

FIDELITY SOUTHERN CORP
Form 10-Q
November 09, 2016

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

Quarterly Report Pursuant to Section 13 or 15(d) of the
Securities Exchange Act of 1934
For the quarterly period ended September 30, 2016
Commission file number 001-34981

Fidelity Southern Corporation
(Exact name of registrant as specified in its charter)

Georgia 58-1416811
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)
3490 Piedmont Road, Suite 1550 30305
Atlanta, Georgia
(Address of principal executive offices) (Zip Code)

(404) 639-6500
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definitions of "large accelerated filer" "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

As of October 31, 2016 (the most recent practicable date), the Registrant had outstanding 26,139,477 shares of Common Stock.

FIDELITY SOUTHERN CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

September 30, 2016

(UNAUDITED)

1. Basis of Presentation and Summary of Significant Accounting Policies

The accompanying unaudited consolidated financial statements include the accounts of Fidelity Southern Corporation (“FSC” or “Fidelity”) and its wholly-owned subsidiaries. FSC owns 100% of Fidelity Bank (the “Bank”) and LionMark Insurance Company, an insurance agency offering consumer credit related insurance products. FSC also owns three subsidiaries established to issue trust preferred securities, which are not consolidated for financial reporting purposes in accordance with current accounting guidance, as FSC is not the primary beneficiary. The “Company” or “our,” as used herein, includes FSC and its subsidiaries, unless the context otherwise requires.

These unaudited consolidated financial statements have been prepared in conformity with U.S. generally accepted accounting principles (“GAAP”) followed within the financial services industry for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information or notes required for complete financial statements.

In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and revenues and expenses for the periods presented. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant changes in the near term relate to the determination of the allowance for loan losses; the calculations of, amortization of, and the potential impairment of capitalized servicing rights; the valuation of loans held-for-sale and certain derivatives; the valuation of real estate or other assets acquired in connection with foreclosures or in satisfaction of loans; estimates used for fair value acquisition accounting and valuation of deferred income taxes. In addition, the actual lives of certain amortizable assets and income items are estimates subject to change. The Company principally operates in one business segment, which is community banking.

In the opinion of management, all adjustments, consisting of normal and recurring items, considered necessary for a fair presentation of the consolidated financial statements for the interim periods have been included. All significant intercompany accounts and transactions have been eliminated in consolidation. Certain amounts reported in prior periods have been reclassified to conform to current year presentation. These reclassifications did not have a material effect on previously reported net income, shareholders’ equity or cash flows.

Operating results for the nine-month period ended September 30, 2016, are not necessarily indicative of the results that may be expected for the year ending December 31, 2016. These statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company’s Annual Report on Form 10-K and Annual Report to Shareholders for the year ended December 31, 2015.

The Company’s significant accounting policies are described in Note 1 of the Notes to Consolidated Financial Statements included in the 2015 Annual Report on Form 10-K filed with the Securities and Exchange Commission. There were no new accounting policies or changes to existing policies adopted in the first nine months of 2016 which had a significant effect on the results of operations or statement of financial condition. For interim reporting purposes, the Company follows the same basic accounting policies and considers each interim period as an integral part of an annual period.

Recent Accounting Pronouncements

In August 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2016-15, “Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments,” intended to reduce diversity in practice in how certain transactions are classified in the statement of cash flows. The guidance addresses eight issues: (1) cash payments for debt prepayment or debt extinguishment costs; (2) cash payments for the settlement of zero-coupon debt instruments; (3) contingent consideration payments made after a business combination; (4) proceeds from the settlement of insurance claims; (5) proceeds from the settlement of corporate-owned life insurance (“COLI”) policies, including bank-owned life insurance (“BOLI”) policies; (6) distributions received from equity method investments; (7) beneficial interests in securitization transactions; and (8) separately identifiable cash flows using the application of the predominance principle, whereby an entity should

classify each separately identifiable cash source and use on the basis of the nature of the underlying cash flows. The amendments in this ASU are effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period. The adoption of this ASU is not expected to have a significant impact on its Consolidated Financial Statements.

In June 2016, the FASB issued ASU No. 2016-13, "Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments." This ASU significantly changes how entities will measure credit losses for most financial assets and certain other instruments that are not measured at fair value through net income. In issuing the standard, the FASB is responding to criticism that today's guidance delays recognition of credit losses. The standard will replace today's "incurred loss" approach with an "expected loss" model. The new model, referred to as the current expected credit loss ("CECL") model, will apply to: (1) financial assets subject to credit losses and measured at amortized cost, and (2) certain off-balance sheet credit exposures. This

Table of Contents

includes, but is not limited to, loans, leases, held-to-maturity securities, loan commitments, and financial guarantees. The CECL model does not apply to available-for-sale (“AFS”) securities. For AFS securities with unrealized losses, entities will measure credit losses in a manner similar to what they do today, except that the losses will be recognized as allowances rather than reductions in the amortized cost of the securities. As a result, entities will recognize improvements to estimated credit losses immediately in earnings rather than as interest income over time, as they do today. The ASU also simplifies the accounting model for purchased credit-impaired securities and loans. ASU 2016-13 also expands the disclosure requirements regarding an entity’s assumptions, models, and methods for estimating the allowance for loan and lease losses. In addition, entities will need to disclose the amortized cost balance for each class of financial asset by credit quality indicator, disaggregated by the year of origination. The standard will take effect for SEC filers for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. Early application for all organizations will be permitted for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. The Company is currently evaluating the provisions of ASU No. 2016-13 to determine the potential impact the standard will have on its Consolidated Financial Statements.

In March 2016, the FASB issued ASU No. 2016-09, “Improvements to Employee Share-Based Payment Accounting” as part of its simplification initiative. This ASU affects all entities that issue share-based payment awards to their employees. Some of the key provisions of this ASU include: (1) companies will no longer record excess tax benefits and certain tax deficiencies in additional paid-in capital (“APIC”). Instead, they will record all excess tax benefits and tax deficiencies as income tax expense or benefit in the income statement, and APIC pools will be eliminated. The guidance also eliminates the requirement that excess tax benefits be realized before companies can recognize them. In addition, the guidance requires companies to present excess tax benefits as an operating activity on the statement of cash flows rather than as a financing activity; (2) increase the amount an employer can withhold to cover income taxes on awards and still qualify for the exception to liability classification for shares used to satisfy the employer’s statutory income tax withholding obligation. The guidance will also require an employer to classify the cash paid to a tax authority when shares are withheld to satisfy its statutory income tax withholding obligation as a financing activity on its statement of cash flows (current guidance did not specify how these cash flows should be classified); and (3) permit companies to make an accounting policy election for the impact of forfeitures on the recognition of expense for share-based payment awards. Forfeitures can be estimated, as required today, or recognized when they occur. ASU No. 2016-09 is effective for public business entities for interim and annual reporting periods beginning after December 15, 2016. Early adoption is permitted, but all of the guidance must be adopted in the same period. The Company is currently evaluating the provisions of ASU No. 2016-09 to determine the potential impact the standard will have on its Consolidated Financial Statements.

In February 2016, the FASB issued ASU 2016-02, “Leases.” The standard requires the recognition of assets and liabilities arising from most lease transactions on the balance sheet and the disclosure of key information about leasing arrangements. Accordingly, a lessee will recognize a lease asset for its right to use the underlying asset and a lease liability for the corresponding lease obligation. Both the asset and liability will initially be measured at the present value of the future minimum lease payments over the lease term. Subsequent measurement, including the presentation of expenses and cash flows, will depend on the classification of the lease as either a finance or an operating lease. Initial costs directly attributable to negotiating and arranging the lease will be included in the asset. For leases with a term of 12 months or less, a lessee can make an accounting policy election by class of underlying asset to not recognize an asset and corresponding liability. Lessees will also be required to provide additional qualitative and quantitative disclosures regarding the amount, timing and uncertainty of cash flows arising from leases. These disclosures are intended to supplement the amounts recorded in the financial statements and provide additional information about the nature of an organization’s leasing activities. The standard is effective for fiscal years beginning after December 15, 2018, and interim periods within those years, with early adoption permitted. In transition, lessees are required to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach. The transition guidance also provides specific guidance for sale and leaseback transactions, build-to-suit leases and amounts previously recognized in accordance with the business combinations guidance for leases. The Company is currently evaluating the provisions of ASU No. 2016-02 to determine the potential impact the standard will have on its Consolidated Financial Statements.

In January 2016, the FASB issued ASU 2016-01, "Financial Instruments - Overall: Recognition and Measurement of Financial Assets and Financial Liabilities." The guidance is intended to improve the recognition and measurement of financial instruments by requiring: equity investments that do not result in consolidation and are not accounted for under the equity method to be measured at fair value through net income, unless they qualify for the practicability exception for investments that do not have readily determinable fair values; changes in instrument-specific credit risk for financial liabilities that are measured under the fair value option will be recognized in other comprehensive income; and entities will make the assessment of the realizability of a deferred tax asset related to an available-for-sale debt security in combination with other deferred tax assets. The guidance is effective for fiscal years beginning after December 15, 2017, and interim periods therein. Early adoption is permitted. The adoption of this ASU is not expected to have a significant impact on its Consolidated Financial Statements; however, the Company will continue to closely monitor developments and additional guidance.

In August 2015, the FASB issued ASU 2015-14, "Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date" which deferred the effective date of ASU 2014-09, "Revenue from Contracts with Customers," by one year to annual reporting periods beginning after December 15, 2017, and interim reporting periods therein. The FASB had previously issued ASU 2014-09 in May 2014. The amendments in ASU 2014-09 indicate that entities should recognize revenue to reflect the

Table of Contents

transfers of goods or services to customers in an amount equal to the consideration the entity receives or expects to receive. Early adoption is permitted only as of annual reporting periods beginning after December 15, 2016, including interim periods therein. The Company is currently evaluating the provisions of ASU No. 2014-09 to determine the potential impact the standard will have on its Consolidated Financial Statements.

Other accounting standards that have recently been issued by the FASB or other standard-setting bodies are not expected to have a material impact on the Company's financial position, results of operations or cash flows.

Contingencies

Due to the nature of their activities, the Company and its subsidiaries are at times engaged in various legal proceedings that arise in the course of normal business, some of which were outstanding as of September 30, 2016. Although the ultimate outcome of all claims and lawsuits outstanding as of September 30, 2016 cannot be ascertained at this time, it is the opinion of management that these matters, when resolved, will not have a material adverse effect on the Company's results of operations or financial condition.

2. Business Combinations

The Company accounts for its acquisitions as business combinations. As such, the purchase price is allocated to the fair value of the assets acquired and liabilities assumed as of the acquisition date. Determining the fair value of assets and liabilities, particularly illiquid assets and liabilities, is a complicated process involving significant judgment regarding estimates and assumptions used to calculate estimated fair value. Purchase price allocations on completed acquisitions may be modified through the measurement period which cannot exceed one year from the acquisition date. If we recognize adjustments to provisional amounts that are identified during the measurement period, the adjustments will be reported in the period in which the amounts are determined. Fair value adjustments based on updated estimates could materially affect the goodwill, if any, recorded on the acquisition. The Company may incur losses on the acquired loans that are materially different from losses originally projected in the fair value estimate. Acquisition-related costs are expensed as incurred.

The effects of the acquired assets and liabilities have been included in the consolidated financial statements since their respective acquisition date. Pro forma results have not been disclosed as those amounts are not significant to the unaudited consolidated financial statements.

American Enterprise Bankshares, Inc.

On March 1, 2016, the Company acquired American Enterprise Bankshares, Inc. ("AEB"), the holding company for American Enterprise Bank of Florida, a Jacksonville, Florida-based community bank. The Company acquired all of the outstanding common stock of the former AEB shareholders, including common shares issued upon conversion of subordinated debentures prior to the acquisition. Total consideration of \$22.8 million was issued in the transaction. AEB shareholders received 0.299 shares of Fidelity common stock for each share of AEB common stock, as well as a cash payment for any fractional shares, resulting in the issuance of 1,470,068 shares of Fidelity common stock. All unexercised AEB stock options at the closing date were settled for cash at the volume weighted average price of Fidelity common stock ("VWAP") as defined in the merger agreement between AEB and Fidelity.

AEB merged with and into the Company and American Enterprise Bank of Florida merged with and into Fidelity Bank. With this acquisition, the Company added approximately \$208.8 million in assets, which included \$40.7 million in cash and securities, \$147.4 million in loans, \$1.3 million in core deposit intangible, \$7.1 million in premises and equipment, \$5.9 million in deferred tax assets, and \$5.2 million in goodwill, and assumed \$181.8 million in deposits and expanded and strengthened its retail branch footprint by adding two branches in the Jacksonville, Florida area.

The Bank of Georgia FDIC-assisted Transaction

On October 2, 2015, the Bank entered into a Purchase and Assumption Agreement ("Agreement") with the Federal Deposit Insurance Corporation (the "FDIC"), as Receiver of The Bank of Georgia, located in Peachtree City, Georgia ("The Bank of Georgia"), and the FDIC, acting in its corporate capacity, pursuant to which the Bank acquired substantially all of the assets and assumed all of the deposits of The Bank of Georgia.

Under the terms of the Agreement, the Bank acquired approximately \$280.8 million in assets, including approximately \$144.8 million in loans, and assumed approximately \$266.4 million in customer deposits. Pursuant to the Agreement, the Bank recorded a fair value adjustment in the amount of \$20.4 million on the assets acquired and paid the FDIC a premium of 3.0% to assume all customer deposits. To settle the transaction, the FDIC made a cash

payment to the Bank totaling approximately \$41.4 million, based on the differential between liabilities assumed and assets acquired. Additionally, the Bank acquired The Bank of Georgia's seven branches, which are located in the following Georgia cities: Peachtree City, Fayetteville, Tyrone, Sharpsburg, Newnan, and Fairburn. With this acquisition, the Company expanded its retail branch footprint in Coweta and Fayette counties, both of which are suburbs of Atlanta.

