Independent auditors' report on the review of interim financial information

To
The Board of Directors and Shareholders
Ultrapar Participações S.A.
São Paulo – SP

We have reviewed the individual and consolidated interim financial information of Ultrapar Participações S.A. (the Company), included in the Quarterly Financial Information - ITR of the Company for the quarter ended June 30, 2011, comprising the balance sheet as of June 30, 2011 and the respective statements of income and other comprehensive income for the three-month and six-month periods then ended, and changes in shareholders equity and cash flows for the six-month period then ended, including the summary of significant accounting policies and other explanatory information.

Management is responsible for the preparation and fair presentation of these individual interim financial information in accordance with Committee for Accounting Pronouncement CPC 21 – Interim Financial Information and of the consolidated interim financial information in accordance with CPC 21 and the international standard IAS 34 – Interim Financial Reporting, as issued by the International Accounting Standards Board (IASB), as well as the presentation of these information consistent with rules issued by the Brazilian Securities and Exchange Commission (CVM), which are applicable to the preparation of the Quarterly Financial Information. Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of Review

We conducted our review in accordance with Brazilian and International review standards of interim financial information (NBC TR 2410 - Review of Interim Financial Information Performed by the Auditor of the Entity and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with standards on auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might have been identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the individual Quarterly Financial Information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual interim financial information included in the Quarterly Financial Information described above, were not prepared, in all material respects, in accordance with CPC 21 applicable to the preparation of the Quarterly Financial Information and presented in a manner consistent with the rules of the Brazilian Securities and Exchange Commission (CVM).

Conclusion on the consolidated Quarterly Financial Information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying consolidated interim financial information included in the Quarterly Financial Information described above were not prepared, in all material respects, in accordance with CPC 21 and IAS 34 applicable to the preparation of the Quarterly Financial Information and presented in a manner consistent with the rules issued by the Brazilian Securities and Exchange Commission (CVM).

Other matters

Statement of value added

We also reviewed the individual and consolidated interim information included in the statement of value added (DVA), for the quarter ended on June 30, 2011, which disclosure in the Quarterly Financial Information is required in accordance with regulations issued by Securities and Exchange Commission (CVM) applicable to the preparation of Quarterly Financial Information and supplementary information considered by IFRS, which does not require the disclosure of statement of value added (DVA). These statement were submitted to the same review procedures previously described and, based on our review, nothing has come to our attention that would lead us to believe that they have not been prepared, in all its material respects, in accordance with the Quarterly Financial Information taken as a whole.

1. Operations

Ultrapar Participações S.A. (“Company”), is a Company with headquarters at the Brigadeiro Luis Antônio Avenue, 1343 in São Paulo – SP, Brazil.

It engages in the investment of its own capital in services, commercial and industrial activities, including the subscription or acquisition of shares of other companies. Through its subsidiaries, it operates in the segments of liquefied petroleum gas - LPG distribution (“Ultragaz”), automotive fuels & lubricants distribution, and related businesses (“Ipiranga”), production and marketing of chemicals (“Oxitenó”), and storage services for liquid bulk (“Ultracargo”). The Company is also present in oil refining through its investment in Refinaria de Petróleo Riograndense S.A. (“RPR”).

2. Summary of significant accounting policies

Aiming at the convergence of the Brazilian accounting practices to the International Financial Reporting Standards (“IFRS”), during the years 2009 and 2010 the Brazilian Securities and Exchange Commission (“CVM”) issued several resolutions approving the Accounting Pronouncements Committee (“CPC”) pronouncements and established new accounting standards applicable to Brazil, effective in 2010 (“New BR GAAP”). These pronouncements are in accordance with the international accounting standards issued by the International Accounting Standards Board (“IASB”).

The interim financial information as of June 30, 2011 was prepared in accordance with Resolution CVM 581/09 (CPC 21) and International Accounting Standards (“IAS”) 34 - Interim Financial Reporting issued by IASB.

The Company’s individual interim financial information are stated according to the New BR GAAP, which differs from IFRS in two respects. IFRS does not require the equity method of accounting for the individual interim financial information of the parent company. Besides equity accounting, the parent company’s interim financial information in New BR GAAP contain another difference to IFRS, as expressly permitted by CPC 43 (R1), relating to the deferred charges, written off as of December 31, 2010, when such difference was eliminated.

The Company’s consolidated interim financial information are stated according to the IFRS, issued by IASB. The consolidated interim financial information as of 2010, previously reported in New BRGAAP (in accordance with CPC 43), is being presented considering the deferred charges written off in the IFRS initial adoption (in accordance with CPC 43 R1). See Note 28 for further detail of deferred charges amortization effects in the income statements in the period of 2010.

The accounting policies described below were applied by the Company and its subsidiaries in a consistent manner for all periods presented in these Company and consolidated interim financial information.

Ultrapar Participações S.A. and Subsidiaries

Notes to the interim financial information

(In thousands of Reais, unless otherwise stated)

a. Recognition of income

Revenue from sales and costs are recognized when all risks and benefits associated with the products are transferred to the purchaser. Revenue from services provided and their costs are recognized when the services are provided. Costs of products sold and services provided include goods (mainly fuels/lubricants and LPG), raw materials (chemicals and petrochemicals) and production, distribution, storage and filling costs.

b. Cash equivalents

Include short-term highly-liquid investments that are readily convertible into a known amount of cash and are subject to an insignificant risk of change in value. See Note 4 for further detail on cash equivalents of the Company and its subsidiaries.

c. Financial instruments

In accordance with IAS 39 (CPC 38, 39 and 40), the financial instruments of the Company and its subsidiaries were classified into the following categories:

Measured at fair value through profit or loss: financial assets held for trading, that is, purchased or created primarily for the purpose of sale or repurchase in the short term, and derivatives. Changes in fair value are recorded as profit or loss, and the balances are stated at fair value.

Held to maturity: non-derivative financial assets with fixed or determinable payments, with fixed maturities for which the entity has the positive intent and ability to hold to maturity. The interest earned is recorded as income, and balances are stated at acquisition cost plus the interest earned.

Available for sale: non-derivative financial assets that are designated as available for sale or that were not classified into other categories. The interest earned is recorded as income, and the balances are stated at fair value. Differences between fair value and acquisition cost plus the interest earned are recorded in a specific account of the shareholders' equity. Gains and losses recorded in the shareholders' equity are included in income, in case of prepayment.

Loans and receivables: non-derivative financial instruments with fixed or determinable payments or receipts, not quoted in active markets, except: (i) those which the entity intends to sell immediately or in the short term and which the entity classified as measured at fair value through profit or loss; (ii) those classified as available for sale; or (iii) those the holder of which cannot substantially recover its initial investment for reasons other than credit deterioration. The interest earned is recorded as income, and balances are stated at acquisition cost plus the interest earned.

Notes to the interim financial information

(In thousands of Reais, unless otherwise stated)

The Company and its subsidiaries designate certain derivative financial instruments used to hedge against changes in interest rates and variations in the exchange rate as cash flow hedge. In the case of derivatives designed to hedge cash flows against changes caused by the variation in interest rates, the difference between the fair value of the financial instrument and its updated cost is recognized as a valuation adjustment in the shareholders' equity, not affecting the income statement of the Company and its subsidiaries. In the case of foreign exchange derivatives designated by subsidiary RPR for hedge of future cash flows, the effect of variation in the derivative is posted to the valuation adjustment in shareholders' equity until the time when the hedged item affects the income statement. The difference between the fair value of the derivative and updated cost is recognized directly in income of the subsidiary.

The Company and its subsidiaries designate derivative financial instruments used to compensate variations due to changes in interest rates in the market value of contracted debt in Reais as fair value hedge. Such variations, as well as the difference between the derivative financial instrument fair value and its updated cost, are recognized in the income.

For further detail on financial instruments of the Company and its subsidiaries, see Notes 4, 14, and 20.

d. Current and non-current assets

The trade accounts receivable are recorded at the amount invoiced, adjusted to the present value if applicable, including all direct taxes of the Company and its subsidiaries.

Allowance for doubtful accounts is calculated based on estimated losses and is set at an amount deemed by management to be sufficient to cover any loss on realization of accounts receivable.

Inventories are stated at the lower of average acquisition or production cost, and replacement cost or net realizable value.

The other assets are stated at the lower of cost and realizable value, including, if applicable, the interest earned, monetary changes and changes in exchange rates incurred or less a provision for loss and, if applicable, adjustment to present value (see Note 2.r).

Ultrapar Participações S.A. and Subsidiaries

Notes to the interim financial information

(In thousands of Reais, unless otherwise stated)

e. Investments

Investments in subsidiaries are valued by the equity method of accounting in the interim financial information of the parent company.

Investments in companies in which management has a significant influence or in which it holds 20% or more of the voting stock, or that are part of a group under shared control are also accounted for the equity method of accounting (see Note 11). In the consolidated interim financial information the investments under shared control are consolidated proportionally by the Company (See Note 3).

The other investments are stated at acquisition cost less provision for loss, unless the loss is considered temporary.

f. Property, plant and equipment

Recorded at acquisition or construction cost, including financial charges incurred on property, plant and equipment under construction, as well as maintenance costs resulting from scheduled plant outages and estimated costs to remove, to decommission or to restore assets. Property, plant and equipment acquired before December 31, 1997 are adjusted for inflation as of that date.

Depreciation is calculated using the straight-line method, for the periods mentioned in Note 12, taking into account the economic life of the assets, and are periodically revised.

