Nicholas-Applegate Convertible & Income Fund Performance & Statistics

February 28, 2007 (unaudited)

- Nicholas-Applegate Convertible & Income Fund had a net asset value (NAV) and market price return of 13.46% and 14.60%, respectively, for the fiscal year ended February 28, 2007. Careful security selection was a key driver of the Fund performance. In the convertible portion of the portfolio, top performers were companies in the consumer discretionary and cyclical categories. In the high-yield portion of the portfolio, performance was attributable to a broad range of sectors with a brisk pace of upgrades fueling relative returns over the reporting period.
- Corporate credit markets generally delivered solid returns for the one-year period ended February 28, 2007. The convertible market finished the period on a positive note, as the Merrill Lynch All-Convertible Corporate Index increased 11.01%. During the same period, this measure of the convertible market slightly lagged the S&P 500, which returned 11.97%. The Merrill Lynch Master II Index, a gauge for the high yield market, returned 3.65%.
- Among high yield bonds, solid market performance was a result of ongoing confidence in the core fundamentals across the issuers in the market. Balance sheets have been healthy. Refinancing over the past three years has generally created lower interest-expense obligations and extended maturities. The default rate remains low and is not expected to change in the near future.
- The new issues calendar for high yield bonds has been significant; in November 2006 the tally for new issues was not only a record \$29 billion, but \$10 billion ahead of the record set in 1998.
- In the high yield portion of the portfolio, we experienced a brisk pace of upgrades in the high yield portion of the portfolio with nine positive rating actions in the fourth quarter of 2006 alone.
- In the convertible market, advancing U.S. equity and debt markets contributed to positive returns. Equities rallied through the period on healthy economic activity, solid corporate profits and the Fed's decision to stop raising interest rates. All sectors posted positive returns in 2006 as companies continued to use strengthened balance sheets to improve shareholder value.
- Investors exhibited a preference for mid- and larger-capitalized convertibles, and convertible securities oriented to total return continued to outperform yield-oriented or busted convertibles.
- Despite a pickup in new issuance of convertible securities toward the end of the period, there was negative net new growth in the convertible market as solid equity market returns and low interest rates continue to drive calls, redemptions and tenders.
- We believe that convertibles remain a compelling investment. The economy is healthy, corporate balance sheets are solid, and defaults are low. The stock market reflects investor confidence in a positive economic outlook. We expect companies to use the high cash levels on their balance sheets and future free cash flow to boost shareholder value. Share buybacks, increased dividends and merger and acquisition activity are possible uses of excess cash issuers may deploy excess cash to fund share buybacks, an increase in dividends as well as merger and acquisition activity. Other catalysts for the equity markets could include such possible events as Fed rate cuts, a cooling of inflation, an expansion of market multiple expansion and healthy corporate profits.

(1) **Past performance is no guarantee of future results.** Total return is calculated by subtracting the value of an investment in the Fund at the beginning of each specified period from the value at the end of the period and dividing the remainder by the value of the investment at the beginning of the period and expressing the result as a percentage. The calculation assumes that all income dividends and capital gain distributions have been reinvested at prices obtained under the Fund's dividend reinvestment plan. Total return does not reflect broker commissions or sales charges. Total return for a period of less than one year is not annualized. Total return for a period of more than one year represents the average annual return.

An investment in the Fund involves risk, including the loss of principal. Total return, price, yield and net asset value will fluctuate with changes in market conditions. This data is provided for information only and is not intended for trading purposes. Closed-end funds, unlike open-end funds, are not continuously offered. There is a one-time public offering and once issued, shares of closed-end funds are sold in the open market through a stock exchange. Net asset value is equal to the total assets applicable to common shareholders less total liabilities divided by the number of common shares outstanding. Holdings are subject to change daily.

(2) Market Price Yield is determined by dividing the annualized current per share dividend to common shareholders by the market price per common share at February 28, 2007.

