Privacy Notice Regarding Customer Financial Information Rev. 8/2015

FACTS What does Lazard do with your personal information?

Why? Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some, but not all, sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.

What? The types of personal information we collect and share depend on the product or service you have with us. This information can include:

Social Security number and credit history;

Assets and income;

Account transactions;

When you are *no longer* our customer, we continue to share your information as described in this notice.

How? All financial companies need to share customers' personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers' personal information; the reasons Lazard chooses to share; and whether you can limit this sharing.

Reasons we can share your personal information	Does Lazard share?	Can you limit this sharing?
For our everyday business purposes — such as to process your transactions, maintain your account(s), respond to court orders and legal investigations, or report to credit bureaus	Yes	No
For our marketing purposes — to offer our products and services to you	No	We do not share
For joint marketing with other financial companies	No	We do not share
For our affiliates' everyday business purposes — information about your transactions and experiences	Yes	No
For our affiliates' everyday business purposes — information about your creditworthiness	No	We do not share
For nonaffiliates to market to you	No	We do not share

Questions? Call 800-823-6300 or go to <http://www.LazardNet.com>

Who we are

Who is providing this notice? Lazard Asset Management LLC, Lazard Alternatives, LLC, Lazard Asset Management (Canada), Inc., and Lazard Asset Management Securities LLC, on their own behalf and on behalf of the funds they manage.

What we do

How does Lazard collect my personal information? To protect your personal information from unauthorized access and use, we use security measures that comply with federal and applicable state laws. These measures include computer safeguards and secured files and buildings.

We collect your personal information, for example, when you:

How does Lazard collect my personal information?

Open an account;
Seek advice about your investments;
Direct us to buy securities;
Direct us to sell your securities;
Enter into an investment advisory contract;
We also collect your personal information from others, such as credit bureaus, affiliates, or other companies.

Why can't I limit all sharing?

Federal law gives you the right to limit only:
Sharing for affiliates' everyday business purposes — information about your creditworthiness;
Affiliates from using your information to market to you;
Sharing for nonaffiliates to market to you;
State laws and individual companies may give you additional rights to limit sharing.

Definitions

Affiliates Companies related by common ownership or control. They can be financial and nonfinancial companies.

Our affiliates may include financial companies whose names include "Lazard".

Nonaffiliates Companies not related by common ownership or control. They can be financial and nonfinancial companies.

Lazard does not share information with nonaffiliates so they can market to you.

Joint marketing A formal agreement between nonaffiliated financial companies that together market financial products or services to you.

Lazard does not jointly market.

Other important information

Lazard Asset Management (Canada), Inc. does not disclose any non-public personal information about its customers or former customers to any third party, except as permitted by or required by any applicable law, including the laws of the United States and Canada.

Lazard Global Total Return and Income Fund, Inc.

Investment Overview

Dear Stockholders,

We are pleased to present this report for Lazard Global Total Return and Income Fund, Inc. (“LGI” or the “Fund”), for the period ended June 30, 2015. LGI is a diversified, closed-end management investment company that began trading on the New York Stock Exchange (“NYSE”) on April 28, 2004. Its ticker symbol is “LGI.”

For the second quarter of 2015, the Fund’s net asset value (“NAV”) performance underperformed its benchmark, the MSCI World® Index (the “Index”). We believe that the Fund has provided investors with an attractive yield and diversification, backed by the extensive experience, commitment, and professional management of Lazard Asset Management LLC (the “Investment Manager” or “Lazard”).

Portfolio Update (as of June 30, 2015)

For the second quarter of 2015, the Fund’s NAV returned -0.6%, underperforming the Index return of 0.3%. Over the year-to-date, the Fund’s NAV performance of 1.6% has underperformed the Index return of 2.6%. The Fund’s NAV performance over longer time periods and since inception is also lagging the benchmark. The since inception annualized return is 6.3%, versus 6.6% for the Index. Shares of LGI ended the second quarter of 2015 with a market price of \$15.38, representing a 12.5% discount to the Fund’s NAV per share of \$17.57.

The Fund’s net assets were \$168.7 million as of June 30, 2015, with total leveraged assets (net assets plus line of credit outstanding and net notional value of forward currency contracts) of \$210.1 million, representing a 19.7% leverage rate. This leverage rate is higher than that at the end of the first quarter of 2015 (16.6%), and below the maximum permitted leverage rate of 33 %.

Within the global equity portfolio, stock selection within the financial sector and within Japan contributed positively to performance in the second quarter. In contrast, stock selection within the US and within the consumer discretionary sector detracted from performance for the quarter.

Performance for the smaller, short duration¹ emerging markets currency and debt portion of the Fund was weak in the second quarter and the year-to-date, and has been a meaningful negative contributor to per-

formance over the last couple of years. However, it has contributed positively to performance since the Fund's inception.

As of June 30, 2015, 77.9% of the Fund's total leveraged assets consisted of global equities, 20.4% consisted of emerging market currency and debt instruments, and 1.7% consisted of cash and other assets.

Declaration of Distributions

Pursuant to LGI's Level Distribution Policy, the Fund declares, monthly, a distribution equal to 6.25% (on an annualized basis) of the Fund's NAV on the last business day of the previous year. The current monthly distribution rate per share is \$0.09282, representing a distribution yield of 7.24% based on the Fund's market price of \$15.38 as of close of trading on the NYSE on June 30, 2015. It is currently estimated that, of the \$0.55692 distributed per share for the year-to-date, \$0.32301 may represent a return of capital.

Additional Information

Please note that available on www.LazardNet.com are frequent updates on the Fund's performance, press releases, distribution information, and a monthly fact sheet that provides information about the Fund's major holdings, sector weightings, regional exposures, and other characteristics, including the notices required by Section 19(a) of the Investment Company Act of 1940, as amended (the "1940 Act"). You may also reach Lazard by phone at 1-800-823-6300.

On behalf of Lazard, we thank you for your investment in Lazard Global Total Return and Income Fund, Inc. and look forward to continuing to serve your investment needs in the future.

Message from the Portfolio Managers

Global Equity Portfolio

(77.9% of total leveraged assets)

The Fund's global equity portfolio is invested primarily in equity securities of large, well-known global companies with, we believe, strong financial productivity at attractive valuations. Examples include GlaxoSmithKline, a global research-based pharmaceutical company based in the United Kingdom; Citigroup, a US-based financial services company; Canon, a Japanese manufacturer and distributor of net-

Lazard Global Total Return and Income Fund, Inc.

Investment Overview (continued)

work digital multifunction devices, copying machines, printers and cameras; and Total, a French energy supplier that explores for, produces, refines, transports, and markets oil and natural gas.

