Gold and Precious Metals Limited

Letter to Shareholders

During the six-month fiscal period ended May 31, 2018, the gold price increased 1.6%, outperforming most gold mining equities. We believe the gold price generally found support from investors seeking to hedge the U.S. dollar, inflation, or political risk. These investors appeared to be averse to the additional risk associated with mining equities, which may have contributed to the underperformance of the mining equities. The lack of investment demand for mining shares during the first half of this year left companies trading at a discount to historic valuation multiples. With many of these companies beginning to demonstrate notable improvements in lowering costs, increasing dividends and better capital discipline, investors may begin to recognize their value. During the remainder of 2018 we believe this disconnect between the performance of the gold mining equities and the gold price will begin to correct.

ASA Gold and Precious Metals Limited (“ASA” or the “Company”) reported a net asset value (“NAV”) of \$12.11 per share at May 31, 2018, for a six-month total return of negative 4.1% versus a total return of negative 1.1% for the FTSE Gold Mines Total Return Index (the “FTGMI”). ASA’s overweight positions in some smaller developers and royalty companies combined with its underweight exposure to Australian gold miners accounted for the underperformance during the period. The ASA share price closed at \$10.40, a total return of negative 5.7% for the six-month period ending May 31, 2018.

The discount at which ASA’s shares traded in the market ended the first half of fiscal 2018 at 14.1%, an increase from 12.7% at the beginning of the fiscal year. During this period, the discount averaged 13.4% and reached a high of 14.4% and a low of 12.6%. The Board of Directors (the “Board”) monitors the Company’s share price and discount to NAV per share on an ongoing basis and has, in the past, authorized tender offers and created a Share Repurchase Program. The Board does not believe that either a tender offer or share repurchases would benefit shareholders, or accomplish a meaningful narrowing of the discount at this time.

During the last six months, ASA distributed \$0.02 per share to shareholders, the same distribution as during the first six months of 2017.

Industry Trends

Numerous factors influence investment demand for gold, including political unrest, interest rates, fluctuations in the U.S. dollar and concerns about world economic stability. We believe fluctuation of the U.S. dollar was a dominant influence on the investment demand for gold bullion at the beginning of 2018. U.S. dollar strength, on the back of positive U.S. economic news and record low levels of unemployment, pushed the U.S. dollar higher in January 2018, but concerns about a trade war and political unrest with other nations caused the U.S. dollar to trade flat to down from

February through May of 2018. The inverse correlation of the gold price to the U.S. dollar was highly evident during the first half of 2018 as movements in the gold price largely mirrored shifts in the U.S. dollar as illustrated in Chart 1 below.

1

For the remainder of 2018 we anticipate that the inverse relationship between gold and the U.S. dollar will continue due to ongoing market concerns regarding tariffs, protectionist policies, and political instability in the world. We believe this high correlation also suggests that gold remains a relevant and popular investment vehicle for investors navigating the current markets. Investors around the world may continue to look to gold to offset currency risk in their native countries and to diversify their holdings.

Gold mining equities have underperformed the gold price in the first half of 2018. We believe that investors looking for safe haven investments, particularly those in Europe and Asia, have preferred bullion over mining companies as they have been looking to offset currency risk. We have seen this trend in the past and believe that it is temporary as the discounted valuation of equities, and higher return potential, should attract investors. We expect that those companies making prudent investments and continuing to reduce costs will be the primary beneficiaries when investor interest shifts.

Portfolio Changes

Two new positions were added to the portfolio during the first half of 2018, IAMGOLD Corp. and Golden Star Resources Ltd. ASA previously invested in both of these companies and has chosen to reinvest as future prospects, management and/or balance sheets are substantially improved.

IAMGOLD operates gold mines on three different continents, making it geographically diversified. The company maintains one of the strongest balance sheets in the industry, which should allow management to develop the new Saramacca discovery in Suriname with minimum financing risk. Management of IAMGOLD has shown discipline in its recent investments and delivered positive free cash flow from its operations, which we anticipate will continue.

