NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the three months and six months ended June 28, 2013 and June 29, 2012

(Unaudited)

1. BASIS OF PRESENTATION

The December 31, 2012, Condensed Consolidated Balance Sheet amounts have been derived from the previously audited Consolidated Balance Sheet of Kaman Corporation and subsidiaries (collectively, the "Company"), but do not include all disclosures required by accounting principles generally accepted in the United States of America ("US GAAP"). In the opinion of management, the remainder of the condensed financial information reflects all adjustments necessary for a fair presentation of the Company's financial position, results of operations and cash flows for the interim periods presented. All such adjustments are of a normal recurring nature, unless otherwise disclosed in this report. Certain amounts in the prior period condensed consolidated financial statements have been reclassified to conform to current presentation. The statements should be read in conjunction with the consolidated financial statements and notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012. The results of operations for the interim periods presented are not necessarily indicative of trends or of results to be expected for the entire year.

The Company has a calendar year-end; however, its first three fiscal quarters follow a 13-week convention, with each quarter ending on a Friday. The second quarter for 2013 and 2012 ended on June 28, 2013 and June 29, 2012, respectively.

2. RECENT ACCOUNTING STANDARDS

In January 2013, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2013-01, Balance Sheet (ASC Topic 210) - Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities. ASU No. 2013-01 applies to derivatives accounted for in accordance with Accounting Standards Codification ("ASC") Topic 815, Derivatives and Hedging, including bifurcated embedded derivatives, repurchase agreements and reverse repurchase agreements, and securities borrowing and securities lending transactions that are either offset in accordance with ASC Section 210-20-45 or ASC Section 815-10-45 or subject to an enforceable master netting arrangement or similar agreement. The standard became effective on January 1, 2013. These changes had no impact on the Company's condensed consolidated financial statements.

In January 2013, the FASB also issued ASU No. 2013-02, Comprehensive Income (ASC Topic 220) - Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. ASU No. 2013-02 requires an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under U.S. GAAP to be reclassified in its entirety to net income. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures required under U.S. GAAP that provide additional detail about those amounts. The Company adopted this standard beginning January 1, 2013. (See Note 16, Shareholders' Equity and Accumulated Other Comprehensive Income.)

In March 2013, the FASB issued ASU No. 2013-05, Foreign Currency Matters (ASC Topic 830) - Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity. The objective is to resolve the diversity in practice about whether ASC Subtopic 810-10, Consolidation - Overall or ASC Subtopic 830-30 Foreign Currency Matters - Translation of Financial Statements, applies to the release of the cumulative translation adjustment into net income when a parent either sells a part or all of its investment in a foreign entity or no longer holds a controlling financial interest in a subsidiary or group of assets that is a nonprofit activity or a business (other than a sale of in substance real estate or conveyance of oil and gas mineral rights) within a foreign entity. The update is effective for

financial statement periods beginning after December 15, 2013 with early adoption permitted. The Company will adopt this standard beginning January 1, 2014. The Company does not expect these changes to have an impact on its consolidated financial statements.

In July 2013, the FASB issued ASU No. 2013-10, Derivatives and Hedging (ASC Topic 815) - Inclusion of the Fed Funds Effective Swap Rate (or Overnight Index Swap Rate) as a Benchmark Interest Rate for Hedge Accounting Purposes. The amendments in this update permit the Fed Funds Effective Swap Rate (OIS) to be used as a U.S. benchmark interest rate for hedge accounting purposes under ASC Topic 815, in addition to U.S. Treasury ("UST") and London Interbank Offered Rate ("LIBOR"). The amendments also remove the restriction on using different benchmark rates for similar hedges. The amendments are effective prospectively for qualifying new or redesignated hedging relationships entered into on or after July 17, 2013. The Company has not entered into any new hedging relationships since July 17, 2013.

## NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued

For the three months and six months ended June 28, 2013 and June 29, 2012

(Unaudited)

## 2. RECENT ACCOUNTING STANDARDS (CONTINUED)

In July 2013, the FASB issued ASU No. 2013-11, Income Taxes (ASC Topic 740) - Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists. The objective is to end some inconsistent practices with regard to the presentation on the balance sheet of unrecognized tax benefits. The update is effective for financial statement periods beginning after December 15, 2013, with early adoption permitted. The Company will adopt this standard beginning January 1, 2014. The Company does not expect these changes to have a material impact on its consolidated financial statements.

