Investment Valuation

Municipal bonds are valued by an independent pricing service, taking into consideration yield, liquidity, risk, credit quality, coupon, maturity, type of issue, and any other factors or market data the pricing service deems relevant. The Fund generally values short-term securities according to prices furnished by an independent pricing service, except that short-term securities with remaining maturities of less than 60 days at the time of purchase may be valued at amortized cost. Prices furnished by an independent pricing service for municipal bonds are intended to be indicative of the bid prices currently offered to institutional investors for the securities. Securities for which no quotations are readily available are valued at fair value as determined in accordance with procedures established by and under general supervision of the Trustees.