The terms of the Agreement provide for the FDIC to indemnify the Company against certain claims, including, but not limited to, claims with respect to liabilities and assets of The Bank of Georgia or any of their affiliates not assumed or otherwise purchased by the Company, with respect to claims made by shareholders of The Bank of Georgia, with respect to claims based on the rights of any creditors of The Bank of Georgia and with respect to claims based on any action by The Bank of Georgia's former directors,

Table of Contents

officers and other employees. The transaction did not include a loss sharing agreement with the FDIC.

3. Investment Securities

Management's primary objective in managing the investment securities portfolio includes maintaining a portfolio of high quality investments with competitive returns while providing for pledging and liquidity needs within overall asset and liability management parameters. The Company is required under federal regulations to maintain adequate liquidity to ensure safe and sound operations. As such, management regularly evaluates the investment portfolio for cash flows, the level of loan production and sales, current interest rate risk strategies and the potential future direction of market interest rate changes. Individual investment securities differ in terms of default, interest rate, liquidity and expected rate of return risk.

The following table summarizes the amortized cost and fair value of debt securities and the related gross unrealized gains and losses at September 30, 2016 and December 31, 2015.

(in thousands)	September 30, 2016			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value

Table of Contents

The Company held 1 and 19 investment securities available-for-sale that were in an unrealized loss position at September 30, 2016 and December 31, 2015, respectively, as well as two and four investment securities held-to-maturity that were in an unrealized loss position at September 30, 2016, and December 31, 2015, respectively. The following table reflects the gross unrealized losses and fair values of the investment securities with unrealized losses, aggregated by investment category and length of time the individual securities have been in a continuous unrealized loss position.

	September 30, 2016			
	Less Than 12 Months		12 Months or More

Total held-to-maturity	\$5,783	\$ (63)	\$—	\$ —

At September 30, 2016 and December 31, 2015, the unrealized losses on investment securities were related to interest rate fluctuations since purchase. Management does not have the intent to sell the temporarily impaired securities and it is not more likely than not that the Company will be required to sell the investments before recovery of the amortized cost. Accordingly, as of September 30, 2016, management believes the impairment detailed in the table above is temporary and no other-than-temporary impairment loss has been recognized in the Company's Consolidated Statements of Comprehensive Income.

Table of Contents

The amortized cost and fair value of investment securities at September 30, 2016 and December 31, 2015 are categorized in the following table by contractual maturity. Securities not due at a single maturity (i.e., mortgage-backed securities) are shown separately.

(in thousands)	September 30, 2016		December 31, 2015	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Investment securities available-for-sale:				
Obligations of U.S. Government sponsored enterprises				
Due after one year through five years	\$ 10,001	\$ 10,372	\$ 17,877	\$ 18,176
Due five years through ten years	12,226	12,790	23,375	23,667

Total held-to-maturity	\$ 16,792	\$ 17,168	\$ 14,398	\$ 14,598

There were eight investment securities called, matured or paid off during the nine months ended September 30, 2016 and three investment securities called, matured or paid off for the nine months ended September 30, 2015. For the investment securities that were called, matured or paid off during the nine months ended September 30, 2016, gross gains totaled \$578,000 and there were no gains or losses for the securities called, matured or paid off in 2015. There were no transfers from investment securities available-for-sale to investment securities held-to-maturity during the nine months ended September 30, 2016. There were \$3.2 million in transfers from investment securities available-for-sale to investment securities held-to-maturity during the nine months ended September 30, 2015.

The following table summarizes the investment securities that were pledged as collateral at September 30, 2016 and December 31, 2015.

(in thousands)	September	December 31,
	30, 2016	2015
Public deposits	\$ 106,337	\$ 93,983
Securities sold under repurchase agreements	21,239	23,058
Total pledged securities	\$ 127,576	\$ 117,041

Table of Contents

4. Loans Held-for-Sale

Residential mortgage loans held-for-sale are carried at fair value and SBA and indirect automobile loans are carried at the lower of cost or market value. The following table summarizes loans held-for-sale at September 30, 2016 and December 31, 2015.

(in thousands)	September 30, December 31,	
	2016	2015
Residential mortgage	\$ 291,030	\$ 233,525
SBA	10,587	14,309
Indirect automobile	150,000	150,000
Total loans held-for-sale	\$ 451,617	\$ 397,834

During the nine months ended September 30, 2016 and 2015, the Company transferred loans with unpaid principal balances of \$2.9 million and \$4.6 million to the held for investment residential mortgage portfolio.

The Company had residential mortgage loans held-for-sale with unpaid principal balances of \$202.6 million and \$173.4 million pledged to the FHLB at September 30, 2016 and December 31, 2015, respectively.

5. Loans

Loans outstanding, by class, are summarized in the following table at carrying value and include net unamortized costs of \$36.1 million and \$31.9 million at September 30, 2016 and December 31, 2015. Covered loans represent previously acquired loans covered under Loss Share Agreements with the FDIC. Non-covered loans represent loans acquired that are not covered under Loss Share Agreements with the FDIC and legacy Bank loans. Legacy Bank loans represent existing portfolio loans prior to the past FDIC-assisted transactions with Loss Share Agreements and additional loans originated subsequent to the past FDIC-assisted transactions with Loss Share Agreements (collectively, "legacy loans"). Because of the difference in accounting for acquired loans, the tables below further segregate the Company's non-covered loans between legacy loans and acquired loans.

(in thousands)	September 30, 2016			
	Non-covered Loans		Covered	Total
	Legacy	Acquired	Loans Acquired ⁽¹⁾	
Commercial	\$597,910	\$181,141	\$ 10,623	\$789,674

Total mortgage loans	377,406	34,139	5,550	417,095
Total loans	\$2,697,078	\$177,230	\$22,640	\$2,896,948

⁽¹⁾Included in covered loans at September 30, 2016 and December 31, 2015 are \$12.0 million and \$16.7 million, respectively, of assets whose reimbursable loss periods will end in 2017.

The Company has extended loans to certain officers and directors. The Company does not believe these loans involve more than the normal risk of collectability or present other unfavorable features when originated. None of the related party loans were classified as nonaccrual, past due, restructured, or potential problem loans at September 30, 2016 or December 31, 2015.

Nonaccrual Loans

The accrual of interest income is generally discontinued when a loan becomes 90 days past due. Past due status is based on the contractual terms of the loan agreement. A loan may be placed on nonaccrual status sooner if reasonable doubt exists as to the full, timely collection of principal or interest. When a loan is placed on nonaccrual status, previously accrued and uncollected interest is reversed against current period interest income. Subsequent interest collected is recorded as a principal reduction. Nonaccrual loans are returned to accrual status when all contractually due principal and interest amounts are brought current and the future payments are reasonably assured.

Loans in nonaccrual status are presented by class of loans in the following table. Purchased credit impaired (“PCI”) loans are considered to be performing due to the application of the accretion method and are excluded from the table.

(in thousands)	September 30, December 31,	
	2016	2015
Commercial	\$ 8,404	\$ 9,228
SBA	7,580	6,599
Total commercial loans	15,984	15,827
Construction	5,300	5,940
Indirect automobile	1,235	1,116
Installment	598	602
Total consumer loans	1,833	1,718
Residential mortgage	7,180	2,514
Home equity lines of credit	2,499	1,129
Total mortgage loans	9,679	3,643
Total nonaccrual loans	\$ 32,796	\$ 27,128

If such nonaccrual loans had been on a full accrual basis, interest income on these loans for the three months ended September 30, 2016 and 2015 would have been \$622,000 and \$497,000, respectively. For the nine months ended September 30, 2016 and 2015, the interest income would have been \$1.1 million and \$1.2 million, respectively.

Table of Contents

Accruing loans delinquent 30-89 days, 90 days or more, and troubled debt restructured loans (“TDRs”) accruing interest less PCI loans, presented by class of loans at September 30, 2016 and December 31, 2015, were as follows:

(in thousands)	September 30, 2016			December 31, 2015		
	Accruing	Delinquent	Accruing	Delinquent	Accruing	Accruing
	30-89 Days	90 Days or More	TDRs	30-89 Days	90 Days or More	TDRs

Total	\$5,821	\$ —	—\$11,935	\$8,092	\$ 1,284	\$15,421

TDR Loans

The following table presents TDRs that occurred during the three and nine months ended September 30, 2016 and 2015, along with the type of modification. Modified purchased credit impaired loans are not removed from their accounting pool and accounted for as TDRs, even if those loans would otherwise be deemed TDRs.

(in thousands)	Three Months Ended September 30, 2016		Three Months Ended September 30, 2015

Table of Contents

The following tables present the amount of TDRs that were restructured in the previous twelve months and subsequently redefaulted during the three and nine months ended September 30, 2016 and 2015.

	Troubled Debt Restructured During the Last Twelve Months and Subsequently Redefaulting During the Three Months Ended September 30, (1)		Troubled Debt Restructured During the last Twelve Months and Subsequently Redefaulting During the Nine Months Ended September 30, (1)	
(in thousands)	2016	2015	2016	2015
Commercial	\$ —	\$ —	—\$ 2,070	\$ —
SBA	—	—	—	—
Construction	—	—	—	—
Indirect automobile	14	—	95	—
Installment	—	—	—	—
Residential mortgage	—	—	—	—
Home equity lines of credit	—	—	49	—
Total	\$ 14	\$ —	—\$ 2,214	\$ —

(1) Subsequently redefaulting is defined as a payment default (i.e., 30 days contractually past due) within twelve months of restructuring date.

The Company had total TDRs with a balance of \$17.1 million and \$22.5 million at September 30, 2016 and December 31, 2015, respectively. There were net charge-offs of TDR loans of \$2,000 and net recoveries of \$11,000 for the three months ended September 30, 2016 and 2015, respectively. There were net recoveries of TDR loans of \$864,000 and \$578,000 for the nine months ended September 30, 2016 and 2015, respectively. Net charge-offs on such loans are factored into the rolling historical loss rate, which is used in the calculation of the allowance for loan losses.

Pledged Loans

Presented in the following table is the unpaid principal balance of loans held for investment that were pledged to the Federal Home Loan Bank of Atlanta (“FHLB of Atlanta”) as collateral for borrowings at September 30, 2016 and December 31, 2015.

	September 30, 2016	December 31, 2015
(in thousands)		
Commercial real estate	\$ 266,467	\$ 231,227
Home equity lines of credit	87,114	73,755
Residential mortgage	214,581	181,180
Total	\$ 568,162	\$ 486,162

Indirect automobile loans with an unpaid principal balance of approximately \$352.6 million and \$319.7 million were pledged to the Federal Reserve Bank of Atlanta (“FRB”) at September 30, 2016 and December 31, 2015, respectively, as collateral for potential Discount Window borrowings.

Table of Contents

Legacy Impaired Loans

The following tables present by class the unpaid principal balance, recorded investment and related allowance for legacy impaired loans at September 30, 2016 and December 31, 2015. Legacy impaired loans include all TDRs and all other nonaccrual loans, excluding nonaccrual loans below the Company's specific review threshold.

(in thousands)	September 30, 2016			December 31, 2015		
	Unpaid Principal Balance	Recorded Investment ⁽¹⁾	Related Allowance	Unpaid Principal Balance	Recorded Investment ⁽¹⁾	Related Allowance

Loans	\$34,710	\$ 27,934	\$ 3,241	\$15,729	\$ 12,851	\$ 3,041

(in thousands)	September 30, 2016		December 31, 2015	
	Unpaid Principal Balance	Recorded Investment ⁽¹⁾	Unpaid Principal Balance	Recorded Investment ⁽¹⁾
Impaired Loans with No Allowance				
Commercial	\$7,955	\$ 6,724	\$17,345	\$ 14,580
SBA	6,887	5,944	14,118	10,499
Construction	6,775	5,298	8,045	5,940
Installment	1,445	163	1,487	191
Residential mortgage	5,863	5,798	2,713	2,712
Home equity lines of credit	251	242	—	—
Loans	\$29,176	\$ 24,169	\$43,708	\$ 33,922

⁽¹⁾The primary difference between the unpaid principal balance and recorded investment represents charge offs previously taken; it excludes accrued interest receivable due to materiality. Related allowance is calculated on the recorded investment, not the unpaid principal balance. Accrued interest receivable is excluded due to immateriality.

Table of Contents

The average recorded investment in impaired loans and interest income recognized for the three and nine months ended September 30, 2016 and 2015, by class, are summarized in the table below. Impaired loans include legacy impaired loans, which include all TDRs and all other nonaccrual loans. Interest income recognized during the periods on a cash basis was insignificant.

The Company is not committed to lend a material amount of additional funds as of September 30, 2016 or December 31, 2015 to customers with outstanding loans that are classified as impaired or as TDRs.

Credit Quality Indicators

The Company uses an asset quality ratings system to assign a numeric indicator of the credit quality and level of existing credit risk inherent in a loan ranging from 1 to 8, where a higher rating represents higher risk. Management regularly reviews loans in the portfolio to assess credit quality indicators and to determine appropriate loan classification and grading in accordance with the Company's internal loan policy. These ratings are adjusted periodically as the Company becomes aware of changes in the credit quality of the underlying loans.

Indirect automobile loans typically receive a risk rating only when being downgraded to an adverse rating which typically occurs when payments of principal and interest are greater than 90 days past due. The Company uses a number of factors, including FICO scoring, to help evaluate the likelihood consumer borrowers will pay their credit obligations as agreed. The weighted-average FICO score for the indirect automobile portfolio was 752 at September 30, 2016 and 749 at December 31, 2015.

The following are definitions of the asset rating categories.

- Pass – These categories include loans rated satisfactory with high, good, average or acceptable business and credit risk.
- Special Mention – A special mention asset has potential weaknesses that deserve management's close attention.
- Substandard – A substandard asset is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. A substandard asset has a well-defined weakness, or weaknesses, that jeopardize the liquidation of the debt.

•Doubtful – Doubtful assets have all the weaknesses inherent in assets classified substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Table of Contents

•Loss – Loss assets are considered uncollectable and of such little value that their continuance as recorded assets is not warranted.