Companies held in the global equity portfolio are all based in developed-market regions around the world. As of June 30, 2015, 47.0% of these stocks were based in North America, 27.3% were based in continental Europe (not including the United Kingdom), 14.1% were from the United Kingdom, 7.7% were from Japan, and 3.9% were from the rest of Asia (not including Japan) and Australia. The global equity portfolio is similarly well diversified across a number of industry sectors. The top two sectors, by weight, at June 30, 2015, were financials (21.2%), which includes banks, diversified financials, insurance, and real estate; and health care (16.8%), which includes health care equipment and services, pharmaceuticals, biotechnology and life sciences. Other sectors in the portfolio include consumer discretionary, consumer staples, energy, industrials, information technology, materials, telecom services, and utilities. The average dividend yield on the securities held in the global equity portfolio was approximately 3.1% as of June 30, 2015.

Global Equity Markets Review

Global markets modestly declined in local currency terms in the second quarter, primarily due to concerns over Greece. US markets rose moderately, as corporate earnings generally exceeded lowered expectations. First-quarter annualized GDP shrank, though this was largely attributed to severe winter weather and the West Coast port labor conflict, the latter of which has since been resolved. Japan was a bright spot in the global economy, as the market increased due to continued accommodative policy from the Bank of Japan and two consecutive quarters of economic expansion. Stocks in China were volatile, but also increased during the period. Stocks rallied sharply in the beginning of the second quarter due to central bank monetary easing coupled with increases in margin lending. However, the Index subsequently fell over concerns about the economic recovery. Broadly, European stocks experienced their worst quarter since 2012. While quantitative easing and encouraging comments from the European Central Bank drove stocks higher, the gains eroded due to the market's worries over Greece's debt situation and its potential exit from the euro zone. Emerging market stocks were flat in local terms, fluctuating with the broad macro headlines.

What Helped and What Hurt LGI

Stock selection within Japan and within the financials sector contributed to performance in the second quarter. Shares of Japanese diversified-financials firm Mitsubishi UFJ Financial Group rose after management announced a share-repurchase plan and a goal to focus on growth outside Japan. The company also completed the purchase of assets from UBS. Consequently, shares of UBS, also owned in the portfolio, strengthened on the back of news of the deal. We continue to like Mitsubishi UFJ Financial Group due to its attractive valuation, continued profit growth, and potential benefit from changes in corporate governance in Japan.

In contrast, stock selection in the consumer discretionary sector detracted from performance in the second quarter. Shares of Bayerische Motoren Werke, a luxury car manufacturer, fell on slowing European car sales and concerns over exposure to China. Also during the period, the company reported first-quarter earnings that exceeded expectations and affirmed its 2015 targets. We continue to hold Bayerische Motoren Werke as we believe new models and technology advancements should keep driving volume growth, and we find its valuation compelling. Stock selection in the industrials sector also hurt performance. Shares of Assa Abloy, a commercial and residential building equipment company, declined after the firm reported first-quarter profits below consensus and margins disappointed. Additionally, the company announced plans to acquire a Finnish security system provider and locksmith during the second quarter. We like Assa Abloy as the company continues to show solid organic growth and the continuing ability to do acquisitions and slowly grow margin. Stock selection within the US also detracted from returns. Wal-Mart Stores experienced decelerating sales, partly due to fading food inflation and rising costs on the back of wage hikes.

Emerging Market Currency and Debt Portfolio

(20.4% of total leveraged assets)

The Fund also seeks income through investing in primarily high-yielding, short-duration emerging market forward currency contracts and local currency debt instruments. As of June 30, 2015, this portfolio con-

Lazard Global Total Return and Income Fund, Inc.

Investment Overview (continued)

sisted of forward currency contracts (68.5%) and sovereign debt obligations (31.5%). The average duration of the emerging market currency and debt portfolio decreased relative to the first quarter of 2015, with the second quarter duration at approximately 17 months, while the average yield decreased from 7.5%² at the end of March 31, 2015 to 6.2% on June 30, 2015.

Emerging Market Currency and Debt Market Review

Emerging markets local currency and debt markets were mixed during the second quarter, but seemed to falter toward the end of June, roiled by concerns over Greece's possible exit from the euro zone, Chinese stock market turbulence, and uncertainty over the timing of the initial US Federal Reserve interest rate hike.

What Helped and What Hurt LGI

Top quarterly contributors included Serbia, Brazil, Kazakhstan, Zambia, and China. Serbia local debt rallied during the quarter on the back of rate cuts and currency stability. Inflation-linked local debt in Brazil (partially currency hedged) rallied during the quarter. Kazakhstan benefited from high devaluation risk premia (40% to 50%) as forwards rolled toward maturity and the tenge was steady. In Zambia, our exposure

benefited from the kwacha's rally on prudent monetary policy. Higher copper (Zambia's main export) prices throughout the first half of May also helped. In China (the strategy's largest exposure) we benefited from a relatively high yield and the People's Bank of China directive to maintain currency stability ahead of the potential use of an International Monetary Fund loan.

Conversely, several countries detracted from results. Uganda hurt as the shilling has depreciated on increased US dollar demand due to higher imports and a rising budget deficit. Hungary detracted as the strategy's local bond exposure weakened in response to rising core yields, while the forint weakened versus the euro. Local bond positions in Romania detracted due to rising political risk, but that loss was mitigated by hedging the Romanian leu which fell by 2.3% over second quarter against the US dollar. Mexico detracted as the peso fell due to the negative impact of lower oil on growth and current accounts there. Turkey weakened early in the quarter due to political risk ahead of June elections and expectations that the central bank will ease rates despite rising inflation.

Notes to Investment Overview:

A measure of the average cash weighted term-to-maturity of the investment holdings. Duration is a measure of the price sensitivity of a bond to interest rate movements. Duration for a forward currency contract is equal to its term-to-maturity.

The quoted yield does not account for the implicit cost of borrowing on the forward currency contracts, which would reduce the yield shown.

All returns reflect reinvestment of all dividends and distributions. Past performance is not indicative, or a guarantee, of future results. A period of less than one year is not annualized.

The performance data of the Index and other market data have been prepared from sources and data that the Investment Manager believes to be reliable, but no representation is made as to their accuracy. The Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. The Index is unmanaged, has no fees or costs and is not available for investment.

The views of the Fund's Investment Manager and the securities described in this report are as of June 30, 2015; these views and portfolio holdings may have changed subsequent to this date. Nothing herein should be construed as a recommendation to buy, sell, or hold a particular security. There is no assurance that the securities discussed herein will remain in the Fund at the time you receive this report, or that securities sold will not have been repurchased. The specific securities discussed may, in aggregate, represent only a small percentage of the Fund's holdings. It should not be assumed that securities identified and discussed were, or will be, profitable, or that the investment decisions made in the future will be profitable, or equal the investment performance of the securities discussed herein.

The views and opinions expressed are provided for general information only, and do not constitute specific tax, legal, or investment advice to, or recommendations for, any person. There can be no guarantee as to the accuracy of any outlooks for markets, sectors and securities as discussed herein.

† Unaudited.

