Table of Contents**BOWNE & CO., INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****(Unaudited)****(000 s omitted, except share information and where noted)****Note 1. Basis of Presentation**

The financial information as of September 30, 2002 and for the three and nine month periods ended September 30, 2002 and 2001 has been prepared without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. In the opinion of management, all adjustments (consisting of only normal recurring adjustments) necessary for a fair presentation of the consolidated financial position, results of operations and of cash flows for each period presented have been made on a consistent basis. Certain information and footnote disclosures normally included in consolidated financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted. These financial statements should be read in conjunction with the Company's annual report on Form 10-K and consolidated financial statements. Operating results for the three and nine months ended September 30, 2002 may not be indicative of the results that may be expected for the full-year.

Note 2. Inventories

Inventories of \$23,858 at September 30, 2002 included raw materials of \$7,021 and work-in-process of \$16,837. At December 31, 2001, inventories of \$19,453 included raw materials of \$6,489 and work-in-process of \$12,964.

Note 3. Earnings (Loss) Per Share

Shares used in the calculation of basic earnings per share are based on the weighted-average number of shares outstanding, and for diluted earnings per share after adjustment for the assumed conversion of all potentially dilutive securities. Basic and diluted loss per share is calculated by dividing the net loss by the weighted-average number of shares outstanding during each period. The incremental shares from assumed conversion of all potentially dilutive securities are not included in the calculation of diluted loss per share since their effect would have been antidilutive. The weighted average diluted shares outstanding for the three months ended September 30, 2002 and 2001 excludes the dilutive effect of approximately 3,523,126 and 2,178,306 options, respectively, since such options have an exercise price in excess of the average market value of the Company's common stock during the respective period. The weighted average diluted shares outstanding for the nine months ended September 30, 2002 and 2001 excludes the dilutive effect of approximately 1,090,636 and 2,420,047 options, respectively.

	Three Months Ended September 30,	
	2002	2001
Basic shares	33,530,908	33,113,280
Diluted shares	34,653,874	33,113,280
	Nine Months Ended September 30,	
	2002	2001
Basic shares	33,444,469	33,063,081
Diluted shares	34,822,231	34,095,085

Note 4. Marketable Securities and Other Comprehensive Income (Loss) Items

Edgar Filing: BOWNE & CO INC - Form 10-Q

The Company classifies its investments in marketable securities as available-for-sale. Available-for-sale securities are carried at fair value, with the unrealized gains and losses, net of tax, reported as a separate component of stockholders' equity. At September 30, 2002, the fair value of marketable securities exceeded

Table of Contents

cost by \$761. At December 31, 2001, the fair value of marketable securities exceeded cost by \$2,202. The net unrealized gains, after deferred taxes, were \$457 and \$1,322 at September 30, 2002 and December 31, 2001, respectively.

The cumulative foreign currency translation adjustment was \$(3,499) and \$(10,582) at September 30, 2002 and December 31, 2001, respectively.

Note 5. Acquisitions

Berlitz GlobalNet

On September 27, 2002, BGS Companies, Inc., a subsidiary of the Company, acquired all of the issued and outstanding stock of Berlitz GlobalNet, Inc. (GlobalNet) from Berlitz International, Inc. and Berlitz Investment Corporation for \$75 million in cash. The acquisition took place at the end of the quarter, accordingly, no operating results were included in the condensed consolidated statement of operations. GlobalNet provides globalization and localization services, software testing, translation and interpretation services and is included as part of the globalization segment. The Company expects that the acquisition of GlobalNet will strengthen BGS' s position in the globalization and localization industry and enhance BGS' s results by enabling BGS to combine complementary services, improve efficiencies, and diversify its customer base.

The net cash outlay of \$56.8 million, which includes approximately \$1.1 million of acquisition costs and is net of \$19.3 million of cash in the business, has been allocated to assets acquired and liabilities assumed based upon estimated fair value at the date of acquisition. The excess of the purchase price over the estimated fair value of net tangible assets, totaling approximately \$39.8 million, has been allocated between goodwill and other identifiable intangible assets based upon estimated fair values. Based upon preliminary estimates, \$9.5 million has been allocated to the value of customer contracts and customer relationships and \$0.4 million has been allocated to the value of proprietary technology. The amount allocated to customer relationships will be amortized over its estimated life of 5-10 years, and the amount allocated to the proprietary technology will be amortized over its estimated useful life of 3 years. The portion allocated to goodwill will not be amortized. Further refinements to the purchase price allocation are likely to be made based upon the completion of a third party valuation. The final purchase price allocation is not expected to have a material effect on the Company' s financial statements.

The Company accrued \$3.4 million of costs associated with the acquisition of GlobalNet' s operations. The integration is expected to eliminate redundant functions and excess facilities in geographical regions where the Company has globalization operations in the same location as GlobalNet. These costs include estimated severance costs (\$2.3 million) and lease termination costs (\$1.1 million) associated with eliminating GlobalNet facilities and terminating certain GlobalNet employees.

In addition, the Company will incur certain costs to integrate the GlobalNet operations, including costs to shut down certain BGS facilities and terminate certain BGS employees. These costs, which are estimated to be approximately \$4.5 to \$5 million, will be included as part of restructuring and integration expenses in the consolidated statements of operations during the fourth quarter of 2002.

As of September 30, 2002, all of the costs associated with the integration were unpaid, and are expected to be paid during 2002 and 2003.

Table of Contents

The following unaudited pro forma consolidated results of operations for the Company as a whole are presented as if the acquisition of GlobalNet had been made at the beginning of the periods presented.

	Three Months Ended September 30,	
	2002	2001
	(In thousands except per share amounts) (Unaudited)	
Revenue	\$ 240,722	\$ 268,759
Income (loss) from continuing operations	3,387	(4,700)
Net income (loss)	3,387	(4,700)
Earnings (loss) per share from continuing operations:		
Basic	\$.10	\$ (.14)
Diluted	.10	(.14)
Total earnings (loss) per share:		
Basic	\$.10	\$ (.14)
Diluted	.10	(.14)

	Nine Months Ended September 30,	
	2002	2001
	(In thousands except per share amounts) (Unaudited)	
Revenue	\$ 842,504	\$ 908,209
Income from continuing operations	17,475	1,184
Net income (loss)	17,475	(15,179)
Earnings per share from continuing operations:		
Basic	\$.52	\$.04
Diluted	.50	.03
Total earnings (loss) per share:		
Basic	\$.52	\$ (.46)
Diluted	.50	(.46)

The pro forma amounts include interest expense on acquisition debt and amortization of identifiable intangible assets and do not include any amortization of goodwill associated with the GlobalNet acquisition, as required under SFAS No. 141. In addition, the pro forma amounts exclude royalty expenses relating to the use of the Berlitz trade name since such expenses will not be incurred prospectively. The pro forma amounts were tax-effected using the Company's effective tax rate. In addition, the pro forma amounts do not reflect any benefits from economies or synergies that might be achieved from integrating operations. The pro forma information is unaudited and is not necessarily indicative of the results of operations that would have occurred had the purchase been made at the beginning of the periods presented or the future results of the combined operations.