The following tables present the recorded investment in loans, by loan class and risk rating category, as of September 30, 2016 and December 31, 2015.

Acquired Loans

As discussed in Note 2, on March 1, 2016, the Company acquired loans with a fair value of \$147.4 million. Of this amount, \$145.9 million were determined to have no evidence of deteriorated credit quality and are accounted for as acquired performing loans. The remaining \$1.5 million were determined to have exhibited deteriorated credit quality since origination and were accounted for as purchased credit impaired (“PCI”) loans.

The tables below show the balances acquired for these two subsections of the portfolio as of the acquisition date.

Contractually required principal and interest payments are based on a loan's contractual rate and payment schedule at acquisition, assuming no loss or prepayment.

Acquired Performing Loans

(in thousands)	2016
Contractually required principal and interest payments at acquisition	\$173,726
Expected losses and foregone interest	(3,591)
Cash flows expected to be collected at acquisition	\$170,135
Fair value of acquired performing loans at acquisition	\$145,913

Table of Contents

Acquired PCI Loans

(in thousands)	2016
Contractually required principal and interest payments at acquisition	\$2,515
Less: Nonaccretable difference (expected losses and foregone interest)	(92)
Cash flows expected to be collected at acquisition	1,553
Less: Accretable yield	(92)
Basis in acquired PCI loans at acquisition	\$1,461

The Company also acquired PCI loans in its past acquisitions. The carrying amount and outstanding balance at September 30, 2016 of the PCI loans from these acquisitions as well as the PCI loans acquired during 2016 was \$38.9 million and \$51.8 million, respectively. The carrying amount and outstanding balance of the PCI loans from the past FDIC-assisted acquisitions was \$44.5 million and \$58.1 million, respectively, at December 31, 2015.

Accretable yield, or income expected to be collected on PCI loans at September 30, 2016 and December 31, 2015, was as follows.

(in thousands)	September 30, December 31,	
	2016	2015
Beginning balance	\$ 3,797	\$ 1,649
Increase due to acquired loans	92	1,371
Accretion of income	(1,478)	(768)
Other activity, net ⁽¹⁾	290	1,545
Ending balance	\$ 2,701	\$ 3,797

⁽¹⁾Includes changes in cash flows expected to be collected due to changes in timing of liquidation events, prepayment assumptions, etc.

6. Allowance for Loan Losses

A summary of changes in the allowance for loan losses (“ALL”) by loan portfolio type was as follows.

Individually evaluated for impairment	\$32,643	\$ 6,100	\$2,124	\$ 5,906	\$ —	\$46,773
Collectively evaluated for impairment	787,493	168,953	1,460,039	389,209	—	2,805,694
Acquired with deteriorated credit quality	19,148	1,980	1,373	21,980	—	44,481
Total loans	\$839,284	\$ 177,033	\$1,463,536	\$417,095	\$ —	\$2,896,948

The determination of the overall allowance for credit losses has two components, the allowance for originated loans and the allowance for acquired loans.

Total loans includes acquired loans of \$290.8 million and \$199.9 million at September 30, 2016 and December 31, 2015, respectively, which were recorded at fair value when acquired. The ALL for acquired loans is evaluated at each reporting date

Table of Contents

subsequent to acquisition. For acquired performing loans, an allowance is determined for each loan pool using a methodology similar to that used for originated loans and then compared to the remaining fair value discount for that pool. For purchased credit impaired loans, estimated cash flows expected to be collected are re-evaluated at each reporting date for each loan pool. The methodology also considers the remaining fair value discounts recognized upon acquisition associated with acquired performing loans in estimating a general allowance and also includes establishing an ALL for purchased credit-impaired loans that have deteriorated since acquisition.

7. Other Real Estate

The following table segregates the other real estate (“ORE”) by type.

(in thousands)	September 30, 2016	December 31, 2015
Commercial	\$ 7,591	\$ 7,147
Residential	1,709	1,263
Undeveloped property	7,626	10,267
Total ORE, net	\$ 16,926	\$ 18,677

The following table summarizes the changes in ORE.

(in thousands)	For the Three Months Ended		For the Nine Months Ended	
	September 30, 2016	2015	September 30, 2016	2015
Beginning balance	\$18,621	\$16,070	\$18,677	\$22,564
ORE acquired in acquisition	—	—	809	—
Transfers of loans to ORE	1,307	2,248	6,241	4,067
Sales	(2,346)	(3,556)	(7,755)	(11,464)
Write-downs	(656)	(55)	(1,046)	(460)
Ending balance	\$16,926	\$14,707	\$16,926	\$14,707

At September 30, 2016, the unpaid principal balance of residential mortgage loans in the process of foreclosure was \$2.7 million. The unpaid principal balance of residential mortgage loans in the process of foreclosure at December 31, 2015 was \$142,000.

8. Fair Value of Financial Instruments

Valuation Methodologies and Fair Value Hierarchy

The primary financial instruments that the Company carries at fair value include investment securities available-for-sale, derivative instruments including IRLCs, and loans held-for-sale.

Debt securities issued by U.S. Government corporations and agencies, debt securities issued by states and political subdivisions, and agency residential mortgage-backed securities classified as available-for-sale are reported at fair value utilizing Level 2 inputs. For these securities, the Company obtains fair value measurements from an independent third party pricing service. We have processes in place to evaluate such third party pricing services to ensure information obtained and valuation techniques are appropriate. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond’s terms and conditions, among other things. The investments in the Company’s portfolio are generally not quoted on an exchange but are actively traded in the secondary institutional markets.

The fair value of mortgage loans held-for-sale is based on what secondary markets are currently offering for portfolios with similar characteristics. The fair value measurements consider observable data that may include market trade pricing from brokers and investors and the mortgage-backed security markets. As such, the Company classifies these loans as Level 2.

The Company classifies IRLCs on residential mortgage loans held-for-sale, which are derivatives under ASC 815-10-15, on a gross basis within other assets or other liabilities. The fair value of these commitments, while based on interest rates observable in the market, is highly dependent on the ultimate closing of the loans. These “pull-through”

rates are based on both the Company's historical data and the current interest rate environment and reflect the Company's best estimate of the likelihood that a commitment will ultimately result in a closed loan. The loan servicing value is also included in the fair value of IRLCs. Because these inputs are not transparent in market trades, IRLCs are considered to be Level 3 assets.

Derivative instruments are primarily transacted in the secondary mortgage and institutional dealer markets and priced with observable market assumptions at a mid-market valuation point, with appropriate valuation adjustments for liquidity and credit risk. For purposes of valuation adjustments to its derivative positions, the Company has evaluated liquidity premiums that may be demanded by market participants, as well as the credit risk of its counterparties and its own credit if applicable. To date, no

Table of Contents

material losses due to a counterparty's inability to pay any net uncollateralized position have occurred. Derivative instruments are considered to be Level 3.

The credit risk associated with the underlying cash flows of an instrument carried at fair value was a consideration in estimating the fair value of certain financial instruments. Credit risk was considered in the valuation through a variety of inputs, as applicable, including, the actual default and loss severity of the collateral, and level of subordination. The assumption used to estimate credit risk applied relevant information that a market participant would likely use in valuing an instrument. Because mortgage loans held-for-sale are sold within a few weeks of origination, they are unlikely to demonstrate any of the credit weaknesses discussed above and as a result, there were no credit related adjustments to fair value during the three and nine months ended September 30, 2016 and 2015.

Recurring Fair Value Measurements

The following tables present the financial instruments measured at fair value on a recurring basis by level within the fair value hierarchy based on the inputs used to estimate the fair value at the measurement date. There were no transfers between Levels 1, 2, and 3 during the three and nine months ended September 30, 2016 and 2015.

				Modeled prepayment speeds	8.62%	9.41%
Recurring:						
IRLCs	7,349	3,001	Pricing model	Modeled pull-through ratio	82.50%	80.00%
Forward commitments (1,286) 369			Investor pricing	Pricing spreads	90.00% - 106.22%	90.00% - 106.20%
					103.62%	102.67%

The tables above exclude the initial measurement of assets and liabilities that were added pursuant to acquisitions. These assets and liabilities were recorded at their fair value upon acquisition and were not remeasured during the periods presented unless specifically required by GAAP. Acquisition date fair values represent either Level 2 fair value measurements (investment securities, ORE, property, equipment and borrowings) or Level 3 fair value measurements (loans, deposits and core deposit intangible asset).

Impaired loans are evaluated and valued at the time the loan is identified as impaired, at the lower of cost or fair value less estimated selling costs. A loan is considered impaired if it is probable that the Company will be unable to collect all amounts contractually due according to the terms of the loan agreement. Measuring the impairment of loans using the present value of expected future cash flows, discounted at the loan's effective interest rate, is not considered a fair value measurement. For collateral-dependent loans, fair value is measured based on the value of the collateral securing these loans and is classified as Level 3 in the fair value hierarchy. Collateral may include real estate or business assets,

including equipment, inventory and accounts receivable. The value of real estate collateral is determined based on appraisals prepared by qualified licensed appraisers ordered by the Company's internal appraisal department, which is independent of the Company's lending function. If significant, the value of business equipment is based on an appraisal by qualified licensed appraisers ordered by the Company; otherwise, the equipment's net book value on the business's financial statements is the basis for the value of business equipment. Inventory and accounts receivable collateral are valued based on independent field examiner review or aging reports. Appraised and reported values may be discounted based on management's historical knowledge, changes in market conditions from the time of the valuation, and

Table of Contents

management's expertise and knowledge of the client and client's business. Impaired loans are evaluated on at least a quarterly basis for additional impairment and adjusted accordingly.

Foreclosed assets are adjusted to fair value less estimated selling costs upon transfer of the loans to ORE, which becomes the new carrying value of the ORE. Subsequently, foreclosed assets are carried at the lower of carrying value or fair value less estimated selling costs. Fair value is based on independent market prices, appraised values of the collateral, sales agreements, or management's estimation of the value of the collateral using market data including recent sales activity for similar assets in the property's market. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the foreclosed asset as nonrecurring Level 2. When an appraised value is not available or management determines there is no observable market price, the Company records the foreclosed asset as nonrecurring Level 3. Appraised and reported values may be discounted based on management's historical knowledge, changes in market conditions from the time of the valuation, and management's expertise and knowledge of the property. Management continues to evaluate the appropriateness of appraised values on at least an annual basis.

Mortgage and SBA servicing rights are initially recorded at fair value when loans are sold with servicing retained. These assets are then amortized in proportion to and over the period of estimated net servicing income. On at least a quarterly basis, these servicing assets are assessed for impairment based on fair value. Management uses a model operated and maintained by an independent third party to assist in determining fair value which stratifies the servicing portfolio into homogeneous subsets with unique behavior characteristics. The model then converts those characteristics into income and expense streams, adjusting those streams for prepayments, present values the adjusted streams, and combines the present values into a total. If the cost basis of any loan stratification tranche is higher than the present value of the tranche, an impairment is recorded. Management periodically obtains an independent review of the valuation assumptions to validate the fair value estimate and the reasonableness of the assumptions used in measuring fair value. See Note 11 for additional disclosures related to assumptions used in the fair value calculation for mortgage and SBA servicing rights.

Management makes certain estimates and assumptions related to costs to service varying types of loans and pools of loans, prepayment speeds, the projected lives of loans and pools of loans sold servicing retained, and discount factors used in calculating the present values of servicing fees projected to be received. No less frequently than quarterly, management reviews the status of mortgage loans held-for-sale for which fair value has been elected and pools of servicing assets to determine if there is any impairment to those assets due to such factors as earlier than estimated repayments or significant prepayments. Any impairment identified in these assets results in reductions in their carrying values through a valuation allowance and a corresponding increase in operating expenses.

The significant unobservable input used in the fair value measurement of the Company's IRLCs is the pull-through ratio, which represents the percentage of loans currently in a lock position which management estimates will ultimately close. Generally, the fair value of an IRLC is positive (negative) if the prevailing interest rate is lower (higher) than the IRLC rate. Therefore, an increase in the pull-through ratio (i.e., higher percentage of loans are estimated to close) will result in the fair value of the IRLC increasing if in a gain position, or decreasing if in a loss position. The pull-through ratio is largely dependent on the processing stage that a loan is currently in and the change in prevailing interest rates from the time of the rate lock. The pull-through ratio is computed by the secondary marketing department using historical data and the ratio is periodically reviewed by the Company's Secondary Marketing Department of the Mortgage Banking Division for reasonableness.

Forward commitments are instruments that are used to hedge the value of the IRLCs and mortgage loans held-for-sale. The Company takes investor commitments to sell a loan or pool of newly originated loans to an investor for an agreed upon price for delivery in the future. This type of forward commitment is also known as a mandatory commitment. Generally, the fair value of a forward commitment is negative (positive) if the prevailing interest rate is lower (higher) than the current commitment interest rate. The value of these commitments is ultimately determined by the investor that sold the commitment and represents a significant unobservable input used in the fair value measurement of the Company's fair value of forward commitments.

Fair Value Option

The Company records mortgage loans held-for-sale at fair value. The Company chose to fair value these mortgage loans held-for-sale to align results with the underlying economic changes in value of the loans and related hedge instruments. The servicing value is included in the fair value of the mortgage loans held-for-sale and initially recognized at the time the Company enters into Interest Rate Lock Commitments (“IRLCs”) with borrowers. The mark-to-market adjustments related to loans held-for-sale and the associated economic hedges are reported as part of noninterest income from mortgage banking activities in the consolidated statements of comprehensive income. Interest income on mortgage loans held for sale is recorded based on contractual rates and is reflected in interest income on loans in the consolidated statements of comprehensive income.

The following table presents the difference between the aggregate fair value and the aggregate unpaid principal balance of loans held-for-sale for which the fair value option (“FVO”) has been elected as of September 30, 2016 and December 31, 2015. There were no loans held-for-sale that were 90 days or more past due or in nonaccrual status at September 30, 2016 or December 31, 2015.

