SEMI-ANNUAL REPORT

JUNE 30, 2017

LETTER TO SHAREHOLDERS

Dear Fellow Shareholders,

U.S. equities rose to record levels in the first half of 2017 in one of the lowest volatility markets in recent history. Adams Diversified Equity Fund had a strong first six months, advancing 11.9% and surpassing the 9.3% return for the S&P 500 for the period.

The year started off strong with the broad stock market generating solid gains in the first quarter driven by confidence in the ongoing economic recovery and expectations stemming from the proposed pro-business policies of the Trump administration. The strength of the economy, particularly the labor market, led the Federal Reserve to raise short-term interest rates a quarter point at both its March and June meetings. The stock market continued to move higher during the second quarter despite signs that it will take longer than expected to realize the potential benefits from proposed policies on tax reform, health care, and infrastructure spending.

The best performing sectors in the S&P 500 for the first six months of 2017 were Technology, Health Care, and Consumer Discretionary. Energy was the worst performing sector due to ongoing pressure on oil prices. For the Fund, the strongest contributors to our outperformance were our holdings in Technology, Consumer Discretionary, and Consumer Staples.

The Technology sector was a standout in the period, increasing 22.3% despite a brief selloff in June due to valuation concerns around leading technology companies, including Apple, Microsoft, Facebook, and Google. While we recognize that the valuation multiples of these stocks have risen during the rally, we believe these companies deserve their current multiples given their compelling long-term growth potential. Software stocks led the broader Technology sector during the period. Your Fund's holdings in Adobe Systems increased 37.4%. Over the past several years Adobe has moved toward a subscription-based model for its publishing and design software, which has created a large and growing recurring revenue stream. The semiconductor industry group also outperformed its benchmark, generating a 34.3% gain in the first half. Lam Research helped fuel the Fund's substantial returns in the group. Lam manufactures equipment to fabricate high-density semiconductor chips, which are benefiting from the growing demand for increased memory capacity in smartphones, data centers, and automobiles.

The Consumer Discretionary sector also performed well during the first six months of 2017. The Fund benefited from holdings in Priceline and Amazon, which generated first-half gains of 27.6% and 29.1%, respectively. Priceline is well positioned to capitalize on favorable underlying travel trends and the growth of online travel booking. Amazon continues to gain market share by disrupting the model of traditional retailers. Its most recent bid to acquire Whole Foods sent shock waves through the grocery, mass market, and food distribution markets as investors fear that Amazon will do to the food industry what it did to bookstores years ago.

Within the Consumer Staples sector, the stock market reaction to the Amazon/Whole Foods news created an opportunity for us to initiate a position in Costco, which we view as a high-quality retailer with a defensible business model. Costco's already competitive pricing model, low-cost gas offering, and unique treasure hunt approach to merchandising make it more insulated from the Amazon threat. The portfolio's strongest performer within Consumer Staples was Philip Morris International, which generated a

LETTER TO SHAREHOLDERS (CONTINUED)

30.7% return. It benefited from the successful launch of a next-generation, reduced-risk product, IQOS, as well as continued strong pricing power. We expect that Altria, the largest domestic tobacco company, will also benefit from these secular trends and initiated a position in the stock. Slightly offsetting our relative gains in Consumer Staples was our investment in CVS Health. CVS has underperformed recently as it works through a transition in its pharmacy management business, Caremark. We find the current valuation of its high quality integrated model, which combines pharmacy, prescription services, and in-store clinics, very attractive for the long-term.

Health Care stocks also contributed to performance, driven by gains late in the period as more moderate health care proposals emerged to potentially replace the Affordable Care Act. The drug-pricing environment, which has pressured distributors for several years, has shown signs of stabilization. We view drug distribution company McKesson as a beneficiary of the better pricing environment and initiated a position in the stock. McKesson generates strong cash flow, has a solid balance sheet, and an attractive valuation. We funded the purchase by exiting our position in Biogen, whose stock appeared to fully reflect its current drug pipeline.

