EXIDE TECHNOLOGIES

PART I

Item 1. *Business*

Overview and General Discussion of the Business

Exide Technologies is a Delaware corporation organized in 1966 to succeed to the business of a New Jersey corporation founded in 1888. Exide's principal executive offices are located at 13000 Deerfield Parkway, Building 200, Alpharetta, Georgia 30004.

The Company is one of the largest manufacturers of lead acid batteries in the world, with fiscal 2007 net sales of approximately \$2.9 billion. The Company's operations in (a) the Americas and (b) Europe and Rest of World (ROW) represented approximately 41% and 59%, respectively, of fiscal 2007 net sales. Exide manufactures and supplies lead acid batteries for transportation and industrial applications worldwide.

Unless otherwise indicated or unless the context otherwise requires, references to any fiscal year refer to the year ended March 31 of that year (e.g., fiscal 2007 refers to the period beginning April 1, 2006 and ending March 31, 2007, fiscal 2006 refers to the period beginning April 1, 2005 and ending March 31, 2006, and fiscal 2005 refers to the period beginning April 1, 2004 and ending March 31, 2005). Unless the context indicates otherwise, the Company, Exide, we or us refers to Exide Technologies and its subsidiaries.

Narrative Description of Business

The Company is a global leader in stored electrical energy solutions and one of the world's largest manufacturers of lead acid batteries used in transportation, motive power, network power, and military applications. The Company reports its financial results through four principal business segments: Transportation Americas, Transportation Europe and ROW, Industrial Energy Americas, and Industrial Energy Europe and ROW. See Note 20 to the Consolidated Financial Statements for financial information regarding these segments.

Transportation

Transportation batteries include ignition and lighting batteries for cars, trucks, off-road vehicles, agricultural and construction vehicles, motorcycles, recreational vehicles, boats, and other applications. The market for transportation batteries is divided between sales to aftermarket customers and original equipment manufacturers (OEM's).

The Company is among the leading suppliers of transportation batteries to the aftermarket and to the OEM market for a variety of applications. Transportation batteries represented 60% of the Company's net sales in fiscal 2007. Within the transportation segments, aftermarket sales represented approximately 76% of net sales and OEM sales represented 24%. The Company's principal batteries sold in the transportation market are primarily represented by the following brands: *Centra*, *DETA*, *Exide*, *Exide NASCAR Select*, *Exide Select Orbital*, *Fulmen*, *Tudor*, and private labels. The Company also sells batteries for marine and recreational vehicles, including the following products:

Exide Select Orbital Marine

A battery that brings all the advantages of the Company's patented spiral wound technology to the marine market, maintains nearly a full charge during the off-season, and can be quickly recharged. This

Nautilus Gold Dual Purpose Stowaway

Dual Purpose

Nautilus Mega Cycle

Stowaway Deep Cycle

Stowaway Nautilus

Stowaway Powercycler

battery is also sealed, making it ideal for closed environments (such as inside a boat hull).

A combination battery, replacing separate starting and deep cycle batteries in two-battery marine and recreational vehicle systems.

A high performance, dual terminal battery.

A battery that employs technology to satisfy the power requirements of large engines, sophisticated electronics and on-board accessories.

A completely sealed, valve regulated (VRLA) battery with absorptive glass mat (AGM) technology and prismatic plates that offers features and benefits similar to the *Exide Select Orbital*, and was the first sealed, AGM battery introduced into the marine battery market.

Table of Contents

Most of the Company's transportation batteries are vented, maintenance-free lead acid batteries. However, the *Exide Select Orbital* and *Maxxima* batteries have a patented spiral wound technology and state-of-the-art recombinant design. The *STR/STE* batteries use recombination technology to allow a lead acid battery to be installed in the passenger compartment of a vehicle with substantially reduced fluid loss and acid fumes under normal operating conditions.

Aftermarket sales are driven by a number of factors, including the number of vehicles in use, average battery life, average age of vehicles, average miles driven, weather conditions, and population growth. Aftermarket demand historically has been less cyclical than OEM demand due to the three to five-year replacement cycle. Some of the Company's major aftermarket customers include Wal-Mart, NAPA, CSK Auto Inc., Tractor Supply, Canadian Tire, ADI, and GAUI. In addition, the Company is also a supplier of authorized replacement batteries for major manufacturers including John Deere, Renault/Nissan and PACCAR.

OEM sales are driven in large part by new vehicle build rates, which are driven by consumer demand for vehicles. The OEM market is characterized by an increasing preference by OEMs for suppliers with established global production capabilities that can meet their needs as they expand internationally and increase platform standardization across multiple markets. The Company supplies batteries for four of the 10 top-selling vehicles in the United States of America (U.S.) and three of the 10 top-selling vehicles in Europe. Select customers include Ford, International Truck & Engine, Fiat, the PSA group (Peugeot S.A./Citroën), Case/New Holland, BMW, John Deere, Volkswagen, and Toyota.

Transportation Americas

In the Americas, the Company sells aftermarket transportation products through various distribution channels, including mass merchandisers, auto parts outlets, wholesale distributors, and battery specialists, and sells OEM transportation products through dealer networks. The Company's operations in the U.S. and Canada include a network of 82 branches that sell and distribute batteries and other products to the Company's distributor channel network, battery specialists, national account customers retail stores, and OEM dealers. In addition, these branches collect spent batteries for the Company's six recycling centers.

With its six recycling centers, the Company is the largest recycler of lead in North America. The recycling centers of the Company supply secondary lead that is present in greater than 98% of Exide's Transportation and Industrial products manufactured in North America as well as supplying lead to a variety of external customers. These operations also recover and recycle plastic materials that are used to produce new Exide battery covers and cases. With a constant focus on environmental compliance, safety, and technology, Exide is committed to being a leader in the successful and responsible activity of recycling lead and plastic to produce products that provide value to consumers and industry.

In the Americas, the Company's transportation aftermarket battery products include the following:

<i>Orbit® Starting or Deep Cycle Batteries</i>	Advanced recombinant technology and construction designed to withstand temperature extremes for reliable performance.
<i>NASCAR Extreme</i>	Cast AG9 Technology designed for longer life performance in high temperature climates. Product has been tested best in class in all climates.
<i>NASCAR Select 84 Automotive Batteries</i>	Race-proven, Stabl-Lok® Insulation prevents shorts and prolongs battery life. Also adds a measure of protection against high underhood temperatures and punishing vibration.

<i>Commercial Batteries</i>	Batteries designed specifically for heavy duty applications such as long haul, short haul, stop-and-go, and off road.
<i>Lawn & Garden/Garden Tractor/Utility Batteries</i>	Consistent, maintenance-free starting power. Perfect for light duty, garden tractor, utility, snow blower and snowmobile applications.
<i>Nautil[®] Marine Batteries</i>	Manual Starting, Marine/RV Dual Purpose and Marine/Deep Cycle.
<i>Exide[®] Ordnance Batteries</i>	Dry charged. Each plate is electrically charged to suspend the stored energy for unusually long periods; until ready for activation. A quick charge will bring this battery to 100% readiness.
<i>Exide NASCAR Select</i>	Officially licensed by NASCAR.
<i>Golf Car/Electric Vehicle Batteries</i>	Thicker, 5% antimony plates ensure slower discharge/recharge cycles, withstand high internal heat and improve cycle life.

Table of Contents***Transportation Europe and ROW***

The Company sells aftermarket batteries primarily through battery wholesalers, OEM dealer networks, hypermarkets, service installers, purchasing groups in Europe, and oil companies. Wholesalers and OEM dealers have traditionally represented the majority of this market, but supermarket chains, replacement-parts stores (represented by purchasing groups), and hypermarkets have become increasingly important. Battery wholesalers now sell and distribute batteries to a network of automotive parts retailers, service stations, independent retailers, and supermarkets throughout Europe.

In Europe, the Company has five major Company-owned brands: *Exide* and *Tudor*, which are promoted as pan-European brands, and *DETA*, *Centra* and *Fulmen*, which have strong local recognition levels. In the European market, the Company generally offers transportation batteries in five categories:

Basic Model	Marketed under private label brand names in France, Germany, and Spain, under the <i>Basic</i> name in Italy, and various names in other markets.
Upgrade Model	Marketed under the <i>Classic</i> mark, which carries a 24-month warranty, and marketed under the <i>Equipe</i> name in France, the <i>Classic</i> name in Germany, the <i>Leader</i> name in Italy, the <i>Tudor</i> name in Spain, and various other names in other markets.
Premium Model	Marketed under the <i>Formula</i> name in France, the <i>Millennium 3</i> name in Spain, the <i>Top Start Plus</i> name in Germany, the <i>Ultra</i> name in Italy, the <i>Ultra</i> brand in the United Kingdom, and under various other names in other markets.
<i>STR/STE</i>	Approved for use by BMW and was included in some models beginning with the 2000 model year.
<i>Maxxima</i>	The equivalent of the <i>Exide Select Orbital</i> .

Industrial Energy

The Company's Industrial Energy segments supply both motive power and network power applications. Industrial Energy batteries represented 40% of the Company's net sales in fiscal 2007. Within the Industrial Energy segments, Motive Power sales represented approximately 60% of net Industrial sales and Network Power sales represented approximately 40% of net Industrial sales.

The motive power battery market is divided into the OEM market, which is comprised of the manufacturers of electric vehicles, and the replacement market, which includes large users of such electric vehicles and original equipment dealer networks. The Company's sales are split equally between OEM's and aftermarket.

Motive power batteries are used in the materials handling industry for forklift trucks and electric counter balance trucks, pedestrian pallet trucks, low level order pickers, turret trucks, tow tractors, reach trucks, and very narrow aisle (VNA) trucks, and in other industries, including machinery in the floor cleaning market, the powered wheelchair market, mining locomotives, and electric road vehicles. The Company also offers a complete range of battery chargers and associated equipment for the operation and maintenance of battery-powered vehicles. Motive power batteries have useful lives lasting an average of five years.

The Company's motive power batteries are composed of 2-volt cells assembled in numerous configurations and sizes to provide capacities ranging from 30 Ah to 1500 Ah. Battery construction for the motive power markets ranges from

flooded flat plate and tubular to recombinant AGM and gel. The Company pioneered the development of recombinant valve regulated lead acid batteries in both AGM and gel constructions. These batteries provide major advantages to users by eliminating the need to add water or mix the electrolyte in order to physically maintain the batteries, and by providing flexibility in packaging and transport. The Company's motive power products also include systems solutions such as intelligent chargers, automatic watering systems, and fleet management devices to meet a wide spectrum of customer application requirements.

Table of Contents

Network power (also known as standby, stationary, or reserve) batteries are used for back-up power applications to ensure continuous power supply in case of main (primary) power failure or outage. Network power batteries are used to provide back-up power for use with telecommunications systems, computer installations, hospitals, process control, air traffic control, security systems, utility, railway and military applications. Telecommunications applications include central and local switching systems, satellite stations, wireless base stations and mobile switches, optical fiber repeating boxes, cable TV transmission boxes, and radio transmission stations.

The Company's network power battery products are generally sold principally to communications/data, end users, industrial, and military and are used for back-up power applications. Network power batteries are designed to offer service lives ranging from 5 to 20 years depending on construction and application.

There are two primary network power lead acid battery technologies: valve-regulated (VRLA, or sealed) and vented (flooded). There are two types of VRLA technologies—AGM and gel. These technologies are described as follows:

- | | |
|-------------------|--|
| Vented (flooded): | This technology is used in applications requiring high reliability but with the ability to allow for regular maintenance. The construction involves positive flat or tubular positive plates. The transparent containers and accessible internal construction features of these batteries allow end users to check the battery's physical condition. |
| VRLA /AGM: | This technology utilizes an electrolyte immobilized in an absorbent glass mat separator. This technology, offering higher energy density than gel, is particularly well adapted to high rate applications and is designed to offer up to a 20-year service life, depending on environment and application. |
| VRLA gel: | This technology utilizes a gel electrolyte. VRLA batteries have replaced other types of network power batteries because they can enhance safety and reduce maintenance compared to vented batteries and can be used in both vertical and horizontal positions. The <i>Sonnenschein</i> gel technology offers the advantages of high reliability and long life. The gel product range offers a wide range of capabilities including heat resistance, deep discharge resistance, long shelf life, and high cyclic performance. |

The Company's dominant network power battery brands, *Absolyte* and *Sonnenschein*, offer customers the choice of AGM and gel valve regulated battery technologies and deliver among the highest energy and power densities in their class. Service and technical assistance are important to the network power business. The Company often ships network power batteries directly to equipment manufacturers and systems integrators who include the Company's batteries in their original equipment and distribute products to end users.

The Company offers a global product line that is marketed under the following five brands associated with product type and technology:

- | | |
|-------------------|--|
| <i>Absolyte</i> : | Large 2-volt cells, incorporating AGM technology, for long duration (e.g. telecommunications) and short duration applications. |
| <i>Classic</i> : | Primarily 2-volt and some multi-cell vented (or flooded) products for a wide range of applications. |

<i>Marathon:</i>	Single- and multi-cell AGM monobloc batteries for long duration applications.
<i>Sonnenschein:</i>	Multi-cell monoblocs and 2-volt cells, incorporating gel technology.
<i>Sprinter:</i>	Multi-cell AGM monobloc batteries for short duration, high discharge rate applications

Table of Contents

The Company's major network power battery customers for telecommunications services include China Mobile, AT&T, Deutsche Telecom, Singapore Telecom, Telecom Italia, Telefonica of Spain, Verizon Wireless, and Vodafone. Major telecommunications OEM customers include Alcatel, Emerson Electric, Ericsson, Motorola, Nortel, Siemens, and Tyco. UPS OEM's include Liebert and MGE. The Company is the sole supplier to the U.S. Navy for submarine batteries. In addition, the Company supplies batteries for military vehicles (i.e. tanks and personnel carriers) to the German army, and other armies. The Company promotes its products through technical seminars, trade shows, and technical literature.

Industrial Energy Americas

Motive Power

Motive power products are sold primarily to independent lift truck dealers or directly to national accounts or end users. The Company's primary motive power customers in the Americas include Crown, NACCO, Target, Toyota, and WalMart. Motive power products and services are distributed in the Americas by sales and service locations owned by the Company that are augmented by a network of independent manufacturers' representatives who provide local service on their own behalf.

Network Power

Network power products and services are distributed in the Americas by sales and service locations owned by the Company that are augmented by a network of independent manufacturers' representatives who provide local service on their own behalf. The Company's primary network power customers in the Americas include AT&T, Emerson Electric, Nortel, and the U.S. Navy.

Industrial Energy Europe and ROW

Motive Power

The Company distributes motive power products and services in Europe through in-house sales and service organizations in each country and utilizes distributors and agents for export of products from Europe to ROW. Motive power products in Europe are also sold to a wide range of customers in the aftermarket, ranging from large industrial companies and retail distributors to small warehouse and manufacturing operations. Motive power batteries are also sold in complete packages, including batteries, chargers and, with a growing number of customers, on-site service. The Company's major OEM motive power customers include the Linde Group (now owned by the KION Group), the Jungheinrich Group, and Toyota.

Network Power

The Company distributes network power products and services in Europe through in-house sales and service organizations in each country. In Australia and New Zealand, batteries and chargers are distributed through in-house sales and service organizations. In Asia, products are distributed through independent distributors. The Company utilizes distributors, agents, and direct sales for export of products from Europe and North America to ROW.

Quality

The Company recognizes that product performance and quality are critical to its success. Both the EXCELL (Exide's Customer-focused Excellence Lean Leadership) initiative and the Company's Quality Management System are

important drivers of operational excellence, which results in improved levels of quality, productivity, and delivery of goods and services to the global transportation and industrial energy markets.

EXCELL

The Company implemented EXCELL to systematically reduce and ultimately eliminate waste and to implement the concepts of continuous flow and customer pull throughout the entire Company's supply chain.

Table of Contents

The EXCELL framework follows lean production techniques and process improvements, and is also designed to prioritize improvement initiatives that drive quality improvement and customer satisfaction while achieving all business objectives of the Company. The Company's Take Charge! initiative, which is an integral component of the EXCELL framework, is designed to identify waste in the Company's manufacturing and distribution processes, and to implement changes to enhance productivity and throughput while reducing investment in inventories.

Quality Management System (QMS)

The Company's QMS was developed to streamline and standardize the global quality systems so that key measurements could be evaluated to drive best practices as it continues to pursue improved EXCELL certifications across all facilities. The QMS plays a major role as the Company strives to achieve world-class product quality.

The Company's quality process begins in the design phase with an in-depth understanding of customer and application requirements. The Company's products are designed to the required performance, industry, and customer quality standards using design processes, tools, and materials to achieve reliability and durability. The Company's commitment to quality continues through the manufacturing process. The Company has quality audit processes and standards in each of its production and distribution facilities. The Company's quality process extends throughout the entire product lifecycle and operation in service.

Most of the Company's major production facilities are approved under ISO 9000 or TS 16949 quality systems standards. The Company has obtained ISO 14001 Environmental Health & Safety (EH&S) certification at eight of its manufacturing plants and also has received quality certifications and awards from a number of OEM and aftermarket customers.

Research and Development

The Company is committed to developing new and technologically advanced products, services, and systems that provide superior performance and value to customers. To support this commitment, the Company focuses on developing opportunities across its global markets.

In addition the Company also operates a number of product and process-development centers of excellence around the world. These centers work cooperatively to define and improve the Company's product design and production processes. By leveraging this network, the Company is able to transfer technologies, product and process knowledge among its various operating facilities, thereby adapting best practices from around the world for use throughout the Company.

In addition to in-house efforts, the Company continues to pursue the formation of potential alliances and collaborative partnerships to develop energy-management systems for automotive electrical and electronic architectures for the global OEM market. In addition, the Company has various development activities targeted at the industrial and military markets.

Patents, Trademarks and Licenses

The Company owns or has a license to use various trademarks that are valuable to its business. The Company believes these trademarks and licenses enhance the brand recognition of the Company's products. The Company currently owns approximately 300 trademarks and licenses from others the right to use approximately 20 trademarks worldwide. For example, the Company licenses the *NASCAR* mark from NASCAR, and the *Exide* mark in the United Kingdom and Ireland from Chloride Group Plc. The Company also acts as licensor under certain licenses. For example, EnerSys, Inc. is licensed to use the *EXIDE* mark on industrial battery products in certain countries, subject to the outcome of the

litigation discussed below. The Company's license with NASCAR will expire on December 31, 2011.

The Company has generated a number of patents in the operation of its business and currently owns all or a partial interest in approximately 375 patents and applications for patents pending worldwide. Although the Company believes its patents and patent applications collectively are important to the Company's business,

Table of Contents

and that technological innovation is important to the Company's market competitiveness, currently no patent is individually material to the operation of the business or the Company's financial condition.

In March 2003, the Company brought legal proceedings in the Bankruptcy Court to reject certain agreements relating to EnerSys, Inc.'s right to use the Exide trademark on certain industrial battery products in the United States and 80 foreign countries. In April 2006, the Court granted the Company's request to reject those agreements. EnerSys, Inc. has appealed this decision. For further information regarding this matter, see Note 13 to the Consolidated Financial Statements.

Manufacturing, Raw Materials and Suppliers

Lead is the primary material used in the manufacture of the Company's lead acid batteries, representing approximately 40% of the cost of goods produced. The Company obtains substantially all of its North American lead requirements through the operation of six secondary lead recycling plants, which reclaim lead by recycling spent lead acid batteries. In North America, spent batteries are obtained for recycling primarily from the Company's customers, through the Company-owned branch networks and from outside spent-battery collectors. In Europe, lead requirements of battery manufacturers, including the Company, are principally obtained from third party suppliers.

The Company uses both polyethylene and AGM battery separators. There are a number of suppliers from whom the Company purchases AGM separators. Polyethylene separators are purchased solely from one supplier, with supply agreements expiring in December 2009. The agreements restrict the Company's ability to source separators from other suppliers unless there is a technical benefit that the Company's sole supplier cannot provide. In addition, the agreements provide for substantial minimum annual purchase commitments. There is no second source that could readily provide the volume of polyethylene separators used by the Company. As a result, any major disruption in supply from the Company's sole supplier would have a material adverse impact on the Company.

Other key raw materials and components in the production of batteries include lead oxide, acid, steel, plastics and chemicals, which are generally available from multiple sources. The Company has not experienced any material stoppage or disruption in production as a result of unavailability, or delays in the availability, of raw materials.

Competition

Transportation Segments

The Americas and European transportation markets are highly competitive. The manufacturers in these markets compete on price, quality, technical innovation, service and warranty. Well-recognized brand names are also important for aftermarket customers who do not purchase private label batteries. Most sales are made without long-term contracts.

In the Americas transportation aftermarket, the Company believes it has the second largest market position. Other principal competitors in this market are Johnson Controls, Inc. and East Penn Manufacturing. Price competition in this market has been severe in recent years. Competition is strongest in the auto parts retail and mass merchandiser channels where large customers use their buying power to negotiate lower prices.

The largest competitor in the Americas transportation OEM market is Johnson Controls, Inc. Due to technical and production qualification requirements, OEMs change battery suppliers less frequently than aftermarket customers, but because of their purchasing size, can influence market participants to compete on price and other terms.

The Company also has the overall second largest market position in Europe in transportation batteries. The Company's largest competitor in the transportation markets is Johnson Controls, Inc. The European battery markets, particularly in the transportation OEM market, have experienced severe price competition. In addition, the strength of the Euro in the Company's European markets has resulted in competitive pricing pressures from Asian imports, negatively impacting average selling prices.

Table of Contents

Industrial Energy Segments

Motive Power

The Company is one of the major players in the global motive power battery market. Competitors in Europe include EnerSys, Inc., Hoppecke, BAE, and MIDAC. Competitors in the Americas include EnerSys, Inc., C&D Technologies and East Penn Manufacturing. In Asia, GS/Yuasa, Shinkobe, and EnerSys, Inc. are the major competitors, with GS/Yuasa being the market leader. The Company currently serves markets in countries such as Brazil, China, and India on a limited basis through export sales.

Quality, product performance, in-service reliability, delivery, and price are important differentiators in the motive power market. Well-known brands are also important and the Company's *Chloride Motive Power*, *DETA*, *GNB*, *Sonnenschein*, and *Tudor* are among the leading brands in the world. In addition, the Company has developed a range of low maintenance batteries (the *Liberator* series) that are combined with a matched range of Exide-regulated or high frequency chargers that work together to reduce customers' operating costs.

Network Power

The Company is one of the major players in the global network power battery market. The major competitor in Europe is EnerSys, Inc. Competitors in the Americas include C&D Technologies, EnerSys, Inc., and East Penn Manufacturing. In Asia, GS/Yuasa, Shinkobe, and EnerSys, Inc. are the major competitors.

Quality, reliability, delivery, and price are important differentiators in the network power market, along with technical innovation and responsive service. Brand recognition is also important, and the Company's *Absolyte*, *Classic*, *Marathon*, *Sonnenschein*, and *Sprinter* are among the leading brands in the world.

Environmental, Health and Safety Matters

As a result of its manufacturing, distribution, and recycling operations, the Company is subject to numerous federal, state, and local environmental, occupational safety, and health laws and regulations, as well as similar laws and regulations in other countries in which the Company operates (collectively, "EH&S laws"). For a discussion of the legal proceedings relating to environmental, health and safety matters, see Note 13 to the Consolidated Financial Statements.

Employees

Total worldwide employment was approximately 13,862 at March 31, 2007, compared to approximately 13,982 at March 31, 2006.

Americas

As of March 31, 2007, the Company employed approximately 1,452 salaried employees and approximately 4,274 hourly employees in the Americas, primarily in the U.S. Approximately 59% of these salaried employees are engaged in sales, service, marketing, and administration and approximately 41% in manufacturing and engineering. Approximately 22% of the Company's hourly employees in the Americas are represented by unions. Relations with the unions are generally good. Union contracts covering approximately 438 of the Company's domestic employees expire in fiscal 2008, and the remainder thereafter.

Europe and ROW

As of March 31, 2007, the Company employed approximately 2,897 salaried employees and approximately 5,239 hourly employees outside of the Americas, primarily in Europe. Approximately 67% of these salaried employees are engaged in sales, service, marketing, and administration and approximately 33% in manufacturing and engineering. The Company's hourly employees in Europe and ROW are generally represented by unions. The Company meets regularly with the European Works Councils. Relations with the unions are generally good. Contracts covering most of the Company's union employees generally expire on various dates through fiscal 2008.

Executive Officers of the Registrant

Gordon A. Ulsh (61) President, Chief Executive Officer and member of the Board of Directors. Mr. Ulsh was appointed in to his current position in April 2005. From 2001 until March 2005, Mr. Ulsh was Chairman, President and CEO of Texas-based FleetPride Inc., the nation's largest independent aftermarket distributor of heavy-duty truck parts. Prior to joining FleetPride in 2001, Mr. Ulsh worked with Ripplewood Equity Partners, providing analysis of automotive industry segments for investment opportunities. Earlier, he served as President and Chief Operating Officer of Federal-Mogul Corporation in 1999 and as head of its Worldwide Aftermarket Division in 1998. Prior to Federal-Mogul, he held a number of leadership positions with Cooper Industries, including Executive Vice President of its automotive products segment. Mr. Ulsh joined Cooper's Wagner Lighting business unit in 1984 as Vice President of Operations, following 16 years in manufacturing and engineering management at Ford Motor Company. Mr. Ulsh is a director of OM Group, Inc.

Mitchell S. Bregman (53) President, Industrial Energy Americas. Mr. Bregman joined Exide in September 2000 in connection with the Company's acquisition of GNB. He has served in his current role since March 2003 and prior to that was President Global Network Power. Mr. Bregman joined GNB in 1979. He served for 12 years as a Vice President with various responsibilities with GNB Industrial Power and nine years with GNB's Transportation Division.

Joel Campbell (60) President, Industrial Energy Europe. Mr. Campbell joined Exide in February 2006 as Vice President & General Manager North American Recycling. Between August 1999 and February 2006, Mr. Campbell was retired. From 1998 to 1999, Mr. Campbell served as Senior Vice President North American Aftermarket at Tenneco. Mr. Campbell also previously served in several executive positions at Cooper Industries from 1988 to 1998, including President of Cooper Automotive. Mr. Campbell has more than 30 years of management experience with various manufacturing companies.

Francis M. Corby Jr. (63) Executive Vice President and Chief Financial Officer. Mr. Corby joined the Company in March 2006. Mr. Corby most recently served as Senior Vice President and Chief Financial Officer at GST AutoLeather from 2004 to 2005. Mr. Corby served as Executive Vice President and Chief Financial Officer at Guide Corporation from 2001 through 2004. Mr. Corby served as Executive Vice President at Frederick & Company from 2000 through 2001. From 1986 to 1999, Mr. Corby was the Chief Financial Officer at Harnischfeger Industries, Inc., most recently with the title of Executive Vice President for Finance and Administration.

Philip A. Damaska (52) Senior Vice President and Corporate Controller. Mr. Damaska joined the Company in January 2005 as Vice President, Finance, was appointed Vice President and Corporate Controller in September, 2005 and was named Senior Vice President and Corporate Controller in March 2006. Prior to joining the Company, Mr. Damaska served in numerous capacities with Freudenberg-NOK from 1996 through 2004, most recently as President of Corteco, an automotive and industrial seal supplier that is part of the partnership's global group of companies.

George S. Jones, Jr. (54) Executive Vice President Human Resources and Communications. Mr. Jones joined the Company in July 2005. From 1974 to 2004, Mr. Jones served in several executive positions at Cooper Industries, most recently as Vice President Operations at the Lighting Division from 1997 to 2004.

Edward J. O'Leary (51) President, Transportation Americas since June 6, 2005. Prior to joining the Company, Mr. O'Leary served as President The Americas at Oetiker Inc. From 2002 to 2004, Mr. O'Leary served in a consulting capacity with Jag Management Consultants. Mr. O'Leary served as Chief Executive Officer of iStarSystems from 2000 to 2002, and served as Vice President Sales and Distribution The Americas at Federal-Mogul Corp. from 1998 to 1999.

Rodolphe Reverchon (48) President, Transportation Europe. Mr. Reverchon joined the Company in 2003 as Vice President Operations Europe. From 1996 to 2003, Mr. Reverchon served in a number of capacities at Bosch Chassis & Systems as European Manufacturing Director, Plant Manager and Manufacturing Quality Manager Europe.

Table of Contents

Backlog

The Company's order backlog at March 31, 2007 was approximately \$34 million for Industrial Energy Americas and \$148 million for Industrial Energy Europe and ROW. The Company expects to fill all of March 31, 2007 backlogs during fiscal 2008. The Transportation backlog at March 31, 2007 was not significant.

Emergence from Chapter 11 Bankruptcy Protection

On April 15, 2002, Exide Technologies, together with certain of its U.S. subsidiaries, filed voluntary petitions for reorganization under Chapter 11 of the federal bankruptcy laws (Bankruptcy Code or Chapter 11) in the United States Bankruptcy Court for the District of Delaware (Bankruptcy Court). On November 21, 2002, two additional wholly-owned, non-operating subsidiaries of Exide filed voluntary petitions for reorganization under Chapter 11 of the Bankruptcy Code in the Bankruptcy Court. All of the cases were jointly administered for procedural purposes before the Bankruptcy Court under case number 02-11125KJC.

Exide Technologies and such subsidiaries (the Debtors) continued to operate their businesses and manage their properties as debtors-in-possession throughout the course of the bankruptcy case. The Debtors, along with the Official Committee of Unsecured Creditors, filed a Joint Plan of Reorganization (the Plan) with the Bankruptcy Court on February 27, 2004 and, on April 21, 2004, the Bankruptcy Court confirmed the Plan. The Debtors declared May 5, 2004 as the effective date of the Plan, and substantially consummated the transactions provided for in the Plan on such date (the Effective Date).

The following is a summary of certain transactions which became effective on the Effective Date pursuant to consummation of the Plan.

Except to the extent otherwise provided in the Plan, all notes, instruments, certificates, and other documents evidencing (i) the Company's 10% senior notes due 2005, (ii) the Company's 2.9% convertible notes due 2005, (iii) equity interests in the Debtors, including, but not limited to, all issued, unissued, authorized or outstanding shares or stock, together with any warrants, options or contract rights to purchase or acquire such interests at any time, were canceled, and the obligations of the Debtors thereunder or in any way related thereto were discharged.

The Company was authorized to issue (i) 25 million shares of new common stock, par value \$0.01 per share for distribution in accordance with the Plan, and (ii) warrants initially exercisable for 6.25 million shares of new common stock (the Warrants). Pursuant to the terms of the Plan, the common stock and Warrants are being distributed as follows:

Holders of pre-petition Senior Secured Global Credit facility claims received, collectively, 22.5 million shares of new common stock; and

Holders of general unsecured claims received, collectively, 2.5 million shares of new common stock and Warrants to purchase 6.25 million shares of new common stock at \$32.11 per share, adjusted to 6.6 million shares with an exercise price of \$30.31 per share based on the closing of the \$75 million rights offering and \$50 million private sale of common stock in September 2006. Approximately 13.4% of such new common stock and Warrants was reserved for distribution for disputed claims under the Plan's claim reconciliation and allowance procedures.

As claims are evaluated and processed, the Company will object to some claims or portions thereof, and upward adjustments (to the extent stock and Warrants not previously distributed remain) or downward adjustments to the reserve will be made pending or following adjudication of such objections. Predictions regarding the allowance and classification of claims are inherently difficult to make. With respect to environmental claims in particular, there is an inherent difficulty in assessing the Company's potential liability due to the large number of other potentially responsible parties. For example, a demand for the total cleanup costs of a landfill used by many entities may be asserted by the government using joint and several liability theories. Although the Company believes that there is a

Table of Contents

reasonable basis to believe that it will ultimately be responsible for only its share of these remediation costs, there can be no assurance that the Company will prevail on these claims. In addition, the scope of remedial costs or other environmental injuries are highly variable and estimating these costs involves complex legal, scientific and technical judgments. Many of the claimants who have filed disputed claims, particularly environmental and personal injury claims produce little or no proof of fault on which the Company can assess its potential liability. Such claimants often either fail to specify a determinate amount of damages or provide little or no basis for the alleged damages. In some cases, the Company is still seeking additional information needed for a claims assessment and information that is unknown to the Company at the current time may significantly affect the Company's assessment regarding the adequacy of the reserve amounts in the future.