Table of Contents

	Aggregate Fair Value September 30, 2016	Aggregate Unpaid Principal Balance at September 30, 2016	Aggregate Fair Value Over Unpaid Principal
(in thousands)			
Residential mortgage loans held-for-sale	\$ 291,030	\$ 281,418	\$ 9,612
	Aggregate Fair Value December 31, 2015	Aggregate Unpaid Principal Balance at December 31, 2015	Aggregate Fair Value Over Unpaid Principal
(in thousands)			
Residential mortgage loans held-for-sale	\$ 233,525	\$ 228,586	\$ 4,939

Net gains resulting from the change in fair value of these loans were \$2.4 million and \$2.7 million for the three and nine months ended September 30, 2016, respectively, and \$2.3 million and \$17,000 for the three and nine months ended September 30, 2015, respectively.

Fair Value of Financial Instruments

The estimated fair value of a financial instrument is the current amount that would be exchanged between willing parties, other than in a forced liquidation. Fair value is best determined based upon quoted market prices. In cases where quoted market prices for the Company's various financial instruments are not available, fair values are based on settlements using present value or other valuation techniques. Those techniques are significantly affected by the imprecision in estimating unobservable inputs and the assumptions used, including the discount rate and estimates of future cash flows. While the Company believes its valuation methods are appropriate, the derived fair value estimates cannot be substantiated by comparison to independent markets, and, in many cases, could not be realized in immediate settlement of the instruments. In that regard, the aggregate fair value amounts presented in the tables below do not represent the underlying value of the Company.

The following tables include the carrying amount and estimated fair value, as well as the level within the fair value hierarchy, of the Company's financial instruments. The fair value estimates presented are based upon relevant information available to management as of September 30, 2016 and December 31, 2015.

Subordinated debt	120,322	—	116,706	—	—	116,706

The carrying amounts reported in the Consolidated Balance Sheets for cash and cash equivalents approximate the fair values of those assets. For investment securities, fair value equals quoted market prices, if available. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities or dealer quotes. Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type. The fair value of performing loans is calculated by discounting scheduled cash flows through the remaining maturities using estimated market discount rates that reflect the credit and interest rate risk inherent in the loans along with a market risk premium and liquidity discount. Covered loans are measured using projections of expected cash flows, exclusive of the loss sharing agreements with the FDIC.

Fair value for significant nonperforming loans is estimated taking into consideration recent external appraisals of the underlying collateral for loans that are collateral dependent. If appraisals are not available or if the loan is not collateral dependent, estimated cash flows are discounted using a rate commensurate with the risk associated with the estimated cash flows. Assumptions regarding credit risk, cash flows, and discount rates are judgmentally determined using available market information and specific borrower information.

The fair value of deposits with no stated maturities, such as noninterest-bearing demand deposits, savings, interest-bearing demand, and money market accounts, is equal to the amount payable on demand. The fair value of time deposits is based on the discounted value of contractual cash flows based on the discount rates currently offered for deposits of similar remaining maturities.

The fair value of the Company's borrowings is estimated based on the quoted market price for the same or similar issued or on the current rates offered for debt of the same remaining maturities.

For off-balance sheet instruments, fair values are based on rates currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing for loan commitments and letters of credit. Fees related to these instruments were immaterial at September 30, 2016 and December 31, 2015, and the carrying amounts represent a reasonable approximation of their fair values. Loan commitments, letters and lines of credit, and similar obligations typically have variable interest rates and clauses that deny funding if the customer's credit quality deteriorates. Therefore, the fair values of these items are not significant and are not included in the foregoing schedule.

Netting of Financial Instruments

Securities sold under repurchase agreements consist primarily of balances in the transaction accounts of commercial customers swept nightly to an overnight investment account. Securities sold under repurchase agreements are collateralized with investment securities having a market value no less than the balance borrowed, which can fluctuate daily. Securities sold under repurchase agreements are not subject to offset.

The following table presents the net position of securities sold under repurchase agreements.

(in thousands)	September 30, December	
	2016	31, 2015
Securities sold under repurchase agreements ⁽¹⁾	\$ 13,490	\$ 19,730
Fair value of securities pledged	21,240	23,058
Net position of overnight repurchase agreements	\$ 7,750	\$ 3,328

⁽¹⁾ Included as part of Short-term borrowings on the Consolidated Balance Sheets

Table of Contents

The following table summarizes the collateral type pledged for the securities sold under repurchase agreements presented above.

(in thousands)	September 30, December	
	2016	31, 2015
Municipal securities	\$ 6,705	\$ 8,240
Obligations of U.S. Government sponsored enterprises	—	4,932
Residential mortgage-backed securities	14,535	9,886
Total fair value of securities pledged	\$ 21,240	\$ 23,058

For both periods presented, all of the repurchase agreements contractually mature overnight. Risk arises if the collateral value drops below agreed upon levels and the Company would be required to pledge further securities. Management has mitigated this risk by reviewing the collateral on a daily basis, and reviewing the market value of the collateral on a monthly basis.

There are no derivative contracts subject to master netting agreements.

9. Derivative Financial Instruments

Gains of \$2.4 million and losses of \$3.3 million were recorded for the three months ended September 30, 2016 and 2015, respectively, and gains of \$2.7 million and \$1.8 million were recorded for the nine months ended September 30, 2016 and 2015, respectively, for all mortgage-related derivatives, and are included in the Consolidated Statements of Comprehensive Income as part of noninterest income from mortgage banking activities.

The Company's derivative positions were as follows:

(in thousands)	Contract or Notional	
	Amount as of	
	September 30,	December 31,
	2016	2015
Forward rate commitments	\$602,688	\$ 410,152
Interest rate lock commitments	325,687	181,188
Total derivatives contracts	\$928,375	\$ 591,340

The Company's derivative contracts are not subject to master netting arrangements.

10. Earnings Per Common Share

Earnings per common share ("EPS") were calculated as follows:

(\$ in thousands, except per share data)	Three Months	
	Ended	
	September 30,	
	2016	2015
Net income	\$12,515	\$9,217
Weighted average common shares outstanding - basic ⁽¹⁾	25,993	22,604
Effect of dilutive stock options and warrants ⁽²⁾	134	1,299
Weighted average common shares outstanding – diluted	26,127	23,903
EPS:		
Basic	\$0.48	\$0.41
Diluted	\$0.48	\$0.39

Table of Contents

	Nine Months Ended September 30,	
	2016	2015
(\$ in thousands, except per share data)		
Net income	\$23,701	\$32,358
Weighted average common shares outstanding - basic ⁽¹⁾	25,252	21,818
Effect of dilutive stock options and warrants ⁽²⁾	389	915
Weighted average common shares outstanding – diluted	25,641	22,733
EPS:		
Basic	\$0.94	\$1.48
Diluted	\$0.92	\$1.42

⁽¹⁾Includes participating securities related to unvested restricted stock awards, net of forfeitures during the period

⁽²⁾Effect of dilutive stock options and warrants includes the dilutive effect of additional potential common shares issuable under contracts outstanding during each respective period

As of September 30, 2016 and 2015, there were 460,000 and 70,000 common stock options which were not included in the potentially dilutive stock options and warrants, respectively. These shares were not included in the computation of diluted EPS because they were anti-dilutive in the period (i.e., the options' exercise price was greater than the average market price of the common shares.)

11. Certain Transfers of Financial Assets

Servicing rights

Loan servicing rights are initially recorded at fair value and subsequently recorded at the lower of cost or fair value and are amortized over the remaining service life of the loans, with consideration given to prepayment assumptions.

The carrying value of the loan servicing assets is shown in the table below:

(in thousands)	September 30, 2016	December 31, 2015
Servicing rights		
Residential mortgage	\$ 68,688	\$ 72,766
SBA	5,703	5,358
Indirect automobile	7,629	6,820
Total servicing rights	\$ 82,020	\$ 84,944

Residential Mortgage Loans

The Company typically sells first-lien residential mortgage loans to third party investors, primarily Fannie Mae, Ginnie Mae, and Freddie Mac. The Company retains the related mortgage servicing rights (“MSRs”) and receives servicing fees on certain of these loans. During the three months ended September 30, 2016 and 2015, the Company sold \$723.3 million and \$657.3 million in residential mortgage loans, respectively, with servicing retained. During the nine months ended September 30, 2016 and 2015, the Company sold \$1.8 billion and \$1.7 billion in residential mortgage loans, respectively, with servicing retained.

The net gain on loan sales, MSR amortization and recoveries/impairment, and ongoing servicing fees on the portfolio of loans serviced for others are recorded in the Consolidated Statements of Comprehensive Income as part of noninterest income from mortgage banking activities. During the three months ended September 30, 2016 and 2015, the Company recorded gains on sales of residential mortgage loans of \$25.2 million and \$17.6 million, respectively. During the nine months ended September 30, 2016 and 2015, the Company recorded gains on sales of residential mortgage loans of \$63.1 million and \$54.4 million, respectively. During the three months ended September 30, 2016 and 2015, the Company recorded servicing fee income of \$4.9 million and \$4.1 million, respectively. During the nine months ended September 30, 2016 and 2015, the Company recorded servicing fee income of \$14.0 million and \$11.5

million, respectively.

28

Table of Contents

The table below is an analysis of the activity in the Company's MSR's and impairment.

(in thousands)	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2016	2015	2016	2015
Residential mortgage servicing rights				
Beginning carrying value, net	\$64,899	\$67,120	\$72,766	\$56,720
Additions	7,745	8,950	19,989	24,150
Amortization	(4,414)	(2,489)	(11,295)	(7,431)
Recoveries/(impairment), net	458	(2,215)	(12,772)	(2,073)
Ending carrying value, net	\$68,688	\$71,366	\$68,688	\$71,366

(in thousands)	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2016	2015	2016	2015
Residential mortgage servicing impairment				
Beginning balance	\$22,753	\$6,310	\$9,523	\$6,452
Additions	523	2,247	14,947	6,903
Recoveries	(981)	(32)	(2,175)	(4,830)
Ending balance	\$22,295	\$8,525	\$22,295	\$8,525

The fair value of MSR's, key metrics, and the sensitivity of the fair value to adverse changes in model inputs and/or assumptions are summarized below.

(\$ in thousands)	September 30, 2016	December 31, 2015
Residential Mortgage Servicing Rights		
Fair Value	\$ 68,688	\$74,366
Composition of residential loans serviced for others:		
Fixed-rate	99.42 %	99.28 %
Adjustable-rate	0.58 %	0.72 %
Total	100.00 %	100.00 %
Weighted average remaining term (years)	26.2	26.0
Modeled prepayment speed	13.92 %	8.66 %
Decline in fair value due to a 10% adverse change	\$ (3,151)	\$(2,572)
Decline in fair value due to a 20% adverse change	(5,997)	(4,978)
Weighted average discount rate	9.27 %	10.06 %
Decline in fair value due to a 10% adverse change	\$ (1,952)	\$(3,004)
Decline in fair value due to a 20% adverse change	(3,900)	(5,762)

The sensitivity calculations above are hypothetical and should not be considered to be predictive of future performance. As indicated, changes in value based on adverse changes in model inputs and/or assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in value may not be linear. In addition, the effect of an adverse variation in a particular assumption on the value of the MSR's is calculated without changing any other assumptions. In reality, changes in one factor may result in changes in another (for example, increases in market interest rates may result in lower prepayments), which may magnify or counteract the effect of the change.

Information about the asset quality of residential mortgage loans serviced by the Company is shown in the table below.

Table of Contents

Residential mortgage loans serviced (in thousands)	September 30, 2016			Net
	Unpaid Principal Balance	Delinquent (days)		Charge-offs for the Nine Months Ended September 30, 2016
	30 to 89	90+		
Serviced for others	\$7,489,954	\$47,600	\$9,022	\$ —
Held-for-sale	281,418	5	—	—
Held-for-investment	375,901	4,341	6,443	35
Total residential mortgage loans serviced	\$8,147,273	\$51,946	\$15,465	\$ 35

Loans serviced for others are not included in the consolidated statements of financial condition as they are not assets of the Company.

Mortgage Recourse Liability

During the last five years ended September 30, 2016, the Company has sold over 47,000 loans with a principal balance of approximately \$11.4 billion. As seller, the Company has made various representations and warranties related to, among other things, the ownership of the loans, the validity of the liens, the loan selection and origination process, and the compliance with origination criteria established by the purchasers. In the event of a breach of these representations and warranties, the Company is obligated to repurchase loans with identified defects and/or to indemnify the purchasers. Some of these conditions include underwriting errors or omissions, fraud or material misstatements, and invalid collateral values. The contractual obligation arises only when the breach of representations and warranties is discovered and repurchase/indemnification is demanded. Generally, the maximum amount the Company would be required to pay would be equal to the unpaid principal balance of such loans that are deemed to have defects that were sold to purchasers, plus accrued interest, return of the premium received at the time of the loan sale, and reimbursement of certain expenses. To date, the claims to the Company from the purchasers to be paid upon repurchase or paid because of indemnification have been insignificant. In addition, the Company's loan sale contracts define a condition in which the borrower defaults during a short period of time as an early payment default ("EPD"). In the event of an EPD, the Company may be required to return the premium paid for the loan, pay certain administrative fees, and may be required to repurchase the loan or indemnify the purchaser unless an EPD waiver is obtained. Management recognizes the potential risk from costs related to breaches of representations and warranties made in connection with residential loan sales and subsequent required repurchases, indemnifications, and EPD claims. As a result, the Company has established a liability to cover potential costs related to these events based on historical experience, adjusted for any risk factors not captured in the historical losses, current business volume, and known claims outstanding. The recourse liability totaled \$1.4 million at September 30, 2016 and December 31, 2015, respectively, and management believes this amount is adequate for potential exposure related to loan sale indemnification, repurchase loans, and EPD claims. Management will continue to monitor the adequacy of the reserve level and may decide that further additions to the reserve are appropriate. However, there can be no assurance that the current balance of this reserve will prove sufficient to cover actual future losses.