Note 6. Goodwill and Intangible Assets

In June 2001, the FASB issued Statement No. 141, Business Combinations (SFAS 141), and Statement No. 142, Goodwill and Other Intangible Assets (SFAS 142). SFAS 141 required the purchase method of accounting be used for all business combinations initiated after June 30, 2001. SFAS 141 also provided new criteria to determine whether an acquired intangible asset should be recognized separately from goodwill.

Under the provisions of SFAS 142, upon adoption, amortization of existing goodwill ceases and the remaining book value is to be tested for impairment at least annually at the reporting unit level using a new

Table of Contents

two-step impairment test. The general provisions of SFAS 142 were effective for the Company as of January 1, 2002. However, certain provisions were effective for all business combinations consummated after June 30, 2001. The Company applied the accounting and disclosure provisions of SFAS 141 and the applicable provisions of SFAS 142 to its acquisition of Mendez S.A. (Mendez) during the third quarter of 2001 and BGS's acquisition of GlobalNet during the third quarter of 2002.

In connection with SFAS 142's transitional goodwill impairment evaluation, the Statement requires the Company to perform an assessment of whether there is an indication that goodwill is impaired as of the date of adoption, January 1, 2002. To accomplish this, the Company determined the fair value of each reporting unit and compared it to the carrying amount of the reporting unit at that date. No impairment charges resulted from this evaluation since the fair value of each reporting unit exceeded the carrying amount.

As of the date of adoption, the Company had unamortized goodwill in the amount of \$172,321 and unamortized identifiable intangible assets in the amount of \$18,150. Goodwill not subject to amortization (net of accumulated amortization through December 31, 2001) is \$208,087 at September 30, 2002. Goodwill increased \$35,766 in 2002, primarily as a result of the acquisition of GlobalNet in September 2002, as well as foreign currency translation adjustments and adjustments to preliminary purchase price allocations made in prior periods, primarily to goodwill recorded in the globalization segment.

The gross amounts and accumulated amortization of identifiable intangible assets is as follows:

	September 30, 2002		December 31, 2001	
	Gross Amount	Accumulated Amortization	Gross Amount	Accumulated Amortization
Customer lists	\$ 30,322	\$ 4,165	\$ 20,100	\$ 3,022
Software licenses and proprietary technology	1,556	185	1,100	28
	<u>\$ 31,878</u>	<u>\$ 4,350</u>	<u>\$ 21,200</u>	<u>\$ 3,050</u>

Amortization expense related to identifiable intangible assets was \$1,290 for the nine months ended September 30, 2002. Estimated annual amortization expense for the years ended December 31, 2002 through December 31, 2006, including the effect of the GlobalNet acquisition, is shown below:

2002	\$ 2,030
2003	\$ 2,920
2004	\$ 2,920
2005	\$ 2,888
2006	\$ 2,720

The following adjusted financial information reflects the impact that SFAS 142 would have had on prior year income (loss) from continuing operations and diluted earnings (loss) per share from continuing operations for the three months ended September 30, 2001 if adopted in 2001:

	Three Months Ended September 30, 2001	
	Income (loss) From Continuing Operations	Earnings (Loss) Per Share From Continuing Operations
Amounts as reported	\$(3,703)	\$(.11)
Amortization, net of income taxes	1,794	.05

Adjusted amounts	\$ (1,909)	\$ (.06)
------------------	------------	----------

Table of Contents

The following adjusted financial information reflects the impact that SFAS 142 would have had on prior year income from continuing operations and diluted earnings per share from continuing operations for the nine months ended September 30, 2001 if adopted in 2001:

	Nine Months Ended September 30, 2001	
	Income From Continuing Operations	Earnings Per Share From Continuing Operations
Amounts as reported	\$ 965	\$.03
Amortization, net of income taxes	4,693	.13
Adjusted amounts	<u>\$5,658</u>	<u>\$.16</u>

Note 7. Debt

On July 2, 2002, the Company completed its new \$175 million unsecured three-year revolving credit facility. The new credit agreement bears interest at LIBOR plus 80-160 basis points or an alternative base rate (greater of Federal Funds rate plus 50 basis points or the Prime rate) depending on certain leverage ratios. Prior to July 2, 2002, the Company had borrowings under its \$300 million unsecured five-year revolving credit agreement, with a weighted average interest rate of approximately 2%. The weighted average interest rate for that credit agreement was based on LIBOR plus 25 basis points.

At September 30, 2002, the Company had borrowings of \$87 million under the new \$175 million revolving credit agreement, with a weighted average interest rate of approximately 5% for the quarter ended September 30, 2002. At December 31, 2001, the Company had borrowings of \$112 million under its former revolving credit agreement.

On February 6, 2002, the Company completed a \$75 million private placement of senior unsecured notes with several institutional lenders. The notes have an average life of 7.2 years (ranging from 5-10 years), with an average fixed interest rate during the first nine months of 2002 of approximately 7%. Interest is payable every six months. The proceeds from the private placement were used to pay down a portion of the Company's former revolving credit facility. This amount was classified as long-term debt on the balance sheet as of December 31, 2001 and September 30, 2002. The remainder of the Company's borrowings under the revolving credit agreement were included in the current portion of long-term debt in the condensed consolidated balance sheet as of December 31, 2001, since it was due to expire in July 2002. The Company completed its new credit facility on July 2, 2002, therefore the outstanding borrowings at September 30, 2002 have been included in long-term debt in the condensed consolidated balance sheet.

The terms of the new notes and revolving credit agreement provide certain limitations on additional indebtedness, sale and leaseback transactions, asset sales and certain other transactions. Additionally, the Company is subject to certain financial covenants based on its results of operations.

Note 8. Discontinued Operations

In April 2001, management determined that it would no longer invest in its Internet consulting and development segment (Immersant) and announced its decision to exit the operation. Effective with the second quarter of 2001, this segment is reflected as a discontinued operation. All prior period results have been restated accordingly, including the reallocation of fixed overhead charges to other business segments.

The discontinued operations had net liabilities (including accrued restructuring and discontinuance costs) of \$3,365 and \$5,324 at September 30, 2002 and December 31, 2001, respectively.