Leasehold improvements are depreciated over the shorter of the contract term and useful/economic life of the property.

g. Financial leases

• Finance leases

Certain lease contracts transfer substantially all the risks and benefits associated with the ownership of an asset to the Company and its subsidiaries. These contracts are characterized as finance leases, and assets thereunder are stated at fair value or, if lower, present value of the minimum payments under the relevant contracts. The items recognized as assets are depreciated at the depreciation rates applicable to each group of assets in accordance with Note 12. Financial charges under the finance lease contracts are allocated to income over the contract term, based on the amortized cost and actual interest rate method (see Note 14.g).

• Operating leases

There are lease transactions where the risks and benefits associated with the ownership of the asset are not transferred and where the purchase option at the end of the contract is equivalent to the market value of the leased asset. Payments made under an operating lease contract are recognized as expenses in the income statement on a straight-line basis over the term of the lease contract, in accordance with Note 21.d).

h. Intangible assets

Intangible assets include assets acquired by the Company and its subsidiaries from third parties, according to the main criteria below (see Note 13):

- Goodwill is carried net of accumulated amortization as of December 31, 2008, when it ceased to be amortized. Goodwill generated as from January 1, 2009 is shown as intangible asset corresponding to the positive difference between the amount paid or payable to the seller and the fair value of the assets and liabilities of the acquired entity, and is tested annually to verify the existence of probable losses (impairment). In accordance with IFRS 3(R), goodwill is allocated to the respective cash generating units for impairment testing purposes.
- Bonus disbursements as provided in Ipiranga's agreements with reseller gas stations and major consumers are recorded when incurred and amortized according to the term of the agreement.
- Other intangible assets acquired from third parties, such as software, technology and commercial property rights, are measured at the total acquisition cost less accumulated amortization expenses.

The Company and its subsidiaries have not recorded intangible assets that were created internally or that have an indefinite useful life, except for goodwill.

i. Current and non-current liabilities

Current and noncurrent liabilities are stated at known or calculable amounts plus, if applicable, related charges, monetary changes and changes in exchange rates incurred until the date of the interim financial information. When applicable, the current and noncurrent liabilities are recorded in present value based on interest rates that reflect the term, currency and risk of each transaction. Transaction costs incurred and directly attributable to the activities necessary for contracting debt or loans or by issuing debt bonds, as well as premiums in the issuance of debentures and other debt or equity instruments, are appropriated to their instrument and amortized to income over their term.

j. Income and social contribution taxes on profit

Current and deferred income tax (IRPJ) and social contribution (CSLL) are calculated based on the current rates of income tax and social contribution on profit, including the value of tax incentives, as stated in Note 9.b).

k. Assets retirement obligation – fuel tanks

This provision corresponds to the legal obligation to remove Ipiranga's underground fuel tanks located at Ipiranga-branded gas stations after a certain period. The estimated amount of the obligation to remove this fuel tank is recorded as a liability when tanks are installed. The amount is recorded in property, plant and equipment and depreciated over the respective useful life of the tanks. The amounts recognized as a liability are adjusted until the respective tank is removed (see Note 16). The estimated removal cost is revised periodically.

l. Provision for contingencies

A provision for contingencies is created for quantifiable contingent risks, when chance of loss is more-likely-than-not in the opinion of management and internal and external legal counsel, and the amounts are recorded based on evaluation of the outcomes of the legal proceedings (see Note 21.a).

m. Actuarial obligation for post-employment benefits

Reserves for actuarial liabilities for post-employment benefits granted and to be granted to employees, retirees, and pensioners are based on an actuarial calculation prepared by an independent actuary, using the projected unit credit method, as described in Note 22.b).

n. Transactions in foreign currency

Transactions in foreign currency carried out by the Company or its subsidiaries are translated into their functional currency at the exchange rate prevailing on the date of each transaction. Outstanding monetary assets and liabilities of the Company and its subsidiaries are translated at the exchange rate prevailing on the balance sheet date. The effect of the difference between those exchange rates is recognized in income until their realization.

o. Basis for translation of interim financial information of foreign-based subsidiaries

Assets and liabilities of the subsidiaries Oxiteno México S.A. de C.V. and its subsidiaries, located in Mexico (functional currency: Mexican Peso), and Oxiteno Andina, C.A., located in Venezuela (functional currency: Bolivares Fortes), denominated in currencies other than that of the Company (functional currency: Real), are translated at the exchange rate in effect on the date of the interim financial information. Gains and losses resulting from changes in these foreign investments are directly recognized in the shareholders' equity as cumulative translation adjustments and will be recognized as income if these investments are disposed of. The recorded balance in other comprehensive income and presented in the shareholders' equity as cumulative translation adjustments as of June 30, 2011 was R\$ 19,828 of exchange rate loss (R\$ 18,597 loss as of December 31, 2010).

For IFRS purposes, based on IAS 29, from 2010, Venezuela is regarded as a hyperinflationary economy. As a result, the interim financial information of Oxiteno Andina C.A. were adjusted by the Venezuelan Consumer Price Index (CPI).

Assets and liabilities of the other foreign subsidiaries, which do not have administrative autonomy, are considered extended activities of the parent company and are translated at the exchange rate in effect by the end of the respective period. Gains and losses resulting from changes in these foreign investments are directly recognized as financial income. The loss recognized as income as of June 30, 2011 amounted to R\$ 857 (R\$ 860 gain as of June 30, 2010).

p. Use of judgment

The interim financial information require the use of judgment and estimates for the accounting of certain assets, liabilities and results. In these estimates, the Company and subsidiaries' management use the best information available at the time of preparation of the interim financial information, as well as the experience of past and current events, also considering assumptions regarding future events. The interim financial information therefore include estimates related mainly to determining the fair value of financial instruments (Notes 4, 14 and 20), the determination of provisions for income taxes (Note 9), the useful life of property, plants and equipments (Note 12), recovery value of long-lived assets (Note 13), provisions for tax, civil and labor liabilities (Note 21.a) and estimates for the preparation of actuarial reports (Note 22). The actual result of the transactions and information may differ from estimates.

q. Impairment of assets

The Company reviews, at least annually, the carrying value of assets for their possible impairment and whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable from the estimated future cash flows expected to result from its use or disposal. In cases where future expected cash flows are less than the carrying value, an impairment loss is recognized equal to an amount by which the carrying value exceeds the fair value of these assets. The factors considered by the Company in performing this assessment include current operating results, trends, and prospects, as well as the effects of obsolescence, demand, competition, and other economic factors. No impairment was recorded in the abovementioned periods.

r. Adjustment to present value

The subsidiaries booked the adjustment to present value of ICMS credit balances on property, plant and equipment (CIAP – see Note 7). The Company and its subsidiaries reviewed all items classified as long-term and, where relevant, short-term assets and liabilities and did not identify the need to adjust other balances to present value.

s. Statements of value added

The Company and its subsidiaries prepare the statements of value added, individual and consolidated, according to CPC 09 - Statement of Value Added, as an integral part of the New BR GAAP interim financial information as applicable to public companies, while for IFRS purposes they represent additional financial information.

Business combination – Acquisition of Distribuidora Nacional de Petróleo Ltda. (“DNP”)

On November 1, 2010, the Company, through its subsidiary Ipiranga Produtos de Petróleo S.A. (“IPP”), acquired a 100% equity interest in DNP. The total acquisition amount, after working capital adjustment, was of R\$ 73,427. This acquisition reinforces the strategy of expansion, initiated with the acquisition of Texaco, to the midwest, northeast and north of Brazil where the consumption growth has been above the national average and the market share of Ipiranga is lower than that in the south and southeast.

The acquisition cost was allocated among the identified assets acquired and liabilities assumed, valued at fair value. During the process of identification of assets and liabilities, intangible assets which were not recognized in the acquired entity’s books were also taken into account. The goodwill based on expected future earnings is R\$ 16,699. The value added for assets acquired, which was determined based on a report prepared by an independent appraiser, is R\$ 54,349, which reflects the difference between the market value and the book value of the assets.

The table below summarizes the fair values of the assets acquired and liabilities assumed as of the completion of the acquisition:

The subsidiaries IPP and Serma have finance lease contracts primarily related to fuel distribution equipment, such as tanks, pumps, VNG compressors and IT equipment. These contracts have terms between 36 and 60 months.

The subsidiaries IPP and Serma have the option to purchase the assets at a price substantially lower than the fair market price on the date of option, and management intends to exercise such option. No restrictions are imposed on these agreements.

i. Guarantees

The financings are guaranteed by collateral in the amount of R\$ 86,021 as of June 30, 2011 (R\$ 83,749 as of December 31, 2010) and by guarantees and promissory notes in the amount of R\$ 1,837,446 as of June 30, 2011 (R\$ 2,006,064 as of December 31, 2010).

Some subsidiaries issued collateral to financial institutions in connection with the amounts owed by some of their customers to such institutions (vendor financing). If a subsidiary is required to make any payment under these collaterals, this subsidiary may recover the amount paid directly from its customers through commercial collection. The maximum amount of future payments related to these collaterals is R\$ 6,171, as of June 30, 2011 (R\$ 7,768 as of December 31, 2010), with maturities of no more than 211 days. As of June 30, 2011, the Company and its subsidiaries did not have losses in connection with these collaterals. The fair value of collateral recognized in current liabilities is R\$ 148 as of June 30, 2011 (R\$ 190 as of December 31, 2010), which is recognized in income as customers set their obligations with financial institutions.

Some financing agreements of the Company and its subsidiaries have cross default clauses that require them to pay the debt assumed in case of default of other debts equal to or greater than US\$ 15 million. As of June 30, 2011, there was no event of default of the debts of the Company and its subsidiaries.

The Company and its subsidiaries acquire automotive fuel and LPG from Petrobras and ethylene from Braskem (see Note 8.a). These two suppliers control almost all the markets for these products in Brazil. The Company and its subsidiaries depend on the ability of those suppliers to deliver products in a timely manner and at favorable prices and terms. The loss of any major supplier or a significant reduction in product availability from those suppliers could have a significant adverse effect on the Company. The Company believes that its relationships with suppliers are satisfactory.