Energy was the weakest sector, declining 11.4% for the first six months of 2017. Crude oil (WTI) prices fell 20% to a 10-month low of \$42.31 in June. The decline was driven by oversupply concerns as already high U.S. crude oil inventory levels were met with rising production. OPEC's decision in November 2016 to curtail production had little impact on prices as U.S. shale production has largely offset the OPEC cuts. We initiated a position in Pioneer Natural Resources to increase our exposure to the Permian basin, the most resource-rich and cost-effective domestic shale opportunity. Pioneer has significant acreage in the core of the basin, which we view as a sustainable competitive advantage.

For the six months ended June 30, 2017, the total return on the Fund's net asset value (NAV) per share (with dividends and capital gains reinvested) was 11.9%. This compares to a 9.3% total return for the S&P 500 and an 8.7% total return for the Lipper Large-Cap Core Funds Average over the same time period. The total return on the market price of the Fund's shares for the period was 13.2%.

For the twelve months ended June 30, 2017, the Fund's total return on NAV was 20.7%. Comparable figures for the S&P 500 and Lipper Large-Cap Core Funds Average were 17.9% and 17.0%, respectively. The Fund's total return on market price was 21.6%.

During the first half of this year, the Fund paid distributions to shareholders in the amount of \$9.9 million, or \$.10 per share, consisting of \$.03 net investment income and \$.01 long-term capital gain, realized in 2016, and \$.06 of net investment income realized in 2017, all taxable in 2017. On July 13, 2017, an additional net investment income distribution of \$.05 per share was declared for payment on September 1, 2017. These constitute the first three payments toward our annual 6% minimum distribution rate commitment. Additionally, the Fund repurchased 596,561 shares of its Common Stock during the past six months. The shares were repurchased at an average price of \$13.87 and a weighted average discount to NAV of 15.6%, resulting in a \$.02 increase to NAV per share.

LETTER TO SHAREHOLDERS (CONTINUED)

On June 8, 2017, Ms. Nancy J. Floyd Prue retired from the Fund after 35 years of service. Ms. Prue held a variety of senior-level positions at Adams Funds. Most recently, she served as Executive Vice President and Director of Shareholder Communications. We thank her for the many contributions she made over the years and wish her well in retirement.

By order of the Board of Directors,

Mark E. Stoeckle

NOTES TO FINANCIAL STATEMENTS (UNAUDITED)

Adams Diversified Equity Fund, Inc. (the Fund) is registered under the Investment Company Act of 1940 (1940 Act) as a diversified investment company. The Fund is an internally-managed closed-end fund whose investment objectives are preservation of capital, the attainment of reasonable income from investments, and an opportunity for capital appreciation.

1. SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation The accompanying financial statements were prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) for investment companies, which require the use of estimates by Fund management. Management believes that estimates and valuations are appropriate; however, actual results may differ from those estimates and the valuations reflected in the financial statements may differ from the value the Fund ultimately realizes.

Affiliates The 1940 Act defines affiliated companies as those companies in which the Fund owns 5% or more of the outstanding voting securities. Additionally, those companies in which the Fund owns more than 25% of the outstanding voting securities are considered to be controlled by the Fund. The Fund and its affiliates, Adams Natural Resources Fund, Inc. (PEO) and Adams Funds Advisers, LLC (AFA) have a shared management team.

PEO The Fund owns 2,186,774 shares of PEO, a non-diversified, closed-end investment company, representing 8% of its outstanding shares. The Fund accounts for PEO as a portfolio investment that meets the definition of a non-controlled affiliate. During 2017, the Fund received dividends and long-term capital gain distributions of \$349,884 and \$87,471, respectively, from its investment in PEO and recognized a change in unrealized appreciation on its investment in PEO of \$(3,214,558). Directors of the Fund are also directors of PEO.

AFA In April 2015, Fund shareholders authorized the Fund to provide investment advisory services to external parties, and the Securities and Exchange Commission granted no action relief under section 12(d)(3) of the 1940 Act to allow the Fund to create a separate, wholly-owned entity for this purpose. The Fund provided the initial capital for the start-up costs of AFA, a Maryland limited liability company, and the Fund is the sole member and General Manager, as provided by the Operating Agreement between AFA and the Fund. This structure mitigates the risk of potential liabilities for the Fund associated with any claims that may arise against AFA during the ordinary course of conducting its business. Given that AFA is an operating company that provides no services to the Fund, the Fund accounts for AFA as a portfolio investment that meets the definition of a controlled affiliate.