## 3. DISCONTINUED OPERATIONS

On December 31, 2012, the Company sold substantially all of the assets and liabilities of the Distribution segment's Canadian operations. As a result, the Company has reported the results of operations and financial position of this component as discontinued operations within the condensed consolidated financial statements for all periods presented.

The following tables provide information regarding the results of discontinued operations:

	For the Three Months Ended		For the Six Months Ended	
	June 28, 2013	June 29, 2012	June 28, 2013	June 29, 2012

Earnings from discontinued operations before income taxes	—	470	—	874
Income tax expense	—	109	—	202
Earnings from discontinued operations	\$—	\$361	\$—	\$672

## 4. ACQUISITIONS

On June 14, 2013, the Company acquired substantially all of the assets of Northwest Hose & Fittings, Inc. ("Northwest Hose"). Northwest Hose, formed in 1995, is an authorized Parker distributor of hydraulic hose, fittings and adapters as well as couplers and industrial hose to a diverse group of industries such as the metals, agricultural, industrial machinery and equipment industries. Northwest Hose is headquartered in Spokane, WA. This acquisition is individually immaterial to the Company's results of operations and financial position.

## 5. RESTRUCTURING COSTS

During 2013, the Company initiated restructuring activities primarily at its Distribution segment to align the cost structure of the organization with its revenue levels. This included workforce reductions and the consolidation of field operations where its Distribution segment had multiple facilities in the same geographic area. The Distribution segment restructuring resulted in net workforce reductions of 118 employees and the exiting of five facilities. The Company intends to settle all liabilities associated with these restructuring activities during 2013.

The following table summarizes the accrual balances by cost type for the 2013 restructuring actions:

Contract changes, negotiated settlements and claims for unanticipated contract costs	\$—	\$ 397
Total	\$—	\$ 397

## 7. FAIR VALUE MEASUREMENTS

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date.

The Company uses a three-level fair value hierarchy that prioritizes the inputs used to measure fair value. This hierarchy requires the Company to maximize the use of observable inputs and minimize the use of unobservable inputs. The three levels of inputs used to measure fair value are as follows:

Level 1 — Quoted prices in active markets for identical assets or liabilities.

Level 2 — Observable inputs other than quoted prices included in Level 1, such as quoted prices in markets that are not active or other inputs that are observable or can be corroborated by observable market data.

Level 3 — Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. This includes certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

The following table presents the carrying value and fair value of financial instruments that are not carried at fair value:

In thousands	June 28, 2013		December 31, 2012	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Long-term debt:				
Level 1	\$ 106,165	\$ 138,907	\$ 105,260	\$ 144,460

Edgar Filing: KAMAN CORP - Form 10-Q

Level 2	188,964	175,280	154,325	143,135
Total	\$295,129	\$314,187	\$259,585	\$287,595

8

---

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS - Continued  
 For the three months and six months ended June 28, 2013 and June 29, 2012  
 (Unaudited)

## 7. FAIR VALUE MEASUREMENTS (CONTINUED)

The above fair values were computed based on quoted market prices (Level 1) and discounted future cash flows (Level 2 observable inputs), as applicable. Differences from carrying values are attributable to interest rate changes subsequent to when the transaction occurred. The increase in fair value of the long-term debt is driven by increased borrowings under the Company's Revolving Credit Facility, partially offset by a lower quoted market price for the Company's convertible notes.

The fair values of Cash and cash equivalents, Accounts receivable, net, Notes payable, and Accounts payable - trade approximate their carrying amounts due to the short-term maturities of these instruments.

### Recurring Fair Value Measurements

The table below segregates all financial assets and liabilities that are measured at fair value on a recurring basis (at least annually) into the most appropriate level within the fair value hierarchy based on the inputs used to determine their fair value at the measurement date:

	Total Carrying Value at	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
In thousands	June 28, 2013			
Derivative instruments	\$93	\$—	\$93	\$—
Total liabilities	\$93	\$—	\$93	\$—
	Total Carrying Value at	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
In thousands	December 31, 2012			
Derivative instruments	\$1,506	\$—	\$1,506	\$—
Total assets	\$1,506	\$—	\$1,506	\$—

The Company's derivative instruments are foreign exchange contracts and interest rate swaps that are measured at fair value using observable market inputs such as forward rates and our counterparties' credit risks. Based on these inputs, the derivative instruments are classified within Level 2 of the valuation hierarchy and have been included in other current assets, other assets and other long-term liabilities on the Condensed Consolidated Balance Sheets at June 28, 2013 and December 31, 2012. Based on the continued ability to trade and enter into forward contracts, we consider the markets for our fair value instruments to be active.