Ipiranga has a loyalty program called Km de Vantagens that rewards registered customers with points when they buy products at Ipiranga gas stations. The customer may exchange the points for discounts on products and services offered by Ipiranga's partners. Points received by Ipiranga's customers for buying products at the gas station chain that may be used in Multiplus Fidelidade are considered as part of the sales revenue based on the fair value of the points granted. Revenue is deferred based on the expected redemption of points, and is recognized in income when the points are redeemed, on which occasion the charges incurred are also recognized. Deferred revenue of unredeemed points is recognized in income when the points expire.

The initial franchise fee related to the 'am/pm' convenience store chain received by Ipiranga is deferred and recognized in income on an accrual basis, based on the substance of the agreements with the franchisees.

20. Risks and financial instruments (Consolidated)

Risk management and financial instruments Governance

The main risk factors to which the Company and its subsidiaries are exposed reflect strategic/operational and economic/financial aspects. Operational/strategic risks (including, but not limited to, demand behavior, competition, technological innovation, and material changes in the industry structure) are addressed by the Company's management model. Economic/financial risks primarily reflect default of customers, behavior of macroeconomic variables, such as exchange and interest rates, as well as the characteristics of the financial instruments used by the Company and its subsidiaries and by their counterparties. These risks are managed through control policies, specific strategies, and establishment of limits.

The Company has a conservative policy for the management of financial assets, instruments and risks approved by its Board of Directors ("Policy"). In accordance with the Policy, the main objectives of financial management is to preserve the value and liquidity of financial assets and ensure financial resources for the development of business, including expansions. The main financial risks considered in the Policy are risks associated with currencies, interest rates, credit and selection of financial instruments. Governance of the management of financial risks and financial instruments follows the segregation of duties below:

Implementation of the management of financial assets, instruments and risks is the responsibility of the Financial Area, through its treasury, with the assistance of the tax and accounting areas.

- Supervision and monitoring of compliance with the principles, guidelines and standards of the Policy is the responsibility of the Risk and Investment Committee, set up more than 10 years ago and composed of members of the Company's Executive Board ("Committee"). The Committee holds regular meetings and is in charge, among other responsibilities, of discussing and monitoring the financial strategies, existing exposures, and significant transactions involving investment, fund raising, or risk mitigation. The Committee monitors the risk standards established by the Policy through a monitoring map on a monthly basis.

Changes in the Policy or revisions of its standards are subject to the approval of the Company's Board of Directors.

Continuous enhancement of the Policy is the joint responsibility of the Board of Directors, the Committee, and the Financial Area.

Currency risk

Most transactions of the Company and its subsidiaries are located in Brazil and, therefore, the reference currency for currency risk management is the Real. Currency risk management is guided by neutrality of currency exposures and considers the transactional, accounting, and operational risks of the Company and its subsidiaries and their exposure to changes in exchange rates. The Company considers as its main currency exposures the assets and liabilities in foreign currency and the short-term flow of net sales in foreign currency of Oxiteno.

The Company and its subsidiaries use exchange rate hedging instruments (especially between the Real and the U.S. dollar) available in the financial market to protect their assets, liabilities, receipts and disbursements in foreign currency, in order to reduce the effects of changes in exchange rates on its results and cash flows in Reais within the exposure limits under its Policy. Such foreign exchange hedging instruments have amounts, periods, and rates substantially equivalent to those of assets, liabilities, receipts and disbursements in foreign currency to which they are related. Assets and liabilities in foreign currency are stated below, translated into Reais as of June 30, 2011 and December 31, 2010:

Assets and liabilities in foreign currency

Notes to the interim financial information

(In thousands of Reais, unless otherwise stated)

Based on the net liability position of R\$ 179.2 million in foreign currency shown above, the Company estimates that a 10% devaluation of the Real would produce a total effect of R\$ 17.9 million, of which R\$ 25.1 million of losses recognized in income and R\$ 7.2 million of gain directly recognized in the shareholders' equity in cumulative translation adjustments mainly due to changes in the exchange rate on equity of foreign subsidiaries. Based on the same position, the Company estimates that a 10% valuation of the Real would produce a total effect of R\$ 17.9 million, of which R\$ 25.1 million of gain recognized in income and R\$ 7.2 million of loss directly recognized in the shareholders' equity in cumulative translation adjustments (see Note 2.o).

Interest rate risk

The Company and its subsidiaries adopt conservative policies for borrowing and use of financial resources and capital cost minimization. The financial investments of the Company and its subsidiaries are primarily held in transactions linked to the CDI, as set forth in Note 4. Borrowings primarily results from financing from BNDES and other development agencies, debentures and borrowings in foreign currency, as shown in Note 14.

The Company does not actively manage risks associated with changes in the level of interest rates and attempts to maintain its financial interest assets and liabilities at floating rates. As of June 30, 2011, the Company and its subsidiaries had derivative financial instruments of interest rate linked to domestic loans, swapping pre-fixed interest of certain debts to floating rate.

Credit risks

The financial instruments that would expose the Company and its subsidiaries to credit risks of the counterparty are basically represented by cash and cash equivalents, financial investments, hedge instruments and accounts receivable.

Credit risk of financial institutions - Such risk results from the inability of financial institutions to comply with their financial obligations to the Company and its subsidiaries due to insolvency. The Company and its subsidiaries regularly conduct a credit review of the institutions with which they hold cash and cash equivalents, financial investments, and hedging instruments through various methodologies that assess liquidity, solvency, leverage, portfolio quality, etc. Cash and cash equivalents, financial investments, and hedging instruments are held only with institutions with a solid credit history, chosen for safety and soundness. The volumes of cash and cash equivalents, financial investments, and hedging instruments are subject to maximum limits by institution and, therefore, require diversification of counterparty.

Government credit risk - The Company and its subsidiaries have financial investments in federal government bonds of Brazil and countries rated AAA or Aaa by specialized credit rating agencies. The volume of financial investments is subject to maximum limits by country and, therefore, require diversification of counterparty.

(In thousands of Reais, unless otherwise stated)

Customer credit risk - Such risks are managed by each business unit through specific criteria for acceptance of customers and credit rating and are additionally mitigated by diversification of sales. No single customer or group accounts for more than 10% of total revenue. As of June 30, 2011, Ipiranga maintained R\$ 106,690 (R\$ 101,275 as of December 31, 2010), Ultragas maintained R\$ 12,854 (R\$ 16,613 as of December 31, 2010), Oxiteno maintained R\$ 1,381 (R\$ 1,429 as of December 31, 2010) and Ultracargo maintained R\$ 645 (R\$ 615 as of December 31, 2010) as a provision for potential loss on their accounts and assets receivables.

Liquidity risk

The Company and its subsidiaries' main sources of liquidity derive from (i) cash, cash equivalents and financial investments, (ii) cash generated from operations and (iii) financings. The Company and its subsidiaries believe that these sources are sufficient to satisfy their current funding requirements, which include, but are not limited to, working capital, capital expenditures, amortization of debt and payment of dividends.

From time to time, the Company and its subsidiaries examine the opportunities for acquisitions and investments. They consider different types of investments, either directly or through joint ventures, or affiliated companies, and finance such investments using cash generated from operations, through funding raised in the capital markets, through capital increases or through a combination of these methods.

The Company and its subsidiaries believe to have enough working capital to satisfy their current needs. The gross indebtedness due over the next twelve months totals R\$ 1,389 million. Furthermore, the investment plan for 2011 totals R\$ 1,044 million. On June 30, 2011, the Company and its subsidiaries had R\$ 2,729 million in cash, cash equivalents and short-term and long-term financial investments (for quantitative information, see Notes 4 and 14).

Selection and use of financial instruments

In selecting financial investments and hedging instruments, an analysis is conducted to estimate rates of return, risks involved, liquidity, calculation methodology for the carrying value and fair value, and documentation applicable to the financial instruments. The financial instruments used to manage the financial resources of the Company and its subsidiaries are intended to preserve value and liquidity.

The Policy contemplates the use of derivative financial instruments only to cover identified risks and in amounts consistent with the risk (limited to 100% of the identified risk). The risks identified in the Policy are described in the above sections, and are subject to risk management. In accordance with the Policy, the Company and its subsidiaries can use forward contracts, swaps, options, and futures contracts to manage identified risks. Leveraged derivative instruments or instruments with a margin call are not permitted. Because the use of derivative financial instruments is limited to the coverage of identified risks, the Company and its subsidiaries use the term "hedging instruments" to refer to derivative financial instruments.

As mentioned in the section Risk management and financial instruments – Governance of this Note, the Committee monitors compliance with the risk standards established by the Policy through a risk monitoring map, including the use of hedging instruments, on a monthly basis.

Hedging against foreign exchange exposure of liabilities in foreign currency - The purpose of these contracts is to offset the effect of the change in exchange rates of debts or firm commitments in U.S. dollars by converting them into debts or firm commitments in Reais linked to CDI. As of June 30, 2011, the Company and its subsidiaries had outstanding swap contracts totaling US\$ 194.4 million in notional amount, of which (i) US\$ 134.4 million, on average, had asset position at US\$ + 5.13 p.a. and liability position at 121.00 % of CDI and (ii) US\$ 60 million had asset position at US\$ + LIBOR + 1.0% a.a. and liability position at 86.90% of CDI.