AFA provides advisory services to an external party. AFA earns advisory fee revenue based on assets under management. AFA's profit can fluctuate due to the level of allocated expenses and assets under management, as driven by the number of client relationships, level of client investment activity, and client investment performance, and will impact the Fund's valuation of its investment in AFA. As of June 30, 2017, AFA had assets under management of \$120 million managed for one client; failure to maintain this existing relationship or to develop new relationships could impact AFA's ability to generate revenue. To the extent that AFA's operating costs exceed its revenue earned, the Fund may be required to provide additional capital to AFA. For tax purposes, AFA's

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

revenues and expenses are consolidated with those of the Fund and, as such, the advisory fee revenue generated by AFA is monitored closely to ensure that it does not exceed an amount that would jeopardize the Fund's status as a regulated investment company. During 2017, the Fund recognized a change in unrealized appreciation on its investment in AFA of \$1,236,000.

Expenses The Fund and its affiliates share personnel, systems, and other infrastructure items and are charged a portion of the shared expenses. To protect the Fund from potential conflicts of interest, policies and procedures are in place covering the sharing of expenses among the entities. Expenses solely attributable to an entity are charged to that entity. Expenses that are not solely attributable to one entity are allocated in accordance with the Fund's expense sharing policy. The Fund's policy dictates that expenses, other than those related to personnel, are attributed to AFA based on the average percentage of time spent by all personnel on AFA-related activities relative to overall job functions; the remaining portion is attributed to the Fund and PEO based on relative net assets. Personnel-related expenses are attributed to AFA based on the individual's time spent on AFA-related activities; the remaining portion is attributed to the Fund and PEO based on relative time spent for portfolio managers, relative market values of portfolio securities covered for research staff, and relative net assets for all others. Expense allocations are updated quarterly, except for those related to payroll, which are updated annually. Estimates related to time spent are reviewed on an annual basis, or more frequently if warranted by a change in job function.

For the period ended June 30, 2017, expenses of \$645,671 and \$335,633 were charged to PEO and AFA, respectively, in accordance with the Fund's expense sharing policy. There were no amounts due to, or due from, its affiliates as of June 30, 2017.

Investment Transactions, Investment Income, and Distributions The Fund's investment decisions are made by the portfolio management team with recommendations from the research staff. Policies and procedures are in place covering the allocation of investment opportunities among the Fund and its affiliates to protect the Fund from potential conflicts of interest. Investment transactions are accounted for on trade date. Realized gains and losses on sales of investments are recorded on the basis of specific identification. Dividend income and distributions to shareholders are recognized on the ex-dividend date. Interest income is recognized on the accrual basis.

Valuation The Fund's financial instruments are reported at fair value, which is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Fund has a Valuation Committee (Committee) so that financial instruments are appropriately priced at fair value in accordance with GAAP and the 1940 Act. Subject to oversight by the Board of Directors, the Committee establishes methodologies and procedures to value securities for which market quotations are not readily available.

GAAP establishes the following fair value hierarchy that categorizes the inputs used to measure fair value:

- Level 1 fair value is determined based on market data obtained from independent sources; for example, quoted prices in active markets for identical investments;
- Level 2 fair value is determined using other assumptions obtained from independent sources; for example, quoted prices for similar investments;
- Level 3 fair value is determined using the Fund's own assumptions, developed based on the best information available under the circumstances.

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

Investments in securities traded on national security exchanges are valued at the last reported sale price as of the close of regular trading on the relevant exchange on the day of valuation. Over-the-counter and listed securities for which a sale price is not available are valued at the last quoted bid price. Money market funds are valued at net asset value. These securities are generally categorized as Level 1 in the hierarchy.