Golden Star has two assets in Ghana. While the projects have been in operation for years, recent changes in the mining methods employed at both assets have improved the outlook of these mines. Management of Golden Star is now focused on higher grade, lower volume and more profitable production from its underground mines. Over the next year, we anticipate Golden Star will ramp up the projects and start to add cash to its balance sheet, which we expect will support a higher market valuation.

During the first half of fiscal 2018, ASA reduced its investment in Randgold Resources Limited and Guyana Goldfields Inc. and sold entirely the position in Eldorado Gold Corporation. Generally, there are three primary reasons ASA sells assets: a company is trading at an excessive valuation, ASA has become overweight an investment and desires to rebalance, or there has been a fundamental change in the company that no longer supports the investment thesis.

ASA's sales of Randgold Resources and Guyana Goldfields resulted from our significant overweight position in these issuers, combined with each company's relatively rich valuation. ASA's investment in Eldorado Gold was sold during the first half of this year due to a change in investment outlook. Eldorado has been experiencing significant delays with its development projects in Greece as well as operating problems at their primary asset in Turkey.

Management appreciates the continued support of the Board of Directors and our shareholders. Forward-Looking Statements

This shareholder letter includes forward-looking statements, which involve known and unknown risks, uncertainties and other factors that may cause the actual results, levels of activity, performance or achievements of the Company, or industry results, to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. The Company's actual performance or results may differ from its beliefs, expectations, estimates, goals and projections, and consequently, investors should not rely on these forward-looking statements as predictions of future events. Forward-looking statements are not historical in nature and generally can be identified by words such as "believe," "anticipate," "estimate," "expect," "intend," "should," "may," "will," "could," "may," "might," "intend," "could," "may," "will," "could," or their negative forms, or by references to strategy, plans, goals or intentions. The absence of these words or references does not mean that the statements are not forward-looking. The Company's performance or results can fluctuate from month to month depending on a variety of factors, a number of which are beyond the Company's control and/or are difficult to predict, including without limitation: the Company's investment decisions, the performance of the securities in its investment portfolio, economic, political, market and financial factors, and the prices of gold, platinum and other precious minerals that may fluctuate substantially over short periods of time. The Company may or may not revise, correct or update the forward-looking statements as a result of new information, future events or otherwise.

The Company concentrates its investments in the gold and precious minerals sector. This sector may be more volatile than other industries and may be affected by movements in commodity prices triggered by international monetary and political developments. The Company is a non-diversified fund and, as such, may invest in fewer investments than that of a diversified portfolio. The Company may invest in smaller-sized companies that may be more volatile and less liquid than larger more established companies. Investments in foreign securities, especially those in the emerging markets, may involve increased risk as well as exposure to currency fluctuations. Shares of closed-end funds frequently trade at a discount to net asset value. All performance information reflects past performance and is presented on a total return basis. Past performance is no guarantee of future results. Current performance may differ from the performance shown.

This shareholder letter does not constitute an offer to sell or solicitation of an offer to buy any securities.

The performance data quoted represent past performance and do not indicate future results. Current performance may be lower or higher than the performance data quoted. For more current performance data, please visit <http://www.asaltd.com/investor-information/factsheets>.

The results shown in the table reflect the reinvestment of income dividends and other distributions, if any. The results do not reflect the effect of taxes a shareholder would pay on Company distributions or on the sale of the Company's common shares.

The investment return and market price will fluctuate and the Company's common shares may trade at prices above or below NAV. The Company's common shares, when sold, may be worth more or less than their original cost.