The balance in accrued restructuring and discontinuance costs represents the estimated remaining costs to exit this operation, as well as the remaining previously recorded restructuring costs. Prior to the second quarter of 2001, this accrual had been reflected as part of the Company's overall restructuring accrual. The

Table of Contents

activity in accrued restructuring and discontinuance costs through September 30, 2002, including additions and payments made on that accrual, is summarized below.

	Severance and Personnel- Related Costs	Occupancy Costs	Other	Total
Balance at December 31, 2000	\$ 1,160	\$ 762	\$ 106	\$ 2,028
2001 Expenses	1,291	5,097	323	6,711
Paid in 2001	(2,451)	(1,823)	(289)	(4,563)
Balance at December 31, 2001		4,036	140	4,176
Paid in 2002		(1,274)	(64)	(1,338)
Balance at September 30, 2002	\$	\$ 2,762	\$ 76	\$ 2,838

Note 9. Accrued Restructuring and Integration Charges

During the second quarter of 2001, the Company recorded restructuring charges in connection with cost reductions impacting all three of its segments. The cost reduction program included the closing of an office in the globalization segment, downsizing several locations in the outsourcing segment, and a reduction in workforce of approximately 10% of the Company's financial print operations. In October 2001, the Company reduced the workforce of its domestic and international financial printing operations by an additional 10%, or approximately 350 employees. The Company recorded \$10,789 in restructuring charges related to these activities during the year ended December 31, 2001.

In September 2002, the Company recorded restructuring charges of \$2,305 in connection with an additional reduction in workforce of approximately 2.5% of the Company's total workforce, or approximately 200 employees, primarily in the financial printing segment. The third quarter charges also include a non-cash asset impairment charge of \$1,300.

In connection with the Company's acquisition of Mendez in August 2001, the Company incurred certain costs to integrate the operations of Mendez, including costs to shut down certain BGS facilities and terminate certain BGS employees. These costs, which totaled \$2,704, were included as part of restructuring and integration expenses in the consolidated statements of operations during the year ended December 31, 2001.

The activity related to these accruals through September 30, 2002, including additions and payments made, are summarized below.

	Severance and Personnel- Related Costs	Occupancy Costs	Other	Total
Balance at December 31, 2000	\$ 851	\$	\$ 14	\$ 865
2001 Expense	10,565	1,741	1,187	13,493
Paid in 2001	(7,172)	(1,213)	(597)	(8,982)
Balance at December 31, 2001	4,244	528	604	5,376
2002 Expense	2,255		50	2,305
Paid in 2002	(4,135)	(321)	(654)	(5,110)
Balance at September 30, 2002	\$ 2,364	\$ 207	\$	\$ 2,571

Occupancy costs represent facility exit costs associated with the closing of an office in the globalization segment and the downsizing of several locations in the outsourcing segment. The remaining accrued severance and personnel-related costs are expected to be paid during 2002 and 2003.

Edgar Filing: BOWNE & CO INC - Form 10-Q

The Company also accrued \$5,100 of costs associated with the acquisition of Mendez operations during the year ended December 31, 2001, which were accounted for as part of the cost of the acquisition. These costs included costs to shut down certain Mendez facilities and terminate certain Mendez employees.

Table of Contents

The payments made on that accrual are summarized below.

	Severance and Personnel- Related Costs	Occupancy Costs	Other	Total
Opening balance	\$ 3,865	\$ 1,013	\$ 222	\$ 5,100
Paid in 2001	(1,281)	(369)	(192)	(1,842)
Balance at December 31, 2001	2,584	644	30	3,258
Paid in 2002	(1,470)	(274)		(1,744)
Balance at September 30, 2002	\$ 1,114	\$ 370	\$ 30	\$ 1,514

In connection with the Company's acquisition of GlobalNet in September 2002, the Company accrued \$3,419 of costs associated with the integration of GlobalNet's operations, which were accounted for as part of the cost of the acquisition. These costs include estimated severance costs (\$2.3 million) and lease termination costs (\$1.1 million) associated with eliminating GlobalNet facilities and terminating certain GlobalNet employees. In addition, the Company is expected to incur certain costs to integrate the operations of GlobalNet, including costs to shut down certain BGS facilities and terminate certain BGS employees. These costs, estimated to be approximately \$4.5 to \$5 million, have not been accrued at September 30, 2002, as the criteria for accrual had not been met. Such costs will be included as part of restructuring and integration expenses in the consolidated statements of operations during the quarter ended December 31, 2002.

Note 10. Sale of Chicago Building

In June 2002, Bowne's financial printing operations moved to a new leased facility in Chicago. The Company completed the sale of its former Chicago facility in September 2002 for approximately \$8.3 million. The net carrying amount of the facility was approximately \$3.4 million, and as such, this transaction resulted in a gain of approximately \$4.9 million for the period ended September 30, 2002.

Note 11. Sale of Publishing Division

In September 2002, the Company sold its publishing division for approximately \$15 million, of which \$14 million was received in cash. The remainder is being held in escrow until March 27, 2003 for the purpose of providing a source of payment for indemnity claims under the asset purchase agreement. During 2001, this division had sales of approximately \$5.6 million, with net liabilities of approximately \$0.8 million at closing. This transaction resulted in a gain of approximately \$14.9 million, \$0.5 million which may be recognized upon the expiration of the escrow agreement.

Note 12. Segment Information

The Company continues to focus its business on "Empowering Your Information," a term used to define the management, repurposing and distribution of a client's information. The Company manages and repurposes information for distribution by digital, Internet or paper media. It manages documents on the clients' site or at its own facilities.

The Company's continuing operations are classified into three reportable business segments: financial printing, outsourcing and globalization. The services of each segment are marketed throughout the world. The major services provided by each segment are as follows:

Financial Printing transactional financial, corporate reporting, mutual fund, investment company services, commercial and digital printing.

Outsourcing document management solutions primarily for the legal and financial communities. This segment is commonly referred to as Bowne Business Solutions (BBS). The results for the outsourcing segment include the operating results of Document Management Services, Inc., from its date of acquisition, April 6, 2001.

Table of Contents

Globalization outsourced globalization solutions, including technical writing and content creation, terminology and content management, and localization and translation services. This segment is commonly referred to as Bowne Global Solutions. The results for the globalization segment include the operating results of Mendez from its date of acquisition, August 29, 2001. The results for the globalization segment for the fourth quarter of 2002 will include the operating results of Berlitz GlobalNet, acquired by the Company on September 27, 2002.