As general unsecured claims have been allowed in the bankruptcy court, the Company has distributed approximately one share of the Company's common stock per \$383.00 in allowed claim amount and approximately one Warrant per \$153.00 in allowed claim amount. These rates were established based upon the assumption that the common stock and Warrants allocated to holders of general unsecured claims on the effective date of the Plan, including the reserve established for disputed claims, would be fully distributed so that the recovery rates for all allowed unsecured claims would comply with the Plan without the need for any redistribution or supplemental issuance of securities. If the amount of general unsecured claims that is eventually allowed exceeds the amount of claims anticipated in the setting of the reserve, additional common stock and Warrants will be issued for the excess claim amounts at the same rates as used for the other general unsecured claims. If this were to occur, additional common stock would also be issued to the holders of pre-petition secured claims to maintain the ratio of their distribution in common stock at nine times the amount of common stock distributed for all unsecured claims.

Holders of administrative claims, claims derived from the Company's \$500 million secured super priority debtor-in-possession senior secured credit agreement and priority tax claims were paid in full in cash pursuant to the terms of the Plan.

Available Information

The Company maintains a website on the Internet at www.exide.com. The Company makes available free of charge through its website, by way of a hyperlink to a third-party Securities Exchange Commission (SEC) filing website, its annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports electronically filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act of 1934. Such information is available as soon as reasonably practicable after it is filed with the SEC. The SEC website (www.sec.gov) contains reports, proxy and other statements, and other information regarding issuers that file electronically with the SEC. Also, the public may read and copy any materials the Company files with the SEC at the SEC's Public Reference Room at 100 F Street, N.E., Washington D.C., 20549. Information on the operation of the Public Reference Room may be obtained by calling the SEC at 1-800-SEC-0330. Additionally, the Company's Code of Ethics may be accessed within the Investor Relations section of its website. Amendments and waivers of the Code of Ethics will also be disclosed within four business days on the website. Information found in the Exide website is neither part of this annual report on Form 10-K nor any other report filed with the SEC.

Item 1A. Risk Factors

The Company has experienced significant increases in raw material prices, particularly lead, and further changes in the prices of raw materials or in energy costs could have a material adverse impact on the Company.

Lead is the primary material used in the manufacture of batteries, representing approximately 40% of the Company's cost of goods sold. Average lead prices quoted on the London Metal Exchange (LME) have risen dramatically, increasing from \$1,041 per metric ton for fiscal 2006 to \$1,426 per metric ton for fiscal 2007. As of June 8, 2007, lead

prices quoted on the LME were \$2,255 per metric ton. If the Company is

Table of Contents

unable to increase the prices of its products proportionate to the increase in raw material costs, the Company's gross margins will decline. The Company cannot provide assurance that it will be able to hedge its lead requirements at reasonable costs or that the Company will be able to pass on these costs to its customers. Increases in the Company's prices could also cause customer demand for the Company's products to be reduced and net sales to decline. The rising cost of lead requires the Company to make significant investments in inventory and accounts receivable, which reduces amounts of cash available for other purposes, including making payments on its notes and other indebtedness. The Company also consumes significant amounts of polypropylene, steel and other materials in its manufacturing process and incurs energy costs in connection with manufacturing and shipping of its products. The market prices of these materials are also subject to fluctuation, which could further reduce the Company's available cash.

The Company remains subject to a preliminary SEC inquiry.

The Enforcement Division of the SEC is conducting a preliminary inquiry into statements the Company made during fiscal 2005 about its ability to comply with fiscal 2005 loan covenants and the going concern qualification in the audit report in the Company's annual report on Form 10-K for fiscal 2005, which the Company filed with the SEC in June 2005. This preliminary inquiry remains in process, and should it result in a formal investigation, it could have a material adverse effect on the Company's financial position, results of operations and cash flows.

The Company is subject to fluctuations in exchange rates and other risks associated with its non-U.S. operations which could adversely affect the Company's results of operations.

The Company has significant manufacturing operations in, and exports to, several countries outside the U.S. Approximately 59% of the Company's net sales for fiscal 2007 were generated in Europe and ROW with the vast majority generated in Europe in Euros and British Pounds. Because such a significant portion of the Company's operations are based overseas, the Company is exposed to foreign currency risk, resulting in uncertainty as to future assets and liability values, and results of operations that are denominated in foreign currencies. The Company invoices foreign sales and service transactions in local currencies, using actual exchange rates during the period, and translates these revenues and expenses into U.S. dollars at average monthly exchange rates. Because a significant portion of the Company's net sales and expenses are denominated in foreign currencies, the depreciation of these foreign currencies in relation to the U.S. dollar could adversely affect the Company's reported net sales and operating margins. The Company translates its non-U.S. assets and liabilities into U.S. dollars using current rates as of the balance sheet date. Therefore, foreign currency depreciation against the U.S. dollar would result in a decrease of the Company's net investment in foreign subsidiaries.

In addition, foreign currency depreciation, particularly depreciation of the Euro, would make it more expensive for the Company's non-U.S. subsidiaries to purchase certain of the Company's raw material commodities that are priced globally in U.S. dollars, such as lead, which is quoted on the LME in U.S. dollars. The Company does not engage in significant hedging of its foreign currency exposure and cannot assure that it will be able to hedge its foreign currency exposures at a reasonable cost.

There are other risks inherent in the Company's non-U.S. operations, including:

Changes in local economic conditions, including disruption of markets;

Changes in laws and regulations, including changes in import, export, labor and environmental laws;

Exposure to possible expropriation or other government actions; and

Unsettled political conditions and possible terrorist attacks against American interests.

These and other factors may have a material adverse effect on the Company's non-U.S. operations or on its results of operations and financial condition.

Table of Contents

The Company's liquidity is affected by the seasonality of its business. Warm winters and cool summers adversely affect the Company.

The Company sells a disproportionate share of its automotive aftermarket batteries during the fall and early winter. Resellers buy automotive batteries during these periods so they will have sufficient inventory for cold weather periods. In addition, many of the Company's industrial battery customers in Europe do not place their battery orders until the end of the calendar year. This seasonality increases the Company's working capital requirements and makes it more sensitive to fluctuations in the availability of liquidity. Unusually cold winters or hot summers may accelerate battery failure and increase demand for automotive replacement batteries. Mild winters and cool summers may have the opposite effect. As a result, if the Company's sales are reduced by an unusually warm winter or cool summer, it is not possible for the Company to recover these sales in later periods. Further, if the Company's sales are adversely affected by the weather, it cannot make offsetting cost reductions to protect the Company's liquidity and gross margins in the short-term because a large portion of the Company's manufacturing and distribution costs are fixed.

Decreased demand in the industries in which the Company operates may adversely affect its business.

The Company's financial performance depends, in part, on conditions in the automotive, material handling, and telecommunications industries, which, in turn, are generally dependent on the U.S. and global economies. As a result, economic and other factors adversely affecting production by OEMs and their customers' spending could adversely impact the Company's business. Relatively modest declines in customer purchases from the Company could have a significant adverse impact on its profitability because the Company has substantial fixed production costs. If the Company's OEM and large aftermarket customers reduce their inventory levels, and reduce their orders, the Company's performance would be significantly adversely impacted. In this environment, the Company cannot predict future production rates or inventory levels or the underlying economic factors. Continued uncertainty and unexpected fluctuations may have a significant negative impact on the Company's business.

The remaining portion of the Company's battery sales are of aftermarket batteries. The factors influencing demand for automotive replacement batteries include: (1) the number of vehicles in use; (2) average battery life; (3) the average age of vehicles and their operating environment; (4) average miles driven, (5) weather conditions; and (6) population growth and overall economic conditions. Any significant adverse change in any one of these factors may have a significant negative impact on the Company's business.

The loss of the Company's sole supplier of polyethylene battery separators would have a material adverse effect on the Company's business.

The Company relies exclusively on a single supplier to fulfill its needs for polyethylene battery separators—a critical component to many of the Company's products. There is no second source that could readily provide the volume of polyethylene separators used by the Company. As a result, any major disruption in supply from this supplier would have a material adverse impact on the Company. If the Company is not able to maintain a good relationship with this supplier, or if for reasons beyond the Company's control the supplier's service were disrupted, the Company's business may experience a significant negative impact.

Many of the industries in which the Company operates are cyclical.

The Company's operating results are affected by the general cyclical pattern of the industries in which its major customer groups operate. Any decline in the demand for new automobiles, light trucks, and sport utility vehicles could have a material adverse impact on the financial condition and results of operations of the Company's Transportation divisions. A weak capital expenditure environment in the telecommunications, uninterruptible power systems and

electric industrial forklift truck markets could have a material adverse impact on the financial condition and results of operations of the Company's Industrial Energy divisions.

Table of Contents

The Company is subject to pricing pressure from its larger customers.

The Company faces significant pricing pressures in all of its business segments from its larger customers. Because of their purchasing size, the Company's larger customers can influence market participants to compete on price and other terms. Such customers also use their buying power to negotiate lower prices. If the Company is not able to offset pricing reductions resulting from these pressures by improved operating efficiencies and reduced expenditures, those price reductions may have an adverse impact on the Company's business.

The Company faces increasing competition and pricing pressure from other companies in its industries, and if the Company is unable to compete effectively with these competitors, the Company's sales and profitability could be adversely affected.

The Company competes with a number of major domestic and international manufacturers and distributors of lead acid batteries, as well as a large number of smaller, regional competitors. Due to excess capacity in some sectors of its industry and consolidation among industrial purchasers, the Company has been subjected to continual and significant pricing pressures. The North American, European and Asian lead-acid battery markets are highly competitive. The manufacturers in these markets compete on price, quality, technical innovation, service, and warranty. In addition, the Company is experiencing heightened competitive pricing pressure as Asian producers, which are able to employ labor at significantly lower costs than producers in the U.S. and Western Europe, expand their export capacity and increase their marketing presence in the Company's major markets.

If the Company is not able to develop new products or improve upon its existing products on a timely basis, the Company's business and financial condition could be adversely affected.

The Company believes that its future success depends, in part, on the ability to develop, on a timely basis, new technologically advanced products or improve on the Company's existing products in innovative ways that meet or exceed its competitors' product offerings. Maintaining the Company's market position will require continued investment in research and development and sales and marketing. Industry standards, customer expectations, or other products may emerge that could render one or more of the Company's products less desirable or obsolete. The Company may be unsuccessful in making the technological advances necessary to develop new products or improve its existing products to maintain its market position. If any of these events occur, it could cause decreases in sales and have an adverse effect on the Company's business and financial condition.

The Company may be adversely affected by the instability and uncertainty in the world financial markets and the global economy, including the effects of turmoil in the Middle East.

Instability in the world financial markets and the global economy, including (and as a result of) the turmoil in the Middle East, may create uncertainty in the industries in which the Company operates, and may adversely affect its business. In addition, terrorist activities may cause unpredictable or unfavorable economic conditions and could have a material adverse impact on the Company's operating results and financial condition.

The Company may be unable to successfully implement its business strategy, which could adversely affect its results of operations and financial condition.

The Company's ability to achieve its business and financial objectives is subject to a variety of factors, many of which are beyond the Company's control. For example, the Company may not be successful in increasing its manufacturing and distribution efficiency through productivity, process improvements and cost reduction initiatives. Further, the Company may not be able to realize the benefits of these improvements and initiatives within the time frames the

Company currently expects. In addition, the Company may not be successful in increasing the Company's percentage of captive arrangements and spent battery collections or in hedging its lead requirements, leaving it exposed to fluctuations in the price of lead. Additionally, the

Table of Contents

Company's implementation of these strategies could be delayed due to limited liquidity. Any failure to successfully implement the Company's business strategy could adversely affect results of operations and financial condition, and could further impair the Company's ability to make certain strategic capital expenditures and meet its restructuring objectives.

The Company is subject to costly regulation in relation to environmental, health and safety matters, which could adversely affect its business and results of operations.

In the manufacture of its products throughout the world, the Company manufactures, distributes, recycles, and otherwise uses large amounts of potentially hazardous materials, especially lead and acid. As a result, the Company is subject to a substantial number of costly regulations, including limits on employee blood lead levels. In particular, the Company is required to comply with increasingly stringent requirements of federal, state, and local environmental, occupational health and safety laws and regulations in the U.S. and other countries, including those governing emissions to air, discharges to water, noise and odor emissions; the generation, handling, storage, transportation, treatment, and disposal of waste materials; and the cleanup of contaminated properties and human health and safety. Compliance with these laws and regulations results in ongoing costs. The Company could also incur substantial costs, including cleanup costs, fines, and civil or criminal sanctions, third party property damage or personal injury claims, or costs to upgrade or replace existing equipment, as a result of violations of or liabilities under environmental laws or non-compliance with environmental permits required at its facilities. In addition, many of the Company's current and former facilities are located on properties with histories of industrial or commercial operations. Because some environmental laws can impose liability for the entire cost of cleanup upon any of the current or former owners or operators, regardless of fault, the Company could become liable for the cost of investigating or remediating contamination at these properties if contamination requiring such activities is discovered in the future. The Company may become obligated to pay material remediation-related costs at its closed Tampa, Florida facility in the amount of approximately \$12.5 million to \$20.5 million, at the Columbus, Georgia facility in the amount of approximately \$6 million to \$9 million and at the Sonalur, Portugal facility in the amount of \$2 million to \$4 million.

The Company cannot be certain that it has been, or will at all times be, in complete compliance with all environmental requirements, or that the Company will not incur additional material costs or liabilities in connection with these requirements in excess of amounts it has reserved. Private parties, including current or former employees, could bring personal injury or other claims against the Company due to the presence of, or exposure to, hazardous substances used, stored or disposed of by it, or contained in its products, especially lead. Environmental requirements are complex and have tended to become more stringent over time. These requirements or their enforcement may change in the future in a manner that could have a material adverse effect on the Company's business, results of operations and financial condition. The Company has made and will continue to make expenditures to comply with environmental requirements. These requirements, responsibilities and associated expenses and expenditures, if they continue to increase, could have a material adverse effect on the Company's business and results of operations. While the Company's costs to defend and settle claims arising under environmental laws in the past have not been material, the Company cannot provide assurance that this will remain so in the future.

The Environmental Protection Agency (EPA) or state environmental agencies could take the position that the Company has liability under environmental laws that were not discharged in bankruptcy. To the extent these authorities are successful in disputing the pre-petition nature of these claims, the Company could be required to perform remedial work that has not yet been performed for alleged pre-petition contamination, which would have a material adverse effect on the Company's financial condition, cash flows or results of operations.

The EPA or state environmental agencies could take the position that the Company has liability under environmental laws that were not discharged in bankruptcy. To the extent these authorities are successful in disputing the pre-petition nature of these claims, the Company could be required to perform remedial work that has not yet been performed for

alleged pre-petition contamination, which would have a material adverse

Table of Contents

effect on the Company's financial condition, cash flows or results of operations. The Company has previously been advised by the EPA or state agencies that it is a Potentially Responsible Party under the Comprehensive Environmental Response, Compensation and Liability Act or similar state laws at 97 federally defined Superfund or state equivalent sites. At 45 of these sites, the Company has paid its share of liability and believes that it is probable that its liability for most of the remaining sites will be treated as disputed unsecured claims under the Company's Plan. However, there can be no assurance that these matters will be discharged. In addition, the EPA, in the course of negotiating its pre-petition claim, had notified the Company of the possibility of additional clean-up costs associated with Hamburg, Pennsylvania properties of approximately \$35 million. The EPA has provided cost summaries for the past costs and an estimate of future costs that approximate the amounts in its notification. To the extent the EPA or other environmental authorities disputed the pre-petition nature of these claims, the Company would intend to resist any such effort to evade the bankruptcy law's intended result, and believes there are substantial legal defenses to be asserted in that case. However, there can be no assurance that we would be successful in challenging any such actions.

The Company may be adversely affected by legal proceedings to which the Company is, or may become, a party.

The Company and its subsidiaries are currently, and may in the future become, subject to legal proceedings which could adversely affect its results of operations, liquidity and financial condition. See Note 13 to the Consolidated Financial Statements.

The cost of resolving the Company's pre-petition disputed claims, including legal and other professional fees involved in settling or litigating these matters, could have a material adverse effect on its financial condition, cash flows and results of operations.

At March 31, 2007, there are approximately 750 pre-petition disputed unsecured claims on file in the bankruptcy case that remain to be resolved through the Plan's claims reconciliation and allowance procedures. The Company established a reserve of common stock and warrants to purchase common stock for issuance to holders of these disputed unsecured claims as the claims are allowed by the bankruptcy court. Although these claims are generally resolved through the issuance of common stock and warrants from the reserve rather than cash payments, the process of resolving these claims through settlement or litigation requires considerable Company resources, including expenditures for legal and professional fees and the attention of Company personnel. These costs could have a material adverse effect on the Company's financial condition, cash flows and results of operations.

Work stoppages or other labor issues at the Company's facilities or its customers' or suppliers' facilities could adversely affect the Company's operations.

At March 31, 2007, approximately 22% of the Company's North American hourly employees and many of its non-U.S. employees were unionized. It is likely that a significant portion of the Company's workforce will remain unionized for the foreseeable future. It is also possible that the portion of the Company's workforce that is unionized may increase in the future. Contracts covering approximately 438 of the Company's domestic employees will expire in fiscal 2008, and the remainder thereafter. In addition, contracts covering most of the Company's union employees in Europe and ROW expire on various dates through fiscal 2008. Although the Company believes that its relations with employees are generally good, if conflicts develop between the Company and its employees' unions in connection with the renegotiation of these contracts or otherwise, work stoppages or other labor disputes could result. A work stoppage at one or more of the Company's plants, or a material increase in its costs due to unionization activities, may have a material adverse effect on the Company's business. Work stoppages at the facilities of the Company's customers or suppliers may also negatively affect the Company's business. If any of the Company's customers experience a material work stoppage, the customer may halt or limit the purchase of the Company's products. This could require the Company to shut down or significantly reduce production at facilities relating to those products. Moreover, if any of the Company's suppliers experience a work stoppage, the Company's operations could be adversely affected if an

alternative source of supply is not readily available.

Table of Contents

The Company's substantial indebtedness could adversely affect its financial condition.

The Company has a significant amount of indebtedness. As of March 31, 2007, the Company had total indebtedness, including capital leases, of approximately \$684.5 million. The Company's level of indebtedness could have significant consequences. For example, it could:

Limit the Company's ability to borrow money to fund its working capital, capital expenditures, acquisitions and debt service requirements;

Substantially increase the Company's vulnerability to changes in interest rates, because a substantial portion of its indebtedness bears interest at floating rates;

Limit the Company's flexibility in planning for, or reacting to, changes in its business and future business opportunities;

Make the Company more vulnerable to a downturn in its business or in the economy;

Place the Company at a disadvantage to some of its competitors, who may be less highly leveraged; and

Require a substantial portion of the Company's cash flow from operations to be used for debt payments, thereby reducing the availability of its cash flow to fund working capital, capital expenditures, acquisitions and other general corporate purposes.

One or a combination of these factors could adversely affect the Company's financial condition. Subject to restrictions in the indenture governing the Company's senior secured notes and convertible notes and its senior secured credit facility, the Company may incur additional indebtedness, which could increase the risks associated with its already substantial indebtedness.

Restrictive covenants limit the Company's ability to operate its business and to pursue its business strategies, and its failure to comply with these covenants could result in an acceleration of its indebtedness.

The Company's senior secured credit facility and the indenture governing its senior secured notes contain covenants that limit or restrict its ability to finance future operations or capital needs, to respond to changing business and economic conditions or to engage in other transactions or business activities that may be important to its growth strategy or otherwise important to the Company. The senior secured credit agreement and the indenture governing the Company's senior secured notes limit or restrict, among other things, the Company's ability and the ability of its subsidiaries to:

Incur additional indebtedness;

Pay dividends or make distributions on the Company's capital stock or certain other restricted payments or investments;

Purchase or redeem stock;

Issue stock of the Company's subsidiaries;

Make investments and extend credit;

Engage in transactions with affiliates;

Transfer and sell assets;

Effect a consolidation or merger or sell, transfer, lease or otherwise dispose of all or substantially all of the Company's assets; and

Create liens on the Company's assets to secure debt.

In addition, the Company's senior secured credit facility requires the Company to repay outstanding borrowings with portions of the proceeds the Company receives from certain sales of property or assets and

Table of Contents

specified future debt offerings. The Company's ability to comply with these provisions may be affected by events beyond its control.

Any breach of the covenants in the Company's senior secured credit agreement or the indenture governing its senior secured notes could cause a default under the Company's senior secured credit agreement and other debt (including the notes), which would restrict the Company's ability to borrow under its senior secured credit facility, thereby significantly impacting the Company's liquidity. If there were an event of default under any of the Company's debt instruments that was not cured or waived, the holders of the defaulted debt could cause all amounts outstanding with respect to the debt instrument to be due and payable immediately. The Company's assets and cash flow may not be sufficient to fully repay borrowings under its outstanding debt instruments if accelerated upon an event of default. If, as or when required, the Company is unable to repay, refinance or restructure its indebtedness under, or amend the covenants contained in, its senior secured credit facility, the lenders under its senior secured credit facility could institute foreclosure proceedings against the assets securing borrowings under the senior secured credit facility.

Holders of the Company's common stock are subject to the risk of dilution of their investment as the result of the issuance of additional shares of common stock and warrants to purchase common stock to holders of pre-petition claims to the extent the reserve of common stock and warrants established to satisfy such claims is insufficient.

Pursuant to the Company's 2004 Plan of Reorganization (the Plan), the Company has established a reserve of common stock and warrants to purchase common stock for issuance to holders of unsecured pre-petition disputed claims. To the extent this reserve is insufficient to satisfy these disputed claims, the Company would be required to issue additional shares of common stock and warrants, which would result in dilution to holders of its common stock.

The Company agreed pursuant to the Plan to issue 25 million shares of common stock and warrants initially exercisable for 6.25 million shares of common stock, distributed as follows:

holders of pre-petition secured claims were allocated collectively 22.5 million shares of common stock; and

holders of general unsecured claims were allocated collectively 2.5 million shares of common stock and warrants to purchase 6.25 million shares of common stock at \$32.11 per share, and approximately 13.4% of such new common stock and warrants were initially reserved for distribution for disputed claims under the Plan's claims reconciliation and allowance procedures.

Under the claims reconciliation and allowance process set forth in the Plan, the Official Committee of Unsecured Creditors, in consultation with the Company, established a reserve to provide for a pro rata distribution of common stock and warrants to holders of disputed claims as they become allowed. As claims are evaluated and processed, the Company will object to some claims or portions thereof, and upward adjustments (to the extent stock and warrants not previously distributed remain) or downward adjustments to the reserve will be made pending or following adjudication of these objections. Predictions regarding the allowance and classification of claims are inherently difficult to make. With respect to environmental claims in particular, there is inherent difficulty in assessing the Company's potential liability due to the large number of other potentially responsible parties. For example, a demand for the total cleanup costs of a landfill used by many entities may be asserted by the government using joint and several liability theories. Although the Company believes that there is a reasonable basis in law to believe that the Company will ultimately be responsible for only its share of these remediation costs, there can be no assurance that the Company will prevail on these claims. In addition, the scope of remedial costs or other environmental injuries, are highly variable and estimating these costs involves complex legal, scientific and technical judgments. Many of the claimants who have filed disputed claims, particularly environmental, and personal injury claims produce little or no proof of fault on which the Company can assess its potential liability and either specify no determinate amount of damages or provide little or no basis for the alleged damages. In some cases the Company is still seeking additional

information needed for claims assessment and information that is unknown to the Company at the current time may significantly affect its assessment regarding the adequacy of the reserve amounts in the future.

Table of Contents

As general unsecured claims have been allowed in the bankruptcy court, the Company has distributed common stock at a rate of approximately one share per \$383.00 in allowed claim amount and approximately one warrant per \$153.00 in allowed claim amount. These rates were established based upon the assumption that the stock and warrants allocated to non-noteholder general unsecured claims on the effective date of the Plan, including the reserve established for disputed claims, would be fully distributed so that the recovery rates for all allowed unsecured claims would comply with the Plan without the need for any redistribution or supplemental issuance of securities. If the amount of non-noteholder general unsecured claims that is eventually allowed exceeds the amount of claims anticipated in the setting of the reserve, additional common stock and warrants will be issued for the excess claim amounts at the same rates as used for the other non-noteholder general unsecured claims. If this were to occur, additional common stock would also be issued to the holders of pre-petition secured claims to maintain the ratio of their distribution in common stock at nine times the amount of common stock distributed for all unsecured claims.

The Company's Ability to Recognize the Benefits of Deferred Tax Assets is Dependent on Future Cash Flows and Taxable Income

The Company recognizes the expected future tax benefit from deferred tax assets when the tax benefit is considered to be more likely than not of being realized. Otherwise, a valuation allowance is applied against deferred tax assets. Assessing the recoverability of deferred tax assets requires management to make significant estimates related to expectations of future taxable income. Estimates of future taxable income are based on forecasted cash flows from operations and the application of existing tax laws in each jurisdiction. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the Company to realize the deferred tax assets could be impacted. Additionally, future changes in tax laws could limit the Company's ability to obtain the future tax benefits represented by its deferred tax assets. As of March 31, 2007, the Company's current and long-term deferred tax assets were \$19 million and \$67 million, respectively.

**CAUTIONARY STATEMENT FOR PURPOSES OF THE SAFE HARBOR
PROVISION OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995**

Except for historical information, this report may be deemed to contain forward-looking statements. The Company desires to avail itself of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 (the Act) and is including this cautionary statement for the express purpose of availing itself of the protection afforded by the Act.

Examples of forward-looking statements include, but are not limited to (a) projections of revenues, cost of raw materials, income or loss, earnings or loss per share, capital expenditures, growth prospects, dividends, the effect of currency translations, capital structure, and other financial items, (b) statements of plans and objectives of the Company or its management or Board of Directors, including the introduction of new products, or estimates or predictions of actions by customers, suppliers, competitors or regulating authorities, (c) statements of future economic performance, and (d) statements of assumptions, such as the prevailing weather conditions in the Company's market areas, underlying other statements and statements about the Company or its business.

Factors that could cause actual results to differ materially from these forward looking statements include, but are not limited to, the following general factors such as: (i) the Company's ability to implement and fund based on current liquidity business strategies and restructuring plans, (ii) unseasonable weather (warm winters and cool summers) which adversely affects demand for automotive and some industrial batteries, (iii) the Company's substantial debt and debt service requirements which may restrict the Company's operational and financial flexibility, as well as imposing significant interest and financing costs, (iv) the litigation proceedings to which the Company is subject, the results of which could have a material adverse effect on the Company and its business, (v) the realization of the tax benefits of

the Company's net operating loss carry forwards, which is dependent upon future taxable income, (vi) the fact that lead, a major constituent in most of the Company's products, experiences significant fluctuations in market price and is a hazardous material that may give rise to costly environmental and safety claims, (vii) competitiveness of the battery markets in the Americas and Europe,

Table of Contents

(viii) the substantial management time and financial and other resources needed for the Company's consolidation and rationalization of acquired entities, (ix) risks involved in foreign operations such as disruption of markets, changes in import and export laws, currency restrictions, currency exchange rate fluctuations and possible terrorist attacks against U.S. interests, (x) the Company's exposure to fluctuations in interest rates on its variable debt, (xi) the Company's ability to maintain and generate liquidity to meet its operating needs, (xii) general economic conditions, (xiii) the ability to acquire goods and services and/or fulfill labor needs at budgeted costs, (xiv) the Company's reliance on a single supplier for its polyethylene battery separators, (xv) the Company's ability to successfully pass along increased material costs to its customers, (xvi) the Company's ability to comply with the provisions of Section 404 of the Sarbanes-Oxley Act of 2002, and (xvii) the loss of one or more of the Company's major customers for its industrial or transportation products.

The Company cautions each reader of this Report to carefully consider those factors hereinabove set forth. Such factors have, in some instances, affected and in the future could affect the ability of the Company to achieve its projected results and may cause actual results to differ materially from those expressed herein.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

The chart below lists the locations of the Company's principal facilities. All of the facilities are owned unless otherwise indicated. Most of the Company's significant U.S. properties and some of its European properties secure its financing arrangements. For a description of the financing arrangements, see "Liquidity and Capital Resources" in Item 7- Management's Discussion and Analysis of Financial Condition and Results of Operations. The leases for leased facilities expire at various dates through 2015.

In addition, the Company also leases sales and distribution outlets in North America, Europe and Asia.

The Company believes that its facilities are in good operating condition, adequately maintained, and suitable to meet the Company's present needs.

Item 3. Legal Proceedings

See Note 13 to the Consolidated Financial Statements, which is hereby incorporated herein by reference.

Item 4. Submission of Matters to a Vote of Security Holders

None.

Table of Contents**PART II****Item 5. *Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities*****Unregistered Sales of Equity Securities and Use of Proceeds**

On January 22, 2007, the Company issued 2,058 shares of common stock and 5,178 warrants to purchase common stock at a price of \$30.31. The shares and warrants were issued pursuant to the terms of the Plan of Reorganization and were exempt from the registration requirements of the Securities Act of 1933 under Section 1145 of the U.S. Bankruptcy Code.

Market Data

Since May 6, 2004, the Company's common stock and warrants have traded on The NASDAQ Global Market under the symbol XIDE and XIDEW, respectively. The high and low sales price of the Company's common stock and warrants are set forth below.

	High	Low

Second Quarter	\$ 0.30	\$ 0.14
Third Quarter	\$ 0.50	\$ 0.14
Fourth Quarter	\$ 1.00	\$ 0.38
Fiscal 2006:		
First Quarter	\$ 1.85	\$ 0.37
Second Quarter	\$ 0.81	\$ 0.39
Third Quarter	\$ 0.54	\$ 0.26
Fourth Quarter	\$ 0.57	\$ 0.22

The Company did not declare or pay dividends on its common stock during fiscal years 2007 and 2006. Covenants in the Company's senior secured credit agreement restrict the Company's ability to pay cash dividends on capital stock and the Company presently does not intend to pay dividends on its common stock.

As of June 8, 2007, the Company had 60,688,319 shares of its common stock and, 4,952,323 of its warrants outstanding, with 3,935 and 5,218 holders of record, respectively.

Table of Contents**Equity Compensation Plan Information**

As of March 31, 2007, the Company maintained stock option and incentive plans under which employees and non-employee directors could be granted options to purchase shares of the Company's common stock or awarded shares of common stock. The following table contains information relating to such plans as of March 31, 2007.

Plan Category	Number of Securities to be Issued Upon	Weighted-Average	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans	
	Exercise of Outstanding Options, Warrants and Rights (a)		Exercise Price of Outstanding Options, Warrants and Rights (b)	(Excluding Securities Reflected in Column (a)) (c)
Equity compensation plans approved by security holders	3,073,000	\$ 6.07		2,479,000
Equity compensation plans not approved by security holders	80,000	\$ 13.22		
Total	3,153,000	\$ 6.25		2,479,000

Of the total of 7.1 million shares of common stock available for issuance under stock option and incentive plans for employees and non-employee directors, no more than 1.9 million shares may be issued as restricted shares.

Item 6. Selected Financial Data

The following table sets forth selected financial data for the Company. The reader should read this information in conjunction with the Company's Consolidated Financial Statements and Notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations that appear elsewhere in this report. See Note 1 to the Consolidated Financial Statements regarding the Predecessor Company and the Successor Company.

(1) The cumulative effect of change in accounting principle in fiscal 2004 resulted from the adoption of SFAS 143 on April 1, 2003.

(2)

Loss per share for the fiscal year ended March 31, 2006 and for the period May 6, 2004 through March 31, 2005, respectively, have been restated to give effect to the stock dividend for the \$75 million rights offering and \$50 million private sale of equity; both of which were consummated in September 2006. See Note 1 and 18 to the Consolidated Financial Statements.

- (3) Working capital (deficit) is calculated as current assets less current liabilities, which at March 31, 2005 reflects the reclassification of certain long-term debt as current. At March 31, 2003 and March 31, 2004, working capital (deficit) excludes liabilities of the Debtors classified as subject to compromise.

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

Important Matters

The following discussion and analysis provide information that management believes is relevant to an assessment and understanding of the Company's consolidated results of operation and financial condition. The discussion should be read in conjunction with the Consolidated Financial Statements and notes thereto contained in this annual report on Form 10-K. In particular, this discussion should be read in conjunction with Note 1. *Basis of Presentation* which describes the filing by Exide Technologies and certain of its subsidiaries

Table of Contents

of voluntary petitions for reorganization under Chapter 11 of the United States Bankruptcy Code on April 15, 2002 and the financial restructuring associated with the Company's emergence from Chapter 11, effective May 5, 2004.