Total return based on per share market price assumes the purchase of common shares at the closing market price on the business day immediately preceding the first day, and sales of common shares at the closing market price on the last day, of each period indicated; dividends and distributions are assumed to be reinvested in accordance with the Fund's Dividend Reinvestment Plan. The total return based on net asset value, or NAV, assumes the purchase of common shares at the "net asset value, beginning of period" and sales of common shares at the "net asset value, end of period", for each of the periods indicated; distributions are assumed to be reinvested at NAV. Past performance is not indicative, or a guarantee, of future results; the investment return, market price and net asset value of the Fund will fluctuate, so that an investor's shares in the Fund, when sold, may be worth more or less than their original cost. The returns do not reflect the deduction of taxes that a stockholder would pay on the Fund's distributions or on the sale of Fund shares. A period of less than one year is not annualized.

(a) Annualized for a period of less than one year.

(c)

Edgar Filing: LAZARD GLOBAL TOTAL RETURN & INCOME FUND INC - Form N-CSRS

Calculated as the sum of the Fund's Net Assets and Line of Credit outstanding, as both figures are shown on the Fund's Statement of Assets and Liabilities, then dividing that sum by the Line of Credit outstanding and multiplying the result by 1,000.

The accompanying notes are an integral part of these financial statements.

Lazard Global Total Return and Income Fund, Inc.

Notes to Financial Statements

June 30, 2015 (unaudited)

1. Organization

Lazard Global Total Return and Income Fund, Inc. (the “Fund”) was incorporated in Maryland on January 27, 2004 and is registered under the 1940 Act, as a diversified, closed-end management investment company. The Fund trades on the NYSE under the ticker symbol LGI and commenced operations on April 28, 2004. The Fund’s investment objective is total return, consisting of capital appreciation and income.

2. Significant Accounting Policies

The accompanying financial statements are presented in conformity with accounting principles generally accepted in the United States of America (“GAAP”). The Fund is an investment company and therefore applies specialized accounting guidance in Accounting Standards Codification Topic 946. The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of the financial statements:

(a) Valuation of Investments—NAV per share is determined for the Fund on each day the NYSE is open for business. Market values for securities listed on the NYSE, NASDAQ national market or other US or foreign exchanges or markets are generally based on the last reported sales price on the exchange or market on which the security is principally traded, generally as of the close of regular trading on the NYSE (normally 4:00 p.m. Eastern time) on each valuation date; securities not traded on the valuation date are valued at the most recent quoted bid price. The Fund values NASDAQ-traded securities at the NASDAQ Official Closing Price, which may not be the last reported sales price in certain instances. Forward currency contracts are valued using quotations from an independent pricing service. Investments in money market funds are valued at the fund’s NAV.

Bonds and other fixed-income securities that are not exchange-traded are valued on the basis of prices provided by independent pricing services which are based primarily on institutional trading in similar groups of securities, or by using brokers’ quotations or a matrix system which considers such factors as other security prices, yields and maturities.

The Valuation Committee of the Investment Manager, which meets periodically and acts pursuant to delegated authority from the Board of Directors (the “Board”), may evaluate a variety of factors to determine the fair value of securities for which market quotations are determined not to be readily available or reliable. These factors include, but are not limited to, the type of security, the value of comparable securities, observations from financial institutions and relevant news events. Input from the Investment Manager’s portfolio managers/analysts also will be considered.

If a significant event materially affecting the value of securities occurs between the close of the exchange or market on which the security is principally traded and the time when the Fund’s NAV is calculated, or when current market quotations otherwise are determined not to be readily available or reliable (including restricted or other illiquid securities such as certain derivative instruments), such securities will be valued at their fair value as determined by, or in accordance with procedures approved by, the Board. Non-US securities may trade on days when the Fund is not open for business, thus affecting the value of the Fund’s assets on days when Fund stockholders may not be able to buy or sell Fund shares.

The effect of using fair value pricing is that the NAV of the Fund will reflect the affected securities’ values as determined in the judgment of the Board or its designee instead of being determined by the market. Using a fair value pricing methodology to price securities may result in a value that is different from the most recent closing price of a security and from the prices used by other investment companies to calculate their portfolios’ NAVs.

(b) Portfolio Securities Transactions and Investment Income—Portfolio securities transactions are accounted for on trade date. Realized gain (loss) on sales of investments are recorded on a specific identification basis. Dividend income is recorded on the ex-dividend date and interest income is accrued daily. The Fund amortizes premiums and accretes discounts on fixed-income securities using the effective yield method.

The Fund may be subject to taxes imposed by foreign countries in which it invests. Such taxes are generally based upon income earned or capital gains (realized or unrealized). The Fund accrues and applies such taxes to net investment income, net realized gains and net unrealized gains concurrent with the recognition of income or capital gains (realized and unrealized) from the applicable portfolio securities.

(c) Leveraging—The Fund uses leverage to invest Fund assets in currency investments, primarily using forward currency contracts and by borrowing under a credit facility with State Street Bank and Trust Company (“State Street”), up to a maximum of 33 % of the Fund’s total leveraged assets. If the assets of the Fund decline due to market conditions such that this 33 % threshold will be exceeded, leverage risk will increase.

If the Fund is able to realize a higher return on the leveraged portion of its investment portfolio than the cost of such leverage together with other related expenses, the effect of the leverage will be to cause the Fund to realize a

Lazard Global Total Return and Income Fund, Inc.

Notes to Financial Statements (continued)

June 30, 2015 (unaudited)

higher net return than if the Fund were not so leveraged. There is no assurance that any leveraging strategy the Fund employs will be successful.

Using leverage is a speculative investment technique and involves certain risks. These include higher volatility of NAV, the likelihood of more volatility in the market value of the Fund's common stocks and, with respect to borrowings, the possibility either that the Fund's return will fall if the interest rate on any borrowings rises, or that income will fluctuate because the interest rate of borrowings varies.

If the market value of the Fund's leveraged currency investments declines, the leverage will result in a greater decrease in NAV, or less of an increase in NAV, than if the Fund were not leveraged. To the extent that the Fund is required or elects to prepay any borrowings, the Fund may need to liquidate investments to fund such prepayments. Liquidation at times of adverse economic conditions may result in capital losses and may reduce returns.

(d) Foreign Currency Translation and Forward Currency Contracts—The accounting records of the Fund are maintained in US dollars. Portfolio securities and other assets and liabilities denominated in a foreign currency are translated daily into US dollars at the prevailing rates of exchange. Purchases and sales of securities, income receipts and expense payments are translated into US dollars at the prevailing exchange rates on the respective transaction dates.

The Fund does not isolate the portion of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in their market prices. Such fluctuations are included in net realized and unrealized gain (loss) on investments. Net realized gain (loss) on foreign currency and forward currency contracts represents net foreign currency gain (loss) from forward currency contracts, disposition of foreign currencies, currency gain (loss) realized between the trade and settlement dates on securities transactions, and the difference between the amount of dividends, interest and foreign withholding taxes recorded on the Fund's accounting records and the US dollar equivalent amounts actually received or paid. Net change in unrealized appreciation (depreciation) on foreign currency reflects the impact of changes in exchange rates on the value of assets and liabilities, other than investments in securities, during the period.