It should be noted that the Company's historical loan sale activity began to increase at a time when underwriting requirements were strengthened from prior years and limited documentation conventional loans (i.e., non-government insured) were no longer eligible for purchase in the secondary market. Accordingly, the population of conventional loans the Company has sold has been underwritten based on fully documented information. While this does not eliminate all risk of repurchase or indemnification costs, management believes it significantly mitigates that risk.

SBA Loans

The Company has executed certain transfers of SBA loans with third parties. These loans, which are typically partially guaranteed by the SBA or otherwise credit enhanced, are generally secured by business property such as real estate, inventory, equipment, and accounts receivable. During the three months ended September 30, 2016 and 2015, the Company sold \$18.2 million and \$15.0 million in SBA loans, respectively, with servicing retained. During the nine months ended September 30, 2016 and 2015, the Company sold \$47.0 million and \$39.2 million in SBA loans,

respectively, with servicing retained.

The Company retains the loan servicing rights and receives ongoing servicing fees on the portfolio of loans serviced for others. The net gain on SBA loan sales, amortization and recoveries/impairment of servicing rights, and ongoing servicing fees are recorded in the Consolidated Statements of Comprehensive Income as part of noninterest income from SBA lending activities. During the three months ended September 30, 2016 and 2015, the Company recorded gains on sales of SBA loans of \$882,000 and \$1.0 million, respectively. During the nine months ended September 30, 2016 and 2015, the Company recorded gains on sales of SBA loans of \$3.2 million and \$2.9 million, respectively. During the three months ended September 30, 2016 and 2015, the Company recorded servicing fee income of \$672,000 and \$579,000, respectively. During the nine months ended September 30, 2016 and 2015, the Company recorded servicing fee income of \$1.9 million and \$1.7 million, respectively.

Table of Contents

The table below is an analysis of the activity in the Company's SBA loan servicing rights and impairment.

Weighted average discount rate	12.50	% 13.25 %
Decline in fair value due to a 10% adverse change	\$ (228)	\$(242)
Decline in fair value due to a 20% adverse change	(439)	(466)

The sensitivity calculations above are hypothetical and should not be considered to be predictive of future performance. As indicated, changes in value based on adverse changes in model inputs and/or assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in value may not be linear. In addition, the effect of an adverse variation in a particular assumption on the value of the SBA loan servicing rights is calculated without changing any other assumptions. In reality, changes in one factor may magnify or counteract the effect of the change.

Table of Contents

Information about the asset quality of SBA loans serviced by the Company is shown in the table below.

SBA loans serviced (in thousands)	September 30, 2016		Net	
	Unpaid Principal Balance	Delinquent (days) 30 to 89	90+	Charge-offs for the Nine Months Ended September 30, 2016
Serviced for others	\$283,833	\$576	\$4,509	\$ 385
Held-for-sale	10,587	—	—	—
Held-for-investment	146,042	2,449	5,428	364
Total SBA loans serviced	\$440,462	\$3,025	\$9,937	\$ 749

Loans serviced for others are not included in the consolidated statements of financial condition as they are not assets of the Company.

Indirect Automobile Loans

The Company purchases, on a nonrecourse basis, consumer installment contracts secured by new and used vehicles purchased by consumers from franchised motor vehicle dealers and select independent dealers. A portion of the indirect automobile loans is sold with servicing retained and the Company receives ongoing servicing fees on the portfolio of loans serviced for others. During the three months ended September 30, 2016 and 2015, the Company sold \$64.8 million and \$142.1 million in indirect automobile loans, respectively. During the nine months ended September 30, 2016 and 2015, the Company sold \$412.6 million and \$539.7 million in indirect automobile loans, respectively. The gain on loan sales, amortization of servicing rights, and ongoing servicing fees are recorded in the Consolidated Statements of Comprehensive Income as part of noninterest income from indirect lending activities. During the three months ended September 30, 2016 and 2015, the Company recorded gains on sales of indirect automobile loans of \$1.2 million and \$2.4 million, respectively. During the nine months ended September 30, 2016 and 2015, the Company recorded gains on sales of indirect automobile loans of \$7.3 million and \$10.3 million, respectively. During the three months ended September 30, 2016 and 2015, the Company recorded servicing fee income of \$2.3 million and \$2.2 million, respectively. During the nine months ended September 30, 2016 and 2015, the Company recorded servicing fee income of \$6.6 million and \$6.1 million, respectively.

The table below is an analysis of the activity in the Company's indirect automobile loan servicing rights:

(in thousands)	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2016	2015	2016	2015
Indirect automobile loan servicing rights				
Beginning carrying value	\$8,174	\$5,841	\$6,820	\$3,305
Additions	523	1,219	3,221	4,597
Amortization	(1,068)	(576)	(2,412)	(1,418)
Ending carrying value	\$7,629	\$6,484	\$7,629	\$6,484

The Company has not recorded impairment on its indirect automobile loan servicing rights.

Table of Contents

The fair value of the indirect automobile loan servicing rights, key metrics, and the sensitivity of the fair value to adverse changes in model inputs and/or assumptions are summarized below.

(\$ in thousands)	September 30, 2016		December 31, 2015	
Indirect loan servicing rights				
Fair value	\$ 7,903		\$ 9,803	
Composition of loans serviced for others:

Loans serviced for others are not included in the consolidated statements of financial condition as they are not assets of the Company.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following analysis reviews important factors affecting our financial condition at September 30, 2016 compared to December 31, 2015, and compares the results of operations for the three and nine months ended September 30, 2016 and 2015. These comments should be read in conjunction with our consolidated financial statements and accompanying notes appearing in this Quarterly Report on Form 10-Q and the "Risk Factors" set forth in our Annual Report on Form 10-K for the year ended December 31, 2015. All percentage and dollar variances noted in the following analysis are calculated from the balances presented in the accompanying consolidated financial statements.

Forward-Looking Statements

This Quarterly Report on Form 10-Q includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that reflect

our current expectations relating to present or future trends or factors generally affecting the banking industry and specifically affecting our operations, markets and services. Without limiting the foregoing, the words “believes,” “expects,” “anticipates,” “estimates,” “projects,” “intends,” “plans,” “will,” “may,” and similar expressions are intended to identify forward-looking statements. These forward-looking statements are based upon assumptions we believe are reasonable and may relate to, among other things, the difficult economic conditions and the economy’s impact on operating results, credit quality, liquidity, capital, the adequacy of the allowance for loan losses, changes in interest rates, and litigation results. These forward-looking statements are subject to risks and uncertainties. Actual results could differ materially from those projected for many reasons, including without limitation, changing events and trends that have influenced our assumptions.

Table of Contents

These risks, trends and events include but are not limited to the following: (1) risks associated with our loan portfolio, including difficulties in maintaining quality loan growth, greater loan losses than historic levels, the risk of an insufficient allowance for loan losses, expenses associated with managing nonperforming assets, our ability to maintain and service relationships with automobile dealers and indirect automobile loan purchasers, and our ability to profitably manage changes in our indirect automobile lending operations; (2) risks associated with global, general, and local economic and business conditions, including economic recession or depression, the pace, consistency, and extent of recovery of values and activity in the residential housing and commercial real estate markets of the Atlanta metropolitan area as well as the Savannah, Georgia, Birmingham, Alabama and eastern, central, and northern Florida markets; (3) expectations of and actual timing and amount of interest rate movements, including the slope and shape of the yield curve, which can have a significant impact on a financial services institution; (4) market and monetary fluctuations, including fluctuations in mortgage markets; (5) inflation or deflation; (6) risks associated with government regulation and programs, uncertainty with respect to future governmental economic and regulatory measures, new regulatory requirements imposed by the Consumer Financial Protection Bureau (“CFPB”), new regulatory requirements for residential mortgage loan services, and numerous legislative proposals to further regulate the financial services industry, the impact of, and adverse changes in, the governmental regulatory requirements affecting us, and changes in political, legislative and economic conditions; (7) the ability to maintain adequate liquidity and sources of liquidity; (8) our ability to maintain sufficient capital and to raise additional capital; (9) the accuracy and completeness of information from customers and our counterparties; (10) the effectiveness of our controls and procedures; (11) our ability to attract and retain skilled people; (12) greater competitive pressures among financial institutions in our market areas; (13) failure to achieve the revenue increases expected to result from our investments in our growth strategies, including our branch additions and in our transaction deposit, trust and lending businesses; (14) the volatility and trading volume of our common stock, and our ability to pay dividends; (15) the impact of dilution on our common stock; (16) risks related to acquisitions; (17) compliance with certain requirements under our loss share agreements with the Federal Deposit Insurance Corporation (“FDIC”); (18) risks associated with technological changes and the possibility of cyberfraud; (19) risks associated with adverse weather events in the geographic markets in which we operate; (20) our reliance on financial models and the accuracy of such financial models; and (21) our reliance on third party vendors.

This list is intended to identify some of the principal factors that could cause actual results to differ materially from those described in the forward-looking statements included herein and are not intended to represent a complete list of all risks and uncertainties in our business. Investors are encouraged to read the related section in our 2015 Annual Report on Form 10-K, including the “Risk Factors” set forth therein. Additional information and other factors that could affect future financial results are included in our filings with the Securities and Exchange Commission (“SEC”).

Overview

Since our inception in 1974, we have pursued managed profitable growth through providing quality financial services. Our overall focus is on building shareholder value. Our mission is to continue growth, improve earnings and increase shareholder value; to treat customers, employees, community and shareholders according to the Golden Rule; and to operate within a culture of strong internal controls.

Our franchise primarily spans the metropolitan Atlanta, Jacksonville, Orlando, and Sarasota-Bradenton, Florida markets. We also conduct indirect automobile lending, residential mortgage lending and SBA lending activities in thirteen states.

Table of Contents

During 2016 and 2015, we have continued to expand our footprint and customer base with the opening of additional offices to support retail banking, mortgage lending, and indirect automobile lending activities including the commencement of indirect automobile lending activities in Oklahoma, expansion of mortgage lending activities in North and South Carolina, the expansion of our retail branch network in Georgia and northern, eastern and central Florida through acquisitions, and de novo branch openings. Trust and wealth management began operations in July 2014 and continues to grow.

On March 1, 2016, we completed our acquisition of American Enterprise Bankshares, Inc. (“AEB”), the holding company for American Enterprise Bank of Florida, headquartered in Jacksonville, Florida. We acquired AEB for \$22.8 million. AEB shareholders received 0.299 shares of Fidelity common stock for each share of AEB common stock, resulting in the issuance of 1,470,068 shares of Fidelity common stock. Under the terms of the acquisition agreement, AEB merged with and into the Company and American Enterprise Bank of Florida merged with and into Fidelity Bank. With this acquisition, we added approximately \$208.8 million in assets, \$147.4 million in loans, and \$181.8 million in deposits and expanded and strengthened our retail branch footprint by adding two branches in the Jacksonville, Florida area.

In addition to the AEB acquisition, we added \$280.8 million in assets, including \$144.8 million in loans and \$266.4 million in deposits and seven branches in October 2015 from the FDIC-assisted acquisition of The Bank of Georgia and \$151.7 million in assets, including \$29.7 million in loans, and \$151.1 million in deposits, from the acquisition of eight branches from First Bank in September 2015.

Our lending activities are significantly influenced by the local economic environments in the markets we serve. We have grown our consumer installment, mortgage, construction and commercial loan portfolios organically and through acquisition as the economy continues to improve. Our loan portfolio is well diversified among consumer, business, and real estate lending. The credit quality of the loans we have originated continues to be strong.

We derive about half of our revenues from noninterest income sources such as service charges on loan and deposit accounts, fees on other products and services and income from mortgage banking, indirect automobile, and SBA activities. The majority of the noninterest income earned from these sources is generated from gains on sales of loans including recognition of loan servicing on the majority of loans sold. The retained servicing obligation generates servicing revenue over the life of the loans sold. The revenue generated from gains on sales of loans and related servicing is partially offset by amortization and possible impairment of the related servicing rights. Servicing rights are amortized in proportion to the estimated future servicing income on the underlying loans sold. Impairment on servicing rights is recorded based on changes in the estimated and actual prepayment speeds and default rates and losses on the underlying loans sold. During the first half of 2016, higher than normal impairment on mortgage servicing rights was recorded as part of noninterest income from mortgage banking activities, however, mortgage servicing rights impairment charges did not extend into the third quarter as we recorded a net impairment recovery of \$458,000 for the quarter. The impairment recovery occurred as estimated future prepayment speeds stabilized during the quarter, and subsequently, the estimated remaining life of the servicing income on the underlying loans serviced for others extended slightly. While the impairment charges have been significant year-to-date, we expect the impact to be partially offset in the near term by an increase in refinance loan production driven by falling mortgage rates.

A portion of our profitability, as with other financial institutions, is dependent upon net interest income, which is the difference between the interest we receive on interest-earning assets, such as loans and securities, and the interest we pay on interest-bearing liabilities, principally deposits and borrowings. Our net interest margin is affected by prevailing interest rates, nonperforming assets and competition among financial institutions for loans and deposits.

We continue to attract new customer relationships, and talented and experienced bankers to support our growth. During 2016, we have made significant progress in integrating and leveraging our recent acquisitions and continued expansion. We are also continuing to focus on asset quality, revenue growth, deposit growth and quality loan growth at a well-maintained capital level.

Financial Performance

We recorded net income for the three months ended September 30, 2016 of \$12.5 million compared to \$9.2 million for the same period in 2015, an increase of \$3.3 million, or 35.8%. For the nine months ended September 30, 2016, we recorded net income of \$23.7 million compared to \$32.4 million for the same period in 2015, a decrease of \$8.7

million, or 26.8%.

Basic and diluted earnings per common share for the three months ended September 30, 2016 were \$0.48, compared to \$0.41 and \$0.39, respectively, for the same period last year. Basic and diluted earnings per common share for the nine months ended September 30, 2016 were \$0.94 and \$0.92, compared to \$1.48 and \$1.42, respectively, for the same period last year.