The Company evaluated the credit risk associated with the counterparties to these derivative instruments and determined that as of June 28, 2013, such credit risks have not had an adverse impact on the fair value of these instruments.

## 8. DERIVATIVE FINANCIAL INSTRUMENTS

### Derivatives Overview

The Company is exposed to certain risks relating to its ongoing business operations, including market risks relating to fluctuations in foreign currency exchange rates and interest rates. Derivative financial instruments are recognized on the Condensed Consolidated Balance Sheets as either assets or liabilities and are measured at fair value. Changes in

the fair values of derivatives are recorded each period in earnings or accumulated other comprehensive income, depending on whether a derivative is effective as part of a hedged transaction. Gains and losses on derivative instruments reported in accumulated other comprehensive income are subsequently included in earnings in the periods in which earnings are affected by the hedged item. The Company does not use derivative instruments for speculative purposes.

 For the three months and six months ended June 28, 2013 and June 29, 2012  
 (Unaudited)

## 8. DERIVATIVE FINANCIAL INSTRUMENTS (CONTINUED)

## Derivatives Overview (continued)

The Company holds forward exchange contracts designed to hedge forecasted transactions denominated in foreign currencies and to minimize the impact of foreign currency fluctuations on the Company's earnings and cash flows. Some of these contracts were designated as cash flow hedges. The Company will include in earnings amounts currently included in accumulated other comprehensive income upon recognition of cost of sales related to the underlying transaction. No material amounts were reclassified to income from other comprehensive income for derivative instruments formerly designated as cash flow hedges during the three or six months ended June 28, 2013, or June 29, 2012. Over the next twelve months, the income related to cash flow hedges expected to be reclassified from other comprehensive income is \$0.2 million.

## Derivatives Designated as Cash Flow Hedges

The Company's Term Loan Facility ("Term Loan") contains floating rate obligations and is subject to interest rate fluctuations. During 2013, the Company entered into interest rate swap agreements for the purposes of hedging the eight quarterly variable-rate interest payments under its Term Loan due in 2014 and 2015. These interest rate swap agreements were designated as cash flow hedges and are intended to manage interest rate risk associated with the Company's variable rate borrowings and minimize the impact of interest rate fluctuations attributable to changes in LIBOR rates on the Company's earnings and cash flows.

The following table shows the fair value of derivative instruments designated as cash flow hedging instruments:

	Balance Sheet Location	Fair Value		Notional Amount
		June 28, 2013	December 31, 2012

Derivative Assets				
Interest rate swap contracts	Other long-term assets	\$71	\$—	\$90,000- \$70,000

## 9. INVENTORIES (CONTINUED)

Inventories include amounts associated with matters such as contract changes, negotiated settlements and claims for unanticipated contract costs. These amounts are as follows:

	June 28, 2013	December 31, 2012
In thousands		
Contract changes, negotiated settlements and claims for unanticipated contract costs	\$6,754	\$6,861
Total	\$6,754	\$6,861

K-MAX® inventory of \$17.9 million and \$18.0 million as of June 28, 2013, and December 31, 2012, respectively, is included in contracts and other work in process inventory and finished goods. Management believes that a significant portion of this K-MAX® inventory will be sold after June 28, 2014, based upon the anticipation of supporting the fleet for the foreseeable future.

At December 31, 2012, \$52.6 million of SH-2G(I), formerly SH-2G(A), inventory was included on the Company's balance sheet in contracts and other work in process inventory. On May 8, 2013, the Company announced that it had entered into a \$120.6 million contract with the New Zealand Ministry of Defence for the sale of ten SH-2G(I) Super Seasprite aircraft, spare parts, a full mission flight simulator, and related logistics support. Although a substantial portion of the SH-2G(I) inventory will be used in the performance of this new contract, management believes that \$30.2 million of the SH-2G(I) inventory will be sold after June 28, 2014, based upon the time needed to prepare the aircraft for sale and the requirements of our customer. For more information on the SH-2G(I) inventory, see Note 12, Commitments and Contingencies.

## Long-term Contracts

For long-term aerospace contracts, the Company generally recognizes revenue and cost based on the percentage-of-completion method of accounting, which allows for recognition of revenue as work on a contract progresses. The Company recognizes revenues and cost based on either (1) the cost-to-cost method, in which sales and profit are recorded based upon the ratio of costs incurred to estimated total costs to complete the contract, or (2) the units-of-delivery method, in which sales are recognized as deliveries are made and cost of sales is computed on the basis of the estimated ratio of total cost to total sales.