Short-term investments (excluding money market funds) are valued at amortized cost, which approximates fair value. Total return swap agreements are valued using independent, observable inputs, including underlying security prices, dividends, and interest rates. These securities are generally categorized as Level 2 in the hierarchy.

The Fund's investment in its controlled affiliate, AFA, is valued by methods deemed reasonable in good faith by the Committee. The Committee uses market-based valuation multiples, including price-to-earnings and price-to-book value, and discounted free cash flow analysis, or a combination thereof, to estimate fair value. The Committee also considers discounts for illiquid investments, such as AFA. Fair value determinations are reviewed on a regular basis and updated as needed. Due to the inherent uncertainty of the value of Level 3 assets, estimated fair value may differ significantly from the value that would have been used had an active market existed. Any change in the estimated fair value of Level 3 investments is recognized in the Fund's Statement of Operations in *Change in unrealized appreciation on investments*. Given the absence of market quotations or observable inputs, the investment in AFA is categorized as Level 3 in the hierarchy.

At June 30, 2017, the Fund's financial instruments were classified as follows:

	Level 1	Level 2	Level 3	Total
Assets:				
Common stocks	\$ 1,651,947,909	\$	\$	\$ 1,651,947,909

* Unrealized appreciation (depreciation)

The following is a reconciliation of the change in the value of Level 3 investments:

Balance as of December 31, 2016	\$ 233,000
Purchases	
Change in unrealized appreciation of investments	1,236,000
Balance as of June 30, 2017	\$ 1,469,000

There were no transfers between levels during the period ended June 30, 2017.

Recent Accounting Pronouncement In October 2016, the U.S. Securities and Exchange Commission adopted new rules and amended existing rules (together, the final rules) intended to modernize the reporting and disclosure of information by registered investment companies. In part, the final rules amend Regulation S-X and require standardized, enhanced disclosure about derivatives in investment company financial statements, as well as other amendments. The compliance date for the

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

amendments to Regulation S-X is August 1, 2017. Management is currently evaluating the impact that the adoption of the amendments to Regulation S-X will have on the Fund's financial statements and related disclosures.

2. FEDERAL INCOME TAXES

No federal income tax provision is required since the Fund's policy is to qualify as a regulated investment company under the Internal Revenue Code and to distribute substantially all of its taxable income and gains to its shareholders. Additionally, management has analyzed and concluded that tax positions included in federal income tax returns from the previous three years that remain subject to examination do not require any provision. Any income tax-related interest or penalties would be recognized as income tax expense. As of June 30, 2017, the identified cost of securities for federal income tax purposes was \$1,180,429,260 and net unrealized appreciation aggregated \$491,410,806, consisting of gross unrealized appreciation of \$502,901,441 and gross unrealized depreciation of \$11,490,635.

Distributions are determined in accordance with the Fund's annual 6% minimum distribution rate commitment, based on the Fund's average market price, and income tax regulations, which may differ from generally accepted accounting principles. Such differences are primarily related to the Fund's retirement plans, equity-based compensation, and investment in AFA. Differences that are permanent are reclassified in the capital accounts of the Fund's financial statements and have no impact on net assets.

3. INVESTMENT TRANSACTIONS

Purchases and sales of portfolio investments, other than short-term investments and derivative transactions, during the period ended June 30, 2017 were \$396,551,728 and \$388,073,172, respectively.

4. DERIVATIVES

During the period ended June 30, 2017, the Fund invested in derivative instruments. The Fund may use derivatives for a variety of purposes, including, but not limited to, the ability to obtain leverage, to gain or limit exposure to particular market sectors or securities, to provide additional income, and/or to limit equity price risk in the normal course of pursuing its investment objectives. The financial derivative instruments outstanding as of period-end and the amounts of realized gains and losses and changes in unrealized gains and losses on financial derivative instruments during the period indicate the volume of financial derivative activity for the period.