Nicholas-Applegate Convertible & Income Funds Notes to Financial Statements

February 28, 2007

1. Organization and Significant Accounting Policies

Nicholas-Applegate Convertible & Income Fund (the "Convertible & Income") and Nicholas-Applegate Convertible & Income Fund II (the "Convertible & Income II"), collectively referred to as the "Funds", were organized as Massachusetts business trusts on January 17, 2003 and April 22, 2003, respectively. In December 2005, Convertible & Income II changed its fiscal year end from June 30 to February 28. Prior to commencing operations on March 31, 2003 and July 31, 2003, respectively, the Funds had no operations other than matters relating to their organization and registration as diversified, closed-end management investment companies under the Investment Company Act of 1940 and the rules and regulations thereunder, as amended. Allianz Global Investors Fund Management LLC (the "Investment Manager") serves as the Funds' Investment Manager and is an indirect wholly-owned subsidiary of Allianz Global Investors of America L.P. (the "Allianz Global"). Allianz Global is an indirect, majority-owned subsidiary of Allianz SE, a publicly traded insurance and financial services company. The Funds have an unlimited amount of \$0.00001 par value common stock authorized.

Each Fund's investment objective is to provide total return through a combination of capital appreciation and high current income. The Funds attempt to achieve this objective by investing in a portfolio of convertible securities and non-convertible income-producing securities.

The preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from these estimates.

In the normal course of business, the Funds enter into contracts that contain a variety of representations which provide general indemnifications. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet been asserted. However, the Funds expect the risk of any loss to be remote.

In July 2006, the Financial Accounting Standards Board issued Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" (an Interpretation of FASB Statement No. 109) (the "Interpretation"). The Interpretation establishes for all entities, including pass-through entities such as the Funds, a minimum threshold for financial statement recognition of the benefit of positions taken in filing tax returns (including whether an entity is taxable in a particular jurisdiction) and requires certain expanded tax disclosures. The Interpretation is effective for fiscal years beginning after December 15, 2006 and is to be applied to all open tax years as of the date of effectiveness. The Funds' management has recently begun to evaluate the application of the Interpretation and is not in a position at this time to estimate the significance of its impact, if any, on the Funds' financial statements. On December 22, 2006, the Securities & Exchange Commission announced that it would not object if a fund implements the Interpretation in its NAV calculation as late as its last NAV calculation in the first required financial statement reporting period for its fiscal year beginning after December 15, 2006. Consequently, the Funds will be required to comply with the Interpretation by August 31, 2007.

In September 2006, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards (the "SFAS") 157, Fair Value Measurements, which clarifies the definition of fair value and requires companies to expand their disclosure about the use of fair value to measure assets and liabilities in interim and annual periods subsequent to initial recognition. Adoption of SFAS 157 requires the use of the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. At this time, the Funds are in the process of reviewing the SFAS 157 against their current valuation policies to determine future applicability.

The following is a summary of significant accounting policies followed by the Funds:

(a) Valuation of Investments

Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Portfolio securities and other financial instruments for which market quotations are not readily available or if a development/event occurs that may significantly impact the value of a security, are fair-valued, in good faith, pursuant to guidelines established by the Board of Trustees. The Funds' investments are valued daily using prices supplied by an independent pricing service or dealer quotations, or by using the last sale price on the exchange that is the primary market for such securities, or the mean between the last quoted bid and ask price for those securities for which the over-the-counter market is the primary market or for listed securities in which there were no sales. Independent pricing services use information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Short-term securities maturing in 60 days or less are valued at

1. Organization and Significant Accounting Policies (continued)

(a) Valuation of Investments (continued) amortized cost, if their original term to maturity was 60 days less, or by amortizing their value on the 61st day prior to maturity, if the original term to maturity exceeded 60 days. The prices used by the Funds to value securities may differ from the value that would be realized if the securities were sold and the differences could be material to the financial statements. Each Fund's net asset value is normally determined as of the close of regular trading (normally, 4:00 p.m. Eastern time) on the New York Stock Exchange ("NYSE") on each day the NYSE is open for business.

(b) Investment Transactions and Investment Income

Investment transactions are accounted for on the trade date. Realized gains and losses on investments are determined on the identified cost basis. Interest income is recorded on an accrual basis. Discounts or premiums on corporate bonds and notes purchased are accreted and amortized, respectively to interest income over the lives of the respective securities using the effective interest method. Dividend income is recorded on the ex-dividend date, except for certain Convertible Preferred Stock which record these dividends when the information becomes available.

(c) Federal Income Taxes

The Funds intend to distribute all of its taxable income and to comply with the other requirements of the U.S. Internal Revenue Code of 1986, as amended, applicable to regulated investment companies. Accordingly, no provision for U.S. federal income taxes is required.