Revenue and cost estimates for all significant long-term contracts for which revenue is recognized using the percentage-of-completion method of accounting are reviewed and reassessed quarterly. Based upon these reviews, the Company records the effects of adjustments in profit estimates each period. If at any time the Company determines that in the case of a particular contract total costs will exceed total contract revenue, the Company will record a provision for the entire anticipated contract loss at that time. There was a net decrease to the Company's operating income from changes in contract estimates of \$2.7 million and \$0.1 million for the three-month periods ended June 28, 2013, and June 29, 2012, respectively. There was a net decrease in operating income of \$2.7 million and \$1.6 million for the six-month periods ended June 28, 2013, and June 29, 2012, respectively, attributable to changes in contract estimates. The decreases for the three months and six months ended June 28, 2013, were a result of cost growth due to revised estimates in various programs, including the Sikorsky BLACK HAWK helicopter program, Bell helicopter offload program and a fuze program. The decrease for the six months ended June 29, 2012, was due to additional cost for one of the Company's fuze programs and production issues encountered during the first half of 2012.

## 12. COMMITMENTS AND CONTINGENCIES

### Legal Matters

#### Wichita Matter

As previously disclosed, the U.S. District Court for the District of Kansas issued a grand jury subpoena in 2011 to Plastic Fabricating Company, Inc. ("PlasticFab"), an indirect wholly owned subsidiary of the Company now known as Kaman Composites - Wichita, Inc., regarding a government investigation of record keeping associated with the manufacture of certain composite parts at PlasticFab's facility located in Wichita, Kansas. The subpoena required information related to the period January 1, 2006, through June 30, 2008. In March 2013, the U.S. Attorney's Office for the District of Kansas notified PlasticFab that it may seek to commence a criminal proceeding against PlasticFab but it expressed a willingness to explore a pre-charge disposition of the matter. PlasticFab believes it has cooperated fully with the investigation and intends to continue to do so as it engages in further discussions with the U.S. Attorney's Office about this matter. Under present U.S. Government procurement laws and regulations, if indicted or adjudged to be in violation of procurement or other Federal laws, a contractor, such as PlasticFab, could be subject to fines, penalties, repayments, or compensatory or treble damages, or suspension or debarment on U.S. Government contract awards if warranted. Thus, as with any government contractor, an adverse outcome in a proceeding such as this could have a material adverse effect on our business, financial condition, results of operations or cash flows. Management continues to cooperate with the government's investigation; however, we are unable to predict the outcome of any proceeding that may be brought or to estimate the amounts of resulting claims or other actions that could be instituted against PlasticFab, its officers, employees, or affiliates. Sales for PlasticFab represented 1.2% of the Company's consolidated sales for the year ended December 31, 2012. At June 28, 2013, the Company had no amount accrued for this matter, as it is unable to estimate the amount of costs that might be incurred in connection with the resolution of this matter at this time.

#### 40 mm

The Orlando facility is one of five defendants in a qui tam suit under the False Claims Act brought by John D. King, a former employee of one of the other defendants. The case, United States ex rel. King v. DSE, Inc., et al., No. 8:08-cv-02416 (M.D. Fla.), is currently pending in the U.S. District Court for the Middle District of Florida. The United States Department of Justice has declined to intervene in the suit, and the case is being brought by Mr. King. The suit alleges that the Orlando facility knowingly submitted false claims or made false statements in connection with its work on 40 mm grenade programs. Management believes that it has fully complied with its legal obligations in connection with this program. On February 19, 2013, the Court issued an order dismissing the case with prejudice as to Mr. King. A judgment on the order was entered by the Court on February 20, 2013. Mr. King has filed a notice of appeal, to which the defendants have filed a motion to dismiss that is pending before the Court. At June 28, 2013, the Company had no amount accrued for this matter, as it is unable to estimate the amount of costs, if any, that might be incurred in connection with the resolution of this matter at this time. The Company believes that the likelihood of an adverse outcome to this matter is remote.

### Other Matters

#### Revenue Sharing Agreement with the Commonwealth of Australia

During the second quarter of 2013, the Company signed a \$120.6 million contract to resell ten of the Australia SH-2G(A) (now designated the SH-2G(I)) aircraft, spare parts, a full mission flight simulator, and related logistics support to the New Zealand Ministry of Defence. Pursuant to the terms of its revenue sharing agreement with the Commonwealth of Australia, the Company will share proceeds from the resale with the Commonwealth on a predetermined basis. Through June 28, 2013, the Company has paid \$39.5 million (AUD) to the Commonwealth of Australia, the required minimum amount of payments pursuant to the revenue sharing agreement. Additional revenue sharing payments, if any, will be calculated pursuant to the terms of the revenue sharing agreement and recorded when they are due to the Commonwealth of Australia.