A fourth segment (Internet consulting and development) which previously provided integrated Internet applications primarily for the financial services sector was discontinued effective with the second quarter of 2001. Accordingly, segment information is no longer being presented for that segment.

Information regarding the operations of each business segment is set forth below. Performance is evaluated based on several factors, of which the primary financial measure is business segment earnings before interest, income taxes, depreciation and amortization expense (EBITDA). The Company also uses earnings before interest, income taxes, and amortization expense (EBITA) as a measure of performance; therefore, this information is also presented. The Company manages income taxes on a global basis. Segment performance is evaluated exclusive of the disposal of business units, purchased in-process research and development charges, restructuring, integration and asset impairment charges, other expenses, and other income.

BOWNE & CO., INC. AND SUBSIDIARIES
MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(000's omitted, except share information and where noted)

Cautionary Statement Concerning Forward-Looking Statements

The Company desires to take advantage of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995 (the "1995 Act"). The 1995 Act provides a "safe harbor" for forward-looking statements to encourage companies to provide information without fear of litigation so long as those statements are identified as forward-looking and are accompanied by meaningful cautionary statements identifying important factors that could cause actual results to differ materially from those projected.

Set forth below is a summary of factors the Company believes are important to its business and that could cause actual results to differ from the Company's expectations. The Company is publishing these factors pursuant to the 1995 Act. Such factors should not be construed as exhaustive or as an admission regarding the adequacy of disclosure made by the Company prior to the effective date of the 1995 Act. Readers should understand that many factors govern whether any forward-looking statements can or will be achieved. Any one of those factors could cause actual results to differ materially from those projected. The words "believe," "expect," "anticipate," "intend," "aim," "will" and similar words identify forward-looking statements. The Company cautions readers that the following important factors, among others, could affect the Company's actual results and could cause the Company's actual results to differ materially from those expressed either orally or in writing in any forward-looking statements made by or on behalf of the Company:

Loss or retirement of key executives, employees or technical personnel.

The effect of changes within the Company's organization or in the compensation and benefit plans and the ability of the Company to attract and retain experienced and qualified management and sales personnel.

Natural events and acts of God such as earthquakes, fires or floods.

The effects of war or acts of terrorism.

The ability of the Company to integrate the operations of acquisitions into its operations.

General economic or market conditions affecting the demand for transactional financial printing or other solution offerings.

Results of Operations

Historically, the Company has primarily provided financial printing and other related services. Revenue related to transactional financial printing services is affected by cyclical conditions of the capital markets. Over the past few years the Company has diversified and expanded its service offerings to be less dependent on transactional financial printing and to reduce the exposure that earnings have to the cyclical financial markets. Revenue (as a percentage of the Company's total revenue) relating to the financial printing segment represents 67% for the nine months ended September 30, 2002, compared to 71% for the nine months ended September 30, 2001. Revenue relating to the financial printing segment has declined as a percentage of total revenue due to a combination of the Company's diversification efforts and the overall slowdown in capital market activity.

Management evaluates the performance of its operating segments separately to monitor the different factors affecting financial results. Each segment is subject to review and evaluation as management monitors current market conditions, market opportunities and available resources. The performance of each segment is discussed over the next few pages. The Internet consulting and development segment is no longer being discussed as it was classified as a discontinued operation during the second quarter of 2001, based on management's decision to exit this segment.

Table of Contents

In addition to measures of operating performance determined in accordance with generally accepted accounting principles, management also uses EBITDA and EBITA to evaluate performance. EBITDA is defined as earnings before interest, income taxes, depreciation and amortization expense. EBITA is defined as earnings before interest, income taxes and amortization expense. Segment performance is evaluated exclusive of the disposal of business units, purchased in-process research and development charges, restructuring, integration and asset impairment charges, other expenses and other income. EBITDA and EBITA, as adjusted for these items, are measured because management believes that such information is useful in evaluating the results of certain segments relative to other entities that operate within these industries and to its affiliated segments. EBITDA and EBITA are alternatives to, and not replacement measures of, operating performance as determined in accordance with generally accepted accounting principles.

The Company continually reviews its business, manages costs, and aligns its resources with market demand, especially in light of the recent volatility of the capital markets and sustained decrease in transactional financial printing activity. As a result, the Company took several steps over the last two years to bring its costs in line with the level of current market activity.

In the fourth quarter of 2000 the Company undertook cost cutting initiatives resulting in reductions in fixed and variable costs, and a staff reduction of approximately 3% of the Bowne worldwide workforce. In April 2001 the Company undertook an additional 10% reduction in the financial print segment and related corporate overhead staff.

In August 2001, in conjunction with the upgrades and investments made to its manufacturing network, Bowne announced the discontinuance of its Chicago pressroom, thus furthering the consolidation of the worldwide manufacturing network. In October 2001, the Company undertook an additional 10% reduction in financial print staffing and related corporate overhead. In total, the cost reduction initiatives taken by the Company in 2001 have resulted in a reduction of Bowne's annual cost base for continuing operations by approximately \$70 million.

In September 2002, the Company undertook additional cost cutting initiatives resulting in reductions in fixed and variable costs, and a staff reduction of approximately 2.5% of the Bowne worldwide workforce, primarily in the financial printing segment. These staff reductions resulted in approximately \$2.3 million in severance and related personnel costs. These cost reduction initiatives taken by the Company are expected to result in an additional \$10 million reduction of Bowne's annual cost base.

Much of these expense reductions are the result of the elimination of redundant staff and facilities that the Company maintained while it was bringing new technology solutions and manufacturing capacity on-line to support the unprecedented growth in transactional financial print work from 1996-2000. The Company does not anticipate the need to fully replace this staff or the discontinued facilities in order to service the anticipated eventual return of the capital transactional market. In addition to the cost reductions in its financial printing segment, the Company has also made workforce reductions in its outsourcing and globalization segments due to softness in those markets.

The Company recently announced that it expects to make additional cost reductions to its fixed cost base over the next 12 months. The Company is refining its plans, and is targeting approximately \$35 million of annualized cost savings. In addition, the Company expects to reduce capital spending in 2003. These cost reductions are expected to primarily impact the financial printing segment, but will also impact the globalization segment as well, as described in Note 5 to the condensed consolidated financial statements.

The Company completed two acquisitions during 2001 that affect comparability of results. In April 2001, the Company completed the acquisition of Document Management Services, Inc. (DMS), an outsourcing business in Boston that is complementary to the Company's existing outsourcing business and has strengthened its position in this important market. In August 2001, the Company completed the acquisition of Mendez S.A., which strengthened the Company's leadership position in the globalization and localization industry by combining complementary lines of business, enhancing service offerings, and adding clients in the transportation, aerospace and health care sectors, among others.