Hedging against foreign exchange exposure of operations - The purpose of these contracts is to make the exchange rate of the turnover of the subsidiaries of Oleoquímica, Oxiteno S.A. and Oxiteno Nordeste equal to the exchange rate of the cost of their main raw materials. As of June 30, 2011, these swap contracts totaled US\$ 115.3 million and, on average, had an asset position at 64.62% of CDI and liability position at US\$ + 0.0% p.a.

Hedging against the interest rate fixed in local financing - The purpose of these contracts is to convert the interest rate on financing contracted in Reais from fixed into floating. On June 30, 2011 these swap contracts totaled R\$ 1,809.5 million, and on average had an asset position at 11.81% p.a. and liability position at 98.75% of CDI.

Hedging against floating interest rate in foreign currency - The purpose of this contract is to convert the interest rate on the syndicated loan in the principal of US\$ 60 million from floating into fixed. As of June 30, 2011, this contract was settled .

Hedging against foreign exchange exposure of a firm commitment in foreign currency (RPR) - The purposes of these contracts is to offset the effect of the change in exchange rates on imports of oil denominated in U.S. dollars. On June 30, 2011 the subsidiary RPR held no NDF (non-deliverable forwards).

Hedging against foreign exchange exposure of liabilities in foreign currency (RPR) - The purpose of this contract is to offset the effect of the change in exchange rates of a debt in U.S. dollars by converting it into a debt in Reais linked to CDI. As of June 30, 2011, the subsidiary RPR had settled these contracts.

The Company and its subsidiaries designate as cash flow hedges some instruments of protection for future cash flows. These instruments of protection whose purpose is to protect the cash flows (i) from the risk of fluctuations in Libor on loans contracted and (ii) the risk of exchange rate of changes of subsidiary RPR on future imports of oil denominated in U.S. dollars. On June 30, 2011 these instruments of protection had been settled.

In the case of derivatives designed to hedge cash flows against changes caused by the variation in interest rates, the difference between the fair value of the financial instrument and its updated cost is recognized as a valuation adjustment in the shareholders' equity, not affecting the income statement of the Company and its subsidiaries.

In the case of foreign exchange derivatives designated by subsidiary RPR for hedge of future cash flows, the effect of variation in the derivative is posted to the valuation adjustment in shareholders' equity until the time when the hedged item affects the income statement. The

difference between the fair value of the derivative and updated cost is recognized directly in income of the subsidiary.

The Company and its subsidiaries designate derivative financial instruments used to offset the variations due to changes in interest rates in the market value of financing contracted in Reais as fair value hedge. As of June 30, 2011 these instruments of protection totaled R\$ 1,809.5 million. The Company and its Subsidiaries recognized a gain of R\$ 5.6 million in the first semester of 2011, of which R\$ (11.6) million refer to the result of instruments of protection and R\$ 17.2 million refer to the fair value adjustment of the debt.

Gains (losses) on hedging instruments

The following tables summarize the values of gains (losses) recorded on June 30, 2011 and June 30, 2010 which affected the income statement and shareholders' equity of the Company and its subsidiaries:

	June 30, 2011 Consolidated R\$ million

Fair value of financial instruments

The fair values and the carrying values of the financial instruments, including currency and interest rate hedging instruments, as of June 30, 2011 and December 31, 2010 are stated below:

	06/30/2011		12/31/2010	
	Carrying value	Fair value	Carrying value	Fair value
Financial assets:				
Cash and bank deposits	75,164	75,164	72,793	72,793
Financial investments	2,645,242	2,645,242	3,127,806	3,127,806
Currency and interest hedging instruments	8,888	8,888	19,778	19,778
	2,729,294	2,729,294	3,220,377	3,220,377
Financial liabilities:				
Financing	4,241,432	4,293,018	4,140,000	4,188,937
Debentures	1,077,743	1,074,639	1,196,116	1,182,380
Finance leases	45,048	45,048	5,545	5,545
Currency and interest hedging instruments	62,741	62,741	54,372	54,372
	5,426,964	5,475,446	5,396,033	5,431,234

The fair value of financial instruments, including currency and interest hedging instruments, was determined as follows:

- The fair values of cash on current account are identical to the carrying values.
- Financial investments in investment funds are valued at the value of the fund unit as of the date of the interim financial information, which correspond to their fair value.
- Financial investments in CDBs (Bank Certificates of Deposit) and similar investments offer daily liquidity through repurchase in the yield curve and, therefore, the Company believes their fair value corresponds to their carrying value.
- For fair value calculation of LPG Inc.'s notes in the foreign market (see Note 14.b), the price quoted in an active market is used.
- The fair value of other financial investments and financing was determined using calculation methodologies commonly used for marking-to-market, which consist of calculating future cash flows associated with each instrument adopted and adjusting them to present value at the market rates as of June 30, 2011 and December 31, 2010. For some cases where there is no active market for the financial instrument, the Company and its subsidiaries can use quotes provided by the transaction counterparties.

The interpretation of market information on the choice of calculation methodologies for the fair value requires considerable judgment and estimates to obtain a value deemed appropriate to each situation. Consequently, the estimates presented do not necessarily indicate the amounts that may be realized in the current market.

Notes to the interim financial information

Financial instruments were classified as loans and receivables, except (i) all exchange rate and interest rate hedging instruments, which are measured at fair value through profit or loss, (ii) financial investments (see Note 4), (iii) funding from the Banco do Brasil that is measured at fair value through profit or loss (see Note 14.e), (iv) accounts receivable that have vendor arrangements (see Note 14.i) and Ipiranga customer financing (see Note 5), which are measured at fair value through profit or loss. Thus, accounts receivable, loans and financing, accounts payable and trade payables are substantially classified as loans and receivables.

Fair value hierarchy of financial instruments

The financial instruments recognized at fair value on the balance sheet are classified in the following categories:

- (a) Level 1 - prices negotiated (without adjustment) in active markets for identical assets or liabilities;
- (b) Level 2 - inputs other than prices negotiated in active markets included in Level 1 and observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); and
- (c) Level 3 - inputs for the asset or liability which are not based on observable market variables (unobservable inputs).

The table below shows a summary of the financial assets and financial liabilities measured at fair value in the Company's and its subsidiaries' balance sheet as of June 30, 2011 and December 31, 2010:

Sensitivity analysis

The Company and its subsidiaries use derivative financial instruments only to hedge against identified risks and in amounts consistent with the risk (limited to 100% of the identified risk). Thus, for purposes of sensitivity analysis of market risks associated with financial instruments, the Company analyzes the hedging instrument and the hedged item together, as shown on the charts below.

For the sensitivity analysis of foreign exchange hedging instruments, management adopted as a likely scenario the Real/U.S. dollar exchange rates at maturity of each swap, projected by U.S dollar futures contracts quoted on BM&FBovespa as of June 30, 2011. As a reference, the exchange rate for the last maturity of foreign exchange hedging instruments is R\$ 2.18 in the likely scenario. Scenarios II and III were estimated with a 25% and 50% additional devaluation, respectively, of the Real in the likely scenario.

Based on the balances of the hedging instruments and hedged items as of June 30, 2011, the exchange rates were replaced, and the changes between the new balance in Reais and the balance in Reais as of June 30, 2011 were calculated in each of the three scenarios. The table below shows the change in the values of the main derivative instruments and their hedged items, considering the changes in the exchange rate in the different scenarios:

	Risk	Scenario I (likely)	Scenario II	Scenario III
Currency swaps receivable in U.S. dollars				
(1) U.S. Dollar / Real swaps	Dollar	74,221	168,837	263,454
(2) Debts in dollars	appreciation	(74,223)	(168,864)	(263,505)
(1)+(2)	Net effect	(2)	(27)	(51)
Currency swaps payable in U.S. dollars				
(3) Real / U.S. Dollar swaps	Dollar	(1,269)	(46,585)	(91,900)
(4) Gross margin of Oxiteno	devaluation	1,269	46,585	91,900

The Company has a derivative financial instrument at US\$ + LIBOR. The sensitivity analysis of this hedging instrument for Real/U.S. dollar exchange rate is shown in the table above. For the sensitivity analysis of the interest rate hedging instrument in dollar, the Company used the future LIBOR curve (BBA – British Bankers Association) as of June 30, 2011 at maturity of the swap and of the loan (hedged item), which occurs in 2014, in order to define the likely scenario. Scenarios II and III were estimated with a 25% and 50% deterioration, respectively, in the estimate of the likely LIBOR.

Based on the three interest rate scenarios in dollar (LIBOR), management estimated the values of its loan and of the hedging instrument by calculating the future cash flows according to the projected scenarios and adjusting them to present value by the rate in effect on June 30, 2011. The result is stated on the table below:

	Risk	Scenario I (likely)	Scenario II	Scenario III
Interest rate swap (in dollars)				
(1) LIBOR swap - fixed rate	Increase in	3	283	563
(2) LIBOR Debt	LIBOR	(3)	(283)	(563)
(1)+(2)	Net effect	-	-	-

For sensitivity analysis of interest rate instruments of protection in Reais, the Company used the futures curve of DI x Pre contract of BM&FBovespa as of June 30, 2011 for each swap and each debt (object of protection) maturities, for defining the likely scenario. Scenarios II and III were estimated with a 25% and 50% deterioration, respectively, of pre-fixed rate to that of the likely scenario.

