11

REASONS FOR ENTERING INTO THE TRANSACTIONS

The Company is one of Asia's leading integrated communications companies and provides key services in the areas of: integrated telecommunications; broadband solutions; connectivity; narrowband and interactive broadband (Internet services); business e-solutions; data centers and related infrastructure.

Unihub was established primarily to provide solutions and services in relation to the management of information systems and application solutions in China. A major part of Unihub's business plan is the development, production and sale of information technology, systems and products that support the provision of a variety of telecommunications services within China and the transactions described above are consistent with this objective. In addition, the transactions will provide revenue sources for Unihub. It is anticipated that the transactions will also strengthen Unihub's position as a provider of the relevant services in China.

CTB's business involves the provision of integrated telecommunications services within the Beijing area. JTCL is a provincial telecommunications services provider in the Jiangsu Province of China and it intends to upgrade its provincial network to provide MPLS VPN services.

The directors of the Company (including the independent non-executive directors) believe that it is in the interests of the Company for Unihub to provide the abovementioned services and it is therefore beneficial for the parties to enter into the agreements described above. The terms of the above transactions (including the consideration) have been negotiated on an arm's length basis and on terms no less favourable than those available to or from independent third parties. The directors of the Company (including the independent non-executive directors) believe that such terms are fair and reasonable so far as the shareholders of the Company are concerned.