The primary driver of the increase in three month net income was the year over year increase in average earning assets of \$843.3 million, or 26.6%, over the past twelve months, primarily due to assets added through acquisition of \$489.6 million, as well as organic loan growth.

The year over year decrease in the nine month net income was primarily the result of an increase in the provision for loan losses of \$4.5 million. In addition, the increase of \$27.0 million in noninterest expense outpaced the net increase in total revenue of \$22.2 million as noninterest income decreased by \$5.2 million.

Table of Contents

On a linked-quarter basis, net income increased by \$5.9 million, or 88.3%, as total revenue increased by \$12.4 million, or 18.6%, the provision for loan losses decreased by \$1.0 million, and noninterest expense increased by \$4.0 million, or 8.4%, representing an improvement in operating leverage.

Results of Operations

Net Interest Income

Interest Income

Interest income was \$39.9 million and \$111.0 million for the quarter and nine months ended September 30, 2016, an increase of \$10.3 million and \$27.4 million, or 34.8% and 32.8%, respectively, as compared to the same periods in 2015. Year over year, average loans for the quarter and nine months increased by \$762.2 million and \$763.6 million, or 25.8% and 27.3%, respectively, as compared to the same periods a year ago, which was the primary reason for the increase in interest income.

Interest income also increased compared to the prior year due to the increase in the yield on loans of 29 and 17 basis points for the quarter and nine months ended September 30, 2016 to 4.12% and 4.01%, respectively. Discount accretion on acquired loans contributed 19 and 18 basis points of the increase in loan yields for the quarter and nine months, respectively. The remainder of the increase was attributable to a combination of fluctuations in prepayment penalties on commercial loans and dealer reserve amortization on indirect loans which was partially offset by slightly lower contractual loan yields as new loans, on average, have been originated at lower yields over the previous twelve months.

On a linked-quarter basis, interest income increased by \$3.1 million, or 8.4%, primarily due to the increase in average loans during the quarter of \$127.4 million, or 3.5%, mainly in the consumer loan portfolio. The increase in interest income was also driven by an increase in the yield on loans of 17 basis points. Increased discount accretion on acquired loans due to resolution of problem assets and loan payoffs during the quarter contributed 3 basis points to the increase. The remainder of the increase was attributable to fluctuations in prepayment penalties on commercial loans, dealer reserve amortization on indirect loans and reversal of interest in the second quarter on newly-classified nonaccrual loans.

Interest Expense

Interest expense was \$5.1 million and \$15.1 million for the three and nine months ended September 30, 2016, an increase of \$675,000 and \$4.2 million, or 15.1% and 38.4%, respectively, as compared to the same periods in 2015. A combination of organic growth and deposits added through recent acquisitions resulted in a year over year increase of \$513.8 million in average interest bearing deposits. For the quarter, the increase in interest expense due to larger average deposit balances was offset by a decrease in the rate paid on interest-bearing accounts, primarily time deposits, which decreased by 8 basis points as compared to the same quarter a year ago. For the nine months, interest expense also increased due to the issuance of the subordinated debt in May 2015 which added approximately \$1.8 million in interest expense in 2016 compared to 2015.

On a linked-quarter basis, interest expense was relatively flat, increasing by \$172,000, or 3.5%, due to slight increases in the rate paid on average interest-bearing liabilities.

Net Interest Margin

The net interest margin was 3.46% and 3.35% for the three and nine months ended September 30, 2016, as compared to 3.18% and 3.26%, respectively, for the same periods in 2015. Net interest income (tax equivalent) rose to \$34.9 million and \$96.2 million or increases of 37.6% and 31.3%, respectively, as compared to the same periods in 2015. The increase in the net interest margin of 28 and 9 basis points, respectively, as compared to the same periods in 2015, occurred primarily due to higher loan yields. Higher discount accretion on acquired loans contributed 19 and 18 basis points to loan yields for the three and nine months, respectively, with fluctuations in other loan fees and costs making up the remainder of the difference as further described in the "Interest Income" section above.

The remainder of the change in the net interest margin was the result of changes in interest costs. For the quarter, a decrease of 4 basis points in interest cost occurred, as compared to the same period a year ago, as time deposits renewed at lower market rates. For the nine months, the interest cost increased by 7 basis points due to the issuance of the subordinated debt in May of 2015 which carries a higher interest cost than the average cost of funds.

The increase in the level of net interest income (tax equivalent) for the three and nine months ended September 30, 2016, as compared to the same periods in the prior year, occurred primarily due to an increase in the level of average earning assets of \$843.3 million and \$837.5 million, or 26.6% and 27.9%, respectively, due to a combination of organic growth and acquisitions over the past year. The remainder of the increase in net interest income for the quarter occurred as the loan yield increased and interest cost decreased for the reasons noted above.

On a linked-quarter basis, the net interest margin increased by 15 basis points, primarily due to higher yields on acquired loans, which was partially offset by a slight increase in the rate paid on interest-bearing liabilities. See further discussion in “Interest Income” and “Interest Expense” sections above.

Table of Contents

Provision for Loan Losses

Management's policy is to maintain the allowance for loan losses at a level sufficient to absorb probable incurred losses inherent in the loan portfolio as of the balance sheet date. The allowance is increased by the provision for loan losses and decreased by charge-offs, net of recoveries, net of amounts due from the FDIC under the loss sharing agreements for our past FDIC-assisted transactions.

The provision for loan losses was \$2.1 million and \$5.7 million for the three and nine months ended September 30, 2016, respectively, compared to a provision expense of \$1.3 million for the same periods in 2015. The loan portfolio held for investment experienced organic growth of \$288.0 million and \$352.0 million during the nine months ended September 30, 2016 and 2015, respectively, while the trend in historical net charge-offs has been low. Recoveries in the prior year partially offset the provision for loan losses required as a result of portfolio growth.

On a linked-quarter basis, the provision for loan losses decreased by \$1.0 million, mainly as the result of a decrease of \$2.5 million in net charge-offs compared to the previous quarter, partially offset by the provision required for loan growth during the quarter.

The following schedule summarizes the changes in the allowance for loan losses for the periods indicated.

(\$ in thousands)	As of or for the Nine Months Ended September 30,		
	2016	2015	
Balance at beginning of period	\$26,464	\$25,450	
Net (charge-offs)/recoveries:			
Commercial	(1,227)	(660)	
Construction	1,911	1,075	
Consumer	(2,410)	(2,015)	
Mortgage	(128)	(181)	
Total net charge-offs	(1,854)	(1,781)	
Decrease in FDIC indemnification asset	(619)	(173)	
Provision for loan losses ⁽¹⁾	5,746	1,254	
Balance at end of period	\$29,737	\$24,750	
Annualized ratio of net charge-offs to average loans outstanding, net	0.23	%	0.10 %
Allowance for loan losses as a percentage of loans	0.89	%	0.94 %
Allowance for loan losses as a percentage of loans, excluding acquired loans ⁽²⁾	0.98	%	0.95 %

⁽¹⁾Net of benefit attributable to FDIC indemnification asset

⁽²⁾Excludes the recorded investment of acquired loans, due to valuation calculated at acquisition

Management believes the allowance for loan losses is adequate to provide for losses inherent in the loan portfolio at September 30, 2016.

Noninterest Income

The categories of noninterest income, and the dollar and percentage change between periods, are as follows.

(\$ in thousands)	Three Months Ended September 30,				Nine Months Ended September 30,			
	2016	2015	\$ Change	% Change	2016	2015	\$ Change	% Change
Service charges on deposit accounts	\$1,530	\$1,230	\$300	24.4 %	\$4,333	\$3,508	\$825	23.5 %
Other fees and charges	2,305	1,327	978	73.7	5,829	3,767	2,062	54.7
Mortgage banking activities	30,091	20,799	9,292	44.7	64,113	66,734	(2,621)	(3.9)
Indirect lending activities	2,388	4,037	(1,649)	(40.8)	11,434	15,047	(3,613)	(24.0)

Bank owned life insurance	968	496	472	95.2	1,916	1,488	428	28.8
Securities gains	296	—	296	100.0	578	—	578	100.0
Other	545	1,236	(691)	(55.9)	1,650	5,020	(3,370)	(67.1)
Total noninterest income	\$39,325	\$30,619	\$8,706	28.4 %	\$94,182	\$99,352	\$(5,170)	(5.2)%

Noninterest income was \$39.3 million and \$94.2 million for the three and nine months ended September 30, 2016, respectively, an increase of \$8.7 million, or 28.4%, and a decrease of \$5.2 million, or 5.2%, respectively, as compared to the same periods in 2015.

Table of Contents

The year over year increase of \$8.7 million for the quarter occurred primarily due to the net increase in noninterest income from mortgage banking activities of \$9.3 million, or 44.7%, and an increase in service charges and fees of \$1.3 million, or 50.0%. These increases were partially offset by a net decrease of \$1.6 million, or 40.8%, in noninterest income from indirect lending activities.

Mortgage production income, a component of mortgage banking activities, was \$29.2 million in the third quarter of 2016, a \$7.7 million, or 35.9%, increase over the same period in 2015. All components of mortgage production income, which includes marketing gains and origination points and fees, experienced increases. Higher marketing gains were driven primarily from increased production and by increased margins. Total mortgage production was \$828.1 million in the third quarter, an increase of \$124.5 million, or 17.6%, compared to the same period in the prior year.

Mortgage servicing revenue, a component of mortgage banking activities, increased by \$837,000, or 20.6%, for the quarter, as compared to the same period in 2015, as the portfolio of mortgage loans serviced for others increased from \$6.4 billion to \$7.5 billion, or 17.1%, year over year. More stable mortgage rates in the third quarter of 2016 resulted in a net recovery of MSR impairment during the quarter as compared to net MSR impairment of \$2.2 million for the same period in 2015.

The decrease of \$5.2 million in noninterest income for the nine months ended September 30, 2016 occurred primarily due to a decrease of \$3.6 million, or 24.0%, in noninterest income from indirect lending activities, primarily the result of lower loan sales volume and slightly lower pricing in 2016 than for the same periods in 2015.

Mortgage banking activities decreased \$2.6 million or 3.9%, for the nine months ended September 30, 2016 compared to the prior comparable period, due to higher than usual non-cash MSR impairment charges in the first two quarters of 2016, which was partially offset by increased mortgage production revenue.

The net increase in service charges and fees for the three and nine months occurred primarily as additional fees have been generated in 2016 due to the volume of deposit accounts, including new accounts from organic growth and accounts added through acquisition, partially offset by year over year fluctuations in other income, mainly due to timing of gains on sale of ORE.

On a linked quarter basis, noninterest income increased by \$9.4 million, or 31.2%, largely due to a net increase in income from mortgage banking activities of \$10.8 million, or 56.0%. The increase was largely driven by a \$9.0 million swing in MSR impairment as a net recovery of MSR impairment was recorded during the quarter. Marketing gains also increased as mortgage production grew to \$828.1 million for the third quarter as compared to mortgage production of \$815.1 million for the second quarter.

Noninterest Expense

The categories of noninterest expense, and the dollar and percentage change between periods, are as follows.

(\$ in thousands)	Three Months Ended September 30,				Nine Months Ended September 30,			
	2016	2015	\$ Change	% Change	2016	2015	\$ Change	% Change
Salaries and employee benefits	\$24,224	\$17,800	\$6,424	36.1 %	\$70,876	\$56,290	\$14,586	25.9 %
Commissions	9,450	7,270	2,180	30.0 %	24,393	21,224	3,169	14.9 %
Occupancy, net	4,597	4,270	327	7.7 %	12,994	11,206	1,788	16.0 %
Communication	1,328	1,083	245	22.6 %	3,673	3,133	540	17.2 %
Other	12,568	9,626	2,942	30.6 %	34,914	27,996	6,918	24.7 %
Total noninterest expense	\$52,167	\$40,049	\$12,118	30.3 %	\$146,850	\$119,849	\$27,001	22.5 %

Noninterest expense was \$52.2 million and \$146.9 million, respectively, for the three and nine months ended September 30, 2016, an increase of \$12.1 million and \$27.0 million, or 30.3% and 22.5%, as compared to the same periods in 2015, mostly due to increased expenses associated with organic growth as well as recent acquisitions.

Non-continuing acquisition costs of approximately \$500,000 and \$2.0 million were included in noninterest expenses for the three and nine months ended September 30, 2016, as the AEB system conversion was completed in July 2016 and The Bank of GA system conversion was completed in March of 2016.

Salaries and benefits increased by \$6.4 million and \$14.6 million, or 36.1% and 25.9%, respectively, for the quarter and nine months ended September 30, 2016, as compared to the same periods in 2015. The approximate growth in the

number of full-time equivalent employees of 200, or 15%, over the past year was the primary driver of the increase in salaries and benefits. Annual cost of living adjustments also contributed to the increase as well as an increase of \$1.3 million and \$3.6 million in employer taxes and employee benefits for the quarter and nine months, respectively, as compared to the same period in the prior year. The majority of the increase in benefits resulted from an increase in medical premiums, representing an increase in both number of employees and the increased cost of employer-paid benefits.

Commissions increased by \$2.2 million and \$3.2 million, or 30.0% and 14.9%, respectively, for the quarter and nine months ended September 30, 2016, due to increases in mortgage loan production.

The increase in occupancy expense of \$327,000 and \$1.8 million, or 7.7% and 16.0%, respectively, for the quarter and nine months ended September 30, 2016, was primarily due to an increase in the number of branches, mainly from recent acquisitions.

Other noninterest expense increased by \$2.9 million and \$6.9 million, or 30.6% and 24.7%, for the quarter and nine months ended September 30, 2016. Of this increase, outside service fees increased by \$1.3 million and \$3.4 million, respectively, primarily due to

Table of Contents

outside services contracted for maintenance and operations and legal fees for mergers and acquisitions. ORE expenses, including writedowns and carrying costs, contributed \$601,000 and \$586,000, respectively, to the increase. On a linked-quarter basis, total noninterest expense increased by \$4.0 million, or 8.4%. Increases in commissions and incentives included in salaries and employee benefits drove approximately \$1.8 million of the increase as compared to the prior quarter. Occupancy expense increased by \$584,000, or 14.6%, as amounts for hardware and software to complete the AEB system conversion were incurred. An increase of \$1.0 million in ORE writedowns and administration expenses and an increase of \$560,000 in amounts paid for services provided by third party vendors (including amounts paid to execute the AEB system conversion) also contributed to the increase in noninterest expense for the quarter.