A forward currency contract is an agreement between two parties to buy or sell currency at a set price on a future date. Upon entering into these contracts, risks may arise from the potential inability of counterparties to meet the

terms of their contracts and from unanticipated movements in the value of the foreign currency relative to the US dollar.

The US dollar value of forward currency contracts is determined using quotations provided by an independent pricing service. Daily fluctuations in the value of such contracts are recorded as unrealized appreciation (depreciation) on forward currency contracts. When the contract is closed, the Fund records a realized gain (loss) equal to the difference between the value at the time it was opened and the value at the time it was closed.

(e) Federal Income Taxes—It is the Fund’s policy to continue to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code (the “Code”) and to distribute all of its taxable income, including any net realized capital gains, to its stockholders. Therefore, no federal income tax provision is required.

The Regulated Investment Company Modernization Act of 2010 (the “RIC Modernization Act”) includes numerous provisions that generally became effective for taxable years beginning after December 22, 2010. Among the provisions, net capital losses may be carried forward indefinitely, and their character is retained as short-term or long-term. Previously, net capital losses were carried forward for eight years and treated as short-term losses. The RIC Modernization Act also requires that post-enactment net capital losses be used before pre-enactment net capital losses. As a result, pre-enactment capital loss carryforwards may expire unused.

Under current tax law, certain late year losses, as defined by the Code, within the taxable year may be deferred and treated as occurring on the first day of the following tax year. For the tax year ended December 31, 2014, the Fund elected to defer such losses as follows:

	Late Year
Post October Capital	Ordinary Loss
Loss Deferral	Deferral
\$(28,226)	\$(1,177,556)

Management has analyzed the Fund’s tax positions, and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on returns filed for open tax years (2011-2013), or expected to be taken in the Fund’s 2014 tax returns.

(f) Dividends and Distributions—The Fund intends to declare and to pay dividends monthly from net investment income. Distributions to stockholders are recorded on the ex-dividend date. During any particular year, net realized gains from investment transactions in excess of available capital loss carryforwards would be taxable to the Fund, if

Lazard Global Total Return and Income Fund, Inc.

Notes to Financial Statements (continued)

June 30, 2015 (unaudited)

not distributed. The Fund intends to declare and distribute these amounts, at least annually, to stockholders; however, to avoid taxation, a second distribution may be required.

Income dividends and capital gains distributions are determined in accordance with federal income tax regulations which may differ from GAAP. These book/tax differences, which may result in distribution reclassifications, are primarily due to differing treatments of foreign currency and fixed income transactions and wash sales. The book/tax differences relating to stockholder distributions may result in reclassifications among certain capital accounts.

The Fund has implemented a level distribution policy to seek to maintain a stable monthly distribution, subject to oversight of the Fund's Board. Under the Fund's level distribution policy, the Fund intends to make regular monthly distributions at a fixed rate per share. If for any monthly distribution, net investment income and net realized short-term capital gain were less than the amount of the distribution, the difference would generally be distributed from the Fund's assets. In addition, in order to make such distributions, the Fund might have to sell a portion of its investment portfolio at a time when independent investment judgment might not dictate such actions.

In July 2010, the Investment Manager, on behalf of itself and the Fund, received an exemptive order from the Securities and Exchange Commission (the "SEC") facilitating the implementation of a distribution policy that may include multiple long-term capital gains distributions ("Managed Distribution Policy"). As a result, the Fund may, subject to the determination of its Board, implement a Managed Distribution Policy.

Concurrent with the monthly distributions paid from January 2015 through June 2015, the Fund issued notices pursuant to Section 19(a) of the 1940 Act (the "Section 19(a) Notices") each stating that the Fund had currently estimated that it had distributed more than its net investment income and realized capital gains. Based on these estimates, it is possible that some or all of the amounts distributed may represent a return of capital. The Section 19(a) Notices may also be viewed at www.LazardNet.com.

The actual amounts and sources of distributions shown on the Section 19(a) Notices are only estimates and are not provided for tax reporting purposes. The actual amounts and sources of the cumulative distributions for tax reporting purposes will depend upon the Fund's investment experience during the year and may be subject to changes based on tax regulations. The Fund will send stockholders a Form 1099-DIV for the calendar year explaining how to report these distributions for federal income tax purposes.

(g) *Estimates*—The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

3. Investment Management Agreement

The Fund has entered into an investment management agreement (the “Management Agreement”) with the Investment Manager. Pursuant to the Management Agreement, the Investment Manager regularly provides the Fund with investment research, advice and supervision and furnishes continuously an investment program for the Fund consistent with its investment objective and policies, including the purchase, retention and disposition of securities.

The Fund has agreed to pay the Investment Manager an annual investment management fee of 0.85% of the Fund’s average daily “Total Leveraged Assets” (the Fund’s total assets including Financial Leverage (defined below)) for the services and facilities provided by the Investment Manager, payable on a monthly basis. For the period ended June 30, 2015, the effective management fee, as a percentage of the Fund’s average net assets, was 1.04%.

The fee paid to the Investment Manager will be higher when the Investment Manager uses Currency Commitments (defined below) and Borrowings (defined below) (“Financial Leverage”) to make Currency Investments (defined below), rather than by reducing the percentage of “Net Assets” (the Fund’s assets without taking into account Financial Leverage) invested in Global Equity Investments for the purposes of making Currency Investments. “Global Equity Investments” refers to investments in the Fund’s global equity strategy consisting of equity securities of companies with market capitalizations of \$5 billion or greater domiciled in those countries that comprise the Index. “Currency Investments” refers to investments in the Fund’s emerging income strategy, consisting of emerging market currencies (primarily by entering into forward currency contracts), or instruments whose value is derived from the performance of an underlying emerging market currency, but also may invest in debt obligations, including government, government agency and corporate obligations and structured notes denominated in emerging market currencies. “Currency Commitments” are the aggregate financial exposures created by forward currency contracts in excess of that represented in the Fund’s Net Assets, and “Borrowings” refers to the borrowings under the Fund’s credit facility. Assuming Financial Leverage in the amount of 33 % of the Fund’s

Lazard Global Total Return and Income Fund, Inc.

Notes to Financial Statements (continued)

June 30, 2015 (unaudited)

Total Leveraged Assets, the annual fee payable to the Investment Manager would be 1.28% of Net Assets (i.e., not including amounts attributable to Financial Leverage).