After April 15, 2002, the Debtors operated their businesses and managed their properties as debtors-in-possession throughout the course of the bankruptcy case. The Debtors, along with the Official Committee of Unsecured Creditors filed the Plan with the Bankruptcy Court on February 27, 2004 and, on April 21, 2004, the Bankruptcy Court confirmed the Plan. As of the Effective Date, the Debtors substantially consummated the transactions provided for in the Plan. See Item 1. Business Emergence from Chapter 11 Bankruptcy Protection, which contains a summary of certain transactions that became effective on the Effective Date.

The Consolidated Financial Statements contained herein have been prepared in accordance with Statement of Position 90-7, Financial Reporting by Entities in Reorganization under the Bankruptcy Code (SOP 90-7). Financial statements for periods subsequent to the Company's emergence from Chapter 11 are not comparable with those of prior periods.

External Factors Which Affect the Company's Financial Performance

Lead and other Raw Materials. Lead represents approximately 40% of the Company's cost of goods sold. The market price of lead fluctuates. Generally, when lead prices decrease, customers may seek disproportionate price reductions from the Company, and when lead prices increase, customers may resist price increases. Both of these situations may cause customer demand for the Company's products to be reduced and the Company's net sales and gross margins to decline. The average price of lead as quoted on the London Metal Exchange (LME) has increased 37% from \$1,041 per metric ton for the fiscal year ended March 31, 2006 to \$1,426 per metric ton for the fiscal year ended March 31, 2007. At June 8, 2007, the quoted price on the LME was \$2,255 per metric ton. To the extent that lead prices continue to be volatile and the Company is unable to pass higher material costs resulting from this volatility to its customers, its financial performance will be adversely impacted.

Energy Costs. The Company relies on various sources of energy to support its manufacturing and distribution process, principally natural gas at its recycling facilities and diesel fuel for distribution of its products. The Company seeks to recoup these increased energy costs through surcharges. To the extent the Company is unable to pass on these higher energy costs to its customers, its financial performance is adversely impacted.

Competition. The global transportation and industrial energy battery markets are highly competitive. In recent years, competition has continued to intensify and has impacted the Company's ability to pass along increased prices to keep pace with rising production costs. The effects of this competition have been exacerbated by excess capacity in certain of the Company's markets and fluctuating lead prices as well as low-priced Asian imports in the Company's markets.

Exchange Rates. The Company is exposed to foreign currency risk in most European countries, principally from fluctuations in the Euro and British Pound. For fiscal 2007, the exchange rate of the Euro to the U.S. Dollar has increased 5% on a weighted-average basis to \$1.28 compared to \$1.22 for fiscal 2006, and the exchange rate of the British Pound to the U.S. Dollar has increased 6% on a weighted average basis to \$1.89 compared to \$1.79 for fiscal 2006. At March 31, 2007, the Euro was \$1.34 or 11% higher as compared to \$1.21 at March 31, 2006, and the British Pound was \$1.97 or 13% higher as compared to \$1.74 at March 31, 2006.

The Company is also exposed, although to a lesser extent, to foreign currency risk in Australia and the Pacific Rim. Movements of exchange rates against the U.S. dollar can result in variations in the U.S. dollar value of non-U.S. sales, expenses, assets, and liabilities. In some instances, gains in one currency may be offset by losses in another. Movements in European currencies impacted the Company's results for the periods presented herein. For the fiscal year ended March 31, 2007, approximately 59% of the Company's net sales were generated in Europe and ROW. Further, approximately 64% of the Company's aggregate accounts receivable and inventory as of March 31, 2007 were

held by its European subsidiaries.

Table of Contents

Markets. The Company is subject to concentrations of customers and sales in a few geographic locations and is dependent on customers in certain industries, including the automotive, communications and data and material handling markets. Economic difficulties experienced in these markets and geographic locations impact the Company's financial results.

Seasonality and Weather. The Company sells a disproportionate share of its transportation aftermarket batteries during the fall and early winter (the Company's third and portions of its fourth fiscal quarters). Retailers and distributors buy automotive batteries during these periods so they will have sufficient inventory for cold weather periods. In addition, many of the Company's industrial battery customers in Europe do not place their battery orders until the end of the calendar year. The impact of seasonality on sales has the effect of increasing the Company's working capital requirements and also makes the Company more sensitive to fluctuations in the availability of liquidity.

Unusually cold winters or hot summers may accelerate battery failure and increase demand for transportation replacement batteries. Mild winters and cool summers may have the opposite effect. As a result, if the Company's sales are reduced by an unusually warm winter or cool summer, it is not possible for the Company to recover these sales in later periods. Further, if the Company's sales are adversely affected by the weather, the Company cannot make offsetting cost reductions to protect its liquidity and gross margins in the short-term because a large portion of the Company's manufacturing and distribution costs are fixed.

Interest Rates. The Company is exposed to fluctuations in interest rates on its variable rate debt. See Note 9 to the Consolidated Financial Statements.

Fiscal 2007 Highlights and Outlook

The Company's reported results continued to be impacted in fiscal 2007 by increases in the price of lead and other commodity costs that are primary components in the manufacture of batteries and increases in energy costs used in the manufacturing and distribution of the Company's products.

In the Americas market, the Company obtains the vast majority of its lead requirements from six Company-owned and operated secondary lead recycling plants. These facilities reclaim lead by recycling spent lead-acid batteries that are obtained for recycling from the Company's customers and outside spent-battery collectors. This helps the Company in the Americas control the cost of its principal raw material as compared to purchasing lead at prevailing market prices. Similar to the rise in lead prices, however, the cost of spent batteries has also increased. For fiscal 2007, the average cost of spent batteries has increased approximately 18% versus fiscal 2006. Therefore, the higher market price of lead with respect to North American manufacturing continues to impact results. The Company continues to take selective pricing actions and attempts to secure higher captive spent battery return rates at lower cost than purchasing cores in the secondary market to help mitigate these risks.

In Europe, the Company's lead requirements are mainly obtained from third-party suppliers. Because of the Company's exposure to lead market prices in Europe, and based on historical price increases and volatility in lead prices, the Company has implemented several measures to offset higher lead prices including selective pricing actions, lead price escalators, and long-term lead supply contracts. In addition, the Company has automatic price escalators with many OEM customers. The Company currently recycles a small portion of its lead requirements in its European facilities.

The Company expects that these higher lead and other commodity costs, which affect all business segments, will continue to put pressure on the Company's financial performance. However, the selective pricing actions, lead price escalators in some contracts, long-term lead supply contracts, and fuel surcharges are intended to help mitigate these risks. The implementation of selective pricing actions and price escalators generally lags the rise in market prices of

lead and other commodities. Both price escalators and fuel surcharges are subject to the risk of customer acceptance.

Table of Contents

In addition to managing the impact of higher lead and other commodity costs on the Company's results, the key elements of the Company's underlying business plans and continued strategies are:

- (i) Successful execution and completion of the Company's ongoing restructuring plans, and organizational realignment of divisional and corporate functions resulting in further headcount reductions, principally in selling, general and administrative functions globally.
- (ii) Actions designed to improve the Company's liquidity and operating cash flow through working capital reduction plans, the sales of non-strategic assets and businesses, streamlining cash management processes, implementing plans to minimize the cash costs of the Company's restructuring initiatives and closely managing capital expenditures.
- (iii) Continued factory and distribution productivity improvements through its established Take Charge! initiative, which is now installed in 10 of its 28 manufacturing locations, including continuing a focused relationship with the principal consultant. This year will see further integration with its Excell initiative.
- (iv) The Company will continue to review and rationalize the various brand offerings of product in its markets to gain efficiencies in manufacturing and distribution, and better leverage of its marketing spending.
- (v) The Company will gain further product and process efficiencies with implementation of the announced Global Procurement structure. This focuses on leveraging existing relationships and creating an infrastructure for global search for products and components.

Critical Accounting Policies and Estimates

The Company's discussion and analysis of its financial condition and results of operations are based upon the Company's Consolidated Financial Statements, which have been prepared in accordance with accounting principles generally accepted in the U.S. The preparation of these financial statements requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues, and expenses, and the related disclosure of contingent assets and liabilities. On an ongoing basis, the Company evaluates its estimates based on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

The Company believes the following critical accounting policies and estimates affect the preparation of its Consolidated Financial Statements.

Inventory Reserves. The Company adjusts its inventory carrying value to estimated market value (when below historical cost basis) based upon assumptions of future demand and market conditions. If actual market conditions are less favorable than those projected by the Company, additional inventory write-downs may be required.

Valuation of Long-lived Assets. The Company's long-lived assets include property, plant and equipment, and identified intangible assets. Long-lived assets (other than indefinite lived intangible assets) are depreciated and amortized over their estimated useful lives, and are reviewed for impairment whenever changes in circumstances indicate the carrying value may not be recoverable. Indefinite-lived intangible assets are reviewed for impairment on both an annual basis and whenever changes in circumstances indicate that the carrying value may not be recoverable. The fair value of indefinite-lived intangible assets are based upon the Company's estimates of future cash flows and other factors including discount rates to determine the fair value of the respective assets. An erosion of future business results in any of the Company's business units could create impairment in the Company's long-lived assets and require a significant write down in future periods.

Employee Benefit Plans. The Company's pension plans and postretirement benefit plans are accounted for under SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans - An Amendment of FASB Statements No. 87, 88, 106, and 132(R)* (*SFAS 158*) using actuarial

Table of Contents

valuations required by SFAS No. 87, *Employers Accounting for Pensions (SFAS 87)* and SFAS No. 106, *Employers Accounting for Postretirement Benefits Other Than Pensions (SFAS 106)*. The Company considers accounting for employee benefit plans critical because management is required to make significant subjective judgments about a number of actuarial assumptions, including discount rates, compensation growth, long-term return on plan assets, retirement, turnover, health care cost trend rates and mortality rates. Depending on the assumptions and estimates used, the pension and postretirement benefit expense could vary within a range of outcomes and have a material effect on reported results. In addition, the assumptions can materially affect accumulated benefit obligations and future cash funding. For a detailed discussion of the Company's retirement benefits, see *Employee Benefit Plans* herein and Note 10 to the Consolidated Financial Statements.

Deferred Taxes. The Company records valuation allowances to reduce its deferred tax assets to amounts that are more likely than not to be realized. While the Company has considered future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for valuation allowances, if the Company were to determine that it would be able to realize deferred tax assets in the future in excess of the Company's net recorded amount, an adjustment to the net deferred tax asset would increase income in the period that such determination was made. Likewise, should the Company determine that it would not be able to realize all or part of its net deferred tax assets in the future, an adjustment to the net deferred tax asset would decrease income in the period such determination was made. The Company regularly evaluates the need for valuation allowances against its deferred tax assets, and currently has full valuation allowances recorded for deferred tax assets in the U.S., the United Kingdom, France, as well as in several other countries in Europe, and ROW.

Revenue Recognition. The Company records sales when revenue is earned. Shipping terms are generally FOB shipping point and revenue is recognized when product is shipped to the customer. In limited cases, terms are FOB destination and in these cases, revenue is recognized when product is delivered to the customer's delivery site. The Company records sales net of discounts and estimated customer allowances and returns.

Sales Returns and Allowances. The Company provides for an allowance for product returns and/or allowances. Based upon its manufacturing re-work process, the Company believes that the majority of its product returns are not the result of product defects. The Company recognizes the estimated cost of product returns as a reduction of sales in the period in which the related revenue is recognized. The product return estimates are based upon historical trends and claims experience, and include assessment of the anticipated lag between the date of sale and claim/return date.

Environmental Reserves. The Company is subject to numerous environmental laws and regulations in all the countries in which it operates. In addition, the Company can be held liable for investigation and remediation of sites impacted by its past operating activities. The Company maintains reserves for the cost of addressing these liabilities once they are determined to be both probable and reasonably estimable. These estimates are determined through a combination of methods, including outside estimates of likely expense and the Company's historical experience in the management of these matters.

Because environmental liabilities are not accrued until a liability is determined to be probable and reasonably estimable and there is a constructive obligation to remediate, not all potential future environmental liabilities have been included in the Company's environmental reserves and, therefore, additional earnings charges are possible. Also, future findings or changes in estimates could result in either an increase or decrease in the reserves and have a significant impact on the Company's liquidity and its results of operations.

Purchase Commitments. The Company has three worldwide supply agreements expiring in December 2009 to purchase its polyethylene battery separators. The supply agreements were entered into in fiscal 2000 with Daramic, the party that purchased the Company's battery separator manufacturing operation, as a condition of the sale of those operations. At the time of the sale, the agreements contained minimum annual purchase commitments in excess of the

Company's requirements. Accordingly, the Company established a reserve, and reduced the gain on sale of the manufacturing operations, for commitments in excess of the Company's requirements and for the contractual purchase prices in excess of market. The Company currently

Table of Contents

has a reserve for the incremental purchase requirements over the remaining life of the agreement in excess of the Company's projected requirements. Whenever there is a significant change in the Company's unit volume outlook based on changes to its business plan, this reserve will be adjusted.

Litigation. The Company has legal contingencies that have a high degree of uncertainty. When a contingency becomes probable and reasonably estimable, a reserve is established. Numerous lawsuits have been filed against the Company for which the liabilities are not considered probable and/or reasonably estimable. Consequently, no reserves have been established for these matters. If future litigation or the resolution of existing matters result in liability to the Company, such liability could have a significant impact on the Company's future results and liquidity.

Recently Issued Accounting Standards. See Note 2 to the Consolidated Financial Statements for a description of new accounting pronouncements and their impact to the Company.

Results of Operations

The Company reports its results as four business segments: Transportation Americas, Transportation Europe and ROW, Industrial Energy Americas, and Industrial Energy Europe and ROW. The following discussions provide a comparison of the Company's results of operations for the fiscal year ended March 31, 2007 with its results of operations for the fiscal year ended March 31, 2006, and the combined results of its operations and those of the Predecessor Company on a combined basis for the fiscal year ended March 31, 2005. The combined results of operations for the fiscal year ended March 31, 2005 include the Company's results of operations for the period May 6, 2004 to March 31, 2005 combined with the results of operations of the Predecessor Company for the period April 1, 2004 to May 5, 2004. The combined financial information for the fiscal year ended March 31, 2005 is merely additive and does not give pro forma effect to the transactions provided for in the plan of reorganization or the application of fresh-start accounting. As a result of the reorganization and adoption of fresh-start accounting, the Company's results of operations after May 5, 2004 are not comparable to the results of operations of the Predecessor Company for periods prior to May 6, 2004. The discussions with respect to the fiscal year ended March 31, 2005 are provided for comparative purposes only, but the value of such comparisons may be limited. The information in this section should be read in conjunction with the Consolidated Financial Statements and related notes thereto appearing in Item 8 Financial Statements and Supplementary Data.

Fiscal Year Ended March 31, 2007 compared with Fiscal Year Ended March 31, 2006

Overview

Net loss for fiscal 2007 was \$105.9 million versus fiscal 2006 net loss of \$172.7 million. Included in fiscal 2007 and fiscal 2006 net loss were gross profit of \$472.8 million and \$406.8 million, general and administrative expenses of \$173.1 million and \$191.0 million, restructuring costs of \$24.5 million and \$21.7 million, and reorganization items of \$4.3 million and \$6.2 million, respectively. Included in Other (income) expense were net currency remeasurement gains (losses) of \$11.6 million and (\$11.3) million, primarily related to U.S. dollar denominated debt in Europe, for fiscal 2007 and 2006, respectively. Interest

Table of Contents

expense, net, was \$90 million and \$69.5 million for fiscal 2007 and 2006, respectively. Also, gains (losses) on revaluation of warrants of (\$3.2) million and \$9.1 million were recognized in fiscal 2007 and 2006, respectively.

Net Sales

Net sales were \$2.9 billion for fiscal 2007 versus \$2.8 billion in fiscal 2006. Currency fluctuations (primarily the strengthening of the Euro against the U.S. dollar) favorably impacted net sales in fiscal 2007 by approximately \$87.7 million. Excluding the currency impact, net sales increased by approximately \$32.2 million, or 1.1%, as a result of stronger Industrial Energy demand in Europe and ROW, and was partially offset by weaker Transportation demand in both the Americas and Europe and ROW, and weaker Industrial Energy demand in the Americas in the network power product. Lower demand was more than offset by the impact of favorable pricing actions in all of the Company's segments. Much of the lower unit volumes in both Transportation segments can be attributed to the Company's pricing strategy of driving customer profitability to more appropriate levels or severing relationships where reasonable profitability cannot be achieved.

	1,177,232	1,095,665	81,567	45,382	36,185
TOTAL	\$ 2,939,785	\$ 2,819,876	\$ 119,909	\$ 87,663	\$ 32,246

Transportation Americas net sales were \$930.3 million for fiscal 2007 versus \$913.3 million for fiscal 2006. Net sales for fiscal 2007 were \$17 million or 1.9% higher than fiscal 2006 due to higher pricing, which, in part, reflected the pass-through of cost increases from lead, other materials, and energy. Transportation Americas has experienced lower volumes in original equipment and aftermarket sales, in part, as a result of the Company's efforts to eliminate or wind down unprofitable contracts and customers. Although the Company has been focused on cost cutting efforts, it has also been increasing its efforts to pass on commodity cost increases to its customers. In many cases the Company has been successful in passing on these costs, although there is typically a time lag involved. In cases where the Company has not been successful passing on these costs, it has determined that rather than continue to absorb customer losses it would not accept further business from certain of these customers. Third party lead sales revenues for fiscal 2007 were approximately \$22.4 million higher than fiscal 2006 due to rising lead prices.

Transportation Europe and ROW net sales were \$832.2 million for fiscal 2007 versus \$810.9 million for fiscal 2006. Net sales before the favorable impact of \$42.3 million in net foreign exchange rate fluctuations were lower by \$21 million or 2.6%. The decrease was primarily due to lower aftermarket sales volumes only partially offset by higher average selling prices.

Industrial Energy Americas net sales were \$270.5 million for fiscal 2007 versus \$275 million for fiscal 2006. Net sales were \$4.5 million or 1.6% lower due primarily to the softness in the network power markets, particularly in wireless telecommunications and lower sales to the U.S. Navy, which spiked in fiscal 2006 in advance of a change in technology, offset partially by higher average selling prices related to lead cost recovery and strong volume in the motive power markets.

Table of Contents

Industrial Energy Europe and ROW net sales were \$906.8 million for fiscal 2007 versus \$820.7 million for fiscal 2006. Net sales, before a favorable currency impact of \$45.4 million, increased \$40.7 million or 5% due to higher average selling prices related to lead and other pricing actions, and higher volumes in the network power markets, in particular the telecommunications channel.

Gross Profit

Gross profit was \$472.8 million in fiscal 2007 versus \$406.8 million in fiscal 2006. Gross margin increased to 16.1% of net sales in fiscal 2007 from 14.4% of net sales in fiscal 2006. Currency fluctuations positively impacted gross profit in fiscal 2007 by approximately \$11.9 million. Gross profit was positively impacted by higher average selling prices and cost reductions driven to a great degree by the Company's continued execution of the Take Charge! initiative and targeted capital spending. These improvements were partially offset by higher lead costs (average LME prices were up 36.9% to \$1,426 per metric ton in fiscal 2007 as compared to \$1,041 per metric ton in fiscal 2006), and increases in other commodity costs.

	259,071	14.7%	199,772	11.6%	59,299	4,658	54,641
Industrial Energy Americas	60,178	22.2%	53,153	19.3%	7,025		7,025
Europe & ROW	153,526	16.9%	153,906	18.8%	(380)	7,279	(7,659)
	213,704	18.2%	207,059	18.9%	6,645	7,279	(634)
TOTAL	\$ 472,775	16.1%	\$ 406,831	14.4%	\$ 65,944	\$ 11,937	\$ 54,007

Transportation Americas gross profit was \$165.7 million or 17.8% of net sales in fiscal 2007 versus \$97.1 million or 10.6% of net sales in fiscal 2006. The increase in gross margin is primarily due to higher pricing with a better mix of higher margin products and ongoing productivity initiatives, and is partially offset by lower volumes in original equipment and aftermarket sales, in part, as a result of efforts to rationalize unprofitable customers.

Transportation Europe and ROW gross profit was \$93.4 million or 11.2% of net sales in fiscal 2007 versus \$102.7 million or 12.7% of net sales in fiscal 2006. Currency favorably impacted gross profit during fiscal 2007 by approximately \$4.7 million. The decrease in gross profit before the favorable impact of currency exchange was primarily due to lower sales volumes in the aftermarket channel, a shift to non-branded lower, margin product and higher lead and other costs, only partially recovered through pricing actions.

Industrial Energy Americas gross profit was \$60.2 million or 22.2% of net sales in fiscal 2007 versus \$53.2 million or 19.3% of net sales in fiscal 2006. The increase in gross profit was primarily due to higher average selling prices, improved customer mix, and cost reductions, partially offset by lower sales volumes to the U.S. Navy for submarine batteries and network power markets, particularly for wireless telecommunications, and higher lead and other commodity costs.

Industrial Energy Europe and ROW gross profit was \$153.5 million or 16.9% of net sales in fiscal 2007 versus \$153.9 million or 18.8% of net sales in fiscal 2006. Currency positively impacted Industrial Energy Europe and ROW gross profit in fiscal 2007 by approximately \$7.3 million. Gross profit was negatively impacted by higher lead and other commodity costs, not fully recovered by higher average selling prices.

Table of Contents*Expenses*

Expenses were \$567.7 million in fiscal 2007 versus \$556.9 million in fiscal 2006. Included in expenses are restructuring charges of \$24.5 million in fiscal 2007 and \$21.7 million in fiscal 2006. Excluding these items, expenses were \$543.2 million and \$535.2 million in fiscal 2007 and fiscal 2006, respectively. Stronger foreign currencies unfavorably impacted expenses by approximately \$15.2 million in fiscal 2007. The change in expenses was impacted by the following:

- i. fiscal 2006 included a gain on revaluation of foreign currency forward contract of \$1.1 million;
- ii. interest, net, increased \$20.6 million principally due to higher interest rates and higher debt levels;
- iii. fiscal 2007 and fiscal 2006 expenses included currency remeasurement gain of \$11.6 million and a loss of \$11.3 million, respectively, included in Other (income) expense, net;
- iv. fiscal 2007 and fiscal 2006 expenses included a (gain) loss on revaluation of warrants of \$3.2 million and (\$9.1) million, respectively, included in Other (income) expense, net;
- v. fiscal 2007 and fiscal 2006 expenses included a loss on sale/impairment of fixed assets of \$18.6 million and \$8 million, respectively, included in Other (income) expense, net. The primary driver of the increase resulted from an impairment charge to assets (land and building) held for sale in France; and
- vi. fiscal 2006 general and administrative expenses included \$23.8 million for settlement of the U.S. Attorney matter, which was recorded on a discounted basis as payments will occur over a five year period. See Note 13 to the Consolidated Financial Statements for further discussion of the U.S. Attorney matter.

Commencing in fiscal 2007, the Company determined it to be more appropriate to allocate certain costs to its segments, which were previously reflected in unallocated corporate costs. These costs include the Company's global Information Technology organization, its Shared Services expenses including country related finance organizations in Europe and ROW, its country Human Resource organizations, and certain of its legal costs which can be directly attributed to a business segment. This change in reporting was made to better align the Company's cost structure with the business segment responsible for driving the cost. Fiscal 2006 costs were not restated to conform to this change. Therefore, the results between the fiscal years may not be comparable. The impact of this change in allocation is included in the discussion of each segment's expenses below. Certain other corporate costs, including interest expense, are not allocated or charged to the business segments.

Transportation Americas expenses were \$132.6 million in fiscal 2007 versus \$103.2 million in fiscal 2006. The increase in expenses was due to the allocation of \$14.8 million of previously unallocated corporate

Table of Contents

costs in fiscal 2007 that were not allocated in fiscal 2006, together with \$8.6 million of restructuring costs and a \$7.2 million impairment of fixed assets, both of which related to the fiscal 2007 closure of the Shreveport, Louisiana battery plant.

Transportation Europe and ROW expenses were \$113.8 million in fiscal 2007 versus \$78.3 million in fiscal 2006. Currency unfavorably impacted expenses in fiscal 2007 by approximately \$5.6 million. The increase in expenses was primarily due to the allocation of \$22.7 million of previously unallocated corporate costs in fiscal 2007 that were not allocated in fiscal 2006 and a \$9.7 million fixed asset impairment charge related to land and building held for sale in France.

Industrial Energy Americas expenses were \$38.2 million in fiscal 2007 versus \$44.3 million in fiscal 2006. The decrease in expenses was primarily due to restructuring costs of \$10.1 million in fiscal 2006 associated with the closure of the Kankakee, Illinois facility and reduced selling, marketing, and advertising expenses in fiscal 2007 and was offset by the allocation of \$4.7 million of previously unallocated corporate costs in fiscal 2007 that were not allocated in fiscal 2006.

Industrial Energy Europe and ROW expenses were \$145.2 million in fiscal 2007 versus \$114.2 million in fiscal 2006. Currency unfavorably impacted expenses in fiscal 2007 by approximately \$7 million. The increase in expenses was primarily due to the allocation of \$20.4 million of previously unallocated corporate costs in fiscal 2007 that were not allocated in fiscal 2006, offset by restructuring costs that were reduced by \$1.1 million in fiscal 2007.

Unallocated expenses, net, which include shared service and corporate expenses, interest expense, currency remeasurement losses (gains), and gain on revaluation of warrants, were \$137.9 million in fiscal 2007 versus \$216.9 million in fiscal 2006. This decrease was primarily due to the allocation of approximately \$62.6 million of costs to the business segments for fiscal 2007 that were not allocated for fiscal 2006, the fiscal 2006 U.S. Attorney settlement for \$23.8 million, and the favorable impact of the Company's fiscal 2007 cost reduction programs, consisting primarily of headcount reductions. Expenses for fiscal 2006 included a gain on revaluation of foreign currency forward contracts of \$1.1 million. Expenses for fiscal 2007 and 2006 included (gains) losses on revaluation of warrants of \$3.2 million and (\$9.1) million, respectively. Expenses for fiscal 2007 and 2006 also included currency remeasurement (gain) loss of (\$11.6) million and \$11.3 million, respectively. Currency unfavorably impacted unallocated expenses in fiscal 2007 by approximately \$2.7 million. Corporate expenses in fiscal 2007 and 2006 were \$59.2 million and \$146.4 million, respectively. The decrease was due primarily to the change in corporate expense allocation discussed above and lower general and administrative cost resulting from the Company's continued restructuring efforts and fiscal 2006 included \$23.8 million for the settlement of the U.S. Attorney matter. Interest expense, net was \$90 million in fiscal 2007 versus \$69.5 million in fiscal 2006. The increase is principally due to higher outstanding debt and higher interest rates under the Company's senior secured credit facility.

Income (loss) before reorganization items, income taxes, and minority interest

The components affecting income (loss) before reorganization items, income taxes, and minority interest are discussed above.

Reorganization Items

Reorganization items represent amounts the Company continues to incur as a result of the Chapter 11 filing. Reorganization items for fiscal 2007 and 2006 were \$4.3 million and \$6.2 million, respectively. These items primarily include professional fees, consisting primarily of legal services, and costs associated with D&O insurance coverage for the directors and officers of the Predecessor Company.

Income Taxes

In fiscal 2007, an income tax provision of \$5.8 million was recorded on pre-tax loss of \$99.2 million. In fiscal 2006, an income tax provision of \$16 million was recorded on pre-tax loss of \$156.2 million. The effective tax rate was (5.8%) and (10.2%) in fiscal 2007 and 2006, respectively. The effective tax rate for fiscal 2007 and 2006 was impacted by the generation of income in tax-paying jurisdictions, principally in New Zealand, Canada and certain countries in Europe, with limited or no offset on a consolidated basis as a result of recognition of valuation allowances on tax benefits generated from current period losses in the U.S., United Kingdom, Italy, Spain, and France. The effective tax rate for fiscal 2007 was impacted by the recognition of \$46.5 million of valuation allowances on current year tax benefits generated primarily in the U.S., United Kingdom, France, Spain, and Italy. In addition, the effective tax rate for fiscal 2007 was impacted by a settlement between Exide's Dutch subsidiary and Dutch tax authorities, reducing by \$3.8 million previously paid taxes to the Netherlands. The effective tax rate for fiscal 2006 was impacted by the recognition of \$78.3 million of valuation allowances on tax benefits generated primarily in the U.S., United Kingdom, France, Spain, and Italy. The effective tax rate for fiscal 2006 was also impacted by the recognition of \$5.9 million in valuation allowances on tax benefits generated from prior year losses and certain deductible temporary differences in Spain based on the Company's assessment that it is more likely than not that the related tax benefits will now not be realized.

Fiscal Year Ended March 31, 2006 compared with Fiscal Year Ended March 31, 2005

Overview

Net loss for fiscal 2006 was \$172.7 million versus fiscal 2005 net income of \$1.3 billion. Included in fiscal 2006 consolidated net income were reorganization items of \$6.2 million, restructuring costs of \$21.7 million, and a charge of \$23.8 million related to the resolution of a U.S. Attorney matter. In addition, in Other (income) expense net currency remeasurement losses of (\$11.3) million and (\$3.7) million, primarily related to U.S. dollar denominated debt in Europe, were recognized in fiscal 2006 and 2005, respectively. A gain (loss) on revaluation of a foreign currency forward contract of \$1.1 million and (\$13.2) million was recognized in fiscal 2006 and 2005, respectively. Gains on revaluation of warrants of \$9.1 million and

Table of Contents

\$63.1 million were recognized in fiscal 2006 and 2005, respectively. Included in fiscal 2005 consolidated net income were a gain on discharge of liabilities subject to compromise of \$1.6 billion, a gain on Fresh Start reporting adjustments of \$228.4 million, and a non cash charge of \$388.5 million for goodwill impairment.

Net Sales

Net sales were \$2.8 billion for fiscal 2006 versus \$2.7 billion in fiscal 2005. Currency fluctuations (primarily the weakening of the Euro against the U.S. dollar) negatively impacted net sales in fiscal 2006 by approximately \$53.2 million. Excluding the currency impact, net sales increased by approximately \$182.2 million or 7% as a result of higher volumes, particularly in the Americas, and higher average selling prices due to lead and other related pricing actions.

		For the Fiscal Year Ended March 31, 2006	For the Fiscal Year Ended March 31, 2005	Favorable/(Unfavorable)		
				Total	Currency Related	Non-Currency Related
				(In thousands)		
	Transportation					
Americas		\$ 913,317	\$ 847,571	\$ 65,746	\$	\$ 65,746

		1,095,665	1,020,130	75,535	(25,511)	101,046
TOTAL		\$ 2,819,876	\$ 2,690,866	\$ 129,010	\$ (53,232)	\$ 182,242

Transportation Americas net sales were \$913.3 million for fiscal 2006 versus \$847.6 million for fiscal 2005. Third party lead sales revenues for fiscal 2006 were approximately \$8.6 million higher than fiscal 2005 due to rising lead prices. Net sales for fiscal 2006 were \$65.7 million or 7.8% higher than fiscal 2005 due mainly to an increase in aftermarket volumes in the U.S. and Mexico. The Company also achieved higher average selling prices which, in part, reflected the pass-through of cost increases from lead, other materials, and energy. Price increases, however, have lagged rising costs, resulting in an overall net reduction in margins.

Transportation Europe and ROW net sales were \$810.9 million for fiscal 2006 versus \$823.2 million for fiscal 2005. Net sales, before the unfavorable impact of \$27.7 million in net foreign exchange rate fluctuations, were higher by 1.8% mainly due to higher OEM and OES sales. This increase was, however, substantially offset by lower aftermarket sales.

Industrial Energy Americas net sales were \$275 million for fiscal 2006 versus \$223 million for fiscal 2005. Net sales were \$52 million, or 23.3% higher due to strong volume growth in both the motive power and network power markets, particularly in the telecommunications market, and higher average selling prices related to lead and other

pricing actions.

Industrial Energy Europe and ROW net sales were \$820.7 million for fiscal 2006 versus \$797.1 million for fiscal 2005. Net sales, before an unfavorable currency impact of \$25.5 million, increased \$49.1 million or 6.2% due to higher volumes in the material handling application and telecommunication channels, as well as higher average selling prices related to lead and other pricing actions. This favorability was, however, partially offset by competitive pricing pressures in both the original equipment and aftermarket channels.

