissions. TCE is a standard shipping industry performance measure used primarily to compare period-to-period changes in a shipping company's performance despite changes in the mix of charter types (i.e., spot voyage charters, time charters and bareboat charters) under which the vessels may be employed between the periods.

(7) Daily vessel operating expenses, which includes crew costs, provisions, deck and engine stores, lubricating oil, insurance, maintenance and repairs are calculated by dividing vessel operating expenses by fleet calendar days for the relevant time period.

(8) Daily general and administrative expense is calculated by dividing general and administrative expense by fleet calendar days for the relevant time period.

(9) Total vessel operating expenses, or TVOE, is a measure of our total expenses associated with operating our vessels. TVOE is the sum of vessel operating expenses and general and administrative expenses. Daily TVOE is calculated by dividing TVOE by fleet calendar days for the relevant time period.

**Adjusted
EBITDA****EBITDA Reconciliation:**

Euroseas Ltd. considers Adjusted EBITDA to represent net earnings before interest, taxes, depreciation, amortization and amortization of deferred revenues from above or below market time charters acquired. Adjusted EBITDA does not represent and should not be considered as an alternative to net income or cash flow from operations, as determined by United States generally accepted accounting principles, or U.S. GAAP, and our calculation of Adjusted EBITDA may not be comparable to that reported by other companies. Adjusted EBITDA is included herein because it is a basis upon which we assess our liquidity position and because we believe that it presents useful information to investors regarding a company's ability to service and/or incur indebtedness. The Company's definition of Adjusted EBITDA may not be the same as that used by other companies in the shipping or other industries.

Basis of Presentation and General Information

Euroseas Ltd. (the Company) was formed on May 5, 2005 under the laws of the Republic of the Marshall Islands to consolidate the beneficial owners of the ship owning companies in existence at that time (see list below). On June 28, 2005, the beneficial owners exchanged all their shares in the ship-owning companies for shares in Friends Investment Company Inc., a newly formed Marshall Islands company. On June 29, 2005, Friends Investment Company Inc. then exchanged all the shares in the ship-owning companies for shares in Euroseas Ltd., thus, becoming the sole shareholder of Euroseas Ltd. The transaction described above constitutes a reorganization of companies under common control, and has been accounted for in a manner similar to a pooling of interests, as each ship-owning company was under the common control of the Pittas family prior to the transfer of ownership of the companies to Euroseas Ltd. Accordingly, the accompanying consolidated financial statements have been presented as if the ship-owning companies were consolidated subsidiaries of the Company for all periods presented and using the historical carrying costs of the assets and the liabilities of the ship-owning companies in existence at that time (see list below). All share counts are adjusted for the Company's 1-for-3 reverse common stock split effected on October 6, 2006.

On August 25, 2005, Euroseas Ltd. sold 2,342,331 common shares at \$9.00 per share in an institutional private placement, together with 0.25 of detachable warrants for each common share to acquire up to 585,589 common shares. The total proceeds, net of issuance costs of \$3,500,309, amounted to \$17,510,400. The warrants allow their holders to acquire one share of Euroseas Ltd. stock at a price of \$10.80 per share and are exercisable for a period of five years from the issue of the warrant.

On August 25, 2005, as a condition to the institutional private placement described above, the Company and Cove Apparel, Inc. (Cove, an unrelated party and public shell corporation) signed an Agreement and Plan of Merger (the Merger Agreement). The Merger Agreement provided for the merger of Cove and Euroseas Acquisition Company Inc., a Delaware corporation and a wholly-owned subsidiary of Euroseas Ltd. formed on June 21, 2005, with the current stockholders of Cove receiving 0.0034323 shares of Euroseas Ltd. common shares for each share of Cove common stock they presently own. Euroseas Ltd., as part of the merger, filed a registration statement with the Securities and Exchange Commission (SEC) to register the shares issued in the merger to the Cove stockholders.