The following is an example of this calculation of the Investment Manager's fee, using very simple illustrations. If the Fund had assets of \$1,000, it could invest \$1,000 in Global Equity Investments and enter into \$500 in forward currency contracts (because the Fund would not have to pay money at the time it enters into the currency contracts). Similarly, the Fund could invest \$1,000 in Global Equity Investments, borrow \$500 and invest the \$500 in foreign currency denominated bonds. In either case, the Investment Manager's fee would be calculated based on \$1,500 of assets, because the fee is calculated based on Total Leveraged Assets (Net Assets plus Financial Leverage). In our example, the Financial Leverage is in the form of either the forward currency contracts (Currency Commitments) or investments from Borrowings. The amount of the Financial Leverage outstanding, and therefore the amount of Total Leveraged Assets on which the Investment Manager's fee is based, fluctuates daily based on changes in value of the Fund's portfolio holdings, including changes in value of the currency involved in the forward currency contracts and foreign currency denominated bonds acquired with the proceeds of Borrowings. However, the Investment Manager's fee will be the same regardless of whether Currency Investments are made with Currency Commitments or with Borrowings (without taking into account the cost of Borrowings).

This method of calculating the Investment Manager's fee is different than the way closed-end investment companies typically calculate management fees. Traditionally, closed end investment companies calculate management fees based on Net Assets plus Borrowings (excluding Financial Leverage obtained through Currency Commitments). The Investment Manager's fee is different because the Fund's leverage strategy is different than the leverage strategy employed by many other closed-end investment companies. Although the Fund may employ Borrowings in making Currency Investments, the Fund's leverage strategy relies primarily on Currency Commitments, rather than relying exclusively on borrowing money and/or issuing preferred stock, as is the strategy employed by most closed-end investment companies. The Investment Manager's fee would be lower if its fee were calculated only on Net Assets plus Borrowings, because the Investment Manager would not earn fees on Currency Investments made with Currency Commitments (forward currency contracts). Using the example above, where the Fund has assets of \$1,000 and invests \$1,000 in Global Equity Investments and \$500 in forward currency contracts, the following table illustrates how the Investment

Manager's fee would be different if it did not earn management fees on these types of Currency Investments. A discussion of the most recent review and approval by the Fund's Board of the Management Agreement (including the method of calculating the Investment Manager's fee) is included under "Other Information—Board Consideration of Management Agreement".

	Fund's management fee based on Total Leveraged Assets (includes Currency Commitments)	Typical management fee formula, calculated excluding Currency Commitments
Beginning assets of \$1,000 Global Equity Investments (Net Assets)	\$1,000	\$1,000
Currency Commitments	\$ 500	\$ 500
Assets used to calculate management fee	\$1,500	\$1,000
Management fee (0.85%)	\$12.75	\$ 8.50

Investment Manager Fee Conflict Risk—The fee paid to the Investment Manager for investment management services will be higher when the Fund uses Financial Leverage, whether through forward currency contracts or Borrowings, because the fee paid will be calculated on the basis of the Fund's assets including this Financial Leverage. Consequently, the Investment Manager may have a financial interest for the Fund to utilize such Financial Leverage, which may create a conflict of interest between the Investment Manager and the stockholders of the Fund.

The Fund has implemented procedures to monitor this potential conflict.

4. Administration Agreement

The Fund has entered into an administration agreement with State Street to provide certain administrative services. The Fund bears the cost of such services at a fixed annual rate of \$42,500, plus 0.02% of average daily net assets up to \$1 billion and 0.01% of average daily net assets over \$1 billion.

5. Directors' Compensation

Certain Directors of the Fund are officers of the Investment Manager. Each Director who is not an affiliated person of the Investment Manager or any of its affiliates is paid by the Fund, The Lazard Funds, Inc., Lazard Retirement Series, Inc. and Lazard World Dividend & Income Fund, Inc. (collectively with the Fund, the "Lazard Funds"), each a registered management investment company advised by the Investment Manager, and Lazard Alternative Emerging Markets 1099 Fund, a closed-end registered management investment company advised by an affiliate of the Investment Manager (the "1099 Fund"): (1) an annual

Lazard Global Total Return and Income Fund, Inc.

Notes to Financial Statements (continued)

June 30, 2015 (unaudited)

retainer of \$190,000, (2) an additional annual fee of \$20,000 to the lead Independent Director, and (3) an additional annual fee of \$10,000 to the Audit Committee Chair. The Directors also are reimbursed for travel and other out-of-pocket expenses for attending Board and committee meetings. The Directors do not receive benefits from the Fund pursuant to any pension, retirement or similar arrangement. The Statement of Operations shows the Directors' fees and expenses paid by the Fund.

6. Securities Transactions and Transactions with Affiliates

Purchases and sales of portfolio securities (excluding short-term investments) for the period ended June 30, 2015 were \$14,220,320 and \$10,063,156, respectively.

For the period ended June 30, 2015, no brokerage commissions were paid to affiliates of the Investment Manager or other affiliates of the Fund for portfolio transactions executed on behalf of the Fund.

7. Line of Credit

The Fund has a \$30 million Line of Credit Agreement (the "Agreement") with State Street primarily to borrow to invest Fund assets in Currency Investments. The Fund may borrow the lesser of \$30 million or 33 % of its Total Leveraged Assets. Interest on borrowings was payable: from January 1, 2015 to June 28, 2015, at the higher of the Federal Funds rate or Overnight LIBOR rate plus 0.75%, and from June 29, 2015 to June 30, 2015, at the higher of the Federal Funds rate or the reserve adjusted LIBOR rate plus 0.85%, on an annualized basis. Under the Agreement, the Fund has also agreed to pay a 0.15% per annum fee on the unused portion of the commitment (effective June 29, 2015, 0.25% per annum if the unused portion is equal to or exceeds 50% of the committed line amount), payable quarterly in arrears. During the period ended June 30, 2015, the Fund had borrowings under the Agreement as follows:

Average Daily Loan Balance*	Maximum Daily Loan Outstanding	Weighted Average Interest Rate
\$15,310,773	\$15,850,000	0.88%

* For the 181 days borrowings were outstanding.

Management believes that the fair value of the liabilities under the line of credit is equivalent to the recorded amount based on its short term maturity and interest rate, which fluctuates with LIBOR. The line of credit outstanding as of June 30, 2015 is categorized as Level 2 (see Note 10).

8. Investment Risks

(a) Non-US Securities Risk—The Fund invests in securities of foreign entities and in instruments denominated in foreign currencies which involve risks not typically associated

with investments in US securities. The Fund's performance will be influenced by political, social and economic factors affecting the non-US countries and companies in which the Fund invests. Non-US securities carry special risks, such as less developed or less efficient trading markets, political instability, a lack of company information, differing auditing and legal standards, and, potentially, less liquidity. In addition, investments denominated in currencies other than US dollars may experience a decline in value, in US dollar terms, due solely to fluctuations in currency exchange rates. The Fund's investments could be adversely affected by delays in, or a refusal to grant, repatriation of funds or conversion of emerging market currencies. Emerging market countries can generally have economic structures that are less diverse and mature, and political systems that are less stable, than those of developed countries. The economies of countries with emerging markets may be based predominantly on only a few industries, may be highly vulnerable to changes in local or global trade conditions, and may suffer from extreme debt burdens or volatile inflation rates. The securities markets of emerging market countries have historically been extremely volatile. These market conditions may continue or worsen. Investments in these countries may be subject to political, economic, legal, market and currency risks. The risks may include less protection of property rights and uncertain political and economic policies, the imposition of capital controls and/or foreign investment limitations by a country, nationalization of businesses and the imposition of sanctions by other countries, such as the US. Significant devaluation of emerging market currencies against the US dollar may occur subsequent to acquisition of investments denominated in emerging market currencies.