Gross Profit

Gross profit was \$406.8 million in fiscal 2006 versus \$413 in fiscal 2005. Gross margin decreased to 14.4% in fiscal 2006 from 15.3% in fiscal 2005. Currency negatively impacted gross profit in fiscal 2006 by approximately \$8.4 million. Gross profit in each of the Company's business segments was negatively impacted

Table of Contents

by higher lead costs (average LME prices were \$1,041 dollars per metric ton in fiscal 2006 versus \$920 dollars per metric ton in fiscal 2005), and were only partially recovered by higher average selling prices.

	For the Fiscal Year Ended March 31, 2006		For the Fiscal Year Ended March 31, 2005		Favorable/(Unfavorable)		
	Total	Percent of Net Sales	Total	Percent of Net Sales	Total	Currency Related	Non-Currency Related
	(In thousands)						
Transportation							
Americas	\$ 97,092	10.6%	\$ 112,091	13.2%	\$ (14,999)	\$	\$ (14,999)
Europe & ROW	102,680	12.7%	114,495	13.9%	(11,815)	(3,683)	(8,132)
	199,772	11.6%	226,586	13.6%	(26,814)	(3,683)	(23,131)
Industrial Energy							
Americas	53,153	19.3%	49,039	22.0%	4,114		4,114
Europe & ROW	153,906	18.8%	137,347	17.2%	16,559	(4,726)	21,285
	207,059	18.9%	186,386	18.3%	20,673	(4,726)	25,399
TOTAL	\$ 406,831	14.4%	\$ 412,972	15.3%	\$ (6,141)	\$ (8,409)	\$ 2,268

Transportation Americas gross profit was \$97.1 million or 10.6% of net sales in fiscal 2006 versus \$112.1 million or 13.2% of net sales in fiscal 2005. The decrease in gross margin is primarily due to increases in costs for lead, other materials, and energy. The Company's U.S. battery recycling plants were adversely affected by a tight market for spent batteries as well as increases in the cost of ancillary materials used in the lead conversion process. The effect of higher lead, other materials and energy costs was only partially recovered by higher average selling prices. Additionally, a favorable change in the allocation of lead costs between Transportation Americas and Industrial Energy Americas partially offset the negative impact of the lead increases to the segment by approximately \$6.3 million.

Transportation Europe and ROW gross profit was \$102.7 million or 12.7% of net sales in fiscal 2006 versus \$114.5 million or 13.9% of net sales in fiscal 2005. Currency negatively impacted gross profit during fiscal 2006 by approximately \$3.7 million. The decrease in gross margin was primarily due to lower sales volumes in the Aftermarket channel combined with higher raw material costs, and was partially offset by recoveries through pricing actions. Additionally, benefits of increased efficiencies resulting from the plant closure in Nanterre, France in fiscal 2005 and other rationalization projects helped to mitigate the decrease in gross margins versus fiscal 2005.

Industrial Energy Americas gross profit was \$53.2 million or 19.3% of net sales in fiscal 2006 versus \$49 million, or 22% of net sales in fiscal 2005. The increase in gross profit was primarily due to higher sales volumes, and was partially offset by higher lead costs and other commodity costs not fully recovered through price increases and an unfavorable change of approximately \$6.3 million in the allocation of lead costs between Transportation Americas and Industrial Energy Americas.

Industrial Energy Europe and ROW gross profit was \$153.9 million or 18.8% of net sales in fiscal 2006 versus \$137.3 million or 17.2% of net sales in fiscal 2005. Currency negatively impacted Industrial Energy Europe and ROW gross profit in fiscal 2006 by approximately \$4.7 million. Gross profit was positively impacted by higher sales volume, higher average selling prices, and the benefits of headcount and other cost reduction programs, partially offset by higher lead and other commodity costs.

Expenses

Expenses were \$556.9 million in fiscal 2006 versus \$876.8 million in fiscal 2005. Included in expenses are restructuring charges of \$21.7 million in fiscal 2006 and \$43.1 million in fiscal 2005. Also included in fiscal 2005 expenses is a charge for goodwill impairment of \$388.5 million. Excluding these items, expenses were \$535.2 million and \$445.2 million in fiscal 2006 and fiscal 2005, respectively. Weaker foreign currencies

Table of Contents

favorably impacted expenses by approximately \$8 million in fiscal 2006. The change in expenses was attributable to the following matters:

- i. fiscal 2006 and fiscal 2005 included a gain (loss) on revaluation of foreign currency forward contract of \$1.1 million and (\$13.2), respectively;
- ii. interest, net increased \$18 million principally due to higher interest rates and higher debt levels;
- iii. fiscal 2006 and fiscal 2005 expenses included currency remeasurement losses of \$11.3 million and \$3.7 million, respectively, included in Other (income) expense, net;
- iv. fiscal 2006 and fiscal 2005 expenses included a gain on revaluation of warrants of \$9.1 million and \$63.1 million, included in Other (income) expense, net;
- v. fiscal 2006 and fiscal 2005 expenses included a loss on sale of assets of \$8 million and \$7.6 million, included in other (income) expense, net; and
- vi. fiscal 2006 expenses included \$23.8 million for settlement of a U.S. Attorney matter, which was recorded on a discounted basis as payments will occur over a five year period.

Unallocated corporate expenses	216,941	138,364	(78,577)	2,616	(81,193)
TOTAL	\$ 556,914	\$ 876,835	\$ 319,921	\$ 8,040	\$ 311,881

Transportation Americas expenses were \$103.2 million in fiscal 2006 versus \$216.9 million in fiscal 2005. Expenses in fiscal 2005 were \$94.8 million before a goodwill impairment charge of \$122.1 million. The increase in expenses before goodwill impairment was due mainly to higher branch operating costs, including diesel fuel.

Transportation Europe and ROW expenses were \$78.3 million in fiscal 2006 versus \$220 million in fiscal 2005. Currency fluctuations favorably impacted expenses in fiscal 2006 by approximately \$2 million. Expenses in fiscal 2005 were \$107.7 million before a goodwill impairment charge of \$112.2 million. The decrease in expenses before goodwill impairment was primarily due to lower selling and marketing costs, lower headcount, and a general reduction in other administrative expenses.

Industrial Energy Americas expenses were \$44.3 million in fiscal 2006 versus \$68.5 million in fiscal 2005. Expenses in fiscal 2005 were \$31.1 million before a goodwill impairment charge of \$37.4 million. The increase in expenses before goodwill impairment was primarily due to restructuring costs of \$10.1 million associated with the closure of the Kankakee, Illinois facility and increased variable selling costs resulting from a significant increase in net sales.

Industrial Energy Europe and ROW expenses were \$114.2 million in fiscal 2006 versus \$233.1 million in fiscal 2005. Currency favorably impacted expenses in fiscal 2006 by approximately \$3.4 million. Expenses in fiscal 2005 were \$116.3 million before a goodwill impairment charge of \$116.8 million. The decrease in expenses before goodwill impairment was primarily due to lower selling, marketing, advertising, general and

Table of Contents

administrative expenses achieved through targeted cost reduction programs, partially offset by higher restructuring costs.

Unallocated expenses, net, which include shared service and corporate expenses, interest expense, currency remeasurement losses (gains), and gain on revaluation of warrants, were \$216.9 million in fiscal 2006 versus \$138.4 million in fiscal 2005. Expenses for fiscal 2006 and 2005 included a gain (loss) on revaluation of foreign currency forward contracts of \$1.1 million and (\$13.2) million, respectively. Expenses for fiscal 2006 and 2005 included gains on revaluation of warrants of \$9.1 million and \$63.1 million, respectively. Expenses for fiscal 2006 and 2005 included currency remeasurement losses of \$11.3 million and \$3.7 million, respectively. Currency favorably impacted unallocated expenses in fiscal 2006 by approximately \$2.6 million. Corporate expenses in fiscal 2006 and 2005 were \$146.4 million and \$133.1 million, respectively. The increase was primarily due to \$23.8 million for the U.S. Attorney matter recorded in fiscal 2006, and was partially offset by lower general and administrative cost resulting from the Company's continued restructuring efforts. Interest expense, net, was \$69.5 million in fiscal 2006 versus \$51.5 million in fiscal 2005. The increase is principally due to higher outstanding debt and higher interest rates under the Company's senior secured credit facility.

Income (loss) before reorganization items, income taxes, and minority interest

The components affecting Income (loss) before reorganization items, income taxes, and minority interest are as discussed above.

	For the Fiscal Year Ended March 31, 2006		For the Fiscal Year Ended March 31, 2005		Favorable/ (Unfavorable)

Reorganization Items

Reorganization items represent amounts the Company incurred as a result of the Chapter 11 filing. Reorganization items for fiscal 2006 and 2005 were \$6.2 million and \$30 million, respectively.

Gain on discharge of liabilities subject to compromise

For fiscal 2005, the Company recognized a \$1.6 billion gain on discharge of liabilities subject to compromise and recapitalization as a result of transactions contemplated by the Plan.

Fresh Start reporting adjustments

For fiscal year 2005 as a result of the Company's adoption of Fresh Start reporting, upon consummation of the Plan on the Effective Date, the Company recorded certain adjustments to assets and liabilities to reflect their fair values. The Fresh Start adjustments resulted in a gain of \$228.4 million.

Table of Contents*Income Taxes*

In fiscal 2006, an income tax provision of \$16 million was recorded on pre-tax income (loss) of (\$156.2) million. In fiscal 2005, an income tax provision of \$11.7 million was recorded on pre-tax income (loss) of \$1.3 billion. The effective tax rate was 10.2% and 0.9% in fiscal 2006 and 2005, respectively. The effective tax rate for fiscal 2006 and 2005 was impacted by the generation of income in tax-paying jurisdictions, principally certain countries in Europe, Australia and Canada, with limited or no offset on a consolidated basis as a result of recognition of valuation allowances on tax benefits generated from current period losses in the U.S., the United Kingdom and France. The effective tax rate for fiscal 2006 was impacted by the recognition of \$78.3 million of valuation allowances on current year tax benefits generated primarily in the U.S., United Kingdom, France, and Italy. The effective tax rate for fiscal 2006 was also impacted by the recognition of \$5.9 million in valuation allowances on tax benefits generated from prior year losses and certain deductible temporary differences in Spain based on the Company's assessment that it is more likely than not that the related tax benefits will now not be realized. The effective tax rate for fiscal 2005 was impacted by the gain on discharge of liabilities subject to compromise of \$1.6 billion, which is exempt from tax in the U.S., the non-taxable gain on Fresh Start reporting adjustments of \$228.4 million and the non-deductibility of the \$388.5 million goodwill impairment charge. The effective tax rate in fiscal 2005 was also impacted by the recognition of \$41.4 million primarily in valuation allowances on tax benefits generated from prior year losses and certain deductible temporary differences in France and Italy based on the Company's assessment that it is more likely than not that the related tax benefits will now not be realized.

Liquidity and Capital Resources

As of March 31, 2007, the Company had total liquidity of \$145.9 million consisting of cash and cash equivalents of \$76.2 million and availability under the Company's revolving loan facility and other loan facilities of \$59.3 million and \$10.4 million, respectively. This compared to total liquidity position of \$63.6 million at March 31, 2006 consisting of cash and cash equivalents of \$32.2 million and availability under the Revolving Loan Facility and other loan facilities of \$29.7 million and \$1.7 million, respectively. On June 8, 2007, total liquidity was approximately \$171.5 million, consisting of availability under the Company's new revolving term loan facility of \$135.9 million and an estimated \$35.6 million in cash and cash equivalents. It should be noted that cash and cash equivalents fluctuate substantially on a daily basis due in part to the timing of account receivable collections, and mid-period balances are subject to the monthly reconciliation process of the Company's numerous global accounts.

Prior to May 15, 2007, the Company operated under a \$600 million senior secured credit agreement entered into in May 2004, which included a \$500 million Multi-Currency Term Loan Facility and a \$100 million Multi-Currency Revolving Loan Facility including a letter of credit sub-facility of up to \$40 million.

On May 15, 2007, the Company entered into a new five-year \$495 million senior secured credit facility that replaced the \$600 million senior secured credit facility entered into in May 2004. The new senior secured credit facility consists of a \$295 million term loan and a \$200 million asset-based revolving loan and matures in May 2012. Proceeds from the new senior secured credit facility were used to repay amounts outstanding under the prior senior secured credit facility. The new senior secured credit facility provides increased liquidity and greater flexibility, contains no financial maintenance covenants and is the Company's most important source of liquidity outside of its cash flows from operations.

Borrowings under the term loan in U.S. dollars bear interest at a rate equal to LIBOR plus 3.25%, and borrowings under the term loan in Euros bear interest at a rate equal to LIBOR plus 3.50%; provided that such rates may decrease by 0.25% after December 31, 2007 if the Company achieves certain corporate ratings.

Borrowings under the revolving loan bear interest at a rate equal to LIBOR plus 1.75%. The applicable spread on the revolving loan is subject to change and may move up or down in accordance with a leverage-based pricing grid. The revolving loan includes a letter of credit sub-facility of \$75 million and an accordion feature that allows the Company to increase the facility size up to \$250 million if it can obtain commitments from existing or new lenders for the incremental amount. Availability under the revolving loan is subject to a

Table of Contents

borrowing base comprised of up to 85% of the Company's and certain of its subsidiaries' combined eligible accounts receivable plus 85% of the net orderly liquidation value of eligible North American inventory less, in each case, certain limitations and reserves.

Borrowings of the Company and other domestic borrowers are guaranteed by substantially all domestic subsidiaries of the Company, and borrowings of Exide C.V. are guaranteed by the Company, substantially all domestic subsidiaries of the Company and certain foreign subsidiaries. These guarantee obligations are secured by a lien on substantially all of the assets of such respective borrowers and guarantors.

The senior secured credit facility contains customary terms and conditions, including, without limitation, limitations on debt (including a leverage or coverage based incurrence test), limitations on mergers and acquisitions, limitations on restricted payments, limitations on investments, limitations on capital expenditures, limitations on asset sales with limited exceptions, limitations on liens and limitations on transactions with affiliates. A springing fixed charge financial covenant of 1.0:1.0 will be applicable to the revolving loan if the excess availability under the revolving loan falls below \$40 million.

On September 18, 2006, the Company completed a \$75 million rights offering that it launched in August 2006 which allowed stockholders to purchase additional shares of common stock. The Company distributed, at no charge to its holders of common stock, non-transferable subscription rights to purchase additional shares of the Company's common stock. On September 18, 2006, the Company also completed a private sale of \$50 million of common stock. The Company generated approximately \$117.7 million from the rights offering and sale of additional equity shares after deducting offering expenses. For a complete discussion of the rights offering, see Note 18 to the Consolidated Financial Statements.

In March 2005, the Company issued \$290 million in aggregate principal amount of 10.5% Senior Secured Notes due 2013. Interest of \$15.2 million is payable semi-annually on March 15 and September 15. The 10.5% Senior Secured Notes are redeemable at the option of the Company, in whole or in part, on or after March 15, 2009, initially at 105.25% of the principal amount, plus accrued interest, declining to 100% of the principal amount, plus accrued interest on or after March 15, 2011. The 10.5% Senior Secured Notes are redeemable at the option of the Company, in whole or in part, subject to payment of a make whole premium, at any time prior to March 15, 2009. In addition, until May 15, 2008, up to 35% of the 10.5% Senior Secured Notes are redeemable at the option of the Company, using the net proceeds of one or more qualified equity offerings. In the event of a change of control or the sale of certain assets, the Company may be required to offer to purchase the 10.5% Senior Secured Notes from the note holders. Those notes are secured by a junior priority lien on the assets of the U.S. parent company, including the stock of its subsidiaries. The Indenture for these notes contains financial covenants which limit the ability of the Company and its subsidiaries to among other things incur debt, grant liens, pay dividends, invest in non-subsidiaries, engage in related party transactions and sell assets. Under the Indenture, proceeds from asset sales (to the extent in excess of a \$5 million threshold) must be applied to offer to repurchase notes to the extent such proceeds exceed \$20 million in the aggregate and are not applied within 365 days to retire senior secured credit agreement borrowings or the Company's pension contribution obligations that are secured by a first priority lien on the Company's assets or to make investments or capital expenditures.

Also, in March 2005, the Company issued Floating Rate Convertible Senior Subordinated Notes due September 18, 2013, with an aggregate principal amount of \$60 million. These notes bear interest at a per annum rate equal to the 3-month LIBOR, adjusted quarterly, minus a spread of 1.5%. The interest rate at March 31, 2007 and 2006 was 3.9% and 3.4%, respectively. Interest is payable quarterly. The notes are convertible into the Company's common stock at a conversion rate of 57.5705 shares per one thousand dollars principal amount at maturity, subject to adjustments for any common stock splits, dividends on the common stock, tender and exchange offers by the Company for the common stock and third party tender offers, and in the case of a change in control in which 10% or more of the

consideration for the common stock is cash or non-traded securities, the conversion rate increases, depending on the value offered and timing of the transaction, to as much as 70.2247 shares per one thousand dollars principal amount.

At March 31, 2007, the Company had outstanding letters of credit with a face value of \$40.7 million and surety bonds with a face value of \$4.5 million. The majority of the letters of credit and surety bonds have

Table of Contents

been issued as collateral or financial assurance with respect to certain liabilities the Company has recorded, including but not limited to environmental remediation obligations and self-insured workers compensation reserves. Failure of the Company to satisfy its obligations with respect to the primary obligations secured by the letters of credit or surety bonds could entitle the beneficiary of the related letter of credit or surety bond to demand payments pursuant to such instruments. The letters of credit generally have terms up to one year. Collateral held by the surety in the form of letters of credit at March 31, 2007, pursuant to the terms of the agreement, was \$4.5 million.

At March 31, 2007, the Company was in compliance in all material respects with covenants contained in the senior secured credit agreement and indenture agreements that cover the Senior Secured Notes and Floating Rate Convertible Senior Subordinated Notes.

Risks and uncertainties could cause the Company's performance to differ from management's estimates. As discussed above under *Factors Which Affect the Company's Financial Performance - Seasonality and Weather*, the Company's business is seasonal. During the Company's first and second fiscal quarters, the Company builds inventory in anticipation of increased sales in the winter months. This inventory build increases the Company's working capital needs. During these quarters, because working capital needs are already high, unexpected costs or increases in costs beyond predicted levels would place a strain on the Company's liquidity and impact its ability to comply with its financial covenants.

Sources Of Cash

The Company's liquidity requirements have been met historically through cash provided by operations, borrowed funds and the proceeds of sales of accounts receivable. Additional cash has been generated in recent years from the sale of non-core businesses and assets.

The improvement in cash flow from operations is the result of a reduction in net loss of approximately \$66.9 million, improved working capital management in the face of higher lead costs, partially offset by higher pension and other contractual payments.

The Company generated \$4.5 million and \$25.3 million in cash from the sale of non-core assets in fiscal 2007 and fiscal 2006, respectively. These sales principally relate to the sale of surplus land and buildings.

Cash flows provided by financing activities were \$87.6 million and \$34.6 million in fiscal 2007 and fiscal 2006, respectively. Cash flows provided by financing activities in fiscal 2007 relate primarily to net proceeds of \$117.7 million from the \$75 million rights offering and \$50 million private equity sale, partially offset by debt repayments.

Total debt at March 31, 2007 was \$684.5 million, as compared to \$701 million at March 31, 2006. See Note 9 to the Consolidated Financial Statements for the composition of such debt.

Going forward, the Company's principal sources of liquidity will be cash from operations, its new senior secured credit facility, proceeds from sales of accounts receivable, and proceeds from non-core asset sales. The new senior secured credit agreement allows the Company to retain the first \$60 million from proceeds from sale of non-core assets.

Uses Of Cash

The Company's liquidity needs arise primarily from the funding of working capital needs, obligations on indebtedness and capital expenditures. Because of the seasonality of the Company's business, more cash has been typically generated in the third and fourth fiscal quarters than the first and second fiscal quarters. Greatest cash demands from operations have historically occurred during the months of June through October.

The Company anticipates that it will have ongoing liquidity needs to support its operational restructuring programs during fiscal 2008, including payment of remaining accrued restructuring costs of approximately \$5.7 million as of March 31, 2007. The Company's ability to successfully implement these restructuring strategies on a timely basis may be impacted by its access to sources of liquidity. For further discussion see Note 14 to the Consolidated Financial Statements.

Table of Contents

Capital expenditures were \$51.9 million and \$58.1 million in fiscal 2007 and fiscal 2006, respectively.

Employee Benefit Plans

Description

On September 29, 2006, the FASB issued SFAS No. 158, which requires recognition of the overfunded or underfunded status of pension and other postretirement benefit plans on the balance sheet. Under SFAS 158, gains and losses, prior service costs and credits, and any remaining transition amounts under FASB Statement No. 87, *Employers Accounting for Pensions* (SFAS 87) and FASB Statement No. 106, *Employers Accounting for Postretirement Benefits Other Than Pensions* (SFAS 106) that have not yet been recognized through net periodic benefit costs will be recognized in accumulated other comprehensive income (loss), net of tax effects, until they are amortized as a component of net periodic cost. SFAS 158 does not change how pensions and other postretirement benefits are accounted for and reported in the income statement. Companies will continue to follow the existing guidance in SFAS 87, FASB Statement No. 88, *Employers Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits* and SFAS 106. SFAS 158 was effective for fiscal years ending after December 15, 2006. The company adopted the balance sheet recognition provisions of SFAS 158 at March 31, 2007.

SFAS 158 also requires that employers measure the benefit obligation and plan assets as of the fiscal year end for fiscal years ending after December 15, 2008. The company currently uses a December 31 measurement date for its U.S. pension and other postretirement benefit plans and a March 31 measurement date for its non-U.S. plans. The company intends to eliminate the early measurement date for its U.S. plans in fiscal 2009.

The Company also has some defined contribution plans in North America, Europe and ROW with related expense of \$6.8 million, \$7 million, \$5.3 million, and \$0.5 million, for fiscal 2007 and 2006, the period May 6, 2004 to March 31, 2005, and the period April 1, 2004 to May 5, 2005, respectively.

The Company provides certain health care and life insurance benefits for a limited number of retirees. The Company accrues the estimated cost of providing post-retirement benefits during the employees applicable years of service.

Assets funded under both the North American and European defined benefit plans consist primarily of equity and fixed income securities. At March 31, 2007, the fair market value of assets for the Company's defined benefit plans was \$408.9 million compared to \$326.5 million at March 31, 2006.

Accounting And Significant Assumptions

The Company accounts for pension benefits using the accrual method set forth in SFAS 87. The accrual method of accounting for pensions involves the use of actuarial assumptions concerning future events that impact estimates of the amount and timing of benefit obligations and future benefit payments.

Significant assumptions used in calculating the Company's pension benefit obligations and related expense are the discount rate, rate of compensation increase, and the expected long-term rate of return on plan assets. The Company establishes these underlying assumptions in consultation with its actuaries. Depending on the assumptions used, pension obligations and related expense could vary within a range of outcomes and have a material effect on the Company's results, benefit obligations, and cash funding requirements.

The discount rates used by the Company for determining benefit obligations are generally based on high quality corporate bonds and reflect the cash flows of the respective plans. The assumed rates of compensation increases

reflect estimates of the projected change in compensation levels based on future expectations, general price levels, productivity and historical experience, among other factors. In evaluating the expected long term rate of return on plan assets, the Company considers the allocation of assets and the expected return on various asset classes in the context of the long-term nature of pension obligations.

At March 31, 2007, the Company had slightly increased the discount rates used to value its pension benefit obligations to reflect the increase in yields on high quality corporate bonds, and increased the rate of compensation increases to reflect current inflationary expectations. The aggregate effect of these changes

Table of Contents

decreased the present value of projected benefit obligations as of March 31, 2007 and had the effect of decreasing pension expense in fiscal 2008. In addition, the plan freeze in the U.S. which ceased pension accruals for more than half the year reduced the pension expense for fiscal 2007 by \$3.8 million. Pension expense for the Company's defined benefit pension and other post-retirement benefit plans was \$18.7 million in fiscal 2007 compared to \$23.9 million in fiscal 2006.

A one-percentage point change in the weighted average expected return on plan assets for defined benefit plans would change net periodic benefit cost by approximately \$3.6 million in fiscal 2007. A one-percentage point increase in the weighted average discount rate would decrease net periodic benefit cost for defined benefit plans by approximately \$2.8 million in fiscal 2007. A one-percentage point decrease in the weighted average discount rate would increase net periodic benefit cost for defined benefit plans by approximately \$5.5 million in fiscal 2007.

As of March 31, 2007, actuarial gains for the Company's defined benefit pension and other post-retirement benefit plans were \$12.8 million, compared to losses of \$17.2 million at March 31, 2006. The actuarial gains during the fiscal year ended March 31, 2007 principally reflect increases in discount rates in the UK and the U.S. in 2007. SFAS 87 provides for delayed recognition of such actuarial gains/losses, whereby these gains/losses, to the extent they exceed 10% of the greater of the projected benefit obligation or the market related value of plan assets are amortized as a component of pension expense over a period that approximates the average remaining service period of active employees.

Plan Funding Requirements

Cash contributions to the Company's pension plans are generally made in accordance with minimum regulatory requirements. The Company's U.S. plans are currently significantly under-funded. Based on current assumptions and regulatory requirements including the Pension Protection Act of 2006, which requires full funding of underfunded defined benefit plans in the U.S. over a specific period, the Company's minimum future cash contribution requirements for its U.S. plans are expected to remain relatively high for the next few fiscal years. On November 17, 2004, the Company received written notification of a tentative determination from the Internal Revenue Service (IRS) granting a temporary waiver of its minimum funding requirements for its U.S. plans for calendar years 2003 and 2004, amounting to approximately \$50 million net, under Section 412(d) of the Internal Revenue Code, subject to providing a lien satisfactory to the Pension Benefit Guaranty Corporation (PBGC). On June 10, 2005, the Company reached agreement with the PBGC on a second priority lien on domestic personal property, including stock of its U.S. and direct foreign subsidiaries to secure the unfunded liability. The temporary waiver provides for deferral of the Company's minimum contributions for those years to be paid over a subsequent five-year period through 2010. At March 31, 2007 such temporarily waived amounts aggregated approximately \$29.4 million.

Based upon the temporary waiver and sensitivity to varying economic scenarios, the Company expects its cumulative minimum future cash contributions to its U.S. pension plans will total approximately \$70 million to \$125 million from fiscal 2008 to fiscal 2012, including \$35 million in fiscal 2008.

The Company expects that cumulative contributions to its non U.S. pension plans will total approximately \$93.2 million from fiscal 2008 to fiscal 2012, including \$18.1 million in fiscal 2008. In addition, the Company expects that cumulative contributions to its other post-retirement benefit plans will total approximately \$13 million from fiscal 2008 to fiscal 2012, including \$2.5 million in fiscal 2008.

Financial Instruments and Market Risk

From time to time, the Company has used forward contracts to economically hedge certain commodity exposures, including lead. The forward contracts are entered into for periods consistent with related underlying exposures and do

not constitute positions independent of those exposures. The Company expects that it may increase the use of financial instruments, including fixed and variable rate debt as well as swaps, forward and option contracts to finance its operations and to hedge interest rate, currency and certain lead purchasing requirements in the future. The swap, forward, and option contracts would be entered into for periods consistent with related underlying exposures and would not constitute positions independent of those

Table of Contents

exposures. The Company has not entered into, and does not intend to enter into, contracts for speculative purposes nor be a party to any leveraged instruments.

The Company's ability to utilize financial instruments may be restricted because of tightening, and/or elimination of unsecured credit availability with counter-parties. If the Company is unable to utilize such instruments, the Company may be exposed to greater risk with respect to its ability to manage exposures to fluctuations in foreign currencies, interest rates, and lead prices.

Accounts Receivable Factoring Arrangements

In the ordinary course of business, the Company utilizes accounts receivable factoring arrangements in countries where programs of this type are typical. Under these arrangements, the Company may sell certain of its trade accounts receivable to financial institutions. The arrangements in virtually all cases do not contain recourse provisions against the Company for its customers' failure to pay. The Company sold approximately \$45.2 million and \$41 million of foreign currency trade accounts receivable as of March 31, 2007 and 2006, respectively. Changes in the level of receivables sold from year to year are included in the change in accounts receivable within cash flow from operations.

Pursuant to its new \$495 million senior secured credit facility, the Company has the ability to expand utilization of these arrangements to as much as 70 million. See Note 22 to the Consolidated Financial Statements.

Contractual Obligations and Commercial Commitments

The Company's contractual obligations and commercial commitments at March 31, 2007 are summarized by fiscal year in which the payments are due in the following table:

	2008	2009	2010	2011 (In thousands)	2012	2013 and Beyond	Total
10.5% Senior Secured Notes	\$	\$	\$	\$	\$	\$ 290,000	\$ 290,000
Floating Rate Convertible Senior Subordinated Notes						60,000	60,000
Senior Secured Credit Facility(h)				297,263			297,263
Interest on long-term debt(a)(h)	64,798	64,798	64,798	36,276	32,766	31,438	294,874
Short term borrowings	13,951						13,951
Other term loans	4,586						4,586
Capital leases(b)	4,478	3,680	5,138	1,860	1,804	5,226	22,186
Operating leases	21,456	16,534	9,965	6,052	4,373	11,774	70,154
Purchase Obligations(c)	37,500	35,718					73,218
Other non-current liabilities(d)		20,662	16,745	17,610	7,983	46,175	109,175
	\$ 146,769	\$ 141,392	\$ 96,646	\$ 359,061	\$ 46,926	\$ 444,613	\$ 1,235,407

Total contractual cash obligations

- (a) Reflects the Company's scheduled interest payments and assumes an interest rate of 10.5% on the Senior Secured Notes, 3.9% on the Floating Rate Convertible Senior Subordinated Notes, and 11.1% on the Senior Secured Credit Facility.
- (b) Capital leases reflect future minimum lease payments including imputed interest charges.
- (c) Reflects the Company's projected annual minimum purchase commitment, including penalties under the supply agreements entered into as a result of the sale of the Company's separator business; amounts may vary based on actual purchases. See Note 17 to the Consolidated Financial Statements.

Table of Contents

- (d) Other non-current liabilities include amounts on the Consolidated Balance Sheet as of March 31, 2007 (amounts that have been discounted are reflected as such on the table above). These amounts do not include the supply agreement penalty, which is reflected in purchase obligations. See footnote (c) above.
- (e) Pension and other post-retirement benefit obligations are not included in the table above. The Company expects its cumulative minimum future cash contributions to its U.S. pension plans will total approximately \$70 million to \$125 million from fiscal 2008 to fiscal 2012, including \$35 million in fiscal 2008. The Company expects that cumulative contributions to its non U.S. pension plans will total approximately \$93.2 million from fiscal 2008 to fiscal 2012, including \$18.1 million in fiscal 2008. In addition, the Company expects that cumulative contributions to its other post-retirement benefit plans will total approximately \$13 million from fiscal 2008 to fiscal 2012, including \$2.5 million in fiscal 2008. See Note 10 to the Consolidated Financial Statements.
- (f) At March 31, 2007 the Company had outstanding letters of credit of \$40.7 million and surety bonds of \$4.5 million.
- (g) Certain of the Company's European subsidiaries have bank guarantees outstanding, which have been issued as collateral or financial assurance in connection with environmental obligations, income tax claims and customer contract requirements. At March 31, 2007, bank guarantees with a face value of \$19.1 million were outstanding.
- (h) As a result of completing a refinancing of the senior secured credit facility, on May 15, 2007, the maturity has been extended to beyond 2012. In addition, the new facility, which consists of a \$295 million term loan and a \$200 million asset based revolving loan facility, provides for lower interest rates (LIBOR + 1.75% on the revolver and LIBOR + 3.25% and + 3.50% for the U.S. dollar and Euro term loan borrowings, respectively) than the current LIBOR + 6.25% on the former facility. Accordingly, interest on long-term debt will be favorably impacted assuming a constant LIBOR rate. See Note 22 to the Consolidated Financial Statements.

Trading Activities

The Company does not have any trading activity that involves non-exchange traded contracts accounted for at fair value.

Related Parties

None

Effects of Inflation

Inflation has not had a material impact on the Company's operations during the past three years. The Company generally has been able to partially offset the effects of inflation with cost-reduction programs and operating efficiencies.

Future Environmental Developments

As a result of its multinational manufacturing, distribution and recycling operations, the Company is subject to numerous federal, state, and local environmental, occupational safety, and health laws and regulations, and similar laws and regulations in other countries in which the Company operates. For a discussion of the legal proceedings relating to environmental matters, see Note 13 to the Consolidated Financial Statements.