(d) Dividends and Distributions [Common Stock

The Funds declare dividends from net investment income monthly to common shareholders. Distributions of net realized capital gains, if any, are paid at least annually. The Funds record dividends and distributions to its shareholders on the ex-dividend date. The amount of dividends and distributions from net investment income and net realized capital gains are determined in accordance with federal income tax regulations, which may differ from generally accepted accounting principles. These "book-tax" differences are considered either temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal income tax treatment; temporary differences do not require reclassification. To the extent dividends and/or distributions exceed current and accumulated earnings and profits for federal income tax purposes, they are reported as dividends and/or distributions of paid-in capital in excess of par.

(e) Credit-Linked Trust Certificates

Credit-linked trust certificates are investments in a limited purpose trust or other vehicle formed under state law which, in turn, invests in a basket of derivative instruments, such as credit default swaps, interest rate swaps and other securities, in order to provide exposure to the high yield or another fixed income market.

Similar to an investment in a bond, investments in these credit-linked trust certificates represent the right to receive periodic income payments (in the form of distributions) and payment of principal at the end of the term of the certificate. However, these payments are conditioned on the trusts' receipt of payments from, and the trusts' potential obligations to, the counterparties to the derivative instruments and other securities in which the trusts invest.

(f) Interest Rate Caps

In an interest rate cap, one party pays a fee while the other party pays the excess, if any, of a floating rate over a specified fixed rate. Interest rate caps are intended to manage the Funds' exposure to changes in short-term interest rates and hedge the Auction Preferred Shares. Owning interest rate caps reduces the Funds' duration, making it less sensitive to changes in interest rates from a market value perspective. The effect on distributions involves protection from rising short-term rates, which the Funds experience primarily in the form of leverage. The Funds are exposed to credit loss in the event of non-performance by the other party to the interest rate cap. Premiums paid by the Funds are recognized as an asset and amortized into realized loss over the life of the interest rate cap. Changes in the value of the interest rate caps are recognized as unrealized appreciation or depreciation. Periodic payments received during periods the floating rate exceeds the specific fixed rate are recognized into realized gain.

(g) Concentration of Risk

Edgar Filing: NICHOLAS APPLGATE CONVERTIBLE & INCOME FUND - Form N-CSR

It is the Funds' policy to invest a significant portion of their assets in convertible securities. Although convertible securities do derive part of their value from that of the securities into which they are convertible, they are not considered derivative financial instruments. However, certain of the Funds' investments include features which render them more sensitive to price changes in their underlying securities. Consequently, this exposes the Funds to greater downside risk than traditional convertible securities, but still less than that of the underlying common stock.

2. Investment Manager/Sub-Adviser

The Funds have entered into Investment Management Agreements (the "Agreements") with the Investment Manager. Subject to the supervision of the Funds' Board of Trustees, the Investment Manager is responsible for managing, either directly or through others selected by it, the Funds' investment activities, business affairs and administrative matters. Pursuant to the Agreements, the Funds pay the Investment Manager an annual fee, payable monthly, at the annual rate of 0.70% of the Funds' average daily total managed assets. Total managed assets refer to the total assets of each Fund (including assets attributable to any Preferred Shares and borrowings that may be outstanding) minus accrued liabilities (other than liabilities representing borrowings).

The Investment Manager has retained its affiliate, Nicholas-Applegate Capital Management LLC (the "Sub-Adviser"), to manage the Funds' investments. Subject to the supervision of the Investment Manager, the Sub-Adviser is responsible for making all of the Funds' investment decisions. For its services pursuant to Sub-Advisory Agreements, the Investment Manager, and not the Funds, pays the Sub-Adviser a monthly fee.

4. Income Tax Information

The tax character of dividends and distributions paid were:

Convertible & Income:

| | Year ended February 28, 2007 | Year ended February 28, 2006 |
|-------------------------|---------------------------------|---------------------------------|
| Ordinary Income | \$129,212,623 | \$147,920,317 |
| Long-Term Capital Gains | \$15,393,964 | \$17,055,250 |

At February 28, 2007, the tax character of distributable earnings of \$891,877 was comprised of ordinary income.

In accordance with U.S. Treasury regulations, the Portfolio elected to defer realized capital losses of \$65,575, arising after October 31, 2006. Such losses are treated as arising on March 1, 2007.