The FTSE Gold Mines Total Return Index encompasses all gold mining companies that have a sustainable, attributable gold production of at least 300,000 ounces a year and that derive 51% or more of their revenue from mined gold. Please note that the Index is unmanaged, and does not take into account any fees and expenses or any tax consequences of investing in the individual securities that it tracks and one cannot invest directly in the index. (1) The Company does not attempt to replicate the index. The index generally does not reflect investments in other precious metals companies (e.g., silver, platinum, and diamonds) in which the Company invests. Data about the performance of this index are prepared or obtained by Management and include reinvestment of all income dividends and other distributions, if any. The Fund may invest in securities not included in the index and generally does not invest in all securities included in the index.

Certain Investment Policies and Restrictions

The following is a summary of certain of the Company's investment policies and restrictions and is subject to the more complete statements contained in documents filed with the Securities and Exchange Commission.

The concentration of investments in a particular industry or group of industries. It is a fundamental policy (i.e., a policy that may be changed only by shareholder vote) of the Company that at least 80% of its total assets be (i) invested in common shares or securities convertible into common shares of companies engaged, directly or indirectly, in the exploration, mining or processing of gold, silver, platinum, diamonds or other precious minerals, (ii) held as bullion or other direct forms of gold, silver, platinum or other precious minerals, (iii) invested in instruments representing interests in gold, silver, platinum or other precious minerals such as certificates of deposit therefor, and/or (iv) invested in securities of investment companies, including exchange traded funds, or other securities that seek to replicate the price movement of gold, silver or platinum bullion. Compliance with the percentage limitation relating to the concentration of the Company's investments will be measured at the time of investment. If investment opportunities deemed by the Company to be attractive are not available in the types of securities referred to in the preceding paragraph, the Company may deviate from the investment policy outlined in that paragraph and make temporary investments of unlimited amounts in securities issued by the U.S. Government, its agencies or instrumentalities or other high quality money market instruments.

The percentage of voting securities of any one issuer that the company may acquire. It is a non-fundamental policy (i.e., a policy that may be changed by the Board of Directors) of the Company that the Company shall not purchase a security if, at the time of purchase, more than 20% of the value of its total assets would be invested in securities of the issuer of such security.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of ASA Gold and Precious Metals Limited

Results of Review of Interim Financial Information

We have reviewed the statements of assets and liabilities of ASA Gold and Precious Metals Limited (the "Company"), including the schedules of investments, as of May 31, 2018 and May 31, 2017, and the related statements of operations for the six month periods ended May 31, 2018 and May 31, 2017, the statement of changes in net assets for the six month period ended May 31, 2018, the financial highlights for the six month periods ended May 31, 2018 and May 31, 2017, and the related notes (collectively referred to as the interim financial statements). Based on our

reviews, we are not aware of any material modifications that should be made to the accompanying interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the statement of changes in net assets for the year ended November 30, 2017 and the financial highlights for each year in the five year period ended November 30, 2017; and in our report dated January 18, 2018, we expressed an unqualified opinion on those financial statements and financial highlights.

Basis for Review Results

These interim financial statements are the responsibility of the Company's management. We conducted our review in accordance with the standards of the PCAOB. A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with standards of the PCAOB, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

Notes to Financial Statements (Unaudited)

Six months ended May 31, 2018 and May 31, 2017

1. Organization

ASA Gold and Precious Metals Limited (the “Company”) is a closed-end investment company registered under the Investment Company Act of 1940, as amended (the “1940 Act”), and was organized as an exempted limited liability company under the laws of Bermuda.

2. Investment objective and strategy

The Company is a non-diversified, closed-end, internally managed fund that seeks long-term capital appreciation primarily through investing in companies engaged in the exploration for, development of projects or mining of precious metals and minerals.

It is a fundamental policy of the Company that at least 80% of its total assets must be (i) invested in common shares or securities convertible into common shares of companies engaged, directly or indirectly, in the exploration, mining or processing of gold, silver, platinum, diamonds or other precious minerals, (ii) held as bullion or other direct forms of gold, silver, platinum or other precious minerals, (iii) invested in instruments representing interests in gold, silver, platinum or other precious minerals such as certificates of deposit therefor, and/or (iv) invested in securities of investment companies, including exchange traded funds, or other securities that seek to replicate the price movement of gold, silver or platinum bullion.