Item 7A. *Quantitative and Qualitative Disclosures About Market Risks*

The Company is exposed to market risks from changes in foreign currency exchange rates, certain commodity prices and interest rates. The Company does not enter into contracts without an intent to mitigate a particular risk, nor is it a party to any leveraged instruments. A discussion of the Company's accounting policies for derivative instruments is provided in Notes 2 and 4 to the Consolidated Financial Statements.

Table of Contents**Foreign Currency Exchange Rate Risk**

The Company is exposed to foreign currency risk related to uncertainties to which future earnings or assets and liability values are exposed due to operating cash flows and various financial instruments that are denominated in foreign currencies. More specifically, the Company is exposed to foreign currency risk in most European countries, principally Germany, France, the United Kingdom, Spain, and Italy. It is also exposed, although to a lesser extent, to foreign currency risk in Australia and the Pacific Rim. Movements of exchange rates against the U.S. dollar can result in variations in the U.S. dollar value of non-U.S. sales. In some instances, gains in one currency may be offset by losses in another.

Commodity Price Risk

Lead is the primary material used in the manufacture of batteries, representing approximately 40% of the Company's cost of goods sold. The market price of lead fluctuates. Generally, when lead prices decrease, customers may seek disproportionate price reductions from the Company, and when lead prices increase, customers may resist price increases.

Interest Rate Risk

The Company is exposed to interest rate risk on its variable rate long-term debt. The Company has on occasion entered into certain interest rate swap agreements to hedge exposure to interest costs associated with long-term debt. Interest rate swaps involve the exchange of floating rate interest payments to effectively convert floating rate debt into fixed rate debt. No such swaps were outstanding at March 31, 2007.

The following table presents the expected outstanding debt balances and related interest rates, excluding capital lease obligations and lines of credit, under the terms of the Company's borrowing arrangements in effect at March 31, 2007.

	For the Fiscal Year(s) Ended March 31:					2013 and Beyond
	2008	2009	2010	2011	2012	
	(In thousands)					
10.5% Senior Secured Notes	\$ 290,000	\$ 290,000	\$ 290,000	\$ 290,000	\$ 290,000	\$
Fixed Interest Rate	10.5%	10.5%	10.5%	10.5%	10.5%	n/a
Floating Rate Convertible Senior Subordinated Notes	\$ 60,000	\$ 60,000	\$ 60,000	\$ 60,000	\$ 60,000	\$
Variable Interest Rate(a)	3.9%	3.9%	3.9%	3.9%	3.9%	n/a
Senior Secured Credit Facility(b)	\$ 297,263	\$ 297,263	\$ 297,263	\$	\$	\$

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934 (the Exchange Act), that are designed to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to the Company's management, including the Company's chief executive officer and chief financial officer, as appropriate, to allow timely decisions regarding required disclosure.

As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of senior management, including the chief executive officer and the chief financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Exchange Act Rules 13a-15(b) and 15d-15(b). Based upon, and as of the date of this evaluation, the chief executive officer and the chief financial officer concluded that the Company's disclosure controls and procedures were effective.

The certifications of our principal executive officer and principal financial officer required in accordance with Section 302 of the Sarbanes-Oxley Act of 2002 are attached as exhibits to this annual report on Form 10-K. The disclosures set forth in this Item 9A contain information concerning the evaluation of the Company's disclosure controls and procedures, internal control over financial reporting and changes in internal control over financial reporting referred to in those certifications. Those certifications should be read in conjunction with this Item 9A for a more complete understanding of the matters covered by the certifications.

Management's Report on Internal Control Over Financial Reporting

Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management has completed its evaluation of the effectiveness of the Company's internal control over financial reporting as of March 31, 2007 based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on our assessment and on those criteria, we determined that, as of March 31, 2007, the Company's internal control over financial reporting was effective.

Management's assessment of the effectiveness of the Company's internal control over financial reporting as of March 31, 2007 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which is included herein.

Changes in Internal Control Over Financial Reporting

There have been no changes in the Company's internal control over financial reporting during the quarter ended March 31, 2007 that have materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and Board of Directors of
Exide Technologies:

We have completed integrated audits of Exide Technologies' consolidated financial statements and of its internal control over financial reporting as of March 31, 2007, in accordance with the standards of the Public Company Accounting Oversight Board (United States). Our opinions, based on our audits, are presented below.

Consolidated financial statements and financial statement schedule

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of operations, stockholders' equity and cash flows present fairly, in all material respects, the financial position of Exide Technologies and its subsidiaries (Successor Company) at March 31, 2007 and 2006, and the results of their operations and their cash flows for each of the two years in the period ended March 31, 2007 and for the period of May 6, 2004 to March 31, 2005 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the accompanying index presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit of financial statements includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 10 to the consolidated financial statements, the Company changed the manner in which it accounts for defined benefit and postretirement plans effective March 31, 2007.

As discussed in Note 11 to the consolidated financial statements, the Company changed the manner in which it accounts for stock-based compensation effective April 1, 2006.

Internal control over financial reporting

Also, in our opinion, management's assessment, included in Management's Report on Internal Control Over Financial Reporting appearing under Item 9A, that the Company maintained effective internal control over financial reporting as of March 31, 2007 based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), is fairly stated, in all material respects, based on those criteria. Furthermore, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of March 31, 2007, based on criteria established in *Internal Control - Integrated Framework* issued by the COSO. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express opinions on management's assessment and on the effectiveness of the Company's internal control over financial reporting based on our audit. We conducted our audit of internal control over financial reporting in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those

standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. An audit of internal control over financial reporting includes obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal

Table of Contents

control, and performing such other procedures as we consider necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and Board of Directors of
Exide Technologies:

In our opinion, the accompanying consolidated balance sheet and the related consolidated statement of operations, stockholders' equity and cash flow, present fairly, in all material respects, the financial position of Exide Technologies and its subsidiaries (Predecessor Company) and the results of their operations and their cash flows for the period from April 1, 2004 to May 5, 2004 and for the fiscal year in the period ended March 31, 2004 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the accompanying index present fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedules are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 1 to the Consolidated Financial Statements, on April 15, 2002, Exide Technologies, together with certain of its U.S. subsidiaries (Debtors) filed voluntary petitions for reorganization under Chapter 11 of the federal bankruptcy laws in the United States Court for the District of Delaware. The Debtors' Joint Plan of Reorganization was confirmed by the Bankruptcy Court on April 21, 2004 and the Debtors declared May 5, 2004 as the effective date of the Plan as it had substantially consummated the transactions provided for in the Plan on such date. For accounting purposes the Company also recognized its emergence from bankruptcy as of May 5, 2004. In connection with its emergence from bankruptcy, the Company adopted Fresh Start reporting as of May 5, 2004.

EXIDE TECHNOLOGIES AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2007

(1) BASIS OF PRESENTATION

The Consolidated Financial Statements include the accounts of Exide Technologies (referred together with its subsidiaries, unless the context requires otherwise, as Exide or the Company) and all of its majority-owned subsidiaries.

On April 15, 2002, the Petition Date , Exide Technologies, together with certain of its U.S. subsidiaries, filed voluntary petitions for reorganization under Chapter 11 of the federal bankruptcy laws (Bankruptcy Code or Chapter 11) in the United States Bankruptcy Court for the District of Delaware (Bankruptcy Court). On November 21, 2002, two additional wholly owned, non-operating subsidiaries of Exide filed voluntary petitions for reorganization under Chapter 11 in the Bankruptcy Court. All of the cases were jointly administered for procedural purposes before the Bankruptcy Court under case number 02-11125KJC.

Exide Technologies and such subsidiaries (the Debtors) continued to operate their businesses and manage their properties as debtors-in-possession throughout the course of the bankruptcy case. The Debtors, along with the Official Committee of Unsecured Creditors, filed a Joint Plan of Reorganization (the Plan) with the Bankruptcy Court on February 27, 2004 and, on April 21, 2004, the Bankruptcy Court confirmed the Plan. The Debtors declared May 5, 2004 as the effective date of the Plan, and substantially consummated the transactions provided for in the Plan on such date (the Effective Date). For accounting purposes the Company also recognized the emergence as of May 5, 2004, as this was the date upon which the material conditions related to emergence, most significantly the finalization of the Company s exit financing, were resolved.

The emergence from Chapter 11 resulted in a new reporting entity (the Successor Company) and adoption of Fresh Start reporting and reporting in accordance with Statement of Position 90-7 (SOP 90-7), Financial Reporting by Entities in Reorganization under the Bankruptcy Code. Fresh Start reporting required the Company to allocate the reorganization value to its assets based upon their estimated fair values in accordance with Statement of Financial Accounting Standards (SFAS) No. 141, Business Combinations (SFAS 141). In connection with the development of the Plan the Company was primarily responsible for the valuation and directed its financial advisors to prepare a valuation analysis of its business. Management considered a number of factors, including valuations or appraisals, when estimating the fair values of the Company s assets and liabilities. Each liability existing at the Plan confirmation date, other than deferred taxes, was stated at present values of amounts to be paid determined at appropriate current interest rates. Adoption of Fresh Start reporting has resulted in material adjustments to the historical carrying value of the Company s assets and liabilities.

The accompanying Consolidated Financial Statements of the Company prior to emergence from Chapter 11 (the Predecessor Company) have also been prepared in accordance with SOP 90-7. Revenues, expenses, realized gains and losses and provision for losses resulting from the reorganization are reported separately as Reorganization items, net in the consolidated statements of operations.

Since the Company s emergence from bankruptcy resulted in a new reporting entity as of the Effective Date, the Consolidated Financial Statements for periods subsequent to May 5, 2004 are not comparable with those of prior periods. All financial information as of and for periods prior to May 6, 2004 is presented as pertaining to the Predecessor Company, while all financial information after that date is presented as pertaining to the Successor Company. The Consolidated Statements of Operations reflect the results of the reorganization and Fresh Start

adjustments in accordance with SOP 90-7 in the period April 1, 2004 to May 5, 2004 as Predecessor Company information.

EXIDE TECHNOLOGIES AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(2) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

The Consolidated Financial Statements include the accounts of Exide Technologies and all of its majority owned subsidiaries in which the Company exercises control (collectively the Company). Investments in affiliates of less than a 20% interest are accounted for by the cost method. Investments in 20% to 50% owned companies are accounted for by the equity method. All significant intercompany transactions have been eliminated.

Nature of Operations

The Company is one of the largest manufacturers and marketers of lead acid batteries in the world. The Company manufactures industrial and automotive batteries in North America, Europe, the Middle East, India, Australia and New Zealand. The Company's industrial batteries consist of motive power batteries, such as those used in forklift trucks and other electronic vehicles, and network power batteries used for back-up power applications, such as those used for telecommunication systems. The Company markets its automotive batteries to a broad range of retailers and distributors of replacement batteries and automotive original equipment manufacturers.

The Company currently has four business segments, Transportation Americas, Transportation Europe and ROW, Industrial Energy Americas, Industrial Energy Europe and ROW. For a discussion of the Company's segments, see Note 20.

Major Customers and Concentration of Credit

The Company has a number of major end-user, retail and original equipment manufacturer customers, both in North America and Europe. No single customer accounted for more than 10% of consolidated net sales during any of the fiscal years presented. The Company does not believe a material part of its business is dependent upon a single customer, the loss of which would have a material long-term impact on the business of the Company. However, the loss of one or more of the Company's largest customers would most likely have a negative short-term impact on the Company's results of operations.

Foreign Currency Translation

The functional currencies of the Company's foreign subsidiaries are primarily the respective local currencies. Assets and liabilities of the Company's foreign subsidiaries and affiliates are translated into U.S. dollars at the year-end exchange rate, and revenues and expenses are translated at average monthly exchange rates. Translation gains and losses are recorded as a component of accumulated other comprehensive income (loss) within stockholders' equity. Foreign currency gains and losses from certain intercompany transactions meeting the permanently advanced criteria of SFAS No. 52 Foreign Currency Translation are also recorded as a component of accumulated other comprehensive income (loss). All other foreign currency gains and losses are included in other (income) expense, net. The Company recognized net foreign currency (gains) losses of (\$11.6) million, \$11.3 million, (\$2.6) million, and \$6.3 million, in fiscal 2007 and 2006, the period May 6, 2004 to March 31, 2005, and the period April 1, 2004 to May 5, 2004, respectively.

Cash Equivalents

Cash equivalents consist of highly liquid instruments with maturities at the time of acquisition of three months or less. Cash equivalents are stated at cost, which approximates fair value, because of the short-term maturity of these instruments.

F-10

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Allowance for Doubtful Accounts***

The Company maintains allowances for doubtful accounts for estimated probable losses resulting from the inability of the Company's customers to make required payments. The Company continues to assess the adequacy of the reserves for doubtful accounts based on the financial condition of the Company's customers and other external factors that may impact collectibility. The majority of the Company's accounts receivable are due from trade customers. Credit is extended based on an evaluation of the Company's customers' financial condition and generally, collateral is not required. Payment terms vary and accounts receivable are stated in the Consolidated Financial Statements at amounts due from customers net of an allowance for doubtful accounts. Accounts outstanding longer than the payment terms are considered past due. The Company considers a number of factors in determining the allowance for doubtful accounts, including the length of time trade accounts receivable are past due, the customers' current ability to pay their obligations to the Company, the Company's previous loss history, and the condition of the general economy and the industry as a whole. The Company writes off accounts receivable when they become uncollectible.

Inventories

Inventories, which consist of material, labor and overhead, are stated at the lower of cost or market using the first-in, first-out (FIFO) method. The Company writes down its inventory to estimated market value (when below historical cost) based on assumptions of future demand and market conditions.

Property, Plant and Equipment

	2007	2006
	(In thousands)	
Land	\$ 73,514	\$ 72,709
Buildings and improvements	232,397	232,512
Machinery and equipment	634,563	555,565
Construction in progress	26,305	34,166
	966,779	894,952
Less Accumulated depreciation	317,764	209,110
Property, plant and equipment, net	\$ 649,015	\$ 685,842

Depreciation is provided on a straight-line basis over the estimated useful lives of the assets. The range of original estimated useful lives is: buildings and improvements, 25-40 years; machinery and equipment, 3-14 years.

Cost and accumulated depreciation for property retired or disposed of are removed from the accounts, and any gain or loss on disposal is credited or charged to earnings. Expenditures for maintenance and repairs are charged to expense as incurred. Additions, improvements and major renewals are capitalized. Depreciation expense was \$108.7 million,

\$110 million, \$99.1 million, and \$7.7 million, for fiscal 2007 and 2006, the period May 6, 2004 to March 31, 2005, and the period April 1, 2004 to May 5, 2004, respectively.

Capitalized Software Costs

The Company capitalizes the cost of computer software acquired or developed for internal use, in accordance with SOP 98-1 Accounting for the Costs of Computer Software Developed or Obtained for Internal Use. The capitalized costs are amortized over the estimated useful life of the software, ranging from 3 to 5 years, on a straight-line basis.

Table of Contents

EXIDE TECHNOLOGIES AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Deferred Financing Costs

Deferred financing costs are amortized to interest expense over the life of the related debt.

Valuation of Long-Lived Assets

The Company's long-lived assets include property, plant and equipment, and identified intangible assets. Long-lived assets (other than indefinite lived intangible assets) are depreciated and amortized over their estimated useful lives, and are reviewed for impairment whenever changes in circumstances indicate the carrying value may not be recoverable. Indefinite-lived intangible assets, which consist of trademarks and tradenames, are reviewed for impairment on both an annual basis and whenever changes in circumstances indicate the carrying value may not be recoverable. If these assets or their related assumptions change in the future, the Company may be required to record impairment charges.

Hedging Activities

In accordance with SFAS 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended and interpreted, the Company reports all derivative financial instruments on the balance sheet at their fair values. For derivative instruments designated as cash flow hedges, the effective portion of any hedge is reported in Accumulated Other Comprehensive Income (loss) until it is cleared to earnings during the same period in which the hedged item affects earnings. The ineffective portion of all hedges is recognized in current period earnings. The Company uses no derivative instruments designated as fair value hedges. In the Consolidated Statement of Cash Flows, the Company reports the cash flows resulting from its hedging activities in the same category as the related item that is being hedged.

The Company has entered into foreign exchange rate agreements to hedge exposure to the currency fluctuation of certain transactions denominated in a currency other than the applicable local currency.

The Company has historically entered into forward purchase and put option agreements to economically hedge the cost of externally purchased commodities including lead.

Counterparties to foreign exchange and commodity and option agreements are major financial institutions. The Company believes the risk of incurring losses related to credit risk with these counterparties is remote.

Sales Returns and Allowances

The Company provides for an allowance for product returns and/or allowances. Based upon its manufacturing re-work process, the Company believes that the majority of its product returns are not the result of product defects. The Company recognizes the estimated cost of product returns as a reduction of sales in the period in which the related revenue is recognized. The product return estimates are based upon historical trends and claims experience, and include assessment of the anticipated lag between the date of sale and claim/return date.

Income Taxes

The Company accounts for income taxes under the provisions of SFAS 109 Accounting for Income Taxes , which requires the use of the liability method in accounting for deferred taxes. If it is more likely than not that some portion, or all, of a deferred tax asset will not be realized, a valuation allowance is recognized.

Revenue Recognition

The Company records sales when revenue is earned. Shipping terms are generally FOB shipping point and revenue is recognized when product is shipped to the customer. In limited cases, terms are FOB destination and in these cases, revenue is recognized when product is delivered to the customer's delivery site.

Table of Contents

EXIDE TECHNOLOGIES AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Accounting for Shipping and Handling Costs

The Company records shipping and handling costs incurred in cost of sales and records shipping and handling costs billed to customers in net sales.

Advertising

The Company expenses advertising costs as incurred.

Net Income (Loss) Per Share

Basic net income (loss) per share is computed using the weighted average number of common shares outstanding for the period, while diluted net income (loss) per share is computed assuming conversion of all dilutive securities. Shares which are contingently issuable under the Plan have been included as outstanding common shares for purposes of calculating net income (loss) per share.

Due to net losses for the fiscal years ended March 31, 2007 and 2006 and the period May 6, 2004 to March 31, 2005, 454,338, 39,218, and 621 shares of securities issuable in connection with stock option plans, restricted stock (unvested) and restricted stock unit plans have been excluded from the diluted loss per share calculation because their effect would be anti-dilutive. For the period April 1, 2004 to May 5, 2004, 5,211,000 shares of securities were excluded from the computation of diluted earnings per share because the exercise prices of the related options and warrants were greater than the average market price of the common shares, and would have had an anti-dilutive effect for that period.

As a result of the consummation of the \$75 million rights offering and the private sale of \$50 million of common stock (see Note 18), the Company issued a total of 35,712,570 shares of its common stock. Upon consummation of the rights offering, the fair value of the Company's common stock was more than the rights offering's \$3.50 per share subscription price. Accordingly, basic and diluted loss per common share have been restated for the fiscal years ended March 31, 2006, and the period May 6, 2004 to March 31, 2005, to reflect a stock dividend of 576,122 shares of the Company's common stock.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Recently Issued Accounting Standards

In February 2006, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 155 Accounting for Certain Hybrid Financial Instruments an amendment of FASB Statements No. 133 and 140 (SFAS 155). SFAS 155 allows financial instruments that have embedded derivatives to be accounted for as a whole, eliminating the need to separate the derivative from its host, if the holder elects to account for the whole instrument on a fair value basis. This

new accounting standard is effective April 1, 2007. The adoption of SFAS 155 is not expected to have an impact on the Company's financial statements.

In March 2006, the FASB issued SFAS No. 156, Accounting for Servicing of Financial Assets an amendment of FASB Statement No. 140 (SFAS 156). SFAS 156 requires that all separately recognized servicing rights be initially measured at fair value, if practicable. In addition, this Statement permits an entity to choose between two measurement methods (amortization method or fair value measurement method) for each class of separately recognized servicing assets and liabilities. This new accounting standard is effective

Table of Contents

EXIDE TECHNOLOGIES AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

April 1, 2007. The adoption of SFAS 156 is not expected to have an impact on the Company's financial statements.

In July 2006, the FASB issued FIN 48 *Accounting For Uncertainty In Income Taxes* an Interpretation of FASB Statement 109 (FIN 48). FIN 48 which clarifies the accounting for uncertain tax positions. FIN 48 requires that the Company recognize the impact of a tax position in the Company's financial statement if that position is more likely than not of being sustained on audit based on the technical merits of the position. As required by FIN 48, the Company will adopt this new accounting standard effective April 1, 2007. The Company is currently evaluating the impact of FIN 48 on its consolidated financial statements but is not yet in a position to make this determination.

In September 2006, the FASB issued SFAS No. 157 *Fair Value Measurements* (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 applies under other accounting pronouncements that require or permit fair value measurements, the FASB having previously concluded in those accounting pronouncements that fair value is the relevant measurement attribute. Accordingly, SFAS 157 does not require any new fair value measurements. However, for some entities, the application of SFAS 157 will change current practice. SFAS 157 is effective for fiscal years beginning after November 15, 2007 (the Company's fiscal 2009), and interim periods within those years. The Company will assess the effect of this pronouncement on its financial statements, but at this time, no material effect is expected.

In February 2007, the FASB issued SFAS No. 159 *The Fair Value Option for Financial Assets and Financial Liabilities, Including an Amendment of FASB Statement No. 115* (SFAS 159). SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. SFAS 159 is expected to expand the use of fair value measurement, which is consistent with the FASB's long-term measurement objectives for accounting for financial instruments. SFAS 159 is effective for fiscal years beginning after November 15, 2007 (the Company's fiscal 2009). The Company will assess the effect of this pronouncements on its financial statements, but at this time, no material effect is expected.

(3) WARRANTS

In connection with the consummation of the Plan, the Company issued Warrants entitling the holders to purchase up to 6.25 million shares of new common stock at an exercise price of \$32.11 per share (the number of Warrants issuable being subject to adjustments allowed for by the claims reconciliation and allowance process set forth in the Plan.) The Company has accounted for the Warrants in accordance with Emerging Issues Task Force (EITF) Issue No. 00-19 *Accounting for Derivative Financial Instruments Indexed to and Potentially Settled in a Company's Own Stock* (EITF 00-19) and SFAS No. 150 *Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity* (SFAS 150). Because the Warrant Agreement provides for a cash settlement upon a change in control under certain specified conditions, the Warrants have been accounted for and classified as a liability in the Consolidated Balance Sheets.

Upon the adoption of Fresh Start reporting, on the Effective Date, May 5, 2004, the Warrants were ascribed a fair value of approximately \$74.3 million, reflecting the underlying enterprise value of the Company underlying the Plan. The fair value of the Warrants was determined using a Black Scholes Model with an assumed volatility of 40%, a risk

free rate of 3%, fair value of common shares and exercise price of \$32.11 and a dividend yield of 0%. As no active market existed when the Warrants were initially valued, the Company believed a Black Scholes Model, which is widely accepted in valuing warrants and call options, was the appropriate valuation model to use as no active market existed for the warrants at the date of emergence. Subsequent to the Company's emergence from bankruptcy, the Warrants began to trade on The NASDAQ

Table of Contents

EXIDE TECHNOLOGIES AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Global Market under the ticker XIDEW. Subsequent to the Warrants becoming actively traded, the Warrants were measured using market prices as quoted market prices are the best indicator of fair value. In accordance with the provisions of the Warrant Agreement, and as a result of the completed \$75 million rights offering and private sale of \$50 million of common stock on September 18, 2006, an additional 371,164 warrants became issuable and the exercise price of the warrants was adjusted to \$30.31 per share.

The Warrants are exercisable through May 5, 2011. The exercise price, the number of shares purchasable upon the exercise of each Warrant and the number of Warrants outstanding are subject to adjustment from time to time upon occurrence of certain events described in the Warrant Agreement. In accordance with EITF 00-19 and SFAS 150, the Warrants have been marked-to-market based upon quoted market prices. This mark-to-market resulted in recognition of unrealized loss (gain) of \$3.2 million, (\$9.1) million and (\$63.1) million for fiscal 2007, fiscal 2006, and the period May 6, 2004 to March 31, 2005, which is reported in Other (income) expense, net in the Consolidated Statements of Operations. Future results of operations may be subject to volatility from changes in the market value of such Warrants.

(4) ACCOUNTING FOR DERIVATIVES

The Company accounts for derivative instruments and hedging activities in accordance with SFAS 133 Accounting for Derivative Instruments and Hedging Activities, as amended by SFAS 138, Accounting for Certain Derivative Instruments and Certain Hedging Activities and SFAS 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities (collectively, SFAS 133). SFAS 133 establishes accounting and reporting standards for derivative instruments and hedging activities. SFAS 133 requires that all derivatives be recognized as either assets or liabilities at fair value. The Company does not enter into derivative contracts for trading purposes. Derivatives are used only to hedge the volatility arising from movements in a portion of the cost of lead purchases as well as hedging certain interest rates and foreign currency exchange rates. Changes in the fair value of cash flow hedges for which the hedged item affects earnings immediately (foreign currency transaction hedges and interest rate hedges), ineffective portions of changes in the fair value of cash flow hedges and fair value changes on certain derivatives that, despite being utilized to effectively manage the above mentioned activities, do not qualify for hedge accounting, are recognized in earnings immediately. The change in fair value of cash flow hedges for which the hedged item affects earnings immediately, related to hedge ineffectiveness and of derivatives not qualifying for hedge accounting, and for the fiscal year ending March 31, 2006 the net gain was \$7.4 million, of which a gain of \$1.1 million was recognized in other (income) expense and a gain of \$6.3 million was recognized in cost of sales. For the period May 6, 2004 to March 31, 2005, the net loss was \$7.1 million, of which a loss of \$13.2 million was recognized in other (income) expense and a gain of \$6 million was recognized in cost of sales. The Company did not enter into any derivative contracts during fiscal 2007. There were derivative contracts outstanding at March 31, 2006 of \$2.8 million.

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(5) REORGANIZATION ITEMS**

Reorganization items represent amounts the Company incurred as a result of the Chapter 11 process and are presented separately in the consolidated statements of operations. The following have been incurred:

	For the Fiscal Year Ended		For the Period	
	March 31,	March 31,	May 6, 2004	April 1, 2004 to
	2007	2006	to	May 5, 2004
			March 31,	
			2005	
	(In thousands)			
Professional fees	\$ 2,939	\$ 4,051	\$ 9,817	\$ 18,515
Other	1,371	2,107	1,710	(81)
Total reorganization items, net	4,310	6,158	11,527	18,434
Gain on settlement of liabilities subject to compromise and recapitalization				(1,558,839)
Fresh Start accounting adjustments				(228,371)
Loss (gain) on reorganization items	\$ 4,310	\$ 6,158	\$ 11,527	\$ (1,768,776)

Net cash paid for reorganization items during fiscal 2007 and 2006, the period May 6, 2004 to March 31, 2005, and the period April 1, 2004 to May 5, 2005 was \$4.6 million, \$11.6 million, \$41.3 million, and \$6.1 million, respectively.

The following provides additional information relating to the above reorganization items:

Professional fees

Professional fees include financial, legal and valuation services directly associated with the reorganization process, including fees incurred related to asset sales, success fees payable to the Company's advisors related to emergence from Chapter 11 and fees for the ongoing claims reconciliation process. Professional fees for the period April 1, 2004 to May 5, 2004 include success fees of \$12.5 million payable to the Company's advisors upon emergence from Chapter 11.

Other

Other primarily represents the Predecessor Company directors and officer's D&O insurance coverage.

(6) ACCOUNTING FOR INTANGIBLE ASSETS AND GOODWILL

Intangible Assets

The Company completed its most recent annual impairment assessment of intangible assets (as required under SFAS 142) effective March 31, 2007, utilizing its business plan as the basis for development of cash flows and an estimate of fair values. No adjustment of carrying values was deemed necessary.

F-16

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Intangible assets consist of:

	Trademarks and Tradenames (Not Subject to Amortization)	Trademarks and Tradenames (Subject to Amortization)	Customer Relationships	Technology	Total
	(In thousands)				
As of March 31, 2006

Accumulated Amortization		(1,939)	(8,499)	(2,261)	(12,699)
Net	\$ 56,331	\$ 10,874	\$ 98,095	\$ 21,520	\$ 186,820
As of March 31, 2007					
Gross Amount	\$ 60,056	\$ 13,660	\$ 113,361	\$ 25,354	\$ 212,431
Accumulated Amortization		(3,147)	(13,855)	(3,667)	(20,669)
Net	\$ 60,056	\$ 10,513	\$ 99,506	\$ 21,687	\$ 191,762

Amortization of intangible assets for fiscal year 2007 and 2006 was \$7 million and \$6.7 million, respectively. Excluding the impact of any future acquisitions (if any), the Company anticipates annual amortization of intangible assets for each of the next five years to average \$7 million. Intangible assets have been recorded at the proper legal entity and are subject to foreign currency fluctuations. The change in the gross amounts, shown above, from fiscal 2006 to fiscal 2007, result only from foreign currency translation. No other activity has occurred.

Goodwill

The Company's emergence from bankruptcy on May 6, 2004 resulted in the Successor Company and adoption of Fresh Start reporting and reporting in accordance with SOP 90-7. Fresh Start reporting required the Company to allocate the reorganization value to its assets based upon their estimated fair values in accordance with SFAS No. 141.

The fair values of the assets as determined by Fresh Start reporting were based on estimates of future cash flows. The estimated enterprise value of the Company of \$1.5 billion which served as the basis for the Plan approved by the Bankruptcy Court, was used to determine the reorganization value, which was estimated at \$2.7 billion. The portion of reorganization value which could not be attributed to specific tangible or identified intangible assets was \$388.5 million. The determination of fair values of assets and liabilities is subject to significant estimation and assumptions. The enterprise value that served as the basis for determining the reorganization value was calculated using the discounted cash flow method. The cash flows, taken from the Company's Plan of Reorganization, were

projected over five years, utilizing discount rates of 9% to 11%, respectively, for the transportation and industrial businesses in order to reflect the inherent risks of each business. The enterprise value was based on an assumed tax rate of 0% in the U.S. in years 1 through 3 (in consideration of the Company's NOL tax position), and 38% in the remaining years. For Europe and ROW, a tax rate of 25% was assumed for all periods reflected.

The Company completed its annual impairment assessment of goodwill effective December 31, 2004, utilizing its five-year business plan as the basis for development of discounted cash flows and an estimate of fair values. The Company's impairment assessment also considered the market value of the Company's securities as of December 31, 2004. As a result of the comparison of the book carrying values of its reporting units, including goodwill, against these estimated fair values, the Company determined that goodwill was fully impaired and wrote down the entire \$388.5 million balance of goodwill in fiscal 2005.

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(7) INVENTORIES**

Inventories, valued using the first-in, first-out (FIFO) method, consist of:

	March 31, 2007	March 31, 2006
	(In thousands)	
Raw materials	\$ 53,337	\$ 64,248
Work-in-process	89,339	79,923
Finished Goods	268,878	270,772
	\$ 411,554	\$ 414,943

(8) OTHER ASSETS

Other assets consist of:

	March 31, 2007	March 31, 2006

Loan to affiliate	3,702	3,563
Other	2,913	3,686
	\$ 24,706	\$ 24,090

- (a) Deposits principally represent amounts held by the beneficiaries as cash collateral for the Company's contingent obligations with respect to certain environmental matters, workers compensation insurance and operating lease commitments.

(9) DEBT

At March 31, 2007 and 2006, short-term borrowings of \$14 million and \$11.4 million, respectively, consisted of various operating lines of credit and working capital facilities maintained by certain of the Company's non-U.S. subsidiaries. Certain of these borrowings are collateralized by receivables, inventories and/or property.

Edgar Filing: EXIDE TECHNOLOGIES - Form 10-K

These borrowing facilities, which are typically for one-year renewable terms, generally bear interest at current local market rates plus up to one percent per annum. The weighted average interest rate on short-term borrowings was approximately 5.1% and 3.6% at March 31, 2007 and 2006, respectively.

Total long-term debt at March 31, 2007 comprised the following:

	March 31, 2007 (In thousands)
Senior Secured Credit Facility	\$ 297,263
10.5% Senior Secured Notes due 2013	290,000
Floating Rate Convertible Senior Subordinated Notes due 2013	60,000
Other, including capital lease obligations and other loans at interest rates generally ranging up to 11.0% due in installments through 2015	23,240
Total	670,503
Less-current maturities	3,996
	\$ 666,507

Total debt at March 31, 2007 was \$684.5 million.

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Total long-term debt at March 31, 2006 comprised the following:

	March 31, 2006
	(In thousands)
Senior Secured Credit Facility	\$ 316,277
10.5% Senior Secured Notes due 2013	290,000
Floating Rate Convertible Senior Subordinated Notes due 2013	60,000
Other, including capital lease obligations and other loans at interest rates generally ranging up to 11.0% due in installments through 2015	23,352
Total	689,629
Less-current maturities	5,643
	\$ 683,986

Total debt at March 31, 2006 was \$701 million.