To secure the required minimum payments, the Company provided the Commonwealth of Australia with an unconditional letter of credit, which was reduced as such payments were made. The final required minimum payment of \$6.7 million was made on April 2, 2013, which eliminates the Company's requirement to provide the Commonwealth of Australia with a letter of credit.

12. COMMITMENTS AND CONTINGENCIES (CONTINUED)

Other Matters (continued)

Moosup

This facility is currently being held for disposal. Site characterization of the environmental condition of the property, which began in 2008, is continuing. The total anticipated cost of the environmental remediation activities associated with the Moosup property is \$4.4 million, unchanged from the previously reported estimate, all of which has been accrued. The total amount paid to date in connection with environmental remediation activities at this location is \$2.5 million. A portion (\$0.1 million) of the accrual related to this property is included in other accruals and payables and the balance is included in other long-term liabilities. The remaining balance of the accrual reflects the total anticipated cost of completing these environmental remediation activities. Although it is reasonably possible that additional costs will be paid in connection with the resolution of this matter, the Company is unable to estimate the amount of such additional costs, if any, at this time.

New Hartford

In connection with the sale of the Company's Music segment in 2007, the Company assumed responsibility for meeting certain requirements of the Connecticut Transfer Act (the "Transfer Act") that applied to our transfer of the New Hartford, Connecticut, facility leased by that segment for guitar manufacturing purposes ("Ovation"). Under the Transfer Act, those responsibilities essentially consist of assessing the site's environmental conditions and remediating environmental impairments, if any, caused by Ovation's operations prior to the sale. The site is a multi-tenant industrial park, in which Ovation and other unrelated entities lease space. The environmental assessment process, which began in 2008, has recently been completed.

The Company's estimate of its portion of the cost to assess the environmental conditions and remediate this site is \$2.2 million, unchanged from the previously reported estimate, all of which has been accrued. The total amount paid to date in connection with these environmental remediation activities is \$0.5 million. A portion (\$0.3 million) of the accrual related to this property is included in other accruals and payables and the balance is included in other long-term liabilities. The remaining balance of the accrual reflects the total anticipated cost of completing these environmental remediation activities. Although it is reasonably possible that additional costs will be paid in connection with the resolution of this matter, the Company is unable to estimate the amount of such additional costs, if any, at this time.

Bloomfield

In connection with the Company's 2008 purchase of the portion of the Bloomfield campus that a Company subsidiary had leased from the Naval Air Systems Command (NAVAIR), the Company assumed responsibility for environmental remediation at the facility as may be required under the Transfer Act and continues the effort to define the scope of the remediation that will be required by the Connecticut Department of Energy & Environmental Protection. The assumed environmental liability of \$10.3 million, all of which has been accrued, was determined by taking the undiscounted estimated remediation liability of \$20.8 million and discounting it at a rate of 8%. This remediation process will take many years to complete. The total amount paid to date in connection with these environmental remediation activities is \$6.1 million. A portion (\$1.7 million) of the accrual related to this property is included in other accruals and payables, and the balance is included in other long-term liabilities. Although it is reasonably possible that additional costs will be paid in connection with the resolution of this matter, the Company is

unable to estimate the amount of such additional costs, if any, at this time.

United Kingdom

In connection with the purchase of U.K. Composites, the Company accrued £1.6 million for environmental compliance at the acquired facilities. The remaining balance of the accrual at June 28, 2013, was £0.4 million, with £1.0 million having been paid to date in connection with these environmental remediation activities and £0.2 million released to income in 2011. The U.S. dollar equivalent of the remaining environmental compliance liability as of June 28, 2013, is \$0.6 million, which is included in other accruals and payables. The Company continues to assess the work that may be required, which may result in a change to this accrual. Although it is reasonably possible that additional costs will be paid in connection with the resolution of this matter, the Company is unable to estimate the amount of such additional costs, if any, at this time.