For the year ended February 28, 2007, permanent differences are primarily attributable to the differing treatment of premium amortization, convertible preferred securities, consent payments, an interest rate cap premium amortization and periodic payments. These adjustments were to decrease dividends in excess of net investment income and to increase accumulated realized loss by \$13,685,102.

The cost basis of portfolio securities for federal income tax purposes is \$1,562,134,836. Aggregated gross unrealized appreciation for securities in which there is an excess value over tax cost is \$64,486,912; aggregate gross unrealized depreciation for securities in which there is an excess of tax cost over value is \$27,076,324; net unrealized appreciation for federal income tax purposes is \$37,410,588. The difference between book and the tax basis unrealized appreciation is attributable to wash sales, amortization of premium and the differing treatment of convertible preferred securities.

At February 28, 2007, Convertible & Income had a capital loss carryforward of \$1,830,527, which will expire in 2015, available as a reduction, to the extent provided in the regulations, of any future net realized capital gains. To the extent that these losses are used to offset future realized capital gains, such gains will not be distributed.

The tax character of dividends and distributions paid were:

Convertible & Income II:

| | Year ended February 28, 2007 | Eight Months ended February 28, 2006 |

At February 28, 2007, the tax character of distributable earnings of \$11,729,674 comprised of ordinary income.

For the year ended February 28, 2007, permanent differences are primarily attributable to the differing treatment of premium amortization, convertible preferred securities, consent payments, an interest rate cap premium amortization and periodic payments. These adjustments were to increase undistributed net investment income and to increase accumulated net realized loss of \$12,109,438.

The cost basis of portfolio securities for federal income tax purposes is \$1,380,893,851. Aggregated gross unrealized appreciation for securities in which there is an excess value over tax cost is \$52,389,565; aggregate gross unrealized depreciation for securities in which there is an excess of tax cost over value is \$24,586,326; net unrealized appreciation for federal income tax purposes is \$27,803,239. The difference between book and the tax basis unrealized appreciation is attributable to wash sales, amortization of premium and the differing treatment of convertible preferred securities.

At February 28, 2007, Convertible & Income II had a capital loss carryforward of \$1,751,653 which will expire in 2015, available as a reduction, to the extent provided in the regulations, of any future net realized capital gains. 7. Legal Proceedings

In June and September 2004, the Investment Manager, certain of its affiliates (including Allianz Global Investors Distributors LLC, PEA Capital LLC and Allianz Global), agreed to settle, without admitting or denying the allegations, claims brought by the Securities and Exchange Commission (the "Commission"), the New Jersey Attorney General and the California Attorney General alleging violations of federal and state securities laws with respect to certain open-end funds for which the Investment Manager serves as investment adviser. Two settlements (with the Commission and New Jersey) related to an alleged "market timing" arrangement in certain open-end funds sub-advised by PEA Capital LLC. Two settlements (with the Commission and California) related to the alleged use of cash and fund portfolio commissions to finance "shelf-space" arrangements with broker-dealers for open-end funds. The Investment Manager and its affiliates agreed to pay a total of \$68 million to settle the claims related to market timing and \$20.6 million to settle the claims related to shelf space. In addition to monetary payments, the settling parties agreed to undertake certain corporate governance, compliance and disclosure reforms related to market timing, brokerage commissions, revenue sharing and shelf-space arrangements, and consented to cease and desist orders and censures. None of the settlements alleged that any inappropriate activity took place with respect to the Funds.

Since February 2004, the Investment Manager, the Sub-Adviser and certain of their affiliates and their employees have been named as defendants in a number of pending lawsuits concerning "market timing" and "revenue sharing/shelf-space/directed brokerage," which allege the same or similar conduct underlying the regulatory settlements discussed above. The market timing lawsuits and have been consolidated in a multi-district litigation proceeding in the U.S. District Court for the District of Maryland, and the revenue sharing/shelf-space/directed brokerage lawsuits have been consolidated in the U.S. District Court for the District of Connecticut. Any potential resolution of these matters may include, but not be limited to, judgments or settlements for damages against the Investment Manager, the Sub-Adviser or their affiliates or related injunctions.

The Investment Manager and the Sub-Adviser believe that these matters are not likely to have a material adverse effect on the Funds or on their ability to perform their respective investment advisory activities relating to the Funds.

The foregoing speaks only as of the date hereof.