On May 5, 2004, the Company entered into a \$600 million Senior Secured Credit Agreement (the Credit Agreement) which included a \$500 million Multi-Currency Term Loan Facility and a \$100 million Multi-Currency Revolving Loan Facility including a letter of credit sub-facility of up to \$40 million. The Revolving Loan Facility matures on May 5, 2009, while the Term Loan Facility matures on May 5, 2010. The Term Loan Facility and the Revolving Loan Facility bear interest at LIBOR plus 6.25% per annum. Credit Agreement borrowings are guaranteed by substantially all of the subsidiaries of the Company and are collateralized by substantially all of the assets of the Company and the subsidiary guarantors. Availability under the Revolving Loan Facility and other loan facilities was \$59.3 million and \$10.4 million as of March 31, 2007. At March 31, 2007 and 2006, weighted average interest on the Credit Agreement was 11.1% and 10.6%, respectively.

The Credit Agreement required the Company to comply with financial covenants, including a minimum consolidated earnings before interest, taxes, depreciation, amortization and restructuring (Adjusted EBITDA) covenant and a leverage ratio of consolidated debt to adjusted EBITDA for the relevant periods. The Credit Agreement also contained other customary covenants, including reporting covenants and covenants that restrict the Company's ability to incur indebtedness, create or incur liens, sell or dispose of assets, make investments, pay dividends, change the nature of the Company's business or enter into related party transactions.

On May 15, 2007, the Company retired the Credit Agreement described above, and entered into a new \$495 million senior secured credit facility consisting of a \$200 million asset based revolving senior secured credit facility and a \$295 million term loan facility. See Note 22 for a complete discussion of the terms and provisions of the new senior secured credit facility.

In March 2005, the Company issued \$290 million in aggregate principal amount of 10.5% Senior Secured Notes due 2013. Interest of \$15.2 million is payable semi-annually on March 15 and September 15. The 10.5% Senior Secured

Notes are redeemable at the option of the Company, in whole or in part, on or after March 15, 2009, initially at 105.25% of the principal amount, plus accrued interest, declining to 100% of the principal amount, plus accrued interest on or after March 15, 2011. The 10.5% Senior Secured Notes are redeemable at the option of the Company, in whole or in part, subject to payment of a make whole premium, at any time prior to March 15, 2009. In addition, until May 15, 2008, up to 35% of the 10.5% Senior Secured Notes are redeemable at the option of the Company, using the net proceeds of one or more qualified equity offerings. In the event of a change of control or the sale of certain assets, the Company may be required to offer to purchase the 10.5% Senior Secured Notes from the note holders. Those notes are secured by a junior priority lien on the assets of the U.S. parent company, including the stock of its subsidiaries. The indenture for these notes contains financial covenants which limit or restrict the ability of the Company and its subsidiaries

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

to among other things incur debt, grant liens, pay dividends, invest in non-subsiidiaries, engage in related party transactions and sell assets.

Also, in March 2005, the Company issued Floating Rate Convertible Senior Subordinated Notes due September 18, 2013, with an aggregate principal amount of \$60 million. These notes bear interest at a per annum rate equal to the 3-month LIBOR, adjusted quarterly, minus a spread of 1.5%. The weighted average interest on these notes was 3.9% and 3.4% at March 31, 2007 and 2006, respectively. Interest is payable quarterly. The notes are convertible into the Company's common stock at a conversion rate of 57.5705 shares per one thousand dollars principal amount at maturity, subject to adjustments for any common stock splits, dividends on the common stock, tender and exchange offers by the Company for the common stock and third party tender offers, and in the case of a change in control in which 10% or more of the consideration for the common stock is cash or non-traded securities, the conversion rate increases, depending on the value offered and timing of the transaction, to as much as 70.2247 shares per one thousand dollars principal amount.

At March 31, 2007, the Company was in compliance in all material respects with covenants contained in the Credit Agreement and Indenture agreements that cover the Senior Secured Notes and Floating Rate Convertible Senior Subordinated Notes.

The Company's variable rate debt at March 31, 2007 and 2006 was \$371.2 million and \$387.7 million, respectively, none of which was hedged.

Annual principal payments required under long-term debt obligations at March 31, 2007 are as follows:

	Amount (In thousands)
2008	\$
2009	
2010	
2011	297,263
2012	
2013 and beyond	350,000
Total	\$ 647,263

(10) EMPLOYEE BENEFIT PLANS AND POSTRETIREMENT HEALTH CARE AND LIFE INSURANCE BENEFITS

On September 29, 2006, the FASB issued SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106 and 132(R)* (SFAS 158). SFAS 158 requires recognition of the overfunded or underfunded status of pension and other postretirement benefit plans on the balance sheet. Under SFAS 158, gains and losses, prior service costs and credits, and any remaining transition

amounts under FASB Statement No. 87, *Employers Accounting for Pensions* (SFAS 87) and FASB Statement No. 106, *Employers Accounting for Postretirement Benefits Other Than Pensions* (SFAS 106) that have not yet been recognized through net periodic benefit costs will be recognized in accumulated other comprehensive income (loss), net of tax effects, until they are amortized as a component of net periodic cost. SFAS 158 does not change how pensions and other postretirement benefits are accounted for and reported in the income statement. Companies will continue to follow the existing guidance in SFAS 87, FASB Statement No. 88, *Employers Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits* and SFAS 106. SFAS 158 was effective for fiscal years

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

ending after December 15, 2006. The company adopted the balance sheet recognition provisions of SFAS 158 at March 31, 2007. The incremental effect of adopting SFAS 158 is summarized below (in thousands):

	Before Application of SFAS 158	Adjustments	After Application of SFAS 158
Prepaid expenses and other	\$ 678	\$ 202	\$ 880
Deferred income taxes	2,665	988	3,653
Accrued expenses and noncurrent retirement obligations	(298,339)	23,052	(275,287)
Accumulated deficit	286,909		286,909
Accumulated other comprehensive (income) loss	8,087	(24,242)	(16,155)

SFAS 158 also requires that employers measure the benefit obligation and plan assets as of the fiscal year end for fiscal years ending after December 15, 2008. The company currently uses a December 31 measurement date for its U.S. pension and other postretirement benefit plans and a March 31 measurement date for its non-U.S. plans. The company intends to eliminate the early measurement date for its U.S. plans in fiscal 2009.

The Company has a noncontributory defined benefit pension plan that covered substantially all hourly and salaried employees. During fiscal 2007, the Company announced a freeze to the benefit accruals for all salaried and non-union hourly employees. Also, as certain collective bargaining agreements expired, freezes were negotiated for the union employees covered by these agreements. Some of the union employees continue to accrue benefits under the plan due to future expiration dates on certain collective bargaining agreements.

In Europe and ROW, the Company sponsors several defined benefit plans that cover substantially all employees who are not covered by statutory plans. For defined benefit plans, charges to expense are based upon underlying assumptions established by the Company in consultation with its actuaries. In most cases, the defined benefit plans are not funded.

The Company also has defined contribution plans in North America, Europe, and ROW with related expense of \$6.8 million, \$7 million, \$5.3 million, and \$0.5 million, for fiscal 2007 and 2006, the period May 6, 2004 to March 31, 2005, and the period April 1, 2004 to May 5, 2005, respectively.

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Company provides certain retiree health care and life insurance benefits for a limited number of employees. The Company accrues the estimated cost of providing post-retirement benefits during the employees' applicable years of service. The following tables set forth the plans' funded status and the amounts recognized in the Company's Consolidated Financial Statements at March 31, 2007 and 2006:

Pension Benefits:

	Fiscal Year Ended March 31, 2007	Fiscal Year Ended March 31, 2006

	Fiscal Year Ended March 31, 2007	Fiscal Year Ended March 31, 2006
	(In thousands)	
Amounts recognized in statement of financial position:		
Accrued expenses	\$ (2,529)	\$ (3,539)
Noncurrent retirement obligations	(23,975)	(20,572)
Net amount recognized at end of period	\$ (26,504)	\$ (24,111)
Amounts recognized in accumulated other comprehensive (income) loss:		
Net actuarial loss	\$ 3,649	see note(a)
Net amount recognized in accumulated other comprehensive (income) loss:	\$ 3,649	\$
Unfunded postretirement benefit cost	\$ (22,855)	\$ (24,111)

(a) Amounts above for fiscal year 2007 include the effect of adopting SFAS 158. Fiscal year 2006 amounts have not been restated.

	Pension Benefits		Other Post-Retirement Benefits	
	March 31, 2007	March 31, 2006	March 31, 2007	March 31, 2006
Weighted-average assumptions as of:				
Discount rate	5.5%	5.2%	5.7%	5.4%
Rate of compensation increase	3.7%	3.7%	n/a	n/a

Expense Assumptions:

	Pension Benefits		Other Post-Retirement Benefits	
	FY 2008	FY 2007	FY 2008	FY 2007
	Expense	Expense	Expense	Expense

Weighted-average assumptions for:

Discount rate	5.5%	5.2%	5.7%	5.4%
Expected return on plan assets	6.9%	6.9%	n/a	n/a
Rate of compensation increase	3.7%	3.7%	n/a	n/a

For fiscal year 2007 expense, the Company assumed an expected weighted average return on plan assets of 6.9%. In developing this rate assumption, the Company evaluated input from third party pension plan asset managers, including their review of asset class return expectations and long-term inflation assumptions.

For other post-retirement benefit measurement purposes, an annual rate of 10% and 9.7% increase in the per capita cost of covered health care benefits was assumed for 2007 and 2006, respectively. The rate was assumed to decrease gradually to 5% over eight and seven years for 2007 and 2006, respectively, and remain at that level thereafter.

F-24

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following tables set forth the plans' expense recognized in the Company's Consolidated Financial Statements:

	Pension Benefits			
	Fiscal Year Ended		For the Period	
	March 31,	March 31,	May 6, 2004	April 1, 2004
	2007	2006	to March 31, 2005	to May 05, 2004
(In thousands)				
Components of net periodic benefit cost:				
Service cost	\$ 9,164	\$ 10,638	\$ 9,596	\$ 856
Interest cost	33,949	32,552	31,586	2,798
Expected return on plan assets	(24,923)	(21,179)	(19,406)	(1,640)
Amortization of: Prior service cost	19			4
Actuarial (gain) loss	(1,210)			836
Net periodic benefit cost(a)	\$ 16,999	\$ 22,011	\$ 21,776	\$ 2,854

- (a) Excludes the impact of settlement net losses of \$0.6 million, and \$0.2 million in fiscal 2006 and in the period from May 6, 2004 to March 31, 2005, respectively and curtailment net (gains) of (\$0.8) million and (\$0.6) million in fiscal 2006 and in the period from May 6, 2004 to March 31, 2005, respectively.
- (b) \$1.4 million of income will be amortized from accumulated other comprehensive (income) loss into net periodic benefit cost in fiscal 2008 relating to the Company's pension plans.

	Other Post-Retirement Benefits			
	Fiscal Year Ended		For the Period	
	March 31,	March 31,	May 6,	April 1, 2004
	2007	2006	2004 to March 31, 2005	to May 05, 2004
(In thousands)				
Components of net periodic benefit cost:				
Service cost	\$ 167	\$ 101	\$ 82	\$ 6
Interest cost	1,487	1,573	1,222	147
Amortization of: Transition obligation				3
Prior service cost				(52)
Actuarial loss	84	208		20

Net periodic benefit cost	\$ 1,738	\$ 1,882	\$ 1,304	\$ 124
---------------------------	----------	----------	----------	--------

(a) \$0.1 million of expense will be amortized from accumulated other comprehensive (income) loss into net periodic benefit cost in fiscal 2008 relating to the Company's other post retirement benefit plans.

The projected benefit obligation, accumulated benefit obligation, and fair value of plan assets for the pension plans with accumulated benefit obligations in excess of plan assets were \$492.6 million, \$484.2 million and \$241.1 million, respectively, as of March 31, 2007 and \$488.6 million, \$480 million, and \$189.8 million, respectively, as of March 31, 2006.

F-25

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The accumulated benefit obligation for the Company's pension plans was \$626.7 million as of March 31, 2007. Expected future benefit payments are as follows:

Fiscal Year	Pension Benefits	Other Post-Retirement Gross Expected Benefit Payments (In thousands)	Other Post-Retirement Expected Medicare Subsidy Payments
2008	\$ 33,356	2,729	\$ 200
2009	33,939	2,748	200
2010	34,202	2,663	200
2011	34,724	2,488	200
2012	36,266	2,402	200
2013 to 2017	198,425	11,988	1,200

The asset allocation for the Company's pension plans at March 31, 2007, and the long term target allocation, by asset category, are as follows:

Asset Category	Target Allocation 2008	Percentage of Plan Assets at Year End	
		2007	2006
Equity securities	66%	65%	71%
Fixed income securities	33%	31%	26%
Real estate and other	0%	1%	1%
Cash	1%	3%	2%
Total	100%	100%	100%

The Company invests in a diversified portfolio of investments consisting almost entirely of equity and fixed income securities. The equity portfolio includes direct and indirect interests in both U.S. and global equity securities, both in developed and emerging market companies. The fixed income portfolio is primarily U.S. and global high-quality bond funds.

The estimated fiscal 2008 pension plan contributions are \$53.1 million and other post-retirement contributions are \$2.5 million.

Cash contributions to the Company's pension plans are generally made in accordance with minimum regulatory requirements. The Company's U.S. plans are currently significantly under-funded. Based on current assumptions and regulatory requirements, the Company's minimum future cash contribution requirements for its U.S. plans are expected to remain relatively high for the next few fiscal years. On November 17, 2004, the Company received written notification of a tentative determination from the Internal Revenue Service (IRS) granting a temporary waiver of its minimum funding requirements for its U.S. plans for calendar years 2003 and 2004, amounting to approximately \$50 million, net, under Section 412(d) of the Internal Revenue Code, subject to providing a lien satisfactory to the Pension Benefit Guaranty Corporation (PBGC). On June 10, 2005, the Company reached agreement with the PBGC on a second priority lien on domestic personal property, including stock of its U.S. and direct foreign subsidiaries to secure the unfunded liability. The temporary waiver provides for deferral of the Company's minimum contributions for those years to be paid over a subsequent five-year period through 2010.

Based upon the temporary waiver and sensitivity to varying economic scenarios, the Company expects its cumulative minimum future cash contributions to its U.S. pension plans will total approximately \$70 million to \$125 million from fiscal 2008 to fiscal 2012, including \$35 million in fiscal 2008.

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Company expects that cumulative contributions to its non U.S. pension plans will total approximately \$93.2 million from fiscal 2008 to fiscal 2012, including \$18.1 million in fiscal 2008. In addition, the Company expects that cumulative contributions to its other post-retirement benefit plans will total approximately \$13 million from fiscal 2008 to fiscal 2012, including \$2.5 million in fiscal 2008.

Assumed health care cost trend rates have a significant effect on the amounts reported for other post-retirement benefits. A one-percentage-point change in assumed health care cost trend rates would have the following effects:

	One Percentage- Point Increase	One Percentage- Point Decrease
Effect on total of service and interest cost components	\$ 189	\$ 156
Effect on the postretirement benefit obligation	\$ 2,589	\$ 2,211

(11) STOCK BASED COMPENSATION PLANS

Effective April 1, 2006, the Company adopted SFAS 123R Share-Based Payment (SFAS 123R) using the modified prospective transition method. SFAS 123R requires that the cost resulting from all share-based payment transactions be recognized in the financial statements. SFAS 123R also establishes fair value as the measurement method in accounting for share-based payments. This method requires the Company to expense the remaining unrecognized portion of unvested awards outstanding at the effective date and any awards granted or modified after the effective date, but does not require restatement of prior periods. The fair values of stock awards are determined using an estimated expected life. The Company recognizes compensation expense on a straight-line basis over the period the award is earned by the employee.

On August 30, 2005, the stockholders approved the 2004 Stock Incentive Plan (the 2004 Plan) to provide incentives and awards to employees and directors of the Company as well as certain consultants. Under the Plan, all employees are eligible to receive awards. The 2004 Plan, as amended, permits the granting of stock options, restricted shares, restricted share units, and performance awards. The maximum number of shares that the Company may issue is 7.1 million for all awards, but not more than 1.9 million shares as restricted shares or restricted share units.

Under the terms of the 2004 Plan, stock options are generally subject to a three-year vesting schedule, and generally expire 10 years from the option grant date. Shares of restricted stock are generally subject to a five-year vesting schedule. In addition, as part of their annual compensation, each non-employee member of the Company's Board of Directors received stock options and restricted stock. These awards are generally 100% vested one year after the grant date. The vesting schedules for the awards are subject to certain change in control provisions, including full vesting if an employee is terminated within 12 months of a change in control. The per share exercise price for the stock options is calculated based on a 10-day trailing average closing price of the Company's common stock as listed on The NASDAQ Global Market immediately prior to the award date.

Total compensation cost related to stock compensation plans was \$2.5 million and \$0.5 million for fiscal 2007 and 2006, respectively. The Company did not incur stock compensation cost in the period May 6, 2004 to March 31, 2005, or the period April 1, 2004 to May 5, 2004. As of March 31, 2007, total compensation cost related to non-vested

awards not yet recognized in the Company's Consolidated Financial Statements was \$15.7 million, which is expected to be recognized over a weighted average period of 2.9 years.

F-27

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)***Stock Option Awards*

The fair value of each option grant was estimated on the date of grant using the Black-Scholes option pricing model. Expected volatility is calculated based on the historical volatility of the Company's stock. The risk free interest rate is based on the U.S. Treasury yield for a term equal to the expected life of the options at the time of grant. The following table includes information about the weighted-average fair values of options:

	For the Fiscal Year Ended		For the Period	
	March 31, 2007	March 31, 2006	May 6, 2004 to March 31, 2005	April 1, 2004 to May 5, 2004
Weighted average fair value	\$ 3.66	\$ 2.42	n/a	n/a
Expected volatility	64% to 77%	75%	n/a	120%
Risk-free interest rates	4.5% to 4.9%	4.1% to 4.7%	n/a	4.6% to 4.9%
Expected term of options	5.5 to 6.5 years	10 years	n/a	5.0 years

Summary of stock option activity:

	Stock Options (In thousands)	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life
Shares under option:			
Outstanding at March 31, 2004	3,925	\$ 10.63	
Granted	521	\$ 15.73	
Forfeited	(35)	\$ 15.82	
Cancelled	(3,925)	\$ 10.63

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Prior to April 1, 2006, the Company accounted for its stock-based compensation plans under APB Opinion No. 25,

Accounting for Stock Issued to Employees, which only required the Company to disclose the pro forma effects of stock option plans on a net income (loss) and net earnings (loss) per share basis as provided by SFAS No. 123,

Accounting for Stock-Based Compensation. The Company did not recognize compensation expense in fiscal periods ended prior to April 1, 2006 with respect to options that had an exercise price equal to the fair market value of the Company's common stock on the date of the grant. Had stock option related compensation expense for these periods been recognized in the Consolidated Financial Statements based on fair value at the grant date, the Company's net income (loss) and net income (loss) per share would have been the pro forma amounts indicated below:

	Fiscal Year Ended March 31, 2006	For the Period May 6, 2004 to March 31, 2005		April 1, 2004 to May 5, 2004
	(In thousands, except per share data)			
Net income (loss) as reported:	\$ (172,732)	\$ (466,923)	\$ 1,748,564	
Less: total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects	(819)		(86)	
Pro forma net income (loss)	\$ (173,551)	\$ (466,923)	\$ 1,748,478	
Basic and diluted net income (loss) per share:				
As reported	\$ (6.75)	\$ (18.26)	\$ 63.86	
Pro forma	\$ (6.79)	\$ (18.26)	\$ 63.85	

Restricted Stock Awards

During the fiscal years ended March 31, 2007 and 2006, and the period from May 6, 2004 to March 31, 2005, 1.1 million, 0.5 million and 0.1 million shares of restricted stock and or restricted stock units, respectively, were approved to be granted to certain eligible employees.

Restricted stock transactions during the fiscal year ended March 31, 2007 were as follows:

	Number of Shares (In thousands)	Weighted-Average Fair Value
Outstanding (non-vested) at March 31, 2006	424	\$ 4.10
Granted	1,143	\$ 6.14

Edgar Filing: EXIDE TECHNOLOGIES - Form 10-K

Vested	(226)	\$	4.05
Forfeited	(73)	\$	3.88
Outstanding (non-vested) at March 31, 2007	1,268	\$	7.85

F-29

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(12) INCOME TAXES**

The provision for income taxes includes federal, state and foreign taxes currently payable and those deferred because of net operating losses and temporary differences between the financial statement and tax bases of assets and liabilities. The components of the provision for income taxes are as follows:

	Fiscal Year Ended		For the Period	
	March 31, 2007	March 31, 2006 (In thousands)	May 6, 2004 to March 31, 2005	April 1, 2004 to May 5, 2004
Current:				
Federal	\$ 191	\$ 637	\$	\$
Foreign	11,942	15,361	7,668	697
	12,133	15,998	7,668	697
Deferred:				
Foreign	(6,350)	(36)	6,551	(3,179)
	(6,350)	(36)	6,551	(3,179)
Total provision (benefit)	\$ 5,783	\$ 15,962	\$ 14,219	\$ (2,482)

Major differences between the federal statutory rate and the effective tax rate are as follows:

	Fiscal Year Ended		For the Period	
	March 31, 2007	March 31, 2006	May 6, 2004 to March 31, 2005	April 1, 2004 to May 5, 2004
Federal statutory rate	(35.0)%	(35.0)%	(35.0)%	(35.0)%
Loss on Liquidation		2.8		
I/C Debt Forgiveness		(20.0)

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following is a summary of the significant components of the Company's deferred tax assets and liabilities:

	March 31, 2007	March 31, 2006
	(In thousands)	
Deferred tax assets:		
Operating loss and tax credit carry-forwards	\$ 321,939	\$ 298,312
Compensation reserves	64,632	80,659
Environmental reserves	12,856	12,797
Warranty	13,207	11,434
Purchase commitments	4,781	7,160
Other	39,023	32,412
Valuation allowance	(321,001)	(300,718)
	135,437	142,056
Deferred tax liabilities:		
Property, plant and equipment	(37,625)	(46,849)
Intangible assets	(53,008)	(61,373)
	(90,633)	(108,222)
Net deferred tax assets	\$ 44,804	\$ 33,834

The net deferred income tax asset is classified in the consolidated balance sheet as follows:

	March 31, 2007	March 31, 2006
	(In thousands)	
Current asset	\$ 19,030	\$ 11,066
Noncurrent asset	67,006	56,358
Noncurrent liability	(41,232)	(33,590)
	\$ 44,804	\$ 33,834

As of March 31, 2007 the Company has net operating loss carry-forwards (NOLs) for U.S. and state income tax purposes of \$399 million. These loss carry-forwards will expire in years 2024 through 2027. The Company has determined that a Sec. 382 ownership change occurred during the fiscal year ending March 31, 2007. See Note 18.

IRC Sec. 382 places annual limits on the amount of the Company's U.S. and state NOLs that may be used to offset future taxable income. The Company has calculated its annual Sec. 382 limitation on U.S. and state losses incurred prior to September 15, 2006 to range between \$5 million and \$8 million over the next twenty years. Had a Sec. 382 ownership change not occurred during the year, the Company would have had U.S. and state NOLs available of \$1.5 billion.

At March 31, 2007, certain of the Company's foreign subsidiaries have net operating loss carry-forwards for income tax purposes of approximately \$888 million, of which approximately \$151 million expire in fiscal years 2007 through 2022. The remaining losses are available for carry-forward indefinitely.

A full valuation allowance has been provided on Exide Technologies (the U.S. parent company) and all of its U.S. subsidiaries. Additionally, valuation allowances have been recognized in certain foreign tax jurisdictions, to reduce the deferred tax assets for net operating loss carry-forwards and temporary differences for which it is more likely than not that the related tax benefits will not be realized. In other jurisdictions (primarily Germany and Australia), the Company's net deferred tax assets include net operating loss carry-

Table of Contents

EXIDE TECHNOLOGIES AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

forwards and temporary differences which management believes are realizable through a combination of forecasted future taxable income and anticipated tax planning strategies. The Company has implemented certain tax planning strategies in prior years to utilize a portion of such deferred tax assets. Failure to achieve forecasted future taxable income might affect the ultimate realization of any remaining deferred tax assets.

As of March 31, 2007, the Company had not provided for withholding or U.S. Federal income taxes on current year undistributed earnings of certain other foreign subsidiaries since such earnings are expected to be reinvested indefinitely or be substantially offset by available foreign tax credits and operating loss carry forwards. As of March 31, 2007, the Company had approximately \$93 million of undistributed earnings in its foreign subsidiaries. It is not practicable to determine the amount of unrecognized deferred U.S. income tax liability on these unremitted earnings.

(13) COMMITMENTS AND CONTINGENCIES

Claims Reconciliation

Holders of general unsecured claims will receive collectively 2.5 million shares of new common stock and Warrants to purchase 6.25 million shares of new common stock at \$32.11 per share, adjusted to 6.6 million shares with a exercise price of \$30.31 per share based on the closing of the \$75 million rights offering and \$50 million private sale of common stock in September 2006. Approximately 13.4% of such new common stock and Warrants were initially reserved for distribution for disputed claims under the Plan's claims reconciliation and allowance procedures. The Official Committee of Unsecured Creditors, in consultation with the Company, established such reserve to provide for a pro rata distribution of new common stock and Warrants to holders of disputed claims as they become allowed. As claims are evaluated and processed, the Company will object to some claims or portions thereof, and upward adjustments (to the extent stock and Warrants not previously distributed remain) or downward adjustments to the reserve will be made pending or following adjudication of such objections. Predictions regarding the allowance and classification of claims are inherently difficult to make. With respect to environmental claims in particular, there is an inherent difficulty in assessing the Company's potential liability due to the large number of other potentially responsible parties. For example, a demand for the total cleanup costs of a landfill used by many entities may be asserted by the government using joint and several liability theories. Although the Company believes that there is a reasonable basis to believe that it will ultimately be responsible for only its share of these remediation costs, there can be no assurance that the Company will prevail on these claims. In addition, the scope of remedial costs, or other environmental injuries, are highly variable and estimating these costs involves complex legal, scientific and technical judgments. Many of the claimants who have filed disputed claims, particularly environmental and personal injury claims, produce little or no proof of fault on which the Company can assess its potential liability. Such claimants often either fail to specify a determinate amount of damages or provide little or no basis for the alleged damages. In some cases, the Company is still seeking additional information needed for a claims assessment and information that is unknown to the Company at the current time may significantly affect the Company's assessment regarding the adequacy of the reserve amounts in the future.

As general unsecured claims have been allowed in the bankruptcy court, the Company has distributed approximately one share of common stock of the Company per \$383.00 in allowed claim amount and approximately one Warrant per \$153.00 in allowed claim amount. These rates were established based upon the assumption that the common stock and Warrants allocated to holders of general unsecured claims on the effective date of the Plan, including the reserve

established for disputed claims, would be fully distributed so that the recovery rates for all allowed unsecured claims would comply with the Plan without the need for any redistribution or supplemental issuance of securities. If the amount of general unsecured claims that is eventually allowed exceeds the amount of claims anticipated in the setting of the reserve, additional common stock and Warrants will be issued for the excess claim amounts at the same rates as used for the other general unsecured claims. If this were to occur, additional common stock would also be issued to the holders of pre-

Table of Contents

EXIDE TECHNOLOGIES AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

petition secured claims to maintain the ratio of their distribution in common stock at nine times the amount of common stock distributed for all unsecured claims.

On April 20 2007, the Company made its 12th distribution of new common stock and warrants for disputed general unsecured claims. Based on information available as of June 8, 2007, approximately 8.5% of new stock and warrants reserved for this purpose have been distributed. The Company also continues to resolve certain non-objected claims.

Historical Federal Plea Agreement

In 2001, the Company reached a plea agreement with the U.S. Attorney for the Southern District of Illinois resolving an investigation into a scheme by former officers and certain corporate entities involving fraudulent representations and promises in connection with the distribution, sale and marketing of automotive batteries between 1994 and 1997. The Company agreed to pay a fine of \$27.5 million over five years, five-years probation and to cooperate with the U.S. Attorney in its prosecution of the former officers. The Company was sentenced pursuant to the terms of the plea agreement in February 2002. Generally, failure to comply with the provisions of the plea agreement, including the obligation to pay the fine, would permit the U.S. Government to reopen the case against the Company.

On April 15, 2002, the Company filed for protection under Chapter 11 of the Bankruptcy Code. Later in 2002, the U.S. Attorney's Office for the Southern District of Illinois filed a claim as a general unsecured creditor of the Company's subsidiary, Exide Illinois, Inc. for \$27.9 million. The Company did not pay any installments of the criminal fine before or during its bankruptcy proceedings, nor did it pay any installments of the criminal fine after the Company emerged from bankruptcy in May 2004. As previously reported, if the U.S. Government were to assert that the obligation to pay the fine was not discharged under the Plan of Reorganization, the Company could be required to pay it.

In December 2004, the U.S. Attorney's Office requested additional information regarding whether the Company adequately disclosed its financial condition at the time the plea agreement and the associated fine were approved by the U.S. District Court. The Company supplied correspondence and other materials responsive to this request.

On November 18, 2005 the U.S. Attorney's Office filed a motion in the District Court for a hearing to make inquiry of the Company's failure to comply with the Court's judgment and terms of probation, principally through failure to pay the fine, and a motion to show cause why the Company should not be held in contempt. In its motion, the U.S. Attorney's Office asserted that Exide Illinois was in default from its nonpayment of the criminal fine and was in violation of the terms of probation. The U.S. Attorney also asserted that bankruptcy does not discharge criminal fines, and that the Company did not adequately disclose its financial condition at the time the plea agreement and associated fines were approved by the District Court.

On May 31, 2006, the District Court approved a Joint Agreement and Proposed Joint Resolution of Issues Raised in the Government's Motion Filed on November 18, 2005 regarding the payment of criminal fine. The District Court entered an order consistent with the Joint Agreement and Proposed Joint Resolution, and modified the Company's schedule to pay the \$27.5 million fine through quarterly payments over the next five years, ending in 2011.

Under the order, Exide Technologies was required provide security in a form acceptable to the court and to the government by February 26, 2007 for its guarantee of any remaining unpaid portion of the fine, but could petition the court prior thereto if the Company believed its financial viability would be jeopardized by providing such security.

The court's order reflects that the Company is not obligated to pay interest on outstanding amounts of unpaid fine if the Company is current on all installment payments, and allows for penalties and interest to be imposed if the Company does not comply with the modified fine payment schedule. On January 25, 2007, the Court entered an order which provided, in part, that Exide is excused from

Table of Contents

EXIDE TECHNOLOGIES AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

the requirement to provide adequate security to the United States before the expiration of its term of probation for the remaining unpaid fine amount.

Pre-Petition Litigation Settlements

The Company previously disclosed in its most recent Report on Form 10-K for fiscal 2006 tentative settlements with various plaintiffs who alleged personal injury and/or property damage from the release of hazardous materials used in the battery manufacturing process prior to the Company's filing for Chapter 11 bankruptcy protection. The Company has finalized a settlement of these claims, as well as claims they could have asserted against third parties who may have had claims of indemnification against the Company on a pre-petition or post-petition basis. The claims will be paid in new common stock and Warrants to be paid out of the reserve established under the claims reconciliation process. The terms of the settlement are still subject to approval of appropriate state courts.

Private Party Lawsuits and other Legal Proceedings

In, 2003, the Company served notices to reject certain executory contracts with EnerSys, including a 1991 Trademark and Trade Name License Agreement (the Trademark License), pursuant to which the Company had licensed to EnerSys use of the Exide trademark on certain industrial battery products in the United States and 80 foreign countries. EnerSys objected to the rejection of certain of the executory contracts, including the Trademark License. In 2006, the Court granted the Company's request to reject the contracts which EnerSys appealed. Unless the appeal is successful, EnerSys will likely lose all rights to use the Exide trademark over time and the Company will have greater flexibility in its ability to use that mark for industrial battery products. Because the Bankruptcy Court authorized rejection of the Trademark License, as with other executory contracts at issue, EnerSys will have a pre-petition general unsecured claim relating to the alleged damages arising therefrom. The Company reserves the ability to consider payment in cash of some portion of any settlement or ultimate award on EnerSys' claim of alleged rejection damages. In 2006, the Bankruptcy Court ordered a two year transition period and denied EnerSys' motion for a stay. EnerSys has appealed that order.