The Company employs bottom-up fundamental analysis and relies on detailed primary research including meetings with company executives, site visits to key operating assets, and proprietary financial analysis in making its investment decisions.

3. Summary of significant accounting policies

The following is a summary of the significant accounting policies:

A. Security valuation

The net asset value of the Company generally is determined as of the close of regular trading on the New York Stock Exchange (the “NYSE”) or the Toronto Stock Exchange (the “TSX”), whichever is later, on the date for which the valuation is being made (the “Valuation Time”). Portfolio securities listed on U.S. and foreign stock exchanges generally are valued at the last reported sale price as of the Valuation Time on the exchange on which the securities are primarily traded, or the last reported bid price if a sale price is not available. Securities traded over the counter are valued at the last reported sale price or the last reported bid price if a sale price is not available. Securities listed on foreign stock exchanges may be fair valued based on significant events that have occurred subsequent to the close of the foreign markets.

Securities for which current market quotations are not readily available are valued at their fair value as determined in good faith by, or in accordance with procedures approved by, the Company’s Board of Directors. If a security is valued at a “fair value,” that value may be different from the last quoted price for the security. Various factors may be reviewed in order to make a good faith determination of a security’s fair value. These factors include, but are not limited to, the nature of the security; relevant financial or business developments of the issuer; actively traded similar or related securities; conversion rights on the security; and changes in overall market conditions.

Where the Company holds securities listed on foreign stock exchanges and American Depositary Receipts (“ADRs”) representing these securities are actively traded in U.S. markets, the securities normally are fair valued based on the last reported sales price of the ADRs.

Notes to Financial Statements (Unaudited) (Continued)

Six months ended May 31, 2018 and May 31, 2017

The difference between cost and market value is reflected separately as net unrealized appreciation (depreciation) on investments. The net realized gain or loss from the sale of securities is determined for accounting purposes on the identified cost basis.

B. Restricted securities

At May 31, 2018 and May 31, 2017, the Company held investments in restricted securities of 5.64% and 5.72% of net assets, respectively, valued in accordance with procedures approved by the Company's Board of Directors as follows:

C. Fair value measurement

In accordance with U.S. GAAP, fair value is defined as the price that the Company would receive to sell an investment or pay to transfer a liability in a timely transaction with an independent buyer in the principal market, or in the absence of a principal market the most advantageous market for the investment or liability. U.S. GAAP establishes a three-tier hierarchy to distinguish between (1) inputs that reflect the assumptions market participants would use in pricing an asset or liability developed based on market data obtained from sources independent of the reporting entity (observable inputs) and (2) inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing an asset or liability developed based on the best information available in the circumstances (unobservable inputs) and to establish classification of fair value measurements for disclosure purposes. Various inputs are used in determining the value of the Company's investments. The inputs are summarized in the three broad levels listed below.

- Level 1 –unadjusted quoted prices in active markets for assets or liabilities that the Company has the ability to access. observable inputs other than quoted prices included in level 1 that are observable for the asset or liability either directly or indirectly. These inputs may include quoted prices for identical instruments on an inactive market, prices for similar investments, interest rates, prepayment speeds, credit risk, yield curves, default rates, and similar data.
- Level 2 –unobservable inputs for the assets or liability to the extent that relevant observable inputs are not available,
- Level 3 –representing the Company's own assumptions about the assumptions that a market participant would use in valuing the asset or liability, and that would be based on the best information available.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

D. Foreign Currency Translation

Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollar amounts at the rate of exchange reported one hour after the Valuation Time. Purchases and sales of investment securities and income and expense items denominated in foreign currencies are translated into U.S. dollar amounts on the respective dates of such transactions. The Company separately reports the effect of changes in foreign exchange rates from changes in market prices of securities held. The resulting net foreign currency gain or loss is included on the Statements of Operations. Realized foreign currency gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, fluctuation in exchange rates between the initial purchase date and subsequent sale date on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Company's books and the U.S. dollar equivalent of the amounts actually received or paid.