We may also provide your personal and account information to your brokerage or financial advisory firm and/or to your financial adviser or consultant.

Sharing Information with Third Parties

We do reserve the right to disclose or report personal information to non-affiliated third parties in limited circumstances where we believe in good faith that disclosure is required under law, to cooperate with regulators or law enforcement authorities, to protect our rights or property, or upon reasonable request by any mutual fund in which you have chosen to invest. Procedures to Safeguard Private Information

The Funds take seriously the obligation to safeguard shareholder non-public personal information. In addition to this policy, the Funds have also implemented procedures that are designed to restrict access to a shareholder's non-public personal information only to internal personnel who need to know that information in order to provide products or services to such shareholders. In order to guard a shareholder's non-public personal information, physical, electronic and procedural safeguards are in place.

Proxy Voting Policies & Procedures:

A description of the policies and procedures that the Funds have adopted to determine how to vote proxies relating to portfolio securities and information about how the Fund voted proxies relating to portfolio securities held during the twelve months ended June 30, 2006 is available (i) without charge, upon request, by calling the Funds' shareholder servicing agent at (800) 331-1710; (ii) on the Funds' website at www.allianzinvestors.com/closedendfunds; and (iii) on the Securities and Exchange Commission's website at www.sec.gov.

Nicholas-Applegate Convertible & Income Funds Dividend Reinvestment Plan (unaudited)

Pursuant to the Funds' Dividend Reinvestment Plan (the "Plan"), all Common Shareholders whose shares are registered in their own names will have all dividends, including any capital gain dividends, reinvested automatically in additional Common Shares by PFPC Inc., as agent for the Common Shareholders (the "Plan Agent"), unless the shareholder elects to receive cash. An election to receive cash may be revoked or reinstated at the option of the shareholder. In the case of record shareholders such as banks, brokers or other nominees that hold Common Shares for others who are the beneficial owners, the Plan Agent will administer the Plan on the basis of the number of Common Shares certified from time to time by the record shareholder as representing the total amount registered in such shareholder's name and held for the account of beneficial owners who are to participate in the Plan. Shareholders whose shares are held in the name of a bank, broker or nominee should contact the bank, broker or nominee for details. All distributions to investors who elect not to participate in the Plan (or whose broker or nominee elects not to participate on the investor's behalf), will be paid cash by check mailed, in the case of direct shareholder, to the record holder by PFPC Inc., as the Fund's dividend disbursement agent.

Unless you elect (or your broker or nominee's) elect not to participate in the Plan, the number of Common Shares you will receive will be determined as follows:

- (1) If on the payment date the net asset value of the Common Shares is equal to or less than the market price per Common Share plus estimated brokerage commissions that would be incurred upon the purchase of common shares on the open market, the Fund will issue new shares at the greater of (i) the net asset value per Common Share on the payment date or (ii) 95% of the market price per Common Share on the payment date; or
- (2) If on the payment date the net asset value of the Common Shares is greater than the market price per Common Share plus estimated brokerage commissions that would be incurred upon the purchase of common shares on the open market, the Plan Agent will receive the dividend or distribution in cash and will purchase Common Shares in the open market, on the New York Stock Exchange or elsewhere, for the participants' accounts. It is possible that the market price for the Common Shares may increase before the Plan Agent has completed its purchases. Therefore, the average purchase price per share paid by the Plan Agent may exceed the market price on the payment date, resulting in the purchase of fewer shares than if the dividend or distribution had been paid in Common Shares issued by the Fund. The Plan Agent will use all dividends and distributions received in cash to purchase Common Shares in the open market on or shortly after the payment date, but in no event later than the ex-dividend date for the next distribution. Interest will not be paid on any uninvested cash payments.

You may withdraw from the Plan at any time by giving notice to the Plan Agent. If you withdraw or the Plan is terminated, you will receive a certificate for each whole share in your account under the Plan and you will receive a cash payment for any fraction of a share in your account. If you wish, the Plan Agent will sell your shares and send you the proceeds, minus brokerage commissions.

The Plan Agent maintains all shareholders' accounts in the Plan and gives written confirmation of all transactions in the accounts, including information you may need for tax records. The Plan Agent will also furnish each person who buys Common Shares with written instructions detailing the procedures for electing not to participate in the Plan and to instead receive distributions in cash. Common Shares in your account will be held by the Plan Agent in non-certificated form. Any proxy you receive will include all Common Shares you have received under the Plan.