Income Tax Expense

Income tax expense was \$7.3 million and \$13.8 million, respectively, for the three and nine months ended September 30, 2016, an increase of \$2.1 million, or 41.2%, and a decrease of \$4.8 million, or 25.8%, as compared to the same periods in 2015. The primary driver of these changes was the level of pre-tax income reported for each period. The effective tax rate for the three and nine months ended September 30, 2016 was 36.8%, as compared to 35.9% and 36.5% for the three and nine month periods in the prior year.

The increase in the effective tax rate in 2016 occurred as a result of net lower favorable permanent differences in 2016 due to nondeductible merger expenses incurred in 2016 related to the AEB stock acquisition.

Financial Condition

Total assets grew to \$4.4 billion at September 30, 2016, an increase of \$546.5 million, or 14.2%, compared to December 31, 2015, primarily as a result of organic loan growth as well as assets added from the AEB acquisition. The increase in total assets during the first nine months of 2016 was primarily driven by organic loan growth.

Asset growth in 2016 has also been driven by the March 1, 2016 acquisition of American Enterprise Bankshares, Inc. (“AEB”), the holding company for American Enterprise Bank of Florida, a Jacksonville, Florida-based community bank. AEB merged with and into the Company and American Enterprise Bank of Florida merged with and into Fidelity Bank. With this acquisition, the Company added approximately \$208.8 million in assets, including \$40.7 million in cash and securities, \$147.4 million in loans, and \$181.8 million in deposits, \$7.1 million in premises and equipment, \$13.3 million in other assets consisting primarily of \$1.3 million in core deposit intangible, \$5.9 million in deferred tax assets and \$5.2 million in goodwill. The Company projects cost savings will be recognized in future periods once the conversion and integration activities related to the acquisition are completed.

The Company accounts for its acquisitions as business combinations. As such, the purchase price for the AEB acquisition has been allocated to the fair value of the assets acquired and liabilities assumed as of the acquisition date.

Loans

Total loans held for investment grew to \$3.3 billion at September 30, 2016, an increase of \$435.4 million, or 15.0%, compared to December 31, 2015, primarily as a result of acquisitions and organic growth.

The majority of the increase occurred in the consumer loan portfolio, primarily indirect automobile loans, which grew by \$182.4 million, or 12.6%, as strong loan originations outpaced the volume of loan sales.

Loan Servicing Rights

Gross servicing rights increased by \$8.9 million, or 9.3%, compared to December 31, 2015, as residential mortgage, SBA and indirect auto loan sales continued.

For the three and nine months ended September 30, 2016, mortgage servicing rights fluctuated, resulting in an impairment recovery of \$458,000 and impairment charge of \$12.8 million, a change of \$2.6 million and \$10.7 million, respectively, as compared to the same periods in 2015. MSR impairment charges booked during the first half of 2016 did not extend to the third quarter and as a result, \$458,000 in net MSR impairment recovery was recorded during the quarter. The impairment recovery occurred as estimated future prepayment speeds stabilized during the quarter, and subsequently, the estimated remaining life of the servicing income on the underlying loans serviced for others extended slightly.

Table of Contents

Asset Quality

The following schedule summarizes our asset quality as of or for the three months ended for the dates indicated.

Total classified assets ⁽³⁾	\$ 84,618	\$91,906	\$ 60,656		

⁽¹⁾Classified asset ratio is defined as classified assets as a percentage of Tier 1 capital plus allowance for loan losses.

⁽²⁾Amount of SBA guarantee included

	\$ 8,665	\$4,680	\$ 3,970
--	----------	---------	----------

⁽³⁾Classified assets include loans having a risk rating of substandard or worse, both accrual and nonaccrual, repossessions and ORE, net of loss share.

⁽⁴⁾Allowance calculation excludes the recorded investment of acquired loans, due to valuation calculated at acquisition

The Bank had \$17.1 million in troubled debt restructured loans at September 30, 2016, of which \$11.9 million were accruing loans and \$5.2 million are on nonaccrual and included in nonperforming assets in the table above.

The increase in nonperforming assets of \$3.2 million from December 31, 2015 to September 30, 2016 was mainly due to an increase in nonaccrual loans, mainly due to loans acquired in the AEB acquisition. This increase was partially offset by a \$1.8 million decrease in ORE property, primarily due to a writedown of ORE for the year of \$1.0 million. Management believes it has been proactive in charging down and charging off these nonperforming assets as appropriate. Management's assessment of the overall loan portfolio is that loan quality and performance have improved in recent years. Management is being aggressive in evaluating credit relationships and proactive in addressing problems.

When a loan is classified as nonaccrual, to the extent collection is in question, previously accrued interest is reversed and interest income is reduced by the interest accrued in the current year. If any portion of the accrued interest was accrued in a previous period, accrued interest is reversed. If such nonaccrual loans had been on a full accrual basis, interest income on these loans for the nine months ended September 30, 2016 would have been \$1.1 million.

Mortgage Recourse Liability

During the last five years ended September 30, 2016, the Company has sold over 47,000 loans with a principal balance of approximately \$11.4 billion. As seller, the Company has made various representations and warranties related to, among other things, the ownership of the loans, the validity of the liens, the loan selection and origination process, and the compliance with origination criteria established by the purchasers. In the event of a breach of these representations and warranties, the Company is obligated to repurchase loans with identified defects and/or to indemnify the purchasers. Some of these conditions include underwriting errors or omissions, fraud or material misstatements, and invalid collateral values. The contractual obligation arises only when the breach of representations and warranties is discovered and repurchase/indemnification is demanded. Generally, the maximum amount the Company would be required to pay would be equal to the unpaid principal balance of such loans that are deemed to have defects that

Table of Contents

were sold to purchasers, plus accrued interest, return of the premium received at the time of the loan sale, and reimbursement of certain expenses. To date, the claims to the Company from the purchasers to be paid upon repurchase or paid because of indemnification have been insignificant. In addition, the Company's loan sale contracts define a condition in which the borrower defaults during a short period of time as an early payment default ("EPD"). In the event of an EPD, the Company may be required to return the premium paid for the loan, pay certain administrative fees, and may be required to repurchase the loan or indemnify the purchaser unless an EPD waiver is obtained.

Management recognizes the potential risk from costs related to breaches of representations and warranties made in connection with residential loan sales and subsequent required repurchases, indemnifications, and EPD claims. As a result, the Company has established a liability to cover potential costs related to these events based on historical experience, adjusted for any risk factors not captured in the historical losses, current business volume, and known claims outstanding. The recourse liability totaled \$1.4 million at September 30, 2016 and December 31, 2015.

Management believes this amount is adequate for potential exposure related to loan sale indemnification, repurchase loans, and EPD claims. Management will continue to monitor the adequacy of the reserve level and may decide that further additions to the reserve are appropriate. However, there can be no assurance that the current balance of this reserve will prove sufficient to cover actual future losses.

It should be noted that the Company's loan sale activity began to increase at a time when underwriting requirements were strengthened from prior years and limited documentation conventional loans (i.e., non-government insured) were no longer eligible for purchase in the secondary market. Accordingly, the population of conventional loans the Company has sold has been underwritten based on fully documented information. While this does not eliminate all risk of repurchase or indemnification costs, management believes it significantly mitigates that risk. Further, the Company has also received sale representation and warranty relief on a subset of sold loans which reduces potential future liability.

Deposits

Total deposits at September 30, 2016, of \$3.5 billion increased \$359.4 million, or 11.3%, compared to December 31, 2015, due to growth in non-interest bearing demand deposits of \$189.4 million or 24.1%, interest-bearing demand and money market accounts of \$135.4 million, or 13.0%, and time deposits of \$89.0 million, or 19.1%. The increase in deposits is mainly due to organic growth and \$181.8 million in deposits added from the AEB acquisition.

The majority of the \$189.4 million increase in noninterest bearing demand deposits occurred due to increased volume in commercial business accounts, with the acquisition of AEB in March 2016 accounting for \$64.4 million of the increase. During 2016, the Bank continued its deposit marketing program, increasing the number of demand deposit accounts.

Money market and interest-bearing demand deposits grew by \$135.4 million, or 13.0%, compared to December 31, 2015. Of the growth in this category, \$68.7 million was due to the AEB acquisition and \$62.7 million was due to organic growth.

The following table summarizes average deposit composition and average rate paid for the periods presented.

(\$ in millions)	For the Three Months Ended								
	September 30, 2016			June 30, 2016			September 30, 2015		
	Average Amount	Rate	Percent of Total Deposits	Average Amount	Rate	Percent of Total Deposits	Average Amount	Rate	Percent of Total Deposits

Average core deposits, including noninterest-bearing demand deposits, grew by \$327.9 million and \$72.5 million, or 48.4% and 7.8%,

Table of Contents

compared to the same quarter in 2015 and the previous quarter in 2016, respectively, mainly due to growth in the number and volume of commercial accounts as well as through the acquisition of branch deposits.

Borrowings

Short-term borrowings increased by \$142.9 million, or 68.1%, compared to December 31, 2015, primarily as a result of fluctuations in short-term liquidity needs which the Bank manages through short-term FHLB advances and Fed funds purchased.

Liquidity and Capital Resources

Market and public confidence in our financial strength and that of financial institutions in general largely determines the access to appropriate levels of liquidity. This confidence is significantly dependent on our ability to maintain sound credit quality and the ability to maintain appropriate levels of capital resources.

We define liquidity as the ability to generate sufficient cash flows to support our operations and to meet our obligations at a reasonable cost and on a timely basis including repayment of borrowings, anticipated customer demands for funds under credit commitments and deposit withdrawals by customers. Liquidity risk is the risk to earnings or capital if we are unable to fulfill our obligations as they become due. Liquidity risk can also develop if we fail to timely recognize or address changes in market conditions that affect our ability to obtain adequate funding to continue to operate on a profitable basis.

Management measures our liquidity position by giving consideration to both on-balance sheet and off-balance sheet sources of and demands for funds on a daily and weekly basis. In addition, due to FSC being a separate entity and apart from the Bank, it must provide for its own liquidity. FSC is responsible for the payment of dividends declared for its common and preferred shareholders, and interest and principal on any outstanding debt or trust preferred securities.

Sources of the Bank's liquidity include cash and cash equivalents, net of federal requirements to maintain reserves against deposit liabilities; investment securities eligible for sale or pledging to secure borrowings from dealers and customers pursuant to securities sold under agreements to repurchase; loan repayments; loan sales; deposits and certain interest-sensitive deposits; brokered deposits; a collateralized line of credit at the Federal Reserve Bank of Atlanta ("FRB") Discount Window; a collateralized line of credit from the Federal Home Loan Bank of Atlanta ("FHLB"); and, to a lesser extent, borrowings under unsecured overnight Federal funds lines available from correspondent banks. The principal demands for liquidity are new loans, anticipated fundings under credit commitments to customers and deposit withdrawals. Substantially all of FSC's liquidity is obtained from capital raises and dividends from its wholly-owned subsidiaries, LionMark Insurance Company and the Bank, which are limited by applicable law.

Management seeks to maintain a stable net liquidity position while optimizing operating results, as reflected in net interest income, the net yield on interest-earning assets and the cost of interest-bearing liabilities in particular. Our Asset Liability Management Committee ("ALCO"), which includes the CEO and senior management representatives, manages our liquidity risk. ALCO meets monthly to review the current and projected net liquidity positions and to review actions taken by management to achieve this liquidity objective. The Board of Directors also reviews performance against internal liquidity benchmarks on at least a quarterly basis. Managing the levels of total liquidity, short-term liquidity, and short-term liquidity sources continues to be an important and complex exercise because of the coordination of the projected mortgage, SBA and indirect automobile loan production and sales, loans held-for-sale balances, and individual loans and pools of loans sold anticipated to fluctuate during the year.

Our loans held for sale are considered highly liquid. The majority of commitments to purchase mortgage loans held-for-sale will be funded within one month of the loan closing. The majority of these loans are conforming residential mortgage loans sold to GNMA, FNMA and FHLMC. Other categories of loans held for sale include indirect automobile loans purchased from motor vehicle dealers and the government-guaranteed portion of SBA loans.

Shareholders' Equity

Shareholders' equity was \$347.8 million at September 30, 2016, and \$301.5 million at December 31, 2015. The increase of \$46.3 million in shareholders' equity during the nine months ended September 30, 2016 was partially attributable to the common stock issued in the AEB acquisition and the warrant exercise. Total consideration of \$22.8 million was issued in the AEB transaction and \$2.7 million was added through the warrant exercise. In addition, net

income earned during the nine months of 2016 of \$23.7 million increased shareholders' equity, which was partially offset by cash dividends declared on common shares during 2016 of \$9.1 million. The remainder of the increase is attributable to stock issued through employee programs.

In December 2008, the U.S. Treasury purchased 48,200 shares of the Company's Fixed Rate Cumulative Perpetual Preferred Stock, Series A (the "Preferred Stock"), and a warrant for an aggregate purchase price of \$48.2 million in cash. On June 27, 2012, the U.S. Treasury sold all of its shares of the Company's Preferred Stock in a public offering as part of a modified Dutch auction process. The Company did not receive any proceeds from this auction.

On May 28, 2015, the U.S. Treasury sold its warrant in a private transaction with two unaffiliated third-party investors.

At December 31, 2015, one investor had a warrant to purchase 1,000,000 shares of our common stock, which has been fully exercised during 2016.

On April 3, 2014, we filed a shelf registration with the SEC for up to \$100 million of common stock, preferred stock, warrants, or debt securities, to be issued from time to time for general corporate purposes which may include funding bank and non-bank

Table of Contents

subsidiaries, financing business expansion, or refinancing or extending the maturity of debt obligations and investments at the holding company level. As of September 30, 2016, the Company had not utilized the shelf registration.