Table of Contents

On September 27, 2002, BGS Companies, Inc. completed the acquisition of Berlitz GlobalNet, Inc. (GlobalNet) from Berlitz International, Inc. and Berlitz Investment Corporation for \$75 million. GlobalNet is headquartered in Princeton, New Jersey and provides globalization and localization services, software testing, translation and interpretation services. The Company expects that the acquisition of GlobalNet will strengthen BGS's position in the globalization and localization industry and enhance BGS's results by enabling BGS to combine complementary services, improve efficiencies, and diversify its customer base. This acquisition became part of the globalization segment.

With regard to future acquisition activity, the Company will continue to evaluate potential acquisition candidates in areas that will enhance its existing businesses.

The Company also completed two other transactions in the third quarter of 2002 that affect comparability of results. The Company sold its securities publishing division for approximately \$15 million, and recognized a gain on the sale of approximately \$14.9 million. During 2001, this operation had sales of approximately \$5.6 million, with net liabilities of approximately \$0.8 million at closing. The Company also completed the sale of the Chicago office building for approximately \$8.3 million, resulting in a gain of \$4.9 million during the third quarter of 2002.

Quarter Ended September 30, 2002 Compared to Quarter Ended September 30, 2001

Financial Printing

Revenue decreased \$27,708, or 18%, with the largest class of service in this segment, transactional financial printing, down \$21,949, or 30%, compared to the year earlier period. Overall, the market for transactional financial printing remained low due to the continued lack of capital market activity, both domestic and international. For example, world-wide merger and acquisition activity decreased approximately 37% in the third quarter of 2002, compared to the prior year. In addition, the number of IPO transactions decreased to its lowest level in 25 years. This is a continued decline from the level that the Company experienced over the last two years in the domestic capital markets. The Company continues to maintain its industry leading market share in both the domestic and international markets. During the third quarter, the Company provided its services on more mergers and acquisitions transactions than its two largest competitors combined.

Commercial printing revenue decreased \$2,643, or 26%, primarily as the result of decreased demand for commercial printing services and a decision by the Company to focus on higher margin work. Mutual fund services revenue decreased \$4,287, or 11%, which is primarily due to the consolidation of funds and tightened spending by mutual funds in reaction to the slowness in the financial markets. The decrease is also partially due to timing differences in job completion between the current year and prior year.

Gross margin contribution of this segment decreased by \$3,624, or 8%, but the margin percentage increased by approximately four percentage points to 34%, reflecting better resource utilization due primarily to the cost savings realized as a result of the Company's cost reduction initiatives, and also due to the focus on higher margin business.

Selling and administrative expenses decreased \$3,193, or 8%, to \$39,256 primarily as a result of cost reductions implemented during the year, including the workforce reductions during the fourth quarter of 2001. The decrease was also the result of lower expenses that are directly associated with sales such as selling expenses (including commissions) and certain variable administrative expenses. As a percent of sales, selling and administrative expenses increased by approximately three percentage points to 30%. This increase is primarily a result of lower revenues available to absorb certain fixed selling and administrative expenses.

EBITDA decreased \$431, or 8%, to \$4,776 as a result of the foregoing.

Outsourcing

Revenue decreased \$823, or approximately 1% as compared to the same period in the prior year. Decreased revenue from certain existing customers due to client downsizings, as well as bankruptcy filings by former customers and the sustained downturn in the capital markets more than offset volume growth on certain existing client contracts and new customers.

Table of Contents

The outsourcing segment primarily provides services to the legal, investment banking and financial services industries. Activity from existing clients can decrease when the financial markets experience downturns such as the one we are currently in. Services are contractual and, therefore, help provide a means to manage business volatility more effectively. Declining volumes can be offset somewhat through monthly minimum charges on certain contracts. At the same time, additional outsourcing opportunities from new clients are becoming more prevalent as businesses continue to focus on core competencies and look for cost effective alternatives to managing their document and infrastructure requirements.

Gross margin from this segment decreased \$166, or 1%, while the margin percentage remained consistent at 20%. This decrease in gross margin is directly related to the reduced level of revenues.

Selling and administrative expenses increased \$492, or 6%, to \$8,821, and as a percent of sales, these expenses increased one percentage point to 15%. This increase is caused by certain administrative costs, including facilities costs, increasing, despite decreased revenue.

EBITDA from this segment decreased by \$658, or 20%, to \$2,601, and decreased by approximately one percentage point as a percentage of sales.

Globalization

Revenue increased \$632, or 3%. This is due to the acquisition of Mendez in August 2001, offset by lower spending by some of our largest clients in the technology industry, caused primarily by delays in their new product releases. None of GlobalNet's results are included in our results of operations since the acquisition was completed at the end of the quarter. We will begin to realize the impact of revenues from the GlobalNet acquisition during the fourth quarter of this year.

Gross margin from this segment decreased \$1,616, or 17%, and the gross margin percentage decreased approximately seven percentage points to 30%. Lower than expected revenue growth on a higher fixed cost base, resulting from the Mendez acquisition, is the principal cause of the margin decline. On a sequential basis, gross margin percentage increased from 23% in the second quarter of 2002 to 30% in the third quarter of 2002, as a result of certain cost cutting initiatives taken during the second quarter of 2002. The Company anticipates additional margin improvement as it merges redundant facilities and integrates its workforce with that of GlobalNet.

Selling and administrative expenses increased \$2,698, or 37%, to \$10,002, and as a percentage of revenue increased approximately ten percentage points to 39%. The increase in selling and administrative expenses is generally related to the acquisition of Mendez. The increase as a percentage of revenue is primarily due to lower than expected revenue growth on a higher fixed cost base. The Company expects this segment to benefit from economies of scale created by the acquisition of GlobalNet and anticipates cost savings as it merges redundant facilities and integrates the two workforces.

As a result of the foregoing, EBITDA decreased to a loss of \$2,341 from earnings of \$1,973 for the same period in 2001.

Summary

As a result of the foregoing, overall revenue decreased \$27,899, or approximately 12%, to \$214,156. The decrease is primarily attributed to the decrease in financial printing. There was an \$5,406, or 8%, decrease in gross margin; and the gross margin percentage increased approximately one percentage point to approximately 29%. This increase in gross margin percentage was attributable to the improvements generated from better resource utilization due to workforce reductions during 2001, as well as a focus on higher margin business, offset by declining margin percentages in globalization.