Total Return Swap Agreements The Fund may use total return swap agreements to manage exposure to certain risks and/or to enhance performance. Total return swap agreements are bilateral contracts between the Fund and a counterparty in which the Fund, in the case of a long contract, agrees to receive the positive total return (and pay the negative total return) of an underlying equity security and to receive or pay a financing amount, based on a notional amount and a referenced interest rate, over the term of the contract. In the case of a short contract, the Fund agrees to pay the positive total return (and receive the negative total return) of the underlying equity security and to receive or pay a financing rate, based on a notional amount and a referenced interest rate, over the term of the contract. The fair value of each total return swap agreement is

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

determined daily with the change in the fair value recorded as an unrealized gain or loss in the Statement of Operations. Upon termination of a swap agreement, the Fund recognizes a realized gain (loss) on total return swap agreements in the Statement of Operations equal to the net receivable (payable) amount under the terms of the agreement.

Total return swap agreements entail risks associated with counterparty credit, liquidity, and equity price risk. Such risks include that the Fund or the counterparty may default on its obligation, that there is no liquid market for these agreements, and that there may be unfavorable changes in the price of the underlying equity security. To mitigate the Fund's counterparty credit risk, the Fund enters into master netting and collateral arrangements with the counterparty. A master netting agreement allows either party to terminate the contract prior to termination date and to net amounts due across multiple contracts upon settlement, providing for a single net settlement with a counterparty. Pursuant to master netting arrangements, the net cumulative unrealized gain (asset) on open total return swap agreements and net cumulative unrealized loss (liability) on open total return swap agreements are presented in the Statement of Assets and Liabilities. The Fund's policy is to net all derivative instruments subject to a netting agreement. The fair value of each outstanding total return swap contract is presented on the Schedule of Investments.

A collateral arrangement requires each party to provide collateral with a value, adjusted daily and subject to a minimum transfer amount, equal to the net amount owed to the other party under the contract. The counterparty provides cash collateral to the Fund and the Fund provides collateral by segregating portfolio securities, subject to a valuation allowance, into a tri-party account at its custodian. As of June 30, 2017, no securities were pledged by the Fund and no cash collateral was held by the Fund.

5. CAPITAL STOCK

The Fund has 10,000,000 authorized and unissued preferred shares, \$0.001 par value.

During the period ended June 30, 2017, the Fund issued 261 shares of its Common Stock at a weighted average price of \$14.13 per share as dividend equivalents to holders of deferred stock units under the 2005 Equity Income Compensation Plan.

On December 28, 2016, the Fund issued 2,516,928 shares of its Common Stock at a price of \$12.71 per share (the average market price on December 12, 2016) to shareholders of record on November 25, 2016, who elected to take stock in payment of the year-end distribution from 2016 capital gain and investment income. During 2016, the Fund issued 2,684 shares of its Common Stock at a weighted average price of \$12.71 per share as dividend equivalents to holders of deferred stock units under the 2005 Equity Income Compensation Plan.

The Fund may purchase shares of its Common Stock from time to time, in accordance with parameters set by the Board of Directors, at such prices and amounts as the

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

portfolio management team may deem appropriate. Transactions in Common Stock for 2017 and 2016 were as follows:

	Shares		Amount

6. RETIREMENT PLANS

The Fund sponsors a qualified defined contribution plan for all employees with at least six months of service and a nonqualified defined contribution plan for eligible employees to supplement the qualified plan. The Fund matches employee contributions made to the plans and, subject to Board approval, may also make a discretionary contribution to the plans. During 2017, the Fund recorded matching contributions of \$195,278. As of June 30, 2017, the Fund recorded a liability in the amount of \$99,085, included in *Accrued expenses and other liabilities* in the accompanying Statement of Assets and Liabilities, representing the 2017 discretionary contribution.

7. EQUITY-BASED COMPENSATION

The Fund's 2005 Equity Incentive Compensation Plan, adopted at the 2005 Annual Meeting and reapproved at the 2010 Annual Meeting, expired on April 27, 2015. Restricted stock awards granted prior to the Plan's expiration remain outstanding as of June 30, 2017 and vest on various dates through September 2, 2018, provided the service condition set forth in the award at grant is satisfied. Also outstanding are restricted stock units granted to nonemployee directors that are 100% vested, but payment of which has been deferred at the election of the director.