E. Securities Transactions and Investment Income

During the six months ended May 31, 2018, sales and purchases of portfolio securities (other than temporary short-term investments) amounted to \$3,846,208 and \$3,985,831, respectively. During the six months ended May 31, 2017, sales and purchases of portfolio securities (other than temporary short-term investments) amounted to \$21,239,525 and \$18,711,966, respectively.

Dividend income is recorded on the ex-dividend date, net of withholding taxes or ADR fees, if any. Interest income is recognized on the accrual basis.

F. Dividends to Shareholders

Dividends to shareholders are recorded on the ex-dividend date. The reporting for financial statement purposes of dividends paid from net investment income and/or net realized gains may differ from their ultimate reporting for U.S. federal income tax purposes, primarily because of the separate line item reporting for financial statement purposes of foreign exchange gains or losses.

G. Use of Estimates

The preparation of the financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates. It is management's opinion that all adjustments necessary for a fair statement of the

results of the interim periods presented have been made. All adjustments are of a normal recurring nature.

H. Basis of Presentation

The financial statements are presented in U.S. dollars.

I. Income Taxes

In accordance with U.S. GAAP requirements regarding accounting for uncertainties on income taxes, management has analyzed the Company's tax positions taken on federal and state income tax returns, as applicable, for all open tax years (2014 - 2017). As of May 31, 2018 and May 31, 2017, the Company has not recorded any unrecognized tax benefits. The Company's policy, if it had unrecognized benefits, is to recognize accrued interest and penalties in operating expenses.

4. Tax status of the Company

The Company is a "passive foreign investment company" ("PFIC") for the U.S. federal income tax purposes and is not subject to Bermuda tax as an exempted limited liability company organized under the laws of Bermuda. Nor is the Company generally subject to U.S. federal income tax, since it is a non-U.S.

Notes to Financial Statements (Unaudited) (Continued)

Six months ended May 31, 2018 and May 31, 2017

corporation whose only business activity in the United States is trading in stocks or securities for its own account; under the U.S. federal tax law that activity does not constitute engaging in the conduct of a trade or business within the United States, even if its principal office is located therein. As a result, its gross income is not subject to U.S. federal income tax, though certain types of income it earns from U.S. sources (such as dividends of U.S. payors) are subject to U.S. federal withholding tax.

5. Exemptive order

The Company is a closed-end investment company and operates pursuant to an exemptive order issued by the Securities and Exchange Commission (the “SEC”) pursuant to Section 7(d) of the 1940 Act (the “Order”). The Order is conditioned upon, among other things, the Company complying with certain requirements relating to the custody of assets and settlement of securities transactions outside of the United States different than those required of other registered investment companies. These conditions make it more difficult for the Company to implement a flexible investment strategy and to fully achieve its desired portfolio diversification than if it were not subject to such requirements.

6. Retirement plans

The Company has recorded a liability for retirement benefits due to retired directors and one current director upon retirement. The liability for these benefits at May 31, 2018 and May 31, 2017 was \$433,679 and \$509,695, respectively. A director whose first election to the Board of Directors was prior to January 1, 2008 qualifies to receive retirement benefits if he has served the Company (and any of its predecessors) for at least twelve years prior to retirement. Directors first elected on or after January 1, 2008 are not eligible to participate in the plan.