Capital Ratios

FSC is regulated by the Board of Governors of the Federal Reserve Board and is subject to the securities registration and public reporting regulations of the SEC. The Bank is regulated by the Federal Deposit Insurance Corporation (“FDIC”) and the Georgia Department of Banking and Finance.

The Bank must comply with regulatory capital requirements established by its regulators. Failure to meet minimum capital requirements can initiate certain mandatory, and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on our financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, we must meet specific capital guidelines that involve quantitative measures of our assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. Our capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. These capital standards require us to maintain minimum ratios of “Tier 1” capital to total risk-weighted assets and total capital to risk-weighted assets of 6.00% and 8.00%, respectively. Tier 1 capital is comprised of total shareholders’ equity calculated in accordance with generally accepted accounting principles, excluding accumulated other comprehensive income, less intangible assets and disallowed portions of our loan servicing rights, and total capital is comprised of Tier 1 capital plus certain adjustments, the largest of which is our qualifying subordinated debt, as well as the allowable portion of the allowance for loan losses. Risk-weighted assets refer to our on- and off-balance sheet exposures, adjusted for their related risk levels using formulas set forth in FDIC regulations.

In addition to the risk-based capital requirements described above, we are subject to a leverage capital requirement, which calls for a minimum ratio of Tier 1 capital to quarterly average total assets of 4.00%. The Bank is also subject to a Common Equity Tier 1 capital to total risk-weighted assets ratio of 4.50%. Common Equity Tier 1 Capital is comprised of Tier 1 capital less amounts attributable to qualifying non-cumulative perpetual preferred stock and minority interests in consolidated subsidiaries.

Basel III

In 2004, the Basel Committee on Banking Supervision (“BCBS”) published a new capital accord (“Basel II”) to replace Basel I. Basel II provided two approaches for setting capital standards for credit risk—an internal ratings-based approach tailored to individual institutions’ circumstances and a standardized approach that bases risk weightings on external credit assessments to a much greater extent than permitted in previous risk-based capital guidelines. Basel II also set capital requirements for operational risk and refined the existing capital requirements for market risk exposures. In December 2010, the BCBS released its final framework for strengthening international capital and liquidity regulation, now officially identified by the BCBS as “Basel III.” Basel III, when fully phased-in, requires bank holding companies and their bank subsidiaries to maintain substantially more capital, with a greater emphasis on common equity.

The Basel III final capital framework, among other things, (i) introduces as a new capital measure “Common Equity Tier 1 capital” (“CET1”), (ii) specifies that Tier 1 capital consists of CET1 and “Additional Tier 1 capital” instruments meeting specified requirements, (iii) defines CET1 narrowly by requiring that most adjustments to regulatory capital measures be made to CET1 and not to the other components of capital and (iv) expands the scope of the adjustments as compared to existing regulations, such as deducting a much larger portion of the value of mortgage servicing rights from Tier 1 capital.

On July 2, 2013, the Federal Reserve Bank of Atlanta (“FRB”) approved the final rules implementing the BCBS's Basel III capital guidelines (“final rules”) for U.S. banking organizations. Under the final rules, minimum requirements will increase for both the quantity and quality of capital we maintain. The rules include a new CET1 capital to risk-weighted assets ratio of 4.50% and a CET1 capital conservation buffer of 2.5% of risk-weighted assets. An institution that does not meet the conservation buffer will be subject to restrictions on certain activities including payment of dividends, stock repurchases and discretionary bonuses to executive officers. The final rules also raise the minimum ratio of Tier 1 capital to risk-weighted assets from 4.00% to 6.00% and require a minimum leverage ratio of

4.0%. The final rules also implement strict eligibility criteria for regulatory capital instruments.

On July 9, 2013, the FDIC approved, as an interim final rule, the Basel III regulatory capital requirements for U.S. banks, following the actions of the FRB. The FDIC's rule is identical in substance to the final rules issued by the FRB. The Basel III final rules became effective for us on January 1, 2015, in which we began calculating our capital ratios in accordance with the final risk-based capital rules implementing the BSBC capital guidelines for U.S. banks. Capital ratios for FSC and the Bank are being calculated using the current phase-in applicable for 2016. Full compliance with all requirements of the new capital guidelines will be phased in over a multi-year schedule ending in 2019.

Prompt Corrective Action

In July 2013, the final rules implementing the BCBS's Basel III capital guidelines increased regulatory capital requirements of U.S. banking organizations in a manner that more closely reflected risk exposures, and brought the regulatory capital framework into compliance with Basel III. The final rules revise the level at which the Bank becomes subject to corrective action. The federal banking agencies have broad powers with which to require companies to take prompt corrective action to resolve problems of insured depository institutions that do not meet minimum capital requirements. The law establishes five capital categories for this purpose: (i) well-

Table of Contents

capitalized, (ii) adequately capitalized, (iii) undercapitalized, (iv) significantly undercapitalized, and (v) critically undercapitalized. The final rules amended the thresholds in the prompt corrective action framework to reflect the higher capital ratios required. Under the final rules, to be considered well-capitalized, an institution generally must have risk-based Total capital and Tier 1 capital ratios of at least 10% and 6%, respectively, and must not be subject to any order or written directive to meet and maintain a specific capital level for any capital measure. To be considered “adequately capitalized,” we are subject to minimum CET1, Tier 1 capital, and Total capital ratios of 4.50%, 6.00%, and 8.00%, respectively. While the prompt corrective action rules apply to banks and not bank holding companies, the FRB is authorized to take actions at the holding company level. Failure to meet applicable capital standards could subject the bank holding company or financial institution to a variety of enforcement remedies available to the federal regulatory authorities. These include limitations on the ability to pay dividends, the issuance by the regulatory authorities of a capital directive to increase capital, and the termination of deposit insurance by the FDIC. FSC is not subject to the provisions of prompt corrective action.

At September 30, 2016, the Bank’s capital ratios exceeded the regulatory minimum ratios discussed above. The following table presents the Bank’s capital ratios and the minimum regulatory requirements:

	Minimum Regulatory Requirement		
	Fidelity Bank	Adequately Capitalized	Well Capitalized
Common equity Tier 1 risk-based capital ratio	8.44%	4.50%	6.50%
Tier 1 risk-based capital ratio	8.83%	6.00%	8.00%
Total risk-based capital ratio	11.78%	8.00%	10.00%
Leverage capital ratio	8.04%	4.00%	5.00%

Dividends

On October 21, 2016, we declared a cash dividend of \$0.12 per share, payable on November 15, 2016, to common shareholders of record as of November 2, 2016. In April and July of 2016, we declared cash dividends of \$0.12 per share, for a total of \$0.36 per share for the nine months ended September 30, 2016.

Future dividends require a quarterly review of current and projected earnings for the remainder of 2016 in relation to capital requirements prior to the determination of the dividend, and be subject to regulatory restrictions under applicable law. The Board of Directors for both the Bank and the Company will review on a quarterly basis whether to declare and pay dividends for the remainder of 2016, with the declared and paid dividend consistent with current regulatory limitations, earnings, capital requirements, and forecasts of future earnings.

Market Risk

Market risk is defined as the sensitivity of income, fair value measurements and capital to changes in market rates or prices. Our primary market risk exposure is credit risk and, to a lesser extent, interest rate risk and liquidity risk. We have little or no risk related to trading accounts, commodities, or foreign exchange. Our real estate loan portfolio is subject to risks associated with the local economies of our various markets and, in particular, the regional economy of the South.

Interest rate risk, which encompasses price risk, is the exposure of a banking organization’s financial condition and earnings ability to withstand adverse movements in interest rates. Price and interest rate risks arise from the financial instruments and positions we hold including loans, mortgage servicing rights, investment securities, deposits, borrowings, and derivative financial instruments. Accepting this risk can be an important source of profitability and shareholder value; however, excessive levels of interest rate risk can pose a significant threat to assets, earnings, and capital. Accordingly, effective risk management that maintains interest rate risk at prudent levels is essential to our success.

ALCO, which includes senior management representatives, monitors and considers methods of managing the rate and sensitivity repricing characteristics of the balance sheet components consistent with maintaining acceptable levels of changes in portfolio values and net interest income with changes in interest rates. The primary purposes of ALCO are to manage interest rate risk consistent with earnings and liquidity, to effectively invest our capital, and to preserve the value created by our core business operations. Our exposure to interest rate risk compared to established tolerances is

reviewed on at least a quarterly basis by our Board of Directors.

Evaluating our exposure to changes in interest rates includes assessing both the adequacy of the management process used to control interest rate risk and the organization's quantitative levels of exposure. When assessing the interest rate risk management process, we seek to ensure that appropriate policies, procedures, management information systems, and internal controls are in place to maintain interest rate risk at prudent levels with consistency and continuity.

Evaluating the quantitative level of interest rate risk exposure requires us to assess the existing and potential future effects of changes in interest rates on our consolidated financial condition, including capital adequacy, earnings, liquidity, and, where appropriate, asset quality.

Interest Rate Sensitivity

A form of interest rate sensitivity analysis referred to as equity at risk is used to measure our interest rate risk by computing

Table of Contents

estimated changes in earnings and the net present value of our cash flows from assets, liabilities, and off-balance sheet items in the event of a range of assumed changes in market interest rates. Net present value represents the market value of portfolio equity and is equal to the market value of assets minus the market value of liabilities, with adjustments made for off-balance sheet items. This analysis assesses the risk of loss in the market risk sensitive instruments in the event of a sudden and sustained 100, 200, 300, and 400 basis point increase or decrease in market interest rates. In addition, management reviews the impact of various yield curve scenarios on earnings and cash flows.

The most recent rate shock analysis indicated that the effects of an immediate and sustained change in rates would fall within policy parameters and approved tolerances for equity at risk and net interest income. If large downward shocks did occur from today's already low rates, increased modeled impairment may breach net income internal benchmarks. Rate shock analysis provides only a limited, point in time view of interest rate sensitivity. The actual impact of interest rate changes upon earnings and net present value may differ from that implied by any static rate shock. In addition, net interest income and net present value under various future interest rate scenarios are affected by multiple other factors not embodied in a static rate shock, including competition, changes in the shape of the Treasury yield curve, divergent movement among various interest rate indices, and the speed with which interest rates change. Varying interest rate environments can create unexpected changes in prepayment levels of assets and liabilities that are not reflected in the interest rate sensitivity analysis.

Off-Balance Sheet Arrangements

We are a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of our customers, and to reduce our own exposure to fluctuations in interest rates. These financial instruments, which include commitments to extend credit and letters of credit, involve to varying degrees elements of credit and interest rate risk in excess of the amount recognized in the consolidated financial statements. The contract or notional amounts of these instruments reflect the extent of involvement we have in particular classes of financial instruments.

Our exposure to credit loss, in the event of nonperformance by customers for commitments to extend credit and letters of credit, is represented by the contractual or notional amount of those instruments. We use the same credit policies in making commitments and conditional obligations as we do for recorded loans. Loan commitments and other off-balance sheet exposures are evaluated by the Credit Review department quarterly and reserves are provided for risk as deemed appropriate.

Commitments to extend credit are agreements to lend to customers as long as there is no violation of any condition established in the agreement. Substantially all of our commitments to extend credit are contingent upon customers maintaining specific credit standards at the time of loan funding. We minimize our exposure to loss under these commitments by subjecting them to credit approval and monitoring procedures. Thus, we will deny funding a commitment if the borrower's financial condition deteriorates during the commitment period, such that the customer no longer meets the pre-established conditions of lending. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. We evaluate each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary upon extension of credit, is based on management's credit evaluation of the borrower. Collateral held varies, but may include accounts receivable, inventory, property, plant and equipment, and income-producing commercial properties.

Standby and import letters of credit are commitments issued by us to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loans or lines of credit to customers. We hold collateral supporting those commitments as deemed necessary.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

See "Market Risk" and "Interest Rate Sensitivity" contained in Item 2 of Part I of this report for quantitative and qualitative discussion about our market risk.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Pursuant to Rule 13a-15(b) under the Securities Exchange Act of 1934, the Company's management supervised and participated in an evaluation, with the participation of the Company's Chief Executive Officer and Chief Financial

Officer, of the effectiveness of the Company's disclosure controls and procedures (as defined under Rule 13a-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based on, and as of the date of, that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There has been no change in the Company's internal control over financial reporting during the three months ended September 30, 2016, that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

We are a party to various legal proceedings such as claims and lawsuits arising in the course of our normal business activities. Although the ultimate outcome of all claims and lawsuits outstanding as of September 30, 2016 cannot be ascertained at this time, it is the opinion of management that these matters, when resolved, will not have a material adverse effect on our business, results of operations or financial condition.

Item 1A. Risk Factors

While the Company attempts to identify, manage, and mitigate risks and uncertainties associated with its business to the extent practical under the circumstances, some level of risk and uncertainty will always be present. Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2015 describes some of the risks and uncertainties associated with our business. These risks and uncertainties have the potential to materially affect our cash flows, results of operations, and financial condition. We do not believe that there have been any material changes to the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2015.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Period	(a)	(b)	(c)	(d)
	Total Number of Shares (or Units) Purchased	Average Price Paid per Share (or unit)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) That May Yet Be Purchased Under the Plans or Programs
July 2016	20,084	*\$ 16.56	—	\$ 10,000,000
August 2016	—	—	—	10,000,000
September 2016	—	—	—	10,000,000
Total	20,084	\$ 16.56	—	\$ 10,000,000

*These shares were repurchased under arrangements, authorized by the 2006 Equity Incentive Plan, whereby officers or directors may sell previously owned shares to the Company in order to pay for income taxes owed on vesting shares of restricted stock. These shares are not purchased under the plan to repurchase 10,000,000 shares announced in April 2014.

The repurchase plan announced April 3, 2014, authorizing the repurchase of up to \$10 million of our outstanding common stock, has no expiration date for the authorized share repurchases under such plan.
