Notes to Financial Statements

Three months ended February 28, 2019 and February 28, 2018

1. Organization

ASA Gold and Precious Metals Limited (the “Company”) is a closed-end investment company registered under the Investment Company Act of 1940, as amended (the “1940 Act”), and was organized as an exempted limited liability company under the laws of Bermuda.

2. Investment objective and strategy

The Company is a non-diversified, closed-end fund that seeks long-term capital appreciation primarily through investing in companies engaged in the exploration for, development of projects or mining of precious metals and minerals.

It is a fundamental policy of the Company that at least 80% of its total assets must be (i) invested in common shares or securities convertible into common shares of companies engaged, directly or indirectly, in the exploration, mining or processing of gold, silver, platinum, diamonds or other precious minerals, (ii) held as bullion or other direct forms of gold, silver, platinum or other precious minerals, (iii) invested in instruments representing interests in gold, silver, platinum or other precious minerals such as certificates of deposit therefor, and/or (iv) invested in securities of investment companies, including exchange traded funds, or other securities that seek to replicate the price movement of gold, silver or platinum bullion.

The Company employs bottom-up fundamental analysis and relies on detailed primary research including meetings with company executives, site visits to key operating assets, and proprietary financial analysis in making its investment decisions.

3. Summary of significant accounting policies

The following is a summary of the significant accounting policies:

A. Security valuation

The net asset value of the Company generally is determined as of the close of regular trading on the New York Stock Exchange (the “NYSE”) or the Toronto Stock Exchange (the “TSX”), whichever is later, on the date for which the valuation is being made (the “Valuation Time”). Portfolio securities listed on U.S. and foreign stock exchanges generally are valued at the last reported sale price as of the Valuation Time on the exchange on which the securities are primarily traded, or the last reported bid price if a sale price is not available. Securities traded over the counter are valued at the last reported sale price or the last reported bid price if a sale price is not available. Securities listed on foreign stock exchanges may be fair valued based on significant events that have occurred subsequent to the close of the foreign markets.

Securities for which current market quotations are not readily available are valued at their fair value as determined in good faith by, or in accordance with procedures approved by, the Company’s Board of Directors. If a security is valued at a “fair value,” that value may be different from the last quoted price for the security. Various factors may be reviewed in order to make a good faith determination of a security’s fair value. These factors include, but are not limited to, the nature of the security; relevant financial or business developments of the issuer; actively traded similar or related securities; conversion rights on the security; and changes in overall market conditions.

Where the Company holds securities listed on foreign stock exchanges and American Depositary Receipts (“ADRs”) representing these securities are actively traded in U.S. markets, the securities normally are fair valued based on the last reported sales price of the ADRs.

The difference between cost and market value is reflected separately as net unrealized appreciation (depreciation) on investments. The net realized gain or loss from the sale of securities is determined for accounting purposes on the identified cost basis.

B. Restricted securities

At February 28, 2019 and February 28, 2018, the Company held investments in restricted securities of 4.07% and 6.42% of net assets, respectively, valued in accordance with procedures approved by the Company’s Board of Directors as follows:

Restricted Securities

C. Fair value measurement

In accordance with U.S. GAAP, fair value is defined as the price that the Company would receive to sell an investment or pay to transfer a liability in a timely transaction with an independent buyer in the principal market, or in the absence of a principal market the most advantageous market for the investment or liability. U.S. GAAP establishes a three-tier hierarchy to distinguish between (1) inputs that reflect the assumptions market participants would use in pricing an asset or liability developed based on market data obtained from sources independent of the reporting entity (observable inputs) and (2) inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing an asset or liability developed based on the best information available in the circumstances (unobservable inputs) and to establish classification of fair value measurements for disclosure purposes. Various inputs are used in determining the value of the Company's investments. The inputs are summarized in the three broad levels listed below.

Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access.

Level 2 – Observable inputs other than quoted prices included in level 1 that are observable for the asset or liability either directly or indirectly. These inputs may include quoted prices for identical instruments on an inactive market, prices for similar investments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.

Level 3 – Unobservable inputs for the assets or liability to the extent that relevant observable inputs are not available, representing the Company's own assumptions about the assumptions that a market participant would use in valuing the asset or liability, and that would be based on the best information available.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of February 28, 2019 and February 28, 2018 in valuing the Company's investments at fair value:

Item 2. Controls and Procedures.

(a) The registrant's Principal Executive Officer and Principal Financial Officer have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940 (the "Act")) are effective, based on their evaluation of these disclosure controls and procedures required by Rule 30a-3(b) under the Act and Rules 13a-15(b) or 15d-15(b) under the Securities Exchange Act of 1934, as of a date within 90 days of the filing date of this report

(b) There were no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the Act) that occurred during the registrant's last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the registrant's internal control over financial reporting.

Item 3. Exhibits

Certifications as required by Rule 30a-2(a) under the Act.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