The SEC declared effective on February 3, 2006 the Company's registration statement on Form F-4 that registered the Euroseas Ltd. common shares issued to Cove shareholders. The SEC also declared effective on February 3, 2006 the Company's registration statement on Form F-1 that registered the re-sale of the 2,342,331 Euroseas Ltd. common shares and 585,589 Euroseas Ltd. common shares issuable upon the exercise of the warrants issued in connection with the institutional private placement as well as 272,868 Euroseas Ltd. common shares that were issued to certain Cove shareholders as part of the merger with Cove.

Basis of Presentation and General Information - continued

On March 27, 2006, Euroseas Ltd. consummated the merger with Cove and, as a result, Cove merged into Euroseas Acquisition Company Inc., and the separate corporate existence of Cove ceased. The Cove stockholders received Euroseas Ltd. common shares and received dividends totaling to \$140,334 related to dividends previously declared by Euroseas Ltd. Euroseas Acquisition Company Inc. changed its name to Cove Apparel, Inc. Also, following the completion of the merger, the common stock of Cove has been de-listed and no longer trades on the OTC Bulletin Board. On the date of the merger, Cove had cash of \$10,000, had no other assets and had no liabilities.

Euroseas Ltd. common share was approved to trade on March 2, 2006 and started trading on the OTC Bulletin Board on May 5, 2006. On October 6, 2006, the Company effected a 1-for-3 reverse split of its common stock. On January 31, 2007 upon the pricing of the Company's follow-on common stock offering of 5,750,000 shares the Euroseas Ltd. common share started trading on the NASDAQ Global Market. The total proceeds of the follow-on common stock offering, net of issuance costs of \$4,122,289, amounted to \$43,315,220. On June 29, 2007 the Company priced, and, on July 5, 2007 completed an additional follow-on offering of 5,750,000 shares of common stock. The total proceeds of this follow-on offering, net of issuance costs of \$4,609,428, amounted to \$73,015,572.

The operations of the vessels are managed by Eurobulk Ltd. (the manager), a corporation controlled by members of the Pittas family. The Pittas family is the controlling shareholders of Friends Investment Company Inc.

The manager has an office in Greece located at 40 Ag. Konstantinou Ave, Maroussi, Athens, Greece. The manager provides the Company with a wide range of shipping services such as technical support and maintenance, insurance consulting, chartering, financial and accounting services, as well as executive management services, in consideration for fixed and variable fees (see Note 8).

The Company is engaged in the ocean transportation of dry bulk and containers through ownership and operation of dry bulk and container carriers owned by the following ship-owning companies:

The accompanying condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (US GAAP) for interim financial information. Accordingly, they do not include all the information and notes required by US GAAP for complete financial statements and, in the opinion of management, reflect all adjustments, which include only normal recurring adjustments considered necessary for a fair presentation of the Company's financial position, results of operations and cash flow for the periods presented. Operating results for the three and six month periods ended June 30, 2007 are not necessarily indicative of the results that might be expected for the fiscal year ending December 31, 2007.

The condensed consolidated financial statements as of and for the three and six month periods ended June 30, 2007 and 2006 should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2006 as filed with the SEC on Form 20-F. On January 1, 2007, the Company changed its inventory valuation method for lubricants (see below).

Inventories

Inventories are stated at the lower of cost and market value. Inventories are valued using the FIFO (First-In First-Out) method. On January 1, 2007, the Company changed its accounting policy for the valuation of the inventories of lubricants to the FIFO method to more accurately value its inventories and better match revenues and expenses. Until December 31, 2006, inventories of lubricants were valued on an average cost basis; victualling inventories have always been valued using the FIFO method. The net cumulative effect of this change amounted to (\$13,568) which was recorded in the vessel operating expenses in the three month period ended March 31, 2007. The effect on the three and six month periods ended June 30, 2006 is immaterial and, therefore, the Company has not retrospective applied the new accounting principle.