7. Concentration risk

The Company invests at least 80% of its total assets in securities of companies engaged, directly or indirectly, in the exploration, mining or processing of gold or other precious minerals. The Company also invests a substantial portion of its assets in companies that are domiciled and/or have operations outside of the United States, including emerging market countries, such as South Africa. The Company is, therefore, subject to gold and precious metals-related risk as well as risk related to investing in foreign securities, including political, economic, regulatory, liquidity, currency

fluctuation, and foreign exchange risks. The Company currently is invested in a limited number of securities and thus holds large positions in certain securities. Because the Company's investments are concentrated in a limited number of securities of companies involved in the holding or mining of gold and other precious minerals and related activities, the net asset value of the Company may be subject to greater volatility than that of a more broadly diversified investment company.

8. Indemnifications

In the ordinary course of business, the Company enters into contracts that contain a variety of indemnification provisions. The Company's maximum exposure under these arrangements is unknown.

9. Compensation matters

For the six months ended May 31, 2018 and May 31, 2017, the aggregate remuneration paid to the Company's officers was \$1,015,792 and \$1,043,892, respectively. In addition, \$341,000 and \$350,000, respectively was accrued for bonuses to the Company's officers and employees. The accrued bonuses are reflected in the "Accrued affiliated expenses" on the Statements of Assets and Liabilities. The aggregate remuneration paid to the Company's directors was \$104,000 and \$104,000, respectively.

Notes to Financial Statements (Unaudited) (Continued)

Six months ended May 31, 2018 and May 31, 2017

10. Operating lease commitment

In June 2017, the Company entered into a three-year operating lease agreement, commencing March 1, 2018, in San Mateo, CA for approximately 2,500 square feet to be used as office space for its employees. The lease provides for future minimum rental payments in the aggregate amount of \$582,312 as of May 31, 2018. The lease contains escalation clauses relating to the tenant's share of insurance, operating expenses and tax expenses of the lessor.

Future minimum rental commitments under the lease are as follows:

06/01/2018 - 11/30/2018	\$102,530
12/01/2018 - 11/30/2019	209,584
12/01/2019 - 11/30/2020	215,842
12/01/2020 - 02/28/2021	54,356
Total	\$582,312

11. Share repurchase

The Company may from time to time purchase its common shares at a discount to NAV on the open market in such amounts and at such prices as the Company may deem advisable.

The Company had 19,289,905 shares outstanding as of May 31, 2018 and May 31, 2017. There were no repurchases during the six months ended May 31, 2018 and May 31, 2017.

12. Subsequent events

In accordance with U.S. GAAP provisions, management has evaluated the possibility of subsequent events existing in the Company's financial statements through the date the financial statements were issued. The Company believes that there are no material events that would require disclosure.

Certain Tax Information for U.S. Shareholders

The Company is a “passive foreign investment company” (“PFIC”) for U.S. federal income tax purposes. In view of this, U.S. investors holding common shares in taxable accounts are strongly urged to review the important tax information regarding the consequences of an investment in the common shares of the Company, which may be found at www.asaltd.com under “Investor

Information | Taxpayer Information - PFIC”. **Due to the complexity and potentially adverse effect of the applicable tax rules, U.S. shareholders are strongly urged to consult their own tax advisors concerning the impact of these rules on their investment in the Company and on their individual situations, and any additional informational filing requirements.**

Dividend Reinvestment and Direct Stock Purchase Plan

Computershare Trust Company, N.A. (“Computershare”) has been authorized by the Company to offer and administer the Computershare Investment Plan, a dividend reinvestment and stock purchase plan (“CIP”) to shareholders as well as new investors or non-shareholders. Shareholders and new investors may elect to participate in the CIP by signing an enrollment form or by going to www.computershare.com/investor and following the instructions. New investors or non-shareholders must include a minimum initial investment of at least \$500. Computershare as agent will apply to the purchase of common shares of the Company in the open market (i) all cash dividends (after deduction of the service charge described below) that become payable to such participant on the Company’s shares (including shares registered in his or her name and shares accumulated under the CIP) and (ii) any optional cash purchases (\$50 minimum, subject to an annual maximum of \$250,000) received from such participant.