In July 2001, Pacific Dunlop Holdings (US), Inc. (PDH) and several of its foreign affiliates under the various agreements through which Exide and its affiliates acquired GNB, filed a complaint in the Circuit Court for Cook County, Illinois alleging breach of contract, unjust enrichment and conversion against Exide and three of its foreign affiliates. The plaintiffs maintain they are entitled to approximately \$17 million in cash assets acquired by the defendants through their acquisition of GNB. In December 2001, the Court denied the defendants' motion to dismiss the complaint, without prejudice. The defendants filed an answer and counterclaim. In, 2002, the Court authorized discovery to proceed as to all parties except Exide. In August 2002, the case was removed to the U.S. Bankruptcy Court for the Northern District of Illinois. In February 2003, the U.S. Bankruptcy Court for the Northern District of Illinois transferred the case to the U.S. Bankruptcy Court in Delaware. In November 2003, the Bankruptcy Court denied PDH's motion to abstain or remand the case and issued an opinion holding that the Bankruptcy Court had jurisdiction over PDH's claims and that liability, if any, would lie solely against Exide Technologies and not against any of its foreign affiliates. The Bankruptcy Court denied PDH's motion to reconsider. In an order dated March 22, 2007, the U.S. District Court for the District of Delaware denied PDH's appeal in its entirety, affirming the Orders of the Bankruptcy Court. PDH has noticed its appeal of this Order to the United States Court of Appeals for the Third Circuit.

In December 2001, PDH filed a separate action in the Circuit Court for Cook County, Illinois seeking recovery of approximately \$3.1 million for amounts allegedly owed by Exide under various agreements between the parties. The claim arises from letters of credit and other security allegedly provided by PDH for GNB's performance of certain of GNB's obligations to third parties that PDH claims Exide was obligated to

Table of Contents

EXIDE TECHNOLOGIES AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

replace. Exide's answer contested the amounts claimed by PDH and Exide filed a counterclaim. Although this action has been consolidated with the Cook County suit concerning GNB's cash assets, the claims relating to this action have been transferred to the U.S. Bankruptcy Court for the District of Delaware and are currently subject to a stay injunction by that court. The Company plans to vigorously defend itself and pursue its counterclaims.

From 1957 to 1982, CEAC, the Company's principal French subsidiary, operated a plant using crocidolite asbestos fibers in the formation of battery cases, which, once formed, encapsulated the fibers. Approximately 1,500 employees worked in the plant over the period. Since 1982, the French governmental agency responsible for worker illness claims received 64 employee claims alleging asbestos-related illnesses. For some of those claims, CEAC is obligated to and has indemnified the agency in accordance with French law for approximately \$0.4 million in calendar 2004. In addition, CEAC has been adjudged liable to indemnify the agency for approximately \$0.1 million during the same period for the dependents of four such claimants. The Company was not required to indemnify or make any payments in calendar years 2005 and 2006. Although the Company cannot predict the number or size of any future claims, the Company does not believe resolution of the current or any future claims, individually or in the aggregate, will have a material adverse effect on the Company's financial condition, cash flows or results of operations.

In June 2005 two former stockholders, Aviva Partners LLC and Robert Jarman filed purported class action lawsuits against the Company and certain of its current and former officers alleging violations of certain federal securities laws in the United States District Court for the District of New Jersey purportedly on behalf of those who purchased the Company's stock between November 16, 2004 and May 17, 2005. The complaints allege that the named officers violated Sections 10(b) and 20(a) of the Securities Exchange Act and SEC Rule 10b-5 in connection with certain allegedly false and misleading public statements made during this period by the Company and its officers. The complaints did not specify an amount of damages sought. The Company denies the allegations in the complaints and intends to vigorously pursue its defense.

United States District Judge Mary L. Cooper consolidated the Aviva Partners and Jarman cases under the Aviva Partners v. Exide Technologies, Inc. caption. In 2006 Plaintiffs filed their consolidated amended complaint in which they reiterated the claims described above but purported to state a claim on behalf of those who purchased the Company's stock between May 5, 2004 and May 17, 2005. On March 13, 2007, the Court denied Defendants' motions to dismiss. Discovery in this litigation is proceeding and is expected to continue throughout the remainder of 2007 and 2008. No trial date has been set in this matter.

In October 2005, Murray Capital Management, Inc., filed suit against the Company, certain of its current and former officers and Deutsche Bank Securities, Inc in the U.S. District Court for the Southern District of New York alleging that the defendants violated Sections 10(b) and 20(a) of the Securities Exchange Act and SEC Rule 10b-5, and related state laws, in connection with certain allegedly false and misleading public statements made by the Company and its officers. While Murray's claims are largely duplicative of those set out in the Aviva and Jarman complaints, Murray also claims that false and misleading statements were made in connection with the Company's March 2005 issuance of convertible notes and concurrent issuance of senior notes. The complaint does not specify the amount of damages sought in the suit. The Company is indemnifying Deutsche Bank pursuant to the Purchase Agreement under which the notes were issued. The Court granted the Company's motion to dismiss the complaint and permitted the plaintiff to file an amended complaint, which it did. Defendants moved to dismiss the amended complaint. The Court subsequently granted Deutsche Bank's motion to dismiss but denied the Company's motion and ordered that discovery proceed in connection with Plaintiff's claims against the Company and certain of its current and former officers. Discovery is proceeding and is expected to continue throughout the remainder of 2007 and the first half of 2008. No trial date has

been set in this matter.

In August 2006 a shareholder derivative complaint was filed in the District Court for the District of New Jersey by Marilyn Richardson against certain current and former officers and directors. The suit alleges that

F-35

Table of Contents

EXIDE TECHNOLOGIES AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

named parties breached their fiduciary duties to the Company by, among other things, making statements between November, 2004 and July, 2005 which plaintiffs claim were false and misleading and by allegedly failing to implement adequate internal controls and means of supervision at the Company. The suit seeks an unspecified amount of damages from the named parties and modifications to the Company's corporate governance policies. The allegations in the complaint are similar to the Aviva Partners and Jarman shareholder class action suits described above. The individual defendants intend to vigorously defend the suit. Individual defendants have moved to dismiss the shareholder derivative complaint. In addition, the Company, on whose behalf these claims purport to be brought, has moved to dismiss the shareholder derivative complaint on the grounds that the derivative plaintiff did not file the claims in accordance with applicable laws governing the filing of derivative suits.

In November 2006, the Company received a letter addressed to its directors from a law firm representing investment funds or accounts managed by Stanfield Capital Partners LLC (Stanfield). According to the letter, Stanfield holds major positions in the Company's convertible notes and also holds positions in the Company's senior notes and its Credit Agreement debt. Such letter stated, among other things, that Stanfield believed the Company was in default under the Credit Agreement and the note indentures because the \$27.5 million fine described above under Historical Federal Plea Agreement constituted a judgment in excess of the judgment amounts permitted under such indentures. The letter also said that Stanfield believed there were breaches of the Company's disclosure obligations in connection with the March 2005 note issuances relating to the 2001 criminal fine, the status and value of certain product inventories and statements as to likely fiscal 2005 results. The Company has discussed these allegations with Stanfield. The Company believes that all such assertions are without merit.

On July 1, 2005, the Company was informed by the Enforcement Division of the Securities and Exchange Commission (the SEC) that it commenced a preliminary inquiry into statements the Company made in fiscal 2005 regarding its ability to comply with fiscal 2005 loan covenants and the going concern modification in the audit report in the Company's annual report on Form 10-K for fiscal 2005. The SEC noted that the inquiry should not be construed as an indication by the SEC or its staff that any violations of law have occurred. The Company intends to fully cooperate with the inquiry and continues to do so.

The Company's Norwegian subsidiary, Exide Sonnak AS, has received notice of claims for property damage in the approximate amount of \$5.6 million allegedly as the result of a warehouse fire occurring on or about July 8, 2005 in Trondheim, Norway due to an alleged malfunctioning battery charger allegedly manufactured by the Company. The Company and its counsel are evaluating those claims. The Company currently believes that any potential liability would be covered by applicable insurance, subject to the relevant deductible.

Environmental Matters

As a result of its multinational manufacturing, distribution and recycling operations, the Company is subject to numerous federal, state, and local environmental, occupational health, and safety laws and regulations, including limits on employee blood lead levels, as well as similar laws and regulations in other countries in which the Company operates (collectively, EH&S laws).

The Company is exposed to liabilities under such EH&S laws arising from its past handling, release, storage and disposal of materials now designated as hazardous substances and hazardous wastes. The Company previously has been advised by the U.S. Environmental Protection Agency (EPA) or state agencies that it is a Potentially Responsible Party under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) or similar state

laws at 97 federally defined Superfund or state equivalent sites. At 45 of these sites, the Company has paid its share of liability. While the Company believes it is probable its liability for most of the remaining sites will be treated as disputed unsecured claims under the Plan, there can be no assurance these matters will be discharged. If the Company's liability is not discharged at one or more

Table of Contents

EXIDE TECHNOLOGIES AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

sites, the government may be able to file claims for additional response costs in the future, or to order the Company to perform remedial work at such sites. In addition, the EPA, in the course of negotiating this pre-petition claim, had notified the Company of the possibility of additional clean-up costs associated with Hamburg, Pennsylvania properties of approximately \$35 million, as described in more detail below. The EPA has provided summaries of past costs and an estimate of future costs that approximate the amounts in its notification; however, the Company disputes certain elements of the claimed past costs, has not received sufficient information supporting the estimated future costs, and is in negotiations with the EPA. To the extent the EPA or other environmental authorities dispute the pre-petition nature of these claims, the Company would intend to resist any such effort to evade the bankruptcy law's intended result, and believes there are substantial legal defenses to be asserted in that case. However, there can be no assurance that the Company would be successful in challenging any such actions.

The Company is also involved in the assessment and remediation of various other properties, including certain Company owned or operated facilities. Such assessment and remedial work is being conducted pursuant to applicable EH&S laws with varying degrees of involvement by appropriate legal authorities. Where probable and reasonably estimable, the costs of such projects have been accrued by the Company, as discussed below. In addition, certain environmental matters concerning the Company are pending in various courts or with certain environmental regulatory agencies with respect to these currently or formerly owned or operating locations. While the ultimate outcome of the foregoing environmental matters is uncertain, after consultation with legal counsel, the Company does not believe the resolution of these matters, individually or in the aggregate, will have a material adverse effect on the Company's financial condition, cash flows or results of operations.

On September 6, 2005, the U.S. Court of Appeals for the Third Circuit issued an opinion in U.S. v. General Battery/Exide (No. 03-3515) affirming the district court's holding that the Company is liable, as a matter of federal common law of successor liability, for lead contamination at certain sites in the vicinity of Hamburg, Pennsylvania. This case involves several of the pre-petition environmental claims of the federal government for which the Company, as part of its Chapter 11 proceeding, had established a reserve of common stock and warrants. The amount of the government claims for these sites at the time reserves were established was approximately \$14 million. On October 2, 2006, the United States Supreme Court denied review of the appellate decision, leaving Exide subject to a stipulated judgment for approximately \$6.5 million, based on the ruling that Exide has successor liability for these EPA cost recovery claims. The judgment will be a general unsecured claim payable in common stock and warrants. Additionally, the EPA has asserted a general unsecured claim for costs related to other Hamburg, Pennsylvania sites. The current amount of the government's claims for the aforementioned sites (including the stipulated judgment discussed above) is approximately \$20 million. A reserve of common stock and warrants for the estimated value of all claims, including the aforementioned claims, was established as part of the Plan.

In October 2004, the EPA, in the course of negotiating a comprehensive settlement of all its environmental claims against the Company, had notified the Company of the possibility of additional clean-up costs associated with other Hamburg, Pennsylvania properties of approximately \$35 million. The EPA has provided cost summaries for past costs and an estimate of future costs that approximate the amounts in its notification; however, the Company disputes certain elements of the claimed past costs, has not received sufficient information supporting the estimated future costs, and is in negotiations with the EPA.

As unsecured claims are allowed in the Bankruptcy Court, the Company is required to distribute common stock and warrants to the holders of such claims. To the extent the government is able to prove the Company is responsible for the alleged contamination at the other Hamburg, Pennsylvania properties and substantiate its estimated \$35 million of

additional clean-up costs discussed above, these claims would ultimately result in an inadequate reserve of common stock and warrants to the extent not offset by the reconciliation of all other claims for lower amounts than the aggregate reserve. The Company would still retain the right to perform and

Table of Contents

EXIDE TECHNOLOGIES AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

pay for such cleanup activities, which would preserve the existing reserved common stock and warrants discussed in Note 3. Except for the government's cost recovery claim resolved by the U.S. v. General Battery/Exide case discussed above, it remains the Company's position that it is not liable for the contamination of this area, and that any liability it may have derives from pre-petition events which would be administered as a general, unsecured claim, and consequently no provisions have been recorded in connection therewith.

The Company is conducting an investigation and risk assessment of lead exposure near its Reading recycling plant from past facility emissions and non-Company sources such as lead paint. This is being performed under a Consent Order with the EPA. The Company has previously removed soil from properties with the highest soil lead content, and is in negotiations and proceedings with the EPA to resolve differences regarding the need for, and extent of, further actions by the Company. Alternatives have been reviewed and appropriate reserve estimates made. At this time the Company cannot determine from available information whether additional cleanup will occur and, if so, the extent of any cleanup and costs that may finally be incurred.

The Company has established reserves for on-site and off-site environmental remediation costs where such costs are probable and reasonably estimable and believes that such reserves are adequate. As of March 31, 2007 and 2006, the amount of such reserves on the Company's Consolidated Balance Sheets were approximately \$34.7 million and \$36.7 million, respectively. Because environmental liabilities are not accrued until a liability is determined to be probable and reasonably estimable, not all potential future environmental liabilities have been included in the Company's environmental reserves and, therefore, additional earnings charges are possible. Also, future findings or changes in estimates could have a material adverse effect on the recorded reserves and cash flows.

The sites that currently have the largest reserves include the following:

Tampa, Florida

The Tampa site is a former secondary lead recycling plant, lead oxide production facility, and sheet lead-rolling mill that operated from 1943 to 1989. Under a RCRA Part B Closure Permit and a Consent Decree with the State of Florida, Exide is required to investigate and remediate certain historic environmental impacts to the site. Cost estimates for remediation (closure and post-closure) range from \$12.5 million to \$20.5 million depending on final State of Florida requirements. The remediation activities are expected to occur over the course of several years.

Columbus, Georgia

The Columbus site is a former secondary lead recycling plant that was mothballed in 1999, which is part of a larger facility that includes an operating lead-acid battery manufacturing facility. Groundwater remediation activities began in 1988. Costs for supplemental investigations, remediation and site closure are currently estimated from \$6 million to \$9 million.

Azambuja (SONALUR) Portugal

The Azambuja (SONALUR) facility is an active secondary lead recycling plant. Materials from past operations present at the site are stored in above-ground concrete containment vessels and in underground storage deposits. The Company finalized the process of obtaining site characterization data to evaluate remediation alternatives agreeable to local authorities. Costs for remediation are currently estimated at \$2 million to \$4 million.

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Guarantees***

At March 31, 2007, the Company had outstanding letters of credit with a face value of \$40.7 million and surety bonds with a face value of \$4.5 million. The majority of the letters of credit and surety bonds have been issued as collateral or financial assurance with respect to certain liabilities the Company has recorded, including but not limited to environmental remediation obligations and self-insured workers compensation reserves. Failure of the Company to satisfy its obligations with respect to the primary obligations secured by the letters of credit or surety bonds could entitle the beneficiary of the related letter of credit or surety bond to demand payments pursuant to such instruments. The letters of credit generally have terms up to one year. Collateral held by the surety in the form of letters of credit at March 31, 2007, pursuant to the terms of the agreement, was \$4.5 million.

Certain of the Company's European subsidiaries have bank guarantees outstanding, which have been issued as collateral or financial assurance in connection with environmental obligations, income tax claims and customer contract requirements. At March 31, 2007, bank guarantees with a face value of \$19.1 million were outstanding.

Sales Returns and Allowances

The Company provides for an allowance for product returns and/or allowances. Based upon its manufacturing re-work process, the Company believes that the majority of its product returns are not the result of product defects. The Company recognizes the estimated cost of product returns as a reduction of sales in the period in which the related revenue is recognized. The product return estimates are based upon historical trends and claims experience, and include assessment of the anticipated lag between the date of sale and claim/return date.

A reconciliation of changes in the Company's consolidated sales returns and allowances liability follows (in thousands):

Balance at March 31, 2006	\$ 45,618
Accrual for sales returns and allowances	50,438
Settlements made (in cash or credit) and currency translation	(47,530)
Balance at March 31, 2007	\$ 48,526

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)***Leases*

Future minimum lease payments under operating and capital leases that have initial or remaining noncancelable lease terms in excess of one year at March 31, 2007, are:

Fiscal Year	Operating	Capital
	(In thousands)	
2008	\$ 21,456	\$ 4,478
2009	16,534	3,680
2010	9,965	5,138
2011	6,052	1,860
2012	4,373	1,804
Thereafter	11,774	5,226
Total minimum payments	\$ 70,154	22,186
Less Interest on capital leases		3,530
Total principal payable on capital leases (included in Long-term debt)		\$ 18,656

Rent expense amounted to \$55.6 million, \$58 million, \$51.1 million, and \$5.5 million, for the fiscal years ended March 31, 2007 and 2006, the period May 6, 2004 to March 31, 2005, and the period April 1, 2004 to May 5, 2004, respectively.

The Company has various purchase commitments for materials, supplies and other items incident to the ordinary course of business. See Note 17 for discussion of the battery separator agreement entered into as part of the Company's sale of these operations.

(14) RESTRUCTURING

During fiscal 2007, the Company has continued to implement operational changes to streamline and rationalize its structure in an effort to simplify the organization and eliminate redundant and/or unnecessary costs. As part of these restructuring programs, the nature of the positions eliminated range from plant employees and clerical workers to operational and sales management.

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

During the year ended March 31, 2007, the Company recognized restructuring charges of \$24.5 million, representing \$15.1 million for severance and \$9.4 million for related closure costs. These charges resulted from actions completed during fiscal 2007, which related to Closure of the North American Transportation site of Shreveport, to continued consolidation efforts in the Industrial Energy Europe and ROW segment, closure costs for the Company's Casalnuovo, Italy industrial facility, corporate severance, and headcount reductions in the Transportation Europe and ROW segment. Approximately 438 positions have been eliminated in connection with the fiscal 2007 restructuring activities. The following is a summary of restructuring reserve movements:

	Severance	Closure Costs (In thousands)	Total
Balance, March 31, 2004	\$ 29,574	\$ 12,925	\$ 42,499
Charges	190	394	584
Payments and currency translation	(4,900)	(1,556)	(6,456)
Balance at May 5, 2004	24,864	11,763	36,627
Charges	32,066	6,413	38,479
Payments and currency translation	(31,071)	(9,039)	(40,110)
Reclassification	1,159		1,159
Balance, March 31, 2005	27,018	9,137	36,155
Charges	14,392	7,322	21,714
Payments and Currency Translation	(34,637)	(13,434)	(48,071)
Balance, March 31, 2006	6,773	3,025	9,798
Charges	15,056	9,427	24,483
Payments and Currency Translation	(19,969)	(8,649)	(28,618)
Balance, March 31, 2007	\$ 1,860	\$ 3,803	\$ 5,663

Remaining expenditures principally represent a) severance and related benefits payable per employee agreements over periods up to three years and/or regulatory requirements; b) lease commitments for certain closed facilities, branches and offices, as well as leases for excess and permanently idle equipment payable in accordance with contractual terms, over periods up to five years; and c) certain other closure costs including dismantlement and costs associated with removal obligations incurred in connection with the exit of facilities.

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(15) INTEREST EXPENSE, NET

Interest income of \$1.6 million, \$1 million, \$2 million, and \$0.02 million is included in interest expense, net for the fiscal years ended March 31, 2007 and 2006, the period May 6, 2004 to March 31, 2005, and the period April 1, 2004 to May 5, 2005, respectively. Interest income earned as a result of assumed excess cash balances due to the Chapter 11 filing was recorded in Reorganization items, net in the Consolidated Statements of Operations for the period April 1, 2004 to May 5, 2004. See Note 5.

As of the Petition Date, the Company ceased accruing interest on certain unsecured pre-petition debt classified as Liabilities subject to compromise in the Consolidated Balance Sheets in accordance with SOP 90-7. Interest was accrued on certain pre-petition debt to the extent that the Company believed it was probable of being deemed an allowed claim by the Bankruptcy Court. Interest at the stated contractual amount on pre-petition debt that was not charged to results of operations for the period April 1, 2004 to May 5, 2004 was approximately \$3.3 million.

(16) OTHER (INCOME) EXPENSE, NET

Other (income) expense, net consist of:

	Fiscal Year Ended		For the Period	
	March 31, 2007	March 31, 2006	May 6, 2004 to March 31, 2005	April 1, 2004 to May 5, 2004

	\$ 9,636	\$ 3,684	\$ (56,898)	\$ 6,222

- (a) On September 24, 2004, the Company experienced a fire at one of its facilities in Europe. While damage to the facility was contained, the Company has experienced disruption to certain of its business operations and activities while the Company restored production capacity and diverted production to alternative sites. During fiscal 2005, the Company recognized \$13.6 million of insurance recoveries; \$10.8 million in other income, and \$2.8 million in cost of sales. This represents partial reimbursement for both business interruption and replacement of property damaged by the fire. In fiscal 2006, the Company recognized the

F-43

Table of Contents

EXIDE TECHNOLOGIES AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

remaining \$4.8 million (included in Other above) of total insurance recoveries of \$18.4 million related to this incident.

(17) PURCHASE COMMITMENTS

The Company's primary purchase obligation relates to an arrangement with its sole supplier of polyethylene battery separators. The Company sold its separator manufacturing operations in fiscal 2000 for approximately \$47 million, including \$26.1 million in cash proceeds, to an unrelated party, Daramic, Inc. (Daramic or the Buyer). In connection with the sale, the Company entered into a ten-year supply agreement with Daramic that includes minimum annual purchase commitments and penalty payments if such minimum annual purchase commitments are not met. The agreement also required adjustment for the minimum annual purchase commitments if the Company acquired any customers of Daramic during the term of the agreement. The Company recorded a gain on this sale of \$9.5 million and established a liability for estimated purchase commitment shortfall penalties of \$8.5 million based on anticipated future purchases from Daramic.

As a result of acquiring GNB, which was a customer of Daramic, the Company renegotiated the supply agreement. Under the renegotiated terms and based on the Company's estimates of its purchases from the Buyer given the Company's plan to integrate GNB, the Company recorded a charge of \$29 million to cost of sales in fiscal 2001.

Based on development of its five-year business plan, in fiscal 2002, the Company revised its unit volume outlook. This revision increased its expected liability related to purchase commitment shortfall penalties to a total of \$53.4 million for the then remaining eight years of this supply agreement. This resulted in recognition of an additional charge to cost of sales of \$15.5 million in fiscal 2002. At March 31, 2007, the remaining estimated liability was \$12.3 million.

The Company uses both polyethylene and absorbed glass microfibre (AGM) separators. There are a number of suppliers from whom the Company purchases AGM separators. Polyethylene separators are purchased solely from Daramic, with supply agreements expiring in December 2009. The agreements restrict the Company's ability to source separators from other suppliers unless there is a technical benefit that Daramic cannot provide. In addition, the agreements provide for substantial minimum annual purchase commitments. There is no second source that could readily provide the volume of polyethylene separators used by the Company. As a result, any major disruption in supply from Daramic would have an adverse impact on the Company.

(18) RIGHTS OFFERING AND PRIVATE SALE OF COMMON STOCK

On September 18, 2006, the Company completed the \$75 million rights offering that it launched in August 2006 which allowed stockholders to purchase additional shares of common stock. The Company distributed, at no charge to its holders of common stock, non-transferable subscription rights to purchase additional shares of the Company's common stock. Each holder received 0.85753 of a subscription right for each share of common stock owned at the close of business on August 23, 2006, subject to adjustments to eliminate fractional rights. On September 18, 2006, the Company also completed a private sale of \$50 million of common stock. The subscription price for each share of common stock purchased in the rights offering, including shares purchased in the private placement by certain investors, was \$3.50 per share. The per share price was equal to a 20% discount to the average closing price of the Company's common stock for the 30 trading day period ended July 6, 2006.

In completing the rights offering and private sale of common stock, the Company issued an additional 35,712,570 shares of its common stock, including 10,927,015 shares subscribed for by public shareholders (not including certain investors) and 24,785,555 shares issued to certain investors in a private placement directly

F-44

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

from the Company. The shares issued to certain investors that were existing shareholders prior to the rights offering represented the number of shares of the Company's common stock that such investors would otherwise have been entitled to purchase pursuant to its basic subscription privilege in the rights offering. The Company incurred approximately \$7.3 million of expenses in connection with the rights offering and private sale of common stock.

The Company determined that an Internal Revenue Code Section 382 (Sec. 382) ownership change occurred during the quarter ending September 30, 2006 as a result of the Company's rights offering and private sale of common stock. Sec. 382 places annual limits on the amount of the Company's U.S. net operating loss carry forwards (NOLs) that may be used to offset taxable income. The annual limit has been determined to be \$4.4 million. A full valuation allowance continues to be provided on the remaining U.S. NOLs.

(19) FAIR VALUE OF FINANCIAL INSTRUMENTS

The estimated fair value of financial instruments has been determined by the Company using available market information and appropriate methodologies; however, considerable judgment is required in interpreting market data to develop these estimates. Accordingly, the estimates presented herein are not necessarily indicative of the amounts that the Company could realize in a current market exchange. Certain of these financial instruments are with major financial institutions and expose the Company to market and credit risks and may at times be concentrated with certain counterparties or groups of counterparties. The creditworthiness of counterparties is continually reviewed, and full performance is anticipated.

The methods and assumptions used to estimate the fair value of each class of financial instruments are set forth below:

Cash and cash equivalents, accounts receivable and accounts payable the carrying amounts of these items are a reasonable estimate of their fair values.

Long-term receivables the carrying amounts of these items are a reasonable estimate of their fair value.

Short-term borrowings Borrowings under miscellaneous line of credit arrangements have variable rates that reflect currently available terms and conditions for similar debt. The carrying amount of these line of credit arrangements is a reasonable estimate of its fair value.

Long-term debt Borrowings by foreign subsidiaries have variable rates that reflect currently available terms and conditions for similar debt.

The carrying values and estimated fair values of these obligations are as follows:

	March 31, 2007		March 31, 2006
	Estimated		Estimated
	Fair		Fair
Carrying	Value	Carrying	Value
Value	Value	Value	Value
	(In thousands)

(20) SEGMENT INFORMATION

The Company reports its results in four business segments Transportation Americas, Transportation Europe and ROW, Industrial Energy Americas and Industrial Energy Europe and ROW. The Company will continue to evaluate its reporting segments pending future organizational changes that may take place.

F-45

Table of Contents**EXIDE TECHNOLOGIES AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The Company is a global producer and recycler of lead-acid batteries. The Company's four business segments provide a comprehensive range of stored electrical energy products and services for transportation and industrial applications.

Transportation markets include original-equipment and aftermarket automotive, heavy-duty truck, agricultural and marine applications, and new technologies for hybrid vehicles and 42-volt automotive applications. Industrial markets include batteries for telecommunications systems, fuel-cell load leveling, electric utilities, railroads, uninterruptible power supply (UPS), lift trucks, mining and other commercial vehicles.

The Company's four reportable segments are determined based upon the nature of the markets served and the geographic regions in which they operate. The Company's chief operating decision-maker monitors and manages the financial performance of these four business groups. Costs of shared services and other corporate costs are not allocated or charged to the business groups.

Certain asset information required to be disclosed is not reflected below as it is not allocated by segment nor utilized by management in the Company's operations.

Selected financial information concerning the Company's reportable segments is as follows:

- (a) Other includes unallocated corporate expenses, interest expense, foreign, currency remeasurement loss (gain) and loss on revaluation of warrants.
- (b) Commencing in fiscal 2007, the Company determined it to be more appropriate to allocate certain costs to its segments, which were previously reflected in Other as unallocated corporate costs. These costs include the Company's global Information Technology organization, its Shared Services expenses including country related finance organizations in Europe and ROW, its country Human Resource organizations, and certain of its legal costs which can be directly attributed to a business segment. This change in reporting was made to better align the Company's cost structure with the business segment responsible for driving the cost. This change resulted in an allocation of corporate costs to the reportable segments of \$62.6 million for fiscal 2007, including \$14.8 million to Transportation Americas, \$22.7 million to Transportation Europe and ROW, \$4.7 million to Industrial Energy Americas, and \$20.4 million to Industrial Energy Europe and ROW. Prior period costs were not restated to conform to this change. Therefore, the results between the periods may not be comparable.

(22) SUBSEQUENT EVENT

On May 15, 2007, the Company, certain of the Company's domestic subsidiaries (the "Exide U.S. Subsidiaries"), Exide Global Holding Netherlands C.V. ("Exide C.V.") and, together with the Company and the Exide U.S. Subsidiaries, the

Borrowers), various lending institutions described in the senior secured credit agreement and Deutsche Bank AG New York Branch , as administrative agent (DB and, together with such other lending institutions, the Lenders), entered into a \$495 million senior secured credit agreement. The senior secured credit agreement consists of a \$200 million asset based revolving senior secured credit facility (the Revolving Loan Facility) and a \$295 million senior secured term loan facility (the Term Loan).

The Revolving Loan

Borrowings under the Revolving Loan Facility bear interest at a rate equal to LIBOR plus 1.75%. The applicable spread on the Revolving Loan Facility will be subject to change and may move up or down in accordance with a leverage-based pricing grid. The Revolving Loan Facility includes a letter of credit sub-facility of \$75 million and an accordion feature that allows the Company to increase the facility size up to

F-48

Table of Contents

EXIDE TECHNOLOGIES AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

\$250 million if it can obtain commitments from existing or new lenders for the incremental amount. The Revolving Loan Facility will mature in five years, but is prepayable at any time at par.

Availability under the Revolving Loan Facility is subject to a borrowing base comprised of up to 85% of the Company's and certain of its subsidiaries' combined eligible accounts receivable plus 85% of the net orderly liquidation value of eligible North American inventory less, in each case, certain limitations and reserves. Revolving loans made to the Company and other domestic borrowers under the Revolving Loan Facility are guaranteed by substantially all domestic subsidiaries of the Company, and revolving loans made to Exide C.V. under the Revolving Loan Facility are guaranteed by the Company, substantially all domestic subsidiaries of the Company and certain foreign subsidiaries. These guarantee obligations are secured by a lien on substantially all of the assets of such respective Borrowers and guarantors, including, subject to certain exceptions, in the case of security provided by the domestic subsidiaries, a first priority lien in current assets and a second priority lien in fixed assets.

The Revolving Loan Facility contains customary terms and conditions, including, without limitation, limitations on liens, indebtedness, implementation of cash dominion and control agreements, and other typical covenants. A springing fixed charge financial covenant of 1.0:1.0 will be triggered if the excess availability under the Revolving Loan Facility falls below \$40 million. The Company will also be required to pay an unused line fee that varies based on usage of the Revolving Loan Facility.

The Term Loan

Borrowings under the Term Loan in U.S. dollars will bear interest at a rate equal to LIBOR plus 3.25%, and borrowings under the Term Loan in Euros will bear interest at a rate equal to LIBOR plus 3.50%; provided that such rates may decrease by 0.25% after December 31, 2007 if the Company achieves certain corporate ratings. The Term Loan will mature in five years, but is prepayable at any time at par value, provided that if a change in control or similar event occurs within the first year, the Company must offer to prepay the Term Loan at a price equal to 101% of par.

The Term Loan will amortize as follows: 0.25% of the initial principal balance of the Term Loan will be due and payable on a quarterly basis for the first 43/4 years, with a balloon payment due at maturity. Mandatory prepayment by the Company may be required under the Term Loan as a result of excess cash flow, asset sales and casualty events, in each case, subject to certain exceptions.

The portion of the Term Loan made to the Company is guaranteed by substantially all domestic subsidiaries of the Company, and the portion of the Term Loan made to Exide C.V. is guaranteed by the Company, substantially all domestic subsidiaries of the Company and certain foreign subsidiaries. These obligations are secured by a lien on substantially all of the assets of such respective Borrowers and guarantors, including, subject to certain exceptions, in the case of security provided by the domestic subsidiaries, a first priority lien in fixed assets and a second priority lien in current assets.