## 12. COMMITMENTS AND CONTINGENCIES (CONTINUED)

### Other Matters (continued)

#### Other Environmental Matters

The Company was notified by the Environmental Protection Agency that it is a potentially responsible party ("PRP") at a Superfund Site. At June 28, 2013, the Company had no amount accrued for this matter, as it is unable to estimate the amount of costs, if any, that might be incurred in connection with the remediation of this site. In making this determination, the Company considered the availability of the information related to the site; specifically, the continued identification of PRPs and the inability to determine the proportion of total responsibility attributable to each PRP. As more information is received, the Company will reassess its ability to estimate its portion of the cost for remediation, taking into consideration the financial resources of other PRPs involved in the site, their proportionate share of the total responsibility of waste at the site, the existence of insurance and the financial viability of the insurer.

## 13. COMPUTATION OF EARNINGS PER SHARE

The computation of basic earnings per share is based on net earnings divided by the weighted average number of shares of common stock outstanding for each period. The computation of diluted earnings per share reflects the common stock equivalency of dilutive options granted to employees under the Stock Incentive Plan and shares issuable on redemption of Convertible Notes.

13. COMPUTATION OF EARNINGS PER SHARE (CONTINUED)

In November 2010, the Company issued Convertible Notes due on November 15, 2017, in the aggregate principal amount of \$115.0 million. The Convertible Notes will mature on November 15, 2017, unless earlier redeemed, repurchased by the Company or converted. Upon conversion, the Convertible Notes require net share settlement, where the aggregate principal amount of the notes will be paid in cash and remaining amounts due, if any, will be settled in cash, shares of the Company's common stock or a combination of cash and shares of common stock, at the Company's election.

For the three-month and six-month periods ended June 28, 2013, shares issuable under the Convertible Notes that were dilutive during the period were included in the calculation of earnings per share as the conversion price for the Convertible Notes was less than the average share price. Shares issuable under the Convertible Notes were excluded from the diluted earnings per share calculation for the three-month and six-month periods ended June 29, 2012, because the conversion price was greater than the average market price of our stock during those periods. Excluded from the diluted earnings per share calculation for the three and six months ended June 28, 2013, are 3,403,787 and 3,402,772 shares, respectively, issuable under the warrants sold in connection with the Company's convertible note offering as they would be anti-dilutive. Excluded from the diluted earnings per share calculation for the three and six months ended June 29, 2012, are 3,396,016 and 3,394,841 shares, respectively, issuable under the warrants sold in connection with the Company's convertible note offering as they would be anti-dilutive.

14. SHARE-BASED ARRANGEMENTS

2013 Management Incentive Plan

On April 17, 2013, the shareholders of the Company approved the 2013 Management Incentive Plan ("2013 Plan"), which replaced the 2003 Stock Incentive Plan. The 2013 Plan provides the Company with the ability to use equity-based awards of up to 2,250,000 authorized shares and is designed as a flexible share authorization plan, such that the Company's share authorization is based on the least costly type of award (stock options). Shares issued pursuant to "Full Value Awards" as defined in the 2013 Plan (awards other than stock options or stock appreciation rights which are settled by the issuance of shares, e.g., restricted stock, restricted stock units, performance shares, performance units if settled with stock, or other stock-based awards) count against the 2013 Plan's share authorization at a rate of 3 to 1, while shares issued upon exercise of stock options or stock appreciation rights count against the share authorization at a rate of 1 to 1. This means that every time an option is granted, the authorized pool of shares is reduced by one (1) share and every time a Full Value Award is granted, the authorized pool of shares is reduced by 3 shares. In deriving the valuation ratio used in the 2013 Plan, the Company used the Black Scholes Fair Value model as the basis for determining the approximate value of an option as compared to a "full value share." No stock-based awards have been granted under the 2013 Plan as of June 28, 2013.

General

The Company accounts for stock options and restricted stock as equity awards whereas the employee stock purchase plan is accounted for as a liability award. Compensation expense for stock options and restricted stock awards is recognized on a straight-line basis over the vesting period of the awards.

The following table summarizes share-based compensation expense recorded during each period presented:

## 15. SEGMENT AND GEOGRAPHIC INFORMATION

The Company is organized based upon the nature of its products and services, and is composed of two operating segments each overseen by a segment manager. These segments are reflective of how the Company's Chief Executive Officer, who is its Chief Operating Decision Maker ("CODM"), reviews operating results for the purposes of allocating resources and assessing performance. The Company has not aggregated operating segments for purposes of

identifying reportable segments.

The Distribution segment is the third largest power transmission, motion control, and fluid power industrial distributor in North America. Distribution conducts business in the mechanical power transmission and bearings, electrical, automation and control, and fluid power product platforms and provides total solutions from system design and integration to machine parts and value-added services to North America's manufacturing industry.