Computershare may combine CIP participant purchase requests with other purchase requests received from other CIP participants and may submit the combined purchase requests in bulk to Computershare’s broker as a single purchase order. Purchase requests may be combined, at Computershare’s discretion, according to one or more factors such as purchase type (e.g., dividend reinvestment, one-time ACH, check, etc.), request date, or request delivery method (e.g., online, regular mail, etc.). Computershare will submit bulk purchase orders to its broker as and when required under the terms of the CIP. Computershare’s broker

may execute each bulk purchase order in one or more transactions over one or more days, depending on market conditions. Each participant whose purchase request is included in each bulk purchase order will receive the weighted average market price of all shares purchased by Computershare’s broker for such order. Any stock dividends or split shares distributed on shares held in the CIP will be credited to the participant’s account.

A one-time \$10 enrollment fee to establish a new account for a new investor or non-shareholder will be deducted from the purchase amount. For each participant, each dividend reinvestment will entail a transaction fee of 5% of the

amount reinvested, up to a maximum of \$3 plus \$0.03 per share purchased. Each optional cash purchase by check or one-time online bank debit will entail a transaction fee of \$5 plus \$0.03 per share purchased. If a participant has funds automatically deducted monthly from his or her savings or checking account, for each debit the transaction fee is \$2.50 plus \$0.03 per share purchased. Fees will be deducted from the purchase amount. Each batch order sale will entail a transaction fee of \$15 plus \$0.12 per share sold. Each market order sale will entail a transaction fee of \$25 plus \$0.12 per share sold. Fees are deducted from the proceeds derived from the sale. All per share fees include any brokerage commissions Computershare is required to pay. Any fractional share will be rounded up to a whole share for purposes of calculating the per share fee. Additional fees are charged by Computershare for specific shareholder requests such as copies of account statements for prior years (\$10 per year

Dividend Reinvestment and Direct Stock Purchase Plan (continued)

requested) and a returned check and ACH reject fee of \$25.

Participation in the CIP may be terminated by a participant at any time by written, telephone or Internet instructions to Computershare. Upon termination, a participant will receive a certificate for the whole number of shares credited to his or her account, unless he or she requests the sale of all or part of such shares. Dividends reinvested by a shareholder under the CIP will generally be treated for U.S. federal income tax purposes in the same manner as dividends paid to such shareholder in cash. See “Certain Tax Information for U.S. Shareholders” for more information regarding tax consequences of an investment in shares of the Company, including the effect of the

Company’s status as a PFIC. The amount of the service charge is deductible for U.S. federal income tax purposes, subject to limitations.

To participate in the CIP, shareholders may not hold their shares in a “street name” brokerage account.

Additional information regarding the CIP may be obtained from Computershare, P.O. Box 505000, Louisville, KY 40233-5000. Information may also be obtained on the Internet at www.computershare.com/investor or by calling Computershare’s Telephone Response Center at (800) 317-4445 between 9:00 a.m. and 5:00 p.m., Eastern time, Monday through Friday.

Privacy Notice

The Company is committed to protecting the financial privacy of its shareholders.

We do not share any nonpublic, personal information that we may collect about shareholders with anyone, including our affiliates, except to service and administer shareholders’ share accounts, to process transactions, to comply with shareholders’ requests of legal requirements or for other limited purposes permitted by law. For example, the Company may disclose a shareholder’s name, address, social security number and the number of shares owned to its administrator, transfer agent or other service providers in order to provide the shareholder with

proxy statements, tax reporting forms, annual reports or other information about the Company. This policy applies to all of the Company’s shareholders and former shareholders.

We keep nonpublic personal information in a secure environment. We restrict access to nonpublic personal information to Company employees, agents and service providers who have a need to know the information based on their role in servicing or administering shareholders' accounts. The Company also maintains physical, electronic and procedural safeguards to protect the confidentiality of nonpublic personal information.