There is no brokerage charge for reinvestment of your dividends or distributions in Common Shares. However, all participants will pay a pro rata share of brokerage commissions incurred by the Plan Agent when it makes open market purchases.

Automatically reinvested dividends and distributions are taxed in the same manner as cash dividends and distributions.

The Funds and the Plan Agent reserve the right to amend or terminate the Plan. There is no direct service charge to participants in the Plan; however, the Funds reserve the right to amend the Plan to include a service charge payable by the participants. Additional information about the Plan may be obtained from the Funds' shareholder servicing agent, PFPC Inc., P.O. Box 43027, Providence, RI 02940-3027, telephone number (800) 331-1710.

Nicholas-Applegate Convertible & Income Fund (THE "Fund")

AUDIT OVERSIGHT COMMITTEE POLICY FOR PRE-APPROVAL OF SERVICES PROVIDED BY THE INDEPENDENT ACCOUNTANTS

The Funds' Audit Oversight Committee ("Committee") is charged with the oversight of the Funds' financial reporting policies and practices and their internal controls. As part of this responsibility, the Committee must pre-approve any independent accounting firm's engagement to render audit and/or permissible non-audit services, as required by law. In evaluating a proposed engagement by the independent accountants, the Committee will assess the effect that the engagement might reasonably be expected to have on the accountant's independence. The Committee's evaluation will be based on:

a review of the nature of the professional services expected to be provided,

the fees to be charged in connection with the services expected to be provided,

a review of the safeguards put into place by the accounting firm to safeguard independence, and

periodic meetings with the accounting firm.

POLICY FOR AUDIT AND NON-AUDIT SERVICES TO BE PROVIDED TO THE FUNDS

At least annually, the Committee will receive a report of all audit and non-audit services that were rendered in the previous calendar year pursuant to this Policy. In addition to the Committee's

pre-approval of services pursuant to this Policy, the engagement of the independent accounting firm for any permitted non-audit service provided to the Funds will also require the separate written pre-approval of the President of the Funds, who will confirm, independently, that the accounting firm's engagement will not adversely affect the firm's independence. Any such pre-approval shall be reported to the full Committee at its next regularly scheduled meeting.

ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

Nicholas-Applegate Convertible and Income Fund (NCV) & Nicholas-Applegate Convertible and Income Fund II(NCZ) (each a "TRUST")

PROXY VOTING POLICY

1. It is the policy of the Trust that proxies should be voted in the interest of its shareholders, as determined by those who are in the best position to make this determination. The Trust believes that the firms and/or persons purchasing and selling securities for the Trust and analyzing the performance of the Trust's securities are in the best position and have the information necessary to vote proxies in the best interests of the Trust and its shareholders, including in situations where conflicts of interest may arise between the interests of shareholders, on one hand, and the interests of the investment adviser, a sub-adviser and/or any other affiliated person of the Trust, on the other. Accordingly, the Trust's policy shall be to delegate proxy voting responsibility to those entities with portfolio management responsibility for the Trust.
 2. The Trust delegates the responsibility for voting proxies to Allianz Global Investors Fund Management LLC ("AGIFM"), which will in turn delegate such responsibility to the sub-adviser of the Trust. AGIFM's Proxy Voting Policy Summary is attached as Appendix A hereto. Summary of the detailed proxy voting policies of the Trust's current sub-adviser is set forth in Appendix B attached hereto. Such summaries may be revised from time to time to reflect changes to the sub-advisers' detailed proxy voting policies.
 3. The party voting the proxies (i.e., the sub-adviser or portfolio manager) shall vote such proxies in accordance with such party's proxy voting policies and, to the extent consistent with such policies, may rely on information and/or recommendations supplied by others.
 4. AGIFM and the sub-adviser of the Trust with proxy voting authority shall deliver a copy of its respective proxy voting policies and any material amendments thereto to the applicable Board of the Trust promptly after the adoption or amendment of any such policies.
 5. Nicholas-Applegate Capital Management LLC ("NACM")

Description of Proxy Voting Policy and Procedures

NACM votes proxies on behalf of its clients pursuant to its written Proxy Policy Guidelines and Procedures (the "Proxy Guidelines"), unless a client requests otherwise. The Proxy Guidelines are designed to honor NACM's fiduciary duties to its clients and protect and enhance its clients' economic welfare and rights.