(b) Fixed-Income and Debt Securities Risk—The market value of a debt security may decline due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. The debt securities market can be susceptible to increases in volatility and decreases in liquidity. Prices of bonds and other debt securities tend to move inversely with changes in interest rates. Increases in volatility and decreases in liquidity may be caused by a rise in interest rates (or the expectation of a rise in interest rates). Interest rate risk is usually greater for fixed-income securities with longer maturities or durations.

The Fund's investments in lower-rated, higher-yielding securities ("junk bonds") are subject to greater credit risk than its higher rated investments. Credit risk is the risk that the issuer will not make interest or principal payments, or will not

Lazard Global Total Return and Income Fund, Inc.

Notes to Financial Statements (continued)

June 30, 2015 (unaudited)

make payments on a timely basis. Non-investment grade securities tend to be more volatile, less liquid and are considered speculative. If there is a decline, or perceived decline, in the credit quality of a debt security (or any guarantor of payment on such security), the security's value could fall, potentially lowering the Fund's share price. The prices of non-investment grade securities, unlike investment grade debt securities, may fluctuate unpredictably and not necessarily inversely with changes in interest rates. The market for these securities may be less liquid and therefore these securities may be harder to value or sell at an acceptable price, especially during times of market volatility or decline. Liquidity can decline unpredictably in response to overall economic conditions or credit tightening.

9. Contractual Obligations

The Fund enters into contracts in the normal course of business that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. Management has reviewed the Fund's existing contracts and expects the risk of loss to be remote.

10. Fair Value Measurements

Fair value is defined as the price that the Fund would receive to sell an asset, or would pay to transfer a liability, in an orderly transaction between market participants at the date of measurement. The Fair Value Measurements and Disclosures provisions of GAAP also establish a framework for measuring fair value, and a three-level hierarchy for fair value measurement that is based upon the transparency of inputs to the val-

uation of an asset or liability. Inputs may be observable or unobservable and refer, broadly, to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's own assumptions about the assumptions that market participants would use in pricing the asset or liability, developed based on the best information available in the circumstances. Each investment's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the overall fair value measurement. The three-level hierarchy of inputs is summarized below:

- Level 1—unadjusted quoted prices in active markets for identical investments
- Level 2—other significant observable inputs (including unadjusted quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

• Level 3—significant unobservable inputs (including the Fund’s own assumptions in determining the fair value of investments)

Changes in valuation technique may result in transfer into or out of the current assigned level within the hierarchy.

The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in these securities.

The following table summarizes the valuation of the Fund’s investments by each fair value hierarchy level as of June 30, 2015:

Description	Unadjusted	Significant		Balance as of June 30, 2015
	Quoted Prices in Active Markets for Identical Investments (Level 1)	Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Assets:				
Common Stocks*	\$ 163,676,002	\$—	\$ —	\$ 163,676,002
Foreign Government Obligations*	—	17,193,172	—	17,193,172
Short-Term Investment	3,990,665	—	—	3,990,665
Other Financial Instruments**				
Forward Currency Contracts	—	773,825	—	773,825
Total	\$ 167,666,667	\$ 17,966,997	\$ —	\$ 185,633,664
Liabilities:				
Other Financial Instruments**				
Forward Currency Contracts	\$—	\$(737,902)	\$ —	\$(737,902)

* Please refer to Portfolio of Investments (page 7 through 8) and Notes to Portfolio of Investments (page 12) for portfolio holdings by country and industry.

** Other financial instruments are derivative instruments which are valued at their respective unrealized appreciation/depreciation.

Lazard Global Total Return and Income Fund, Inc.

Notes to Financial Statements (continued)

June 30, 2015 (unaudited)

The Fund recognizes all transfers between levels as though they were transferred at the beginning of the reporting period. There were no transfers into or out of Levels 1, 2 or 3 during the period ended June 30, 2015.

For further information regarding security characteristics see Portfolio of Investments.

11. Derivative Instruments

The Fund may use derivative instruments, including forward currency contracts, to gain exposure to the local currency and interest rates of emerging markets or to hedge certain types of currency exposure.

During the period ended June 30, 2015, the notional amounts of purchases and sales of forward currency contracts were \$338,325,008 and \$337,775,321, respectively, with average notional exposure of approximately \$98,700,000.

The following table summarizes the fair value of derivative instruments on the Statement of Assets and Liabilities as of June 30, 2015:

	Fair Value
Asset Derivatives	
Foreign Exchange Risk:	
Gross unrealized appreciation on forward currency contracts	\$ 773,825
	Fair Value
Liability Derivatives	
Foreign Exchange Risk:	
Gross unrealized depreciation on forward currency contracts	\$ 737,902

The effect of derivative instruments on the Statement of Operations for the period ended June 30, 2015 was:

Amount

Realized Gain (Loss) on Derivatives Recognized
in Income

Foreign Exchange Risk:

Net realized loss on forward currency contracts \$(157,439)

Net Change in Unrealized Appreciation
(Depreciation) on Derivatives Recognized
in Income

Foreign Exchange Risk:

Net change in unrealized appreciation on forward currency contracts \$229,883

See Note 2(d) and the Portfolio of Investments for additional disclosures about derivative instruments.

As of June 30, 2015, the Fund holds derivative instruments that are eligible for offset in the Statement of Assets and Liabilities and are subject to master netting arrangements. A master netting arrangement is an agreement between two counterparties who have multiple contracts with each other that provides for the net settlement of all contracts, as well as any cash collateral, through a single payment in the event of default on, or termination of, any one contract.

The required information for the Fund is presented in the below table, as of June 30, 2015:

Description	Gross Amounts of Recognized Assets	Gross Amounts Offset in the Statement of Assets and Liabilities	Net Amounts of Assets Presented in
Forward Currency Contracts	\$773,825	\$ —	\$773,825

Proxy Voting Results

(unaudited)

The Annual Meeting of Stockholders was held on April 24, 2015, to vote on the following proposals. The proposals received the required number of votes of stockholders and were adopted.