Selling and administrative expenses on a company-wide basis remained flat at \$58,079. This category is affected by decreases primarily due to lower costs directly related to the decrease in sales, such as selling expenses (including commissions and bonuses) and certain variable administrative expenses, as well as decreases in administrative expenses as a result of workforce reductions and reductions in discretionary

Table of Contents

spending, offset by increased selling and administrative expenses from the acquisition of Mendez. As a percentage of sales, these expenses increased by 3% to approximately 27%. This increase is primarily a result of lower revenues available to absorb certain fixed selling and administrative expenses.

Depreciation increased \$416, and amortization decreased \$1,997 as a result of the adoption of SFAS 142 which eliminated goodwill amortization effective January 1, 2002.

There were \$3,605 in restructuring and asset impairment charges in the current year. Restructuring charges of \$2,305 were recorded in connection with the reduction in workforce of approximately 2.5% of the Company's total workforce, or approximately 200 employees, primarily in the financial printing segment. In addition, there was a non-cash asset impairment charge of \$1,300 in the outsourcing segment.

Interest expense increased \$398 as a result of a combination of a higher average interest rate in the current year, offset by lower average borrowings in 2002 (\$117 million for the three months ended September 30, 2002 as compared to \$133 million for the same period in 2001).

The gain on sale of subsidiary relates to the sale of the Company's publishing division (gain of \$14,869) in the current year, as discussed in Note 11 to the financial statements.

The gain on the sale of building relates to the sale of the Company's Chicago office building (gain of \$4,889) in the current year, as discussed in Note 10 to the financial statements.

The overall effective income tax rate for the third quarter of 2002 was 43%. The overall effective tax rate for the third quarter of 2001 was impacted by the loss in the third quarter of 2001 versus income in the current quarter. The change in the effective income tax rate is primarily due to the change in non-deductible items, primarily the elimination of goodwill amortization, while the rate applied to taxable income remained at approximately 39%.

As a result of the foregoing, net income was \$4,649 in 2002 as compared to a net loss of \$3,703 for the same period last year.

Nine Months Ended September 30, 2002 Compared to Nine Months Ended September 30, 2001

Financial Printing

Revenue decreased \$70,166, or 12%, with the largest class of service in this segment, transactional financial printing, down \$29,784, or 13% compared to the year earlier period. The market for transactional financial printing remained low and was down during the first nine months of 2002, as compared to 2001, primarily due to the lack of capital market activity in the nine months of 2002, both domestic and international. This is a continued decline from what the Company experienced over the last two years in the capital markets. Despite this downturn, the Company continues to maintain its industry leading market share in both the domestic and international markets. During the nine months ended September 30, 2002, the Company performed financial printing services for two of the largest IPOs in the market, for Travelers Property Casualty and for Nestle's spin-off of Alcon, and for 41% of all IPOs in that period, an increase in market share of eleven percentage points over the prior period. The Company also performed financial printing services for some significant mergers and acquisitions transactions during the nine months ended September 30, 2002. In Europe, the Company performed the financial printing services for the Schering acquisition of Collateral Therapeutics, and Barilla's acquisition of Kamps. Also, revenue increased in Asia, mainly from China, Korea and Taiwan, and the Company performed financial printing services during the second quarter of 2002 for the Bank of China initial public offering.

Commercial printing revenue decreased \$28,077, or 51%, primarily as a result of the decreased demand for commercial printing services, as well as the sale of the Company's Montreal commercial printing operations in June 2001 and a decision by the Company to focus on higher margin work. Digital printing revenue decreased \$4,735, or 22%, due to decreased volumes of statement printing, as well as a decision by the Company to focus on higher margin digital printing work.

Table of Contents

Gross margin contribution of this segment decreased by \$5,315, or 3%; however, the gross margin percentage increased by approximately four percentage points to 39%, reflecting better resource utilization due primarily to the cost savings realized as a result of the Company's cost reduction initiatives, and also due to the focus on higher margin business.

Selling and administrative expenses decreased \$11,575 or 7%, to \$146,263, primarily as a result of cost reductions implemented during the year, including the workforce reductions during the second and fourth quarters of 2001. The decrease was also the result of lower expenses that are directly associated with sales such as selling expenses (including commissions) and certain variable administrative expenses. As a percent of sales, selling and administrative expenses increased by approximately two percentage points to 29%. This increase is primarily the result of lower revenues available to absorb certain fixed selling and administrative expenses.

EBITDA increased \$6,260, or 14%, to \$51,579 primarily as a result of the Company's cost reduction initiatives.

Outsourcing

Revenue increased \$2,290, or 1%. The increase is attributed to the acquisition of DMS in April 2001. Other revenue decreased approximately 1% compared to the prior year. Volume growth on existing client contracts and new customers was more than offset by decreased revenue from certain existing customers due to client downsizings and the sustained downturn in the capital markets, as well as lost revenue from former customers in bankruptcy.

The outsourcing segment primarily provides services to the legal, investment banking and financial services industries. Activity from existing clients can decrease when the financial markets experience downturns such as the one we are currently in. Services are contractual and, therefore, help provide a means to manage business volatility more effectively. Declining volumes can be offset somewhat through monthly minimum charges on certain contracts. At the same time, additional outsourcing opportunities from new clients are becoming more prevalent as businesses continue to focus on core competencies and look for cost effective alternatives to managing their document and infrastructure requirements.

Gross margin from this segment increased \$3,044, or 9%, while the margin percentage increased approximately two percentage points to 21%. This increase in gross margin percentage is directly related to cost cutting initiatives such as the 2001 workforce reduction, a continued focus on driving productivity while improving costs, and improving bottom line growth through effective asset management and automation.

Selling and administrative expenses increased \$2,383, or 10%, to \$26,472, and as a percent of sales, it increased by approximately one percentage point to 15%. This increase is caused by certain administrative costs, including facilities costs, increasing, and the acquisition of DMS.

EBITDA from this segment increased by \$661, or 7%, to \$9,722 and remained flat as a percentage of sales.

Globalization

Revenue increased \$11,834 or 18%. This is due to the acquisition of Mendez in August 2001, offset by lower spending by some of our largest clients in the technology industry, caused primarily by delays in their new product releases. None of GlobalNet's results are included in our results of operations since the acquisition was completed at the end of the quarter. We will begin to realize the impact of revenues from the GlobalNet acquisition during the fourth quarter of this year.

Gross margin from this segment decreased \$1,179, or 5%, while the gross margin percentage decreased approximately seven percentage points to 30%. Lower than expected revenue growth on a higher fixed cost base, resulting from the Mendez acquisition, is the principal cause of the margin decline. The Company anticipates margin improvement as it merges redundant facilities and integrates BGS's workforce with that of GlobalNet.