The Proxy Guidelines are established by a Proxy Committee consisting of executive, investment, sales, marketing, compliance and operations personnel. The Proxy Guidelines reflect NACM's normal voting positions on specific corporate actions, including but not limited to those relating to social and corporate responsibility issues, stock option plans and other management compensation issues, changes to a portfolio company's capital structure and corporate governance. For example, NACM generally votes for proposals to declassify boards and generally supports proposals that remove restrictions on shareholders' ability to call special meetings independently of management. Some issues will require a case-by-case analysis.

The Proxy Guidelines largely follow the recommendations of Glass, Lewis & Co. LLC ("Glass Lewis"), an investment research and proxy advisory firm. The Proxy Guidelines may not apply to every situation and NACM may vote differently than specified by the Proxy Guidelines and/or contrary to Glass Lewis' recommendation if NACM reasonably determines that to do so is in its clients' best interest. Any variance from the Proxy Guidelines is documented.

In the case of a potential conflict of interest, NACM's Proxy Committee will be responsible for reviewing the potential conflict and will have the final decision as to how the relevant proxy should be voted.

Under certain circumstances, NACM may in its reasonable discretion refrain from voting clients' proxies due to cost or other factors.

Like other investment professionals with multiple clients, a Portfolio Manager for a Fund may face certain potential conflicts of interest in connection with managing both the Fund and other accounts at the same time. The paragraphs below describe some of these potential conflicts, which the Investment Adviser believes are faced by investment professionals at most major financial firms.

The Investment Adviser and the Trustees have adopted compliance policies and procedures that attempt to address certain of these potential conflicts. The management of accounts with different advisory fee rates and/or fee structures, including accounts that pay advisory fees based on account performance (["performance fee accounts"]), may raise potential conflicts of interest by creating an incentive to favor higher-fee accounts. These potential conflicts may include, among others:

- The most attractive investments could be allocated to higher-fee accounts or performance fee accounts.
- The trading of higher-fee accounts could be favored as to timing and/or execution price. For example, higher-fee accounts could be permitted to sell securities earlier than other accounts when a prompt sale is desirable or to buy securities at an earlier and more opportune time.
- The investment management team could focus their time and efforts primarily on higher-fee accounts due to a personal stake in compensation.

A potential conflict of interest may arise when a Fund and other accounts purchase or sell the same securities. On occasions when a Portfolio Manager considers the purchase or sale of a security to be in the best interests of a Fund as well as other accounts, the Investment Adviser's trading desk may, to the extent permitted by applicable laws and regulations, aggregate the securities to be sold or purchased in order to obtain the best execution and lower brokerage commissions, if any. Aggregation of trades may create the potential for unfairness to a Fund or another account if one account is favored over another in allocating the securities purchased or sold—for example, by allocating a disproportionate amount of a security that is likely to increase in value to a favored account.

["Cross trades,"] in which one Investment Adviser account sells a particular security to another account (potentially saving transaction costs for both accounts), may also pose a potential conflict of interest. Cross trades may be seen to involve a potential conflict of interest if, for example, one account is permitted to sell a security to another account at a higher price than an independent third party would pay. The Investment Adviser and the Board of Trustees have adopted compliance procedures that provide that any transactions between the Funds and another Investment Adviser-advised account are to be made at an independent current market price, as required by law.

Another potential conflict of interest may arise based on the different investment objectives and strategies of a Fund and other accounts. For example, another account may have a shorter-term investment horizon or different investment objectives, policies or restrictions than a Fund. Depending on another account's objectives or other factors, a

Portfolio Manager may give advice and make decisions that may differ from advice given, or the timing or nature of decisions made, with respect to a Fund. In addition, investment decisions are the product of many factors to basic suitability for the particular account involved. Thus, a particular security may be bought or sold for certain accounts even though it could have been bought or sold for other accounts at the same time. More rarely, a particular security may be bought for one or more accounts managed by a Portfolio Manager when one or more other accounts are selling the security (including short sales). There may be circumstances when purchases or sales of portfolio securities for one or more accounts may have an adverse effect on other accounts.