Based on three scenarios of interest rates in Reais, the Company estimated the values of its debt and instruments of protection according to the risk which is being protected (variations in the pre-fixed interest rates in Reais), by projecting them to future value by the contracted rates and bringing them to present value by the interest rates of the estimated scenarios. The result is shown in the table below:

	Risk	Scenario I (likely)	Scenario II	Scenario III
Interest rate swap (in R\$)				
(1) Fixed rate swap - CDI	Increase in	-	(110,768)	(211,255)
(2) Fixed rate financing	prefixed rate	-	110,785	211,293
(1)+(2)	Net effect	-	17	38

a. Civil, tax and labor proceedings

On October 7, 2005, the subsidiaries Companhia Ultragas S.A. and Bahiana Distribuidora de Gás Ltda. (“Bahiana”) filed for and obtained a preliminary injunction to offset PIS and COFINS credits against other taxes administered by the Federal Revenue Service, notably IRPJ and CSLL. The decision was confirmed by a trial court judgment on May 16, 2008. Under the preliminary injunction obtained, the subsidiaries have been making judicial deposits for these debits in the accumulated amount of R\$ 207,382 as of June 30, 2011 (R\$ 185,398 as of December 31, 2010) and have recorded a corresponding liability.

Subsidiaries Cia. Ultragas, Utingás Armazenadora S.A. (“Utingás”), Tequimar and Ultracargo Operações Logísticas e Participações Ltda. (“Ultracargo Participações”) have filed actions with a motion for preliminary injunction seeking full and immediate utilization of the supplementary monetary adjustment based on the Consumer Price Index (IPC)/National Treasury Bonds (BTN) for 1990 (Law 8200/91); the subsidiaries Cia Ultragas, Utingás and Tequimar opted to include the contingencies related to their processes within the Law 11941/09 amnesty and reclassified the contingencies’ amount to the line of taxes payables in the previous year. Ultracargo Participação maintain a provision of R\$ 1,018 as of June 30, 2011 (R\$ 980 as of December 31, 2010) to cover any contingencies if they lose such actions.

The Company and some of its subsidiaries have filed actions with a motion for preliminary injunction against the application of the law restricting offset of tax losses (IRPJ) and negative tax bases (CSLL) determined as of December 31, 1994 to 30% of the income for the year. As a result of the position of the Federal Supreme Court (STF) and based on the opinion of its legal counsel, a provision was recorded for this contingency in the amount of R\$ 6,592 as of June 30, 2011 (R\$ 6,481 as of December 31, 2010).

Subsidiary IPP has a pending Declaratory Judgment Action challenging the constitutionality of Law No. 9.316/96, which has made CSLL nondeductible for the IRPJ calculation basis. The claim was denied in the first and second instances, and the extraordinary appeal presented is halted until the trial of a leading case by the STF (Federal Supreme Court). Backed by an order issued in a Provisional Remedy connected to the main action, the subsidiary made a deposit in court for the amounts challenged and maintains a provision for this contingency in the amount of R\$ 13,278 as of June 30, 2011 (R\$ 12,934 as of December 31, 2010).

The subsidiaries Oxiteno Nordeste and Oxiteno S.A. have a lawsuit for the exclusion of export revenues from the tax base for CSLL. The preliminary injunction was granted to Oxiteno Nordeste and the decision was confirmed by the lower court sentence. The subsidiary made judicial deposits of the amounts in discussion, as well as provisioned the corresponding contingency in the amount of R\$ 1,028 as of June 30, 2011 (R\$ 982 as of December 31, 2010); the subsidiary Oxiteno S.A. awaits judgment of an extraordinary appeal against the judgment which denied the requested preliminary injunction, and is still normally paying the CSLL. Although in August 2010 the STF has positioned itself against the thesis, this decision is effective just between the parties involved in that lawsuit, not affecting directly the subsidiaries lawsuit.

The subsidiaries Oxiteno S.A., Oxiteno Nordeste, Cia. Ultragaz, Tequimar, RPR, Tropical Transportes Ipiranga Ltda. (“Tropical”), Empresa Carioca de Produtos Químicos S.A. (“EMCA”) e IPP, filed for a preliminary injunction seeking the deduction of ICMS from the PIS and COFINS tax basis. Oxiteno Nordeste and IPP obtained an injunction and are paying the disputed amounts into judicial deposits, as well as recording the respective provision in the amount of R\$ 65,873 as of June 30, 2011 (R\$ 57,302 as of December 31, 2010); the others subsidiaries did not obtain a preliminary injunction and are awaiting the judgment of these lawsuits in the Federal Regional Courts.

The Company and its subsidiaries obtained preliminary injunctions to pay PIS and COFINS contributions without the changes introduced by Law 9718/98 in its original version. The ongoing questioning refers to the levy of these taxes on sources other than revenues. In 2005, the STF decided the question in favor of the taxpayer. Although it has set a precedent, the effect of this decision does not automatically apply to all companies, since they must await judgment of their own legal lawsuits. The Company has subsidiaries whose lawsuits have not yet been decided. If all ongoing lawsuits are finally decided in favor of the subsidiaries, the Company estimates that the total positive effect on income before income tax and social contribution will reach R\$ 35,708, net of attorney’s fees.

The Company and its subsidiaries are recording provision for PIS and COFINS calculated on the basis of the interest on capital. The total amount accrued is R\$ 19,856 as of June 30, 2011 (R\$ 19,216 as of December 31, 2010).

IPP and its subsidiaries maintain provisions for ICMS-related contingencies mainly in connection with (a) appropriation of a credit related to the difference between the amount that served as a basis for tax withholding and the amount actually charged in the sale to end consumers, which resulted in excess ICMS withholding by refineries: R\$ 10,469; (b) tax-deficiency notices for interstate sales of fuels to industrial customers without payment of ICMS due to the interpretation of Article 2 of Supplementary Law No. 87/96: R\$ 29,115; (c) tax-deficiency notices for the use of a deemed credit resulting from interstate transfers of Hydrated Ethyl Alcohol Fuel (HEAF), since, in the opinion of the state tax authority, the deemed credit was allowed only when resulting from acquisitions directly from third parties: R\$ 6,867; (d) collection of ICMS-ST (State VAT Substitution) from distributors on interstate sales to end consumers, since there is no withholding under ICMS Agreements No. 105/92 and No. 112/93: R\$ 5,012; (e) attorneys’ fees in connection with Motions to Stay Execution which have been adhered to in a tax amnesty in the State of Minas Gerais, since the fees had already been awarded against the company at the time of adhesion: R\$ 9,556, (f) collection of ICMS on the common ground of non-payment, since there are several reasons that resulted in the tax assessments and whose rebuttal is not evident: R\$ 15,116.

Notes to the interim financial information

(In thousands of Reais, unless otherwise stated)

The main tax claims of the subsidiary IPP that were considered to pose a possible risk of loss, and based on this position, have not been provided for in the interim financial information, relate to ICMS and related mainly to: (a) requirement of proportionate reversal of ICMS credits in view of the acquisitions of hydrous ethanol to give higher values than the its sales, because of the transfer of a portion of financial support for agriculturists (FUPA) made by the distributors upon the acquisitions subsequently reimbursed by the DNC (current National Oil Agency), R\$ 89,454, (b) undue credit, relating to recognized ICMS tax credits in the subsidiary tax books, regarding which the Tax Authorities understand that there was no proof of their origin, R\$ 17,029 (c) assessments for alleged lack of tax payment, R\$ 23,189; (d) records of notices issued in Ourinhos/SP for the operations to return the loan of ethanol made with tax deferral, R\$ 25,719, (e) assessments in the State of Rio de Janeiro demanding the reversal of ICMS credits generated in interstate shipments made under Article 33 of the ICMS Convention 66/88, which allowed the maintenance of credit and was suspended by a preliminary injunction granted by STF, R\$ 13,982, (f) disallowance of ICMS credits taken in the bookkeeping of bills considered inapt, though the understanding of the STJ is in the sense that it is possible to take credit for the buyer even if there is defect in the document of the seller, provided that the remains confirmed that the transaction actually took place, R\$ 20,805, (g) assessments arising from surplus or shortage of stock, occurred due to differences in temperature or handling the product in which the review believes that there is input or output without a corresponding issue of invoice, R\$ 16,565 (h) assessment notices relating to the disallowance of ICMS credits legitimately appropriated by the company due to alleged non-compliance with formalities required under applicable law R\$ 19,754 and (i) assessments arising from ICMS credits relative to the inputs of AEHC, in alleged disagreement with the law, from certain States that had granted tax benefits to producers of alcohol, R\$ 23,729.

The subsidiary IPP has infraction of the non-approval of set-off of IPI credits appropriate under inputs taxed whose outputs were under the protection of immunity. The non-provisioned amount of contingency, updated as of June 30, 2011, is R\$ 62,277 (R\$ 60,053 as of December 31, 2010). The subsidiary also has legal lawsuits to guarantee the compensation of overpaid PIS values before the declaration of unconstitutionality of Decrees 2445/88 and 2449/88, and decided to include part of these cases within the Law 11941/09 amnesty, recording the corresponding amount of R\$ 30,752 as taxes payable.

In 1990, the Petrochemical Workers' Union (Sindicatúmica), of which the employees of Oxiteno Nordeste and EMCA, companies sited on the Petrochemical Hub of Camaçari are members, filed individual claims against the subsidiaries for the performance of the Section 4 of the Collective Labor Agreement, which provided for a salary adjustment in lieu of the salary policies actually implemented. In the same year, a collective labor dispute was also filed by the Union of Employers (SINPEQ) against Sindicatúmica for recognition of the loss of effectiveness of such Section 4. Individual claims were denied. The collective dispute is currently awaiting trial by the STF. In the second half of 2010, some companies in the Camaçari Complex signed an agreement with Sindicatúmica and reported the fact in the collective dispute. Based on the opinion of its legal advisors, who have reviewed the latest STF decision in the collective dispute and the position of the individual claims involving subsidiaries Oxiteno Nordeste and EMCA, the management of those subsidiaries decided that it was not necessary to record a provision as of June 30, 2011.

Subsidiary Cia. Ultragas has answered an administrative proceeding before the CADE (the Brazilian Antitrust Authority) based on alleged anticompetitive practices in municipalities of the Triângulo Mineiro region in 2001, in which a fine in the amount of R\$ 23,104 was awarded against it. The execution of such administrative decision was suspended by a court order and the credit is being discussed in court. Based on the above elements and on the opinion of its legal advisors, the management of the subsidiary has not recorded a provision for this contingency.

Subsidiary Cia. Ultragas is the defendant in legal proceedings for damages arising from an explosion in 1996 in a shopping mall located in the City of Osasco, State of São Paulo. Such proceedings involve: (i) individual proceedings brought by victims of the explosion seeking compensation for loss of income and pain and suffering (ii) request for compensation for expenses of the shopping mall administrator and its insurer; and (iii) class action seeking economic and non-economic damages for all victims injured and dead. The subsidiary believes that it produced evidence that the defective gas pipelines in the shopping mall caused the accident, and Ultragas's local LPG storage facilities did not contribute to the explosion. Out of the 64 actions decided to date, 63 were favorable, of which 39 are already shelved; only 1 was adverse and the subsidiary was sentenced to pay R\$ 17. There is only 1 action yet to be decided. The Company has not recorded a provision for these cases because it believes that the likeliness of realization of this contingency is essentially remote, and also because it has insurance coverage for the full amount in dispute.

The Company and its subsidiaries have provisions for settlement of terms of contracts with customers and ex-service providers, as well as environmental issues, in the amount of R\$ 93,225 as of June 30, 2011 (R\$ 91,644 as of December 31, 2010) and also a provision of R\$ 24,841 as of June 30, 2011 (R\$ 23,259 as of December 31, 2010) to meet the contingencies of labor litigation.

The Company and its subsidiaries have other pending administrative and legal proceedings, which were estimated by their legal counsel as possible and/or remote risk (less-likely-than-50%), and the related potential losses were not provided for by the Company and its subsidiaries based on these opinions. The Company and its subsidiaries also have litigations for recovery of taxes and contributions, which were not recorded in the interim financial information due to their contingent nature.

The Company and its subsidiaries decided to include within the amnesty introduced by Law 11941/09 some of their debts before the Federal Revenue Service, General Attorney of the National Treasury and Social Security with the benefits of reduction of fines, interest and legal charges set in this Law. The respective amounts were recorded as income and social contribution taxes payable.

b. Contracts

Subsidiary Tequimar has agreements with CODEBA and Complexo Industrial Portuário Governador Eraldo Gueiros in connection with its port facilities in Aratu and Suape, respectively. Such agreements set a minimum value for cargo movement, as shown below:

Port	Minimum movement in tons per year	Maturity
Aratu	100,000	2016
Aratu	900,000	2022
Suape	250,000	2027
Suape	400,000	2029

If the annual movement is less than the minimum required, then the subsidiary will have to pay the difference between the actual movement and the minimum required by the agreements, using the port rates in effect at the date established for payment. As of June 30, 2011, such charges were R\$ 5.79 and R\$ 1.38 per ton for Aratu and Suape, respectively. The subsidiary has met the minimum cargo movement requirements since the beginning of the agreements.

Subsidiary Oxiteno Nordeste has a supply agreement with Braskem S.A. setting a minimum value for quarterly consumption of ethylene and establishing conditions for the supply of ethylene until 2021. The minimum purchase commitment and the actual demand accumulated to June 30, 2011 and June 30, 2010, expressed in tons of ethylene, are shown below. In case of breach of the minimum purchase commitment, the subsidiary agrees to pay a penalty of 40% of the current ethylene price, to the extent of the shortfall. The provision of minimum purchase commitment is under renegotiation with Braskem.

	Minimum purchase commitment (accumulated until June)		Accumulated demand until June (actual)

(*) Adjusted due to operational stoppages carried out by Braskem during the period.

Subsidiary Oxiteno S.A has an ethylene supply agreement with Quattor Participações S.A., maturing in 2023, which establishes and regulates the conditions for supply of ethylene to Oxiteno based on the international market for this product. The minimum purchase is 22,050 tons of ethylene semiannually. In case of breach, the subsidiary agrees to pay a penalty of 30% of the current ethylene price, to the extent of the shortfall.

c. Insurance coverage in subsidiaries

The Company maintains appropriate insurance policies with the object of covering several risks to which it is exposed, including asset insurance against losses caused by fire, lightning, explosion of any kind, gale, aircraft crash, and electric damage, and other risks, covering the facilities and other branches of all subsidiaries, except RPR, which maintains its own insurance. The maximum compensation value, including loss of profits, based on the risk analysis of maximum loss possible at a certain site is US\$ 1,307 million.

The General Responsibility Insurance program covers the Company and its subsidiaries with a maximum aggregate coverage of US\$ 400 million against losses caused to third parties as a result of accidents related to commercial and industrial operations and/or distribution and sales of products and services.

Group Life and Personal Accident, Health, National and International Transportation and All Risks insurance policies are also maintained.

The coverages and limits of the insurance policies maintained are based on a careful study of risks and losses conducted by local insurance advisors, and the type of insurance is considered by management to be sufficient to cover potential losses based on the nature of the business conducted by the companies. The risk assumptions adopted, given their nature, are not part of the scope of audit on interim financial information, and consequently haven't been audited by our independent accountants.

d. Operating lease contracts

The subsidiaries Cia. Ultragaz, IPP and Serma have operating lease contracts for the use of IT equipment.

These contracts have terms of 36 months. The subsidiaries have the option to purchase the assets at a price equal to the fair market price on the date of option, and management does not intend to exercise such option.

The future disbursements (installments), assumed under these contracts, total approximately:

	06/30/2011	12/31/2010
Up to 1 year	1,220	752
More than 1 year	1,676	400
	2,896	1,152

The total operating lease recognized as expense for the period was R\$ 457 (R\$ 310 as of June 30, 2010).

22. Employee benefits and private pension plan (Consolidated)

a. ULTRAPREV- Associação de Previdência Complementar

The Company and its subsidiaries offer a defined-contribution pension plan to its employees, which is managed by Ultraprev - Associação de Previdência Complementar. Under the plan, the basic contribution of each participating employee is calculated by multiplying a percentage ranging from 0% to 11%, which is annually defined by the participant based on his/her salary. The sponsor companies match the amount of the basic contribution paid by the participant. As the participants retire, they choose to receive monthly either: (i) a percentage, ranging from 0.5% to 1.0%, of the fund accumulated for the participant with Ultraprev; or (ii) a fixed monthly amount that will exhaust the fund accumulated for the participant within a period ranging from 5 to 25 years. Thus, the Company and its subsidiaries do not assume responsibility for guaranteeing amounts and periods of pension benefits. As of June 30, 2011, the Company and its subsidiaries contributed R\$ 7,063 (R\$ 6,414 as of June 30, 2010) to Ultraprev, which amount is recorded as expense in the income statement for the period. The total number of employees participating in the plan as of June 30, 2011 was 7,309 active participants and 54 retired participants. In addition, Ultraprev had 29 former employees receiving benefits under the previous plan whose reserves are fully constituted.

b. Post-employment benefits

The Company and its subsidiaries recognized a provision for post-employment benefits mainly related to seniority bonus, payment of Severance Pay Fund, and health and life insurance plan for eligible retirees.

The net liabilities for such benefits recorded as of June 30, 2011 are R\$ 104,501 (R\$ 104,501 as of December 31, 2010), of which R\$ 12,060 (R\$ 11,339 as of December 31, 2010) are recorded as current liabilities and R\$ 92,441 (R\$ 93,162 as of December 31, 2010) as non-current liabilities.

The amounts related to such benefits were determined based on a valuation conducted by an independent actuary and are recorded in the interim financial information in accordance with Resolution CVM 600/2009.

Considerations on the financial and operational information

Standards and criteria adopted in preparing the information

From the year ending December 31st, 2010 onwards, CVM made mandatory the adoption of the International Financial Reporting Standards (“IFRS”) in the presentation of consolidated financial statements of the Brazilian publicly-held companies. Accordingly, Ultrapar's consolidated financial statements for the year ended December 31st, 2010 and for the quarters ended March 31st and June 30th, 2011 were prepared in compliance with the IFRS, which differ in certain aspects from the previous Brazilian accounting standards.

For an understanding of the effects of the adoption of the IFRS, we released financial spreadsheets on CVM’s website (www.cvm.gov.br), as well as on Ultrapar’s website (www.ultra.com.br), demonstrating the impacts of the accounting changes introduced by the IFRS on the main line items of the 2009 and 2010 financial statements in comparison with the amounts that would have been obtained without such changes. Additional information on the changes resulting from the adoption of the IFRS is available in note 2 to the financial statements for the year ended December 31st, 2010.

The financial information of Ultragaz, Ipiranga, Oxiteno, and Ultracargo is reported without elimination of intercompany transactions. Therefore, the sum of such information may not correspond to the consolidated financial information of Ultrapar. In addition, except when otherwise indicated, the amounts presented in this document are expressed in millions of R\$ and, therefore, are subject to rounding off. Consequently, the total amounts presented in the tables may differ from the direct sum of the amounts that precede them.

Effect of the divestment – Ultracargo’s road transportation, in-house logistics, and solid bulk storage

On July 1st, 2010, Ultrapar sold Ultracargo’s in-house logistics, solid bulk storage, and road transportation businesses, with the transfer of shares of AGT – Armazéns Gerais e Transporte Ltda. and Petrolog Serviços e Armazéns Gerais Ltda. to Aqces Logística Internacional Ltda. and the receipt of R\$ 74 million, in addition to the R\$ 8 million deposit received upon announcement of the transaction on March 31st, 2010. In October 2010, Ultrapar disbursed R\$ 2 million in connection with the expected working capital adjustment. The financial statements of Ultrapar and Ultracargo from 3Q10 onwards no longer include the businesses sold.

Effect of the acquisition – DNP

On October 26th, 2010, Ultrapar announced the signing of the sale and purchase agreement for the acquisition of 100% of the shares of Distribuidora Nacional de Petróleo Ltda. (“DNP”). The total value of the acquisition was R\$ 73 million, with an initial disbursement of R\$ 47 million in November 2010 and additional disbursements of R\$ 26 million in January 2011 and R\$ 1 million in July 2011 in connection with the final working capital adjustment. Ultrapar’s and Ipiranga’s financial statements started to consolidate the results of the acquired business from the closing of the acquisition, occurred on November 1st, 2010.

(2) Performance Analysis:

Net sales and services: Ultrapar's consolidated net sales and services amounted to R\$ 12,187 million in 2Q11, up 17% over 2Q10, as a consequence of the sales growth in Ultragaz, Ipiranga, and Oxiteno. Compared with 1Q11, Ultrapar's net sales and services increased by 13%, mainly as a result of seasonality between periods. In the first half of 2011, Ultrapar's net sales and services amounted to R\$ 22,994 million, up 13% over the first half of 2010.

Ultragaz: In 2Q11, Ultragaz's sales volume reached 417 thousand tons, up 2% over 2Q10, a growth obtained both in the bottled and in the bulk segment. Compared with 1Q11, sales volume grew by 9% as a result of seasonality between periods. In 1H11, Ultragaz's sales volume totaled 798 thousand tons, up 3% over 1H10. Ultragaz's net sales and services amounted to R\$ 945 million in 2Q11, up 3% over 2Q10, practically in line with the variation in the volume sold. Compared with 1Q11, net sales and services increased by 9%, as a result of seasonally higher volume. In 1H11, Ultragaz's net sales and services amounted to R\$ 1,812 million, up 3% over 1H10.

Ipiranga: Ipiranga's sales volume totaled 5,396 thousand cubic meters in 2Q11, up 8% over 2Q10. In 2Q11, the sales volume of fuels for light vehicles grew by 7%, as a consequence of an estimated 8% growth in the light vehicle fleet and investments made to expand the network, partially offset by the increased share of gasoline in the sales mix due to the reduced availability and competitiveness of ethanol in 2Q11. Excluding the effects of the increased share of gasoline in the sales mix, the volume of fuels for light vehicles would have grown by 11% compared with 2Q10. The diesel volume grew by 10% over 2Q10, as a result of the growth of the Brazilian economy and investments made to capture new clients. Compared with 1Q11, the total sales volume increased by 10% as a result of seasonality between periods. In 1H11, Ipiranga accumulated a sales volume of 10,294 thousand cubic meters, up 7% over 1H10. Ipiranga's net sales and services totaled R\$ 10,602 million in 2Q11, up 20% over 2Q10, mainly due to higher sales volume, increased costs of anhydrous and hydrated ethanol, and the increased share of gasoline in the sales mix as a consequence of the lower availability of ethanol in 2Q11. Compared with 1Q11, Ipiranga's net sales and services increased by 14%, mainly as a result of a seasonally higher volume. In 1H11, Ipiranga's net sales and services amounted to R\$ 19,935 million, up 15% over 1H10.

Oxiteno: Oxiteno's sales volume totaled 153 thousand tons, down 13% (23 thousand tons) from 2Q10. In the Brazilian market, sales volume decreased by 16% (21 thousand tons), due to spot sales of glycols in 2Q10 and the effect in the inventory levels of certain segments served by the company, as a consequence of the slowdown in economic growth. The reduction in volumes had less influence on the paints, cosmetics and detergents segments, allowing an improved sales mix in this period. Sales outside Brazil decreased by 4% (2 thousand tons), due to higher spot sales of glycols in 2Q10, partially offset by the increased volume sold by Oxiteno Mexico and Oxiteno Andina. Compared with 1Q11, sales volume decreased by 2% (4 thousand tons). Oxiteno's sales volume in 1H11 totaled 309 thousand tons, down 9% from 1H10. Oxiteno's net sales and services totaled R\$ 574 million in 2Q11, up 5% over 2Q10, despite the 11% stronger Real and lower sales volume, as a consequence of the recovery in the average prices in dollar during the last 12 months and of an improved sales mix in 2Q11. Compared with 1Q11, net sales and services also grew by 5%, due to higher average prices in dollar. In 1H11, Oxiteno's net sales and services totaled R\$ 1,122 million, up 10% over 1H10.

Ultracargo: In 2Q11, Ultracargo's average storage grew by 8% over 2Q10, due to increased handling of products in the Suape and Santos terminals. Compared with 1Q11, average storage increased by 13%, primarily due to a higher ethanol handling. In 1H11, Ultracargo accumulated a 4% increase in the average effective storage of its terminals over 1H10. Ultracargo's net sales and services totaled R\$ 68 million in 2Q11, down 21% from 2Q10, as a consequence of the sale of the in-house logistics, solid bulk storage, and road transportation businesses. Compared with 1Q11, net sales and services increased by 10%, mainly as a result of the higher average storage in 2Q11. In 1H11, Ultracargo's net sales and services totaled R\$ 130 million, down 23% from 1H10, as a consequence of the sale of the in-house

logistics, solid bulk storage, and road transportation businesses.

Cost of Goods Sold: Ultrapar's cost of goods sold amounted to R\$ 11,335 million in 2Q11, up 18% over 2Q10, as a result of the higher cost of goods sold in Ultragaz, Ipiranga, and Oxiteno. In relation to 1Q11, Ultrapar's cost of goods sold increased by 14% as a result of seasonality between periods. In the first half of 2011, Ultrapar's cost of goods sold amounted to R\$ 21,316 million, up 13% over the first half of 2010.

Ultragaz: Ultragaz's cost of goods sold amounted to R\$ 802 million in 2Q11, up 4% over 2Q10, mainly as a result of higher sales volume, the effects of inflation and costs related to two additional bottling facilities. Compared with 1Q11, the cost of goods sold increased by 9%, as a result of seasonally higher volume. In 1H11, Ultragaz's cost of goods sold totaled R\$ 1,538 million, up 3% over 1H10.

Ipiranga: Ipiranga's cost of goods sold amounted to R\$ 10,065 million in 2Q11, up 20% over 2Q10, mainly due to higher sales volume, increased costs of anhydrous and hydrated ethanol, and the increased share of gasoline in the sales mix as a consequence of the lower availability of ethanol in 2Q11. Compared with 1Q11, the cost of goods sold increased by 14%, mainly as a result of seasonally higher volume. In 1H11, Ipiranga's cost of goods sold totaled R\$ 18,874 million, up 14% over 1H10.

Oxiteno: Oxiteno's cost of goods sold in 2Q11 amounted to R\$ 443 million, up 3% from 2Q10, as a result of the increase in variable unit costs in dollars, partially offset by a 13% decrease in sales volume and an 11% stronger Real. Compared with 1Q11, the cost of goods sold increased by 6%, due to the increase in variable unit costs in dollars, partially offset by a reduction in volume sold and a stronger Real. In 1H11, Oxiteno's cost of goods sold totaled R\$ 860 million, up 5% over 1H10.

Ultracargo: Ultracargo's cost of services provided amounted to R\$ 29 million in 1Q11, down 34% from 2Q10, due to the effect of the sale of the in-house logistics, solid bulk storage and road transportation businesses. Compared with 1Q11, cost of services provided increased by 9%, mainly as a result of the higher average storage in 2Q11. In 1H11, Ultracargo's cost of services provided totaled R\$ 55 million, down 35% from 1H10.

Gross profit: The gross profit of Ultrapar amounted to R\$ 852 million in 2Q11, up 5% from 2Q10 as a consequence of the growth in the gross profit of Ipiranga and Oxiteno. In 1H11, Ultrapar's gross profit totalled R\$ 1,678 million, a 12% increase compared with 1H10.

Sales, General and Administrative Expenses: Sales, general and administrative expenses of Ultrapar reached R\$ 504 million in 2Q11, up 6% over 2Q10. In relation to 1Q11, Ultrapar's sales, general and administrative expenses remained stable. In the first half of 2011, Ultrapar's sales, general and administrative expenses totaled R\$ 1,007 million, up 8% over the first half of 2010.

Ultragaz: Ultragaz's sales, general and administrative expenses totaled R\$ 93 million in 2Q11, stable compared to 2Q10, due to higher expenses with promotional and sales campaigns and higher variable compensation in 2Q10, which offset the effects of inflation and the higher sales volume. Compared with 1Q11, Ultragaz's sales, general and administrative expenses increased by 10%, mainly as a result of seasonally higher volume and the low level of expenses in 1Q11. In 1H11, Ultragaz's sales, general and administrative expenses totaled R\$ 178 million, down 1% from 1H10.

Ipiranga: Ipiranga's sales, general and administrative expenses totaled R\$ 318 million in 2Q11, up 12% over 2Q10, mainly due to a higher volume sold, the effects of inflation on expenses, increased advertising and marketing expenses, and expansion projects. Compared with 1Q11, Ipiranga's sales, general and administrative expenses decreased by 1%, in spite of the higher volume sold, as a result of the concentration of expenses with variable compensation, advertising and marketing in 1Q11. In 1H11, Ipiranga's sales, general and administrative expenses totaled R\$ 639 million, up 12% over 1H10.

Oxiteno: Oxiteno's sales, general and administrative expenses totaled R\$ 77 million in 2Q11, up 4% over 2Q10, due to the effects of inflation on expenses and increased expenses with consultancy services, partially offset by the lower volume sold and by the effect of a stronger Real on expenses in dollars. Compared with 1Q11, Oxiteno's sales, general and administrative expenses decreased by 3%, mainly as a result of the lower

volume sold and the effects of a stronger Real on expenses in dollars. In 1H11, sales, general and administrative expenses totaled R\$ 157 million, up 13% over 1H10.

Ultracargo: Ultracargo's sales, general and administrative expenses totaled R\$ 17 million in 2Q11, down 26% from 2Q10, mainly due to the effect of the sale of the in-house logistics, solid bulk storage and road transportation businesses. Financial result: Ultrapar reported R\$ 70 million of net financial expense in 2Q11, up R\$ 4 million over the net financial expense in 2Q10 and 1Q11, mainly due to a rise in interest rates and a higher net debt, mainly as a consequence of the dividend payment in March. The purpose of including EBITDA information is to provide a measure for assessing our ability to generate cash from our operations. The EBITDA presented above was calculated based on the income before financial result, including depreciation and amortization and excluding income from sale of assets. In managing our business we rely on EBITDA as a means for assessing our operating performance and a portion of our employee profit sharing plan is linked to EBITDA performance. Because EBITDA excludes income from sale of assets, net financial income (expense), income tax, depreciation and amortization, it provides an indicator of general economic performance that is not affected by debt restructurings, fluctuations in interest rates or effective tax rates, or levels of income on disposal of assets, depreciation and amortization. Accordingly, we believe that this type of measurement is useful for comparing general operating performance from period to period and making certain related management decisions. We also calculate EBITDA in connection with covenants related to some of our financing. We believe that EBITDA enhances the understanding of our financial performance and our ability to satisfy principal and interest obligations with respect to our indebtedness as well as to fund capital expenditures and working capital requirements. EBITDA is not a measure of financial performance under Brazilian GAAP. EBITDA should not be considered in isolation, or as a substitute for net income, as a measure of operating performance, as a substitute for cash flows from operations or as a measure of liquidity. EBITDA has material limitations that impair its value as a measure of a company's overall profitability since it does not address certain ongoing costs of our business that could significantly affect profitability such as financial expenses and income taxes, depreciation or capital expenditures and associated charges.

We hereby inform that in accordance with the requirements of CVM Resolution 381/03, our independent auditors KPMG Auditores Independentes have not performed during these first six months of 2011 any service other than the external audit of the financial statements of Ultrapar and affiliated companies and subsidiaries.

Considerations on the financial and operational information

Standards and criteria adopted in preparing the information

From the year ending December 31st, 2010 onwards, CVM made mandatory the adoption of the International Financial Reporting Standards (“IFRS”) in the presentation of consolidated financial statements of the Brazilian publicly-held companies. Accordingly, Ultrapar's consolidated financial statements for the year ended December 31st, 2010 and for the quarters ended March 31st and June 30th, 2011 were prepared in compliance with the IFRS, which differ in certain aspects from the previous Brazilian accounting standards.

For an understanding of the effects of the adoption of the IFRS, we released financial spreadsheets on CVM’s website (www.cvm.gov.br), as well as on Ultrapar’s website (www.ultra.com.br), demonstrating the impacts of the accounting changes introduced by the IFRS on the main line items of the 2009 and 2010 financial statements in comparison with the amounts that would have been obtained without such changes. Additional information on the changes resulting from the adoption of the IFRS is available in note 2 to the financial statements for the year ended December 31st, 2010.

The financial information of Ultragaz, Ipiranga, Oxiteno, and Ultracargo is reported without elimination of intercompany transactions. Therefore, the sum of such information may not correspond to the consolidated financial information of Ultrapar. In addition, except when otherwise indicated, the amounts presented in this document are expressed in millions of R\$ and, therefore, are subject to rounding off. Consequently, the total amounts presented in the tables may differ from the direct sum of the amounts that precede them.

In October 2010, Ultrapar disbursed R\$ 2 million in connection with the expected working capital adjustment. The financial statements of Ultrapar and Ultracargo from 3Q10 onwards no longer include the businesses sold.

Effect of the acquisition – DNP

On October 26th, 2010, Ultrapar announced the signing of the sale and purchase agreement for the acquisition of 100% of the shares of Distribuidora Nacional de Petróleo Ltda. (“DNP”). The total value of the acquisition was R\$ 73 million, with an initial disbursement of R\$ 47 million in November 2010 and additional disbursements of R\$ 26 million in January 2011 and R\$ 1 million in July 2011 in connection with the final working capital adjustment. Executive summary of the results

The Brazilian economy maintained its growth trajectory in this second quarter, but at a slower pace, particularly due to the performance of the industrial sector. Such slowdown mainly reflects a more adverse international economic environment and the successive increases in the Brazilian basic interest rate, aimed at controlling the rise of inflation, which accumulated a 3.9% increase in 1H11 according to the IPCA (Índice de Preços ao Consumidor Amplo). The worsening in the international markets coupled with increases in local interest rates contributed to an increased inflow of funds to the country, leading the dollar to end the second quarter at R\$ 1.56/US\$, down 13% from the same period of 2010. On the other hand, the rise in interest rates had a lower impact on the retail sector, mainly due to the favorable conditions in the labor market and in the automotive sector, in which the number of light vehicles licensed in 1H11 accumulated a 10% growth over the same period of 2010.

In 2Q11, Ultragas’s sales volume grew 2% compared with 2Q10, a growth presented both in the bottled and the bulk segments. Ultragas's EBITDA reached R\$ 79 million in the quarter, down 5% from 2Q10, mainly due to the start up of operations in two additional LPG filling plants by Ultragas, in maturing process, and to the effects of inflation.

At Ipiranga, the continued expansion of the light vehicle fleet and of the Brazilian economy, combined with the investments for network expansion, resulted in an 8% increase in the fuel sales volume over 2Q10. Ipiranga’s EBITDA in 2Q11 amounted to R\$ 308 million, up 15% over 2Q10, resulting in an EBITDA margin of R\$ 57/m³, higher than the R\$ 54/m³ EBITDA margin for 2Q10.

Oxiteno’s sales volume totaled 153 thousand tons, down 13% from 2Q10, mainly as a result of spot sales of glycols in 2Q10 and the effects in the inventory levels of certain segments served by the company, as a consequence of the

slowdown in the economic growth . Oxiteno's EBITDA totaled R\$ 80 million in 2Q11, up 13% over 2Q10, as a result of the recovery in margins during the last 12 months and the improved sales mix, in spite of the lower volume sold and an 11% stronger Real.

In 2Q11, Ultracargo's average storage increased by 8% compared with 2Q10, due to an increase in the handling of products at the Suape and Santos terminals. Ultracargo's EBITDA totaled R\$ 31 million in 2Q11, up 8% from 2Q10, partially offset by the sale of the in-house logistics, solid bulk storage and road transportation businesses on July 1st, 2010.

Ultrapar's consolidated EBITDA totaled R\$ 503 million in 2Q11, up 8% over 2Q10, as a consequence of the EBITDA growth in Ipiranga, Oxiteno and Ultracargo. Net earnings for 2Q11 reached R\$ 215 million, up 12% over 2Q10, mainly as a result of the EBITDA growth.

Ipiranga – Ipiranga’s sales volume totaled 5,396 thousand cubic meters in 2Q11, up 8% over 2Q10. In 2Q11, the sales volume of fuels for light vehicles grew by 7%, as a consequence of an estimated 8% growth in the light vehicle fleet and investments made to expand the network, partially offset by the increased share of gasoline in the sales mix due to the reduced availability and competitiveness of ethanol in 2Q11. Excluding the effects of the increased share of gasoline in the sales mix, the volume of fuels for light vehicles would have grown by 11% compared with 2Q10. The diesel volume grew by 10% over 2Q10, as a result of the growth of the Brazilian economy and investments made to capture new clients. Compared with 1Q11, the total sales volume increased by 10% as a result of seasonality between periods. In 1H11, Ipiranga accumulated a sales volume of 10,294 thousand cubic meters, up 7% over 1H10.

Oxiteno – Oxiteno’s sales volume totaled 153 thousand tons, down 13% (23 thousand tons) from 2Q10. In the Brazilian market, sales volume decreased by 16% (21 thousand tons), due to spot sales of glycols in 2Q10 and the effect in the inventory levels of certain segments served by the company, as a consequence of the slowdown in economic growth. The reduction in volumes had less influence on the paints, cosmetics and detergents segments, allowing an improved sales mix in this period. Sales outside Brazil decreased by 4% (2 thousand tons), due to higher spot sales of glycols in 2Q10, partially offset by the increased volume sold by Oxiteno Mexico and Oxiteno Andina. Compared with 1Q11, sales volume decreased by 2% (4 thousand tons). Oxiteno’s sales volume in 1H11 totaled 309 thousand tons, down 9% from 1H10.

Outlook

Even facing a lower pace of economic growth, we continue to see good prospects and investment opportunities for our businesses. At Ipiranga, the continued expansion of the light vehicle fleet during the recent months and the investments made for expansion of the distribution network, with a focus on the North, Northeast and Midwest regions, will continue to drive the growth of the fuel sales volume. At Ultragas, the investments in expansion and in capturing new clients will translate into higher volumes, mainly for the bulk segment. At Oxiteno, the completion of an important investment cycle, which resulted in an increased specialty chemicals production capacity, should allow an increased production flexibility and benefit from the growth of the Brazilian market in the coming years. Ultracargo will continue to capture the results from the investments underway for expanding the capacity of its terminals, particularly the Suape terminal, which is expected to start operations in the next quarter. Lastly, the completion of the implementation of the new corporate governance structure enables Ultrapar to deepen interest alignment and to improve investment capacity, so as to continue in its value creation path, with potential for even more ambitious projects.