Table of Contents

Selling and administrative expenses increased \$9,165, or 45%, to \$29,564, and as a percentage of revenue increased seven percentage points to approximately 37%. The increase in selling and administrative expenses is directly related to the acquisition of Mendez. The increase as a percentage of revenue is primarily due to lower than expected revenue growth on a higher fixed cost base. The Company expects this segment to benefit from economies of scale created by the acquisition of GlobalNet and anticipates cost savings as it merges redundant facilities and integrates the two workforces.

As a result of the foregoing, EBITDA decreased to a loss of \$5,853 from earnings of \$4,491 for the same period in 2001.

Summary

Overall revenue decreased \$56,042, or 7%, to \$767,107. The decrease is attributed to the decline in financial printing offset by increases in outsourcing and globalization. There was a \$3,450, or 1%, decrease in gross margin; and the gross margin percentage increased approximately two percentage points to 34%. This increase in gross margin percentage was attributable to the improvements generated from better resource utilization due to workforce reductions during 2001, as well as a focus on higher margin business, offset by declining margin percentages in globalization.

Selling and administrative expenses on a company-wide basis remained flat at \$202,299. This category is affected by decreases primarily due to lower costs directly related to the decrease in sales, such as selling expenses (including commissions and bonuses) and certain variable administrative expenses, as well as decreases in administrative expenses as a result of workforce reductions and reductions in discretionary spending, offset by increased selling and administrative expenses from the acquisitions of Mendez and DMS. As a percentage of sales, these expenses increased by approximately two percentage points to 26%. This increase is primarily the result of lower revenues available to absorb certain fixed selling and administrative expenses.

Depreciation decreased \$251, primarily as a result of the sale of the commercial printing operations in Montreal, Quebec in June 2001, and amortization decreased \$4,843 as a result of the adoption of SFAS 142 which eliminated goodwill amortization effective January 1, 2002.

There were \$3,605 in restructuring and asset impairment charges in 2002, as compared to \$8,228 in the prior year, as previously discussed in Note 9 to the financial statements.

Interest expense increased \$210 as a result of a combination of a higher average interest rate in the current year (7% for the nine months ended September 30, 2002, as compared to 5% for the same period in 2001), and higher average borrowings in 2002 (\$128 million for the nine months ended September 30, 2002, as compared to \$119 million for the same period in 2001).

The gain (loss) on sale of subsidiary relates to the sale of the Company's publishing division (gain of \$14,869) in 2002, as discussed in Note 11 to the financial statements, and to the sale of the commercial print operation in our Montreal location (loss of \$1,858) in 2001.

The gain on the sale of building relates to the sale of the Company's Chicago office building (gain of \$4,889) in the current year, as discussed in Note 10 to the financial statements.

The overall effective income tax rate for the first nine months of 2002 was 43%. The overall effective income tax rate for the first nine months of 2001 was impacted by the non-deductibility of the loss on discontinued operations during that period. After taking this into consideration, the overall effective income tax rate for the first nine months of 2001 was slightly higher than in 2002 due to the change in non-deductible items, primarily the elimination of goodwill amortization, while the rate applied to taxable income remained at approximately 39%.

As a result of the foregoing, income from continuing operations for the first nine months of 2002 was \$19,258 as compared to \$965 for the same period last year.

Table of Contents**Business Outlook**

The following statements and certain statements made elsewhere in this document are based upon current expectations. These statements are forward looking and actual results may differ materially. Current trends in the global economy, particularly in the domestic and international capital markets, make it difficult at present to project future activity.

The Company expects the fourth quarter results from continuing operations to be consistent with the third quarter. The results of its financial print business will continue to be adversely affected by the anticipated continued softness in the capital markets, both domestically and internationally.

Although several circumstances, including volatile market conditions, have limited the Company's visibility into future financial results, we estimate the fourth quarter and full year 2002 results will be in the ranges shown below. The outlook reflects results from continuing operations, and the EBITDA and per share information excludes any restructuring charges or one-time items.

	2002	
	4th Quarter	Full-year
Revenues, approximately	\$215 to \$230 million	\$1.0 billion
EBITDA, in the range of	\$3 to \$8 million	\$60 to \$65 million
Depreciation and amortization, approximately	\$11 million	\$44 million
Interest expense, approximately	\$2 million	\$7 million
Diluted (loss) earnings per share, in the range of	\$(0.10) to \$(0.20)	\$0.11 to \$0.17
Capital expenditures, approximately	\$15 million	\$38 million

For comparison purposes, if the new accounting standards for goodwill amortization had been effective for all of 2001, this would have added approximately \$0.05 and \$0.18 per diluted share to the Company's fourth quarter and full-year 2001 financial results, respectively.

Liquidity and Capital Resources

At September 30, 2002, the Company had a working capital ratio of 2.03 to 1 and working capital of \$154,716 compared to a ratio of 1.42 to 1 and working capital of \$78,142 at December 31, 2001. Approximately \$37 million of the increase in working capital is due to the decrease in the current portion of long-term debt as a result of renewing the revolving line of credit, since this debt was classified as current at December 31, 2001 and is classified as long-term at September 30, 2002. In addition, approximately \$31 million of the increase in working capital is due to the acquisition of GlobalNet on September 27, 2002. This acquisition was funded with long-term debt.

In February 2002, the Company completed a \$75 million private placement of senior unsecured notes with several institutional lenders. The notes have an average life of 7.2 years with an approximate interest rate of 7.3%. The proceeds from the private placement were used to pay down a portion of the Company's existing revolving credit facility. The Company completed its new three-year \$175 million revolving credit facility on July 2, 2002, which had an outstanding balance of \$87 million at September 30, 2002. The new credit agreement bears interest at LIBOR plus 80-160 basis points or an alternative base rate (greater of Federal Funds rate plus 50 basis points or the Prime rate) depending on certain leverage ratios.

The terms of the new notes and revolving credit agreement provide certain limitations on additional indebtedness, sale and leaseback transactions, asset sales and certain other transactions. Additionally, the Company is subject to certain financial covenants based on its results of operations.

It is expected that the cash generated from operations, working capital and the Company's borrowing capacity will be sufficient to fund its development and integration needs (both foreign and domestic), finance future acquisitions and capital expenditures, provide for the payment of dividends, and meet the Company's debt service requirements. The Company experiences certain seasonal factors with respect to its borrowing

Table of Contents

needs; the heaviest period for borrowing is normally the second quarter. The Company's existing borrowing capacity provides for this seasonal increase.

Capital expenditures for the nine months ended September 30, 2002 were \$23,541. Capital expenditures for the full year 2002 are expected to be approximately \$38 million. The Company plans to reduce capital spending in 2003.