Election of the following Directors:

• Two Class I Directors (Charles L. Carroll and Robert M. Solmson) each to serve for a three-year term expiring at the 2018 Annual Meeting and/or until his successor is duly elected and qualified;

• One Class III Director (Franci J. Blassberg) to serve for a two-year term expiring at the 2017 Annual Meeting and/or until her successor is duly elected and qualified; and

• One Class II Director (Trevor W. Morrison) to serve for a one-year term expiring at the 2016 Annual Meeting and/or until his successor is duly elected and qualified.

Director	For	Withhold Authority
Franci J. Blassberg	7,895,329	204,116
Charles L. Carroll	6,310,964	1,788,482
Trevor W. Morrison	7,887,215	212,230
Robert M. Solmson	6,491,949	1,607,496

Lazard Global Total Return and Income Fund, Inc.

Dividend Reinvestment Plan

(unaudited)

Unless you elect to receive distributions in cash (i.e., opt-out), all dividends, including any capital gain distributions, on your common stock will be automatically reinvested by Computershare, Inc., as dividend disbursing agent (the “Plan Agent”), in additional common stock under the Fund’s Dividend Reinvestment Plan (the “Plan”). You may elect not to participate in the Plan by contacting the Plan Agent. If you do not participate, you will receive all distributions in cash, paid by check mailed directly to you by the Plan Agent.

Under the Plan, the number of shares of common stock you will receive will be determined on the dividend or distribution payment date, as follows:

If the common stock is trading at or above net asset value at the time of valuation, the Fund will issue new shares at (1) a price equal to the greater of (i) net asset value per common share on that date or (ii) 95% of the common stock’s market price on that date.

If the common stock is trading below net asset value at the time of valuation, the Plan Agent will receive the dividend or distribution in cash and will purchase common stock in the open market, on the NYSE or elsewhere, for the participants’ accounts. It is possible that the market price for the common stock may increase before the Plan Agent has completed its purchases. Therefore, the average purchase price per share paid by the Plan Agent may (2) exceed the market price at the time of valuation, resulting in the purchase of fewer shares than if the dividend or distribution had been paid in common stock issued by the Fund. The Plan Agent will use all dividends and distributions received in cash to purchase common stock in the open market within 30 days of the valuation date. Interest will not be paid on any uninvested cash payments.

You may withdraw from the Plan at any time by giving written notice to the Plan Agent. If you withdraw or the Plan is terminated, you will receive whole shares in your account

under the Plan and you will receive a cash payment for any fraction of a share in your account. If you wish, the Plan Agent will sell your shares and send you the proceeds, minus an initial \$15 service fee plus \$0.12 per share being liquidated (for processing and brokerage expenses).

The Plan Agent maintains all stockholders’ accounts in the Plan and gives written confirmation of all transactions in the accounts, including information you may need for tax records. Shares of common stock in your account will be held by the Plan Agent in non-certificated form. Any proxy you receive will include all common stock you have received under the Plan.

There is no brokerage charge for reinvestment of your dividends or distributions in newly-issued shares of common stock. However, all participants will pay a pro rata share of brokerage commissions incurred by the Plan Agent when it makes open market purchases.

Automatically reinvesting dividends and distributions does not mean that you do not have to pay income taxes due upon receiving dividends and distributions.

If you hold your common stock with a brokerage firm that does not participate in the Plan, you will not be able to participate in the Plan and any dividend reinvestment may be effected on different terms than those described above. Consult your financial advisor for more information.

The Fund reserves the right to amend or terminate the Plan if, in the judgment of the Board, the change is warranted. There is no direct service charge to participants in the Plan (other than the service charge when you direct the Plan Agent to sell your common stock held in a dividend reinvestment account); however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants. Additional information about the Plan may be obtained from the Plan Agent at P.O. Box 30170, College Station, Texas 77842-3170.

Proxy Voting

A description of the policies and procedures used to determine how proxies relating to Fund portfolio securities are voted is available (1) without charge, upon request, by calling (800) 823-6300 or (2) on the SEC's website at <http://www.sec.gov>.

The Fund's proxy voting record for the most recent 12-month period ended June 30 is available (1) without charge, upon request, by calling (800) 823-6300 or (2) on the SEC's website at <http://www.sec.gov>. Information as of June 30 each year will generally be available by the following August 31.

Form N-Q

The Fund files a complete schedule of its portfolio holdings for the first and third quarters of its fiscal year with the SEC on Form N-Q. The Fund's Forms N-Q are available on the SEC's website at <http://www.sec.gov> and may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information on the operation of the SEC's Public Reference Room may be obtained by calling 1-800-SEC-0330.

Board Consideration of Management Agreement

At a meeting of the Board held on June 8-9, 2015, the Board considered the approval, for an additional annual period, of the Management Agreement between the Fund and the Investment Manager. The Independent Directors were assisted in their review by independent legal counsel and met with counsel in executive session separate from representatives of the Investment Manager.

Services Provided

Representatives of the Investment Manager discussed with the Board the Investment Manager's written presentation provided in advance of the meeting addressing, among other matters, the nature, extent and quality of services that the Investment Manager provides the Fund, including a discussion of the Investment Manager and its clients (of which the

Lazard Funds complex of 39 active funds comprises approximately \$30 billion, and the Fund and the other publicly-traded closed-end fund managed by the Investment Manager comprise approximately \$276 million (as of April 30, 2015), of the approximately \$180 billion of total assets under the management of the Investment Manager and its global affiliates as of March 31, 2015). The Investment Manager's representatives noted that the Investment Manager believes that the Fund continues to benefit significantly from the infrastructure and services provided by the Investment Manager's global investment management platform and technology, operational and

legal and compliance support. The Directors also considered information provided by the Investment Manager regarding its personnel, resources, financial condition and experience.

The Directors considered the various services provided by the Investment Manager including the Investment Manager's research and portfolio management capabilities and oversight of day-to-day operations, including supervision of fund accounting and administration-related services and assistance in meeting legal and regulatory requirements. The Directors also considered the Investment Manager's infrastructure and agreed that the Fund benefits from the services and infrastructure provided by the Investment Manager. The Directors accepted management's assertion that such services and infrastructure are greater than those typically provided to a \$30 billion fund complex not managed by a large, global firm such as the Investment Manager.

The Investment Manager representatives noted that the Investment Manager had historically provided certain administrative, operational and compliance assistance services in connection with the operation of the Fund, but that such services had been in addition to the investment advisory and other services that were contractually required by the Management Agreement currently in place. The Investment Manager representatives explained that the Management Agreement was proposed to be revised in order to include such services. The Investment Manager representatives reviewed the proposed revisions with the Directors and confirmed that no changes were proposed to the nature, extent or quality of services provided or to the Management Agreement's terms related to investment advisory services.

Comparative Management Fee, Expense Ratio and Performance Information

Management Fees and Expense Ratios. The Directors reviewed comparative management fee, expense ratio and performance (through March 31, 2015) information prepared by Strategic Insight, noting the limitations of the Strategic Insight comparison group (the "Group") as further discussed below, and broader Morningstar category (the "Category").

The Directors also discussed the actual and contractual management fees and expense ratios (leveraged and unleveraged) for the Fund. They noted the methodology and assumptions used by Strategic Insight, including that management fee comparisons and the rankings used therein include administrative fees (which are paid to the Fund's third party administrator that is not affiliated with the Investment Manager).

Lazard Global Total Return and Income Fund, Inc.

Other Information (continued)

June 30, 2015 (unaudited)

In reviewing Strategic Insight's analysis, it was noted that the contractual management fee and expense ratio were below the Group medians for common and managed assets. The Directors noted management's explanation regarding the lack of comparability of funds within the Group due to the Fund's unique strategy of achieving leverage through currency investments.

Performance. Strategic Insight's performance analyses compared the Fund's investment returns to those of the funds in the Group and Category over measurement periods up to ten years through March 31, 2015. Although year-to-date performance was provided by Strategic Insight, the Directors did not consider three-month performance to be relevant to their considerations and focused on longer-term performance.

The Directors noted that the Fund's total annualized return (based on net asset value) was below the Group and Category medians for all periods ended March 31, 2015 (and generally was in the fourth quartile of the Group), except for the ten-year period when its performance was the best of two funds in the Category. The Directors, however, noted that no funds in the Group or Category pursued a strategy similar to that of the Fund's strategy of investing in global equity securities and in emerging markets currencies primarily through forward currency contracts and debt obligations denominated in emerging markets currencies. They also were advised that the Investment Manager did not manage any funds, separate accounts or other accounts with investment objectives, policies and strategies similar to those of the Fund.

Fee Calculation

The Board considered that the method of calculating management fees is based on the Fund's Total Leveraged Assets, pursuant to which the management fee borne by stockholders will increase to the extent the Investment Manager makes Currency Investments by incurring Financial Leverage rather than reducing the percentage of Net Assets invested in Global Equity Investments for the purposes of making Currency Investments, and considered the potential advantages of increased investment exposure through Financial Leverage. The Board considered the economic equivalence, and the similarities, from an investment management perspective, of Currency Investments (1) made with Currency Commitments and (2) made with the proceeds of Borrowings.

The Board considered that (1) this method of calculating management fees is different than the way closed-end investment companies typically calculate management fees, (2) traditionally closed-end funds calculate management fees based on Net Assets plus Borrowings (excluding

Financial Leverage obtained through Currency Commitments) and (3) the Investment Manager's fee would be lower if its fee were calculated only on Net Assets plus Borrowings, because the Investment Manager would not earn fees on

Currency Investments made with Currency Commitments (forward currency contracts or other derivative instruments whose value is derived from the performance of an underlying emerging market currency). The Board considered that the Investment Manager's fee is different because the Fund's leverage strategy is different than the strategy employed by many other leveraged closed-end investment companies—that although the Fund may employ Borrowings in making Currency Investments, the Fund's leverage strategy relies primarily on Currency Commitments rather than relying exclusively on borrowing money and/or issuing preferred stock. The Board considered the Fund's use of Currency Commitments for leverage (rather than relying exclusively on borrowing money and/or issuing preferred stock) and the Investment Manager's belief that forward currency contracts, or other derivative instruments whose value is derived from the performance of an underlying emerging market currency, often offer a more attractive way to gain exposure to emerging market interest rate opportunities and currencies than investments in debt obligations and the fact that there might not be a viable debt market in certain emerging market countries. The Board also considered the Investment Manager's view that foreign currency contracts present less counterparty and custody risks and the Investment Manager's extensive expertise with these instruments, as discussed in detail in previous Board meetings.

Procedures adopted by the Investment Manager to evaluate possible conflicts of interest that may arise from the fee calculation methodology, include the following: (1) no less frequently than monthly, decisions regarding the amount of the Fund's allocation to Currency Investments must be reviewed by a Managing Director of the Investment Manager not involved in the decision-making process and the Fund's Chief Compliance Officer, and that such review be documented to include the basis therefor, documentation to be retained for six years, the first two years in an easily accessible place, (2) the Investment Manager must provide the Board with a quarterly report regarding these decisions and the reasons therefor and (3) the Investment Manager must deliver a quarterly certification to the Board, signed by a Managing Director of the Investment Manager and the Fund's or the Investment Manager's Chief Compliance Officer (as applicable), that the procedures had been complied with during the previous quarter. The Investment Manager's representatives stated that such pro-

Lazard Global Total Return and Income Fund, Inc.

Other Information (concluded)

June 30, 2015 (unaudited)

cedures had been followed and that the Investment Manager would continue to follow those procedures.

Investment Manager Profitability and Economies of Scale

The Directors reviewed information prepared by the Investment Manager concerning profits realized by the Investment Manager and its affiliates resulting from the Management Agreement, calculated using the actual revenues received for the calendar year ended December 31, 2014 and the Investment Manager's cost allocation methodology to compute an estimate of the Fund's costs to the Investment Manager. The Investment Manager's representatives stated that neither the Investment Manager nor its affiliates receive any significant indirect benefits from the Investment Manager acting as investment adviser to the Fund. The Investment Manager's representatives reviewed with the Board information provided on the Investment Manager's brokerage practices and the Fund's brokerage allocation, commission payments and soft dollar commissions and benefits.

The profitability percentages were within ranges determined by relevant court cases not to be so disproportionately large that they bore no reasonable relationship to the services rendered. Representatives of the Investment Manager stated that the Investment Manager believed the profits are not unreasonable in light of the services provided and other factors. The Directors considered the Investment Manager's estimated profitability with respect to the Fund as part of their evaluation of whether the Fund's fee under the Management Agreement bears a reasonable relationship to the mix of services provided by the Investment Manager, including the nature, extent and quality of such services, and evaluated profitability in light of the relevant circumstances for the Fund. It was noted that, because the Fund is a closed-end fund without daily

inflows and outflows of capital, there were not at this time significant economies of scale to be realized by the Investment Manager in managing the Fund's assets.

At the conclusion of these discussions, each of the Directors expressed the opinion that he or she had been furnished with such information as may reasonably be necessary to make an informed business decision with respect to evaluation of the renewal of the Management Agreement. Based on its discussions and considerations as described above, the Board made the following conclusions and determinations.

- The Board concluded that the nature, extent and quality of the services provided by the Investment Manager are adequate and appropriate, noting the benefits of advisory and research services and other services and infrastructure (as discussed above) associated with an approximately \$180 billion global asset management business.
- The Board was generally satisfied with the Fund's overall performance, in light of the considerations described above.

• The Board concluded that the Fund's fee paid to the Investment Manager was reasonable in light of the considerations discussed above.

The Board determined that because the Fund is a closed-end fund without daily inflows and outflows of capital the
• Fund's fee schedule is reasonable in light of current economies of scale considerations and that there were not at this time significant economies of scale to be realized by the Investment Manager.

The Board considered these conclusions and determinations in their totality and determined to approve the Management Agreement.