Outstanding awards were granted at fair market value on grant date (determined by the average of the high and low price on that date). Awards earn an amount equal to the Fund's per share distribution, payable in either cash (employees) or reinvested shares (non-employee directors). Reinvested shares are fully vested and paid concurrently with

NOTES TO FINANCIAL STATEMENTS (CONTINUED)

the payment of the original share grant. A summary of the activity related to nonvested restricted shares and deferred stock units for the period ended June 30, 2017 is as follows:

Awards	Shares/Units	Weighted Average Grant-Date Fair Value
Balance at December 31, 2016	138,666	\$ 12.76
Reinvested dividend equivalents	261	14.13
Vested & issued	(35,420)	13.00
Balance at June 30, 2017	103,507	\$ 12.68

Compensation cost is based on the fair market value of the award on grant date and recognized on a straight-line basis over the vesting period. Any compensation cost recognized related to an award that is subsequently forfeited due to unmet service conditions is reversed. Total compensation cost related to equity-based compensation for the period ended June 30, 2017 was \$160,965. As of June 30, 2017, the Fund had unrecognized compensation cost of \$110,820, a component of additional capital surplus, related to nonvested awards that will be recognized over a weighted average period of 0.50 years. The total fair value of awards vested and issued during the period ended June 30, 2017 was \$461,077.

8. OFFICER AND DIRECTOR COMPENSATION

The aggregate remuneration paid by the Fund during the period ended June 30, 2017 to officers and directors amounted to \$3,751,274, of which \$221,250 was paid to directors who were not officers. These amounts represent the taxable income to the Fund's officers and directors and, therefore, may differ from the amounts reported in the accompanying Statement of Operations that are recorded and expensed in accordance with GAAP.

9. PORTFOLIO SECURITIES LOANED

The Fund makes loans of securities to approved brokers to earn additional income. It receives as collateral cash deposits valued at 102% of the value of the securities on loan. The market value of the loaned securities is calculated based upon the most recent closing prices and any additional required collateral is delivered to the Fund on the next business day. Cash deposits are placed in a registered money market fund. The Fund accounts for securities lending transactions as secured financing and retains a portion of the income from lending fees and interest on the investment of cash collateral. The Fund also continues to receive dividends on the securities loaned. Gain or loss in the fair value of the securities loaned that may occur during the term of the loan will be for the account of the Fund. At June 30, 2017, the Fund had securities on loan of \$66,131 and held cash collateral of \$67,450. The Fund is indemnified by the Custodian, serving as lending agent, for the loss of loaned securities and has the right under the lending agreement to recover the securities from the borrower on demand.

10. OPERATING LEASE COMMITMENTS

The Fund and its affiliates lease office space and equipment under operating lease agreements expiring at various dates through the year 2026. The Fund recognized

* The annual distribution rate is the total dividends and distributions per share divided by the Fund's average month-end stock price. For years prior to 2011, the average month-end stock price is determined for the calendar year. For 2011 and later, the average month-end stock price is determined for the twelve months ended October 31, which is consistent with the calculation used for the annual 6% minimum distribution rate commitment adopted in September 2011.

OTHER INFORMATION

Distribution Payment Schedule

The Fund presently pays distributions four times a year, as follows: (a) three interim distributions on or about March 1, June 1, and September 1, and (b) a year-end distribution, payable in late December, consisting of the estimated balance of the net investment income for the year, the net realized capital gains earned through October 31 and, if applicable, a return of capital. Shareholders may elect to receive the year-end distribution in stock or cash. In connection with this distribution, all shareholders of record are sent a distribution announcement notice and an election card in mid-November. **Shareholders holding shares in street or brokerage accounts make their election by notifying their brokerage house representative.**

Electronic Delivery of Shareholder Reports

The Fund offers shareholders the benefits and convenience of viewing Quarterly and Annual Reports and other shareholder materials on-line. With your consent, paper copies of these documents will cease with the next mailing and will be provided via e-mail. Reduce paper mailed to your home and help lower the Fund's printing and mailing costs. To enroll, please visit the following websites:
