Syngenta, USAID renew global collaboration to improve food security

Renewed MOU to develop agriculture in Africa, Asia and Latin America.

MOU strengthens Research & Development, smallholder farmer capacity, young professionals training and agricultural supply chains.

MOU to leverage new and existing partnerships and alliances.

Syngenta and the U.S. Agency for International Development (USAID) today signed an updated Memorandum of Understanding (MOU) to support agriculture and food security activities in Africa, Asia and Latin America.

This renewed collaboration, which started in 2013, aims to promote food security amongst smallholder farmers by cooperating on improving research and development, technology adoption and farmer know-how to boost farm productivity - whilst also tackling new challenges like the recent invasion of the fall armyworm pest (FAW) in Africa.

A key focus will be to improve the capacity of smallholder farmers to trial, adopt and safely use inputs to boost their yields as well as identifying and equipping young men and women interested in farming as a business. Selected projects will incorporate the use of advanced digital and satellite technology to enhance pest prediction and surveillance, support decision making and improve project evaluation. Programs on environmental sustainability and smallholder capacity training will further underpin Syngenta's Good Growth Plan.

Erik Fyrwald, Chief Executive Office of Syngenta, said "We place great value on our continued partnership with USAID, which has helped us reach and train more smallholder farmers across the world than we would have been able to achieve alone. USAID's work in supporting partnerships like this helps deliver real change for farmers in terms of sustainability and profitability."

About Syngenta

Syngenta is a leading agriculture company helping to improve global food security by enabling millions of farmers to make better use of available resources. Through world class science and innovative crop solutions, our 28,000 people in over 90 countries are working to transform how crops are grown. We are committed to rescuing land from degradation, enhancing biodiversity and revitalizing rural communities. To learn more visit www.syngenta.com and www.goodgrowthplan.com. Cautionary statement regarding forward-looking statements

Some of the statements contained in this press release are forward-looking statements. These statements are based on current expectations, assumptions, estimates and projections, and involve known and unknown risks, uncertainties and other factors that may cause results, levels of activity, performance or achievements to be materially different from any forward-looking statements. These statements are generally identified by words or phrases such as "believe", "anticipate", "expect", "intend", "plan", "will", "may", "should", "estimate", "predict", "potential", "continue" or the negative of such terms or other similar expressions. If underlying assumptions prove inaccurate or unknown risks or uncertainties materialize, actual results and the timing of events may differ materially from the results and/or timing discussed in the forward-looking statements, and you should not place undue reliance on these statements. Syngenta disclaims any intent or obligation to update any forward-looking statements as a result of developments occurring after the period covered by this press release or otherwise.