Cash Flows

The Company's focus on working capital management continues, including managing receivables, inventory and free cash flow. Average days sales outstanding improved to 73 days for the nine months ended September 30, 2002 from 74 days for the nine months ended September 30, 2001. The Company's net cash provided by operating activities was \$28,984 and \$8,058 for the nine months ended September 30, 2002 and 2001, respectively. The increase in cash provided by operations is primarily a result of lower payments for employee compensation and accounts payable in 2002 as compared to 2001, along with less cash used in discontinued operations in the current year.

Net cash used in investing activities was \$56,828 and \$84,051 for the nine months ended September 30, 2002 and 2001, respectively. The decrease was primarily the result of increased proceeds from the sale of the publishing division and the sale of the Chicago facility in the current year, as well as less net cash used in the acquisition of businesses in the current year.

Net cash provided by financing activities was \$47,866 and \$73,921 for the nine months ended September 30, 2002 and 2001, respectively. Lower net borrowings in the current year were the primary cause of the decrease.

Recent Accounting Pronouncements

In July 2001, the FASB issued Statement of Financial Accounting Standards No. 143 (SFAS 143), Accounting for Asset Retirement Obligations . SFAS 143 requires entities to record the fair value of a liability for an asset retirement obligation in the period in which it is incurred. When the liability is initially recorded, the entity is required to capitalize the cost by increasing the carrying amount of the related long-lived asset. Over time, the liability is accreted to its present value each period, and the capitalized cost is depreciated over the useful life of the related asset. SFAS 143 is effective for fiscal years beginning after June 15, 2002 and will be adopted by the Company effective fiscal 2003. The Company believes adoption of this standard will not have a material effect on its financial statements.

In July 2002, the FASB issued Statement of Financial Accounting Standard No. 146 (SFAS 146), Accounting for Costs Associated with Exit or Disposal Activities , which nullifies Emerging Issues Task Force Issue No. 94-3 (EITF 94-3). SFAS 146 requires that a liability for a cost associated with an exit or disposal activity be recognized when the liability is incurred, whereas under EITF 94-3, the liability was recognized at the commitment date to an exit plan. The Company is required to adopt the provisions of SFAS 146 effective for exit or disposal activities initiated after December 31, 2002. The Company is currently evaluating the impact of adoption of this statement.

Quantitative and Qualitative Disclosure about Market Risk

The Company's market risk is principally associated with trends in the domestic and international capital markets, particularly in the financial print segment and to a limited degree, in the outsourcing segment. This includes trends in the initial public offerings and mergers and acquisitions markets, both important components of the financial printing segment. The Company also has market risk tied to interest rate fluctuations related to its debt obligations and fluctuations in foreign currency, as discussed below.

Interest Rate Risk

Our exposure to market risk for changes in interest rates relates primarily to our short-term investment portfolio, long-term debt obligations, revolving credit agreement and synthetic lease commitment. We do not

Table of Contents

use derivative instruments in our short-term investment portfolio. Our senior unsecured notes issued in February 2002 consist of fixed rate instruments, and therefore, would not be impacted by changes in interest rates. The notes have an average life of 7.2 years (ranging from 5-10 years), and had an average interest rate of approximately 7% for the nine months ended September 30, 2002. Amounts borrowed under the revolving credit agreement (which expired in July 2002) bore interest at LIBOR plus 25 basis points or an alternative base rate (greater of Federal Funds rate plus 50 basis points or adjusted Eurodollar rate plus 25 basis points) depending on certain leverage ratios plus ten basis points on the unused portion. During the six months ended June 30, 2002, the average interest rate approximated 2%. Amounts borrowed under the new three-year \$175 million revolving credit facility that was signed in July 2002 bear interest at LIBOR plus 80-160 basis points or an alternative base rate (greater of Federal Funds rate plus 50 basis points or the Prime rate) depending on certain leverage ratios. During the three months ended September 30, 2002, the average interest rate approximated 5%. A hypothetical change in the annual interest rate of 1% per annum would result in a change in interest expense of approximately \$0.5 million, based on the average outstanding balances under the revolving credit facility during the nine months ended September 30, 2002. The rental payments on the Company's synthetic lease are based upon the cost of the equipment plus LIBOR plus 150 or 200 basis points (while the Canadian portion of the lease is based on Canadian LIBOR plus 35 basis points). The synthetic lease had a remaining principal balance of \$17.7 million as of September 30, 2002.

Foreign Exchange Rates

The Company derives a portion of its revenues from various foreign sources. To date, the Company has not experienced significant gains or losses as a result of fluctuations in the exchange rates of the related foreign currencies. However, as the Company expands its global presence, fluctuations may become significant. The Company's globalization segment is impacted by foreign currency fluctuations since its labor costs are predominantly denominated in foreign currencies, while a significant portion of its revenue is denominated in U.S. dollars. This is somewhat mitigated by the fact that revenue from the Company's international financial print operations is denominated in foreign currencies, while some of its costs are denominated in U.S. dollars. To date, the Company has not used foreign currency hedging instruments to reduce its exposure to foreign exchange fluctuations. The Company has reflected translation (loss) income of \$(1,194) and \$7,083 in its statements of comprehensive income (loss) for the three and nine months ended September 30, 2002, respectively. This income is primarily attributed to the fluctuation in value between the U.S. dollar and the euro, pound sterling and Canadian dollar.

Equity Price Risk

We currently do not have any significant investments in marketable equity securities. The Company's defined benefit pension plan holds investments in both equity and fixed income securities. The amount of the Company's annual contribution to the plan is dependent upon, among other things, the return on the plan's assets. To the extent there are fluctuations in equity prices, the amount of the Company's annual contribution could be affected. For example, a decrease in equity prices could increase the amount of the Company's annual contributions to the plan.

Controls and Procedures

The Company maintains a system of controls and procedures designed to provide reasonable assurance as to the reliability of the financial statements and other disclosures included in this report, as well as to safeguard assets from unauthorized use or disposition. The Company's management, including the Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures within 90 days prior to the filing date of this report, pursuant to Exchange Act Rule 13a-14. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective in ensuring that all material information required to be filed in this quarterly report has been made known to them in a timely fashion. There have been no significant changes in internal controls, or in other factors that could significantly affect internal controls, subsequent to the date the Chief Executive Officer and Chief Financial Officer completed their evaluation.

**CERTIFICATIONS PURSUANT TO
SECTION 302 OF
THE SARBANES-OXLEY ACT OF 2002**

CERTIFICATION

I, Robert M. Johnson, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Bowne & Co., Inc.;
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:
 - a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and
 - c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent function):
 - a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
6. The registrant's other certifying officers and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