A Fund's Portfolio Manager who is responsible for managing multiple funds and/or accounts may devote unequal time and attention to the management of those funds and/or accounts. As a result, the Portfolio Manager may not be able to formulate as complete a strategy or identify equally attractive investment opportunities for each of those accounts as might be the case if he or she were to devote substantially more attention to the management of a single fund. The effects of this potential conflict may be more pronounced where funds and/or accounts overseen by a particular Portfolio Manager have different investment strategies. A Fund's Portfolio Manager(s) may be able to select or influence the selection of the brokers and dealers that are used to execute securities transactions for the Funds. In addition to executing trades, some brokers and dealers provide Portfolio Managers with brokerage and research services (as those terms are defined in Section 28(e) of the Securities Exchange Act of 1934), which may result in the payment of higher brokerage fees than might have otherwise be available. These services may be more beneficial to certain funds or accounts than to others. Although the payment of brokerage commissions is subject to the requirement that the Portfolio Manager determine in good faith that the commissions are reasonable in relation to the value of the brokerage and research services provided to the Fund, a Portfolio Manager's decision as to the selection of brokers and dealers could yield disproportionate costs and benefits among the Funds and/or accounts that he or she manages. See "Portfolio Transactions and Brokerage".

A Fund's Portfolio Manager(s) may also face other potential conflicts of interest in managing a Fund, and the description above is not a complete description of every conflict that could be deemed to exist in managing both the Funds and other accounts. In addition, a Fund's Portfolio Manager may also manage other accounts (including their personal assets or the assets of family members) in their personal capacity. The management of these accounts may also involve certain of the potential conflicts described above. The Investment Adviser's investment personnel, including each Fund's Portfolio Manager, are subject to restrictions on engaging in personal securities transactions pursuant to the Codes of Ethics adopted by the Investment Adviser and the Funds, which contain provisions and requirements designed to identify and address certain conflicts of interest between personal investment activities and the interests of the Funds.

As of February 28, 2007, the following explains the compensation structure of each individual (as listed in the Prospectus) that shares primary responsibility for day-to-day portfolio management of the Funds (for the purposes of this section, "Portfolio Managers"):

Base Salary. Each Portfolio Manager is paid a fixed base salary set at a competitive level, taking into consideration the Portfolio Manager's experience and responsibilities, as determined by the Investment Adviser.

Annual Bonus, Profit Sharing Plan and Long-Term Cash Bonus Plan. Each Portfolio Manager's compensation is directly affected by the performance, on a pre-tax basis, of the individual portfolios he or she manages, including each Fund; as well as the performance of the individual's portfolio management team and the overall success of the firm.

Approximately 75% of a portfolio managers performance bonus is based on one- (30% weight), three- (60% weight), and five-year (10% weight) annualized performance under his or her management. This takes into account relative performance of the accounts to each account's individual benchmark (which includes the CSFB Convertible Index, the Merrill Lynch All Convertible All Quality Index, and the Merrill Lynch High Yield Master II Index) (representing approximately one half of the calculation) and the accounts' peer rankings in institutional consultant universes (representing the other half). In the case of each Fund, the benchmark against which the performance of the Fund's portfolio will be compared for these purposes is indicated in the "Past Performance" sections of the prospectus. The remaining 25% of the bonus is based on a qualitative review and overall firm profitability. The qualitative review evaluates each NACM Portfolio Manager based on the individual's contribution to the implementation of the investment process of his or her accounts, including the Fund. The lead portfolio manager indicated for each Fund evaluates the other members of the portfolio management team. The Chief Investment Officer (Mr. Valeiras) evaluates the lead portfolio managers.

Investment teams participate in a profit-sharing plan which provides opportunity for additional compensation. Each team receives a pool which is based on the pre-tax profit of their product(s). All team members are eligible to participate in the pool. Allocations are decided by the Chief Investment Officer and lead portfolio managers of the teams. The share of pre-tax profit increases with increasing profitability. This structure, together with the bonus based on investment performance, fully aligns the team with client interests.

A Long-Term Cash Bonus Plan provides long-term incentives and rewards to certain key staff and executives of Nicholas-Applegate and the other Allianz Global Investors companies to promote long-term growth and profitability. The Plan provides awards that are based on the operating earnings growth of the Allianz Global Investors companies, as well as Nicholas-Applegate's achievement of average operating earnings relative to plan on a three-year basis. The plan provides a link between longer term company

performance and participant pay, further motivating participants to make a long-term commitment to the company's success.
