### LIQUIDATION VALUE OF AUCTION PREFERRED SHARES TOTAL NET ASSETS APPLICABLE TO COMMON SHAREHOLDERS

At February 28, 2007, the Fund holds no securities that are subject to the federal alternative minimum tax (AMT).

- 1 Denotes a restricted security that either: (a) cannot be offered for public sale without first being registered, or being able to take advantage of an exemption from registration, under the Securities Act of 1933; or (b) is subject to a contractual restriction on public sales. At February 28, 2007, these restricted securities amounted to \$3,362,749, which represented 2.3% of total market value.
- 2 Denotes a restricted security that may be resold without restriction to "qualified institutional buyers" as defined in Rule 144A under the Securities Act of 1933 and that the Fund has determined to be liquid under criteria established by the Fund's Board of Trustees (the "Trustees"). At February 28, 2007, these liquid restricted securities amounted to \$816,105, which represented 0.6% of total market value.
- 3 At February 28, 2007, the cost of investments for federal tax purposes was \$136,474,458. The net unrealized appreciation of investments for federal tax purposes was \$10,184,499. This consists of net unrealized appreciation from investments for those securities having an excess of value over cost of \$10,184,499.

Note: The categories of investments are shown as a percentage of total market value at February 28, 2007.

#### INVESTMENT VALUATION

Market values of the Funds' portfolio securities are determined as follows:

{circle} futures contracts and options are generally valued at market values established by the exchanges on which they are traded at the close of trading on such exchanges. Options traded in the over-the-counter market are generally valued according to the mean between the last bid and the last asked price for the option as provided by an investment dealer or other financial institution that deals in the option. The Trustees may determine in good faith that another method of valuing such investments is necessary to appraise their fair market value;

{circle} prices for total return swaps are furnished by an independent pricing service and are based upon a valuation model incorporating underlying reference indexes, interest rates, yield curves and other market data or factors. Prices for credit default swaps are furnished by an independent pricing service and are based upon a valuation model incorporating default probabilities, recovery rates and other market data or factors;

{circle} for investments in other open-end regulated investment companies, based on net asset value;

{circle} for fixed-income securities, according to prices as furnished by an independent pricing service, except that fixed-income securities with remaining maturities of less than 60 days at the time of purchase are valued at amortized cost; and

{circle} for all other securities at fair value as determined in accordance with procedures established by and under the general supervision of the Trustees.

on a valuation matrix which incorporates both dealer-supplied valuations and electronic data processing techniques. Such prices are generally intended to be indicative of the bid prices currently offered to institutional investors for the securities. The Trustees have approved the use of such pricing services. A number of pricing services are available, and the Fund may use various pricing services or discontinue the use of any pricing service.

Prices provided by independent pricing services may be determined without relying exclusively on quoted prices and may consider institutional trading in similar groups of securities, yield, quality, stability, risk, coupon rate, maturity, type of issue, trading characteristics, and other market data or factors. From time to time, when prices cannot be obtained from an independent pricing service, securities may be valued based on quotes from broker-dealers or other financial institutions that trade the securities.