The Term Loan contains customary terms and conditions, including, without limitation, (1) limitations on debt (including a leverage or coverage based incurrence test), (2) limitations on mergers and acquisitions, (3) limitations on restricted payments, (4) limitations on investments, (5) limitations on capital expenditures, (6) limitations on asset sales with limited exceptions, (7) limitations on liens and (8) limitations on transactions with affiliates. The Term Loan has no financial maintenance covenants.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Partners and Board of Directors of
Exide Global Holdings Netherlands C.V.

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of operations, equity and cash flows present fairly, in all material respects, the financial position of Exide Global Holdings Netherlands C.V., a wholly-owned subsidiary of Exide Technologies, and its subsidiaries (the Successor Company or Company) at March 31, 2007 and 2006, and the results of their operations and cash flows for each of the two years in the period ended March 31, 2007, and for the period from May 6, 2004 to March 31, 2005 in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 1 to the consolidated financial statements, on April 15, 2002, Exide, together with certain of its U.S. subsidiaries (Debtors), filed voluntary petitions for reorganization under Chapter 11 of the federal bankruptcy laws in the United States Court for the District of Delaware. The Debtors' Joint Plan of Reorganization was confirmed by the Bankruptcy Court on April 21, 2004 and the Debtors declared May 5, 2004 as the effective date of the Plan as it had substantially consummated the transactions provided for in the Plan on such date. Confirmation of the plan resulted in the discharge of substantially all claims against Exide that arose before April 15, 2002 and terminated all rights and interests of equity security holders as provided for in the plan. For accounting purposes, the Company also recognized Exide's emergence from bankruptcy as of May 5, 2004.

As discussed in Note 9 to the consolidated financial statements, the Company changed the manner in which it accounts for defined benefit and postretirement plans effective March 31, 2007.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Partners and Board of Directors of
Exide Global Holdings Netherlands C.V.

In our opinion, the accompanying consolidated statements of operations, equity and cash flows present fairly, in all material respects, the results of operations and cash flows of Exide Global Holdings Netherlands C.V., a wholly-owned subsidiary of Exide Technologies (Exide), and its subsidiaries, Exide Holding Europe SAS and Exide Holding Asia Pte. Limited, (Predecessor Company or Company) for the period from April 1, 2004 to May 5, 2004 in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As discussed in Note 1 to the consolidated financial statements, on April 15, 2002, Exide, together with certain of its U.S. subsidiaries (Debtors), filed voluntary petitions for reorganization under Chapter 11 of the federal bankruptcy laws in the United States Court for the District of Delaware. The Debtors' Joint Plan of Reorganization was confirmed by the Bankruptcy Court on April 21, 2004 and the Debtors declared May 5, 2004 as the effective date of the Plan as it had substantially consummated the transactions provided for in the Plan on such date. Confirmation of the plan resulted in the discharge of substantially all claims against Exide that arose before April 15, 2002 and terminated all rights and interests of equity security holders as provided for in the plan. For accounting purposes, the Company also recognized Exide's emergence from bankruptcy as of May 5, 2004.

As discussed in Note 1 to the consolidated financial statements, on April 14, 2004, the Predecessor Company was formed by the contribution of ownership of Exide Holding Europe SAS and Exide Holding Asia Pte. Limited and their subsidiaries by Exide Technologies to the Predecessor Company. For reporting purposes, the consolidated financial statements of Exide Holding Europe SAS and Exide Holding Asia Pte Limited and their subsidiaries have been presented for periods through April 14, 2004.

EXIDE GLOBAL HOLDING NETHERLANDS C.V. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

March 31, 2007

(1) BASIS OF PRESENTATION

The Consolidated Financial Statements include the accounts of Exide Global Holding Netherlands C.V. (referred together with its subsidiaries, unless the context requires otherwise, as EGHN or the Company) and all of its majority-owned subsidiaries. The Company is a partnership that is ultimately wholly owned by Exide Technologies (referred to as Exide or the Parent Company.)

EGHN was formed on April 14, 2004 as a limited partnership under the laws of the Netherlands with the General Partner, Exide Technologies, owning 99.99% and the Limited Partner, EH International, LLC (a limited liability company, wholly owned by Exide Technologies), owning .01%. EGHN was formed by Exide's contribution of its ownership interest in its then wholly owned subsidiaries Exide Holding Europe S.A. (referred to as EHE) and Exide Holding Asia Pte Limited (referred to as EHA) and its interest in a participating loan due from EHE totaling \$148.4 million, including accrued interest of \$25.5 million. Subsequently, Exide made additional contributions of \$234.6 million in July 2004 and \$140.6 million in March 2005, which the Company used to repay a portion of its senior secured credit facility. As the Company was the successor to substantially all of the business of EHE and EHA and the Company's own operations are insignificant relative to the operations contributed, the consolidated financial statements for all periods prior to the date of formation of the Company include the consolidated financial results and position of EHE and EHA, accounted for as a merger of entities under common control.

On April 15, 2002, Exide together with certain of its U.S. subsidiaries, filed voluntary petitions for reorganization under Chapter 11 of the federal bankruptcy laws (Bankruptcy Code or Chapter 11) in the United States Bankruptcy Court for the District of Delaware (Bankruptcy Court). On November 21, 2002, two additional wholly owned, non-operating subsidiaries of Exide filed voluntary petitions for reorganization under Chapter 11 in the Bankruptcy Court. All of the cases were jointly administered for procedural purposes before the Bankruptcy Court under case number 02-11125KJC.

Exide and such subsidiaries (the Debtors) continued to operate their businesses and manage their properties as debtors-in-possession throughout the course of the bankruptcy case. The Debtors, along with the Official Committee of Unsecured Creditors, filed a Joint Plan of Reorganization (the Plan) with the Bankruptcy Court on February 27, 2004 and, on April 21, 2004, the Bankruptcy Court confirmed the Plan. The Debtors declared May 5, 2004 as the effective date of the Plan, and substantially consummated the transactions provided for in the Plan on such date (the Effective Date). For accounting purposes the Company also recognized the emergence as of May 5, 2004, as this was the date upon which the material conditions related to emergence, most significantly the finalization of the Company's and the Parent Company's exit financing, were resolved.

The emergence from Chapter 11 resulted in adoption of Fresh Start accounting and reporting in accordance with Statement of Position 90-7 (SOP 90-7), Financial Reporting by Entities in Reorganization under the Bankruptcy Code. Although EGHN was not in reorganization under Chapter 11, Fresh Start accounting was adopted for all subsidiaries of Exide for U.S. generally accepted accounting principles (GAAP) reporting purposes. Accordingly, these financial statements reflect the adoption of Fresh Start accounting as of the Effective Date. Fresh Start accounting required the Parent Company to allocate the reorganization value to its assets based upon their estimated fair values in accordance with Statement of Financial Accounting Standards (SFAS) No. 141, Business Combinations (SFAS 141). In connection with the development of the Plan the Parent Company was primarily responsible for the valuation and

directed its financial advisors to prepare a valuation analysis of its business. Management considered a number of factors, including valuations or appraisals, when estimating the fair values of the Parent Company's assets and liabilities. Each liability existing at the Plan confirmation date, other than deferred taxes, was stated at present values of amounts to be paid determined at appropriate current interest rates. Adoption of Fresh Start

Table of Contents

EXIDE GLOBAL HOLDING NETHERLANDS C.V. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

accounting has resulted in material adjustments to the historical carrying value of the Company's assets and liabilities. The excess of the reorganization value over the fair value of specific tangible and identified intangible net assets was allocated to goodwill. A portion of the reorganization value and goodwill was allocated to EGHN based on the estimated future cash flows of EGHN's businesses relative to those of the Parent Company, as contained in the Plan.

On the date of the Parent Company's emergence from bankruptcy, the third party holders of the Parent Company's senior secured credit facility exchanged their interest in the Parent Company's debt for shares of the Parent Company's new common stock. Pursuant to the plan of reorganization, the Parent Company assumed the Company's debt under the Senior Secured credit facility in exchange for an intercompany loan. The Parent Company then discharged without recourse \$46.8 million of the Company's loan, which the Company recorded as debt forgiveness. The Parent Company also became the holder of \$234.4 million of the Company's debt, which was subsequently contributed to the Company.

Since the Company adopted Fresh Start reporting as of the Effective Date, the consolidated financial statements for periods subsequent to May 5, 2004 are not comparable with those of prior periods. All financial information as of and for periods prior to May 6, 2004 is presented as pertaining to the Predecessor Company, while all financial information after that date is presented as pertaining to the Successor Company. The consolidated statements of operations reflect the results of the reorganization and Fresh Start adjustments in accordance with SOP 90-7 in the period April 1, 2004 to May 5, 2004 as Predecessor Company information.

The accompanying Consolidated Financial Statements of the Predecessor Company prior to emergence from Chapter 11 have also been prepared in accordance with SOP 90-7. Accordingly, revenues, expenses, realized gains and losses and provision for losses resulting from the reorganization are reported separately as Reorganization items, net, in the consolidated statements of operations.

Certain amounts of the Parent Company's corporate expenses, including insurance, centralized legal, accounting, information technology services, treasury, internal audit and other consulting and professional fees, have been allocated to EGHN on a basis that the Parent Company considers to be a reasonable reflection of the utilization of services provided or the benefit received by EGHN. These services are charged to the Company in the form of a fee.

(2) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation and Combination

The Consolidated Financial Statements include the accounts of Exide Global Holding Netherlands C.V. and all of its majority owned subsidiaries in which the Company exercises control (collectively, the Company). As the Company was formed on April 14, 2004, the consolidated financial statements for all periods prior to that date include the consolidated accounts of Exide Holding Europe SAS and Exide Holding Asia Pte Limited.

Investments in affiliates of less than a 20% interest are accounted for by the cost method. Investments in 20% to 50% owned companies are accounted for by the equity method. All significant intercompany transactions have been eliminated. Transactions between the Company and other Exide entities have been identified in the consolidated financial statements as transactions among related parties.

Nature of Operations

The Company manufactures and markets industrial and automotive batteries in Europe, the Middle East, India, Canada, Australia and New Zealand. The Company's industrial batteries consist of motive power batteries, such as those used in forklift trucks and other electronic vehicles, and network power batteries used

Table of Contents

EXIDE GLOBAL HOLDING NETHERLANDS C.V. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

for back-up power applications, such as those used for telecommunication systems. The Company markets its automotive batteries to a broad range of retailers and distributors of replacement batteries and automotive original equipment manufacturers.

Major Customers and Concentration of Credit

The Company has a number of major end-user, retail and original equipment manufacturer customers. No single customer accounted for more than 10% of consolidated net sales during any of the fiscal years presented. The Company does not believe a material part of its business is dependent upon a single customer, the loss of which would have a material long-term impact on the business of the Company. However, the loss of one or more of the Company's largest customers would most likely have a negative short-term impact on the Company's results of operations.

Foreign Currency Translation

The functional currencies of the Company's foreign subsidiaries are primarily the respective local currencies. Assets and liabilities of the Company's subsidiaries and affiliates are translated into U.S. dollars at the year-end exchange rate, and revenues and expenses are translated at average monthly exchange rates. Translation gains and losses are recorded as a component of accumulated other comprehensive income (loss) within partnership capital or stockholders equity. Foreign currency gains and losses from certain intercompany transactions meeting the permanently advanced criteria of Statement of Financial Accounting Standards (SFAS) No. 52 Foreign Currency Translation are also recorded as a component of accumulated other comprehensive income (loss). All other foreign currency gains and losses are included in other (income) expense, net. The Company recognized net foreign currency (gains) losses of (\$4.6) million, \$6.9 million, (\$6.2) million, and \$4.9 million in fiscal 2007 and 2006, the period May 6, 2004 to March 31, 2005, and the period April 1, 2004 to May 5, 2004, respectively.

Cash Equivalents

Cash equivalents consist of highly liquid instruments with maturities at the time of acquisition of three months or less. Cash equivalents are stated at cost, which approximates fair value, because of the short-term maturity of these instruments.

Allowance for Doubtful Accounts

The Company maintains allowances for doubtful accounts for estimated probable losses resulting from the inability of the Company's customers to make required payments. The Company continues to assess the adequacy of the reserves for doubtful accounts based on the financial condition of the Company's customers and other external factors that may impact collectibility. The majority of the Company's accounts receivable is due from trade customers. Credit is extended based on an evaluation of the Company's customers' financial condition and generally, collateral is not required. Payment terms vary and accounts receivable are stated in the consolidated financial statements at amounts due from customers net of an allowance for doubtful accounts. Accounts outstanding longer than the payment terms are considered past due. The Company considers a number of factors in determining the allowance for doubtful accounts, including the length of time trade accounts receivable are past due, the customer's current ability to pay their obligations to the Company, the Company's previous loss history, and the condition of the general economy and the industry as a whole. The Company writes off accounts receivable when they become uncollectible.

Table of Contents**EXIDE GLOBAL HOLDING NETHERLANDS C.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Inventories***

Inventories, which consist of material, labor and overhead, are stated at the lower of cost or market using the first-in, first-out (FIFO) method. The Company writes down its inventory to estimated market value based on assumptions of future demand and market conditions.

Property, Plant and Equipment

	2007	2006
	(In thousands)	
Land	\$ 48,803	\$ 47,999
Buildings and improvements	161,708	157,733
Machinery and equipment	373,219	316,107
Construction in progress	12,086	25,231
	595,816	547,070
Less Accumulated depreciation	199,574	129,985
Property, plant and equipment, net	\$ 396,242	\$ 417,085

Depreciation is provided on a straight-line basis over the estimated useful lives of the assets. The range of original estimated useful lives is as follows: buildings and improvements, 25-40 years; machinery and equipment, 3-14 years.

Cost and accumulated depreciation for property retired or disposed of are removed from the accounts, and any gain or loss on disposal is credited or charged to earnings. Expenditures for maintenance and repairs are charged to expense as incurred. Additions, improvements and major renewals are capitalized. Depreciation expense was \$69.6 million, \$66.2 million, \$63.8 million, and \$4.4 million, for fiscal 2007 and 2006, the period May 6, 2004 to March 31, 2005 (Successor Company), and the period April 1, 2004 to May 5, 2004, respectively.

Capitalized Software Costs

The Company capitalizes the cost of computer software acquired or developed for internal use, in accordance with SOP 98-1 Accounting for the Costs of Computer Software Developed or Obtained for Internal Use. The capitalized costs are amortized over the estimated useful life of the software, ranging from 3 to 5 years, on a straight-line basis.

Deferred Financing Costs

Deferred financing costs are amortized to interest expense over the life of the related debt.

Valuation of Long-Lived Assets

The Company's long-lived assets include property, plant and equipment, goodwill and identified intangible assets. Long-lived assets (other than goodwill and indefinite lived intangible assets) are depreciated over their estimated useful lives, and are reviewed for impairment whenever changes in circumstances indicate the carrying value may not be recoverable. Goodwill and indefinite-lived intangible assets are reviewed for impairment on both an annual basis and whenever changes in circumstances indicate the carrying value may not be recoverable. The fair value of goodwill and indefinite-lived intangible assets are based upon the Company's estimates of future cash flows and other factors including discount rates to determine the fair value of the respective assets. If these assets or their related assumptions change in the future, the Company may be required to record impairment charges. See Note 5.

F-60

Table of Contents

EXIDE GLOBAL HOLDING NETHERLANDS C.V. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Hedging Activities

In accordance with SFAS 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended and interpreted, the Parent Company reports all derivative financial instruments on the balance sheet at their fair values. For derivative instruments designated as cash flow hedges, the effective portion of any hedge is reported in accumulated other comprehensive income (loss) until it is cleared to earnings during the same period in which the hedged item affects earnings. The ineffective portion of all hedges is recognized in current period earnings. The Parent Company uses no derivative instruments designated as fair value hedges. In the Consolidated Statement of Cash Flows, the Company reports the cash flows resulting from its hedging activities in the same category as the related item that is being hedged.

The Parent Company enters into foreign exchange rate agreements to hedge exposure to the currency fluctuation of certain transactions denominated in a currency other than the applicable local currency.

The Parent Company also enters into forward purchase and put option agreements to economically hedge the cost of certain commodities. Exide charges EGHN for costs related to hedges entered into by the Parent Company on behalf of EGHN.

Counterparties to foreign exchange and commodity and option agreements are major financial institutions. The Parent Company believes the risk of incurring losses related to credit risk is remote.

Sales Returns and Allowances

The Company provides for an allowance for product returns and/or allowances. Based upon its manufacturing re-work process, the Company believes that the majority of its product returns are not the result of product defects. The Company recognizes the estimated cost of product returns as a reduction of sales in the period in which the related revenue is recognized. The product return estimates are based upon historical trends and claims experience, and include assessment of the anticipated lag between the date of sale and claim/return date.

Income Taxes

The Company accounts for income taxes under the provisions of SFAS 109 *Accounting for Income Taxes*, which requires the use of the liability method in accounting for deferred taxes. If it is more likely than not that some portion, or all, of a deferred tax asset will not be realized, a valuation allowance is recognized.

Revenue Recognition

The Company records sales when revenue is earned. Shipping terms are generally FOB shipping point and revenue is recognized when product is shipped to the customer. In limited cases, terms are FOB destination and in these cases, revenue is recognized when product is delivered to the customer's delivery site.

Accounting for Shipping and Handling Costs

The Company records shipping and handling costs incurred in cost of sales and records shipping and handling costs billed to customers in net sales.

Advertising

The Company expenses advertising costs as incurred.

F-61

Table of Contents

EXIDE GLOBAL HOLDING NETHERLANDS C.V. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Recently Issued Accounting Standards

In February 2006, the FASB issued Statement of Financial Accounting Standards No. 155 (SFAS 155), Accounting for Certain Hybrid Financial Instruments an amendment of FASB Statements No. 133 and 140. SFAS 155 allows financial instruments that have embedded derivatives to be accounted for as a whole, eliminating the need to separate the derivative from its host, if the holder elects to account for the whole instrument on a fair value basis. This new accounting standard is effective April 1, 2007. The adoption of SFAS 155 is not expected to have an impact on the Company s financial statements.

In March 2006, the FASB issued SFAS No. 156, Accounting for Servicing of Financial Assets an amendment of FASB Statement No. 140 (SFAS 156). SFAS 156 requires that all separately recognized servicing rights be initially measured at fair value, if practicable. In addition, this Statement permits an entity to choose between two measurement methods (amortization method or fair value measurement method) for each class of separately recognized servicing assets and liabilities. This new accounting standard is effective April 1, 2007. The adoption of SFAS 156 is not expected to have an impact on the Company s financial statements.

In July 2006, the FASB issued FIN 48 Accounting For Uncertainty In Income Taxes an Interpretation of FASB Statement 109 (FIN 48). FIN 48 which clarifies the accounting for uncertain tax positions. FIN 48 requires that the Company recognize the impact of a tax position in the Company s financial statement if that position is more likely than not of being sustained on audit based on the technical merits of the position. As required by FIN 48, the Company will adopt this new accounting standard effective April 1, 2007. The Company is currently evaluating the impact of FIN 48 on its consolidated financial statements but is not yet in a position to make this determination.

In September 2006, the FASB issued SFAS No. 157 *Fair Value Measurements* (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 applies under other accounting pronouncements that require or permit fair value measurements, the FASB having previously concluded in those accounting pronouncements that fair value is the relevant measurement attribute. Accordingly, SFAS 157 does not require any new fair value measurements. However, for some entities, the application of SFAS 157 will change current practice. SFAS 157 is effective for fiscal years beginning after November 15, 2007 (the Company s fiscal 2009), and interim periods within those years. The Company will assess the effect of this pronouncement on its financial statements, but at this time, no material effect is expected.

In February 2007, the FASB issued SFAS No. 159 *The Fair Value Option for Financial Assets and Financial Liabilities, Including an Amendment of FASB Statement No. 115* (SFAS 159). SFAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. SFAS 159 is

expected to expand the use of fair value measurement, which is consistent with the FASB's long-term measurement objectives for accounting for financial instruments. SFAS 159 is effective for fiscal years beginning after November 15, 2007 (the Company's fiscal 2009). The Company will assess the effect of this pronouncements on its financial statements, but at this time, no material effect is expected.

Table of Contents**EXIDE GLOBAL HOLDING NETHERLANDS C.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(3) ACCOUNTING FOR DERIVATIVES**

The Company accounts for derivative instruments and hedging activities in accordance with SFAS 133 Accounting for Derivative Instruments and Hedging Activities, as amended by SFAS 138, Accounting for Certain Derivative Instruments and Certain Hedging Activities and SFAS 149, Amendment of Statement 133 on Derivative Instruments and Hedging Activities (collectively, SFAS 133). SFAS 133 establishes accounting and reporting standards for derivative instruments and hedging activities. SFAS 133 requires that all derivatives be recognized as either assets or liabilities at fair value. The Company does not enter into derivative contracts for trading purposes. Derivatives are used only to hedge the volatility arising from movements in a portion of the cost of commodity purchases as well as hedging certain interest rates and foreign currency exchange rates. Changes in the fair value of cash flow hedges for which the hedged item affects earnings immediately (foreign currency transaction hedges and interest rate hedges), ineffective portions of changes in the fair value of cash flow hedges and fair value changes on certain derivatives that, despite being utilized to effectively manage the above mentioned activities, do not qualify for hedge accounting, are recognized in earnings immediately. The change in fair value of cash flow hedges for which the hedged item affects earnings immediately, related to hedge ineffectiveness and of derivatives not qualifying for hedge accounting, and for the fiscal year ended March 31, 2006 resulted in a net gain of \$7.4 million, of which a gain of \$1.1 million was recognized in other (income) expense and a gain of \$6.3 million was recognized in cost of sales. For the period May 6, 2004 to March 31, 2005 was a net loss of \$7.1 million, of which a loss of \$13.2 million was recognized in other (income) expense and a gain of \$6 million was recognized in cost of sales. At March 31, 2006, a net liability of \$2.8 million was recorded for outstanding derivative contracts.

(4) REORGANIZATION ITEMS

Reorganization items represent amounts the Company incurred as a result of the Parent Company's Chapter 11 process and are presented separately in the consolidated statements of operations. During the period May 6, 2004 to March 31, 2005, the Company incurred \$3.9 million for reorganization costs.

(5) ACCOUNTING FOR GOODWILL AND INTANGIBLES***Intangible Assets***

The Company completed its most recent annual impairment assessment of intangible assets (as required under SFAS 142) effective March 31, 2006, utilizing its updated five-year business plan as the basis for development of cash flows and an estimate of fair values. As a result of the comparison of the book carrying values of its reporting units against these estimated fair values, no adjustment of carrying values was deemed necessary. Intangible assets consist of:

Table of Contents**EXIDE GLOBAL HOLDING NETHERLANDS C.V. AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Aggregate annual amortization expense was \$4.9 million, \$4.6 million, and \$3.9 million, for the fiscal year ended March 31, 2007 and 2006, and the period May 6, 2004 to March 31, 2005, respectively, and is expected to amount to approximately \$4.9 million for each of the next five fiscal years. Intangible assets have been recorded at the proper legal entity and are subject to foreign currency fluctuations. The change in the gross amounts, shown above, from fiscal 2006 to fiscal 2007, result only from foreign currency translation. No other activity has occurred.

Goodwill

The fair values of the assets as determined by Fresh Start reporting were based on estimates of future cash flows. The estimated enterprise value of Exide of \$1.5 billion which served as the basis for the Plan approved by the Bankruptcy Court, was used to determine Exide's reorganization value, which was estimated at \$2.7 billion. A portion of the reorganization value and goodwill was allocated to EGHN based on the estimated future cash flows of EGHN's businesses relative to those of Exide, as contained in the Plan. The portion of reorganization value which could not be attributed to EGHN's specific tangible or identified intangible assets was \$222.8 million. In accordance with SFAS No. 142 (SFAS 142), Goodwill and Other Intangible Assets , this amount was reported as Goodwill in the consolidated balance sheet as of the Effective Date. Liabilities as of the Effective Date were stated at the present values of amounts to be paid. The determination of fair values of assets and liabilities is subject to significant estimation and assumptions. The enterprise value that served as the basis for determining the reorganization value was calculated using the discounted cash flow method. The cash flows, taken from Exide's Plan of Reorganization, were projected over five years, utilizing discount rates of 9% to 11%, respectively, for Exide's transportation and industrial businesses in order to reflect the inherent risks of each business. The enterprise value was based on an assumed tax rate of 0% in the U.S. in years 1 through 3 (in consideration of Exide's NOL tax position), and 38% in the remaining years. For Europe and Rest of World, a tax rate of 25% was assumed for all periods reflected.

The Company completed its annual impairment assessment of goodwill effective December 31, 2004, utilizing its five-year business plan as the basis for development of discounted cash flows and an estimate of fair values. As a result of the comparison of the book carrying values of its reporting units, including goodwill, against these estimated fair values, the Company determined that goodwill was fully impaired and a write-down of the entire \$222.8 million balance of goodwill was recorded in fiscal 2005.

(6) INVENTORIES

Inventories, valued using the first-in, first-out (FIFO) method, consist of:

	March 31, 2007	March 31, 2006

Other	7,409	3,685
	\$ 12,714	\$ 8,617

(8) DEBT

At March 31, 2007 and 2006, short-term borrowings of \$14 million and \$11.4 million, respectively, consisted of various operating lines of credit and working capital facilities maintained by certain of the Company's subsidiaries. Certain of these borrowings are secured by receivables, inventories and/or property. These borrowing facilities, which are typically for one-year renewable terms, generally bear interest at current local market rates plus up to one percent per annum. As of March 31, 2007 and 2006, the weighted average interest rate on these borrowings was 5.1% and 3.6%, respectively.

Total long-term debt at March 31, 2007 comprised the following:

	March 31, 2007
	(In thousands)
Senior Secured Credit Facility	\$ 167,116
Other, including capital lease obligations and other loans at interest rates generally ranging up to 11.0% due in installments through 2015	23,208
Total	190,324
Less-current maturities	3,964
	\$ 186,360

Total debt at March 31, 2007 was \$204.3 million.

Total long-term debt at March 31, 2006 comprised the following:

	March 31, 2006 (In thousands)
Senior Secured Global Credit Facility Borrowings primarily at LIBOR plus 4.75% to 5.25%	\$ 165,917
Other, including capital lease obligations and other loans at interest rates generally ranging from up to 11.0% due in installments through 2015(1)	23,068
Total	188,985
Less current maturities	5,360
	\$ 183,625

Total debt at March 31, 2006 was \$200.4 million.

On May 5, 2004, the Parent Company and the Company entered into a \$600 million Senior Secured Credit Agreement (the Credit Agreement) which included a \$500 million Multi-Currency Term Loan Facility and a \$100 million Multi-Currency Revolving Loan Facility including a letter of credit sub-facility of up to \$40 million. The Credit Agreement is the Company's most important source of liquidity outside of its cash

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

flows from operations. The Revolving Loan Facility matures on May 5, 2009, while the Term Loan Facility matures on May 5, 2010. The Term Loan Facility and the Revolving Loan Facility bear interest at LIBOR plus 6.25% per annum. The interest rate at March 31, 2007 and 2006 was 10.2% and 10.6%, respectively. Credit Agreement borrowings are guaranteed by substantially all of the subsidiaries of the Parent Company and are collateralized by substantially all of the assets of the Parent Company and the subsidiary guarantors. Availability for Exide under the Revolving Loan Facility and other loan facilities was \$59.3 million and \$10.4 million, respectively as of March 31, 2007. At March 31, 2007 and 2006, weighted average interest on the Credit Agreement was 10.2% and 10.6%, respectively.

The Credit Agreement requires Exide to comply with financial covenants, including an Adjusted EBITDA covenant for the relevant periods. The Credit Agreement also contains other customary covenants, including reporting covenants and covenants that restrict Exide's ability to incur indebtedness, create or incur liens, sell or dispose of assets, make investments, pay dividends, change the nature of Exide's business or enter into related party transactions.

In March 2005, the Parent Company issued \$290 million in aggregate principal amount of 10.5% Senior Secured Notes due 2013. Interest of \$15.2 million is payable semi-annually on March 15 and September 15. The 10.5% Senior Secured Notes are redeemable at the option of the Parent Company, in whole or in part, on or after March 15, 2009, initially at 105.25% of the principal amount, plus accrued interest, declining to 100% of the principal amount, plus accrued interest on or after March 15, 2011. The 10.5% Senior Secured Notes are redeemable at the option of the Parent Company, in whole or in part, subject to payment of a make whole premium, at any time prior to March 15, 2009. In addition, until May 15, 2008, up to 35% of the 10.5% Senior Secured Notes are redeemable at the option of the Parent Company, using the net proceeds of one or more qualified equity offerings. In the event of a change of control or the sale of certain assets, the Parent Company may be required to offer to purchase the 10.5% Senior Secured Notes from the note holders. Those notes are secured by a junior priority lien on the assets of the U.S. Parent Company, including the stock of its subsidiaries. The indenture for these notes contains financial covenants which limit the ability of the Parent Company and its subsidiaries to among other things incur debt, grant liens, pay dividends, invest in non-subsidiaries, engage in related party transactions and sell assets.

Also, in March 2005, the Parent Company issued Floating Rate Convertible Senior Subordinated Notes due September 18, 2013, with an aggregate principal amount of \$60 million. These notes bear interest at a per annum rate equal to the 3-month LIBOR, adjusted quarterly, minus a spread of 1.5%. The weighted average interest on these notes was 3.4% and 1.5% at March 31, 2006 and 2005, respectively. Interest is payable quarterly. The notes are convertible into the Parent Company's common stock at a conversion rate of 57.5705 shares per one thousand dollars principal amount at maturity, subject to adjustments for any common stock splits, dividends on the common stock, tender and exchange offers by the Parent Company for the common stock and third party tender offers, and in the case of a change in control in which 10% or more of the consideration for the common stock is cash or non-traded securities, the conversion rate increases, depending on the value offered and timing of the transaction, to as much as 70.2247 shares per one thousand dollars principal amount.

The Company's variable rate debt at March 31, 2007 and March 31, 2006 was \$181.1 million and \$177.3 million, respectively, none of which was hedged.

(9) EMPLOYEE BENEFIT PLANS AND POSTRETIREMENT HEALTH CARE AND LIFE INSURANCE BENEFITS

On September 29, 2006, the FASB issued SFAS No. 158, *Employers Accounting for Defined Benefit Pension and other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106 and 132(R)* (SFAS 158). SFAS 158 requires recognition of the overfunded or underfunded status of pension and other postretirement benefit plans on the balance sheet. Under SFAS 158, gains and losses, prior service costs and credits, and any remaining transition amounts under FASB Statement No. 87, *Employers Accounting for Pensions* (SFAS 87) and FASB Statement No. 106, *Employers Accounting for Postretirement Benefits Other Than Pensions* (SFAS 106) that have not yet been recognized through net periodic benefit costs will be recognized in accumulated other comprehensive income (loss), net of tax effects, until they are amortized as a component of net periodic cost. SFAS 158 does not change how pensions and other postretirement benefits are accounted for and reported in the income statement. Companies will continue to follow the existing guidance in SFAS 87, FASB Statement No. 88, *Employers Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination Benefits* and SFAS 106. SFAS 158 was effective for fiscal years ending after December 15, 2006. The company adopted the balance sheet recognition provisions of SFAS 158 at March 31, 2007. The incremental effect of adopting SFAS 158 is summarized below (in thousands):

	Before Application of SFAS 158	Adjustments	After Application of SFAS 158
Prepaid expenses and other	\$ 678	\$ 202	\$ 880
Deferred income taxes	2,665	988	3,653
Accrued expenses and noncurrent retirement obligations	(198,007)	26,922	(171,085)
Accumulated deficit	191,815		191,815

Edgar Filing: EXIDE TECHNOLOGIES - Form 10-K

Accumulated other comprehensive (income) loss	2,849	(28,112)	(25,263)
---	-------	----------	----------

European subsidiaries of the Company sponsor several defined benefit plans that cover substantially all employees who are not covered by statutory plans. For defined benefit plans, charges to expense are based upon underlying assumptions established by the Company in consultation with its actuaries. In most cases, the defined benefit plans are not funded. The Company has noncontributory defined benefit pension plans covering substantially all hourly and salaried employees in Canada. Plans covering hourly employees provide pension benefits of stated amounts for each year of credited service. The Company has numerous defined contribution plans with related expense of \$5.4 million, \$5.3 million, \$4.9 million, and \$.5 million, in fiscal 2007 and 2006, the period May 6, 2004 to March 31, 2005, and the period April 1, 2004 to May 5, 2005, respectively.
